# Worldwide Tax Guide

EDITION 2022/23

LOCAL
KNOWLEDGE,
GLOBAL
EXPERTISE

# FOREWORD

A country's tax regime is always a key factor for any business considering moving into new markets.

What is the corporate tax rate? Are there any incentives for overseas businesses? Are there double tax treaties in place? How will foreign source income be taxed?

Since 1994, the PKF network of independent member firms, administered by PKF International Limited, has produced the PKF Worldwide Tax Guide (WWTG) to provide international businesses with the answers to these key tax questions.

As you will appreciate, the production of the WWTG is a huge team effort and we would like to thank all tax experts within PKF member firms who gave up their time to contribute the vital information on their country's taxes that forms the heart of this publication.

The PKF Worldwide Tax Guide 2022/23 (WWTG) is an annual publication that provides an overview of the taxation and business regulation regimes of the world's most significant trading countries.

On a country-by-country basis, each summary addresses the major taxes applicable to business; how taxable income is determined; sundry other related taxation and business issues; and the country's personal tax regime. The final section of each country summary sets out the double tax treaty and nontreaty rates of tax withholding relating to the payment of dividends, interest, royalties and other related payments.

While the WWTG should not to be regarded as offering a complete explanation of the taxation issues in each country, we hope readers will use the publication as their first point of reference and then use the services of their local PKF member firm to provide specific information and advice.

Services provided by member firms include:

- Assurance & Advisory;
- Tax Advisory & Compliance;
- Financial Planning / Wealth Management;
- Corporate Finance;
- Management Consultancy;
- IT Consultancy;
- Insolvency - Corporate and Personal;
- Forensic Accounting; and,
- Hotel Consultancy.

## BASIC FACTS

| | |
|---|---|
| Full name: | Islamic Republic of Afghanistan |
| Capital: | Kabul |
| Main languages: | Pashto, Dari |
| Population: | 40.64 million (2022 estimate) |
| Monetary unit: | Afghani (AFN) |
| Internet domain: | .af |
| Int. dialling code: | +93 |

## KEY TAX POINTS

- All businesses irrespective of the legal status of the entity or company are subject to 20% corporate income tax on income under Article 4 of the Income Tax law in Afghanistan.
- Capital gains from the sale, exchange, or transfer of certain assets are treated as taxable income. Capital gains include the sale of a trade or business (including goodwill), a factory (including equipment, machinery, buildings and land, or any part of such assets), equipment used in the business of transporting persons and property, and shares of stock in corporations or limited liability companies.
- The calculation of tax on the taxable profits of branch offices of non-resident companies is the same as for other businesses. The tax is calculated at 20% of income after allowing certain deductible expenses.
- Individuals are subject to tax at progressive rates. The monthly maximum limit is 20% + AFN 8,900 fixed amount.
- Any income tax paid to the government of a foreign country may be taken as a credit according to the principle of reciprocity.

## A. TAXES PAYABLE

## CORPORATE TAX

All businesses irrespective of the legal status of the entity or company are subject to 20% corporate income tax under article 4 of the Income Tax law in Afghanistan.

## BUSINESS RECEIPT TAX

Business Receipt Tax (BRT) is also applicable on the gross revenue of businesses at the rates given below. BRT is treated as a deductible expense from revenue.

- Automobiles and their spare parts: 4% or 7%;
- Travel agents: 4%;
- Revenue from public entertainment, exhibitions and support events: 4%;
- Sale of merchandise and services: 4%;
- Restaurant earning less than AFN 750,000 per quarter: 4%;
- Guest house, restaurant and hotel earning AFN 750,000 per quarter: 5%;
- Club hall (without any threshold): 5%.

BRT does not apply to the following categories of Income:

- Interest income;
- Fees earned from banking transactions;
- Proceeds of futures contracts whether settled in cash or otherwise;
- Insurance or reinsurance premiums;
- Distributions received by shareholders with respect to their interest in the company;
- Export of goods and services;
- Salaries, dividends, royalties and other payments that are subject to withholding tax;
- Income received from the rent or lease of residential property to a natural person if the tenant uses the property for residential purposes for more than six months of the tax year;
- Income of persons not having a business licence that are taxed at a fixed rate.

Note:

The VAT law entered into force on 22nd December 2021 at a rate of 10%. Taxpayers who are not registered for VAT will continue to be subject to BRT.

## CAPITAL GAINS TAX

Capital gains under article 23 of the tax legislation refer to any gain from the sale, exchange, or transfer of the following assets:

1) A trade or business, including goodwill;
2) A factory including equipment, machinery, buildings and land, or any part of such assets;
3) Equipment used in the business of transporting persons and property; and
4) Shares of stock in corporations or limited liability companies.

Chargeable capital gains are treated as and included in taxable income. A gain from the sale or transfer of movable or immovable property acquired by inheritance is excluded from the provisions of paragraph (1) of this Article.

A loss incurred on the sale or exchange of capital items used in a business is deductible from the taxable income of the business from other sources for the year. While a loss on the sale of shares can only be offset against the sale or exchange of other shares in the same year.

## CALCULATION METHOD OF CAPITAL GAINS

Gains (receipts less allowable expenses) arising from capital asset transactions are divided by the number of years of usage of the said asset. The average rate so obtained is then applied to the total income of the person (natural or legal) for the year. The rate so calculated cannot be less than 2%.

## BRANCH PROFITS TAX

The calculation of tax on the taxable profits of branch offices of non-resident companies is the same as for other business. The tax is calculated at 20% of income after allowing certain deductible expenses.

The only exception to the rule is that any amount remitted outside Afghanistan to principal office or any other branch office shall be regarded as a dividend and shall be subject to withholding tax at 20%

## VALUE ADDED TAX

- The VAT law entered into force on 22nd December 2021 at a rate of 10%.
- Taxpayers who are not registered for VAT will continue to be subject to the above-mentioned BRT.
- Registration will be mandatory if the total value of taxable supplies made by the person in the past or upcoming 12 months is equal to or more than AFN 150 million (510 companies are eligible). A person registered shall remain registered for a period of at least one year from the date of registration.
- Turnover for optional registration is AFN 100 million: at least 75% of the person's taxable supplies are to registered persons or at least 25% of the supplies are for export. Once registered, these individuals must remain registered for at least two years.
- Exempted goods and services: health services, educational services, financial and insurance services, transfer or lease of immovable properties for residential purposes, provision of religious services, humanitarian aid, goods and services provided to a government entity for the purposes of rehabilitation after natural disasters, industrial incidents and catastrophes, sport services.
- Zero-rated goods and services: export of goods or services for use outside the country, international land transport of goods or passengers including the supply of goods and related services, transfer of part or whole of a business as a going concern by a registered person to another registered person, provided by a written agreement between parties and notified the Ministry of Finance, some basic foods items (wheat, flour, rice, sugar, cooking oil, tea, onions, potatoes, salt), books and educational materials, basic materials used for household purposes (coal, wood, gas, soap).
- Whenever a non-resident without a fixed place in Afghanistan makes taxable supplies of goods and services exceeding the VAT registration threshold, he shall appoint his representative who is subject to certain conditions.

## LOCAL TAXES

No local taxes are payable in respect of income of companies.

## OTHER TAXES

Other important levies in Afghanistan include customs duty and various import duties.

## B. DETERMINATION OF TAXABLE INCOME

Taxable income is calculated as revenue for the year from all sources less the following admissible expenses:

1. Any expense related to the cost of production or trade and business, such as insurance and freight expenses, etc.;
2. The cost of supplies, materials, fuel, electricity, water, and ordinary and necessary expenses used in the production of income, or in a trade or business;
3. Wages, salaries, commissions, and fees paid for services rendered by employees in trade or business;
4. Interest paid on business loans;
5. Rent paid on property necessary to and used in trade or business;
6. Cost of repairs and maintenance of properties and equipment necessary to and used for purposes of the business or trade;
7. Depreciation of movable and immovable property at rates mentioned below:

| No. | Assets | Useful Life (in Years) | Annual Percentage Allowed |
|---|---|---|---|
| 1 | Bricks or stone structures | 50 | 2 |
| 2 | Loam structure | 20 | 5 |

| No. | Assets | Useful Life (in Years) | Annual Percentage Allowed |
|---|---|---|---|
| 3 | Wooden structures | 10 | 10 |
| 4 | Machinery and equipment not otherwise specified below | 10 | 10 |
| 5 | Mining equipment | 6.5 | 15 |
| 6 | Tools | 4 | 25 |
| 7 | Printing equipment and machines | 2 | 50 |
| 8 | Handicraft machines | 3 | 33 |
| 9 | Metallurgical machines | 10 | 10 |
| 10 | Carpets | 10 | 10 |
| 11 | Rugs and other furnishings | 4 | 25 |
| 12 | Chairs, seats, and sofas | 4 | 25 |
| 13 | Desks, tables, and cabinets | 10 | 10 |
| 14 | Office equipment (calculators, typewriters, telephone, etc.) | 6.5 | 15 |
| 15 | Bicycles | 5 | 20 |
| 16 | Trucks | 2 | 50 |
| 17 | Cars | 2 | 25 |
| 18 | Tyres and tubes | 2 | 50 |
| 19 | Sacks | 2 | 50 |
| 20 | Impure iron stoves and pipes | 10 | 10 |
| 21 | Iron stoves | 2 | 50 |
| 22 | Carriages, animal carts, and handcarts | 3 | 33 |
| 23 | Construction machines, rollers and mixers | 5 | 20 |
| 24 | Computers and computer related equipment | 3 | 33 |
| 25 | Televisions, radios, and cellular phones | 3 | 33 |
| 26 | Telecommunication equipment/ cell towers | 7 | 14 |

8. Any tax or charge that is a necessary expense for doing business, holding property for income, or for producing income, if paid or accrued during the taxable year. Taxes imposed by this Law and taxes not qualifying as a necessary business expense are not deductible, except as otherwise provided for by this Law;
9. Damages to movable or immovable property caused by fire, earthquake, and by casualty or disaster of any kind, over a three year period, to the extent that the cost is determined and substantiated by records and the loss was not recovered by insurance;
10. Losses in business or trade from bad debts according to the Income Tax Manual;
11. Dividends paid in money by a legal entity organized under the laws of Afghanistan; and
12. Other expenses of doing business and of holding movable or immovable property for the production of income under relevant legislative documents.

## NON-ADMISSIBLE DEDUCTIONS

The following deductions are not allowable for tax purposes:

1. Expenses incurred to provide entertainment or advertising that are not connected with economical or commercial activities;
2. Dividends, interest, royalties, rent, commissions, wages, salaries, in case the tax has not been withheld as required by the law;
3. In case of a branch in Afghanistan of a non-resident person, any expenses paid or incurred by the non-resident person or any person connected to the non-resident person;
4. Personal expenses are not deductible;
5. Capital expenditure that is subject to depreciation;
6. Taxes paid to foreign countries by non-resident persons on income from sources within Afghanistan, if the double tax treaty is not entered into with that country.

## C. FOREIGN TAX RELIEF

Any income tax paid to the government of a foreign country may be taken as credit on the principle of reciprocity. The tax credit on a foreign tax payment is calculated as follows:

$$\text{Afghanistan tax on global taxable income} \times \frac{\text{foreign country income}}{\text{total global taxable income}}$$

## D. RELATED PARTY TRANSACTIONS

The tax authorities have the power in respect of a transaction between associates to distribute, apportion, or allocate income, deductions, or tax credits between such associates to reflect the income that would have been realised in an arm's-length transaction.

## E. PERSONAL INCOME TAX

Following are the rates at which natural persons are subject to tax:

| Income slab per month (AFN) | Applicable Rate |
|---|---|
| 0 – 5,000 | 0% |
| 5,001 – 12,500 | 2% |
| 12,501 – 100,000 | 10% + AFN 150 fixed amount |
| Over 100,000 | 20% + AFN 8,900 fixed amount |

## F. WITHHOLDING TAX RATES

Individuals and organisations are subject to the following withholding taxes:

| Type of income | Applicable Rate |
|---|---|
| Salary | At rates discussed in the preceding paragraph |
| Interest | 20% |
| Dividends | 20% |
| Royalties | 20% |
| Prizes | 20% |
| Rewards | 20% |
| Lotteries | 20% |
| Bonuses | 20% |
| Service charges | 20% |
| Rent | If monthly rent is between AFN 10,000 and AFN 100,000 - 10 %.<br>If monthly rent exceeds AFN 100,000 -15%. |
| Contractors for supplies of goods and services | 7% for contractors without a business licence<br>2% for contractors having a business licence |

# ALBANIA

## MEMBER FIRM

| City | Name | Contact Information |
|---|---|---|
| Tirana | Taulant Asllani | +355 69 94 44 920<br>taulant.asllani@pkf.al |

## BASIC FACTS

| | |
|---|---|
| Full name: | Republic of Albania |
| Capital: | Tirana |
| Main languages: | Albanian |
| Population: | 2.87 million (2022 estimate) |
| Monetary unit: | Lek (ALL) |
| Internet domain: | .al |
| Int. dialling code: | +355 |

## KEY TAX POINTS

- Taxpayers with a total annual income of up to ALL 14 million are subject to a 0% corporate income tax rate while those with a total annual income exceeding this amount are subject to a 15% corporate income tax rate.
- The standard VAT rate is 20%. Reduced rates of 6% and 10% apply to certain supplies.
- Dividends and profit shares of partnerships paid to non-resident companies are subject to an 8% final withholding tax rate, subject to the application of a double tax treaty.
- Interest, royalties, technical service fees and management fees paid to non-resident companies are subject to a 15% final withholding tax rate, subject to the application of a double tax treaty.

## A. TAXES PAYABLE

### COMPANY TAX

A company is considered a resident of Albania if it has its legal seat or place of effective management in Albania.

Resident companies are subject to tax on their worldwide income while non-resident companies are subject to tax only on Albania-sourced income.

Taxpayers with a total annual income of up to ALL 14 million are subject to a 0% corporate income tax rate while those with a total annual income exceeding this amount are subject to a 15% corporate income tax rate.

## CAPITAL GAINS TAX

Capital gains derived from the sale of a company's fixed business assets are taxed as part of the company's ordinary business income.

Specific rules apply to capital gains derived from sales of shares.

## BRANCH PROFITS TAX

There is no branch remittance tax in Albania.

## VALUE ADDED TAX (VAT)

The standard VAT rate is 20%. Reduced rates of 6% and 10% apply to certain supplies.

Certain supplies are zero rated, like e.g. exports and inward processing activity allowing the deduction of the relevant input VAT.

## B. DETERMINATION OF TAXABLE INCOME

Taxable profit is the difference between gross profits and related expenses. Income and expenses are accounted for on an accruals basis.

## DISALLOWED EXPENSES

Non-deductible expenses include among others corporate income tax, dividends, gifts, penalties and fines, the cost of in-kind benefits granted to employees (tax free at the level of the recipient), expenses in respect of technical, consulting and management services provided by third parties for which no withholding tax was paid in the relevant tax year, etc.

## DEPRECIATION

The straight-line method of depreciation is used only for intangible assets (at a 15% rate).

Tangible assets are divided into three main categories:

- computers, software products and information systems are depreciated using the declining-balance method at a rate of 25% on a pooled basis;
- buildings, structures and machinery with a long useful life are depreciated individually, using the declining-balance depreciation method at a rate of 5%;
- other assets are depreciated using the declining-balance method at a rate of 20% on a pooled basis.

Non-depreciable assets include land, fine art, antiques and jewellery.

## INTEREST DEDUCTIONS

Thin capitalisation rules limit interest deductions on loans if the debt-to-equity ratio exceeds 4:1. This rule does not apply to banks, insurance, and leasing companies.

The net interest expense (i.e. interest expense less interest income within a tax period) on loans and funding from related parties is considered deductible up to 30% of EBITDA. The non-deducted interest part can be carried forward and tax deductibility can be claimed in subsequent periods, except when the taxpayer's ownership has changed by more than 50%.

## LOSSES

Losses can be carried forward for 3 consecutive years. If during the tax year more than 50% of direct or indirect ownership of the share capital or voting rights of the company transferred losses cannot be carried forward.

Losses cannot be carried back.

From tax year 2020 taxpayers investing in business projects with a value of more than ALL billion can carry losses forward to the following 5 tax years.

## C. FOREIGN TAX RELIEF

Double taxation relief may be granted under the application of a double tax treaty. Treaty relief is optional. Unilaterally, an ordinary credit is granted for foreign taxes incurred on foreign-sourced income. The credit is calculated on a per-country basis and any excess credit can be carried forward.

## D. CORPORATE GROUPS

There is no group taxation in Albania.

## E. RELATED PARTY TRANSACTIONS

In 2014, Albania introduced detailed legislation on transfer pricing. This legislation aims to regulate controlled transactions between associated parties and to ensure that those transactions respect the arm's length principle.

Subject to transfer pricing rules are persons engaging in controlled transactions with related parties. Two persons are considered to be related parties, when:

- one person participates directly or indirectly in the management, control or capital of the other person; or
- the same person or persons participate(s) directly or indirectly in the management, control or the capital of both persons.

A person participates directly or indirectly in the management, control or capital of another person when:

- that person owns, directly or indirectly, 50 percent or more of the share capital of the other person; or
- that person effectively controls the business decisions of such other person.

**Controlled transaction notice**

A taxpayer engaged in controlled transactions (including loan balances) exceeding ALL 50 million in aggregate must submit an Annual Controlled Transactions Notice. When determining aggregate transactions, income and expenses cannot be offset.

The form of the Controlled Transactions Notice is specified in Appendix 2 of transfer pricing instruction No. 16 of 18th June 2014. A taxpayer must submit the form together with their annual financial statements to the regional tax directorate where they are registered. Submission may be in hard copy or electronic, as requested by the tax administration. The due date for submission is the end of March of the calendar year following the relevant tax year.

**Transfer pricing documentation**

The law requires taxpayers to have in place sufficient documentation to verify that a controlled transaction is consistent with the arm's-length principle. The content of the documentation is specified in Article 15 of the 2014 transfer pricing instruction. The documentation must be provided to the tax administration within 30 days from its request.

Taxpayers with an annual turnover of less than ALL 50 million are considered to satisfy the transfer pricing documentation requirements. Provided there have been no material changes to the controlled transactions, this applies even when external comparable transactions are used to benchmark against the arm's-length standard and the external comparables are updated only every third reporting period.

## F. PERSONAL TAX

Effective 1st July 2022 the following progressive rates will apply:

| Monthly remuneration (ALL) | Rate |
|---|---|
| Up to 40,000 | 0% |
| 40,001 – 50,000 | 0% up to ALL 30,000<br>6.5% of the amount over ALL 30,000 up to ALL 50,000 |
| Over 50,000 | 0% up to ALL 30,000<br>13% of the amount over ALL 30,000 up to ALL 200,000<br>ALL 22,100 + 23% of the amount over ALL 200,000 |

## G. WITHHOLDING TAX

- Dividends and profit shares of partnerships paid to non-resident companies are subject to an 8% final withholding tax rate, subject to the application of a double tax treaty.
- Interest, royalties, technical service fees and management fees paid to non-resident companies are subject to a 15% final withholding tax rate, subject to the application of a double tax treaty.

# ALGERIA

## MEMBER FIRM

| City | Name | Contact Information |
|---|---|---|
| Algiers | Stefaan De Ceulaer | +44 20 3691 2511<br>stefaan.deceulaer@pkf.com |

## BASIC FACTS

| | |
|---|---|
| Full name: | People's Democratic Republic of Algeria |
| Capital: | Algiers |
| Main languages: | Arabic |
| Other languages | French (business and education); Berber (constitutionally national) |
| Population: | 44.37 million (2022 estimate) |
| Monetary unit: | Algerian Dinar (DZD) |
| Internet domain: | .dz |
| Int. dialling code: | +213 |

## KEY TAX POINTS

- All companies are liable for corporate income tax on their profits arising from any business they carry on in Algeria, except for certain restricted categories mentioned in the tax code.
- All economic activities conducted in Algeria, including sales operations, imports, construction works and services, which are of an industrial, commercial or handicraft nature made in Algeria on a regular or occasional base are subject to VAT.
- Dividend withholding tax at a rate of 15% is imposed on dividends paid from Algerian sources to individual residents or non-resident individuals and legal entities, subject to the application of a double tax treaty.
- Relief from foreign taxes in Algeria depends on whether the country in question has entered into a double tax treaty with Algeria.
- Withholding tax applies to interests, dividends, royalties and technical service fees.

## A. TAXES PAYABLE

### INCOME TAX

Resident companies incorporated in Algeria and non-resident companies that have a permanent establishment in Algeria are liable for corporate income tax on their profits arising from any business carried on in Algeria. Depending on the activity, the rates vary as follows:

- 19% for the sector of the production of goods;
- 23% for construction, public works and hydraulic activities as well as thermal and tourist activities, excluding travel agencies;
- 26% for other activities.

## TAX ON PROFESSIONAL ACTIVITY

This tax is levied on turnover and depends on the sector. The rate varies as follows:

- 1% for manufacturing activities;
- 1.5% for building, public works and hydraulic activities;
- 3% for hydrocarbon pipeline transport activities;
- 2% for other activities (trade, services, construction, etc.).

## VALUE ADDED TAX (VAT)

VAT applies to the supply of most goods and the provision of services in Algeria. All economic activities conducted in Algeria, including industrial and handicraft activities and liberal or commercial professions, are subject to VAT. Exports by definition are consumed abroad and are in principle not subject to VAT. Any VAT charged under such circumstances is usually refundable. This avoids downward pressure on exports.

(1) Rates.

Two different VAT rates apply in Algeria:

- A special reduced rate of 9% applies to goods and services of particular economic, social or cultural interest; and,
- 19% for operations related to services and goods not subject to another rate.

(2) Filing and payment.

Monthly returns and any tax payable are generally due by the 20th day of the following month.

## SINGLE FLAT TAX (Alternative Taxation)

This is a tax that replaces several taxes (Income Tax, VAT, and Tax on Professional Activities) and is applied to taxpayers whose turnover does not exceed 8 million DZD.

The rates are as follows:

- 5%: applicable to production and sales activities;
- 12%: applicable to all other activities.

These taxpayers can also submit a request to be taxed according to the general scheme.

## PROPERTY TAX

It is a tax that applies to developed and undeveloped properties. The rate of PT varies between 3 and 10%.

## OTHER TAXES AND LEVIES VOCATIONAL TRAINING TAX

Companies that employ more than six (6) permanent employees are subject to a tax of 1% on the annual payroll for vocational training. An additional tax of 1% on the annual payroll is also payable (for learning) for all companies that employ more than 20 permanent employees. Taxpayers may be exempt from paying this tax provided they initiate training and learning activities.

## DOMICILIATION TAX

A bank domiciliation tax is imposed on the importation of goods or services.

The tax is paid at the rate of 0.5% on the amount of the importation for any request to open a file of a transaction of importation of goods. The amount of the tax cannot be less than DZD 20,000.

The rate of the tax is fixed at 4% of the amount of the domiciliation for the imports of services.

Equipment and raw materials that are not intended for resale in the State, subject to registration prior to each import commitment are exempt from this tax.

## BRANCH PROFITS AND REMITTANCE TAX

Branches of non-resident companies are subject to the same corporate tax rates as regular resident Algerian companies, i.e. the above mentioned 19%, 23% and 26%.

However, also a branch remittance tax was introduced by the Finance Act 2009 (Section 6). This tax is applicable to profits transferred to a non-resident by the branch or permanent establishment of a foreign company. The tax is payable on the profit after deduction of company tax at a rate of 15%.

## LUXURY VEHICLE TAX

Vehicles registered in the category of passenger cars (PC) which are less than five (5) years old and disclosed in the Balance Sheet of a company established in Algeria, or rented by the company for a cumulative period equal to or greater than three (3) months during a tax period, are subject to an annual tax determined.

**Vehicles rented**

- Between DZD 3,500,000 and DZD 6,000,000 = DZD 250,000;
- Over DZD 6,000,000 = DZD 500,000.

**Vehicles acquired by the company**

- Between DZD 3,500,000 and DZD 6,000,000 = DZD 350,000;
- Over DZD 6,000,000 = DZD 600,000.

However, the tax does not apply to vehicles intended exclusively for sale, either to rent or to execute a transport service available to the public, when these operations correspond to the normal activity of the owning company.

## B. DETERMINATION OF TAXABLE INCOME

Taxable income is determined on the basis of regular accounting results. When there are discrepancies between tax rules and accounting principles, adjustments are made to the accounting results. Profits are in principle considered to be gross revenue less production, salary and wages and rental expenses. Generally, all expenses generated in the conduct of a business are deductible if they are incurred in gaining or producing assessable income. However, expenses exceeding DZD 300,000 (USD 3,000) paid in cash are non-deductible from the taxable base.

### DEPRECIATION

Fixed assets owned by a company are normally written off over their normal useful life. For tax purposes, the straight-line method is normally adopted but other methods may be used in certain circumstances and with the authorisation of the tax authorities following a request.

### STOCK / INVENTORY

For the determination of net income, inventories must be evaluated at their cost price. If, at the end of the year, the market or realisable value is lower, the company must set up reserves for depreciation of the inventories. The tax authorities are very strict regarding the deductibility of provisions as they require that provisions be documented.

### DIVIDENDS

Dividends paid by a company established under Algerian law to another company established under Algerian law are subject to withholding tax at a rate of 15% at the level of the dividend-paying company.

### LOSSES

Losses may be carried forward for four years. The carry back of losses is not permitted.

### FOREIGN SOURCED INCOME

Revenues from a foreign source that are subject to tax at source on the payment in the country of origin are in principle not subject to tax in Algeria in case there is a double tax treaty. Non-resident legal entities are taxable on their Algerian source income and on gains from the disposal of buildings and the disposal of shares in real estate companies. The taxable capital gain is the difference between the sale price and the purchase cost. Relief from foreign taxes in Algeria depends on whether a double tax treaty has been concluded by Algeria.

### INCENTIVES

The Algerian tax legislation has established a number of incentives to facilitate investment and the creation of projects in certain sectors. Incentives are aimed at accelerating the growth rate and job creation within activities related to fields determined by the specific legislation. Major incentives are available for investments made by enterprises located in areas that require development. Investment project can be granted tax advantages during the launch phase and for three years during the operational phase.

### INTERCOMPANY LOANS

Interest paid to shareholders in respect of sums they surrender or make available to the company in addition to their capital shares, irrespective of the form of the company, is deductible within the limits of the average effective interest rate as established by the Central Bank of Algeria.

However, this deduction is subject to two conditions:

- The capital has been fully paid up; and
- The sums placed at the disposal of the company do not exceed 50% of the capital.

For the purpose of determining corporate income tax, the sums made available to the shareholders by the company shall be deemed to be distributed (as a dividend).

Interest on loans between related companies is deductible within the limits of the average effective interest rates as established by the Central Bank of Algeria.

For the purpose of determining corporate income tax, the proceeds of loans granted between enterprises without interest or at a reduced interest are determined by applying to the sums lent the average effective interest rates as established by the Central Bank of Algeria.

## C. FOREIGN TAX RELIEF

No unilateral double taxation relief is granted under domestic Algerian tax law for foreign taxes. Bilateral relief of foreign taxes in Algeria depends on whether the country in question has concluded a double tax treaty with Algeria. Algeria has concluded more than 30 double tax treaties.

## D. CORPORATE GROUPS

When an Algerian joint-stock company holds 90% or more of the shares of one or more Algerian joint-stock companies, the group may choose to be taxed as a single entity. Hence, the subsidiaries are treated as branches of the parent company and corporate tax is payable only by the parent company. Under this system, the profits and losses of all controlled branches, subsidiaries and partnerships in Algeria are consolidated. Once elected, the option is binding for four years.

Companies operating in the hydrocarbon sector are excluded from this regime.

## E. WITHHOLDING TAX

For certain categories of income, the payer of income has to withhold tax at source, file tax returns and submit the amount of tax withheld to the tax authorities.

- Dividends paid to shareholders are subject to a 15% withholding tax, which may be reduced under a double tax treaty;
- Interest paid to a non-resident is subject to a 10% withholding tax, which may be reduced under a double tax treaty;
- The withholding tax on royalties is 30% (effective 1 May 2020; previously 24%), which may be reduced under a double tax treaty.
- The withholding tax on technical service fees is 30% (effective 1 May 2020; previously 24%) and applies to the gross income derived from any service fee paid abroad by a local company to a foreign company;
- Most services performed in Algeria by non-resident companies are generally subject to a 30% (effective 1 May 2020; previously 24%) withholding tax.

## F. PERSONAL INCOME TAX

Personal income tax is a direct tax levied on the income of an individual. Taxpayers are classified into residents and non-residents. Income subject to tax is called assessable income and is divided into six categories:

1. Professional benefits;
2. Farm income;
3. Rental income from built and/or undeveloped properties;
4. Income from shares;
5. Salaries, wages, pensions and life annuities;
6. Capital gains on the sale of built or undeveloped buildings against payment.

For each category of income, certain deductions and allowances are granted in the calculation of the taxable income. Taxpayers should keep their accounting records in compliance with the accounting legislation in order to benefit from these deductions. In general, a person liable for personal income tax has to compute his tax liability, file a tax return and pay tax, if any, on a calendar year basis. There is no obligation to submit a tax return for taxpayers who do not receive other remuneration than salary.

Married couples file tax returns as separate individuals. Income of children is reported on the tax return of the head of the family. A spouse can report the income of their children on his/her tax return in certain circumstances.

Wages and salaries are subject to withholding tax and paid by the employer after deducting the personal income tax. The tax base includes all the pay sections subject to tax at the progressive rate detailed in the table below (effective 1 January 2022):

| Taxable income (DZD) | Rate (%) |
|---|---|
| Up to 240,000 | 0 |
| 240,001 – 480,000 | 23 |
| 480,001 – 960,000 | 27 |
| 960,001 – 1,920,000 | 30 |
| 1,920,001 – 3,840,000 | 33 |
| Over 3,840,000 | 35 |

## G. TREATY AND NON-TREATY WITHHOLDING TAX RATES

Algeria has concluded double tax treaties with the following countries:

| | Dividends | | Interest (%) | Royalties (%) |
|---|---|---|---|---|
| | Individuals, companies (%) | Qualifying companies (%) | | |
| **Domestic rates** | | | | |
| Companies | 15 | 15 | 10/40[10] | 21/30[11] |
| Individuals | 15 | -- | 10/50[10] | 21/3011 |
| **Treaty countries:** | | | | |
| Arab Maghreb Union | –[1] | –[1] | –[1] | –[1] |
| Austria | 15 | 5[3] | 0/10 | 10 |
| Bahrain | 0 | 0 | 0 | – |
| Belgium | 15 | 15 | 0/15 | 5/15[13] |
| Bosnia and Herzegovina | 10 | 10 | 10 | 12 |

| Syria | 15 | 15 | 10 | 18 |
| Turkey | 12 | 12 | 10 | 10 |
| Ukraine | 15 | 5[4] | 0/10 | 10 |
| United Arab Emirates | 0 | 0 | 0 | 10 |
| United Kingdom[9] | 15 | 5[4] | 7 | 10 |

Notes:

1. No reduction under the treaty, the domestic rate applies.
2. Income is subject to tax in the source country only, the domestic rate applies.
3. The reduced rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the paying company.
4. The reduced rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the capital of the paying company.
5. The reduced rate applies if the beneficial owner is a company which holds directly or indirectly at least 10% of the capital of the paying company.
6. The reduced rate applies if the beneficial owner is a company which, during a consecutive period of two years preceding the payment of the dividends, holds directly at least 25% of the capital of the paying company.
7. The reduced rate applies if the beneficial owner is a company which holds directly or indirectly at least 10% of the capital of the paying company.
8. The reduced rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 20% of the capital of the paying company.
9. Effective date: Algeria: 1 January 2017 (withholding and other taxes). United Kingdom: 1 January 2017 (withholding taxes)/1 April 2017 (corporate tax)/6 April 2017 (income and capital gains taxes).
10. Interest on debts, deposits and guarantees paid by resident persons to non-resident companies is subject to a final 10% withholding tax while a 40% (50% for individuals) final withholding tax applies to interest on bearer securities.
11. Royalties paid by resident persons to non-resident companies are subject to a 30% final withholding tax while an effective 21% withholding tax (70% calculated on 30% of the gross amount) is levied on the use of computer software.
12. 10% if the interest arises in France and 12% if it arises in Algeria.
13. The 5% rate applies to royalties paid for the use of, or the right to use, any copyright of literary, artistic or scientific work, excluding cinematograph films and films or tapes for radio or television broadcasting while the 15% rate applies in all other cases.
14. The 5% rate applies to royalties paid for the use of, or the right to use, any copyright of literary, artistic or scientific work excluding cinematograph films and works recorded for radio or television broadcasting while the 10% rate applies in all other cases when the royalties arise in France and 12% when they arise in Algeria.
15. The 5% rate applies to royalties related to copyright of literary, artistic or scientific work, with the exclusion of cinematograph films and films or tapes used for radio or television broadcasting while the 15% rate applies in all other cases.
16. The 2% rate applies to royalties which are paid for the use of, or the right to use, industrial, commercial, or scientific equipment while the 10% rate applies in all other cases.
17. The 14% rate applies to royalties paid for the use of, or the right to use, any copyright of literary, artistic or scientific work including cinematographic films, or films, tapes and other means of image or sound reproduction while the 7% rate applies in all other cases.
18. Effective date: 1 January 2021.
19. The 0% rate applies if (i) the payer of the interest is the Government, a political subdivision or a local authority thereof (ii) the interest is paid to the Dutch Government, a political subdivision or a local authority thereof, or to institutions or bodies (including financial institutions) wholly owned by the Netherlands or subdivision or authority, or the Dutch Central Bank (iii) the interest is paid to any institution or body (including a financial institution) in relation to loans made in application of an agreement concluded between the Governments of the Contracting States (iv) the interest is paid in respect of a loan granted by a bank, any other financial institution or a pension fund (v) the interest is paid in connection with the sale on credit of any industrial, commercial or scientific equipment.
20. The 15% applies to royalties paid for the use of, or the right to use any copyright of literary, artistic or scientific work including cinematographic films, or films, tapes and other means of image or sound reproduction. The 5% rate applies in all other cases.

# ANGOLA

| Main languages: | Portuguese |
| Other languages | Umbundu, Kimbundu, Kikongo and others |
| Population: | 34.9 million (2022 estimate) |
| Monetary unit: | Angolan Kwanza (AOA) |
| Internet domain: | .ao |
| Int. dialling code: | +244 |

## KEY TAX POINTS

- Income obtained by corporate entities established in Angola is subject to three different taxes: (i) Industrial Tax, which is levied on the corporate taxable income, including capital gains on the sale of fixed assets; (ii) Investment Income Tax, applicable to capital gains on the sale of securities, royalties, interest and dividend income; and (iii) Rental Income Tax, on rents collected from rented real estate as well as on deemed rented income from real estate owned by companies.
- A tax reform was enacted in 2020. The law introducing the changes was published on 20th July 2020 and entered into force on 19th August 2020, as a result of which the standard CIT rate was reduced from 30% to 25%. This rate also applies to non-residents with a permanent establishment in Angola. Different rates may apply to certain sectors (like mining and Oil & Gas).
- Services rendered by non-resident entities are subject to a 15% withholding tax rate.
- Transfer pricing legislation enables the tax authorities to make corrections to taxable income when either the conditions (or prices) agreed between related parties are different from those that would have been agreed and accepted between independent entities in comparable transactions.
- The VAT Code was published on 24th April 2019 and entered into force on 1st October 2019. VAT is levied on domestic supplies of goods, services and imports at a rate of 14%, although certain specified products and services are exempt from tax. The VAT regime was revised in order to widen exemptions laid out in article 12(1)(e) of the VAT Code to the conveyance and lease of property, whether for commercial, industrial, housing or any other purpose.
- Excise duty entered into force in Angola from 1st October 2019 onwards. All production, imports, and sales by public auction are subject to excise duty, calculated at different rates of 2%, 5%, 19%, and 25%, depending on the kind of product. The applicable rates for oil derivatives remain at 2%.
- Stamp duty is levied on a number of operations and contracts. With the implementation of VAT, companies covered by standard and/or simplified VAT regimes are exempt from stamp duty on the receipts.
- Special tax regimes are in place for oil and mining companies.
- The main change to the Employment Income Tax relates to the tax rates. The aim of this change is to remove the burden imposed on lower incomes, maintain the tax burden imposed on average incomes, and progressively increase the tax burden imposed on high incomes. New tax brackets are included and the minimum tax applicable to income over AOA 10,000,000 increases from 17% to 25%.
- Social security is due on remunerations paid at an 8% rate for the employer and a 3% rate for the employee.
- A new Property Tax Code was approved that entered into force on 9th August 2020 and replaces the Urban Property Tax Code.
- Foreign currency transfers on technical assistance and management services are subject to a 10% surcharge (special contribution).

## A. TAXES PAYABLE

### CORPORATE INCOME TAX

Companies are subject to the Corporate Income Tax Code (*Código do Imposto Industrial*), which was introduced by Law 19/14 of 22nd October 2014 and entered into force on 1st January 2015.

Corporate income tax (CIT) is assessed on profits arising from business activities (industrial and commercial) carried out in Angola by companies (including permanent establishments (Pes) of non-resident entities). In addition to CIT, Investment Income Tax (IIT) is withheld from domestic dividends, repatriation of profits of PEs of non-resident entities, interest on shareholders' loans, capital gains, royalties, interest and other types of income from capital invested. CIT is imposed on a worldwide basis for resident companies.

The Angolan system has two tax regimes: the general regime and the simplified regime. The simplified regime applies to taxpayers subject to CIT who are subject to the general VAT regime (business turnover equal to or not exceeding USD 250,000). Are excluded from the simplified regime:

- public companies and public entities;
- financial institutions;

- companies covered by special tax regimes;
- telecom companies; and
- subsidiaries or branches of foreign entities.

Taxpayers who have been included in the simplified taxation regime may apply to join the general regime, subject to certain conditions, and must submit their application with the relevant tax office by the end of February of the year to which the CIT relates.

The general regime applies to taxpayers with revenue exceeding USD 250,000 for either 2 consecutive or non-consecutive years and the taxable income for a taxpayer subject to this regime is the business income or profits (i.e. profits from any commercial or industrial activities), covering all types of income and gains, including those of an extraordinary nature, whether derived from the main business activity of the enterprise or from ancillary activities, including certain other items.

A tax reform was enacted in 2020. The law introducing the changes was published on 20th July 2020 and entered into force on 19th August 2020, as a result of which the standard CIT rate was reduced from 30% to 25%. This rate also applies to non-residents with a PE in Angola. Non-residents without a PE in Angola are subject to final withholding taxes at various rates depending on the type of income derived from Angola.

Income derived exclusively from agricultural, aquaculture, apiculture, poultry, livestock, fishing and forestry activities (except for the exploitation of wood) is subject to a single rate of 10%.

Income from banking and insurance activities, telecommunications companies and Angolan oil companies is subject to a 35% CIT rate.

CIT advance payments may apply to corporate entities at the rate of 6.5% or 2% for service providers and 2% for sellers of goods.

Mining companies are subject to CIT at a rate of 25%. Oil companies are subject to an oil income tax (which substitutes the CIT) at a flat rate of 50%, or at an effective rate of 65.75% for production sharing agreement partners and joint venture partners, respectively.

## WITHHOLDING TAX ON SERVICE CHARGES

Most services are subject to withholding tax at a rate of 6.5%. The withholding tax rate applicable to services rendered by non-resident entities increased from 6.5% to 15%. This withholding tax should be retained by the company paying for the service, and may be deducted on the corporate income tax return ("Modelo 1") presented by the supplier of the service as an advance payment, up to the amount of the tax assessed. The excess of the amount withheld over the assessed tax amount may be carried forward and offset against the corporate tax liability of the subsequent 5 years.

Services provided by resident companies not subject to withholding tax are: (i) educational Services; (ii) medical services; (iii) hospitality services; (iv) passenger transport services; (v) rental of equipment subject to Investment Income Tax; (vi) telecommunications services; and (vii) financial brokerage and insurance services.

## OVERSEAS SERVICE CHARGES

Management and technical assistance services provided by foreign entities must be supported by a contract which can be subject to approval of the Ministry of Economy, depending on its amount. The total amount of services contracted with overseas service suppliers shall not exceed 10 times the equity value of the Angolan company acquiring such services. In case this condition is not met, the excess amount will be treated as a non-deductible expenditure.

Payment of services to non-resident companies is subject to a final withholding tax rate of 6.5%, except in the case of the following services, which are not subject to such levy: (i) educational services; (ii) medical services; (iii) transportation services, including passengers; and (iv) rental of equipment subject to Investment Income Tax.

## PERMANENT ESTABLISHMENT

In accordance with the Angolan General Tax Code, a fixed place of business from which the company exercises the whole or a part of its activity, namely an office, a branch or a factory is deemed to be a permanent establishment. The continued provision of services for periods longer than 90 days within any 12-month period may also be deemed to be a permanent establishment. Foreign companies with a permanent establishment in Angola are subject to Industrial Tax on: (i) profits obtained by the Angolan permanent establishment; (ii) profits obtained by the head office from the sale of goods in Angola of a similar nature to those sold by the permanent establishment in that territory; and (iii) profits obtained by the head office from other commercial activities carried out in Angola of a similar nature to those carried out by the permanent establishment in that territory.

An Angolan branch of a non-resident company is taxed on its profits and capital gains in the same way as a resident Angolan company. Repatriation of Angolan branch profits to its head office is subject to Investment Income Tax at a rate of 10%.

## CAPITAL GAINS

Capital gains obtained by resident companies on the sale of fixed assets are included in their taxable income, which is taxed under Industrial Tax at the standard flat rate of 25%. Capital gains on the sale of shares and other securities are taxed under Investment Income Tax at a rate of 10%.

## VAT

As from 1st January 2021, all companies with turnover exceeding USD 250,000 are subject to the standard VAT regime, under which taxpayers charge VAT and may deduct VAT paid on goods and services acquired for the purpose of (i) transactions liable to VAT (ii) transactions that would be liable to VAT if they were located in Angola and (iii) zero-rated transactions.

VAT related to the following expenses is not deductible:

(a) expenses related to tourist vehicles, recreational crafts, helicopters, airplanes, motorcycles and mopeds;

(b) accommodation and meals expenses; and

(c) tobacco expenses.

However, VAT on expenses (a) and (b) may be deductible when the supply or exploitation of such goods is the company's activity.

For purposes of VAT deduction, taxpayers must hold a properly issued invoice (or the customs note in case of VAT paid on import of goods). VAT is deductible in the month in which the invoice was issued, or in the following month.

The standard VAT rate is 14% while a reduced 7% rate is applicable to taxpayers that fall under the Simplified Regime.

The following supplies of goods and services, among others, are VAT exempt (without the right to deduct input VAT):

- medical services performed by hospitals, clinics and similar establishments;
- educational services provided by entities duly recognized by the Ministry of Education;
- books, including in digital format;
- sale and lease of immovable property, either for housing or commercial purposes (which do not include the provision of services regarding housing under the hotels industry);
- lease of immovable property for house purposes;
- collective transport of passengers;
- health insurance, life insurance, and reinsurance operations;
- financial intermediation services.

Foreign companies without a head office or PE in Angola supplying goods in Angola or services to private individuals are required to register for VAT purposes in Angola, and charge the VAT due.

In case of services rendered by said foreign companies to an Angolan taxpayer, the reverse charge mechanism applies and the responsibility to assess and pay the tax due lies with the acquirer of the services.

### EXCISE DUTIES

As a result of the publication of the VAT Code on 24th April 2019, the Consumption Tax Code has been revoked. At the same time, the Excise Duties Code has been introduced, which has entered into force as from 1st October 2019. The Excise Duties Code covers transactions on specific products, including alcoholic beverages, tobacco, jewels, airplanes, vehicles, firearms and art items at rates varying from 2% to 25%.

Producers are required to assess the excise duties when goods are made available to purchasers and/or clients and these should be submitted with the tax authorities by the end of each month.

### STAMP DUTY

Stamp Duty (“Imposto de selo”) is levied on a wide range of operations and contracts. With the implementation of VAT, financing operations, leasing, insurance, and reinsurance transactions became subject to VAT and are thus not exempted from VAT. They are therefore exempt from stamp tax. In addition, the VAT Code revoked stamp tax on customs and taxable persons covered by the general regime of the VAT, as well as those covered by the transitional regime, are exempt from 1% stamp tax on the receipts.

Both the operations on which the tax is levied and the applicable rate are listed in the table annex to the Stamp Duty Code. Tax rates vary from 0.1% to 1%. Certain items are taxed at a determined fixed amount. Some examples are: (i) Amounts collected by a company from its customers (1%). Entities covered by the standard and/or simplified VAT regime should be exempt from stamp duty on the receipts; (ii) Loans (0.1% to 0.5% on the principal amount of the loan depending on the period for which the loan is contracted); (iii) Acquisition of property (0.3% on the property amount); (iv) Notary acts (AOA 2,000). In the particular case of loans granted by foreign companies as well as in the case of interest charged by a foreign bank, the tax must be self-assessed (under the reverse charge mechanism) and paid by the borrower.

### INVESTMENT INCOME TAX

Investment Income Tax applies to investment income, such as interest, dividends, royalties and capital gains on the sale of shares and other securities. The tax rates vary from 5% (e.g. loan interest with maturity over 3 years and dividends from listed companies) to 10% (e.g. dividends, royalties, capital gains, bank deposits interest) or 15% (interest on loan agreements). In the case of non-remunerated loan contracts, the tax authorities may deem that the loans are remunerated at a 6% interest rate. Dividends paid between Angolan resident companies are exempt from taxation if a participation of 25% has been held for a 1 year period prior to the dividend distribution, if not a tax of 10% must be withheld.

### PROPERTY TAX

A new Property Tax Code was approved that entered into force on 9th August 2020 and replaces the Urban Property Tax Code. Under the new Property Tax Code, property tax is levied as follows:

- Urban property that is not rented is subject to property tax at the following rates based on the registered property value:
  - o up to AOA 5,000,000 - 0.1%
  - o AOA 5,000,001 to 6,000,000 - AOA 5,000
  - o AOA 6,000,001 and over - 0.5% on the registered value above AOA 5,000,000.
- Rented property is subject to property tax at a rate of 25% on the taxable rental income, which is 60% of the gross rental income (i.e., 15% rate on gross rental income), although this may not be lower than property tax due based on registered value;
- Rural property is subject to property tax corresponding to a registered value of AOA 10,397 per hectare;
- The transfer of property is subject to property tax at a rate of 2%.

Property tax may be increased by 50% in cases where buildings are left vacant for more than one year or land for construction is not effectively utilised for more than three consecutive years.

## B. DETERMINATION OF TAXABLE INCOME

### GENERAL AND SIMPLIFIED REGIME

Taxable income for a taxpayer under the general regime is generally the gross income less deductible expenses and less losses attributable to the fiscal year and adjustments according to the CIT Code.

Taxable income for a taxpayer under the simplified regime that has organised accounting is determined on the same basis as for general regime taxpayers. However, when simplified regime taxpayers do not have organised accounting, the taxable income is determined by its simplified accounting model or the purchase and sale registration book and services provided, according to the provisions of the CIT Code.

### EXPENSES DOCUMENTATION

Business expenses that are not properly documented will not be accepted as tax deductible. Furthermore, they will give rise to an additional adjustment in computing the corporate taxable income, as follows: (i) in case of unproperly documented expenses (expense supported by document that does not contain all relevant elements an invoice must contain): an additional amount of 2% of the expense must be adjusted in computing the corporate taxable income; (ii) in case of undocumented expenses (expenses not supported by a valid document, but where it is possible to verify the effectiveness of the expense): an additional amount of 4% of the expense must be adjusted in computing the corporate taxable income; (iii) in case of confidential expenses: an additional amount of 30% of the expense must be adjusted in computing the corporate taxable income (50% in the case of exempt taxpayers).

### DEPRECIATION OF FIXED ASSETS

Fixed assets can be depreciated for tax purposes over the useful life of the asset. The depreciation rates are set by specific legislation and the normal method of calculation is the straight-line method. Any other method must be approved by the tax authorities.

### STOCK / INVENTORY

Inventory must normally be valued at the effective acquisition or production cost (historical cost). Any other method needs to be approved by the tax authorities.

### DIVIDENDS

When subject to Investment Income Tax dividends are excluded from the tax basis for CIT proposes. Same principle applies to other income subject to Investment Income Tax, such as capital gains on the sale of shares.

### INTEREST DEDUCTION

Interest charges arising from shareholder loans are tax deductible for corporate income tax purposes up to the limit resulting from the annual average interest rate defined by the Angolan Central Bank. Interest on loans contracted with other parties are eligible for deductibility.

### NET OPERATING LOSSES

Net operating losses incurred by resident companies or by a branch of a non-resident company may be carried forward and offset against taxable profits for the following 5 years (effective 19th August 2020, previously 3 years).

### FOREIGN EXCHANGE GAINS/LOSSES

Foreign exchange gains and/or losses arising from fixed assets and liabilities are accepted for tax purposes up to a limit of 7% of the amount of gains/losses for the year in question.

### ADDITIONAL TAXATION

Confidential expenses are subject to additional taxation (“Tributação Autónoma”) at rates of 30% and 50%. Donations granted over the limit and scope of the applicable Law are also subject to additional taxation at a rate of 15%. The amount of additional taxation should be added to the taxable income, and in case of losses has to be paid autonomously.

### FOREIGN SOURCED INCOME

Angolan companies are taxed on their worldwide income, including any foreign branch income.

### INCENTIVES

Private investment projects in Angola may benefit from tax incentives concerning CIT, SISA, IPU, Investment Income Tax, and Stamp Duty. These benefits are granted under a reduction of CIT rate by 20% for a period of two years and the reduction of the Investment Income Tax rate applicable to dividends by 25% over a two-year period.

With respect to this special regime, tax benefits are granted in case of private investments made in national priority sectors (e.g., education, agriculture, health, tourism, telecommunications, energy, among others) and vary according to the zone where the investment is made.

## C. FOREIGN TAX RELIEF

Foreign tax credits can generally not be deducted from domestic tax items. However, foreign tax credits may be granted according to the provisions of double tax treaties.

## D. CORPORATE GROUPS

Companies included in an economic group may opt to be taxed on the aggregate amount resulting from the sum of the taxable profits and losses computed within the referred economic group. This regime is only available when: (i) company is considered a Major Taxpayer; and (ii) parent company holds at least 90% of subsidiaries’ share capital, and the majority of voting rights.

## E. RELATED PARTY TRANSACTIONS

There is a general transfer pricing provision that allows the tax authorities to adjust the taxable income of any taxpayer as a result of non-arm’s length transfer pricing practices. A company listed as Major Taxpayer is required to prepare transfer pricing documentation.

## F. WITHHOLDING TAX

- Dividends paid to non-resident corporate shareholders are subject to a 10% investment income withholding tax on the gross dividends;

- Interest payments to non-resident companies are subject to a 15% investment income withholding tax on the gross amount paid.
- Royalty payments to non-residents are subject to a 10% investment income final withholding tax on the gross amount.
- Effective 19th August 2020, the withholding tax rate on services provided by non-resident entities is increased from 6.5% to 15%, which is a final withholding tax.
- Repatriation of profits attributable to a PE of a non-resident is subject to a 10% investment income withholding tax on the gross amount.

## G. EXCHANGE CONTROL

Foreign currency transfers in relation to the payment of technical assistance and management services are subject to a special contribution of 10% on the amount of the request of funds abroad. This rate has been announced as temporary and is aimed at facing the financial impact on the economy resulting from the reduction in oil prices.

## H. PERSONAL INCOME TAX

Individuals receiving employment income for work performed in Angola are subject to personal income tax. These taxpayers are divided into three groups: (i) Group A: Employment income (including salaries of board direction members); (ii) Group B: Independent professionals (listed in the annex to the Personal Income Tax Code); and (iii) Group C: Industrial and commercial activities.

### EMPLOYMENT INCOME (Group A)

Employment income is taxed by withholding tax (final) levied on the monthly remuneration paid, at the following progressive rates (effective 1st September 2020):

| Monthly taxable income (AOA) | Tax payable (AOA) and tax rates (%) |
|---|---|
| 0 – 70.000 | Exempt |
| 70,001 – 100,000 | 3,000 + 10% of the amount exceeding 70,000 |
| 100,001 – 150,000 | 6,000 + 13% of the amount exceeding 100,000 |
| 150,001 – 200,000 | 12,250 + 16% of the amount exceeding 150,000 |
| 200,001 – 300,000 | 31,250 + 18% of the amount exceeding 200,000 |
| 300,001 – 500,000 | 49,250 + 19% of the amount exceeding 300,000 |
| 500,001 – 1,000,000 | 87,250 + 20% of the amount exceeding 500,000 |
| 1,000,001 – 1,500,000 | 187,250 + 21% of the amount exceeding 1,000,000 |
| 1,500,001 – 2,000,000 | 292,250 + 22% of the amount exceeding 1,500,000 |
| 2,000,001 – 2,500,000 | 402,250 + 23% of the amount exceeding 2,000,000 |
| 2,500,001 – 5,000,000 | 517,250 + 24% of the amount exceeding 2,500,000 |
| 5,0000,001 – 10,000,000 | 1,117,250 + 24.5% of the amount exceeding 5,000,000 |
| Above 10,000,000 | 2,342,250 + 25% of the amount exceeding 10,000,000 |

### INDEPENDENT PROFESSIONALS

Self-employment income of Groups B and C is now subject to a withholding tax rate of 6.5% on the amount of the service provided (in line with the Corporate Income Tax rules foreseen for the payment of services). Similarly, random services acquired from non-residents are subject to withholding tax at the rate of 15%. Fees paid to independent professionals are subject to a (final) withholding tax at a flat rate of 15% on 70% of their gross fees (being an effective tax rate of 10.5%).

### INDUSTRIALS AND COMMERCIALS ACTIVITIES (Group C)

Income derived from industrial and commercial activities is subject to a rate of 30% determined according to the Minimum Profits Table or to a rate of 6.5% in other situations.

### MINIMUM WAGE

Minimum wage is determined according to the economic sector in which the employee works:

- Commerce and extractive industry: AOA 32,181.15;
- Transports, services and processing industry: AOA 26,817.63;
- Agriculture: AOA 21,454.10.

### SOCIAL SECURITY CONTRIBUTIONS

Social security contributions are due on the gross income of employees at the following rates:

- 8% for the employer; and,
- 3% for the employee (to be withheld by the employer).

These contributions are intended to cover family, pension, and unemployment protection.

## I. TREATY AND NON-TREATY WITHHOLDING TAX RATES

Angola has a double tax treaty in place with Portugal (effective date: 1st January 2020). The withholding tax rates are as follows:

- Dividends - 8% if the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the capital of the dividend-paying company throughout a 365 day period that includes the day of the payment of the dividend (for the purpose of computing that period, no account shall be taken of changes of ownership that would directly result from a corporate

reorganisation, such as a merger or divisive reorganisation, of the company that holds the shares or that pays the dividend); in all other cases 15%;
- Interest – 10% (a reduced 0% rate applies if interest is paid by, or beneficially owned by the other Contracting State, a political or administrative subdivision or a local authority thereof, or the Central Bank of a Contracting State);
- Royalties – 8%;
- Fees for technical services (managerial, technical, or consultancy) – 5%.

Angola also has a double tax treaty in place with the United Arab Emirates, which entered into force on 28th March 2020 (effective date: 1st January 2021). The withholding tax rates are as follows:
- Dividends - 8%;
- Interest - 8%;
- Royalties - 8%;
- Fees for technical services (managerial, technical, or consultancy) - 5%.

## KEY TAX POINTS

- Corporate income tax is levied at 25% on resident companies and branches held by non-resident companies.
- Capital gains are generally not taxable. If capital gains occur regularly and frequently, they are considered income from trade or business.
- The standard rate of Antigua and Barbuda sales tax (ABST) is 15% (similar to VAT).
- There is no withholding tax on payments to resident companies. Dividends, interest, royalties, rentals, technical services fees and management fees paid by a resident company to a non-resident company are subject to a 25% final withholding tax unless a tax treaty applies.

## A. TAXES PAYABLE

## FEDERAL TAXES AND LEVIES

### COMPANY (CORPORATION) TAX

A resident company is taxed on its worldwide income. A non-resident company is taxed on Antigua and Barbuda-sourced income only. A company is deemed to be resident if:
- it is incorporated or registered in Antigua and Barbuda;
- it is centrally managed and controlled in Antigua and Barbuda.

Corporate income tax is currently imposed at a rate of 25%. However, international business corporations (IBC) are taxed on profits at a 1% to 2.5% rate and a reduced rate of 22.5% applies to banks that offer mortgages provided they maintain an interest rate throughout the year of maximum 7%. The tax return must be filed within three months after the end of the tax year, along with the financial statements failing to which a penalty of 10% applies.

### CAPITAL GAINS TAX

Capital gains are generally not taxable. If capital gains occur regularly and frequently, they are considered income from trade or business.

### BRANCH PROFITS TAX

Branch income is taxed on the same basis and at the same rate (25%) as that of corporations.

### SALES TAX / VALUE ADDED TAX (VAT)

Antigua and Barbuda sales tax (ABST) is a value added type tax introduced in Antigua in 2007. ABST is levied on local consumption and is borne by the consumer. Taxable activities are sales of goods and supplies of services within Antigua and Barbuda and the import of goods into Antigua and Barbuda.

The standard rate of ABST is 15%. Also, a 12.5% reduced rate plus 1.5% Tourism Advertising (total 14%) applies to hotel or holiday accommodation, along with supplies that are ancillary or incidental to the supply of hotel or holiday accommodation while certain goods and services may also be zero-rated (international transportation, export, basic food items, water, electricity for residential use, sale of new residential property and fuel) and exempt (financial services, local transportation, education, services related to long-term accommodation (over 45 days), medical and veterinary services) from ABST.

The registration threshold for ABST is a total value of supplies exceeding XCD 300,000 in a continuous period of 12 calendar months.

## OTHER TAXES

### REAL ESTATE WITHHOLDING TAX

Property is subject to tax yearly at the level of the owner and is assessed by the Property Valuation Department on the market value of real property with rates ranging from 0.1% (agricultural land) to 0.5% (commercial buildings), depending on the use.

### SOCIAL SECURITY

Employers are subject to 8.5% social security contributions on a maximum ceiling of XCD 6,500 per month and 3.5% medical benefits scheme contributions of the employee's salary or wages.

### STAMP DUTY

Stamp duty on the sale of real property is 7.5% for the vendor and 2.5% for the purchaser. Non-resident sellers are subject to a 5% stamp tax on the appreciation value of the real property. Non-resident purchasers must obtain an alien land holding licence at 5% of the property value and pay a stamp duty of 2.5%. Transfer stamp tax is levied on the market value of the shares or book value of the shares, whichever is higher. Vendors pay stamp tax at a rate of 5%, purchasers pay stamp tax at a rate of 2.5%.

### CUSTOMS AND EXCISE DUTIES

Customs duties are imposed under the CARICOM Common External Tariff. There is a general exemption from duties with respect to goods imported from other CARICOM member states. Customs import duties range from 0% to 70%. Most basic food and drink items (juices and sodas) and baby-related items are subject to a 20% duty while guns and ammunitions are subject to a 70% duty. An excise duty is imposed on all spirits at varying rates.

## B. DETERMINATION OF TAXABLE INCOME

Taxable income is calculated as net profit before tax, adjusted for non-deductible expenses and allowable deductions.

### DEPRECIATION

Depreciation allowed for tax purposes is computed by way of the reducing balance method at prescribed rates. Initial allowances are granted on industrial buildings and on capital expenditures incurred on plant and machinery by a person carrying on a trade or undertaking. In addition, an annual allowance of 2% is granted on all buildings.

| Assets | Depreciation rate (%) |
|---|---|
| Buildings, roads, fencing and pavements | 2 |
| Leasehold improvements | 4 |
| Furniture, fixture, fittings and equipment | 7.5 |
| Plant and machinery and office equipment | 10 |
| Motor vehicles, golf carts, boats and aircrafts | 20 |
| Motor trucks and lorries | 22.5 |
| computer hardware and software | 33.33 |

There are no provisions regarding depreciation or amortisation of expenditure on intangible property such as patents or goodwill, or pre-incorporation and similar expenses.

### STOCK / INVENTORY

Inventory is generally stated at the lower of cost or net realisable value. The first in first out (FIFO) and average cost methods of valuation are generally used. However, the tax authorities will generally accept a method of valuation that conforms to standard accounting practice in the trade concerned. The last in first out (LIFO) method is not allowed.

### CAPITAL GAINS AND LOSSES

Capital gains are generally not taxable while capital losses are not deductible. However, capital gains that occur regularly and frequently are considered ordinary business income.

### DIVIDENDS

Dividends received by a company resident in Antigua and Barbuda from another company resident in Antigua and Barbuda are taxed at the corporate income tax rate of 25%. Credit is given to the recipient for the tax already paid on the dividend in computing the tax liability.

### INTEREST DEDUCTIONS

All outgoings and expenses wholly and exclusively incurred in the production of taxable income are deductible and thus are paid interest and royalties. There are no thin capitalisation rules.

## LOSSES

Losses can be carried forward for up to 6 years while losses cannot be carried back. Losses may only offset 50% of chargeable income in an income year. Loss carry-back is not permitted.

## FOREIGN SOURCE INCOME

Resident companies are subject to tax on their worldwide income. Foreign income is subject to the general rules of income tax and foreign business income is calculated similar to domestic business income while capital gains on foreign assets are not taxable. Foreign dividends, interest and royalties received by resident companies are included in chargeable income for their gross amount, less related outgoings and expenses.

## TAX INCENTIVES (IBT Act No. 28th Of 1982 As Amended)

**International Business Corporations Act**

Effective 1st September 2016, the International Banking Act, 2016 requires that all Corporations, which are registered as International Business Corporations, and are engaged in the International Financial Services, are subject to the Offshore Banking Tax, payable to the Commissioner of Inland Revenue, in lieu of Income tax, at the following rates:

- 2.5% on all profits and gains up to $10,000,000
- 2% on all profits and gains from $10,000,001 up to $20,000,000
- 1.5% on all profits and gains from $20,000,001 up to $30,000,000
- 1% on all profits and gains from $30,000,001

**Investment Authority Act 2006**

The 2006 Act sets the framework for the promotion of investment opportunities in Antigua and Barbuda by introducing a system of registration of businesses, an investment code and a range of incentives which are available for both local and foreign investors, like exemption from income tax, withholding tax and customs duties and reduction of stamp duty and property tax.

## C. FOREIGN TAX RELIEF

In the absence of a double tax treaty, unilateral relief of double taxation is restricted to relief for British Commonwealth taxes. In case of income taxed both in the Commonwealth country and in Antigua and Barbuda, limited relief is available for resident companies against Antigua and Barbuda income tax for the income taxes of British Commonwealth countries assessed on or deducted at source.

Unilateral relief for an eligible Commonwealth income tax is half the Antigua rate (12.5%). However, Antigua and Barbuda will only grant the unilateral relief if the source country grants similar relief to its residents for Antigua and Barbuda taxes. Unilateral relief is granted on a per-country basis and no further credit is granted for underlying tax. Foreign taxes of non-Commonwealth countries are considered to be an expense and therefore deductible.

## D. CORPORATE GROUPS

Group taxation is not permitted in Antigua and Barbuda.

## E. RELATED PARTY TRANSACTIONS

There are no transfer pricing regulations as such, nor are there rules on Controlled Foreign Companies (CFC).

## F. WITHHOLDING TAX

There is no withholding tax on payments to resident companies. Interest, royalties, rentals, technical services fees and management fees paid by a resident company to a non-resident company are subject to a 25% final withholding tax unless a tax treaty applies.

## G. EXCHANGE CONTROL

There are no limits on foreign exchange transactions.

## H. PERSONAL TAX

There is no personal income tax in Antigua and Barbuda.

## I. TREATY AND NON-TREATY WITHHOLDING TAX RATES

| | Dividends | | Interest (%) | Royalties (%) |
|---|---|---|---|---|
| | Individuals, companies (%) | Qualifying companies (%) | | |
| **Domestic rates** | | | | |
| Companies | 25 | 25 | 25 | 25 |
| Individuals | 25 | -- | 0/25 | 25 |
| **Treaty countries**[5] | | | | |
| Caricom[1] | 0/15[2] | 0/15[2] | 15 | 15 |
| Switzerland[6] | --[3] | --[3] | --[3] | 0 |
| United Kingdom | 0 | 0 | --[4] | 0 |

1. Multilateral treaty ratified by Antigua, Barbados, Belize, Dominica, Grenada, Guyana, Jamaica, Saint Kitts and Nevis, Saint Lucia, Saint Vincent and the Grenadines and Trinidad and Tobago.

2. The higher rate applies to dividends distributed from preference shares.
3. Dividends and interest are not covered under the treaty, thus the domestic rates apply.
4. Interest is not covered under the treaty, thus the domestic rate applies.
5. IBCs (International Business Corporations, see higher) do not have access to the tax treaties.
6. 1954 Treaty originally concluded between the UK and Switzerland and subsequently extended to Antigua.

# ARGENTINA

## MEMBER FIRM

| City | Name | Contact Information |
|---|---|---|
| Buenos Aires | Julián Laski | +5411 5235 6393<br>julianlaski@pkfargentina.com.ar |

## BASIC FACTS

| | |
|---|---|
| Full name: | Argentine Republic |
| Capital: | Buenos Aires |
| Main languages: | Spanish |
| Population: | 45.92 million (2022 estimate) |
| Monetary unit: | Argentine Peso (ARS) |
| Internet domain: | .ar |
| Int. dialling code: | +54 |

## KEY TAX POINTS

- Companies domiciled in Argentina are subject to income tax on their worldwide income. Non-resident companies are subject to tax on Argentina-sourced income.
- There is no separate capital gains tax levied on capital gains of companies as they fall under the scope of corporate income tax.
- VAT is applied at all stages of the production and selling processes (output tax). Tax suffered in the immediately preceding stage is deductible (input tax).
- Any foreign taxes paid on foreign-accrued income may be credited against Argentine income tax up to the limit of the Argentine tax on the same income.
- Transactions between Argentine companies and related parties are deemed to take place at arm's length rates for tax purposes. For income tax assessment purposes, Argentine Law provides for the traditional methods generally used for transfer pricing (comparable uncontrolled price, resale price, cost plus, profit split, transaction net margin) to demonstrate that an arm's length price has been used.
- Argentine-sourced income paid to foreign recipients not having a permanent establishment in Argentina is subject to 35% withholding tax. However, for each activity, the law establishes a percentage of presumptive net income on which 35% withholding tax is applicable, thereby reducing the effective tax rate.
- Income tax is levied on income earned by resident individuals in Argentina and abroad.
- Personal assets tax (wealth tax) is levied on all assets, wherever situated, of Argentine domiciled persons, on Argentine assets of non-domiciled persons and on shares issued by an Argentine company (the company pays the tax on behalf of the shareholders). In the case of trusts (excluding financial trusts), the trustee pays the tax on behalf of the beneficiaries.

## A. TAXES PAYABLE

## COMPANY TAX

Companies domiciled in Argentina are subject to income tax on all their income, whether sourced in Argentina or in a foreign country. Non-resident companies are subject to tax on Argentine-sourced income. Income from the export of goods situated in Argentina is deemed to be fully taxable and, for other specific international activities (e.g. news agencies, insurance, commercial use of films produced abroad, international transport etc.), the tax law sets a certain percentage as presumed income.

**Tax rate for corporations:**

Corporations *(Sociedades Anónimas, Sociedad de Responsabilidad Limitada - Limited Liability Corporation - en Comandita)* and branches of foreign companies (permanent establishments) domiciled in Argentina are liable to tax on the basis of a progressive tax rate ranging from 25% to 35% of annual taxable net income (effective from 1st January 2021).

| Taxable income (ARS) | Tax due on lower limit (ARS) | Marginal rate on the excess (%) |
|---|---|---|
| Up to 5,000,000 | 0 | 25 |
| 5,000,001 – 50,000,000 | 1,250,000 | 30 |
| Over 50,000,000 | 14,750,000 | 35 |

For partnerships, the tax is charged to each partner according to a progressive tax rate scale ranging from 5% to 35% depending on the amount of the taxable income.

Foreign recipients not qualifying as a permanent establishment in Argentina are subject to withholding tax at source. The rate is 35% on the applicable presumptive net income percentage, depending on the type of payment made (i.e. interest, fees, royalties, rentals, etc.). For companies organised or incorporated in Argentina, any income tax (or similar tax) paid abroad on a foreign source income is creditable against Argentine income tax, up to a certain limit.

Corporate income is taxed on an accrued basis during the company's business year. The tax is assessed annually within five months after the fiscal year end. Advanced payments must be made monthly on the basis of the tax amount paid the previous year. Moreover, the AFIP (Tax Authority) has enforced several withholding tax rulings that involve almost every type of activities. The income tax withheld during the fiscal year is creditable against the income tax assessed, as well as the advanced payments. The balance must be paid at due date. Taxpayers can submit an instalment plan (up to three instalments) accruing interest at a monthly 3.50% rate (on average, may change subject to inflation).

## CAPITAL GAINS TAX

There is no separate tax levied on capital gains for companies organised in the country or for branches as they fall under the scope of income tax. For foreign corporations, capital gains are also included under a withholding at source income tax regime at the time the payment is made.

For foreign resident companies and individuals, capital gains derived from the sale of shares, stocks, bonds and other securities (whether listed or unlisted on the Stock Exchange) are levied on income tax at a rate of 15%. Foreign resident taxpayers can elect to be taxed on the gross sales price. In this case, 90% on the gross sales price will be deemed to be the amount of capital gains that will be subject to a rate of 15%. Therefore, the effective tax rate on the gross sales price will be 13.50%.

## VALUE ADDED TAX (VAT)

This tax is applied to all stages of the production and sales processes (output tax) and the tax amount of the immediately preceding stage is deductible (input tax). The tax is imposed on the following transactions:

- Sale of personal property situated in Argentina;
- Leases and services, including financial and insurance services;
- Real estate leases;
- Work performed on third-party real property;
- Work performed on owned real property, in the case of constructors;
- Production of personal property commissioned by a third party;
- Procurement of natural goods commissioned by a third party;
- Permanent import of personal property;
- Services provided from abroad and used in Argentina (including interest). In this case, input tax must be paid by the local company and it automatically becomes 'input tax' for VAT purposes in the following month;
- Digital services provided from abroad whose use or exploitation takes place in Argentina. The definition of "digital services" includes, among others, the following: the supply and hosting of computer sites and web pages, maintenance, online technical support, the provision of digitized products in general (computer programs, digital books, designs, reports, etc.), memory services and online advertising, software, cloud-based downloads (images, text, information, video, music, games (including casinos), movies, or any digital content), online clubs, blogs, magazines, newspapers, learning , online market services and online auctions, etc.

VAT is assessed on a monthly basis. The inception of the taxable event is to issue the invoice, deliver the goods and render the service or the receipt, whichever is the earliest. The standard tax rate, currently 21%, is charged on the net price of the transaction. There are some leases and services levied at 27% (electricity, telecommunications, etc.). Some goods and services are levied at 10.50% (bovine meat, fresh vegetables, lodgings, interests on loans received from Argentine financial institutions, certain property plant and equipment, newspapers and magazines, transportation for individuals, etc.).

Exports are subject to a zero rate (destination country method). Exporters can apply input tax (incurred in making exports) against output tax arising from other taxable transactions. In case of a net input tax (internal charge), exporters are entitled to a refund (under a special procedure established by the tax authorities).

Input tax arising from the purchase of fixed assets is eligible for a refund if not used to offset output tax after 6 months. Foreign tourists are also entitled to a VAT refund (cash or in credit card account) included in personal property purchases and lodging services in some tourist areas. There are several withholding and 'collection at source' regimes in force. The VAT withheld or collected at source is creditable against the internal charge. In case of a reminding tax credit, it can be offset against any other federal tax liability.

## FRINGE BENEFITS

No tax is levied specifically on fringe benefits, since they are taxed along with income tax and social security contributions.

## MINIMUM PRESUMPTIVE INCOME TAX (MPLT)

This tax has been repealed as from fiscal year 31st December 2019.

## PERSONAL ASSETS TAX PAID ON BEHALF OF SHAREHOLDERS

Companies residing in Argentina are levied on Personal Assets Tax on behalf of their shareholders (see section "H. Personal Assets Tax (Wealth Tax)" below).

## SINGLE SIMPLIFIED TAX

Single simplified tax is a volunteer tax applicable to individuals and small partnerships that perform little activity and where the income does not exceed a threshold set by the Act. The taxpayer can choose whether to pay income tax and VAT or substitute both by paying a monthly single simplified tax. The tax is determined taking into account an income scale.

## LOCAL TAXES

The different provinces and jurisdictions within the territory of Argentina apply local taxes. A brief description is provided as follows:

### TURNOVER TAX

This is a provincial tax levied on the various stages of production and selling processes but no input tax is deductible from the tax amount of the immediately preceding stage (waterfall effect). In general, it applies to gross revenues accrued during each fiscal period (month). The tax rate is approximately 3% to 5% for commercial activities, 1.5% to 4% for industrial activities, and 1% to 3% for primary activities, according to the taxpayer's turnover and other regulations enforced by each provincial Tax Act.

Under an agreement signed between the National Administration and the Provincial Administrations, several exemptions to some productive activities have been established and the tax scheme will be gradually reshaped until this tax becomes ineffective and replaced by a 'neutral' tax. In general, small industrial activities are not liable for this tax in the jurisdiction where the factory is located.

### STAMP DUTY

The duty is levied in each of the country's jurisdictions (Provinces) on juristic acts and instruments entailing a flow of wealth between the parties involved in the legal relationship. Thus, Stamp Duty is applicable *inter alia* to acts whereby for profit transactions on real estate, personal property, services rendered and civil, commercial or financial obligations are documented. Rates vary according to the jurisdiction and the type of instrument involved, the most common one being 1% of the contract value. Under the aforesaid fiscal agreement, Stamp Duty is also to be phased out in the future but currently it is still in effect.

### LAND AND CAR TAXES

These taxes, typically 'ad valorem', are levied on land and automobiles located or registered within any of the country's 24 provinces. The fiscal assessment value of the assets and the applicable tax rate varies according to each jurisdiction.

### MUNICIPAL LEVIES

These are municipal levies applied on a range of taxable bases in the various jurisdictions, in consideration of services provided by each township. The taxable event is the performance of an activity for profit in a town. The tax rate, set by each Municipal Act, is applicable to turnover and depends on the activity performed.

## OTHER TAXES

### EXCISE TAX

This is a federal tax on specific goods and services, levied on a variety of items such as cigarettes, tobacco, alcoholic beverages (whisky, other spirits, liquor, etc.), soft drinks, beer, automobiles, ships and aircrafts, mobile phone services, insurance premiums, luxury items (jewellery, stones, pearls, furs, etc.), some electronic products (microwave oven, television set, radio, several home appliances, etc.). Excise tax is levied on the sales price. The tax rate varies depending on the item. This tax is generally levied at the production or importing stage (first stage). Furthermore, a fuel and gas tax is levied on the sale of some of these products.

### SOCIAL SECURITY CONTRIBUTIONS

These are federal taxes levied on both employers and employees. The taxable base is the salary. An employer files the tax return with the official authority under self-assessment and pays the tax withheld from the employee together with his/her liability. Employee contributions on salaries (withholding) are 17% of salary (including health care).

Employers' contributions are assessed deducting a non-taxable minimum, applying the following tax rates:

| Employer | Social Security Contribution | Health Care | Total |
|---|---|---|---|
| Non-taxable minimum | ARS 7,003 | 0% | |
| Small and medium-sized employer (including health care) | 18% | 6% | 24% |
| Large-sized employer (including health care) | 20.40% | 6% | 26.40% |

Employers' social security contributions can be partially considered as input tax for VAT purposes in some provinces. The amount that can be offset depends on the employer's location, ranging from nil in Buenos Aires up to 8.85% in some other areas.

### TAX ON CHECKING ACCOUNT DEBITS AND CREDITS

This tax is levied on financial transactions. The taxable event is not only each debit and credit in a checking account but also a large variety of financial transactions (money remittances, money orders, cheque deposit on saving accounts, etc.). The law sets out several exceptions (i.e. saving accounts, stock exchange agents, non-profitable associations, etc.), and provides for reduced rates for certain transactions such as time deposits.

To prevent tax avoidance, any amount over ARS 1,000 must be paid by cheque as a binding procedure. The tax rate applicable is 0.60% on each debit and 0.60% on each credit on checking account. Thus the whole transaction is liable for tax at a 1.2% rate. For specific activities performed by some taxpayers (who might use checking accounts to make payments on behalf of a third party) a 0.075% rate is applicable.

33% of the tax amount paid each month is creditable against income tax. The remaining 67% of the tax is a non-recoverable expense. The idea is that Financial Institutions act as withholding agents in order to ensure the revenue of the most important taxes.

Small and Medium-Sized Businesses (SMSB) that qualify and are duly registered as an SMSB can consider 100% of this tax creditable against income tax subject to certain specific conditions.

## B. DETERMINATION OF TAXABLE INCOME

Deductions for income tax assessment purposes include expenses incurred necessarily to obtain, maintain and preserve such income. The Income Tax Act lists specific regulations for dealing with the cost of products, fixed assets, real estate, or securities sold, as well as deductible bad debts, and property plant and equipment depreciation.

## INVESTMENT ALLOWANCE

At present, for general business, there is no income tax incentive scheme in force allowing additional deductions, in whole or in part, for investment in facilities and equipment.

Small and Medium Size Business (SMSB) that qualify and are duly registered as SMSB can deduct 100% depreciation of some property plant and equipment in one year subject to certain specific conditions.

## DEPRECIATION OF FIXED ASSETS

For real estate, the law sets a depreciation rate of 2% annually on the portion attributable to the building. The Tax Act indicates that fixed assets may be depreciated over their estimated useful life on a straight-line basis. Assets subject to depletion (mines, quarries etc.), may be depreciated, not under the straight-line method, but proportionally to the units extracted in each period.

## STOCK / INVENTORY

In the case of resale goods and raw materials, inventories should be valued for tax purposes at the end of each business year at their acquisition cost (last purchase value). For self-manufactured items, the inventory value is determined on the basis of the sales price at the end of the fiscal year after deducting any direct expenses associated with the sale and the net profit margin. In special cases, where cost accounting systems are maintained, own-production goods can be valued at their production cost.

## CAPITAL GAINS AND LOSSES

Capital losses are deductible, subject to the limitations noted in the paragraph under 'Losses' below.

## DIVIDENDS

- Earnings arising from fiscal years beginning as from 1st January 2018:

  Dividends and profit distributions are subject to tax at a 7% rate.
- Earnings arising from fiscal years ending up to 31st December 2017 (distributed anytime in future):

  Dividends and profit distributions are not subject to tax.

  Equalization tax applies to dividends paid to residents and non-residents when commercial profits (i.e. the profits before tax as reported in the company's financial statements) exceed taxable profits.

  If the distributed dividend does not exceed the taxable profit, equalization tax is not levied, whomever its recipients are, provided that the dividend is distributed on nominative (registered) shares. If the dividend exceeds taxable profit, a 35% withholding tax is due on the difference (equalization tax). No tax credit is derived from the tax withheld because dividends are not levied as income for the recipient (the whole tax was withheld).

## INTEREST DEDUCTION

Interest is generally deductible provided that it is incurred on loans taken out for business purposes. Otherwise the deduction is denied. Notwithstanding this, there is a threshold set on deductible interest.

Interest on financial debts (excluding commercial debts) arising from indebtedness with related parties (domiciled in Argentina or abroad), will be deductible up to the limit of 30% of the net profit before deducting such interest and depreciations. The threshold not applied can be deferred for 3 years and the non-deductible interest can be deducted in the following 5 years up to the limit applicable to each year. This rule is not applicable in some situations (financial entities, among others).

Furthermore, interest on debts arising from indebtedness with related parties domiciled abroad or any party domiciled in "non-cooperative countries" will be deductible only when paid (not when accrued).

## LOSSES

Income tax losses made in a given fiscal year may be carried forward for five years but taxpayers may only offset losses against the same type of income. Thus, stocks, bonds and foreign-sourced losses may only be offset against income of the same type.

## FOREIGN CAPITAL INFLOWS

No special regulations exist to control incoming funds disclosed as capital contributions, as the current policy is designed to encourage inflows of foreign capital. However, foreign companies should pay personal assets tax (see below) because Argentine law deems that the stock belongs to a resident individual. On the other hand, there are specific regulations in force to control outgoing funds set by the Central Bank (general anti-money laundering procedures apply).

## INCENTIVES

Promotional tax schemes are currently not available for new investment projects.

## CORPORATE MERGERS

Corporate reorganisations (de-mergers and mergers/consolidations) are to be considered 'tax-free' provided that certain legal requirements and proceedings are met. These relate, in particular, to maintenance of the shareholders' interest and continuance of the business activity carried out (two years before and after the reorganisation process). In such cases, any outstanding tax loss may be carried forward and other existing allowances and liabilities may be passed on to the successor companies.

## SHARES AND BONDS

For corporations domiciled in Argentina, the income produced by shareholding is liable for tax when share alienation takes place (not just because of holding shares). On the other hand, bonds must be valued at their current value. Therefore, the income produced by bond holding is liable for tax whether they are sold or not. For foreign residents domiciled abroad, the disposal of shares (issued by an Argentine Company) is liable to Income Tax (see paragraph A – Capital Gains Tax).

## C. FOREIGN TAX RELIEF

Any overseas income taxes paid on foreign-sourced income may be creditable against Argentine income tax up to the limit of the increase in the tax liability resulting from aggregating the foreign-sourced income.

## D. CORPORATE GROUPS

Companies belonging to the same group or holding, but having separate legal status, should pay their taxes separately and the transfer of losses from lossmaking to profit-making members of the same group of companies is not permitted. Nevertheless, payment is waived in the case of taxes arising from corporate reorganisations (de-mergers and mergers/consolidations) which comply with established legal requirement's (particularly, maintenance of the shareholders' interest and continuance of the business activity carried out) for two years before and after the reorganisation process.

## E. TRANSFER PRICING AND RELATED PARTY TRANSACTIONS

Under Argentine law, transactions between Argentine companies and related parties domiciled abroad are deemed to take place at arm's-length conditions for tax purposes. When the pricing used corresponds to normal market practices as between non-related entities, no adjustment is required for tax purposes.

For income tax assessment purposes, Argentine law provides for the traditional methods generally used for transfer pricing (comparable uncontrolled price, resale price, cost plus, profit split, transaction net margin) to demonstrate that an arm's length price has been used in transactions performed with related parties residing abroad, or any parties residing in 'non-cooperative countries'. Income tax rulings provide a positive list of 'cooperative countries' available at http://www.afip.gob.ar/jurisdiccionesCooperantes/#ver.

The related parties test is broad and not only includes transactions between a local subsidiary and its parent company but also other relationships, (e.g. local company and foreign subsidiary, local permanent establishment and foreign head office, local company and foreign permanent establishment, local company and related or non-related party residing in 'non-cooperative countries', among others).

## F. WITHHOLDING INCOME TAX FOR FOREIGN TRANSACTIONS

When Argentine-sourced income is paid to foreign recipients who do not have a permanent establishment - branch, office, etc. - in Argentina, such income is subject to a 35% withholding tax rate.

For each activity, the law sets a percentage of presumptive net income on which 35% withholding tax is applicable, thereby reducing the effective tax rate. The following chart shows the presumptive net income percentages:

| Income | Presumptive net income % A | Effective withholding tax rate % 35% x A |
|---|---|---|
| Interest on loans granted by overseas financial institutions only on the condition that the lender:<br>a) Is domiciled in a jurisdiction not considered a "jurisdiction of low or nil tax", and,<br>b) Has supervision on financial activity provided by the Central Bank (Federal Reserve). Offshore banks domiciled in any territory are not included in this category | 43% | 15.05% |
| Interest on debt arising from the import of property plant and equipment subject to depreciation (except cars) provided that the exporter is the creditor | 43% | 15.05% |
| Interest on time deposits made by foreign residents (either companies or individuals) in financial institutions located in Argentina, provided the interest is not subject to income tax in the country of residence | 43% | 15.05% |
| Other interest. This category includes (among others):<br>a) Interest on loans granted by overseas corporations or individuals;<br>b) Interest on loans granted by offshore banks domiciled in any territory considered a "jurisdiction of low or nil tax" or who's Central Bank (Federal Reserve) does not apply supervision on financial activity | 100% | 35.00% |
| Royalties arising from technical assistance or consulting not available in Argentina under specific regulations (the contract must be duly registered with the official authority) | 60% - 80% | 21% - 28% |
| Copyright (must be registered with the National Copyright Bureau) | 35% | 12.25% |
| Other royalties | 90% | 31.50% |
| Salaries of technicians, professionals, sportsmen, and artists for temporary work in Argentina (individuals only - not applicable when the provider is a corporation) | 70% | 24.50% |
| Personal property leases | 40% | 14.00% |
| Real Estate property leases | 60% | 21.00% |
| Disposal of assets situated in Argentina | 50% | 17.50% |
| Dividends and profit distributions | See paragraph B. Dividends | See paragraph B. Dividends |
| Sale of shares, stocks, bonds and other securities, applicable on the gross sales price. (In this case, the taxpayer can elect to be taxed on the capital gain at a 15% rate) | 90% x 15% tax rate | 13.50% |
| Other income | 90% | 31.50% |

## G. EXCHANGE CONTROL

Exchange controls are currently in effect, basically following anti-money laundering procedures. Foreign currency can be transferred into Argentina provided that the recipient files a disclosure with the official authority. To transfer outbound, the reason must be proved by filing forms with the Central Bank (i.e. dividends, loans, etc.).

## TAX ON FOREIGN CURRENCY PURCHASES

The tax is levied on the purchase of foreign currency without a specific destination (for hoarding, paying credit card balance in foreign currency, paying international services such as transportation, hotels, etc., among others). The purchase of foreign currency to pay for imports, invoices, loans or dividends is not subject to the tax.

The taxable base is the amount of foreign currency while the tax rate is 30%.

## H. PERSONAL TAX

Two taxes are currently levied on individuals:

- Income tax; and,
- Personal assets tax (wealth tax).

## INCOME TAX

The tax is levied on income earned in Argentina and abroad by individuals residing in Argentina. It is payable on an annual basis with five advanced payments (every two months). Any expenses incurred in generating such income may be deducted from gross income. The law sets fixed deductions: non-taxable minimum, special tax-free amount, allowance for dependents, etc.

Resident individuals are liable to tax on the basis of a progressive tax rate scale ranging from 5% to 35% of annual taxable net income. Employees are subject to withholding tax at source, for which the employer is responsible (withholding agent).

Capital gains not related to an income-generating activity are generally not subject to tax.

Financial investment profits are subject to Income Tax:

- Income (interest and others) for the placement of capital, which generates Argentinean sourced income;
- Income arising from the alienation (purchase - sale) of shares, securities, stock, bonds and other securities, which generates Argentinean sourced income.

(Taxable earnings exclude bank deposits, time deposit in financial entities, securities, mutual funds, among others (when quoted on a Local Stock Exchange).

In both cases the income is taxed at a 5% rate when capital is in ARS; or 15% for investments made in foreign currency. Income arising from the alienation of shares is subject to a 15% rate on the net value (sales price less costs).

Under the Income Tax Act, some exemptions are provided for the financial and capital markets, whereby income from shares that are quoted on the Local Stock Exchange is not subject to tax.

In the case of the disposal of real property not assigned to such an activity, the following tax is applicable:

- Real Estate purchased before 1st January 2018: a 1.50% real estate sales tax is charged on the sales value of the property, regardless of whether or not a loss or a profit is made.
- Real Estate purchased as from 1st January 2018: a 15% Income Tax is levied on the net income (sales price minus acquisition cost).

## PERSONAL ASSETS TAX (WEALTH TAX)

This tax is levied on:

- All assets located in Argentina or in foreign countries that belong to individuals resident in Argentina;
- All assets located in Argentina that belong to individuals resident in foreign countries;
- Shares issued by Argentine companies. In this case, the company pays the tax on behalf of the shareholders;
- Trusts (excluding financial trusts). In this case, the trustee pays the tax on behalf of the beneficiaries.

### Individuals Residing in Argentina

This tax is levied on all assets located in Argentina and in foreign countries. Similar tax paid overseas in respect of assets located in foreign countries is creditable against personal assets tax. The only deduction allowed is the amount of liabilities arising from the purchase or construction of the taxpayer’s home. Investments in shares issued by an Argentine company are not to be included in the taxable base because the company pays this tax on behalf of the shareholders (a situation that does not mean shares are exempted).

The tax is assessed on the value of property that exceeds the tax free amount (ARS 6,000,000 from the year 2021 onwards and ARS 30,000,000 only for real estate that serves as the taxpayer’s home). If the taxable base is higher than the tax free amount, the tax is assessed on the net amount. A progressive tax rate scale is applicable, ranging from 0.50% to 1.75% on the value of the property located in Argentina, and ranging from 0.70% to 2.25% on the value of the property located in foreign countries.

### Individuals and Companies Residing in a Foreign Country

The tax is also charged on assets located in Argentina and owned by individual non-residents at a 0.50% rate. Neither deductions nor a taxable minimum are allowed. In the case of certain assets (i.e. securities, non-exploited real estate property, etc.) located in Argentina and owned by foreign companies, these are deemed to belong to individuals and are subject to personal assets tax at a 1% rate.

Shareholders of an Argentine company who reside in foreign countries are liable for personal assets tax. The tax liability is not assessed directly but is paid by the company on behalf of its shareholders (see the next paragraph).

### Shares Issued by Argentine Companies or Trusts

Shares whose holders are non-resident companies or individuals are deemed to belong to non-resident individuals and the tax is levied on those shares. The taxable base is the Argentine company's equity value assessed on the company's last financial statements. The tax rate is 0.50%.

In all such cases, the tax is assessed and paid by the Argentine company on behalf of the shareholders. The tax paid is not deductible for income tax purposes because the company is allowed to claim the tax paid to the shareholders. A foreign company's branch (a permanent establishment in Argentina) will be subject to personal assets tax in respect of the capital assigned to the branch. In the case of trusts (excluding financial trusts), the trustee pays the tax on behalf of the beneficiaries. The taxable base is the amount of the assets.

## I. TREATY AND NON-TREATY WITHHOLDING TAX RATES

| | Dividends[10] (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| **Non-Treaty Countries** | 7 See paragraph B. Dividends | 15.05/35[9] | 12.25/28/31.50[6] |
| **Treaty Countries:** | | | |
| Australia | 10/15[1] | 12 | 10/15[5] |
| Belgium | 10/15[1] | 0/12[11] | 3/5/10/15[7] |
| Bolivia | --[8] | --[8] | --[8] |
| Brazil | --[8] | --[8] | --[8] |
| Canada | 10/15[1] | 0/12.50[12] | 3/5/10/15[7] |
| Chile | 10/15[1] | 4/12/15[13] | 3/10/15[7] |
| Denmark | 10/15[1] | 0/12[14] | 3/5/10/15[7] |
| Finland | 10/15[1] | 15[3] | 3/5/10/15[7] |
| France | 15[1] | 20[3] | 18 |
| Germany | 15[1] | 10/15[2] | 15[3] |
| Italy | 15[1] | 0/20[12] | 10/18[5] |
| Mexico | 10/15[1] | 0/12 | 10/15[5] |
| Netherlands | 10/15[1] | 0/12[12] | 3/5/10/15[7] |
| Norway | 10/15[1] | 0/12/12.50[12, 15] | 3/5/10/15[7] |
| Qatar[17] | 5/10/15 | 12 | 10 |
| Russia | 10/15[1] | 15 | 15 |
| Spain | 10/15[1] | 0/12[12] | 3/5/10/15[7] |
| Sweden | 10/15[1] | 0/12/12.50[12, 16] | 3/5/10/15[7] |
| Switzerland | 10/15[1] | 12 | 3/5/10/15[7] |
| United Arab Emirates | 5/10/15 | 12 | 10 |
| United Kingdom | 10/15[1] | 0/12[12] | 3/5/10/15[7] |
| Uruguay | --[4] | --[4] | --[4] |

NOTES:

1. This is the percentage ceiling set under the treaty. However, it is only applicable when the conditions set under paragraph B. 'Dividends' are met.
2. The lower 10% rate applies to sales on credit of industrial, commercial or scientific equipment, and loans granted by a bank or for the financing of public works.
3. This is the ceiling set by the treaty. However, when the effective rate for non-treaty countries is lower, the latter rate is applicable.
4. Under the treaty no ceilings were set but the jurisdiction where the tax should be levied was established. Therefore, applicable rates are those for non-treaty countries.
5. The 10% rate applies to copyright royalties.
6. The actual rate is 35%, but levied on 35%, 80% or 90% of the income, which results in an effective tax rate of 12.25%, 28% and 31.50%. See above under F.
7. A 3% rate applies to news-related royalties, a 5% rate applies to copyright royalties (other than royalties related to films or tapes), a 10% rate applies to trademarks, patents, certain lease-related royalties and technical assistance, and a 15% rate applies to other cases.
8. Under the treaty no ceilings were set but the jurisdiction where the tax should be levied was established. Therefore, applicable rates are those for non-treaty countries.
9. See withholding taxes description at (F) above.
10. The lower rate generally applies to participations of at least 25% of capital or voting power.
11. The 0% rate applies to, *inter alia*, (i) interest on commercial debt claims (including debt-claims represented by commercial paper) resulting from deferred payments for machinery or equipment supplied by an enterprise, except where such interest is paid between associated enterprises and (ii) interest on loans of any nature (not represented by bearer instruments) granted on preferential terms for a period of at least three years by a banking enterprise.
12. The 0% rate applies to, *inter alia*, interest paid by public bodies.
13. The general treaty rate is 15% while the 4% rate applies to interest from a sale on credit paid by the purchaser of machinery and equipment to a beneficial owner that is the seller of the machinery and equipment and the 12% rate to interest derived from loans granted by banks and insurance companies and bonds or securities that are regularly and substantially traded on a recognized securities market.
14. The general treaty rate is 12% while a 0% rate applies to interest paid to (national) banks and financial institutions, subject to certain conditions.

15. The general treaty rate is 12.5%. However, under the application of a most favoured nation clause the rate is reduced to 12% (Argentina-Australia treaty).
16. The general treaty rate is 12.5%. However, under the application of a most favoured nation clause the rate is reduced to 12% (Argentina-Denmark treaty).
17. Effective date: 1st January 2022.

## KEY TAX POINTS

There are general and special taxation systems in force in the Republic of Armenia.

**Special taxation system:**

- Under the turnover tax system, organisations are subject to turnover tax, to VAT and/or substitute profit tax while private entrepreneurs and notaries are subject to turnover tax, substitute profit tax, and VAT excluding patent tax.
- Under the patent tax system, on the activities considered as objects of taxation of patent tax, organisations are subject to patent tax substitute to VAT and/or profit tax while private entrepreneurs and notaries are subject to patent tax, substitute profit tax and VAT.
- A resident organisation of the Republic of Armenia shall be the organisation whose location is in the Republic of Armenia.
- Resident Individuals in the Republic of Armenia are those Individuals who have stayed 183 and more days during the tax year in the Republic of Armenia.
- Days of actual stay in the Republic of Armenia are also the days of arrival and departure from the Republic of Armenia, regardless of the number of hours actually spent by the individual during these days in the Republic of Armenia.
- Resident individuals are also:
  - Those individuals whose vital interests centre is located in the Republic of Armenia. The centre of vital interests is the place where the family or economic interests of an individual are focused. Particularly, it is considered that the center of vital interests of an individual is located in the Republic of Armenia if its home or other apartment, family, professional or other place of business is located in the Republic of Armenia.
  - Individuals who are temporarily outside of the territory of the Republic of Armenia, but who are in State service in the Republic of Armenia.
  - For the purposes of the Tax Code, if an individual is considered to be a resident at any date of the tax year, then that individual shall be deemed to be resident for the whole tax year.

## A. TAXES PAYABLE

## FEDERAL TAXES AND LEVIES

In Armenia, the following State taxes are applicable:

1. Value added tax (hereinafter also referred to as “VAT”)
2. Excise tax
3. Profit tax
4. Income tax
5. Environmental tax
6. Road tax
7. Turnover tax
8. Patent tax.

## COMPANY TAX

General and specific taxation systems are applicable in Armenia.

- Within the framework of the general taxation system, organisations, individual entrepreneurs and notaries are taxed, in particular, under VAT and/or profit tax.

- In specific taxation systems:
  - Within the framework of the system of turnover tax, organisations, individual entrepreneurs and notaries are taxed, in particular, under turnover tax replacing VAT and/or profit tax;
  - Within the framework of the system of patent tax, organisations and individual entrepreneurs are taxed, in particular, under patent tax replacing VAT and/or profit tax;
  - Within the framework of the system of family entrepreneurship, organisations and individual entrepreneurs are exempt, in particular, from taxation under VAT and/or profit tax, as well as under turnover tax.

## CAPITAL GAINS TAX

1. Profit taxpayers are:
   - Resident organisations, except for cases prescribed by part 2 of this Article;
   - The following entities registered in Armenia:
     - individual entrepreneurs;
     - notaries;
   - Contractual investment funds (except for pension funds and guarantee funds), which are registered in Armenia;
   - Non-resident organisations, as well as non-resident natural persons carrying out activities in Armenia through a permanent establishment and/or deriving Armenian-sourced income through a permanent establishment.
2. Subject to Profit tax are:
   - Regarding resident organisations, individual entrepreneurs registered in Armenia and notaries (hereinafter referred to as "resident profit taxpayers") — gross income derived or to be derived (hereinafter referred to as "derived" in this Section) from sources of and/or outside Armenia, except for personal income of individual entrepreneurs registered in Armenia and notaries;
   - Regarding investment funds (except for pension funds and guarantee funds) which are registered in Armenia, as well as for securitisation funds established under Armenian law "On asset securitisation and asset backed securities" — total net assets;
   - Regarding non-resident organisations, as well as non-resident natural persons carrying out activities in Armenia through a permanent establishment and/or deriving Armenian-sourced income through a permanent establishment (hereinafter referred to as "non-resident profit taxpayers") — Armenian-sourced gross income, except for Armenian-sourced personal income of non-resident natural persons carrying out activities in Armenia through a permanent establishment and/or deriving Armenian-sourced income through a permanent establishment.
3. Profit tax base constitutes:
   - Regarding resident profit taxpayers — taxable profit, which is determined as the positive difference between gross income and certain deductions;
   - Regarding investment funds (except for pension funds and guarantee funds) which are registered in Armenia, as well as for securitisation funds established under Armenian law "On asset securitisation and asset backed securities" — total net assets, which is determined in accordance with the procedure defined by the Armenian Central Bank and agreed upon with the tax authority. For the purpose of applying this paragraph, dividends or other amounts distributed in any similar way out of the assets of the investment fund to its participants shall not be deducted from the net assets of the investment fund;
   - Regarding non-resident organisations and non-resident natural persons carrying out activities in Armenia through a permanent establishment and/or deriving Armenian-sourced income through a permanent establishment (hereinafter referred to as "non-resident profit taxpayers carrying out activities in Armenia through a permanent establishment" in this Section) — taxable profit, which is determined as the positive difference between gross income and certain deductions;
   - Regarding non-resident organisations carrying out activities in Armenia without a permanent establishment and/or deriving Armenian-sourced income without a permanent establishment (hereinafter referred to as "non-resident profit taxpayers carrying out activities in the Republic of Armenia without a permanent establishment") — gross income.
   - Regarding activities not attributable to a permanent establishment and/or the income of non-resident organisations carrying out activities in Armenia through a permanent establishment — gross income.
4. Profit tax rates:
   - Profit tax is calculated at a rate of 20% on the tax base of a resident income taxpayer and a non-resident profit taxpayer operating in the Republic of Armenia through a permanent establishment.
   - Profit tax is calculated at the rate of 0.0% on the tax base of investment funds registered in the Republic of Armenia.
   - Profit tax taxable base on non-resident taxpayers is calculated at the following rates:
     a. 5% in respect of insurance premiums, reinsurance payments and revenues received for transportation;
     b. 10% in respect of passive income;
     c. 0% in respect of dividends received from the All-Armenian Bank;
     d. 0% in respect of the assets' value acquired from the alienation of securities;
     e. 20% in respect of other income received from Armenian sources.

## SALES TAX / VALUE ADDED TAX (VAT)

Value-added tax (VAT) is a federal tax payable to the state budget in accordance with the procedure established by Tax Code of the RA, for carrying out transactions and/or operations that are subject to taxation. The following operations and transactions are VAT taxable items:

- Supply of goods.
- Performance of work and/or rendering of services.

- Import of Goods to the Republic of Armenia by Customs Procedure "Skip for Internal Consumption".
- Import of goods to the Republic of Armenia, having the status of EEU products from the member states of the Eurasian Economic Union.
- The goods delivery operation is not VAT taxable subject if the place of supply of goods is not considered to be in the Republic of Armenia.
- The transport service contract of cargo, post and/or passenger transportation by any type is not considered VAT taxable unless it starts and ends outside the Republic of Armenia.
- VAT is calculated at a rate of 20% and 16.67% for the taxable base of transactions and operations, which are subject to VAT according to the Tax Code.
- The amount of compensation included in the VAT amount for the supply, performance or service provision the amount of VAT is determined by the calculated value of the rate of 16.67%, if:
  a. organisation, individual entrepreneur or notary did not consider itself a VAT payer contrary to the Tax Code requirements;
  b. VAT payer organisation, individual entrepreneur or a notary in the settlement document drawn up for transactions considered to be taxable subject to 20% VAT rate, has not specified the VAT rate and amount on a separate line;
  c. VAT payer organisation, individual entrepreneur or a notary has not issued a settlement document on VAT taxable object transactions subject to 20% VAT taxation;
  d. VAT payer organisation, individual entrepreneur or a notary has provided only Control Cash machine ticket to buyer for transactions and/or operations considered VAT taxable.

## LOCAL TAXES

1. Property tax
2. Vehicle property tax.

## OTHER TAXES

### Excise Tax

Goods subject to Excise taxation are the following:

- ethyl alcohol (excluding cognac alcohol);
- alcoholic drinks;
- beer;
- wine;
- tobacco products (including tobacco substitutes, cigars, cigarels);
- lubricating oil;
- petrol;
- diesel fuel;
- crude oil;
- petroleum products;
- petroleum gases;
- other carbohydrates (excluding compressed natural gas);
- compressed natural gas.

### Environmental Tax

The environmental tax is a tax payable to the state budget for the purpose of implementing environmental measures in order to create the necessary funds.

Subject to environmental taxation are:

- emissions of atmospheric air pollutants;
- outflow of harmful substances and/or compounds to water resource;
- the utilisation, production and/or consumption of entrails in specially allocated places;
- goods, which cause damage to the environment:
  - o Importation into the territory of the Republic of Armenia,
  - o the alienation of import-seller and/or producers-sellers in the territory of the Republic of Armenia.

### Road Tax

Road tax is a tax payable to the state budget for the development of the road network of the Republic of Armenia, the creation of funds necessary for the construction, repair and maintenance of the state automobile roads of general use of the Republic of Armenia.

Subject to road taxation are:

1. Use of automobile roads of the Republic of Armenia by unregistered (off-road) motor vehicles in the Republic of Armenia;
2. Use of automobile roads of the Republic of Armenia by registered freight vehicles registered in the Republic of Armenia;
3. Placement of advertising on public roads of the Republic of Armenia;
4. The road tax is calculated for every 15 days of entry into the Republic of Armenia by non-registered trucks in the Republic of Armenia for the use of motor roads of the Republic of Armenia, according to the maximum permissible mass of the motor vehicle.

## Turnover Tax

Turnover tax is a state tax that replaces VAT and/or profit tax, paid to the state budget in accordance with the procedure, amount and timeframe established by the Tax Code for the types of activities that are subject to taxation.

Are subject to turnover taxation: supply of goods, performance of works and/or rendering of services. Transactions for which a lease or user fee, interest and/or royalty is received are also considered to be services.

Turnover tax is calculated at the following rates:

| Income type | Rate/percentage |
|---|---|
| Income from trade (purchase and sale) activities, except income from trade (purchase and sale) of secondary raw materials included in the Government's defined list and from real estate alienation | 5 |
| Income from trading (purchase and sale) of secondary raw materials included in the Government's defined list | 1.5 |
| Income from newspaper alienation | 1.5 |
| Income from production activities | 3.5 |
| Income from lease payment, interest, royalties, real estate | 10 |
| Income from notary activity | 10 |
| Income derived from organising lottery activities | 25 |
| Income from activities in the field of public catering | 8 |
| Income from other activities or disposal of other assets | 5 |

## Patent Tax

Patent tax is the state tax that replaces VAT and/or profit tax, paid to the state budget for the implementation of types of activities considered as taxable objects. For organisations the patent tax replaces the VAT and/or the profit tax. Under the patent tax the calculated tax rate for the profit tax is 40% and for VAT it is 60%. For individual entrepreneurs the patent tax replaces VAT.

The following types of activities carried out in the Republic of Armenia are subject to patent tax:

- Passenger transportation by light passenger cars;
- Passenger transportation by bus and/or minibus;
- Hairdressing services;
- Car maintenance stations activities;
- Parking activities;
- Organising billiards game;
- Organising table tennis game;
- Organisation of games through coins and (or) billboards, food trade, as well as coin-operated automatic gaming (except for gambling and casino activities);
- Dental activity;
- Dental technical activity;
- Organisation of the totalizer;
- Organisation of the Internet totalizer;
- Purchase and sale of precious metals, precious metals or precious stones by means of countertops or merchandise at trading places (in gold markets).

## REGISTRATION DUTY

In the Republic of Armenia, certain state fees are applied to:

- State duty;
- Utilisation fee;
- Social payment;
- Mandatory fee for the grant (renewal) of radio frequencies and the mandatory billing for use;
- Mandatory payment for public services:
- Pension payment.

In the Republic of Armenia, certain local fees are applied to:

- Local duty;
- Local fee.

## Real Estate Tax

Real estate tax is a local tax payable to community budgets of the Republic of Armenia for real estate which is a taxable item owned by taxpayers under ownership right which does not depend on the results of economic activity of taxpayers. Real estate tax is also paid to the state-owned land plots for permanent use, as well as for immovable property as taxable items. Real estate, land plots and/or their improvements are subject to real estate tax.

Real estate taxpayers are organisations and individuals, apart from state bodies, community managerial institutions and the Central Bank of the Republic of Armenia. For the state-owned land that is permanently used, the real estate tax shall be borne by the permanent owner of the state-owned land. If the taxable item is owned by more than one taxpayer by common joint ownership, they bear joint liability for the obligations with respect to immovable property, apart from the land plots belonging to different taxpayers, property units - buildings and / or constructions. If the taxable item is owned by more than one taxpayer by the right of common shared ownership, then they shall be liable for the obligations for the tax on immovable property in the amount of each part thereof.

Real estate tax is calculated at the following annual rates:

1. 15% for agricultural land;
2. 1% for other non-agricultural land;
3. Immovable property at the following rates:

| Taxable base | Tax rate |
|---|---|
| Up to 3 million AMD | 0% |
| More than 3 million AMD - up to 10 million AMD | AMD 100 plus 0.1% of the taxable base exceeding 3 million |
| More than 10 million AMD - up to 20 million AMD | AMD 7,100 plus 0.2% of the taxable base exceeding 10 million |
| More than 20 million AMD - up to 30 million AMD | AMD 27,100 plus 0.4% of the taxable base exceeding 20 million |
| More than 30 million AMD - up to 40 million AMD | AMD 67,100 plus 0.6% of the taxable base exceeding 30 million |
| More than 40 million AMD | AMD 127,100 plus 1% of the taxable base exceeding 40 million |

### Vehicle Property Tax

Vehicle Property tax is a local tax payable to community budgets of the Republic of Armenia for vehicles which are taxable item owned by taxpayers under ownership right which does not depend on the results of economic activity of taxpayers.

Vehicle property taxpayers are organisations and individuals, with the exception of public authorities, community managing institutions and the Central Bank of the Republic of Armenia.

The following vehicles are considered subject to Vehicle Property Taxation:

- Motor vehicles
- water transport (motor-driven)
- motorcycle
- Snowmobile
- Quadricot.

## B. DETERMINATION OF TAXABLE INCOME

- Subject to taxation is any transaction, income, property, type of activity (including action or function) or any other object, whether the existence of ownership rights or the performance of which generates a tax liability or payment obligation at the level of the taxpayers.
- For each tax a separate taxable item is established.
- The same subject of taxation shall be taxed only once at the level of the same taxpayer for the same period.
- The taxable base is the value, physical or other characteristic of the taxable object.
- For each tax a separate tax base and the procedure for its calculation is established.

### DEPRECIATION

In order to determine the tax base of resident profit taxpayers and non-resident profit taxpayers operating in the Republic of Armenia through a permanent establishment, the gross income is deducted from the amortisation expense of property, plant and equipment and intangible assets owned or leased by a resident or non-resident profit taxpayer.

Moreover, for each unit of fixed assets and intangible assets the amortisation charge is calculated during the taxable year, as the difference between the original cost of the fixed asset and the intangible asset and the intangible assets for individual groups and intangible assets.

On each unit of revalued fixed assets and intangible assets after revaluation, the depreciation charge is calculated based on the minimum taxation periods determined for the tax year as the carrying value of the intangible asset, individual groups of intangible assets and the calculated amortisation residual time ratio.

### STOCK / INVENTORY

The tax authority (tax inspector) is authorised to make measurements of inventories. During a tax control, the Tax Authority may require the taxpayer (tax agent) to inventory assets and liabilities exclusively within the scope of tax control objectives and matters.

### DIVIDENDS

In respect of dividends received by foreign citizens and stateless persons, the income tax is calculated at a rate of 10% while the income tax on dividends received by citizens of the Republic of Armenia is calculated at a rate of 5%.

### LOSSES

In order to determine the tax base of resident profit taxpayers and non-resident profit taxpayers operating in the Republic of Armenia through a permanent establishment, natural losses of property are deductible from gross income, as well as qualitative, casual, technological and (or) other losses caused by property documents.

Natural loss of property is deducted from gross income not exceeding the amount set by the Government during the tax year of the loss or disclosure of that loss. Natural loss of property is the reduction of the weight, size, volume and/or quantity of the property due to the physicochemical, mechanical or biological factors during the preservation or movement of the property. If the Government has not specified the amount of natural loss or the amount of natural loss exceeds the amount determined by the Government then the loss shall not be deducted from gross income loss.

Qualitative loss of property substantiated by documents is deducted from gross income at a rate not exceeding 1% of the gross amount of the income during the tax year when occurring or disclosing that loss. Property qualitative loss is the property, or the goods withdrawn from circulation as a result of the expiration of the conservation period of the product with the expiration date or of the depreciation and/or demolition of time due to the impairment or limitation of the consumer's property.

Property document-based accidental loss is deducted from gross income at the full extent for the loss during the tax year. Property accidental loss is destruction or damage caused by fire, flood, earthquake or other natural disaster, shipwreck, war, military action, armed attack, mass disorder, revolt or any other such extraordinary event.

Property document-based technological loss is deducted from gross income as an item of material cost. Property technological loss is:

- the portion of the cost of raw materials, parts and/or nodes which has lost its quality as a result of the technology used in the production process;
- the defective product at the rate set by the profit taxpayer;
- technological losses established by law or by the Government Authorised Body.

Property document-based other losses are deducted from gross income to the amount of that loss.

When no norm of property document-based technological loss is established or exceeded, the corresponding losses are deducted from gross income:

- in case of voluntary reimbursement of the loss by the party that inflicted the damage during the tax year of loss' complete or partial compensation;
- as a result of non-disclosure of the person who has suffered damage in the case of a decision to suspend or discontinue the criminal case by the preliminary investigation body, in the tax year of the decision;
- in case of adoption of a judicial act establishing guilt or innocence by the court in a tax year of the act coming into force.

The documentation procedure for losses is defined by the Government.

## TAX INCENTIVES

Except for the general procedure and/or terms of calculation and payment of taxes, fines, penalties and/or duties established by Tax Code of the RA, as a result of which there is no tax liability or decrease, or the amount of the taxable obligation is extinguished, or the dates of its calculation and/or execution are postponed.

The following types of tax benefits may be established by Tax Code of the Republic of Armenia:

- Tax exemption;
- Reduction of taxable object;
- Reduction of tax base;
- Reduction of tax rate;
- Tax reduction;
- Delay of tax payment;
- For violating the provisions of Tax Code: exemption from penalties and fines, reduction, delay of payment terms.

### Exemption from the Payment of Profit Tax

1. Profit taxpayers engaged in the production of agricultural products shall be exempt from paying profit tax for the tax years until 31st December 2024 included, for income derived from the sale of agricultural products, as well as for income derived from the sale of other assets or for other income, where the share of the income derived from the sale of other assets and of the other income in the gross income for the respective tax year does not exceed 10%. Where the share of income derived from the sale of other assets and of other income in the gross income for the respective tax year exceeds 10%, the benefit provided for by this part shall apply only with respect to the income derived from the sale of agricultural products. Within the meaning of this part:
   - agricultural products shall mean products produced for final or intermediate consumption, through biological processing of animals and plants, in particular:
     a. crops of cereal grains and cereal grain peas;
     b. technical crops;
     c. root and tuber, vegetable, melon and gourd crops and products of covered soil;
     d. forage crops of field cultivation;
     e. other products of forage production;
     f. products of gardens, vineyards, perennials plants and floriculture;
     g. seeds of trees and bushes, fruit seeds;
     h. seedlings of trees and bushes;
     i. plantings of trees and bushes;
     j. products of cattle breeding;
     k. products of swine breeding;
     l. products of sheep breeding and goat breeding;
     m. products of poultry breeding;
     n. products of horse breeding, donkey breeding and mule breeding;
     o. products of deer breeding and camel breeding;
     p. products of rabbit breeding, fur animal breeding and hunting economies;
     q. products of fish breeding, apiculture, silkworm cultivation, artificial insemination;
   - if it is impossible to make an accurate calculation of the income derived from agricultural products for the tax years until 31st

December 2024 included, it shall be calculated based on the estimated net income data calculated in accordance with the cadastral valuation procedure prescribed by Annex 2, which is a constituent part of Tax Code.

2. The Armenian Deposit Guarantee Fund prescribed by the Law of the Republic of Armenia “On guaranteeing compensation of bank deposits of individuals” shall be exempt from paying profit tax for the following types of income:
   - regular, lump sum and additional guarantee fees paid by commercial banks in accordance with the procedure prescribed by the Law of the Republic of Armenia “On guaranteeing compensation of bank deposits of individuals”;
   - amounts compensated to individuals by the Fund and received from banks based on claims acquired against the banks;
   - incomes derived from investments in the following assets:
     a. state securities of the Republic of Armenia;
     b. those invested as bank deposits and/or bank accounts in the Central Bank of the Republic of Armenia and top foreign banks with high ratings;
     c. securities of the Central Bank of the Republic of Armenia;
     d. standard gold bullions;
     e. securities of governments and/or Central Banks of countries with high ratings;
     f. other financial assets, by decision of the Board of Trustees of the Fund and upon the consent of the Board of the Central Bank of the Republic of Armenia.
3. The Bureau established on the basis of the Law of the Republic of Armenia “On compulsory motor vehicle liability insurance” shall be exempt from paying profit tax for all fees made to the Guarantee Fund (hereinafter referred to as “Guarantee Fund”) established within the Bureau pursuant to that Law, as well as for all other amounts generated for the Guarantee Fund, including those generated from income generated from investments made from the funds of the Guarantee Fund.
4. The Panarmenian Bank shall be exempt from paying profit tax.
5. Non-resident profit taxpayers shall be exempt from paying profit tax for income derived in the form of interests from foreign currency state bonds of the Republic of Armenia or in the form of a discount made at the time of repayment of said bonds, as well as for income derived from the alienation of said bonds, their exchange with other securities or other similar transactions.
6. Profit taxpayers engaged in the production of hand-made carpets shall be exempt from paying profit tax for the income derived from the sale of hand-made carpets.
7. Profit taxpayers deemed operators of a free economic zone shall be exempt from paying profit tax for the income derived from activities carried out in the free economic zone established in the territory of the Republic of Armenia.

## C. FOREIGN TAX RELIEF

- Profit taxable objects and income tax received or to be received outside the Republic of Armenia by resident organisations of the Republic of Armenia and resident individuals of the Republic of Armenia shall be included in the taxable object under the relevant tax type of these organisations and individuals and shall be subject to taxation in the Republic of Armenia as prescribed by the Tax Code, unless otherwise prescribed by Tax Code.
- For the purpose of taxation of resident organisations of the Republic of Armenia and resident individuals of the Republic of Armenia, the tax amounts calculated for taxable objects determined shall be reduced to the amount of the sums of the relevant taxes which have been collected in foreign states in accordance with the legislation of those states.
- Amounts of taxes shall be reduced by amounts not exceeding the amounts of the relevant taxes calculated for taxable objects formed in foreign states in the manner and at the rates prescribed by the Tax Code.
- Where the amount of the profit tax or the income tax subject to reduction exceeds the profit tax or the income tax liability respectively for the given reporting year, the amounts of taxes in excess shall be subject to reduction from the liabilities of the following reporting years of the organisation or the individual.

## D. CORPORATE GROUPS

There are no special rules for group taxation in Armenia.

## E. RELATED PARTY TRANSACTIONS

According to the Tax Code, organisations and/or individuals shall be considered to be related where:

- 20% and more of the equity shares (stock, share) of the authorised (share) capital of the resident commercial organisation belong to another resident commercial organisation, an individual entrepreneur or a notary;
- 20% and more of the equity shares (stock, share) of the authorised (share) capital of the resident commercial organisation belong to the individual who is not an individual entrepreneur and to whom also belongs 20% and more of the equity shares (stock, share) of the authorised (share) capital of another resident commercial organisation.
- Organisations and/or individuals shall be considered to be related where according to the information received from a third person (including from a state body) or obtained as a result of operational and intelligence activities, organisations and/or individuals — on grounds of acting in consent for common economic interests — are recognised as related upon the decision of the head of the tax authority as prescribed by the tax authority. When recognising taxpayers as related, the following circumstances, in particular, shall be taken into account:
  - o volume and frequency of transactions carried out between them;
  - o sale prices and trade mark-ups of the goods purchased from one another;
  - o Share in any commodity market.

## F. WITHHOLDING TAX

- Dividends paid to non-resident companies are subject to a % final withholding tax, unless a double tax treaty provides otherwise;
- A 10% final withholding tax applies to interest paid to non-resident companies, unless a double tax treaty provides otherwise;

- Royalties are subject to a 10% final withholding tax, unless a double tax treaty provides otherwise;
- Insurance fees and freight payments are subject to a 5% final withholding tax.
- Any other income from Armenian sources is generally subject to a 20% withholding tax.

## G. EXCHANGE CONTROL

- Within the scope of transactions and operations denominated in foreign currency, tax bases formed regarding transactions relating to the import or export of goods and original costs of goods shall be determined:
  - in case of operations relating to import of goods from states that are not members of the EAEU or export of goods to states that are not members of the EAEU, as of the date of the customs declaration for the import or export of goods respectively (irrespective of the fact of submitting afterwards the verified customs declaration for the import of goods or the verified customs declaration for the export of goods as prescribed by the EAEU uniform customs legislation with regard to these operations) based on the average market exchange rate announced by the Central Bank of the Republic of Armenia as of that day;
  - in case of operations relating to import of goods from the EAEU member states or export of goods to the EAEU member states, as of the date of the tax declaration for the import of goods or export of goods respectively (irrespective of the fact of submitting afterwards the verified customs declaration for the import of goods or the verified customs declaration for the export of goods with regard to these transactions) based on the average market exchange rate announced by the Central Bank of the Republic of Armenia as of that day;
- In case of transactions involving supply of goods, performance of work or rendering of services concluded between a resident organisation or a resident individual of the Republic of Armenia and a non-resident organisation or a non-resident individual of the Republic of Armenia (except for the permanent establishment record registered in the Republic of Armenia of a non-resident organisation or a non-resident individual) within the territory of the Republic of Armenia, as well as in cases where the obligation for calculating and paying VAT with regard to the transaction involving supply of goods, performance of work or rendering of services carried out by a non-resident organisation having no permanent establishment record-registered in the Republic of Armenia or by a non-resident individual having no permanent establishment record-registered in the Republic of Armenia shall be undertaken — in accordance with Section 4 of the Code — by a resident organisation or a resident individual of the Republic of Armenia or the permanent establishment record-registered in the Republic of Armenia of the non-resident organisation or the non-resident individual who is considered to be a party to the transaction, the formed tax bases and original costs shall be determined as of the date of issuance of the relevant settlement document based on the average market exchange rate announced by the Central Bank of the Republic of Armenia;
- Tax amount of the taxable income paid by a tax agent shall be calculated as of the date of payment of that income, based on the average market exchange rate announced by the Central Bank of the Republic of Armenia as of that day.

## H. PERSONAL TAX

- Resident and non-resident individuals shall be deemed to be income taxpayers;
- Individual entrepreneurs and notaries — as individuals — shall be deemed to be income taxpayers only in respect of their personal income.

The following shall be considered subject to income tax:

- Regarding resident individuals — the gross income derived from sources of and/or outside Armenia, except for entrepreneurial income of individual entrepreneur's record-registered in Armenia and notaries;
- Regarding non-resident individuals — the gross income derived from Armenian sources, except for income attributable to a permanent establishment of non-resident individuals carrying out activities in Armenia through a permanent establishment and/or deriving Armenian-sourced income through a permanent establishment, as well as income derived from foreign economic activity.

The following shall be considered to be the income tax base:

- Regarding resident individuals — taxable income, which is determined as the positive difference between gross income and deducted income;
- Regarding non-resident individuals — taxable income, which is determined as the positive difference between gross income and deducted income prescribed by the Tax Code.

Income tax rates:

- The income tax against the tax base is calculated at a flat rate of 23% starting from 1st January 2020 and will be gradually lowered to 20% as follows:
  - 22% starting from 1st January 2021;
  - 21% starting from 1st January 2022; and
  - 20% starting from 1st January 2023;
- The income tax on interest shall be calculated at a 10% rate, according to the withholdings prescribed by the Tax Code;
- The income tax on royalties shall be calculated at a 10% rate;
- The income tax on rentals shall be calculated at a 10% rate, whereas in case the total of the rentals received during the tax year exceeds AMD 58.35 million, an additional income tax at a 10% rate shall be calculated on the surplus;
- The income tax on dividends received by foreign nationals and stateless persons shall be calculated at a 5% rate, and the income tax on dividends received by citizens of the Republic of Armenia shall be carried out at a 5% rate;
- The income tax on the total income received from tax agents as a result of the alienation of property shall be calculated at a 10% rate;
- The income tax on income received from the alienation of a building, its apartments or other premises by a constructor shall be calculated at a 20% rate

## KEY TAX POINTS

- Australian resident companies are subject to company income tax on income derived from all sources. Non-resident companies are required to pay income tax only on Australian-sourced income.
- There is no branch profits tax in Australia. However, Australian branches of foreign companies will generally only be taxed on Australian-sourced income at the prevailing company tax rate.
- All entities that carry on an enterprise in Australia are required to register for the goods and services tax (GST) if their annual turnover meets the registration turnover threshold.
- Australia has a CFC regime which is designed to ensure certain types of passive and associated party income of a CFC is included in the controlling Australian resident's taxable income each financial year.
- Where foreign sourced income is included in assessable income, tax credits are available equal to the lesser of the foreign tax paid and the Australian tax payable. Credits are also available to Australian companies for foreign tax paid under the CFC regime on attributed income.
- Wholly-owned groups of Australian companies and, in some circumstances, unit trusts can elect to have their income tax liability calculated on a consolidated basis.
- Non-arm's-length international profit-shifting arrangements and other international transactions between related parties are governed by transfer pricing rules which give the Commissioner of Taxation the power to calculate the income tax payable based on arms-length prices.
- Withholding tax must be deducted from interest, royalties and dividends (to the extent they are not franked) paid to non-residents.
- Income tax is payable by Australian resident individuals on non-exempt income derived from worldwide sources. Non-resident individuals are only required to pay tax on Australian-sourced income.
- There is no separate capital gains tax, but capital gains are included in taxable income. The tax treatment of capital gains and losses is generally the same for individuals and trustees as for companies, but there are some differences (e.g. Australian resident individuals and trustees, unlike companies, can claim a 50% discount of capital gains on assets held for more than one year). Small business CGT concessions may also reduce capital gains where certain conditions are met.
- There is no net wealth tax, real estate tax or inheritance or gift tax.

## A. TAXES PAYABLE

### COMPANY TAX

Australian resident companies are subject to company income tax on their income derived from all sources. Non-resident companies are required to pay income tax only on Australian-sourced income. Resident companies are those that are incorporated in Australia or those that carry on business in Australia and either have their central management and control in Australia or their voting power controlled by shareholders who are Australian residents.

The tax year runs from 1 July to 30 June. Companies' financial years usually coincide with the tax year. A taxpayer can choose to have an accounting period different to the tax year if they wish but this will require additional costs of preparing another set of accounts based on the tax year. Alternatively, if a taxpayer has a good reason for having a financial year other than 1 July to 30 June they can apply to the Australian Tax Office to have a substituted accounting period (SAP) and align the tax year with their financial year. The Australian Tax Office will generally accept applications for an SAP where an Australian subsidiary wants to align its tax year with its foreign parent company's financial year. The company tax rates applied to the company's taxable income are:

- 25% for companies with aggregate annual turnover of less than AUD 50 million for the 2021/22 income year); and
- 30% for all other companies.

Note, the reduced rate of company tax does not apply to entities which derive more than 80% of revenue from passive income.

A company is generally required to 'self-assess' its likely tax liability in a financial year and pay tax by quarterly or monthly instalments with the final tax liability being reconciled in an annual tax return. 'Likely tax' is the latest estimate of tax payable made by the company in a current financial year. If no estimate is made, 'likely tax' is the tax assessed in the preceding year. Company tax is payable on a quarterly basis (except for companies with a turnover of greater than AUD 20 million which are required to remit instalments monthly). Companies that are not required to report their goods and services tax (GST) on a monthly basis and with income tax payable of less than AUD 8,000 for the most recent income year can elect to pay an annual instalment of tax rather than quarterly instalments. Generally, the annual payment date is 21 October when the income year ends on 30 June.

Monthly or quarterly company tax instalments are payable within 21 days after the end of each month/quarter of the financial year. However, where taxpayers are eligible to pay other quarterly obligations on a deferred basis (namely those entities that are required to pay GST on a quarterly basis); the due date is the 28th day after the end of the quarter (except for the December quarter in which case payment date is 28 February). There are two methods of working out the instalment payment amount as follows:

- Instalment Income Option: the payment amount is the amount of gross assessable income earned for that month or quarter (less capital gains) multiplied by the instalment rate. The instalment rate is advised by the Tax Office and is based on the company tax paid on the most recent tax assessment divided by the company's turnover (less capital gains). This method is available to all taxpayers.
- GDP adjustment notional tax option: the payment income amount is based on the assessable income figure from the most recent tax return multiplied by a GDP factor. The income amount is advised by the Tax Office. This method is available for individual taxpayers or other entities where their most recent assessed taxable income was under AUD 2 million. Certain categories of taxpayers such as farmers, sports people and artists may meet their liability for these four instalments by making two payments per year.

### BRANCH PROFITS TAX

There is no branch profits tax in Australia. However, Australian branches of foreign companies will generally only be taxed on Australian-sourced income at the prevailing company tax rate.

## GOODS AND SERVICES TAX (GST)

All entities that carry on an enterprise in Australia are required to register for the goods and services tax (GST) if their annual turnover meets the registration turnover threshold of AUD 75,000 or AUD 150,000 for not-for-profit organisations. Once registered, entities are required to charge 10% GST on all goods and services that they supply within Australia, unless the supplies are specifically excluded, such as education, health, childcare services and certain types of food.

Registered entities are entitled to claim an ‘input tax credit’ equal to the amount of GST paid on purchases, provided that those purchases were used for a ‘creditable purpose’ in carrying on their enterprise. This means that the cost of the GST is effectively borne solely by the end user. However, there are two exceptions to the general rule:

(1) GST-free supplies (zero rated supplies): These supplies are provided by enterprises to their customers free of GST, and the enterprise is also allowed to claim input tax credits on its creditable business acquisitions. Examples include education and health providers and certain types of food.

(2) Input taxed supplies: These supplies are provided by enterprises to their customers free of GST, but the enterprise is not allowed to claim any input tax credits on its creditable business acquisitions, effectively treating the supplier as an end user. Examples include financial services providers and residential accommodation supplies.

The GST collected from customers is remitted to the Federal Government on a quarterly or monthly basis, depending on the size of the entity’s annual turnover.

There are new rules regarding the supply of goods and services by non-residents to Australian consumers which should be considered particularly digital services such as software.

## FRINGE BENEFITS TAX (FBT)

Fringe benefits tax is a federal tax that is payable by resident and non-resident employers (with sufficient connection with Australia) on certain benefits that are provided to their employees. The tax is levied at a rate of 47% for the FBT year ending 31 March 2022 on the ‘grossed-up taxable value’ of each benefit that is provided to employees. FBT is separate from income tax.

In calculating the ‘grossed-up taxable value’ of a fringe benefit, the provider must first determine whether they are entitled to a GST input tax credit on that benefit. If so entitled, the value of the benefit must be ‘grossed up’ using a rate of 2.0802 for the 2022 FBT year. In all other cases, the value of the benefit is grossed up using a rate of 1.8868.

The grossing up methodology effectively levies tax on the benefit at the rate of tax that an employee on the highest marginal tax rate would pay on the cash salary required for them to pay for the benefit out of after tax salary and taking into account any GST input tax credit the employer can claim on providing the benefit. Employees can make non-tax deductible contributions towards the private use component of a benefit to reduce the taxable value, thereby reducing the FBT payable.

The FBT year runs from 1 April to 31 March. If the prior year’s FBT liability is AUD 3,000 or more, it is payable on a quarterly basis on the same payments dates as quarterly company tax (see above). If the total FBT liability is less than AUD 3,000, an annual payment is required. The annual FBT return is due for lodgement by 21 May of each year. Any FBT paid in Australia by an employer is generally deductible for Australian income tax purposes.

## SUPERANNUATION CONTRIBUTIONS

Employers are required to make superannuation contributions on behalf of their employees at a rate of 10% (from 1 July 2021) of the employee’s salary and wages. The rate will increase gradually until it reaches 12% on 1 July 2025. Contributions are required on a quarterly basis.

If insufficient contributions are made, employers are liable for a Superannuation Guarantee Charge. The ‘charge’ includes the shortfall in the contributions together with an interest component and an administration fee. Employers who have a superannuation guarantee shortfall are required to lodge a Superannuation Guarantee Statement together with the ‘charge’ on the 28th day of the second month following the end of the quarter.

Superannuation contributions made by employers for their employees are generally income tax deductible and subject to 15% contributions tax payable by the superannuation fund. Where the employee’s aggregate taxable income and concessional superannuation contributions exceed AUD 250,000 additional tax of 15% of the excess contributions is payable. Employees can make superannuation contributions on a “salary sacrifice” basis which effectively means these contributions are also tax deductible. There is a cap on the annual deductible aggregate superannuation contributions of AUD 27,500 for employees of all ages applying from 1 July 2021. Where concessional contributions exceed the cap, the excess amount is included in the individual’s assessable income and taxed at their marginal tax rate. From 1 July 2018, individuals with superannuation balances of less than AUD 500,000 will have the ability to carry forward unused concessional contributions from up to the five previous financial years, and use the amounts to make additional concessional contributions during a particular financial year.

## OTHER TAXES

Other Federal taxes include:

(1) Customs & Excise duties on certain imported items.

(2) The Petroleum Resource Rent Tax (PRRT) regime applies to onshore petroleum projects - including coal seam gas, tight gas and shale oil projects - as well as the offshore North West Shelf project. The PRRT is payable on the taxable profit of a person in relation to a petroleum project. If a person has an entitlement to assessable petroleum receipts from a production licence they will have a petroleum project.

(3) Minerals resource rent tax: this tax was repealed effective September 2014.

(4) Excise on fuel, tobacco and alcohol.

(5) Luxury Car Tax of 33% is payable on the value of certain vehicles that exceed the luxury car threshold of AUD 69,152 for the 2021/2022 year.

(6) Wine Equalisation Tax is a tax of 29% of the wholesale value of wine imported into Australia or sold by wholesale.

## LOCAL TAXES

The States and Territories of Australia impose the following taxes:

(1) Stamp Duty: payable on specified transactions, including certain transfers of property.

(2) Payroll tax: payable by employers who have total payrolls exceeding specified thresholds which vary from State to State. Payroll tax rates between each State and Territory varies from 4.75% - 6.85%.

(3) Land and property taxes.

(4) Workcare / workers compensation levies or premiums.

(5) Insurance Duty: payable on certain insurance premiums.

## B. DETERMINATION OF TAXABLE INCOME

Taxable income equals assessable income less allowable deductions. Assessable income includes ordinary income under common law and statutory income but does not include specifically exempt or non-assessable income. Generally, to be deductible, losses and outgoings must relate to the gaining or producing of assessable income. Some items are specifically non-deductible, such as penalties and fines. Capital expenses are generally non-deductible but may be deducted over time as a capital allowance or included in the capital gains tax (CGT) cost base. Expenses incurred in producing exempt income are also non-deductible. It is possible to claim a portion of expense items that have dual purposes. Special rules apply in respect of the categories listed below.

## CAPITAL ALLOWANCES

Plant, equipment and other depreciable items are generally written off over their effective life. There are alternative rules for small business taxpayers with average turnover less than AUD 10 million. Taxpayers may self-determine the effective life of plant to calculate the tax depreciation rate or instead may rely on tax rates published by the Commissioner of Taxation. Either the straight-line or diminishing-value methods of depreciation can be used for each item of plant and is determined as follows:

(1) Straight-line method: 100% divided by the Asset's effective life.

(2) Diminishing-value method: 200% divided by the Asset's effective life.

Motor vehicles are subject to an indexed depreciation cost limit. The limit for the 2021/2022 financial year is AUD 60,733. A small business can pool depreciable assets in a general small business pool to be written off at one rate. The deduction for an asset acquired during an income year and allocated to the general small business pool is 15% of the taxable purpose proportion of its adjustable value. The general small business pool is written off at 30% per income year thereafter.

There are numerous changes to capital allowance deductions which were introduced as part of the Australian Government's stimulus response to the impact of COVID-19. These are intended to be temporary measures, generally lasting until 30 June 2023. For the majority of businesses, this should mean that an immediate write-off can be claimed for the cost of acquiring fixed assets.

## STOCK / INVENTORY

All trading stock on hand at the beginning of the year of income and all trading stock on hand at the end of that income year must be taken into account in determining taxable income.

Each item of inventory must be valued at the end of each financial year at:

- Cost price valued at full absorption cost;
- Market selling value (the current selling value in the taxpayer's trading market); or,
- Replacement cost.

The closing value adopted becomes the opening value at the beginning of the following income year. Acceptable valuation methods include FIFO, average cost, standard costing and retail inventory method. Non-acceptable valuation methods include LIFO and the base stock method. Certain small business taxpayers who have an annual turnover of less than AUD 10 million are only required to make such valuations where the value of their stock changed by more than AUD 5,000.

## CAPITAL GAINS AND LOSSES

Net capital gains are generally included in the determination of assessable income. Capital losses cannot be deducted from assessable income, and can only be offset against capital gains. Capital losses can be carried forward indefinitely to offset against future capital gains. Net capital gains are determined by deducting the cost base of an asset from the proceeds received on disposal of that asset. The purchase price of an asset purchased prior to 21 September 1999 can be adjusted for inflation indexation to the quarter ending 30 September 1999. Indexation is not available for assets purchased after 21 September 1999. In lieu of indexation, individuals and trustees may be eligible for a 50% reduction in their assessable capital gain if certain conditions are met. Complying superannuation funds are eligible for a 33.33% discount. This reduction is not available for companies.

Small business taxpayers which meet the eligibility conditions may access the small business CGT concessions which contain CGT exemptions and reduction concessions. These may allow the taxpayer to disregard or defer some or all of a capital gain arising from an active asset utilised in a small business. Other exemptions from capital gains tax may also be available, such as the main residence exemption, gains from foreign branches or small business exemptions for businesses that satisfy certain criteria. Foreign residents are exempt from Australian CGT except on Australian real property; business assets used in an Australian permanent establishment (PE); or equity interests in Australian or foreign companies or trusts with substantial interests in Australian real property either directly or indirectly through interposed entities. Australian real property includes Australian land and mining, quarrying and prospecting rights over Australian land.

The 50% CGT discount for non-residents was removed on capital gains accrued after 8 May 2012 on Taxable Australian Property such as real estate and mining assets. However, non-residents will still be entitled to the 50% discount on capital gains accrued prior to this date (after offsetting any capital losses) provided they obtain a market valuation of assets as at 8 May 2012. Please also note that non-residents are no longer entitled to the main residence exemption.

Australia has also recently introduced a 12.5% foreign resident capital gains withholding tax applicable on disposal of certain taxable Australian property (e.g. real property with a disposal price of AUD 750,000 or greater). There are a number of exemptions to this requirement and in other circumstances (e.g. the sale of shares) it is necessary to obtain clearance certificates or vendor declarations to avoid the requirement to withhold this tax. Please note that this withholding tax can also apply to indirect sales of Australian property (e.g. the sale of a non-resident company which owns shares in an Australian company).

## DIVIDENDS

In general, dividends received by resident shareholders from resident companies are taxable but grossed up for any franking credits attached. The franking credits are equivalent to the tax paid by the company on its profits out of which the dividend was paid. However, resident shareholders are allowed a tax offset of tax equal to the amount of any franking credits on the dividend. Dividends received from non-resident companies do not qualify for this tax offset, but may be entitled to a foreign tax credit (see foreign tax relief below). Alternatively, the dividend may be tax-exempt if the recipient is an Australian company that has a 10% or greater interest in the foreign company.

Dividends paid by non-resident companies in certain foreign countries are also exempt to the extent that they represent profits already taxed in Australia under Australia's Controlled Foreign Corporation (CFC) rules. Dividends paid by resident companies to non-resident shareholders are not subject to income tax but may be subject to withholding tax to the extent that the dividends are not franked (i.e. have been paid out of Australian-taxed profits) or are not paid out as conduit foreign income (i.e. a flow-through of non-taxable foreign income such as dividends from foreign subsidiaries). Payments of dividends are not generally tax deductible.

## INTEREST DEDUCTIONS

Interest is generally deductible to the extent it relates to funds borrowed for income-producing purposes. Interest deductions may be restricted by the thin capitalisation provisions. The thin capitalisation rules seek to deny deductions for interest payments if the taxpayer's debt exceeds 60% of the value of its assets. The interest attributable to this excess is denied deductibility. An exception to this rule is where the taxpayer can satisfy an 'arm's length test', which focuses on the taxpayer's likely borrowings if it had acted at arm's length and what independent lenders would lend to the taxpayer on arm's length terms. Taxpayers can also access a 'worldwide gearing test' which broadly allows a proportion of debt levels in Australia which matches that of the worldwide group.

The thin capitalisation provisions apply to foreign controlled Australian entities and the inward investments of foreign nationals and Australian-based entities with foreign investments. A de minimis rule ensures that all corporate entities and their associates (regardless of their nature or business) that claim no more than AUD 2 million for the financial year in debt deductions per income year will not be subject to the thin capitalisation rules.

## MANAGED INVESTMENTS

There are complex rules relating to Managed Investment Trusts (MIT) that can reduce the withholding rates applicable to payments made to foreign residents. These rules should be carefully considered if applicable as they are complex.

## LOSSES

A tax loss is the excess of allowable deductions over assessable income (not including exempt income) and can be carried forward indefinitely to offset against future taxable income. For companies and trusts the deductibility of losses is restricted by a 'continuity of ownership' test (more than 50% of voting, dividend and capital rights). Alternatively, the loss is deductible if the company passes a 'same business' or 'similar business' test.

A limited loss carry-back regime was also introduced as part of the Australian Government's COVID-19 response. In some circumstances, a company will be eligible to carry back losses incurred in the 2020, 2021, 2022 or 2023 income years against profits arising in the 2019, 2020, 2021 or 2022 income years. There are strict eligibility criteria to be satisfied in order to claim this benefit.

## FOREIGN SOURCED INCOME

(i) Controlled Foreign Corporations (CFCs): Australia has a CFC regime which is designed to ensure certain types of passive and associated party income of a CFC is included in the controlling Australian resident's taxable income each financial year. In general, a foreign company will be regarded as a CFC where:

- Five or fewer Australian residents hold an associate inclusive 50% interest in the foreign corporation or have de facto control of the foreign entity;
- An Australian entity (and its associates) has 40% or greater control in the foreign corporation, unless they can prove that their interest is not a controlling interest; or,
- Irrespective of the interests in a foreign company, a group of five or fewer Australian entities (either alone or together with associates) has actual control of the company.

CFCs in seven listed countries (USA, UK, France, Germany, Japan, Canada and New Zealand) are largely exempted from the CFC rules. There are several exemptions to the CFC rules including an active business exemption. The Government is currently reviewing the CFC provisions with a view to simplifying the rules.

(ii) Most foreign branch profits and capital gains of a resident company are generally not taxed when the income or gain is derived in carrying on a business through a permanent establishment in the following listed countries: UK, US, Canada, France, Germany, Japan and New Zealand. Losses from branches in the countries listed above cannot be claimed. Foreign branches of resident companies in other countries (unlisted countries) are generally not subject to tax on profits or gains where the income is from an 'active business' and for capital gains where the company used the asset wholly or mainly in an active business. Associated losses are also not deductible against the Australian source income of the entity.

## CONDUIT FOREIGN INCOME

The conduit foreign income rules allow foreign income and certain foreign capital gains to flow through Australian companies and other interposed entities to foreign residents without being taxed in Australia.

## ANTI-HYBRID RULES

Australia has recently introduced hybrid mismatch rules, applicable to income years commencing on or after 1 January 2019. These rules are intended to prevent Australian taxable entities from being able to avoid income tax, or obtain a double non-taxation benefit, by exploiting differences between the tax treatment of entities and instruments across different countries.

These rules are complex and far-reaching. As well as targeting actual hybrid mismatch arrangements (i.e. when there is a difference in international tax treatment between instruments or entities that leads to effective double deductions or deductions without income inclusion) the rules also apply to financing arrangements such as ordinary loans from foreign related parties where the lender is taxed at 10% or less.

These rules do not contain a de minimis threshold nor a grandfathering exclusion. Importantly, they do not require a tax avoidance motive to be applicable. There are, however, a number of carve-outs to consider.

The hybrid mismatch rules target payments which give rise to:

a) a tax deduction in two or more countries (deduction/deduction (DD) outcome);
b) a tax deduction in one country and no assessable income in any other country (deduction/non-inclusion (DNI) outcome);
c) interest payments made to foreign related parties where the lender is taxed at 10% or less (in some circumstances); or
d) certain distributions which give rise to a tax deduction in a foreign country.

These rules can apply where there is a direct Australian group member participant but also if there is no direct Australian participant but the arrangement can be traced under the rules to the Australian entity.

The effect of the hybrid rules is to deny an Australian tax deduction or increasing Australian assessable income.

### INCENTIVES

Specific write-offs are provided for the mining and primary production industries.

Special taxation treatment is also afforded to investment in innovative Australian companies through a 'venture capital tax concession'.

The Research & Development (R&D) tax incentive provides a tax offset for eligible R & D activities targeting R&D activities that benefit Australia. The two core components of the incentive include:

- Refundable tax offset for certain eligible entities whose aggregated turnover is less than AUD 20 million;
- A non- refundable tax offset for all other eligible entities.

### OTHER

(i) Debt Forgiveness: Where a commercial debt is forgiven, special provisions operate in some circumstances to effectively tax the borrower on the benefit received as a result of the forgiveness of the debt. The 'net forgiven amount' is not included directly in the borrower's assessable income but is applied against the borrower's tax attributes in the following order:
   (1) Reduction of revenue losses.
   (2) Reduction of net capital losses.
   (3) Reduction of deductions for particular expenditure.
   (4) Reduction of the cost base of certain assets.

(ii) Debt/Equity Rules: The debt equity rules determine the nature of an instrument for taxation purposes. Broadly speaking, the rules are based on the substance of the arrangement rather than its legal form. The rules determine whether a return on a debt or equity interest in an entity may be frankable and non-deductible (like a dividend) or may be deductible to the entity and not frankable (like interest).

(iii) Taxation of Foreign Exchange (forex) Gains or Loss: Special rules tax forex gains and allow tax deductions for forex losses. The rules apply to transactions where there is a disposal of foreign currency or a disposal of a right to foreign currency, a ceasing of a right or obligation to receive foreign currency, or a ceasing of a right or obligation to pay foreign currency. These provisions will not apply where the taxpayer has made certain elections.

(iv) Taxation of Financial Arrangements (TOFA): Broadly, the TOFA regime defines what constitutes a financial arrangement and provides a framework for calculating gains and losses on financial arrangements through default and elective tax timing methods. In broad terms, it is directed to entities that have:
   - Aggregated turnover of greater than AUD 100 million; or,
   - Assets of greater than AUD 300 million

   However, certain exceptions apply.

## C. FOREIGN TAX RELIEF

Where foreign sourced income is included in a taxpayer's assessable income, foreign income tax offsets are available at the lesser of the foreign tax paid or the Australian tax payable. Any withholding tax paid on an assessable dividend from a foreign company will generally be allowed as a foreign income tax offset.

## D. CONSOLIDATED CORPORATE GROUPS

Wholly-owned groups of Australian companies and trusts in some circumstances can elect to have their income tax liability calculated on a consolidated basis. This means that the entire group is treated, and taxed, as a single corporate taxpayer. Where the parent of Australian subsidiary entities is a foreign entity, the consolidation regime allows for the Australian subsidiary entities to be grouped under the consolidation regime where certain conditions are met.

## E. RELATED PARTY TRANSACTIONS

Non-arm's-length international profit-shifting arrangements and other international transactions between related parties are governed by transfer pricing rules which give the Commissioner of Taxation the power to calculate the income tax payable based on arm's length prices.

Documentation requirements and arm's-length conditions aim to align Australian requirements with OECD Guidance material. Contemporaneous documentation should be prepared prior to lodgement of the entity's income tax return and records should be made readily available to avoid failing to demonstrate a reasonably arguable position in the event of a transfer pricing adjustment.

The Australian Government has adopted a number of the recommendations of the OECD/G20 Base Erosion and Profit Shifting (BEPS) Action Plan. Australia has agreed to facilitate the exchange of Country-by-Country (CbC) reports between tax authorities in different jurisdictions to better assess transfer pricing risks. The measure takes effect from income years commencing on, or after, 1 January 2016. It requires multinational entities with an annual global income of AUD 1 billion or more to provide the ATO with reporting statements within 12 months after the end of their income tax year.

It is also necessary for all Australian entities who are part of a consolidated accounting group where revenue exceeds AUD 1 billion to annually lodge a Master File and Local File with the ATO. These entities must also to lodge a Country-by-Country report or notify the ATO if a group entity has lodged this overseas.

## F. WITHHOLDING TAXES

Withholding tax must be deducted from interest, royalties and dividends (to the extent they are not franked) paid to non-residents. Liability for the remittance of withholding taxes rests with the payer of such amounts. Withholding tax is collected through the PAYG system and is determined according to the payer's PAYG withholding status. The payer is also required to lodge an annual report with the Commissioner of Taxation where such amounts have been withheld during the financial year. The relevant withholding tax rates are:

| Type of income | Rate |
|---|---|
| 1. Dividends - franked | 0% |
| 2. Dividends – unfranked[1] | 0 - 15% (treaty countries); 30% (non-treaty countries) |
| 3. Interest | 10% (NIL for financial institutions under certain treaties) |
| 4. Royalties | 5% - 15% (treaty countries); 30% (non-treaty countries) |

Note:

1. Australia does not impose withholding tax on dividends to the extent they are franked. To the extent dividends are unfranked, i.e. when paid out of profits of a company that have not borne Australian tax, the rate can be as low as 0% or 5%, if the beneficial owner of the dividends is a company that holds at least 80% or 10%, respectively, of the voting power in the payer. In all other cases, the rate is generally 15%.

## G. EXCHANGE CONTROL

Where more than AUD 10,000 of Australian currency is physically taken out of Australia, the departing individual must report this to an Australian Customs Officer, or to the Australian Transaction Reports and Analysis Centre, (AUSTRAC). Equivalent amounts of foreign currency that are brought into Australia must also be reported.

## H. PERSONAL TAX

Income tax is payable by Australian resident individuals on non-exempt income derived from worldwide sources. Non-resident individuals are only required to pay tax on Australian-sourced income. Residency is generally determined by reference to common law principles of residence. However, an individual can also be deemed an Australian resident if the individual's domicile is in Australia (unless they have a permanent place of abode outside Australia) or where the individual has spent more than one half of the relevant year of income in Australia (unless their usual place of abode is outside Australia and they do not intend to take up residence in Australia).

Individuals that become residents for a short time may be eligible for the temporary resident tax exemptions on their foreign income and capital gains. If they are holders of a temporary resident visa (generally for up to four years but may be longer), they will not be taxed on foreign-sourced income unless the income relates to employment or services rendered while they are a resident of Australia. In addition, temporary residents are not taxed on capital gains except for gains on 'Taxable Australian Property' (see capital gains section above). Income tax is payable on taxable income, which is the 'excess' of assessable income less allowable deductions.

Assessable income includes business income, employment income, capital gains on certain assets, dividends, rent and interest. Allowable deductions include outgoings incurred in gaining or producing assessable income such as interest expenses and statutory deductions such as tax-deductible gifts to specified charitable entities.

Most individual taxpayers that are employees will generally have Pay-As-You-Go (PAYG) tax instalments withheld from their salary or wage payments by their employers. Most individuals who are either self-employed or who earn non-salary income are required to make interim payments of tax during the financial year. The amount of these instalments is calculated using the same method outlined in section 'A' above for companies. Individuals with a most recent notional tax assessment of less than AUD 8,000 can elect to make an annual payment, otherwise interim payments are generally required either 21 days after the payment period (or 28 days if they are deferred business activity statement (BAS) payers).

A 2% levy, called the Medicare Levy, is payable by resident individual taxpayers. This levy covers basic hospital and medical expenses for all Australian residents and is assessed on the taxable income of resident individual taxpayers with no maximum ceiling on the amount payable. Low income taxpayers may be eligible for an exemption or reduced levy.

Temporary residents will generally be eligible to obtain a Medicare levy exemption. Higher income individuals without private health insurance are subject to an additional Medicare Levy Surcharge of between 1% and 1.5%.

A rebate is available to resident taxpayers for the cost of private health insurance. The rebate is subject to an income test and differs depending on the age of the taxpayer. A low income tax offset is available, dependent on income levies. Various other tax offsets are also available to resident individual taxpayers such as medical expenses rebate, zone offsets and superannuation offset. The tax rates for Australian individual residents and non-residents in the 2021/2022 financial year are outlined as follows:

### Resident Individuals - rates 2021/2022

| Taxable Income Exceeding AUD | Taxable Income Not Exceeding AUD | Tax On Lower Amount AUD | Rate On Excess % |
|---|---|---|---|
| 0 | 18,200 | 0 | 0.0 |
| 18,201 | 45,000 | 0 | 19.0 |
| 45,001 | 120,000 | 5,092 | 32.5 |
| 120,001 | 180,000 | 29,467 | 37.0 |
| 180,001 | — | 51,667 | 45.0 |

Note, these rates exclude 2% Medicare Levy and Medicare Levy Surcharge.

### Non-resident Individuals - rates 2021/2022

| Taxable Income Exceeding AUD | Taxable Income Not Exceeding AUD | Tax On Lower Amount AUD | Rate On Excess % |
|---|---|---|---|
| 0 | 120,000 | 0 | 32.5 |
| 120,001 | 180,000 | 39,000 | 37.0 |
| 180,001 | — | 61,200 | 45.0 |

## I. TREATY AND NON-TREATY WITHHOLDING TAX RATES

| | Dividends[1] (%) | Interest[2] (%) | Royalties[3] (%) |
|---|---|---|---|
| Resident corporations or individuals: | 0 | 0 | 0 |
| Non-resident corporations or individuals of non-treaty countries: | 30 | 10 | 30 |
| **Treaty countries:** | | | |
| Argentina | 10/15 | 12 | 10/15 |
| Austria | 15 | 10 | 10 |
| Belgium | 15 | 10 | 10 |
| Canada | 5/15 | 10 | 10 |
| Chile | 5/15 | 5/15 | 5/15 |
| China | 15 | 10 | 10 |
| Czech Republic | 5/15 | 10 | 10 |
| Denmark | 15 | 10 | 10 |
| East Timor | 15 | 10 | 10 |
| Fiji | 20 | 10 | 15 |
| Finland | 0/5/15 | 10 | 5 |
| France | 0/5/15 | 0/10 | 5 |
| Germany | 15 | 10 | 10 |
| Greece | 30 | 10 | 30 |
| Hungary | 15 | 10 | 10 |
| India | 15 | 15 | 10/15/20 |
| Indonesia | 15 | 10 | 10/15 |
| Ireland | 15 | 10 | 10 |

NOTES:

1. Franked dividends paid by Australian resident companies to non-residents are exempt from dividend withholding tax. To the extent dividends are unfranked, i.e. when paid out of profits of a company that have not borne Australian tax, the rate can be as low as 0% or 5%, if the beneficial owner of the dividends is a company that holds at least 80% or 10%, respectively, of the voting power in the payer. In all other cases, the rate is generally 15%
2. Non-resident interest withholding tax in Australia is limited to 10% under Australian tax law.
3. Withholding tax of 30% is generally imposed on the gross amount of royalties paid from Australia to non-residents. A reduced rate is applicable to residents of treaty countries as listed above.

The various rates may change according to categories and circumstances. Taxpayers should consult the applicable DTAs to ascertain the applicable rate.

## KEY TAX POINTS

- Public and private limited companies and certain other entities, such as cooperative purchasing societies and mutual insurance companies, are subject to corporate income tax at 25%.
- Resident companies are subject to tax on their worldwide income. Non-resident companies are taxed on income attributable to an Austrian permanent establishment and certain other Austrian-sourced income.
- There is no specific capital gains tax for limited companies. Capital gains and losses are generally treated as ordinary business income (or loss) and are taxed at regular corporate income tax rates.
- The group taxation regime allows for offsetting losses against group profits. In certain cases, losses incurred by non-Austrian resident members of the group may be utilised.
- VAT is generally imposed on the delivery of goods and the supply of services within Austria by entrepreneurs within the scope of their business and on imports into Austrian customs territory.
- Austria imposes a 27,5% withholding tax on dividends, unless double taxation treaties provide otherwise. Withholding tax is also levied on royalties at 20% and interest from banks and financial instruments at 25%.
- Austrian resident individuals are subject to unlimited tax liability on their worldwide income, including income from trade or business, professional services, employment, property and investments.

- Non-resident individuals are only taxed on Austrian-sourced income. An individual is generally treated as resident in Austria if he or she is domiciled or establishes a habitual place of abode in Austria (including a six-month stay in Austria).

## A. TAXES PAYABLE

### COMPANY TAX

Public and private limited companies and certain other entities, such as cooperative purchasing societies and mutual insurance companies, are subject to corporate income tax at 25%, which will be reduced to 24% in 2023 and to 23% from 2024. Limited companies incurring a tax loss or earning small profits must pay a minimum tax of EUR 1,750, EUR 3,500 or EUR 5,452 depending on the legal status of the company and the industry. A reduced minimum tax applies to the first 10 years upon incorporation. Non-resident companies are not subject to a minimum tax. Minimum tax may be credited against corporate tax payable in the following years.

Resident companies are subject to tax on their worldwide income. Non-resident companies are taxed on income attributable to an Austrian permanent establishment, immovable property located in Austria, deposits with Austrian banks, income from silent partnerships in Austria, income from leasing or renting certain property in Austria and income from commercial or industrial consulting or providing labour for domestic use. Companies are deemed to be resident if they are incorporated in Austria (i.e. the registered office is in Austria) or have their place of effective management in Austria. The fiscal year usually runs from 1 January to 31 December, although a company can choose a different fiscal year under certain circumstances. Corporate income tax is assessed on an annual basis. However, quarterly advance payments have to be made.

### CAPITAL GAINS TAX

There is no specific capital gains tax for limited companies in Austria. Capital gains and losses are generally treated as ordinary business income (or loss) and are taxed at standard corporate income tax rates. Special rules apply to capital gains and losses on property sold by legal entities other than limited companies. The sale of a property by individuals and non-corporate businesses is subject to income tax at a reduced rate of 30% regardless of the holding period. Special rules apply to the calculation of the tax basis for long holding periods and property purchased before 2002. Deductions are quite restricted.

Exemptions apply to privately owned, main residencies. Another exemption from capital gains taxation applies to real estate newly built at the seller’s own risk unless rented out during the last 10 years before sale. Capital gains from financial instruments held by private persons are taxed at a reduced rate of 25% or 27.5% regardless of the holding period. Some capital gains are also taxed with the regular income tax rate (e.g. income from personal loans).

### BRANCH PROFITS TAX

There is no branch profits tax in Austria. Austrian branches of foreign companies are subject to Austrian (corporate) income tax on Austrian-sourced income only.

### SALES TAX / VALUE ADDED TAX (VAT)

VAT is generally imposed on the delivery of goods and supply of services within Austria by entrepreneurs within the scope of their business and on imports into Austrian customs territory.

The standard VAT rate is 20%. A reduced rate of 10% or 13% applies for example to food or hotel stays. Some transactions such as exports and intra-community sales B2B are zero-rated. A number of transactions are exempt from VAT, e.g. sale of financial assets, insurance premiums. VAT is generally assessed on a calendar year basis. Monthly or quarterly preliminary returns have to be filed.

### FRINGE BENEFITS TAX (FBT)

Fringe benefits are subject to salary tax according to the value of the benefit in kind. The fringe benefits are taxed on the employee. These include e.g. the private use of a company vehicle, free meals or interest-free loans.

### LOCAL TAXES

A municipal tax of 3% is levied on the gross payroll of enterprises. In addition, municipalities levy land and property taxes.

### OTHER TAXES

Austria imposes a number of other taxes such as:

- A real estate transfer tax of 0.5% to 3.5% of the real estate value or, alternatively, based upon a deemed tax value for some transactions (which is usually not less than the market value).
- Insurance tax on insurance premiums, ranging from 1% to 11%.
- Social security is payable both by employers and employees with a capped basis of EUR 79,380 p.a. or EUR 5,670 per month (14 salary payments) for 2021. The employee rate ranges from 14% to 18% depending on the employee’s status, age and type of income. The employer rate ranges roughly from 18% to 22%. Apart from social security contributions, employers have to pay up to 7.32% salary-related charges on top of gross salary. The total staff costs amount to approximately 130% of gross salary.
- Stamp duties are due on certain transactions and documents.
- Austria does not levy any tax on inheritance or gifts. No tax is imposed on gratuitous transfers (except for land transfer tax) but mandatory reporting on such transfers exceeding certain limits has been implemented.

## B. DETERMINATION OF TAXABLE INCOME

Taxable income is calculated as balance between taxable income and allowed deductions. Generally, to be deductible, losses and expenses must have been incurred to generate taxable income. Restrictions on deductions apply to capital gains from the sale of properties and financial instruments. From 2014 management compensation exceeding EUR 500,000 per annum is disallowed as deduction for the employer’s corporate income tax. Another restriction applies to long-term (exceeding one year) provisions where the deductible amount is calculated as the net present value at a discount rate of 3.5% per annum.

Taxable income is based on the profit or loss shown in the financial statements prepared according to Austrian GAAP (called

UGB). The accounting profit/loss is then adjusted for special tax rules according to the Income Tax Act. Non-deductible taxes (e.g. corporate tax) and non-deductible expenses (such as donations and general provisions) are added. On the other hand, special allowances and non-taxable income (dividends and losses carried forward) may be deducted. Under certain circumstances Austria also allows to deduct foreign losses incurred in permanent establishments or in subsidiaries under the group taxation regime.

## CAPITAL ALLOWANCES

There are some special capital allowances in Austria that are particularly applicable to small and medium-sized enterprises.

## DEPRECIATION

Assets subject to wear and tear have to be depreciated using the straight-line method. For new investments made after 30 June 2020 a degressive depreciation scheme has been implemented. If an asset costs less than EUR 800 (EUR 1,000 from 1 Jan 2023) it can be written off immediately in the period of acquisition. The Income Tax Act stipulates fixed depreciation rates for buildings, ranging between 1.5% and 2.5% (depending on the use and type of building). During the first 2 years an accelerated depreciation rate can be applied. For company cars, the Income Tax Act stipulates a fixed useful life of eight years for both acquisition and leasing. The costs of goodwill must be depreciated over fifteen years. The allocation key of the acquisition costs of a developed property between land and building has partially changed from 20/80 to 40/60 (disputable assumption, guilty in case of lending property). Other assets are depreciated over their useful life.

## STOCK / INVENTORY

Stock is valued at the lower of cost or market value. Where inventory is valued according to the cost price, the FIFO method is generally accepted. Fungible goods may also be valued by using the weighted average cost method.

## CAPITAL GAINS AND LOSSES

Under certain circumstances, roll-over of capital gains is allowed for individuals, trusts or partnerships but not for limited companies. If fixed assets are sold, gains resulting from disposal may be deducted from the cost of investments made in the same period or may be allocated to a tax-free reserve to be used against investments within the following 12 or 24 months. Any amounts not used within this period are subject to tax.

Several restrictions apply to the roll-over of capital gains (e.g. not applicable for limited companies). For corporate businesses there is no difference in the tax treatment of capital losses versus trading losses. For international participations, one can choose between tax-free treatment (capital gains and losses, depreciation is treated as neutral for tax-assessment) or taxable treatment. The declared option is irrevocably binding for the future. For privately held financial instruments the bank collects a withholding tax of 25% to 27.5% on capital gains.

## DIVIDENDS

There is a final withholding tax of 25% on domestic dividends (27.5% if the participation is held by a private person). Withholding tax does not apply to dividends received by:

- An Austrian company holding an interest of at least 10% in the distributing company;
- A foreign resident company holding an interest of at least 10% in the distributing company for a minimum period of one year.

Where withholding tax is incurred on dividends paid between Austrian resident companies, this is creditable against the recipient’s corporate income tax liability. In accordance with double taxation treaties withholding tax on dividends may be reduced at source or through a refund procedure.

## INTEREST DEDUCTIONS

Interest is deductible on an accrual basis. Austria applies the EU general thin-capitalisation regime. An important exception for the deductibility was introduced on 1 March 2014 whereby interest payable on intra-group loans is only allowed for deduction if the lender is subject to a 10% income tax on the interest earned in his domicile. In other words, there is no deduction for interest paid to intra-group financial holdings in tax havens. The same restriction applies to royalties.

Starting from 1 January 2021 the amount of the netted interest cost that exceeds 30% of taxable EBITDA is not deductible. A special definition for interest cost was implemented. An exemption limit was set at EUR 3 million. In case of a higher equity ratio compared to the equity ratio of the group’s consolidated financial statements there is no limitation on deductibility. Upon specific request the non-deductible part may be carried forward to the subsequent financial years. In addition, a residual EBITDA part that has not been deducted by way of interest can also be carried forward upon specific request for a maximum period of 5 years.

Interest income from bank deposits and securities is subject to a withholding tax of 25%. The withholding tax on interest is a final tax (income, donation, inheritance) for individuals. Interest income earned by a company is part of its business income and therefore subject to 25% corporate tax. For such companies, the withholding tax will be credited to corporate income tax due.

## CONTROLLED FOREIGN CORPORATION (CFC) RULES

In accordance with the requirements of the EU Anti-Tax Avoidance Directive (ATAD), passive income (in particular interest, royalties and dividends) of affiliated companies (more than 50% shareholding) taxed at low rates abroad (below 12.5% effective tax rate) can, as of 2019, be taxed in Austria. This is intended to eliminate the incentive to shift passive sources of income to countries with low tax rates.

## MANDATORY CROSS-BORDER NOTIFICATIONS (EU MANDATORY REPORTING LAW)

The year 2020 will see Austria introduce a new law that makes it mandatory to report tax-saving cross-border arrangements to the tax authorities. Failure to report – regardless of whether the underlying arrangement is classified as lawful or unlawful – can result in a fine of up to EUR 50,000.

The basis for the new law is the EU Mutual Assistance Directive 2018/822.

Both “marketable” and “bespoke” arrangements must be reported. Notification must be made in advance, and arrangements between 25 June 2018 and 30 June 2020 will have to be reported retroactively.

## LOSSES

Losses incurred by companies may be set off against trading income and capital gains of the same accounting period. Excess losses may be carried forward indefinitely, but cannot be carried back in principle.

However, in order to mitigate the financial constraints resulting from COVID-19 a temporary loss carry back regime had been introduced for 2019 and 2020, but is no longer applicable.

Losses carried forward may only be set off against the current income, i.e. a minimum of 25% of the income is subject to corporate income tax, regardless of losses carried forward. The excess loss may be credited against profits in consecutive years.

Losses incurred by individuals can be carried forward indefinitely if they stem from business sources; losses from other sources, e.g. rental income or capital assets on the other hand cannot be carried forward by individuals. Losses by individuals that incur from business investments without active participation in management, are limited to the contribution paid. Any further losses can only be offset against future profits from the same income. The 25% minimum taxable income does neither apply to individuals.

## FOREIGN-SOURCED INCOME

A resident company is subject to corporate income tax on its worldwide income. Income from foreign sources is taxable in Austria according to double taxation treaty rules. Austria does not apply specific controlled foreign company (CFC) legislation. However, to avoid tax abuse, dividends from international participations located in tax havens may be taxed in Austria if certain anti-abuse criteria are met.

## INVESTMENT ALLOWANCE / INCENTIVES

Under certain circumstances, the taxation of realised capital gains can be avoided or deferred by transferring the amount to an untaxed roll-over reserve. There are special allowances and/or tax incentives for apprenticeships and research and development (up to 14% allowance).

A further allowance for individuals and partnerships allows for 13% of annual profits to be exempt from tax provided the allowance amount (other than the first EUR 30,000 of profit) is invested in certain tangible assets or specific securities with a holding period of at least four years. The allowance is reduced to 7% for that proportion of annual profits between EUR 175,000 and EUR 350,000 and to 4.5% for that proportion of annual profits between EUR 350,000 and EUR 580,000. No allowance is available for annual profits that exceed EUR 580,000.

From 2023 onward an additional incentive scheme for investments will allow for a (fictitious additional) deduction of 10% (15% for ecologically favourable investments) of the investment costs. The tax incentive will apply to a listed number of items and exclude certain investments, such as climate damaging assets or intangibles. The maximum investment amounts to EUR 1 million per year.

## TRUSTS (PRIVATE FOUNDATION)

An Austrian Trust is a legal entity in civil law in which a donor transfers assets in order to achieve the objects of the trust. Quite often, the purpose of a trust is part of estate planning to care for family members (‘family trust’). Trusts enjoy some minor tax advantages as certain forms of income (e.g. certain capital gains, dividends, interest) are not subject to corporate income tax at the trust level. The transfers to private trusts are subject to a fixed rate of 2.5% donation tax.

Where real estate is transferred, transfer tax (from 0.5% to 3.5% of the real estate value) and donation tax must be paid. Transfers by the trust to its beneficiaries (natural persons) are subject to withholding tax. Trusts (Private Foundations) are subject to special tax regimes that vary from company taxation in quite a number of significant aspects.

## C. FOREIGN TAX RELIEF

Austria has concluded a number of double taxation treaties with other countries. Generally, an Austrian resident is subject to taxation in Austria. The double taxation treaties may either exempt foreign-sourced income or grant a credit against Austrian tax for foreign taxes paid on the same income or gain in the same fiscal period.

## D. CORPORATE GROUPS

There is a special regime for the taxation of corporate groups where profits and losses can be set off within the group. The parent (or head of the national group) must be a resident corporation or permanent establishment of an EU-corporation. Basically, the parent must hold more than 50% of the shares and voting rights in any member of the group directly or indirectly and the group status must be kept for a minimum period of three years. Losses from non-resident group members (restrictions apply to members in tax havens and countries where Austria has not concluded a treaty with a comprehensive administrative assistance clause) reduce the Austrian tax basis (subsequent taxation of these losses applies if the foreign group member can realise losses carried forward in the future). If a member leaves the group for whatever reason before expiration of the minimum period, tax will be assessed as if it had never been a group member.

Losses arising in relation to a member’s investment in another member of the corporate group are generally not deductible (for example, a realised loss on disposal of a subsidiary or impairment loss). The group taxation provides a considerably attractive tax instrument for corporate groups in Austria. However, thorough long-term tax planning is key to efficient utilisation of these provisions.

## E. RELATED PARTY TRANSACTIONS

The arm’s-length principle applies. In this context, the ‘substance-over-form’ principle, which is a general principle of Austrian income tax, has to be strictly observed. This implies that a transaction must be assessed according to its economic effect and not according to the legal form it takes. The tax administration introduced guidelines for transfer pricing basically relying on the OECD Transfer Pricing Guidelines. Particular restrictions apply to deductibility of intra-group interest and royalty payments to related parties in low tax jurisdictions.

## F. WITHHOLDING TAX

Austria imposes a withholding tax of 25% (for companies) or 27.5% (for private persons) on dividends, subject to the application of a double tax treaty. A withholding tax exemption applies if the recipient is resident company in another EU member state, holds at least 10% of the share capital and has done so continuously for one year prior to the dividend payment. Otherwise, the amount withheld can be credited by the recipient company against its own tax liability. For international participations, the EU Parent-Subsidiary Directive applies.

If the tax authorities suspect cases of tax avoidance or abuse, the withholding tax exemption can only be claimed through a refund procedure. In principle, Austria levies a 25% withholding tax not only on dividends but also on certain interest payments and capital income derived from securities. Corporate investors may achieve a tax exemption if certain conditions are met, even for portfolio dividends.

Austria imposes a withholding tax regime also on royalties and income from artists, musicians, actors, sportspersons and the like. The tax rate is usually 20% of the gross receipts. Regarding royalties, however, the rate is reduced to zero by many of Austria's double tax treaties.

## G. EXCHANGE CONTROL

Most exchange controls have been abolished in recent years. There are hardly any restrictions on the transfer of capital and currency transactions. However, there are reporting requirements for capital outflows from accounts of individuals exceeding an amount of EUR 50,000 (national or international). In addition, all accounts of individuals are kept in a register. The tax authorities may be allowed to get information from this register. Furthermore, even access to the content of accounts is possible under certain circumstances.

## H. PERSONAL TAX

Austrian resident individuals are subject to unlimited tax liability on their worldwide income. Non-resident individuals are only required to pay tax on Austrian-sourced income. Taxable income consists of the following seven sources:

(1) Agriculture and forestry;

(2) Independent (professional) services (including scientific, artistic, literary, educational, or other professional services);

(3) Trade or business, including gains on the sale of a business or partnership share;

(4) Employment, e.g. wages and salaries, social security pensions;

(5) Capital assets (dividends, interest and capital gains from financial instruments);

(6) Rentals and royalties;

(7) Annuities and other income of a recurring nature, capital gains from property, speculative gains, and income from certain non-recurring services.

The current average tax rates are as follows:

| Taxable Income (EUR) | Marginal Tax Rate % |
|---|---|
| 0 – 11,000 | 0 |
| 11,001 – 18,000 | 20 |
| 18,001 – 31,000 | 32.5 |
| 31,001 – 60,000 | 42 |
| 60,001 – 90,000 | 48 |
| 90,001 – 1,000,000 | 50 |
| Over 1,000,000 | 55[1] |

1. The income tax rate of 55% is limited to the years 2016 to 2025.

The tax payable is reduced by certain tax credits, depending on marital status, number of children and other personal circumstances. Special regulations and rates apply for non-residents. Approximately 1/7 of an employee's salary is paid as extra payments, e.g. 13th and 14th salary (which are mandatory pays in most industries) per year is taxed at a fixed rate of 6%. For higher income the reduced rate on extra payments is not applicable anymore or limited. The favourable taxation rates are as follows:

| Extra payments p.a. (EUR) | Tax Rate (%) |
|---|---|
| 0 – 620 | 0 |
| 621 - 25,000 | 6 |
| 25,001 - 50,000 | 27 |
| 50,001 - 83,333 | 35.75 |

## I. TREATY AND NON-TREATY WITHHOLDING TAX RATES

Interest paid to non-residents is generally not subject to withholding tax.

## KEY TAX POINTS

- Azerbaijan has three separate tax regimes:
  - Production Sharing Agreements (PSA) – applicable to oil and gas and mining companies operating under the PSAs;
  - Host Government Agreements (HGAs) – applicable to the companies operating under Baku Tbilisi Ceyhan (Main Export) Pipeline and the South Caucasus Pipeline;
  - Statutory regime – applicable to companies operating beyond the scope of PSAs and HGAs. The Following taxes are applicable to companies operating under the statutory regime: Corporate Profits Tax, Value Added Tax (VAT), Personal Income Tax (PIT), Simplified Tax, Property Tax, Land Tax, Road Tax, Mining Tax and Excise Tax.
- Tax categories under the Tax code of Azerbaijan include the following:
  - State taxes;
  - Taxes levied by the Nakhchivan Autonomous Republic and;
  - Local or municipal taxes.
- The tax year in Azerbaijan is the same as the calendar year.
- Individuals are considered resident for tax purposes if they have spent 183 days or more in Azerbaijan per calendar year;
- All bank payments between local taxpayers must be executed in AZN;
- Taxable profits include trading profit, capital gains, income from financial activities and other income. Residents, including those entities with foreign investment, are taxable on profit generated worldwide. Non-residents are taxable only on profit from activities performed in Azerbaijan.
- VAT payers may perform cash operations with a limit of up to 30,000 AZN per month.
- Simplified taxpayers may perform cash operations with a limit of up to 15,000 AZN per month.
- Any breach of the rules leads to penalties in the amount of 10% of the operations the first time, 20% the second time and 40% for three and more infringements.
- Any cash withdrawal is subject to 1% simplified tax plus a bank encashment fee to the taxpayer.
- 1% from the withdrawn amount is accrued and paid by the bank to the State Tax Authorities.
- Cash register payments will no longer be accepted as supporting documentation for expenses.
- Taxpayers selling goods (works, services) will now be obliged to issue electronic invoices in a prescribed form.
- With regard to the provision of works and services by electronic trade sellers (suppliers) as well as electronic lotteries or contests, the place for the provision of works and services will be the place where the purchaser of the works and services is located or registered.

## A. TAXES PAYABLE

## FEDERAL TAXES AND LEVIES

### COMPANY TAX

Legal entities incorporated in Azerbaijan are treated as residents and are taxable on their worldwide income. Legal entities incorporated abroad are treated as non-residents and are taxable on income from sources in Azerbaijan. Companies are required to make quarterly advance tax payments based on the previous year's net income. Corporate profit tax returns should be submitted by 31 March of the following year. The corporate profit tax rate is 20%, which is applied to the difference between revenue and taxable expenses.

### CAPITAL GAINS TAX

Capital gains are treated as ordinary income and taxed at the corporate profit tax rate of 20%.

## BRANCH PROFITS TAX

There is no separate branch profits tax in Azerbaijan Republic. Branches are taxed at the standard corporate income tax rate of 20%. A branch remittance tax of 10% applies.

## SALES TAX / VALUE ADDED TAX (VAT)

Each taxpayer with a sales turnover in excess of 200,000 AZN during consecutive 12 months must register for VAT. Provision of goods, works, rendering of services and import of goods are subject to taxation. VAT payers are entitled to recover VAT paid on purchases and are liable to pay VAT generated on sales of goods and rendering of services. VAT is the difference between VAT on sales and the sum of VAT on purchases and VAT on import of equipment. Reimbursement of VAT on purchases and import occurs through the receipt of an electronic tax invoice from the supplier via an electronic tax system (www.e-taxes.gov.az) and customs declarations appropriately.

The following VAT rates apply in Azerbaijan:

- 18% standard rate;
- 0% for the following categories, among others:
  - goods and services intended for use of diplomatic and consular representations accredited in the Azerbaijan Republic;
  - import and supply of goods and services undertaken in the context of receiving financial aid from abroad;
  - export of goods and services;
  - international and transit cargo and passenger transportation, except for international postal services;
  - entities operating under Special Economic Regimes for PSAs and HGAs.

The following categories, among others, are exempt from VAT:

- the value of state enterprise property purchased within a privatization program;
- the supply of financial services (banks, etc.);
- supply and import of the national and foreign currencies (except for numismatic purposes) as well as of securities;
- editing, publishing and printing activities in connection with the production of text books for schools (except work books), children's literature and state publishing funded by the state budget.

Zero VAT operations can be reimbursed unlike operations exempt from tax.

## LOCAL TAXES

Local taxes are applied by resolution of municipalities and obligatory for payment on the territory of municipalities. The following are the local (municipal) taxes:

- land use tax levied on natural persons;
- property tax levied on natural persons;
- mineral royalty tax on construction materials of local importance;
- profit tax of enterprises and organizations that are the property of municipalities.

## FRINGE BENEFITS TAX

Any fringe benefits provided to employees are considered as employees' additional income, which is taxable at personal income tax rates (14% and 25%).

## REGISTRATION DUTY

State registration of legal entities is executed by the Ministry of Taxes of Azerbaijan in line with the "one stop shop" principle, which includes electronic query and lasts 1 day in case of a local shareholder and 2 days in case of a foreign shareholder.

Foreign companies may open a branch office or representative office in order to carry out activities in Azerbaijan. The tax treatment is the same for both but the branch office would have more benefits because of a right to perform commercial operations on behalf of its head office.

Legislation defines "permit" as an official document granted by the authority issuing permits to exercise certain business activities or actions. Legislation contains a specific list of 87 types of activities requiring the obtention of permits. Applications for licence obtention shall be made via the Electronic Portal on Licence and Permits, which will enable to conduct all operations related to licensing (e.g. obtention of licences, their duplicates, and amendments thereto, renewal, suspension, resumption and termination thereof). The issuance period of licences and permits has been decreased to ten working days for obtaining a licence and seven working days for obtaining a permit.

## REAL ESTATE WITHHOLDING TAX

Rental fees paid to individuals are taxed at the source of payment at the rate of 14%. The minimum threshold for the rental fee amount from immovable property in Azerbaijan is determined in accordance with market prices for taxation purposes.

## B. DETERMINATION OF TAXABLE INCOME

Taxable income for residents is worldwide generated income. Taxable income of non-residents comprises income generated in Azerbaijan. All expenses related to business activities of the company are deductible from revenue. The following categories relate to non-deductible items:

- expenses that must be capitalized;
- non-commercial expenses which do not relate to the company's business activities;
- entertainment expenses and food and accommodation costs;
- travel, logistics and other costs spent in excessive of allowed standards established by the Azeri Tax Code.

## DEPRECIATION

Depreciation is a deductible expense. The depreciation rates are:

- Buildings – up to 7%
- Computing techniques which are the product of high technology – up to 25%
- Vehicles, equipment and computers – up to 20%
- Other fixed assets – up to 20%
- Fixed assets with a determined period of use – at an annual rate, pro-rata to that determined period of use
- Intangible assets – up to 10%

Land and facilities that are historical or architectural monuments may not be depreciated.

## STOCK / INVENTORY

Inventory includes raw materials, work-in-progress and finished goods. Each item of inventory must be valued at acquisition cost or cost of production. Accepted valuation methods include 'first in, first out' (FIFO), average cost and specific identifications.

## DIVIDENDS

Dividends paid from profit are liable to 10% withholding tax. Income from the distribution of property upon liquidation of a legal entity, as well as payments made with distribution of shares without changes to percentage of shares owned by shareholders and shares buy-backs at their nominal price, shall not be considered as a dividend.

## INTEREST DEDUCTIONS

Interest expenses paid or incurred by the company in the course of its business activities are tax deductible. An exception to the rule relates to loans received from abroad or related parties, which cannot exceed the expense calculated using an interest rate of 125% of the inter-bank credit auction rate set forth by the Central Bank of Azerbaijan.

## LOSSES

Taxpayers have a right to carry losses forward during a period of 5 years without limitation. In case of a change in principal ownership of a legal person of at least 50% as compared the previous year's ownership, the carry forward of a credit, deduction or loss from a previous taxable year may be disallowed.

## TAX INCENTIVES

The following tax incentives have been implemented in Azerbaijan:

- Entities operating in industrial and technology parks are entitled to a VAT exemption on import of equipment for construction, scientific research and other works in these parks for seven years or an indefinite period, depending on the nature of their activities.
- The Law on the Special Economic Regime for Export-Oriented Oil and Gas Activities applies the following incentives to contractors and subcontractors who should obtain a special confirmation certificate from the Ministry of Industry and Energy:
    - Local companies are permitted to choose between profit tax at a rate of 20% or 5% withholding tax on gross revenue;
    - Foreign subcontractors are subject only to a 5% withholding tax;
    - A 0% VAT rate;
    - Exemption from dividend withholding tax and taxation on branch and CJSC net profits;
    - Exemption from customs duties and taxes;
    - Exemptions from property tax and land tax.

## C. FOREIGN TAX RELIEF

Foreign taxes paid on income taxable in Azerbaijan may be credited against tax payable in Azerbaijan. The amount credited in Azerbaijan may not exceed the domestic tax payable on the foreign income. This limitation is calculated on the overall basis. The carry-forward of excess credit is not applicable in Azerbaijan. Treaty relief may be granted upon request by the taxpayer. Azerbaijan has concluded double tax treaties with 49 countries (see Section I below).

## D. CORPORATE GROUPS

There is no group taxation in Azerbaijan.

## E. RELATED PARTY TRANSACTIONS

The Tax Code provides that relations between associated entities must be based on the arm's length principle. Associated persons, for the purposes of taxation, are natural and/or legal persons, the relations between which might have a direct effect on the economic results of their activities or the activities of persons they represent. As from 1 January 2017, the concept of transfer pricing has been formally introduced in Azerbaijan whereby transactions between the following entities/persons are covered:

- a resident and an entity established or registered in a jurisdiction with a favourable tax regime;
- a resident and a related non-resident;
- a PE of a non-resident and an entity established or registered in a jurisdiction with a favourable tax regime; and
- a PE of a non-resident and the non-resident enterprise, as well as between that PE and any PE (or subsidiary/group member) of the non-resident enterprise in another country.

Only transactions with a total value in excess of AZN 500,000 in a calendar year are targeted by this legislation. The Administration needs to be notified about such transactions before 31 March of each year.

## F. WITHHOLDING TAX

Income received from Azerbaijan sources not attributable to a PE of a non-resident in Azerbaijan is subject to WHT at the following rates:

- Dividends paid by resident enterprises: 10%
- Interest paid by residents: 10%
- Rental fees for movable and immovable property: 14%
- Royalties: 14%
- Technical or management fees: 14%
- Leasing, risk insurance, or reinsurance payments: 4%
- Telecommunications or international transport services: 6%
- Other Azeri-source income: 10%

Interest on deposits is taxed at a 10% withholding tax rate on the amount in excess of 500 AZN.

## G. EXCHANGE CONTROL

Withholding tax at the rate of 20% is introduced for foreign currency transferred outbound Azerbaijan for the following:

- foreign direct investment by resident and non-resident legal entities and individuals;
- acquisition of investment securities and immovable property by resident and non-resident legal entities and individuals;
- transfer of capital by resident legal entities to subsidiaries, branches and representative offices and other affiliated bodies with respect to the amount that exceeds the equivalent of USD 50,000 in a calendar year.

Banks and insurance companies are an exception to the aforementioned rules. A bank transfer by an individual to the foreign account is subject to a withholding tax of 20% with respect to the amount that exceeds USD 50,000 in a calendar year. Withholding tax does not apply if the transferred amounts:

- are paid back as they were previously transferred to Azerbaijan;
- are paid for medical fees of a foreign health care provider, educational fees of a foreign education institution or bills related to decisions of foreign judicial and law enforcement institutions.

## H. PERSONAL INCOME TAX

Personal income of a resident in Azerbaijan consists of worldwide generated income, while a non-resident's income is generated only on the territory of Azerbaijan.

From 1 January 2019, monthly income of employees who are engaged in employment for non-oil-gas and non-government sectors shall be exempted for a seven-year period (i.e. until 31 December 2025), as follows:

| Taxable monthly income (AZN) | Tax rate (%) |
|---|---|
| Up to 8,000 | 0 |
| Over 8,000 | 14% of the amount over AZN 8,000 |

The standard rates that are applicable to the employees of the oil and gas and government sectors, and which will be applied after the seven-year grace period, are as follows:

| Taxable monthly income (AZN) | Tax rate (%) |
|---|---|
| Up to 2,500 | 14 |
| Over 2,500 | AZN 350 + 25% of the amount over AZN 2,500 |

Residents and non-residents who generate income in connection with their work in Azerbaijan must contribute 10% of their gross salary to the Social Insurance Fund. Contributions are withheld from employees' salaries and paid to the Social Insurance Fund by the employer. In addition to this, the employer pays 15% (below 200 AZN – 22%, over 200 AZN – 15%) of employees' gross salaries to the Social Insurance Fund. In addition to this, mandatory unemployment insurance must be paid at a rate of 0.5% of salary both by the employee and the employer, and mandatory health insurance must be paid at a rate of 2% of salary both by the employee and the employer.

Taxable income of individuals engaged in business activities without establishing a legal entity is taxed at a rate of 20%. An individual has a right to choose the type of taxation – VAT (18%), income (20%) or simplified taxpayer (4% for capital Baku and 2% for regions). The selected type appears in the electronic tax personal office (www.e-taxes.gov.az) and serves as a confirmation of the type of taxes paid by the individual.

## I. TREATY AND NON-TREATY WITHHOLDING TAX RATES

Azeri tax law allows to claim a refund of taxes withheld from payments to non-residents who are subject to the provisions of double tax treaties signed between Azerbaijan and 49 countries. DTA-05 statement serves a confirmation to withholding tax payment. The certificate may be obtained within 20 days of the moment of application.

In case a non-resident company pays all its taxes in its home country, it must provide a DTA-03 certificate, which would entitle it to receive full payment from the Azerbaijan resident taxpayer.

| Full name: | Commonwealth of The Bahamas |
| Capital: | Nassau |
| Main languages: | English |
| Population: | 400,054 (2022 estimate) |
| Monetary unit: | Bahamian Dollar (BSD); (US dollar, which is on par to the BSD, is widely accepted) |
| Internet domain: | .bs |
| Int. dialling code: | +1242 |

## KEY TAX POINTS

- There are no corporate, personal income, capital gains, withholding, inheritance and estate taxes.
- Income received in the Bahamas may be subject to tax in the country of origin.
- There are some tax information exchange agreements between the Bahamas and other countries.

## A. TAXES PAYABLE

The Bahamas offers the offshore financial sector freedom from corporate, personal income, capital gains, withholding, inheritance and estate taxes. However, income received in the Bahamas may be subject to the taxes in the country of origin.

There are tax information exchange agreements (TIEAs) between the Bahamas and other countries. The financial sector advantages are supported by a strong respect for privacy, flexible exchange controls, geographical location and continued record of political stability.

Government tax revenue is derived from the following sources:

- Import and export duties are levied at varying percentage rates; these continue to be reduced by varying percentages since the implementation of VAT on 1 January 2015, (now at the rate of 10%).
- Effective 1 January 2022, 10% VAT is payable on taxable supplies at all ports of entry in the Bahamas; Value Added Tax was initially implemented on 1 January 2015. The VAT registration threshold is a turnover of BSD 100,000 generally;
- Real Property tax;
- Motor vehicle licences;
- Gaming tax;
- Tourism tax;
- Stamp tax;
- Company fees:
  - The registration fee for a foreign company is BSD 50 and stamp duty is payable in the amount of BSD 600. All foreign companies must also pay an annual licence fee of BSD 1,000.
  - Private companies are required to pay a fee of BSD 300 upon filing their Memorandum of Association and an additional fee of BSD 30 for the filing of the Articles of Association. An annual licence fee of BSD 1,000 is also payable.
  - Additionally, stamp duty is payable on the authorised capital of a company. Where the authorised capital is BSD 5,000 or less, the stamp duty is BSD 60. For every additional BSD 1,000 or fraction thereof, the stamp duty will be BSD 300.
- Bank and trust company fees;
- Insurance company fees;
- Other fees, including business licence fees;
  - Under the Business Licence Act of 2010, as recently amended on 1 July 2021, business licence fees are levied on the turnover of a business at varying percentage rates or amounts from 0.5% to 3%, based on the company's annual turnover. Businesses with an annual turnover not exceeding BSD 100,000 are exempt from business licence fees.
  - Under the Value Added Tax Bill of 2014 (as amended), VAT at the rate of 10% is levied on goods and services. The increased revenue will be offset by a corresponding reduction in customs duties on imports.

| Manama | Maged Haleem | +973 396 424 69<br>maged.haleem@pkf.com |

## BASIC FACTS

| | |
|---|---|
| Full name: | Kingdom of Bahrain |
| Capital: | Manama |
| Main languages: | Arabic |
| Population: | 1.81 million (2022 estimate) |
| Monetary unit: | Bahraini Dinar (BHD) |
| Internet domain: | .bh |
| Int. dialling code: | +973 |

## A. TAXES PAYABLE

No form of personal, corporate or withholding tax is applicable In Bahrain. There is no personal tax except for municipal tax of 10% on the monthly rental of residential and business property. In addition, a 5% government levy on gross turnover is imposed on hotel services and entertainment.

Customs (Import) duties are generally levied at a rate of 5% but there are many items such as medicines, most food products, capital goods and raw material for industries which are exempt from customs duty. After implementation of the new Uniform Customs Tariff which became effective on 1 January 2003, all non-Gulf Co-operation Council (GCC) products, except for those exempted, are subject to 5% customs duty. However, the products of GCC countries shall enter into each other's markets free of customs duty subject to the provision of the required documentation.

Products are considered as originating in a GCC country if the value added to such a product in the said country is more than 40% of the value of the product in question and if the factory that manufactured the product is at least 51% owned by GCC nationals. In the event of re-export to non-GCC countries, a customs deposit has to be made and this will be refunded when proof of re-export is given to the authorities. In the event of re-export to GCC countries, customs duty at 5% will be levied at the first point of entry. The provisions of the GCC Customs Union, which was implemented from 1 January 2003, will be applicable.

## B. VALUE-ADDED TAX

A 5% VAT rate was implemented effective 1 January 2019. This was increased to 10% effective 1 January 2022.

A person is required to register for VAT if the amount of annual supplies during the previous 12 months exceeds, or the amount of annual supplies in the next 12 months is expected to exceed the mandatory registration threshold of BHD 37,500 (approximately USD 100,000). The registration must generally take place within 30 days from the end of the month in which the mandatory threshold is exceeded, or within 30 days prior the first day of the month in which the mandatory threshold is expected to be exceeded.

Unless a supply is exempt or subject to the 0% rate (among others export of goods, health care services, education services, local transport services etc.), it is subject to VAT at the standard rate of 5%.

Excise Tax was introduced in Bahrain with effect from 30 December 2017, with tobacco products subject to excise tax at 100%, soft drinks at 50% and energy drinks at 100%. Other goods may also become subject to the tax.

## C. WITHHOLDING TAX

Bahrain currently has 44 double tax treaties with various countries: Algeria, Austria, Bangladesh, Barbados, Belarus, Belgium, Bermuda, Brunei, Bulgaria, China, Cyprus, Czech Republic, Egypt, Estonia, France, Georgia, Hungary, Iran, Ireland, Isle of Man, Jordan, Korea, Lebanon, Luxembourg, Malaysia, Malta, Mexico, Morocco, Netherlands, Pakistan, Philippines, Portugal, Seychelles, Singapore, Sri Lanka, Sudan, Syria, Tajikistan, Thailand, Turkey, Turkmenistan, United Kingdom, Uzbekistan and Yemen.

Dividends, interest and royalty payments made by Bahraini companies to non-residents under these treaties are not subject to any withholding tax as Bahrain has no such withholding tax under its domestic tax law.

A Free Trade Treaty agreed between Bahrain and the US was signed on 14 September 2004 by the Kingdom.

| Full name: | People's Republic of Bangladesh |

| | |
|---|---|
| Capital: | Dhaka |
| Main languages: | Bengali, English |
| Population: | 167.67 million (2022 estimate) |
| Monetary unit: | Bangladesh Taka (BDT) |
| Internet domain: | .bd |
| Int. dialling code: | +880 |

## KEY TAX POINTS

- In Bangladesh, the principal taxes are Customs Duty, Value-Added-Tax (VAT), Supplementary Duty, Personal income tax and corporate income tax.
- According to Finance Act 2021-22, VAT rates vary from 5% to 15% depending on the types & nature of VAT imposable goods & services. The previous 15% standard rate is also applicable if so desired by the VAT payers but in that case, no VAT credit for input tax will be allowed.
- For Bangladesh tax purposes, income is categorised into seven areas, namely, salaries, interest on securities, income from house property, agricultural income, income from business or profession, capital gains and income from other sources.
- Among direct taxes, income tax is one of the main sources of revenue. It is a progressive tax system. Income tax is imposed on the basis of ability to pay, based on the principle of "…the more a taxpayer earns, the more he should pay". It aims at ensuring equity and social justice.
- The income tax rate for individuals, Hindu Undivided Family & Partnership Firm who are a resident assessee or non-resident Bangladeshi vary from 5% to 25% and for individuals who are a non-resident assessee (except non-resident Bangladeshi) the flat tax rate is 25%.
- For the 2021-2022 tax year (1 July 2021 to 30 June 2022) the top corporate tax rate is 45%. However, publicly traded companies registered in Bangladesh are taxed at a lower rate of 22.5%. Publicly traded Banks (except for Merchant Bank), Financial Institutions and Insurance companies are taxed at 37.5%, Merchant Bank 37.5% and such non-publicly traded company tax rate is 40% whilst all other non-publicly traded companies are taxed at the 30% rate. Co-operative Society registered under the Co-operative Society Act 2001 are taxed at the 15% rate and Manufacturer and Exporter of Knitwear & Woven garments are taxed at the 12% rate (10% for factory having green building certifications).
- An individual is treated as a resident of Bangladesh if that person stays in Bangladesh for 182 days or more in any income year; or 90 days or more in an income year if that person has previously resided in Bangladesh for a period of more than 365 days during the 4 preceding years. Residence is determined in Bangladesh purely on the period of presence in Bangladesh, irrespective of residency in other countries. Short-term visitors and dependents of foreign nationals not earning any income in Bangladesh are not taxed and are not required to file a tax return in Bangladesh.
- In general, all remuneration and benefits received by an employee who is resident in Bangladesh, or for services rendered in Bangladesh, are taxable. Taxable remuneration and benefits include salary, bonuses, commissions, accommodation allowances, transport benefits, education allowances for children, employer-provided domestic assistance and medical allowances.

## A. TAXES PAYABLE

### TAX AUTHORITY ADMINISTRATION

The National Board of Revenue (NBR) is the central authority for tax administration in Bangladesh. Administratively, it is under the Internal Resources Division (IRD) of the Ministry of Finance (MoF) which is split into 4 divisions, namely, the Finance Division (FD), the Internal Resources Division (IRD), the Banking Division (BD) and the Economic Relations Division (ERD). Each division is headed by a Secretary to the Government. NBR is responsible for formulation and continuous re-appraisal of tax policies and tax laws in Bangladesh.

Negotiating tax treaties with foreign governments and participating in inter-ministerial deliberations on economic issues having a bearing on fiscal policies and tax administration are also the NBR's responsibilities. Its main responsibility is to mobilize domestic resources through collection of import duties and taxes, VAT and income tax for the government. Side by side with the collection of taxes, facilitation of international trade through quick clearance of import and export cargoes has also emerged as a key role of NBR. Other responsibilities include administration of matters related to taxes, duties and other revenue related fees/charges and prevention of smuggling. Under the overall control of IRD, NBR administers the excise, VAT, customs and income tax services consisting of 3434 officers of various grades and 10195 supporting staff positions.

### COMPANY TAX

The following rates apply to the taxation of the following companies:

| | |
|---|---|
| 22.5% | Publicly Traded Company |
| 25% | One Person Company (OPC) |
| 30% | Non-publicly Traded Company |
| 37.5% | Publicly Traded Bank, Insurance & Financial Company (Except Merchant Bank) & such Non-publicly Traded 40% |
| 37.5% | Merchant bank |
| 45% | Cigarette manufacturing company and surcharges 2.5% |
| 45% | Mobile Phone Operator Company |
| 40% | Publicly traded mobile company |
| 15% | Co-operative Society registered under the Co-operative Society Act 2001 |
| 12% | Manufacturer and Export Knitwear & Woven Garments (10% for factory having green building certifications) |

## COMPANY TAX ADMINISTRATION

Company tax returns should be submitted by the fifteenth day of the seventh month following the end of the income year or the fifteenth day of September following the end of the income year where said fifteenth day falls before the fifteenth day of September. The consequences of not submitting a tax return (including withholding tax) are that a penalty arises of 10% of the tax of a taxpayer's last assessed income (subject to a minimum of BDT 1,000) and in the case of continuing default, a further penalty of BDT 50 is levied for every day of delay (provided that such penalty shall not exceed (a) in case of an assessee, being an individual, whose income was not assessed previously BDT 5,000 (b) in case of an assessee, being an individual, whose income was assessed previously, 50% of the tax payable on the last assessed income or BDT 1,000, whichever is higher). There is also a penalty for using a false Taxpayer Identification Number (TIN) which will not be exceeding BDT 20,000 on that person.

There is a formal dispute resolution system for taxpayers in Bangladesh, and where a return has been submitted under the normal scheme a taxpayer can make his case at a Hearing, where a decision (assessment) will then be made. For returns submitted under the Universal Self-Assessment Scheme, the issue of an acknowledgement slip is determined to be an Assessment Order. Universal Self-Assessment is subject to audit.

## PERMANENT ESTABLISHMENT CONSIDERATIONS

There is the potential that a permanent establishment (PE) could be created as a result of extended business travel, but this would be dependent on the type of services performed and the level of authority the employee has. The concept of a PE primarily exists in tax treaties.

## VALUE ADDED TAX

Value Added Tax (VAT) is levied on the importation of goods and services and the making of taxable supplies in the course of carrying out a taxable activity. According to Finance Act 2021-22, VAT rates vary from 5% to 15% depending on the types and nature of VAT imposable goods and services. The previous 15% standard rate is also applicable if so desired by the VAT payers but in that case, no VAT credit for input tax will be allowed. Reduced rates ranging from 0% to 15% are available depending on the nature of the taxable supply. VAT operates in Bangladesh partly as a sales tax.

## FRINGE BENEFITS TAX

There is no separate Fringe Benefits Tax. However, all benefits received by an employee who is a resident in Bangladesh, or for services rendered in Bangladesh, are taxable.

## INCENTIVES – TAX REBATE

An assessee, being a resident or a non-resident Bangladeshi, shall be entitled to a credit from the amount of tax payable on his total income. The amount of allowable investment is: actual investment or 25% of total (taxable) income excluding any income for which a tax exemption or a reduced rate is applicable under sub-section (4) of section 44 or any income from any source or sources mentioned in clause(a) of sub-section (2) of section 82C or BDT 1,500,000, whichever is less. The tax rebate amounts to 15% of allowable investment. A tax rebate of 15% of the allowable investment not exceeding BDT 15 Lakh and 10% when the amount exceeds BDT 15 Lack can be received depending on the investment satisfying certain conditions.

Types of investment qualified for the tax rebate are:

- Life insurance premium up to 10% of the face value;
- Contribution to Provident Fund to which Provident Fund Act, 1925 applies;
- Self-contribution and employer's contribution to Recognised Provident Fund.
- Deferred Annuity up to one-fifth of the salary;
- Contribution to approved Superannuation Fund;
- Contribution up to BDT 60,000 to deposit pension scheme sponsored by any scheduled bank or a financial institution;
- Investment in approved first hand debenture or debenture stock, IPO of stocks or shares;
- Contribution to Zakat Fund;
- Donation to charitable hospital approved by National Board of Revenue;
- Any sum paid to an organisation set up for the welfare of retarded people;
- Donation to philanthropic or educational institution approved by the Government;
- Donation to socio-economic or cultural development institution established in Bangladesh by Aga Khan Development Network;
- Donation to National level institution set up in memory of liberation war;
- Donation to National level institution set up in memory of Father of the Nation;
- Any investment by an individual in savings certificate and Bangladesh Government Treasury Bond, etc.;
- Any sum invested in the purchase of Bangladesh Treasury Bond.

## TAX INCENTIVES

The following fiscal incentives are available to taxpayers:

- Exemption u/s. 44;
- Exemption of income of an Industrial Undertaking (IU) (u/s. 45);
- Exemption of income of a tourist industry (TI) (u/s. 46, 46A, 46B, 46BB, 46CC, 47);

## SPECIAL TAX TREATMENT IN RESPECT OF INVESTMENT IN ECONOMIC ZONES OR HI-TECH PARKS

No question shall be raised as to the source of any sum invested in any economic zone declared under section 5 of Bangladesh Economic Zone Act 2010 or in any hi-tech park declared under section 22 of Bangladesh Hi-Tech Park Authority Act 2010 for setting up industrial undertaking engaged in producing goods or services therein within the period from 1 July 2019 and 30 June

2024 (both days inclusive) by a company, if tax at the rate of 10% cent is paid on the sum so invested before filing of the return for the concerned income year.

### MAJOR AREAS FOR FINAL SETTLEMENT OF TAX LIABILITY

Tax deducted at source for the following cases is treated as a final discharge of tax liabilities. No additional tax is charged or refund is allowed in the following cases:

| Head of Source | Tax rate |
|---|---|
| Compensation against acquisition of properties (Sec. 52C) | As mentioned in section 52C, i.e. 2%/1% |
| The amount received as interest from any savings certificate (Sec. 52D) | As mentioned in section 52D, i.e. 5% |
| Cash subsidy (Sec. 53DDD) | As mentioned in section 53DDD, i.e. 3% |
| Deduction at source from interest on saving deposits and fixed deposits, etc. (53F) | As mentioned in section 53F, i.e. 10%/5% |
| Transfer of property (Sec. 53H) | As mentioned in section 53H and the rule made thereunder (see the Section and Rule 17II) |

## B. RELATED PARTY TRANSACTIONS

Transfer pricing was introduced into Bangladesh tax laws in 2012. However, such regulation has become effective from 1 July 2015.

## C. EXCHANGE CONTROL

Expatriates are allowed to open foreign currency bank accounts in Bangladesh and remit a portion of their post-tax earnings through proper banking channels after obtaining the necessary permissions from the central bank. The balance can be taken out the country when leaving permanently.

## D. PERSONAL INCOME TAX

### RESIDENTIAL STATUS

An individual is treated as a resident of Bangladesh if he/she stays in Bangladesh for 182 days or more in any income year; or 90 days or more in an income year if that person has previously resided in Bangladesh for a period of more than 365 days during the 4 preceding years. Residence is determined in Bangladesh purely on the period of presence in Bangladesh, irrespective of residency in other countries. Short term visitors and dependents of foreign nationals not earning any income in Bangladesh are not taxed and are not required to file a tax return in Bangladesh. Otherwise, every taxpayer is required to file an annual tax return.

### TAX RATE

For individuals other than female taxpayers, senior taxpayers of 65 years or more and disabled taxpayers, tax is payable at the following rates on income slabs:

| | |
|---|---|
| First BDT 300,000 | 0% |
| Next BDT 100,000 | 5% |
| Next BDT 300,000 | 10% |
| Next BDT 400,000 | 15% |
| Next BDT 500,000 | 20% |
| Balancing amount | 25% |

An individual who is a non-resident assessee (non-resident Bangladeshi) is subject to a 25% flat income tax rate on his total income.

Tax-exempt income for all 3rd gender, female taxpayers and senior taxpayers over 65 years of age is BDT 350,000 while it is BDT 450,000 for a person with disability and for gazetted war-wounded freedom fighters. However, tax-exempt income for parents and legal guardians of a person with disability will be BDT 400,000 higher than the usual amount. Only one of the parents would avail that benefit.

Minimum Tax for any individual category of assessee is as follows:

| | |
|---|---|
| Dhaka and Chittagong City Corporation | BDT 5,000 |
| Other City Corporation | BDT 4,000 |
| Other than City Corporation | BDT 3,000 |

### TAX RETURN FILING

An individual's tax return must be filed by 30 November following the end of the income year. The return filing date may be extended up to 2 months from the date so specified by the Deputy Commissioner of Taxes upon application by an individual being assessed and the date may be further extended up to 2 months with the approval of the Inspecting Joint Commissioner.

### TAXABLE REMUNERATION AND BENEFITS OF EMPLOYEE

In general, all remuneration and benefits received by an employee who is resident in Bangladesh, or for services rendered in Bangladesh, are taxable. Taxable remuneration and benefits include salary, bonuses, commissions, accommodation allowances, transport benefits, education allowances for children, employer- provided domestic assistance and medical allowances. Employers are required to withhold income tax when making payments to employees. Employers are also required to file an annual return showing the respective payments and tax deducted at source for each employee in the tax year.

## WORKER PROFIT PARTICIPATION FUND

Exemption of any payment received from workers' profit participation fund established under Bangladesh Labour Act 2006 (amended up to 2013) has been restricted up to BDT 50,000 only. There was no such limitation previously.

## WORK PERMITS/VISA REQUIREMENTS

A visa must be applied for before the individual enters Bangladesh. The type of visa required will depend on the purpose of the individual's entry into Bangladesh. Foreigners working in Bangladesh must have a work permit. Currently, these are issued by the Bangladesh Investment Development Authority (BIDA), however, previously issued by the Board of Investment (BOI).

## LOCAL DATA PRIVACY REQUIREMENTS

Bangladesh does not currently have data privacy laws. However, Bangladesh tax laws provide certain protection of information submitted under them.

## E. TREATY AND NON-TREATY WITHHOLDING TAX RATES

Bangladesh has concluded double taxation agreements with the following countries:

| | Dividends | | Interest[11] (%) | Royalties (%) |
|---|---|---|---|---|
| | Individuals, companies (%) | Qualifying companies (%) | | |
| **Domestic rates** | | | | |
| Companies | 20 | 20 | 20 | 20 |
| Individuals | 30[13] | -- | 20 | 20 |
| **Treaty countries:** | | | | |
| Bahrain[12] | 15 | 10[1] | 10 | 10 |
| Belgium | 15 | 15 | 15 | 10 |
| Canada | 15 | 15 | 15 | 10 |
| China | 10 | 10 | 10 | 10 |
| Czech Republic[14] | 15 | 10[15] | 10 | 10 |
| Denmark | 15 | 10[1] | 10 | 10 |
| France | 15 | 10[1] | 10 | 10 |
| Germany | 15 | 15 | 10 | 10 |
| India | 15 | 10[2] | 10 | 10 |
| Indonesia | 15 | 10[1] | 10 | 10 |
| Italy | 15 | 10[1] | 10/15[6] | 10 |
| Japan | 15 | 10[3] | 10 | 10 |
| Korea | 15 | 10[1] | 0/10[7] | 10 |
| Malaysia | 15 | 15 | 15 | 15 |
| Mauritius | 10 | 10 | –[8] | –[8] |
| Netherlands | 15 | 10[1] | 0/7.5/10[9] | 10 |
| Norway | 15 | 10[1] | 10 | 10 |
| Pakistan | 15 | 15 | 15 | 15 |
| Philippines | 15 | 10[2] | 15 | 15 |
| Poland | 15 | 10[1] | 10 | 10 |
| Romania | 15 | 10[1] | 10 | 10 |
| Saudi Arabia | 10 | 10 | 7.5 | 10 |
| Singapore | 15 | 15 | 10 | 10 |
| Sri Lanka | 15 | 15 | 15 | 15 |
| Sweden | 15 | 10[1] | 10/15[6] | 10 |
| Switzerland | 15 | 10[4] | 10 | 10 |
| Thailand | 15 | 10[1] | 10/15[6] | 15 |
| Turkey | 10 | 10 | 10 | 10 |
| United Arab Emirates | 10 | 5[5] | 10 | 10 |
| United Kingdom | 15 | 10[1] | 10 | 10 |
| United States | 15 | 10[1] | 5/10[10] | 10 |
| Vietnam | 15 | 15 | 15 | 15 |

NOTES:

1. The reduced rate applies to dividends paid to a beneficial owner which is a company holding directly at least 10% of the capital of the payer.
2. The reduced rate applies to dividends paid to a beneficial owner which is a company holding directly at least 25% of the capital of the payer.
3. The reduced rate applies to dividends paid to a beneficial owner which is a company that owns at least 25% of the voting shares of the payer during the period of six months immediately before the end of the accounting period for which the distribution of profits takes place.
4. The reduced rate applies to dividends paid to a beneficial owner which is a company holding directly at least 20% of the capital of the payer.
5. The reduced rate applies to dividends paid to a beneficial owner which is a company that owns at least 3% of the shares of the payer.
6. The reduced rate applies to interest derived by a bank or any other financial institution (including an insurance company).
7. The reduced rate applies if interest is paid in connection with sale on credit of any industrial, commercial or scientific equipment.

8. No reduction under the tax treaty so the domestic rate applies.
9. Exemption for interest related to the construction of industrial, commercial or scientific installations or public works. The 7.5% reduced rate applies to interest received by a bank or any other financial institution (including an insurance company) as long as the Netherlands does not levy a withholding tax on interest.
10. The reduced rate applies to interest derived by a bank or any other financial institution (including an insurance company) or interest paid in connection with sale on credit of any industrial, commercial or scientific equipment or of any merchandise.
11. Certain tax treaties provide for an exemption or a reduction for some types of interest (but are not listed here), e.g. interest paid to public bodies and financial institutions or in relation to sales on credit or approved transactions.
12. Effective date: 1 January 2019 (Bahrain); 1 July 2019 (Bangladesh).
13. Dividends paid to non-resident individuals (other than non-resident Bangladeshis) is subject to a 30% withholding tax. Dividends received by non-resident Bangladeshis are subject to a 10% withholding tax (15% if a 12-digit TIN is not furnished).
14. Effective date: 1 July 2021 (Bangladesh); 1 January 2022 (Czech Republic).
15. The reduced rate applies if the beneficial owner is a company which holds directly at least 25% of the capital of the dividend-paying company throughout a 365 day period that includes the day of the payment of the dividend (for the purpose of computing that period, no account shall be taken of changes of ownership that would directly result from a corporate reorganisation, such as a merger or divisive reorganisation, of the company that holds the shares or that pays the dividend).

## BASIC FACTS

| | |
|---|---|
| Full name: | Republic of Belarus |
| Capital: | Minsk |
| Main languages: | Belarusian, Russian |
| Population: | 9.44 million (2022 estimate) |
| Monetary unit: | Belarusian Rouble (BYN) |
| Internet domain: | .by |
| Int. dialling code: | +375 |

## KEY TAX POINTS

- Belarus resident companies are subject to tax on their worldwide income. Non-resident companies are subject to tax on their Belarus-sourced income only which is derived from a permanent establishment (PE) in Belarus. Where a non-resident’s Belarus PE does not have any business activity it will be subject to withholding tax on its Belarus-sourced income.
- The standard corporate profits tax rate is 18%. Profits of commercial microfinance organisations included in the register of microfinance organisations derived from microfinance activities are subject to income tax at a rate of 25%. Profits earned by a forex company, the National Forex Centre, and from operations with non-deliverable OTC financial instruments are subject to income tax at a rate of 25%.
- There is no specific branch profits tax in Belarus.
- Capital gains are taxed at 18%.
- Broadly, local supplies of goods and services in Belarus provided by a taxpayer as well as the importation of goods, are subject to VAT. Supplies may be zero-rated, exempt, standard or preferential rated. The standard rate of VAT is 20%. A preferential rate of 10% applies to certain supplies. Telecommunication services are subject to 25%.
- Belarus does not impose estate tax, gift taxes or a net worth tax.
- For company taxation, the net profit shown in the financial statements is adjusted for tax purposes and expenses incurred in earning income or receiving an economic benefit are allowed to be deducted in full, unless the Tax Code or Presidential Regulations provide otherwise or limit or restrict the deduction.
- Unless otherwise provided by a double tax treaty, dividends paid to foreign legal entities not having a permanent establishment in Belarus are subject to 12% withholding tax. Dividends distributed by a resident company to another resident company are subject to 12% withholding tax. Dividend withholding tax is 6% or 0% subject to certain conditions in the Tax Code.
- Thin capitalisation rules apply to legal entities in Belarus which restrict the deduction of interest to a debt-to-equity ratio of 3:1 and apply to certain controlled debt obligations.
- The Tax Code empowers the tax authority to ensure that transactions between related parties reflect a third party arm’s length price, i.e. an objective market value.
- The tax year in Belarus is the calendar year. Belarus resident individuals are subject to personal income tax on their worldwide income whereas non-resident individuals are taxed on their Belarusian-sourced income only.
- Employment income includes salary, any other compensation and bonuses received in cash or in kind. Employers calculate, deduct and pay the relevant tax on the compensation paid to their employees.
- Social security contributions are payable by an employer at a rate of 34% (28% for pension insurance and 6% for social insurance) and by an employee at a rate of 1% of their gross compensation (withheld by the employer).
- Capital gains are not taxed separately but included in the total income of an individual taxpayer.

## A. TAXES PAYABLE

### COMPANY TAX

Belarus resident companies are subject to tax on their worldwide income. Non-resident companies are subject to tax on their Belarus source income only which is derived from a permanent establishment (PE) in Belarus. Where a non-resident's Belarus PE does not have any business activity it will be subject to withholding tax on its Belarus-sourced income. The standard corporate profits tax rate is 18%. However, a reduced tax rate applies to the following income:

- Dividends paid to Belarus companies (standard rate 12%; dividend withholding tax is 6% or 0% subject to certain conditions in the Tax Code);
- Income (profits) of producers of high-technology products (5%).

Belarus has several tax regimes as follows:

(1) Simplified system of taxation:

Under the simplified system of taxation business entities are not subject to corporate profits tax and, under certain conditions, neither to VAT (and some other taxes), but instead pay a unified tax of either 5% of gross revenues or, if the business entity continues to pay VAT, 3% of gross revenues, or 16% for certain non-sales income.

(2) Unified tax on agricultural producers:

A 1% unified tax rate applies to the gross revenues of agricultural producers from the sale of goods (works and services) and other property and income derived from non-sales transactions. For an agricultural entity to apply the unified tax method at least 50% of its annual gross revenue must be from the sale of its own manufactured crop products (excluding flowers and ornamental plants), livestock products, fish breeding and bee breeding products, otherwise the unified tax is paid at a rate of 3%.

(3) Tax on gambling industry:

Gambling (except for lotteries) is subject to fixed tax rates. The rate depends on the type and number of operational gambling equipment used. An additional gambling tax of 4% applies to the positive difference between the amount of received bids and the fund to be paid to the winner.

(4) Tax on income generated by lottery sales:

Lottery sales are subject to an 8% tax rate on the gross revenue less the awarded prize fund.

(5) Tax on electronic interactive games:

An electronic interactive games tax applies at 8% to the difference between the amount of revenue from the electronic interactive games and the fund to be paid to the winner(s).

### COMPANY TAX - ADMINISTRATION

The basic tax reporting period is the calendar quarter and tax returns must be filed within 20 days of the month following the end of the reporting quarter. Any corporate profits tax liability must be paid within 22 days of the month following the end of the respective reporting quarter.

Corporate profits tax for the fourth quarter of a year must be paid by 22 December of the current year in an amount equal to two-thirds of the tax payable in the third quarter of the current year with subsequent additional payment or reduction not later than 22 March of the next year.

A fine of 40% of the unpaid tax, at a minimum of 10 base values, may arise where there is non-payment or an incomplete payment of tax. A fine of up to 1 base value may arise if a tax return is submitted late but not later than 3 working days. A fine of 2 base values applies increased by 0.5 base values for every complete month of delay in submission, at a maximum of 10 base values. Furthermore, a penalty is applied for every calendar day of delay in tax payment. The penalty is assessed on the basis of the refinance rate established by the National Bank of the Republic of Belarus.

### CAPITAL GAINS TAX

Capital gains are taxed at 18%. Capital gains are not taxed separately but included in the total income of an individual taxpayer.

### BRANCH PROFITS TAX

There is no specific branch profits tax however a permanent establishment (PE) of a non-resident legal entity will pay tax on profits attributable to it. A PE can include any place through which a foreign legal entity regularly carries out its business activities in Belarus. There is no branch remittance tax in Belarus.

### VALUE ADDED TAX (VAT)

Broadly, local supplies of goods and services in Belarus provided by a taxpayer as well as the importation of goods, are subject to VAT. Supplies may be zero-rated, exempt, standard or preferential rated. The standard rate of VAT is 20%. A preferential rate of 10% applies to the following:

- Import (only produced on the territory of the member states of the Eurasian Economic Union) and/or local supplies of crop products (excluding floriculture, cultivation of ornamental plants), beekeeping, livestock (excluding fur production) and locally produced fishing, import and/or local supplies of certain food products and goods for children.
- Import and/or local supply of certain drugs and medical devices.

Telecommunication services are subject to 25%.

Exempt local supplies include:

- Provision of certain medical services;
- Supply of folk art products of recognised artistic merit according to the list of such products approved by the President of the Republic of Belarus;
- Supply of goods (works, services) by payers using the labour of disabled people, if the number of disabled people on average

for the period is at least 30% of the number of employees on average for the same period;

- Sale of goods by duty-free shops;
- Implementation of R&D, experimental and technological work, registered in the state register of R&D, experimental and technological work in the manner determined by the President of the Republic of Belarus;
- other.

Normally taxpayers recognise revenue for VAT purposes on an accrual basis however, as an exception to this, revenue is recognised on a cash basis by taxpayers using the simplified taxation system and keeping simplified tax records without accounting records. VAT returns should be submitted to the tax authority on either a monthly or quarterly basis, within the first 20 days of the month following the reporting period. The payment of any VAT liability should be made within the first 22 days of the month following the reporting period.

## OTHER TAXES – CUSTOMS DUTIES

The Eurasian Economic Union exists between Russia, Kazakhstan, Belarus, Armenia and Kyrgyzstan with its unified trade regulations and Customs Code. The following charges are considered as customs duties:

- Import duties;
- Export duties;
- Special anti-dumping and countervailing duties;
- VAT and excise taxes due upon importation of goods; and,
- Fees for customs processing/services.

## OTHER TAXES – ESTATE AND GIFT TAXES

Belarus does not impose estate and gift taxes or a net worth tax.

## B. DETERMINATION OF TAXABLE INCOME

The net profit shown in the financial statements, calculated in accordance with the Belarus accounting standards, is adjusted for tax purposes in accordance with the Tax Code. Broadly, all costs are deductible for tax purposes that are incurred in earning income or receiving an economic benefit, unless the Tax Code of Belarus or Presidential Regulations provide otherwise or limit or restrict the deduction.

## CAPITAL ALLOWANCES

Fixed assets (buildings, premises, equipment and vehicles) may be depreciated using the straight-line method, the indirect disproportionate method, and the production method in accordance with the rates prescribed in the Tax Code. Land is not depreciated. Broadly, fixed assets can be divided into five basic groups and the depreciation rate or rates of each group are as follows:

| Group | Description of the assets | Annual rate of depreciation |
|---|---|---|
| 1 | Immovable property | 0.8% to 20% |
| 2 | Plant, machinery and equipment | 2% to 25% |
| 3 | Trademarks, patents and other intangible property | 2.5% to 20% |
| 4 | Computers | 20% |
| 5 | Transport vehicles | 5% to 20% |

## INVESTMENT DEDUCTION

For corporate profits tax purposes, a percentage of the initial value of acquiring or reconstructing tangible assets (value of investments for reconstruction) can be deducted, as follows:

- Not more than 15% - Buildings and structures.
- Not more than 30% - Machinery and equipment, and certain transport vehicles.

The tax base (the initial cost of the asset) is not reduced by the investment allowance for tax depreciation purposes. After taking an investment deduction the taxpayer may accrue depreciation on the initial value of fixed assets.

## STOCK / INVENTORY

The domestic accounting legislation allows for the following stock / inventory valuation methods:

- First in first out (FIFO);
- Cost of each unit; and,
- Average cost.

The stock / inventory valuation method used for corporate income tax purposes must be the same as the taxpayer's accounting policy.

## DIVIDENDS

Unless otherwise provided by a double tax treaty, dividends paid to foreign legal entities not having a permanent establishment in Belarus are subject to 12% withholding tax. Dividends distributed by a resident company to another resident company are subject to 12% withholding tax. However, the tax rate is reduced in the following cases:

- To 6% if a resident company has not distributed profit between its members (shareholders) for three successive calendar years;
- To 0% if a resident company has not distributed profit between its members (shareholders) for five successive calendar years.

Since the dividends have been subjected to withholding tax at source they are not again taxed under corporate income tax in the hands of the recipient. Where a foreign entity pays a dividend to an entity in Belarus, the dividend received is subject to 12% corporate income tax even though withholding tax may have been deducted at source by the foreign paying entity.

### INTEREST DEDUCTIONS

Thin capitalisation rules apply to legal entities in Belarus which restrict the deduction of interest to a debt-to-equity ratio of 3:1 and apply to the following controlled debt obligations:

- Between parties being founders (participants) of one company, if direct and/or indirect participation between each of these persons is not less than 20%;
- Between organisations if one party directly and/or indirectly participates in these organisations and its participation in each of these organisations is not less than 20%, as well as when their beneficial owner is one and the same natural person;
- Between organisations in which the collective executive body or board of directors has more than 50% of the same natural persons in common with related parties as described in the sixth bullet below.
- When one party (including a natural person together with its related parties as described in the sixths bullet below) acts as a founder (participant) of another organisation, if direct and/or indirect participation of the former is not less than 20%;
- When one party executes (directly or indirectly) control over another (other) party (parties);
- When natural persons are in accordance with domestic legislation married, close relatives or in an in-law relationship, an adoptive parent and adopted person, guardian, curator and ward as well as between organisations in which such natural persons are founders (participants), if direct and/or indirect participation between such natural persons in these organisations is not less than 20%.

However, the thin capitalisation rules do not apply to banks, insurance companies, or to lessors or landlords subject to certain conditions.

### LOSSES

Tax losses can be carried forward and utilised against future taxable profits arising in the subsequent 10 years (commencing with 2011 tax losses), although some restrictions apply. Tax losses which have arisen from certain operations may only be utilised against taxable profits arising from the same operations. If tax losses are not attributable to a particular group, they are carried forward generally regardless of the operations or activities in which they were incurred. Tax losses may not be carried back.

### INCENTIVES

There are several locations where incentives are available in Belarus:

(1) Taxation of residents of the High Technologies Park;

(2) Taxation of the members of the Augustow Canal Special Tourist and Recreation Park;

(3) Taxation of the members of the China-Belarus Industrial Park;

(4) Free-economic zones; and,

(5) Taxation of commercial organisations and individual entrepreneurs engaged in medium-sized or small towns and rural areas.

Special conditions and procedures apply for claiming the above and other benefits.

## C. FOREIGN TAX RELIEF

Subject to the Belarus tax authorities being provided with the certificate issued by the foreign competent authority confirming the amount of tax paid (withheld) in the foreign state, a tax credit for the foreign tax paid by, or withheld from, a Belarusian taxpayer will be granted. Tax paid abroad on foreign-source income derived by a Belarusian legal entity may be credited against its corporate income tax (CIT) liability. The amount deducted however cannot exceed the equivalent amount of Belarus tax calculated on the foreign-sourced income.

## D. CORPORATE GROUPS

Each entity in Belarus is taxed separately as a stand-alone entity. The tax legislation does not provide for tax groups or group taxation.

## E. RELATED PARTY TRANSACTIONS

The Tax Code empowers the tax authority to ensure that transactions between related parties reflect a third party arm's length price, i.e. an objective market value. The tax authorities can check whether prices set by particular taxpayers are in line with market prices when conducting a tax audit. In particular, they can apply the market price to:

(1) A foreign-trade transaction with a related party when the transaction price (sum of transactions prices) in one calendar year exceeds BYN 400,000 (net of indirect taxes) for organisations not included in the List of large-scale payers and BYN 2,000,000 (net of indirect taxes) for organisations included in the List of large-scale payers, except for transactions with an offshore zone resident;

(2) A transaction on sale or acquisition of goods (works, services) property rights with a related party – tax resident of the Republic of Belarus not calculating and paying profit tax in the year when the transaction is performed when the transaction price (sum of transactions prices) in one calendar year exceeds BYN 400,000 (net of indirect taxes) for organisations not included in the List of large-scale payers and BYN 2,000,000 (net of indirect taxes) for organisations included in the List of large-scale payers;

(3) A transaction with a related party or a taxpayer applying special tax regimes on sale or acquisition of immovable property (its part) or housing bonds in the process of their circulation after state registration of erection of a construction object;

(4) A foreign-trade transaction on sale or acquisition of strategic goods included in the list issued by the Council of Ministers of the Republic of Belarus when the transaction price (sum of transactions prices) in one calendar year exceeds BYN 2,000,000 (net of indirect taxes).

The following transactions are equated with related party transactions:

- A set of transactions with participation of (through) a third person not being a related party provided that such a person does not perform in this set of transactions significant functions, except for sale and/or acquisition of goods (works, services), property rights by one party for another party recognised as related to this party; does not use any assets and/or does not take risks for organising sale and/or acquisition of goods (works, services), property rights by one party for another party recognised as related to this party;
- A transaction on sale or acquisition of goods (works, services), property rights with an offshore zone resident when the transaction price (sum of transactions prices) in one calendar year exceeds BYN 400,000 (net of indirect taxes).

The Belarus tax authorities apply the following transfer pricing methods:

- Comparable uncontrolled price method (CUP);
- Resale price method;
- Cost plus method;
- Comparable profits method;
- Profit split method.

## F. WITHHOLDING TAX

- Dividends paid to non-resident companies are subject to a 12% standard withholding tax on the gross amount subject to the application of a double tax treaty.
- Interest and royalties not connected to a permanent establishment are subject to a 10% and 15% final withholding tax respectively on the gross amount, subject to the application of a double tax treaty.
- Non-resident companies without a permanent establishment are subject to a 6% final withholding tax on freight and forwarding charges connected with international shipping transactions, subject to the application of a double tax treaty.

Until 1 January 2025, income received from a participation in investment funds whose investment shares are registered in the Republic of Belarus for three calendar years, starting from the first calendar year in which the profit of such a fund arose, are taxed at a rate of 6%. The reduced rate applies to certain types of income:

- income from debt obligations of any kind, regardless of the way they are formalised;
- income from the disposal of securities on the territory of the Republic of Belarus (except for shares) and/or their redemption;
- income from the alienation of shares in the statutory fund (shares, stocks) of organisations located on the territory of the Republic of Belarus, or a part thereof, including income arising from the exit (exclusion) from such an organisation.

A 15% standard withholding tax applies to income derived from:

- Sale of goods in the territory of Belarus under agency agreements, commission agreements, other similar civil law agreements;
- Holding or participation in cultural and entertainment events in the territory of Belarus, as well as work of amusement rides and wild beast shows;
- Contractual fines and penalties;
- Research and development, scientific and research, development of design and technological documentation for pilot units (pilot batch) of goods, production and testing of pilot units (pilot batch) of goods;
- Provision of guarantees and/or surety;
- Provision of disc space and/or communication channel for hosting on a server and services related to its technical maintenance;
- Alienation of immovable property in the territory of Belarus; an enterprise (its part) as an asset complex owned by a foreign organisation, securities (except for shares) and/or their redemption; stakes in equity capital (participatory interests, shares) of organisations in the territory of Belarus or their parts;
- Performing works, rendering services: consultancy, accounting, auditing, marketing, legal, engineering; trust management of immovable property in the territory of Belarus; courier; intermediary; managerial; HR; educational; storage of property; insurance; advertising; installation, adjustment, inspection, servicing, measurement, testing lines, mechanisms, equipment, devices, instruments, structures, intangible assets in the territory of Belarus; cargo escorting and protection;
- Immovable property in the territory of Belarus transferred for trust management;
- Data processing and information hosting, activities of web portals on web sites subject to conditions in the Tax Code.

The following income paid to non-resident companies is taxed at a 0% rate:

- from debt obligations on loans granted to the Republic of Belarus or the Government of the Republic of Belarus, as well as to residents of the Republic of Belarus under state guarantees in the manner established by the President of the Republic of Belarus;
- from debt obligations on loans and borrowings extended to Belarusian organisations at the expense of funds received from the placement of bonds issued by foreign organisations in order to send such funds to Belarusian organisations in the form of loans and borrowings;
- from debt obligations on bonds of Belarusian organisations issued from 1 April 2008 to 1 January 2015 and from 1 July 2015, as well as from their alienation and/or their redemption, unless otherwise provided by the tax code;
- from debt obligations on bonds of the open joint-stock company “Development Bank of the Republic of Belarus” placed outside the Republic of Belarus, as well as from their alienation and/or their redemption;
- from debt obligations on government securities of the Republic of Belarus, securities of the National Bank, bonds of local executive and regulatory bodies, as well as from their alienation and/or their redemption;
- in the form of compensations (reimbursement of costs), commissions, the payment of which to foreign banks is stipulated by agreements on the provision of certain credits, loans;
- from the performance of work (provision of services) related to:

    - issue, placement, circulation, redemption of government long-term bonds of the Republic of Belarus, which are government debt obligations that form the external government debt, bonds of local executive and regulatory bodies and bonds of Belarusian organisations, the open joint stock company “Development Bank of the Republic of Belarus”, taking into account the rights to such bonds;
    - representing the interests of the Republic of Belarus in the framework of pre-trial settlement of disputes, in international arbitrations and foreign judicial bodies in disputes between foreign organisations (foreign citizens) and the Republic of Belarus;
    - from the lease of sea vessels to the subjects of merchant shipping of the Republic of Belarus for the implementation by them of the operation of such sea vessels;
    - from the provision of services to the subjects of merchant shipping of the Republic of Belarus for training employees in the field of operation of sea vessels;
- from the provision of consulting services for the implementation of international treaties of the Republic of Belarus aimed at attracting resources (loans (credits), investments) of international organisations to the Republic of Belarus, as well as their grants.

## G. EXCHANGE CONTROL

Belarus imposes restrictions, special reporting and controls with respect to transactions involving foreign and national currency. The Belarusian Rouble (BYN) has restricted convertibility. Companies doing business in Belarus must open a bank account with a bank in Belarus.

## H. PERSONAL INCOME TAX

The tax year in Belarus is the calendar year. Belarus resident individuals are subject to personal income tax on their worldwide income whereas non-resident individuals are taxed on their Belarusian-sourced income only. For tax purposes, an individual is treated as a tax resident of Belarus if they are present in Belarus for more than 183 days in a calendar year otherwise they are considered a non-resident.

The general personal income tax rate is 13%. The tax rate of 4% is applied to income in the form of gambling gains from gambling organisers being legal persons of the Republic of Belarus. Fixed tax amounts are set in relation to personal income from leasing out to natural persons of residential and/or non-residential premises and parking spaces in the territory of Belarus.

Employment income includes salary, any other compensation and bonuses received in cash or in kind. Employment income received by an individual from a foreign company or entrepreneur is treated as foreign income for personal income tax purposes, regardless of the place where the employment duties were actually performed. Belarusian tax residents may claim several deductions in determining their taxable income. Employers calculate, deduct and pay the relevant tax on the compensation paid to their employees. Social security contributions are payable by an employer at a rate of 34% (28% for pension insurance and 6% for social insurance) and by an employee at a rate of 1% of their gross compensation (withheld by the employer).

A flat personal income tax rate of 13% applies to all dividends received by a resident. However, the tax rate is reduced in the following cases:

- To 6% if a resident company has not distributed profit between its members (shareholders)-residents of Belarus for three successive calendar years;
- To 0% if a resident company has not distributed profit between its members (shareholders)-residents of Belarus for five successive calendar years.

Non-residents receiving dividends from local sources are subject to 13% personal income tax which is withheld at source.

Generally, interest received from bank deposits in Belarus is subject to personal income tax withheld by the bank except for cases when at least one of the conditions below are met:

- Such interest is accrued at an interest rate not exceeding the interest rate for call bank deposits;
- The actual deposit term is not less than one year for deposits in BYN and two years for deposits in a foreign currency.

Self-employed individuals having a business and being registered as a private entrepreneur with the appropriate registration authority are subject to (upon their choice):

- Personal income tax at a flat rate of 16% (although a specific flat rate of 9% applies to certain types of income);
- Simplified taxation (in this case individual entrepreneurs are not subject to corporate profits tax and, under certain conditions, neither to VAT (and some other taxes), but instead they pay a unified tax of either 5% of gross revenues or, if the individual entrepreneur continues to pay VAT, 3% of gross revenues);
- General taxation (like a legal entity);
- Unified tax under certain types of activities.

Self-employment income, assessed on an annual basis, consists of annual gross income less associated documented expenses.

Personal income tax is paid on a quarterly basis where a self-employed individual has a business and has registered as an individual entrepreneur with the appropriate registration authority.

Where a self-employed individual has not registered as a private entrepreneur with the appropriate registration authority, personal income tax is paid on an annual basis.

Generally, any other income is included in regular income and taxed at 13% (or 9% which applies to certain types of income). Capital gains are not paid separately but included within the total income of an individual taxpayer. Under Belarusian tax law, relevant deductions in the following four categories are deductible against a taxpayer’s personal income tax liability:

- Social tax deductions;
- Standard tax deductions;
- Property tax deductions; and,
- Professional tax deductions.

B

## I. TREATY AND NON-TREATY WITHHOLDING TAX RATES

Please find below a table showing the withholding tax rates for dividends, interest and royalties under the various tax treaties including former USSR's treaties which Belarus still honours. In case the domestic rate is lower than the treaty rate, the former prevails. In case the treaty rate is lower than the domestic rate, the former prevails.

| | Dividends | | Interest (%) | Royalties (%) |
|---|---|---|---|---|
| | Individuals, companies (%) | Qualifying companies (%) | | |
| **Domestic rates** | | | | |
| Companies | 12 | 12 | 0/10 | 15 |
| Individuals | 0/6/9/13 | -- | 0/13 | 13 |
| **Treaty countries:** | | | | |
| Armenia | 15 | 10[4] | 0/10 | 10 |
| Austria | 15 | 5[1] | 0/5 | 5 |

Notes:

1. The 5% rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the capital of the dividend-paying company.
2. The 5% rate applies if the beneficial owner is a company which holds directly or indirectly at least 25% of the capital of the dividend-paying company.
3. The 5% rate applies if the beneficial owner has invested in the share capital of the dividend-paying company not less than EUR 200,000. The 10% rate applies if the beneficial owner holds directly at least 25% of the share capital of the dividend-paying company.
4. The 10% rate applies if the beneficial owner is a company which holds at least 30% of the capital of the dividend-paying company.
5. Effective 1 January 2018.
6. The 5% rate applies if the beneficial owner is a company (other than a partnership) which controls directly at least 25% of the capital of the dividend-paying company.
7. The 0% rate applies to payments to government agencies and financial institutions.
8. Effective 1 January 2018 (Belarus); 1 April 2018 (Hong Kong).
9. The 10% rate applies if the beneficial owner is a company which holds directly at least 25% of the shares of the dividend-paying company.
10. The 10% rate applies if the recipient is a company (excluding partnership) which holds directly at least 25% of the capital of the dividend-paying company.
11. The 5% rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the capital of the dividend-paying company. The 0% rate applies to payments to government agencies and financial institutions.
12. The 0% rate applies to payments to government agencies and financial institutions.
13. The 5% rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 20% of the capital of the dividend-paying company.
14. The 0% rate applies if the beneficial owner is a company (other than a partnership) (i) which holds directly at least 50% of the dividend-paying capital and provided that an investment of at least 250,000 EUR has been made in the capital of the dividend-paying company or (ii) which holds directly at least 25% of the capital of the dividend-paying company and whose investment in the capital of the dividend-paying company is, directly or indirectly, guaranteed or insured by the government of the other contracting state.
15. The 11% rate applies if the beneficial owner is an individual or a company which holds at least 25% of the capital of the dividend-paying company.
16. The 5% rate applies if the beneficial owner is a company which holds at least 25% of the capital of the dividend-paying company.
17. The 7.5% rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the capital of the dividend-paying company.
18. The 5% rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 30% of the capital of the

dividend-paying company. The 0% rate applies if the beneficial owner is a company (other than a partnership) which holds directly 100% of the capital of the dividend-paying company but only to the extent that the profits out of which the dividends are paid have been derived from industrial or manufacturing activities or from agriculture, forestry, fishing or tourism (including restaurants and hotels). However, this exemption shall not apply if the profits out of which the dividends are paid have been exempt from tax in the source state.

19. The 5% reduced rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 100,000 USD of the dividend-paying company.

    The 0% reduced rate applies if the beneficial owner of the dividends is the UAE government, the UAE Central Bank, the Abu Dhabi Investment Authority, the Dubai investment Corporation or the Mubadala Development Company (Item 3 of the Protocol to the treaty that was signed on 29 March 2019 and entered into force on 1 May 2020 and is effective as of 1 January 2021).

## KEY TAX POINTS

- A resident company is liable for Belgian resident corporate tax on its worldwide profits (with Belgian tax relief for eligible foreign-source profit). A non-resident company, i.e. a legal branch or permanent establishment, is liable for Belgian non-resident corporate tax levied on Belgian-source income only.
- Capital gains are normally treated as ordinary business income and are taxable at the normal corporate tax rates, be it that tax exemptions and roll-over tax relief are available if certain conditions are met.
- Belgian tax law comprises controlled foreign company (CFC) legislation as of 2019.
- Belgian tax law comprises group relief for corporate tax purposes as of 2019. In addition and subject to certain conditions, separate taxable persons can form a VAT unit and hence be considered as a single taxable person for VAT purposes.
- The standard Belgian withholding tax rate applicable to dividend, interest or royalty income is 30%. However, both Belgian domestic tax law and double tax treaties concluded by Belgium comprise numerous withholding tax exemptions that can be claimed by various investors, mainly non-residents and financial institutions.
- An individual resident in Belgium is liable for progressive personal income tax rates that apply to worldwide income. Qualifying foreign-source income can be eligible for a Belgian personal tax exemption with progression reserve if conditions are met.
- Belgian tax law does not comprise asset tax nor a general capital gains taxation for individuals.
- Belgium has a very tax-attractive expatriate tax regime for foreign executives that are temporarily working in Belgium after being seconded to Belgium or being recruited outside Belgium.
- Belgium has a very extensive tax treaty network and a very active tax treaty policy.
- Belgium has a very active upfront tax ruling practice. No-name pre-filing meetings with the Belgium tax ruling commission are common practice.
- Taxable persons performing supplies of goods or services have to charge 21% VAT on these supplies unless these transactions are subject to a reduced rate, ‘exempt’ from VAT, ‘outside the scope’ of VAT or subject to ‘reverse charge’.

## A. TAXES PAYABLE

## COMPANY TAX

A resident company is liable to corporation tax on its worldwide profits. A company is resident in Belgium if its registered office or centre of management is situated in Belgium. The place of incorporation is irrelevant.

The standard Belgian corporate tax rate is 25%. A small or medium-sized company is subject to 20% corporate tax on the EUR 100,000 fraction of the taxable basis subject to certain conditions.

A company with tax residence outside Belgium that has a legal branch or permanent establishment in Belgium is subject to the same Belgian corporate tax rate of 25% (or the reduced tax rate if the conditions are met), be it on Belgian-source income only.

A company with tax residence outside Belgium that has no legal branch or permanent establishment in Belgium is basically only subject to Belgian non-resident corporate tax on income derived from Belgium based real estate. In addition, Belgian-source dividend, interest or royalty income is subject to 30% Belgian withholding tax. However, it is very likely that either a reduced tax treaty rate or even 0% withholding tax applies at the level of a non-resident beneficiary of this type of income.

To avoid a surcharge, tax must be paid in advance in quarterly instalments. For a taxpayer whose fiscal year runs concurrently with the calendar year, the due dates for the advance tax payments are 11 April 2022, 11 July 2022, 10 October 2022 and 20 December 2022. For tax year 2023 (taxable periods starting on or after 1 January 2021), the surcharge is 6,75%.

## CAPITAL GAINS TAX

Capital gains are normally treated as ordinary business income and are taxable at the normal corporate tax rates. However, there are exceptions such as realised capital gains on eligible shares which can be 100% tax-free if the Belgian participation exemption (see further) is applicable. In addition, realised capital gains on business assets can be eligible for spread taxation – i.e. roll-over tax relief – if, amongst others, the sales proceeds are timely reinvested in qualifying other business assets (including real estate).

## BRANCH PROFITS TAX

There is no separate branch profits (remittance) tax in Belgium.

## VALUE ADDED TAX (VAT)

VAT is a tax on 4 types of transactions: the supply of goods, the supply of services, the importation of goods from outside the EU, and the acquisition of goods from another EU Member State ("intra-Community acquisition of goods"). In case these transactions are deemed to take place in Belgium for VAT purposes, as a general rule 21% Belgian VAT will be due. However, many exceptions to this main rule exist:

- Certain supplies are zero-rated (e.g. daily and weekly publications) or subject to 6% (e.g. food and water, hotel accommodation, renovation of private dwellings, etc.), or 12% (e.g. restaurant and catering services);
- Certain supplies are VAT exempt (e.g. export of goods, intra-Community supplies of goods, social-cultural services, insurance, some financial operations);
- For certain supplies, the liability to pay the Belgian VAT is shifted to the customer (reverse charge).

Although many of these exceptions stem from EU legislation, the relevant Belgian rules often have a different scope or are interpreted differently by the Belgian VAT authorities (as is the case in most other EU Member States as well). It is therefore advised to carefully examine the correct VAT treatment of the operations taking place in Belgium.

The VAT legislation is formalistic, and imposes various administrative and document retention requirements. Non-compliance with these rules often leads to adverse VAT consequences, such as the rejection of input VAT deduction, the rejection of the application of a VAT exemption (resulting to a VAT claim) or administrative penalties.

Businesses that are VAT registered in Belgium need to file periodical VAT returns and an annual client listing. Depending on the type of transactions performed, possibly also intra-Community sales listings and Intrastat returns may need to be filed. As a general rule, these returns and listings need to be filed on a monthly basis. The VAT returns and intra-Community sales listings however only need to be filed on a quarterly basis if certain thresholds are not exceeded.

VAT should in principle be neutral for businesses, since a taxable person (even foreign businesses that are not VAT registered in Belgium) can recover the input VAT on goods or services they have purchased. However, in practice this is not always the case, as the business can be faced with:

- Non-recoverable VAT: In some cases, a taxable person cannot fully deduct the input VAT either due to the fact that it partly/only performs activities that are out of scope or exempt from VAT or due to the fact that for certain types of costs no VAT deduction is allowed.
- VAT pre-financing: There can be a significant timing difference between the moment the input VAT is paid and the moment this input VAT is actually recovered.
- VAT penalties: Infringements on the VAT legislation (even minor ones) can lead to severe penalties.
- VAT administration costs: the costs associated with having a Belgian VAT registration, filing returns and listings, complying with invoicing and bookkeeping requirements.

In many cases, the scenarios in which VAT can become a cost for a business can be avoided or optimised by careful planning. The Belgian VAT legislation e.g. contains various simplification rules that, if applied correctly, can avoid the need to VAT register or to pre-finance VAT.

## LOCAL TAXES

Other than some minor and very specific local taxes that may apply to e.g. advertising, office furniture, producing copies, etc., there are no significant and general local taxes in Belgium.

## OTHER TAXES:

## REGISTRATION DUTY

Registration duties are indirect taxes and are therefore applied on a transaction basis, in particular when a notary deed is required. The tax rate can be different in either the Brussels Region, Flemish Region or Walloon Region. Transactions that are subject to proportional registration duties include the transfer of legal title of real estate situated in Belgium. A registration duty of 12% in the Flemish Region and of 12.5% in the Brussels Region and the Walloon Region applies to the price or market value of the real estate (except in restructuring scenarios in which case an exemption can apply). However, as of 1 January 2021, the registration duty applied to the price or market value of a family house in the Flemish Region has decreased to 3% if certain formalities are met in due time. Subject to certain conditions, an exemption of registration duties is applicable on the first 175,000 EUR of a family home in the Brussels Region. And in the Walloon Region, a 6 or 5% registration duty is applied on modest homes in certain cases.

In general, no Belgian registration duties are due when increasing the capital of a Belgian-based company.

## REAL ESTATE WITHHOLDING TAX

Owners of real estate located in Belgium pay real estate taxes on the deemed rental value – this is a fictitious, but fairly low income – of their property. The applicable rate depends on the location and use of the property.

## B. DETERMINATION OF TAXABLE INCOME

The taxable income of a Belgian company or Belgian permanent establishment is based on its Belgian GAAP accounting profit as laid down in its annual accounts. This accounting profit is then adjusted for Belgian corporate tax purposes. We will list the main tax adjustments here under.

### DISALLOWED EXPENSES

Some accounting charges are not (fully) tax-deductible. The main disallowed expenses are as follows:

- Restaurant costs are only 69% tax-deductible;
- Reception costs and business gifts are only 50% tax-deductible;
- As of 2020 the tax-deductibility of both car and fuel costs are calculated as follows: 120% – [ 0,5% * fuel coefficient * $CO^2$ emission rate ];
- Hospitalization insurance premiums are not tax-deductible;
- Meal voucher expenses are tax-deductible at EUR 2 per voucher if the employer's fee does not exceed EUR 6.91 and the employee contributes at least EUR 1.09.

### INVESTMENT ALLOWANCE

Companies are entitled to "investment allowance" tax relief – called "investment deduction" – if conditions are satisfied. Specifically, in the event of an investment in qualifying assets that are used for own business purposes, the taxpayer cannot only amortise the asset for Belgian corporate tax purposes, but is also eligible for an additional tax deduction. Such tax deduction is either:

- A one-off tax deduction applied to the total investment value, or;
- A spread tax deduction applied to the annual accounting amortization of the asset.

The actual percentage of the investment allowance depends on the type of investment. If the taxpayer at hand has insufficient tax capacity in a given financial year to fully utilise the investment deduction, the excess deduction can in most cases be carried forward without limitation in terms of time and amount. In addition, if conditions are met, an increased investment deduction is available for, amongst others, the following types of investments:

- Energy-saving investments;
- Environmental-friendly R&D investments;
- Investments in safety measures;
- Investments contributing towards the re-utilisation of the packaging of beverages and industrial products.

In the context of COVID-19, the Belgian government took various measures to encourage further investments. One of these measures, i.e. the so-called increased investment deduction, allows companies qualifying as a small or medium-sized enterprise for Belgian company law and tax purposes a 25% deduction on investments in qualifying assets made between 12 March 2020 and 31 December 2022.

### DEPRECIATION

Generally, all tangible and intangible business assets owned by the company and whose value diminishes over time, are depreciable for both Belgian GAAP and corporate tax purposes. As of 1 January 2020, degressive amortisation of newly obtained fixed assets is no longer allowed for tax purposes.

### STOCK / INVENTORY

Stocks should be valued at the lower of acquisition cost or year-end market value. The most common acceptable valuation methods are actual cost, FIFO and weighted average. The Belgian tax authorities require that the method chosen is justified and applied consistently.

### CAPITAL GAINS AND LOSSES

Capital gains are treated as ordinary business income and are therefore taxable at normal corporate tax rates. However, there are a few exceptions:

- Revaluation gains are tax-free provided that they remain recorded on a specific "intangible account" of the company's balance-sheet;
- As explained above, under certain conditions roll-over tax relief is granted for eligible realised gains on business assets;
- Realised capital gains on shares are tax-free if the underlying dividends qualify for the Belgian participation exemption (see below). There is however one exception to this rule: if the shares are not held for at least one year then 25% Belgian capital gains tax is due.

Capital losses are tax-deductible if they relate to fixed assets used for business purposes. Both unrealised (i.e. impairments recorded for Belgian GAAP purposes) and realised capital losses on shares are not tax-deductible. However, capital losses on shares realised upon the liquidation of a subsidiary are tax-deductible up to the value of the capital actually paid-up by the Belgian corporate shareholder.

### DIVIDEND INCOME - PARTICIPATION EXEMPTION

A corporate shareholder can apply a 100% Belgian participation exemption for a shareholding of at least 10% or with an investment value of at least EUR 2.5 million in the distributing company. Also, the Belgian shareholder needs to hold this minimum shareholding for an uninterrupted period of at least one year, before or after the dividend distribution date. In addition, the dividend distributing subsidiary should be subject to normal taxation. Subsidiaries based in the EU are deemed to anyhow meet this subject-to-tax test.

Note that the participation exemption cannot be applied if the dividend distributing company can deduct the distributed dividend amount from its taxable basis and if the overall business structure is "artificial", i.e. lacks relevant substance.

If the taxpayer at hand has insufficient tax capacity in a given financial year to fully utilize the participation exemption, the excess can be carried-forward without limitation in terms of time and amount.

## INTEREST DEDUCTIONS

At arm's length interest expenses are fully tax-deductible. However, Belgian tax law provides for three specific thin capitalisation rules:

- A 1:1 debt-equity ratio applies to loans granted by individual directors and shareholders to the company;
- A 5:1 debt-equity ratio still applies to loans granted by related companies prior to 17 June 2016 and by lenders based in a tax haven (this is the so-called thin-capitalisation rule). However, the 5:1 thin capitalisation rule does not apply in the event of a genuine "finance centre" transaction between related companies that are not based in a tax haven.
- As of tax year 2020, a 30% fiscal EBITDA rule or interest deduction limitation rule has become applicable. In this respect, any arm's-length "exceeding borrowing cost" is, as a rule, only deductible up to the higher of maximum 30% of the taxpayer's EBITDA or EUR 3 million. In case the company is related with other Belgian based group affiliates, the thresholds need to be considered on a consolidated basis.

## NOTIONAL INTEREST DEDUCTION (NID)

The notional interest deduction (NID) is a unique Belgian tax deduction. NID is a deduction for Belgian corporate tax purposes only and thus does not require any Belgian GAAP accounting entries or any cash-out cost. NID applies to basically all Belgian corporate taxpayers, regardless of the nature of their business. In essence, to have an equal treatment between the equity-funding and debt-funding of a Belgian company or permanent establishment, NID comes down to a corporate tax deduction of a "notional – i.e. fictitious – interest" expense that is deemed to arise for tax purposes only. The basis for the tax deduction is the average 5 year increase of the company's qualifying Belgian GAAP net equity while the interest rate is determined in function of the market interest rates. Small and medium-sized companies are entitled to an additional 0.5% NID rate. As market interest rates are currently low, the current (i.e. tax year 2022 – financial year 2021) NID of 0.340% is only applicable for small and medium-sized companies.

## INNOVATION DEDUCTION

The patent income deduction (PID) regime was a tax-attractive rule providing for an 80% corporate tax exemption of at arm's-length patent income.

Note however that the PID has been abolished with a phase-out period until 30 June 2021.

However, meanwhile the so-called Innovation Deduction tax regime has been introduced as an alternative for PID. The Innovation Deduction has the following features:

- In essence, the Innovation Deduction is an 85% corporate tax deduction of net income derived from qualifying IP whose underlying R&D activities were carried on by the Belgian taxpayer. Hence, the deduction is now based on net income instead of gross income.
- The scope of qualifying IP is much broader than for PID since also income derived from, amongst others, data and market exclusivity rights and eligible software is included;
- Non-utilised Innovation Deduction can be carried-forward to a subsequent financial year without limitation in time or amount;
- Also realised capital gains on the IP can benefit from Innovation Deduction tax relief;
- The Innovation Deduction can already be applied as of the financial year in which the IP approval request is filed.
- Finally, the 'Nexus' approach ensures that only income derived from qualifying IP for which R&D activities were performed by the Belgian company is eligible for the innovation deduction. Therefore, some companies might need to review their operational structure in order to make full use of this incentive.

## LOSSES

Tax losses can be carried forward indefinitely, i.e. without limitation in terms of time and amount. A carry-back of tax losses is in principle not allowed. However, tax losses may forfeit in the event of a purely tax-driven change of control at the level of the Belgian company with tax losses. Furthermore, when a Belgian company with tax losses is part of a tax-free business restructuring (like e.g. a merger), the tax losses carry-forward may only survive the tax-free reorganisation on a pro rata basis.

Furthermore, if a company or a permanent establishment has a taxable basis exceeding EUR 1 million, a maximum of 70% of the part of the taxable basis exceeding EUR 1 million can be offset against tax losses carried-forward, whereas 30% is effectively subject to corporate tax. However, there is no limit to the deduction of losses during the first 4 financial years of an SME.

## FOREIGN SOURCE INCOME

Belgian tax law comprises controlled foreign company (CFC) legislation as of 2019. However, CFC legislation only applies if the overall business set-up is deemed to be artificial, i.e. lacks genuine local substance and is not at arm's length.

## C. FOREIGN TAX RELIEF

The following Belgian foreign tax relief rules apply:

- Income derived from tax treaty sources (a permanent establishment or real estate based in a tax treaty country) is completely tax-free for Belgian corporate tax purposes;
- Definitive tax losses of permanent establishments situated outside Belgium, but within the EEA, are deductible from Belgian source profits (be it that a future claw-back rule may apply);
- Foreign-source dividend income can be eligible for the Belgian participation exemption (see above);
- Foreign-source interest and royalty income can be eligible for a Belgian foreign tax credit if that income was subject to foreign withholding tax or if a tax sparing clause laid down in a tax treaty concluded with Belgium applies.

## D. R&D TAX CREDIT

Companies that invest in patents and/or environment friendly research and development (R&D) investments can benefit from a tax credit. The tax benefit is not granted in the form of a deduction from the taxable result, but a tax reduction is applied to the corporate income tax payable. If an assessment year produces no or insufficient tax to offset the R&D tax credit, the non-offset tax credit shall be carried forward successively to the next four assessment years.

If after set-off against the tax of five consecutive assessment years, a portion of the R&D tax credit relating to that assessment year cannot be set off, this portion is reimbursed.

The rate is calculated on the basis of the investment deduction: this is the acquisition or investment value of the assets multiplied by the rate of the investment deduction. A distinction is made between the increased and the spread investment deduction. The calculation base is multiplied by the nominal corporate tax rate.

Companies that opt for the R&D tax credit can never again apply the investment deduction for patents and environment friendly investments in R&D (both one-off and spread).

## E. R&D WAGE WITHHOLDING TAX INCENTIVE

Universities, colleges, scientific institutions and companies can benefit from an exemption of 80% of the withholding tax on salaries of certain researchers employed in research or development projects or programmes. Companies can only benefit from this withholding tax incentive for their researchers who hold a master degree in certain scientific disciplines. Bachelor degrees in certain scientific disciplines also qualify. The total amount of the exemption for bachelors is limited to 25% of the amount of the exemption for master degrees within the company.

A company can deviate from this diploma requirement if it qualifies as a Young Innovative Company ("YIC"). A YIC is a small enterprise that exists for less than 10 years. It carries out research projects and has incurred expenses in the area of R&D that represent at least 15% of the total costs of the previous taxable period.

These YICs can make use of the exemption for academic staff. Scientific personnel is defined as researchers, research technicians and research and development project managers, excluding administrative and commercial personnel.

## F. CORPORATE GROUPS

As of 2019, Belgian tax law features group relief for corporate tax purposes. This regime makes it possible – between qualifying affiliated companies – to transfer profits from a profitable company to a loss-making company so that the loss of the latter company can be compensated. This is a mere fiscal operation.

However, in order to benefit from this scheme, strict conditions must be met:

- There must be a long-term relationship between the two companies. Consolidation is only possible between a parent company and a subsidiary company or between two sister companies of the same group. There must also be a direct participation of at least 90% (or via the parent company) for five uninterrupted years.
- There must be a loss in the current financial year. Therefore, no losses carried forward can be compensated.
- An agreement must be made between the affiliated companies. This agreement stipulates that the profitable company makes a group contribution to the loss-making company. The profitable company will pay a lower corporate tax. However, the profit-making company must still pay a compensation (its tax benefit) to the other company. This fee is not tax deductible, but obviously not taxable at the level of the loss-making company.
- Some companies are always excluded, such as investment companies.

## G. RELATED PARTY TRANSACTIONS

Transactions with group companies must be conducted on an arm's-length basis, i.e. the prices applied must be set as if the parties involved were genuine independent third-party companies, taking into account the normal market prices for similar transactions in identical or similar circumstances.

For Belgian tax purposes, transfer pricing documentation is only mandatory if the following conditions are satisfied in the hands of a group with a presence in various countries. Specifically, every Belgian tax resident affiliate of a multinational Group which exceeds one of the below criteria in the financial year preceding its most recently closed financial year according to its Belgian GAAP annual accounts on a non-consolidated basis should file both a Local File and a Master File in Belgium:

- Gross operational and financial turnover (excluding one-off transactions) exceeding EUR 50 million;
- Balance sheet total exceeding EUR 1 billion;
- Average personnel exceeding 100 full-time equivalents.

In summary, the Group Master File should give an overview of the multinational Group as such. The Local File shares more information about the nature and activities of the Belgian affiliate.

It should be noted that Belgium requires the Local File and Master File to be submitted in specific forms, which need to be submitted in XML format. The information to be included in the Local File form and the Master File form is to a large extent in line with the OECD recommendations. However, the Local File form requires additional information (e.g. segmented financials). It is also recommended to attach the Local File documentation to the Local File form to give further insight on the information provided in the Local File form.

In case the Group has a consolidated revenue exceeding EUR 750 million in the year prior to the reporting year, a Country-by-Country ("CbC") reporting obligation will have to be met. This CbC report will, in principle, have to be filed by the parent company of the Group in the country of which said parent company is a tax resident. However, in some cases, a Belgian tax resident company of the Group can be obliged to file the CbC report in Belgium. Every Belgian tax resident company of a "large" multinational Group will in any event have to inform the Belgian tax authorities of the identity of the company that will file the CbC report, i.e. by filing a CbC-notification form. A new CbC notification in Belgium is only required if the data laid down in a prior CbC-notification form changed.

## H. WITHHOLDING TAX

According to Belgian domestic tax law, in principle 30% withholding tax is due on dividend, interest and/or royalty income that is attributed or made payable by the company. However, Belgian tax law comprises numerous withholding tax exemptions, especially for corporations, banks and non-residents. Also, pursuant to tax treaty rules there may be Belgian dividend, interest and royalty withholding tax mitigation and relief. This includes:

- 0% Belgian dividend withholding tax if the shareholder resides in the EU or in a tax treaty country and has a minimum 10% shareholding for at least 1 year in the Belgian subsidiary;

- 0% Belgian interest or royalty withholding tax if the beneficiary resides in the EU and has a direct or indirect minimum 25% shareholding for at least 1 year in the Belgian company;
- 0% Belgian royalty withholding tax based on many tax treaties concluded by Belgium.

## I. EXCHANGE CONTROL

There are no exchange controls in Belgium.

## J. DAC 6: EU MANDATORY DISCLOSURE RULES

In light of the increased attention to address tax evasion at an international level, the EU introduced DAC 6 in relation to cross-border tax arrangements which came into force in Belgium as from 25 June 2018.

This directive envisages to tackle cross-border aggressive tax structures or "arrangements" and therefore to improve tax fairness and transparency. An arrangement should concern more than one EU Member State or an EU Member State and a third country.

These tax structures or arrangements must be identified to the government if certain conditions, the so-called "hallmarks", are met. In this respect, the hallmarks cover a wide range of arrangements and are classified into five categories:

- Category A: refers to confidentiality imposed on clients, contingent fee arrangements and mass marketed type arrangements;
- Category B: refers to planning for loss utilisation after acquisition of a loss-making company, converting income into an item that is exempt or taxed at a lower rate and circular or self-cancelling transactions;
- Category C: refers to cross-border payments where there is a deduction/non-inclusion outcome, a preferential tax treatment for the recipient and other transactions that exhibit a mismatch;
- Category D: refers to transactions intended to circumvent transparency-reporting rules or hide beneficial ownership;
- Category E: refers to the use of unilateral safe harbour rules, transfer of hard-to-value intangibles and transfer of assets/ functions/risks where a taxpayer's annual EBIT is reduced by at least 50%.

It should be noted that for certain categories also a 'main benefit test' is applicable. This test is met if it can be established – taking into account all relevant facts and circumstances – that the main benefit or one of the main benefits of entering into such an arrangement is to obtain a tax advantage.

The reporting obligations lie mostly with the intermediary. However, under specific circumstances, the obligation can fall on the taxpayer. In this respect, reporting should be made within 30 days.

Finally, non-compliance with a reporting obligation could result in certain penalties varying from EUR 1,250 to EUR 100,000 depending on the case at hand.

## K. PERSONAL TAX – EXPATRIATE TAX REGIME

An individual resident in Belgium is subject to progressive personal income tax rates (maximum 50%) on his worldwide income. There is no general capital gains taxation for individuals. Only in very specific circumstances can an individual be subject to capital gains taxation. A non-resident individual is subject to progressive personal tax rates on his Belgian-source income only. There is no asset tax under Belgian tax law.

However, Belgian tax practice includes a tax-efficient expatriate tax regime since 1983. This expatriate tax regime has been replaced by a new special tax regime as of 1 January 2022.The main objective of this new special tax regime is still to lower the overall payroll cost for the employer and to optimise the net-in-hand salary for the expatriate. If they meet all the conditions, an expatriate – although temporarily living with his/her family in Belgium – is considered to be a non-resident for Belgian personal income tax purposes. The benefits of the Belgian expatriate tax status are twofold:

- The 30% rule has been implemented meaning that on top of the base salary up to 30% of tax free allowances may be granted (at the moment of writing the exact definition of the 30% rule is not yet clarified).
- In addition to the 30% rule, three other types of expenses are accepted as reimbursement of expenses proper to the employer:
  - Costs of moving to Belgium;
  - Costs incurred for the furnishing of the residence in Belgium;
  - School costs (for children from school age, in a private or international school).

## L. TREATY AND NON-TREATY WITHHOLDING TAX RATES

| | Dividends (%) | Interest (%) | Royalties (%) |

## KEY TAX POINTS

- Income tax is levied on the gross revenue receipts (sales) of companies at rates set out from time to time in the Ninth Schedule to the Income and Business Tax Act.
- A general sales tax (GST) applies to the supply of goods and services at a standard rate of 12.5%. Certain supplies are exempted or zero-rated. Registered businesses can set off their input GST (GST paid to suppliers) against their output GST (GST charged to customers).
- Other local taxes apply including stamp duty, land and property taxes, customs duties, excise duties, environmental tax, vehicle licenses, and trade license.
- Personal income tax is chargeable at a flat rate of 25% on persons employed in Belize.
- Belize has double taxation agreements with the United Kingdom, Austria, and the countries of the Caribbean Community (CARICOM).

## A. TAXES PAYABLE

## COMPANY TAX

Income tax is imposed on the chargeable income of any person accruing in or derived from Belize or elsewhere. The definition of “person” in the Income and Business Tax Act includes a firm, a branch, an individual and any body of persons, whether incorporated or not.

As from 1 January 2020, income tax is not payable on the chargeable income of a company, other than a company engaged in petroleum activities. Business Tax less allowable foreign tax credits remains in effect for all other businesses.

Income tax is imposed at a rate of 0% on chargeable income. As from 1 January 2020, all companies, including international business companies (IBCs), are subject to business tax on their worldwide income in accordance with the rates of the ninth schedule, less allowable foreign tax credits.

Designated processing area (DPA) companies are subject to income tax of 1.75% on chargeable income exceeding BZD 3 million and 3% on income less than BZD 3 million.

**International Business Companies (IBCs)**

An IBC is a limited liability company incorporated under the International Business Companies Act. As from 1 January 2019, an IBC can carry on business with persons resident in Belize, hold an interest in real property situated in Belize including a lease and hold shares in locally incorporated companies.

The Income and business tax Act (IBTA) Amendments of December 2019 effectively abolish corporate income tax for all domestic companies and IBCs and impose a new business tax of 5% on passive foreign-source income, including dividends, interest, royalties and capital gains. Despite the lack of a corporate income tax, the business tax regime remains in effect for all domestic companies and IBCs, including any of an IBC’s receipts that are derived in Belize and those receipts not related to a trade, business, profession or vocation carried on in Belize. The business tax will not apply to an IBC provided that:

- it is a resident of a foreign country and that foreign country is not on the EU list of non-cooperative jurisdictions for tax purposes;
- it has no permanent establishment (PE) in Belize; and
- it files an Annual Information Return (AIR) in the prescribed manner with the Belize tax authority.

The AIR filed with the tax authority needs to include information about the country where the IBC is tax resident and its beneficial owners controlling 5% or more of the shares, as well as all direct and indirect legal and beneficial owners including information about their tax residency. Once the AIR has been received, the tax authority will exchange the information provided with the country where the IBC has its tax residency.

IBCs resident in Belize or in a foreign country that is on the EU list of non-cooperative jurisdictions for tax purposes and that have no PE in Belize will be subject to business tax on their worldwide income at the rate applicable to the type of business according to the ninth schedule of the IBTA.

## GENERAL SALES TAX

Effective 1 July 2006, the ‘sales tax’ which was in force was repealed and replaced by a general sales tax (GST). GST is effectively a value added tax, with tax becoming payable at each stage in the supply chain and with tax incurred on inputs being recoverable by offset against output GST (the tax charged by a business to customers on taxable supplies). For GST purposes, “business” has a very wide meaning and can include activities on which no profit is made. “Taxable supply” is a supply of goods and/or services made in the course or furtherance of any business. Therefore, where a supply is not specifically exempted, it will be considered a taxable supply.

Effective 1 April 2010, the rate of GST was increased from 10% to 12.5%. Exempt supplies of goods and services include:

- Certain financial services and gambling supply;
- Some supply of goods and services by an educational institution within the meaning of the Education Act;
- Medical, dental, hospital, optical and paramedical services, other than veterinary services and cosmetic surgery;
- Supply of residential accommodation or accommodation in a hotel or similar establishment;
- Public postal services, domestic public transport of passengers, lease of aircraft and maintenance services in connection with the supply of public air transport;
- International transport of passengers or goods;
- Some supplies of services provided to diplomatic missions, international and regional organizations; and,
- Goods and services provided to the Government of Belize.

Providers of exempt goods and services are not allowed to charge GST to customers and cannot recover any GST paid on inputs. Taxable supplies may be zero-rated (chargeable to tax at 0%) or standard-rated (chargeable to tax at 12.5%). Zero-rated items include:

- Exported goods and services;
- Some food items for human consumption, water supply (other than bottled water) and some medicines and medical supplies for human use;
- Some items and supplies for use in education; and,
- Some supplies connected with agriculture, livestock, birds and fish, crustaceans and molluscs.

Items not specifically exempted or zero-rated are considered to be standard-rated.

## OTHER LOCAL TAXES

These include:

- Stamp duty on certain transactions, including the transfer of property;
- Land and property taxes;
- Trade licence, motor vehicle licence and other taxes charged by local authorities; and,
- Customs, excise, environmental tax and other taxes charged by the Customs and Excise Department.

## B. WITHHOLDING TAXES

- 15%: Dividends paid to non-residents;
- 15%: Interest paid to non-residents;
- Royalties paid to a non-resident are exempt and therefore business tax must not be withheld;
- 25%: Management fees, rental of plant and equipment and charges for technical services paid to non-residents.

## C. FOREIGN EXCHANGE CONTROL

The Foreign Exchange Control Act provides that only the Central Bank of Belize and authorised dealers may deal in foreign currencies. A foreign exchange permit must first be obtained from the Central Bank for all remittances of foreign exchange, including the payment of goods and services procured outside Belize. Central Bank approval is also required to secure and repay a loan outside Belize denominated in a foreign currency.

## D. PERSONAL TAX

The rate of tax on chargeable personal income is a flat rate of 25%, with a standard tax credit deduction of BZD 100 available to all residents.

Belizean workers earning less than BZD 25,600 per year pay no personal income tax.

## E. TREATY AND NON-TREATY WITHHOLDING TAX RATES

Belize has double taxation agreements with the United Kingdom, Austria, and the countries of the Caribbean Community (CARICOM). Tax information agreements have been signed with Mexico, Poland and South Africa. Belize enacted legislation in 2017 to give effect to the Convention on Mutual Administrative Assistance in Tax Matters to provide for the implementation of the obligations of Belize arising under the Convention with respect to the standard of automatic exchange of financial information in tax matters to give effect to the Multilateral Competent Authority Agreement, to give effect to the Common Reporting Standard and matters incidental thereto. The signatories to the Convention are the member states of the Council of Europe and member countries of the Organization for Economic Co-operation and Development (OECD).

| | Dividends[3] | | Interest[3] (%) | Royalties[3] (%) |
|---|---|---|---|---|
| | **Individuals, companies (%)** | **Qualifying companies (%)** | | |
| **Treaty countries:** | | | | |
| Austria | 15 | 5[2] | 0 | 0 |
| CARICOM[1] | 0 | 0 | 15 | 15 |
| Switzerland[4] | -- | -- | -- | -- |
| United Arab Emirates | 0 | 0 | 0 | 0 |
| United Kingdom | 0 | 0 | -- | 0 |

Notes:

1. Belize is a signatory to the 1994 CARICOM income tax treaty. Countries that have ratified the treaty: Antigua and Barbuda, Barbados, Belize, Dominica, Grenada, Guyana, Jamaica, St. Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines and Trinidad and Tobago.
2. The 5% rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the capital of the dividend-paying company.
3. There is no withholding tax. However, business tax must be deducted on payments of dividends and interest on loans paid to non-residents at the rate of 15%. Royalties received by a non-resident are exempt and therefore business tax must not be withheld. Business tax must be withheld at a 25% rate on payments to non-residents of management fees, rental payments for plant or equipment and charges for technical services. However, business tax must not be withheld on commissions paid to non-residents.
4. The 1963 treaty between the United Kingdom and Switzerland was extended to Belize by an exchange of notes. It only applies to income tax and not to business tax. Also, certain articles of the treaty, including those applicable to interest and dividends, do not apply.

## A. TAXES PAYABLE

## FEDERAL TAXES AND LEVIES

### COMPANY TAX

The tax base in Bolivia is territorial, i.e. tax is only due on business income derived from activities performed, property situated, or economic rights used in Bolivia, regardless of nationality, domicile or residence of those who take part in the operations. Therefore, business income realized through companies operating outside of Bolivia is not considered for Bolivian tax purposes.

The standard corporate income tax rate is 25% and the tax year-end is 31 December of each year. Annual tax returns and financial statements need to be submitted with the IRS and income tax paid within 120 days from tax year-end. Advance corporate tax payments need to be made.

### CAPITAL GAINS TAX

Capital gains derived from the sale of fixed assets immovable property and securities are normally included in gross income and are subject to the standard corporate income tax rate of 25%. However, capital gains derived from transactions on the Bolivian Stock Exchange are tax-exempt.

### BRANCH PROFITS TAX

Branches of non-resident companies are subject to the standard corporate income tax rate of 25%. However, a branch remittance tax applies at the rate of 25%, which is levied on 50% of the Bolivian-sourced profits distributed to the foreign head office, i.e. the effective rate is 12.5%. Branch profits are deemed remitted when the corporate income tax return is due (120 days after the end of the tax year, see higher).

### SALES TAX / VALUE ADDED TAX (VAT)

VAT is levied on taxable supplies of goods and services as well as on imports of taxable goods and services into Bolivia. Exports are zero-rated. Some specified transactions are exempt without credit for previously paid VAT.

The standard VAT rate is 13% while certain goods and services are tax-exempt:

- *bona fide* imports made by travellers arriving to the country;
- all transactions of public offer securities registered with the Stock Exchange Register (RMV) performed in Bolivia and having effect in the national territory;
- cession of goods and assets subject to procedures for issuing securities;
- goods imported by diplomatic service members;
- transactions involving the transfer of financing intermediation, insurance, pensions and stock exchange portfolios, whether resulting from sale or cession;
- the importation of printed books, newspapers and magazines.

### TRANSACTIONS TAX

Transactions tax is a tax on gross income arising from the performance of any economic or commercial activity (including non-profitable activities) at a rate of 3% on a monthly basis. Some exceptions may apply on the sale of investments and the sale of minerals, oil, and gas within the local market, as long as such sales will ultimately be exported.

Corporate income tax paid at the end of a fiscal year may be offset against future transactions taxes to be paid in the subsequent fiscal year.

### TAX ON SPECIFIC CONSUMPTION

Applies to sales of specific goods on the domestic market and imports of goods for final consumption:

- Cigarettes and tobacco.
- Refreshing drinks.
- Alcoholic drinks.

- Undenatured alcohols.
- Motor vehicles.

The payment varies depending on the good: percentage rates on the net sales price or specific rates on sales volumes are due expressed in litres or quantity expressed in units.

### FINANCIAL TRANSACTIONS TAX

A financial transactions tax is levied on bank transactions (deposit or transfer of funds), carried out within the domestic financial system, at a rate of 0.30% for fiscal years 2018 through 2023.

This tax is withheld by the relevant bank or financial institution. In addition, a corporate tax exemption is provided for creditors in relation to interest on public debt issued through securities in external capital markets.

## B. DETERMINATION OF TAXABLE INCOME

Taxable income is the income reported in the company's financial statements prepared in accordance with Bolivian GAAP, subject to certain adjustments for tax purposes. Generally, all expenses necessary to obtain income and to maintain the existence of the company are deductible. Donations and other gratuitous transfers to non-profit organizations that are exempt from income tax may be deducted up to a maximum limit of 10% of taxable income derived in the year of the donation or gratuitous transfer. Non-deductible items include, among others, income tax itself, penalties and fines and related surcharges, losses incurred in illegal activities, goodwill and gifts, except for those to qualifying recipients.

### DEPRECIATION

Fixed assets are generally depreciated using the straight-line method at rates specified by law. The following are some of the annual depreciation rates:

| Asset | Annual rate (%) |
|---|---|
| Industrial buildings and warehouses | 2.5 |
| Machinery, equipment and installations | 12.5 |
| Office furniture and equipment | 10 |
| Aircraft | 20 |
| Motor vehicles | 20 |
| Computer hardware | 25 |
| Intangibles | 5 |

### STOCK / INVENTORY

Inventories are valued at the lower of market value or replacement cost.

### CAPITAL GAINS AND LOSSES

Capital gains derived from the sale of fixed assets immovable property and securities are normally included in gross income and are subject to the standard corporate income tax rate of 25%. However, capital gains derived from transactions on the Bolivian Stock Exchange are tax-exempt. Capital losses resulting from "force majeure" or civil and criminal liabilities by third parties are deductible only to the extent that they are not covered by insurance or indemnity awards, as long as the taxpayer informs the tax authorities within a 15-day period following the relevant incident.

### DIVIDENDS

Domestic dividends received by a resident company are not subject to income tax at the level of the recipient and neither are these dividends subject to withholding tax. Dividends received from non-resident companies, including those paid by a foreign subsidiary to its parent company in Bolivia, are not subject to tax. A Bolivian company remitting profits to foreign shareholders or partners has to withhold 12.5% tax on the gross payment.

### INTEREST DEDUCTIONS

There are no thin capitalization rules as such in Bolivia. However, interest paid by a domestic company to its non-resident shareholders or partners that is considered excessive, i.e. higher than LIBOR + 3%, is treated as a non-deductible expense for the domestic company's income tax purposes. The excessive interest payment must be included in the domestic company's taxable income for tax purposes. Tax-deductible interest cannot exceed 30% of the total interest paid out by the enterprise to third parties in the reported period.

### LOSSES

Losses may be carried forward for 3 tax years, but may not be adjusted for inflationary effects. This period may be extended up to 5 years for the productive sector of mining and hydrocarbons. Losses may not be carried back.

### FOREIGN SOURCE INCOME

The corporate tax system is based on the territoriality principle, whereby tax is only due on income received or accrued from sources within or deemed to be within Bolivia.

## C. FOREIGN TAX RELIEF

As foreign-source income is not subject to corporate income tax (territoriality principle), no relief is granted for foreign taxes.

## D. CORPORATE GROUPS

There are no generally applicable group consolidation rules in Bolivia.

## E. RELATED PARTY TRANSACTIONS

A legal framework for transfer pricing was introduced in 2014, with effect from tax year 2015. The transfer pricing rules are based on the arm's length principle, established a new concept of related parties and introduced transfer pricing methods. In the case of income tax, the arm's length principle is applicable to commercial and/or financial operations performed between related parties.

Related parties are deemed to exist whenever one person takes part in the management, control, or administration, or possesses capital equity in another company, or whenever a third party directly or indirectly participates in the management, control, or administration, or possesses capital equity in two or more companies.

The tax administration is empowered to perform adjustments when the transaction values do not comply with the arm's length principle. For this purpose, the tax administration can use the following methods: comparable uncontrolled price, resale price, cost-plus, profit split, transactional net margin or notorious price in transparent markets (applicable to the import or export of commodities).

Furthermore, a formal transfer pricing obligation has been established. Taxpayers, within the scope of transfer pricing rules, are obliged to present transfer pricing documentation which includes a technical transfer pricing study.

## F. WITHHOLDING TAX

Bolivian-sourced dividends and other profit distributions by a domestic subsidiary to its non-resident parent company are subject to a 25% final withholding tax, which is levied on 50% of the Bolivian-sourced dividend, thus giving rise to an the effective tax rate of 12.5%.

Bolivian-sourced interest, royalties and fees paid to non-resident recipients are subject to a 25% final withholding tax, which is levied on 50% of the Bolivian-sourced income, thus giving rise to an effective tax rate of 12.5%. Rental income derived by non-residents from the leasing, subleasing or other exploitation of any Bolivian-situs real property is subject to a 25% final withholding tax, which is levied on 50% of the Bolivian-sourced rental payment, thus giving rise to an effective tax rate of 12.5%).

Bolivian-sourced capital gains derived by non-residents are subject to a 25% final withholding tax, which is levied on 50% of the Bolivian-sourced capital gain, thus giving rise to an effective tax rate of 12.5%.

## G. EXCHANGE CONTROL

No restrictions are imposed on foreign-exchange transactions, including the repatriation of capital and the remittance of dividends and royalties abroad. A system of free-floating exchange rates exists in Bolivia.

## H. PERSONAL TAX

Individuals are subject to tax on all items of income, unless expressly exempt. For income tax purposes, the term income means the total value or amount in cash or in kind derived from capital investments, dependent services or a combination of both.

The individual income tax liability is subject to tax at a rate of 25% on professional activities and at 13% on other activities.

## I. TREATY AND NON-TREATY WITHHOLDING TAX RATES

| | Dividends | | Interest (%) | Royalties (%) |
|---|---|---|---|---|
| | Individuals, companies (%) | Qualifying companies (%) | | |
| **Domestic rates** | | | | |
| Companies | 12.5/25[1] | 12.5/25[1] | 12.5/25[1] | 12.5/25[1] |
| Individuals | 12.5/25[1] | -- | 12.5/25[1] | 12.5/25[1] |
| **Treaty countries** | | | | |
| Argentina | --[2] | --[2] | --[2] | --[2] |
| Colombia | --[2] | --[2] | --[2] | --[2] |
| Ecuador | --[2] | --[2] | --[2] | --[2] |
| France | 15 | 10/15[3] | 0/15 | 15 |
| Germany | 15 | 15 | 15 | 15 |
| Peru | --[2] | --[2] | --[2] | --[2] |
| Spain | 15 | 10[4] | 0/15 | 0/15 |
| Sweden | 15 | 0[5] | 0/15 | 0/15 |
| United Kingdom | 15 | 10/15[3] | 0/15 | 0/15 |

Notes:

1. Payments made to non-residents are subject to a 25% final withholding tax, which is levied on 50% of the Bolivian-sourced income, thus giving rise to a 12.5% effective tax rate.
2. Domestic rate applies, no reduction under the tax treaty. Source state has exclusive right to tax.
3. The standard rate under the treaty is 15%. However, the application of a most favoured nation clause (items 5 and 4 of the Treaty's Protocol for France and the UK respectively) reduces the rate to 10% if the recipient company owns at least 25% of the capital of the dividend-paying company. The rate for such dividends under the Bolivia-Spain double tax treaty is 10%
4. The 10% rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the capital of the dividend-paying company.
5. The 0% rate applies if the beneficial owner is a company (other than a partnership) which holds at least 25% of the capital of the dividend-paying company.

## KEY TAX POINTS

- Corporate income tax is levied at a single rate of 22%.
- Branches of non-residents companies are subject to 30% corporate income tax.
- The capital gains tax rate for companies is 22%, the same rate as the CIT rate.
- VAT is imposed comprehensively on an end-user basis at the rate of 14% on standard rated supplies.
- Extension of tax amnesty period to 30 June 2022.

## A. TAXES PAYABLE

## COMPANY TAX

Botswana's tax system is source-based. All companies registered in Botswana must also register for corporate income tax (CIT). CIT is levied at a single flat rate of 22%.

- **Manufacturing companies:**

  Manufacturing companies which have been approved by the Minister of Finance are taxed at a special rate of 15%.
- **International Financial Services Centre (IFSC)**

  Companies must obtain a certificate and engage in the specified activities only. Profits from an IFSC (approved services) are taxed at a flat rate of 15%. Other taxable income is taxed at 22%
- **Mining companies**

  Profits form mining activities, excluding profits from diamond mining, are taxed by applying the following formula: Annual tax rate = 70 minus (1,500/x).

  'x' in the above formula represents the taxable income as a percentage of gross income. Please note that the tax rate cannot be less than 22% (the CIT rate) and is normally a rate between 22% and 55%. Diamond mining is generally taxed in accordance with the terms of a specific agreement agreed with the Botswana government.

Other tax rates that apply to certain profits or income are as follows:

- The corporate income tax rate applying to non-resident companies (branches) is 30%;
- Foreign dividends are taxed at 15%;
- Other taxable income is taxed at a rate of 22%;
- Taxable income of an Accredited Innovation Hub (AIH) business is taxed at 15%.

| | |
|---|---|
| Standard rate | 22% |
| Approved manufacturing taxable income | 15% |
| Capital gains | 22% |
| Foreign dividends | 15% |
| Mining taxable income (excluding diamonds) | 22% - 55% |
| Accredited innovation hub business | 15% |
| IFSC company – approved service income | 15% |
| IFSC – other taxable income | 22% |
| Non-resident company (branch) | 30% |

### ADMINISTRATION - COMPANY

Companies must file an income tax return (Form ITA22) four months following the year end. Where a company's final tax liability exceeds BWP 50,000 it will be subject to quarterly self-assessment tax (SAT) payments. SAT payments are calculated to be no less than 80% of the final tax liability.

## CAPITAL GAINS TAX

The capital gains tax rate for companies is 22%, the same rate as the CIT rate. Where the gain arises from the sale of shares, only 75% of the amount realized is taxable. Gains from shares which are listed on the Botswana Stock Exchange will be tax exempt if the seller holds no more than 49% of the shares. However, gains from the disposal of IFSC shares are fully exempt from tax.

## BRANCH PROFITS TAX

Branches of non-residents companies are subject to 30% corporate tax. There is no branch remittance tax in Botswana.

## VALUE ADDED TAX (VAT)

VAT is imposed comprehensively on an end-user basis at the rate of 14% on standard rated supplies. Certain specified supplies are either zero rated or exempt from VAT. Registration is mandatory where turnover (12 months) is expected to be BWP 1,000,000 or more.

VAT is payable by the importer of services not utilised in the making of taxable supplies. Input tax includes Transfer Duty payable under the Transfer Duty Act and any tax deemed to have been paid in respect of the supply of second hand goods. Input tax claims should be made within the following time limits:

a) Where returns are filed every month, within a period of four months;

b) Where returns are filed every two months, within two tax periods;

c) For tax paid with respect of imports, within two tax periods.

Zero-Rated supplies include:

- Exports of goods and services;
- International transport services;
- Supplies of going concerns;
- Sorghum, maize meal, millet, wheat, sugar and flour for human consumption;
- Fertilizers for farming purposes, some pesticides and farming tractors;
- Supplies to the Head of State;
- First 5,000 litres per month of water supplied to a residential dwelling by the Water Utilities Corporation (with exceptions).

Exempt supplies include:

- Prescription drugs and condoms;
- Residential accommodation;
- Education at approved institutions;
- Public medical services;
- Non-fee based financial services;
- Passenger transport (excluding the transportation of tourists)
- Donations and grants;
- Farm implements.

VAT tax returns must be filed on or before the 25th of the month following the end of the tax period.

- Late VAT returns penalty: The greater of BWP 50 per day or 10% per month or part thereof of the tax due;
- Late payment of VAT: Compound interest at 1.5% per month or part thereof on both outstanding tax, penalties and interest charged;
- VAT refunds: Interest at 1% per month or part of a month is payable if the refund is not made within two calendar months from the due date of the return (1 month for IFSC companies, approved manufacturers and exporters).

## LOCAL TAXES

There are no local, provincial government or state taxes on income in Botswana.

## B. DETERMINATION OF TAXABLE INCOME

Income tax is charged on the gross income (i.e. the total amount in cash or otherwise, excluding exempt income or any amount of a capital nature) of all companies and businesses which is received or accrued from sources within Botswana or from sources deemed to be in Botswana, less any allowable deductions.

Normal business expenses wholly, exclusively and necessarily incurred in the production of assessable income are allowed as deductions for tax purposes.

## CAPITAL ALLOWANCES

Capital allowances are deductible as follows:

| | |
|---|---|
| Heavy plant or machinery used in construction | 25% |
| Motor vehicles and aircraft | 25% |
| Plant and machinery used directly in manufacturing or production | 15% |
| Other plant or machinery including farming equipment | 15% |
| Computer hardware | 25% |
| Computer software – off the shelf | 100% |
| Furniture and fittings including soft furnishings | 100% |

| | |
|---|---|
| Industrial buildings:<br>Initial allowance<br>Annual allowance | <br>25%<br>2.5% |
| Commercial buildings | 2.5% |
| Farm buildings, improvements, water suppliers and other farm capital works | 100% |

## DISALLOWED EXPENSES

Standard disallowable expenditure exists which is not deductible from taxable profits such as donations, general provisions, school fees, etc.

## CAPITAL GAINS AND LOSSES

Capital gains are taxed at a rate of 22%. Capital losses may be offset only against capital gains in the year in which the loss is incurred and in the following year. However, for farming businesses, unutilized losses from farming (excluding allowances granted in respect of development expenditure) in the year of disposal of the farm and the five preceding years are deductible in computing capital gains.

## LOSSES

Company tax losses (except farming, mining and prospecting losses) can only be carried forward for five years and if not utilised within five years they are lost.

## C. FOREIGN TAX RELIEF

Unilateral relief is available, the method being an ordinary credit, i.e. the lesser of the foreign tax paid and the tax charged under domestic income tax law. In other words, the foreign tax credit allowed is equivalent to the proportion of the domestic tax which the foreign-sourced income bears to the taxable income for the tax year. Treaty relief is mandatory.

## D. CORPORATE GROUPS

There are no generally applicable group consolidation rules in Botswana.

## E. RELATED PARTY TRANSACTIONS

Transfer Pricing regulations are now effective and are based on the Organisation for Economic Cooperation and Development (OECD) Transfer Pricing guidelines for multinational entities and tax administrators.

### Impact of the regulations

New regulations stipulate that relevant taxpayers now have an obligation to prepare and provide transfer pricing policies and procedures for documentation. The documentation should allow the tax administration to assess the arm’s-length nature of intra-group transactions.

### Relevant taxpayers

The regulations indicate that new obligations are applicable for all direct or indirect transactions with “connected persons”. The term connected persons is defined to refer to the following:

- at least two companies where either of the companies has control directly or indirectly, of the other, or if both companies are controlled, directly or indirectly, by the same person or persons; and
- any person that, singly or together with other connected persons, has control of the company.

The transfer pricing regulations exclude transactions between Botswana residents from the scope of transfer pricing adjustments except when one or both parties are subject to the IFSC tax regime.

### Documentation requirements

Documentation content requirements are in line with the elements recommended by the OECD and should include the following at a minimum:

- specific information about transactions that a taxpayer carries out with connected persons;
- information on all connected persons’ activities including relevant supporting agreements;
- overall transfer pricing policies of the group.

The transfer pricing regulations authorise the Commissioner General to obtain additional information as deemed necessary including requesting group information, in writing, when in a tax year the taxpayer’s transactions with a related party within a multinational entity (MNE) group exceed BWP 5 million (approximately USD 453,000).

### Transfer Pricing methods

The regulations specifically outline five acceptable Transfer Pricing methods of analysis and comparability analysis:

- Traditional methods: comparable uncontrolled price method (CUP), resale price method and cost plus method;
- Transactional methods: transactional net margin method (TNMM) and profit split method.

## F. WITHHOLDING TAX

| Payment | Resident rate | Non-resident rate | Final / Advanced |
|---|---|---|---|
| Interest | 10% | 15% | Final for residents / Advanced for non-residents |
| Dividends | 7.5% | 7.5% | Final |
| Commercial Royalties | - | 15% | Final |
| Management and consultant fees | - | 15% | Final |
| Entertainment fees | - | 10% | Final |
| Construction | 3% | 3% | Advanced |
| Mine rehabilitation | 10% | 10% | Final |
| Rent | 5% | 5% | Advanced |
| Brokerage or commission | 10% | 10% | Advanced |
| Sale of cattle | 4% | 4% | Advanced |

## G. EXCHANGE CONTROL

There are no exchange control restrictions.

## H. PERSONAL TAX

Botswana citizens are taxed on their worldwide income whereas non-citizens are only taxed on income generated in Botswana. Employment Income includes salaries, wages, terminal payments, directors and other fees, bonuses, commissions, allowances and the value of benefits. Employment income from, or deemed to be from a source within Botswana is taxable in Botswana All employment income, including benefits in kind, is subject to monthly withholding tax (PAYE).

**Exemption and Tax Free Benefits for Individuals:**

- The value of contractual travel benefits for employees and their families;
- Medical fund contributions and medical attention paid for by the employer;
- Contractual terminal gratuities payable to expatriate employees are exempt to the extent of one-third Bank and building society interest of BWP 7,800 per annum, for resident individuals;
- Severance pay and certain gratuities payable to citizen employees are exempt to the extent of one third;
- Investment of such payments directly into an approved pension or retirement annuity fund results in 100% exemption;
- Retrenchment package: one third or BWP 36,000 whichever is greater is exempt.

**Benefits Valuation:**

- Housing: 10% of municipal valuation or 8% of current capital valuation, (BWP 250 × floor area);
- Use of employer's furniture: 10% of the excess over BWP 15,000 of the cost to the employer;
- Loans: Difference between the concessionary rate interest and the prime lending rate announced by the Bank of Botswana on 1 July of the tax year;
- Other benefits such as school fees and utilities: Cost to the employer or market value, whichever is the greater.

**Business and employment income rates:**

| | |
|---|---|
| BWP 0 – BWP 36 000 | BWP 0 |
| BWP 36 001 – BWP 72 000 | BWP 0 + 5% of excess over BWP 36,000 |
| BWP 72 001 – BWP 108 000 | BWP 1,800 + 12.5% of excess over BWP 72,000 |
| BWP 108 001 – BWP 144 000 | BWP 6,300 + 18.75% of excess over BWP 108,000 |
| Over BWP 144 000 | BWP 13,050 + 25% of excess over BWP 144,000 |

Individuals are subject to a progressive capital gains tax rate up to a maximum rate of 25% applied to gains in excess of BWP 144,000.

| From (BWP) | To (BWP) | Tax liability |
|---|---|---|
| 0 | 18,000 | 0% |
| 18,001 | 72,000 | BWP 0 + 5% of excess over BWP 18,000 |
| 72,001 | 108,000 | BWP 2,700 + 12.50% of excess over BWP 72,000 |
| 108,001 | 144,000 | BWP 7,200 + 18.75% of excess over BWP 108,000 |
| 144,001 | --- | BWP 13,950 + 25% of excess over 144,000 |

## I. TREATY AND NON-TREATY WITHHOLDING TAX RATES

| | Dividends (%) | Interest (%) | Royalties (%) | Management, consultancy and technical fees (%) |
|---|---|---|---|---|
| **Domestic rates:** | | | | |
| Companies | 0/10[8] | 0/15[8] | 0/15[8] | 15 |
| Individuals | 10[9] | 15 | 15 | 15 |
| **Treaty countries:** | | | | |

Notes:

1. The lower 5% rate applies to the use or the right to use industrial, commercial or scientific equipment, the higher 7.5% rate to other cases.
2. The 5% rate applies if the beneficial owner is a company which holds directly at least 25% of the capital of the dividend-paying company. The domestic 10% rate applies in all other cases because the treaty rate (i.e. 12%) is higher than the domestic rate.
3. Under the treaty, a 10% reduced rate applies if the beneficial owner is a company which holds at least 25% of the capital of the dividend-paying company. However, the 10% rate applies across the board as the rate for non-qualifying dividends under the treaty (i.e. 15%) is higher than the 10% domestic rate.
4. The treaty is effective from 13 December 2018 (withholding taxes), 1 July 2019 (other taxes).
5. The treaty rate is lower than the domestic rate so the former prevails.
6. The 5% rate applies if the beneficial owner is a company which holds at least 25% of the capital of the dividend-paying company. The 7% treaty rate applies in all other cases as it is lower than the domestic rate so the former prevails.
7. The 5% rate applies if the beneficial owner is a company which holds at least 25% of the capital of the dividend-paying company. The 6% rate applies in all other cases.
8. Dividends paid by a Botswana company to a non-resident company are subject to a 10% withholding tax effective 1 April 2021 (previously the rate was 7.5%).

   Dividends, interest and royalty payments to non-resident companies are exempt from withholding tax if they are paid by a BITCC (Botswana Investment and Trade Centre company) or a tax-exempt collective investment undertaking.
9. Raised from 7.5% to 10% effective 1 April 2021.
10. Effective date: 1 January 2021 (Czech Republic); 1 July 2021 (Botswana).
11. Effective date: 29 February 2020 (withholding taxes); 1 April 2020 (other taxes) (Botswana): 1 July 2020 (other taxes) (Lesotho).
12. The 10% rate applies if the beneficial owner is a company which holds directly at least 25% of the capital of the dividend-paying company. The domestic 10% rate applies in all other cases because the treaty rate (i.e. 15%) is higher than the domestic rate.
13. The 5% rate applies if the beneficial owner is a company which owns at least 25% of the capital of the dividend-paying company. 10% in all other cases.
14. The 5% rate applies if the beneficial owner is a company (other than a partnership under the Luxembourg treaty and the Zimbabwe treaty) which holds directly at least 25% of the capital of the dividend-paying company. 10% in all other cases.
15. The 10% domestic rate applies in all cases as the rate under the treaty (i.e. 15%) is higher than the domestic rate.
16. The 5% rate applies if the beneficial owner is a company which controls, directly or indirectly, at least 25% of the voting power in the dividend-paying company. The domestic 10% rate applies in all other cases because the treaty rate (i.e. 12%) is higher than the domestic rate.

## BASIC FACTS

| | |
|---|---|
| Full name: | Federative Republic of Brazil |
| Capital: | Brasilia |
| Main languages: | Portuguese |
| Population: | 215 million (2022 estimate) |
| Monetary unit: | Brazilian Real (BRL) |
| Internet domain: | .br |
| Int. dialling code: | +55 |

## KEY TAX POINTS

- Corporate income tax (CIT) is charged at a set rate of 15% plus a surcharge of 10% on profits over a set level, and there is also a social contribution tax on profits charged at a rate of 9% for legal entities in general or at 15% in case of legal entities considered to be financial institutions, private insurance and capitalization.
- Most companies with prior year revenue below a prescribed amount can, under certain circumstances, choose to pay income tax and social contributions calculated under the 'presumed profit method'.
- Other federal taxes include fringe benefits tax, social security contributions (COFINS), social integration program contribution (PIS), payroll tax including employer social security contributions (INSS), value added tax on sales and transfers of products manufactured in or imported into Brazil (IPI), financial operations tax (IOF), and rural real estate tax (ITR).
- Municipal taxes include Services Tax (ISS or ISSQN), and estate transfer tax (ITBI) payable at a rate of up to 4% on inheritances and donations of properties and rights, and a services tax is imposed by many cities, with rates varying substantially between municipalities.
- Profits and gains from foreign sources are taxable in Brazil. Tax credits are available to relieve double taxation subject to a maximum of the Brazilian tax payable on the income.
- Almost all remittances (except for dividends) to companies or persons domiciled abroad are subject to withholding tax.
- Taxes payable by individuals include personal income tax, social security tax and gift and inheritance tax.
- Brazilian resident individuals are taxable on their worldwide earnings, as well as gains on the disposal of worldwide assets and rights.
- Personal income tax is withheld at source (at progressive rates from 7.5% to 27.5%).
- Capital gains arising other than out of financial instruments are subject to income tax at 15%. As from 2019 tax rates applicable to capital gains are as follows:
  - o 15% up to BRL 5 million;
  - o 17.5% from BRL 5 million to BRL 10 million;
  - o 20% from BRL 10 million To BRL 30 million;
  - o 22.5% over BRL 30 million.

## A. TAXES PAYABLE

## CORPORATE TAX

There are three different methods to calculate corporate income tax (CIT): the actual profit method (*Lucro Real*), the presumed method (*Lucro Presumido*) and the arbitrated method (*Lucro Arbitrado*).

## ACTUAL PROFIT METHOD

The Actual Profit Method called "*Lucro Real*" is the method whereby the taxpayer pays CIT called "IRPJ" based on its actual taxable income, after computing all income, gains and tax deductible costs and expenses, including net operating losses of prior years. The taxpayer is required to maintain current and accurate accounting and tax books and records, and also corresponding supporting documentation. Failure to maintain accurate accounting and supporting documentation may lead to disallowance of an expense requiring it to be added back to taxable income.

In general, taxable income must be recognised monthly following the accrual basis criteria and subject to IRPJ. The tax return must be filed annually. Corporate taxable income is taxed under a unitary system whereby a single tax rate is applied. This rate is 25%, being 15% plus 10% on pre-tax profits over BRL 240,000 annually. Corporate income tax is generally computed on a calendar year basis. However, payments are made monthly on estimated advance taxes. Social Contribution on Net Profit called "CSLL" is another federal tax and is calculated on pre-tax profits. The rate is 9% computed on an annual or quarterly basis. Calculations and payments are made monthly as estimated advance taxes. Both taxes on profits add up to 34% (25% plus 9%).

## PRESUMED PROFIT METHOD

The Presumed Profit Method called "*Lucro Presumido*" is a simpler IRPJ calculation method that allows the taxpayer to pay income tax and CSLL based only on its quarterly gross revenues. That means that costs and expenses are irrelevant to determine IRPJ and CSLL liability at the end of the quarter. Due to its simplicity, *Lucro Presumido* is more suitable for small and medium-sized businesses not to mention the method's limitations and restrictions of use by large companies. Companies with prior year revenue of up to BRL 78 million can choose, under certain circumstances, to pay income tax and social contributions under the Presumed Profit Method, which is calculated as a percentage of the quarterly gross revenue on a cash basis.

Under *Lucro Presumido* IRPJ is calculated quarterly and, for most activities the presumed profit margin is 8% of monthly gross income corresponding to sales operational activities and 32% to services revenues, and depending on the specific industry other rates apply. Based on the presumed net income resulting from the application of the profit margins on gross income a 15% IRPJ rate applies while net income in excess of BRL 60,000 per quarter is subject to an IRPJ surtax of 10%, similar to the "estimated" calculation for *Lucro Real*.

## ARBITRATED PROFIT METHOD

*Lucro Arbitrado* applies to only a few situations, most of them related to inaccuracy or unreliability of the taxpayer's accounting records (under *Lucro Real*). It is an extreme tool used by the tax administration to determine unilaterally and ex officio the taxpayer's taxable income and IRPJ due. *Lucro Arbitrado* has also consequences for other federal taxes, in particular CSL, PIS and COFINS because they are determined based on the taxpayer's accurate gross income.

## FRINGE BENEFITS TAXATION

Companies participate mandatorily in different forms of social security obligations to federal agencies. These either directly or indirectly benefit pension programs, working time compensation, social work assistance and health programs, among others. All contributions are deductible for corporate income tax purposes.

## PROGRAM FOR SOCIAL INTEGRATION CONTRIBUTION (PIS)

PIS is a federal social contribution levied on taxpayers' monthly gross income. PIS has been subject to several changes, many of them creating separate PIS regimes depending on the taxpayer's business or income tax calculation method. There are two basic PIS regimes dependent on the corporate income tax method elected by the taxpayer (*Lucro Presumido* or *Lucro Real*): the cumulative and the non-cumulative regime.

These contributions are payable each month as a fund to employees. This is calculated based on 1.65% of monthly gross revenue. The PIS rate is generally 1.65% of the monthly sale, in a non-cumulative way. It means, deductions are allowed in respect of services and material costs applied in companies' operating activities. For companies that choose to be taxed by the Presumed Profit Method, PIS will be

0.65% of the monthly sale in a cumulative way, without the aforementioned allowed deductions.

## CONTRIBUTION FOR THE FINANCING OF SOCIAL SECURITY (COFINS)

COFINS is also a federal social contribution levied on the corporate taxpayer's monthly gross income. COFINS also has three basic tax regimes: the cumulative, the non-cumulative (created in 2004) and the single-phase regime. The COFINS tax rate under the cumulative regime is 3%, while the rate is 7,6% under the non-cumulative regime. Rates under the single-phase regime vary from business to business.

Although regulated by different laws, PIS and COFINS regimes, whether cumulative or non-cumulative, are almost identical. For cumulative COFINS the difference is basically the rate (3% for cumulative COFINS and 0.65% for cumulative PIS). Companies under the *Lucro Presumido* pay COFINS according to the cumulative regime, i.e. at the rate of 3% with no COFINS tax credit available.

## PAYROLL TAX

This is a monthly obligation for social security and other funds levied on payroll.

| Tax | Rate |
|---|---|
| Social Security (INSS) | 20% |
| Accident Insurance (SAT) | 1% to 3% |
| Employee Indemnity Guarantee Fund (FGTS) | 8% |
| Education Fund (SE) | 2.5% |
| Other | 3.3% |

Employees contribute monthly to the social security system at rates from 8% to 11% on a progressive-scale base salary taking into account a maximum base salary of BRL 5,531.31. Federal law obliges companies to distribute part of their annual net income to employees. Participation is negotiated by each company and disputes are settled by arbitration. Amounts distributed are deductible for corporate income tax purposes and not subject to social security.

The Brazilian Government changed the criteria for companies in some business sectors to calculate the collection of INSS. Basically, the law changed the basis for calculation of INSS from 20% under payroll salary to apply 4.5% or 2% under revenue generated monthly by the companies which are subject to the new rules. According to Law 12.546/2011 and 13.161/2015, companies that render IT services, technologies, and hotels will be subject to contribute 4.5% of their monthly gross revenue except for call centres that increase to 3%. Companies that manufacture fluids for hydraulic brakes, plastic, clothing and accessories, fur, leather, silk, wool, rugs and other coatings to floors, hats and artefacts of similar use, machinery and appliances, pressure reducing valves, among others will be subject to contribute 2,5% of their monthly gross revenue.

## LOCAL TAXES

### STATE VALUE ADDED TAX (ICMS)

ICMS is a near Value Added Tax on sales of most goods and certain services. It is payable to state governments upon imports of goods into Brazil and sales or transfers of goods within Brazil. It is also payable upon supply of electricity, the provision of interstate and inter-municipal transport services and communication services. ICMS is levied on the sale or physical movement of goods, freight, transportation, communications services and electric energy. Intrastate transactions are taxed at 18%, interstate transactions are taxed at 7% or 12%, and most imports are taxed at a rate between 18% and 25%. The lower rates are normally charged on transfers to less developed states. Some states offer rate reductions or later payment dates as a tax incentive for the installation of factories. Communication services are taxed at a rate between 13% and 25%.

As of 1 January 2013, the ICMS rate for interstate transactions involving imported goods is at 4% (instead of the standard 7% or 12%) subject to certain conditions. The new tax rate, established by Senate Resolution no 13/2012, aims to eliminate unfair competition among Brazilian states to encourage customs clearance (and, thus, ICMS revenues) of imported goods even when the goods are destined for another state.

### REAL ESTATE TRANSFER TAX (ITBI)

ITBI is the municipal real estate transfer tax that applies on most onerous transfers of real estate. The tax is payable upon each and every taxable transfer of real estate property. Rates vary according to the actual value of the relevant transaction, or the recipient party value of property (as determined by the municipal tax administration), whichever is higher. The Constitution allows ITBI rates to be progressive according to the value of the property. It also allows the application of different rates according to the location and destination of the relevant property average. The ITBI rate is 2% in most municipalities.

### SERVICES TAX (ISS OR ISSQN)

ISS is the municipal tax levied on the provision of services of any kind by taxpayers located within the jurisdiction of a given municipality. ISS can also include services rendered within the boundaries of a given municipality even though the services provider is located in another municipality.

The ISS rates vary from municipality to municipality, but rates cannot be lower than 2% and not exceed 5%. The minimum 2% tax rate for ISS was established businesses to their jurisdictions. But some municipalities bypass this minimum 2% rate by granting other incentives that reduce the ISS overall tax burden, such as tax base reductions. The tax applies to the taxpayer’s monthly services gross income and is payable on a monthly basis. The ISS also applies to imported services.

## OTHER TAXES

### TAX ON MANUFACTURED PRODUCTS (IPI)

IPI is a federal excise tax levied on manufactures products as they leave the plant where they have been manufactured. It also applies to imported products at the time of importation and the first resale of the imported product by the importer. IPI is not levied on exports. IPI tax rates vary depending on the products: the more essential the lower the rates. The rates are listed per tariff code in the IPI Table called “TIPI”, which uses the Mercosur Common Tariff (NCM) as a basis.

The exports (export of manufactured products) are exempt from IPI. Imports of goods (raw material and products) are normally taxed at the same rate as Brazilian-made products. Rates change frequently. For imported goods or products, the IPI (and other taxes due) must be collected upon customs clearance of the goods or products.

### IMPORT TAX

The import tax is a federal tax due upon customs clearance of the imported products, usually pursuant to an ad valorem tax rate. The tax rate varies according to the tariff classification of the imported goods under the Mercosur Common Tariff (NCM), as described above in section IPI (Tax on Manufactured Products). The tax base is the sales price shown in the commercial invoice issued in the country of origin. However, during customs clearance procedures, the administration has discretionary powers to reject the transaction price if there is evidence that it is not the market value. A review of the sales price is usually based on international customs valuation rules.

### FINANCIAL OPERATIONS TAX (IOF)

IOF is a federal tax that generally applies to different types of transactions such as loans and credit operations, insurance policies and foreign exchange operations for certain services rendered. IOF regulations are extensive and change constantly. The tax is mainly used as an instrument of economic policy to regulate the credit, currency exchange, insurance, and securities markets rather than to generate tax revenues.

### CONTRIBUTION FOR INTERVENTION IN THE ECONOMIC DOMAIN (CIDE)

The government introduced a special contribution in the year 2000. Brazilian legal entities that license, purchase or otherwise acquire technological knowledge must pay a special contribution of 10% on activities such as: trademarks, technical services assistance, administrative services and any royalty payments. Based on the law in force, CIDE must even be paid on activities that do not involve the transfer of technology.

### TAX ON FUEL (CIDE)

The CIDE will be paid monthly on the import and export of petroleum, derived and natural gas, and fuel alcohol. The rate will be based on the value in Reals of the cubic meters or tons of fuel.

### RURAL REAL ESTATE TAX (ITR)

Property taxation of rural and urban land receives a different tax treatment. Urban land is subject to the municipal real estate ownership tax called IPTU and rural land is taxable by ITR. The definition of land as rural or urban is then relevant because it determines the competent authority to levy tax on property ownership. Classification stems from exclusion: when land is considered to be urban it will be subject to IPTU while if it is not considered to be urban it will be treated as rural for tax purposes and will consequently be subject to ITR.

The basic rate is calculated annually based on certain premises on assessed property values and depending on the stage of use and exploration of the property. Very small properties are exempt and the maximum rate applied corresponds to 20% of the land value without any improvements.

## B. DETERMINATION OF TAXABLE INCOME

**IFRS - INTERNATIONAL FINANCIAL REPORTING STANDARDS**

Brazil adopted the IASB's International Accounting Standards in 2008 on a gradual basis and the full IFRS since 2010. As a consequence, there are several important changes to Brazilian accounting practices, the most important of which is that these new accounting practices are required not only in consolidated financial statements but also in the individual financial statements (Law 11638/07). These include the recognition of leasing transactions, depreciation treatment, the recognition of intangible assets, the impairment concept etc.

Taxable income is generally computed in accordance with accounting rules and tax legislation (i.e. accounting profits adjusted for tax purposes), subject to certain exceptions. Brazilian GAAP were adjusted in 2007 in order to be aligned with IFRS. Law 12.973/2014 of 13 May 2014 dealt with the tax effects arising from the changes to the new accounting standards (previously, a transitory regime applied, in which legal entities could use old accounting rules for tax purposes). According to this Law, as from 2015 legal entities must observe the new accounting standards also for tax purposes (and no longer apply the transitory regime), unless regulated otherwise by the law. In view of this, Law 12.973/2014 brought into force relevant changes to tax legislation concerning the assessment of CIT, PIS and COFINS, the tax treatment of dividends, interest on net equity, the equity pick-up (*método de equivalência patrimonial*) and tax amortization of goodwill, among other things.

### DEPRECIATION

Fixed assets shall be depreciated over their estimated useful lives for accounting purposes (IFRS). For tax purposes, the straight-line method is usually adopted, using the following annual rates: buildings 4%; machinery and equipment 10%; vehicles 20%; IT equipment 25% etc. Assets subject to depletion (mines, quarries, etc.) may be amortised proportionately to the units extracted in each period.

### STOCK / INVENTORY

The cost of goods sold for production is generally valued using the weighted average cost method, although the FIFO (first in, first out) basis may be elected. The method adopted determines the basis for the valuation of closing inventory.

### DIVIDENDS

Brazil follows a dividend exemption system. Amounts distributed to shareholders resident in Brazil or abroad (since the investment is registered at the Brazilian Central Bank (BCB)) are not subject to withholding tax.

### INTEREST DEDUCTIONS

There is a limitation on interest expenses to be deductible:

a. Loan from non-resident companies (thin capitalisation); and,

b. Loan from abroad must be registered at Central Bank of Brazil (transfer pricing).

Interest due must be at fair market value and necessary to business activities and will be subject to withholding tax on an accrual basis. The calculation of interest on a partner's or shareholder's capital (JCP) is allowed. The interest is deductible for income tax and social contribution purposes up to the limit of the official long-term interest rate (TJLP). Profits for the current period or previous periods must be at least double the value of the interest to be distributed. Interest is subject to a 15% withholding tax. Interest should be paid or possibly capitalized.

**Thin capitalisation**

Brazil has thin capitalization rules in force since 2010 that limit the ability for corporate taxpayers under "*Lucro Real*" to fully deduct interest expenses associated with loans contracted with foreign related parties or parties domiciled in low tax jurisdictions and/or under a favourable tax regime in a foreign location. Such law states a limitation for corporate income tax purposes related to deductible interest, accrued or paid, in favour of a foreigner not resident in a tax haven. Under the rules, interest paid to related parties that are not located in a tax haven jurisdiction or that do not benefit from a preferential tax regime may be deducted on an accrual basis for corporate income tax purpose only:

- If the expenses are necessary for the company's activities; and,
- Both of the following thresholds are met:
  a. The related party debt-to-equity ratio does not exceed 2:1 (calculated on the proportion of related party debt to direct equity investment made by related parties); and,
  b. The overall debt-to-equity ratio does not exceed 2:1 based on the proportion of total debt to total direct in investment made by related parties.

If the debt payable to the non-resident investor exceeds the above ratios, then the excess portion of the interest expense payable by the Brazilian subsidiary is not deductible for the purposes of corporate income taxes.

In addition, interest payable by a Brazilian entity to a non-resident creditor (related or not) domiciled in a low-tax jurisdiction or benefiting from a privileged tax regime may be deducted for the purposes of corporate income taxes only if the interest expense is necessary for the company's activities and the amount of the Brazilian entity's indebtedness to all entities located in low-tax jurisdictions or benefiting from privileged tax regimes does not exceed 30% of the equity of the Brazilian borrower.

If the debt payable to the non-resident creditor exceeds the above ratios, then the excess portion of the interest expense recognized by the Brazilian subsidiary is non-deductible.

Finally, thin capitalization rules also apply to transactions where a non-related financial institution is used as a mere intermediary between the Brazilian company and its related party domiciled abroad. However, loan transactions entered into between two Brazilian related residents are not subject to thin capitalization rules, even if the guarantor, attorney-in-fact or any intervening party is a related party domiciled abroad or a resident of a low-tax jurisdiction or of a country with a privileged tax regime.

### TAX LOSSES CARRIED FORWARD

Tax losses can be carried forward to offset against future profits of up to 30% of the real profits arising in each period (year). Losses that are offset may be carried forward indefinitely. There are restrictions on losses transferred as a result of a company merger or where there is a change in the control and activity of the loss generating company. Loss carry-back is not allowed.

### INCENTIVES

Brazil offers incentives through the reduction of domestic taxes or exemption from withholding tax in the forwarding of royalties or commissions on international financing. In addition to incentives for exports, there are incentives for the implementation of industrial units in specific regional areas.

### ROYALTIES AND TECHNICAL ASSISTANCE EXPENDITURES

Royalties are deductible expenses but are restricted to between 1 % and 5% of sales revenue for companies that make cross-border trademark and patent royalty payments. Expenditure incurred in the creation of patents and manufacturing formulas and processes are considered capital intangible assets and are amortised over the life of the asset. This is also true for trademarks, whereas copyright, software, and franchising are generally deductible from operational results if they are related to the activities of the company.

Technical, scientific and administrative expenditures and royalties paid to foreign companies which have direct or indirect control of the Brazilian company are deductible if the contracts are duly registered with the Brazilian Institute of Industrial Property (INPI) and with the Brazilian Central Bank (BCB). There are no restrictions for the remittance of these monies abroad. However, some remittances of funds abroad are subject to 15% withholding tax and 10% CIDE or only 25% withholding tax, depending on the case.

## C. FOREIGN TAX RELIEF

Unilateral relief is granted to corporate taxpayers by means of an ordinary foreign tax credit system.

Taxes paid abroad on income directly derived by the Brazilian resident taxpayer may be claimed as a credit against domestic tax liability. This foreign tax credit is limited to the amount of domestic tax that is imposed on the foreign-sourced income. For these purposes, the Brazilian tax liability includes both IRPJ and CSLL. The Brazilian tax administration holds the position that resident entities opting for the presumed profit regime of taxation (*Lucro Presumido*) and directly providing services abroad are not allowed to offset taxes paid abroad with taxes paid in Brazil. However, this exclusion does not apply if the service is provided within countries with which Brazil has signed a double tax treaty where the elimination of international double taxation is agreed upon through the use of the credit method, without restrictions connected to the taxation regimes opted by the taxpayer in Brazil.

An ordinary foreign tax credit is available in respect of the tax on profit distributions by foreign subsidiaries, if any, and the underlying tax paid by the distributing subsidiary in the jurisdiction where the foreign entity is located.

## D. CORPORATE GROUPS

For tax purposes, consolidation of affiliated companies is not allowed. Losses can only be offset against profits of the same company. However, Law 12.973/2014 introduced a special treatment applicable until 2022 where positive and negative results (excluding foreign exchange results) by foreign entities controlled by Brazilian legal entities may be consolidated for purposes of application of the Brazilian CFC rules, subject to certain conditions.

## E. RELATED PARTY TRANSACTIONS

Since 1997 Brazil has transfer pricing rules in place to prevent undue allocation of income in international transactions between related parties. The system adopted is one of determining the maximum amounts of deductible expenses, and the minimum amount of taxable income, for Brazilian companies engaged in transactions with related parties outside of Brazil or non-resident parties domiciled in a listed low-tax jurisdiction or under a listed favourable tax regime. Domestic transactions are not subject to transfer pricing regulations as they are governed by other anti-avoidance rules.

As opposed to other countries, where the arm's length principle and comparable prices are the rule, the Brazilian rules take another direction by basically establishing fixed formulas to determine the accepted transfer price. Although Brazil does not completely ignore comparable prices or the arm's length principle, it does limit its application by setting accepted standards for their application.

Brazil established a transfer pricing system for imports with affiliated companies of goods, services and rights acquired abroad. The prices are based on three methods: Comparative Independent Price (PIC), Resale Price Less Profit (PRL), or Production Cost Plus Profit (CPL) and Commodities Price Method (PCI). The same system applies to exports to non-resident related parties, with the following methods: Export Revenues Method - PVEx, Country Destiny Price of exports revenue Method - PVA and PW, Cost Acquisition or Manufacture plus Tax and Profit - CAP also known as Method of Price Under Quotation on Export ("PECEX"), which is briefly defined as the average amounts of the quotation of assets or rights subject to public prices in internationally recognised commodities and future exchanges.

Since the end of 2012, Brazil has been changing some of the methods applicable to Transfer Pricing on imports and also creating additional methods. Basically, PRL presumed profit margin was changed from 60% to 40%, 30% and 20% depending on the business sector in which companies operate. According to the Federal Law 12.715/2012, two new methods were established, one applicable to imports and other applicable to exports. In accordance with the method applied, the price is defined as the average daily amount of assets or rights subject to public prices in internationally recognised commodities and future exchanges.

The taxpayer must disclose transfer pricing methods in its annual tax return and eventually prove that the corresponding costs, expenses and charges that exceed the elected transfer pricing method must be added back as taxable income and be subjected to the IRPJ and CSLL.

**Country-by-Country Reporting (CbCR)**

Normative Instruction 1.681/2016 provides for the obligation of submitting CbCR by the ultimate holding of multinational groups which is a resident for tax purposes in Brazil and whose economic group has generated consolidated revenue exceeding BRL 2.26 billion or EUR 750 million in the tax year prior to the tax year of the report. Through the CbCR, the Brazilian tax authorities will have access to information aggregated by each jurisdiction in which the multinational group operates:

- consolidated revenues, segregating those obtained in transactions with related and unrelated parties;
- income or losses before income tax;
- income tax and, in the case of Brazil, also the amount of CSLL paid;
- retained earnings;
- capital stock;
- income tax due;
- number of employees, workers and other associates;
- tangible assets other than cash and cash equivalents.

In addition to this, the reporting entity shall identify each entity that is a member of the multinational group, its jurisdiction of residence for tax purposes, the place of incorporation (only when the tax residence does not correspond to the place of incorporation) and the nature of its main economic activities. Multinational companies that are obliged to submit CbCR must provide information from the economic group to the Brazilian tax authorities, who will exchange this information with the other countries under the Multilateral Agreement of Competent Authority Agreement on the Exchange of Country-by-Country Reports, which was signed on 21 October 2016.

## F. WITHHOLDING TAX

Almost all remittances (except dividends) to companies or persons domiciled abroad are subject to withholding tax. Interest, royalties and services paid to non-residents are generally subject to a 15% withholding tax unless when the beneficiary is resident of a low-tax jurisdiction in which case the rate is 25%.

## G. EXCHANGE CONTROL

The Central Bank allows the official exchange rate to float freely within periodically established bands but participation is restricted to authorised dealers. The bank intervenes when there are signs of speculative operations. There is an official tourist rate that ranges normally close to the commercial rate.

## H. PERSONAL TAX

Brazilian resident individuals are taxable on their worldwide income, as well as gains on the disposal of worldwide assets and rights. An individual is resident in Brazil if he:

- Has an habitual residence in Brazil;
- Works for a Brazilian government department or agency outside Brazil;
- Enters Brazil under a permanent visa;
- Enters Brazil under a temporary visa to work and remains in Brazil for more than 184 days within a 12-month period.

All personal income in general is subject to tax at progressive rates from 0% (monthly taxable income not exceeding BRL 1,903.98) to 27.5% (monthly taxable income exceeding BRL 4,664.68). Payments are made monthly and a personal income tax return is filed annually. Capital gains that do not arise from financial investments are subject to income tax at 15%.

## I. TREATY AND NON-TREATY WITHHOLDING RATES

| | Dividends | | Interest (%) | Royalties (%) |
|---|---|---|---|---|

Notes:

1. There is no reduction under the treaty, the domestic rate applies.
2. The lower 15% rate applies to dividends distributed to companies, including partnerships.
3. The lower rate applies to a direct participation of at least 10% of the capital.
4. The 15% rate applies to an equity percentage of at least 10%.
5. The 10% rate applies to participations of at least 25% of capital or voting power.
6. The general treaty rate is 15%, which is reduced to 10% for participations of at least 25% of capital under the application of a most favoured nation clause (Brazil-Israel treaty).
7. The lower 10% rate applies to participations of at least 20% of voting power.
8. The lower 10% rate applies when the beneficial owner is a company controlling directly or indirectly at least 20% of voting power.
9. The 10% rate applies to participations of at least 25% of capital held for an uninterrupted period of 2 years prior to distributing the dividends.
10. The 10% rate applies to participations of at least 25% of capital.
11. Interest paid to the government of the other contracting state, a political subdivision thereof or an agency (including a financial institution) wholly owned by that government or political subdivision is exempt from tax.
12. The 10% rate applies to interest on certain bank loans with a minimum term of seven years.
13. The 25% rate applies if the recipient is an individual or a partnership, 15% in all other cases.
14. The 10% rate applies to interest on certain long-term (at least 10 years) bank loans.
15. The 10% rate applies to interest on certain long-term (at least 8 years) bank loans.
16. The higher rate applies to trademark royalties.
17. The general rate under the treaty is 15%. The 10% rate applies to copyright royalties (including films, etc.). The 20% rate applies to trademark royalties (the rate was reduced from 25% to 20% by a protocol that entered into force on 1 January 2008).
18. The general rate under the treaty is 15%. The 10% rate applies to copyrights royalties (excluding films, etc.). The 25% rate applies to trademark royalties.
19. The general rate under the treaty is 12.5%. The 15% rate applies to copyright royalties of cinematograph films, etc., and the 25% rate applies to trademark royalties.
20. The rates under the treaty are 25% for trademark royalties and 15% for other royalties which are reduced under the application of a most favoured nation clause: the rates for royalties are reduced to 15% for trademark royalties and to 10% for other royalties (Brazil-Israel treaty).
21. The 25% rate applies to trademark royalties and royalties for the use, or right to use, films, tapes etc. while the 15% rate applies to general royalties.
22. The rate under the treaty is 15%, which is reduced under the application of a most favoured nation clause to 10% for any royalties other than those from trademarks (Brazil-South Africa treaty).
23. The rate under the treaty is 10% for copyrights royalties (including films, etc.) and 15% for all other royalties which are reduced under the application of a most favoured nation clause: the rates for all types of royalties with the exception of trademark royalties are reduced to 10% while the rate for trademark royalties remains at 15% (Brazil-Israel treaty).

24. The 10% rate applies if the beneficial owner holds directly at least 20% of the total capital of the dividend-paying company.
25. Effective date: 1 January 2022.
26. The reduced 10% rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the capital of the dividend-paying company throughout a 365-day period that includes the day of the payment of the dividend (for the purpose of computing that period, no account shall be taken of changes of ownership that would directly result from a corporate reorganisation, such as a merger or divisive reorganisation, of the company that holds the shares or that pays the dividend).
27. The 10% reduced rate applies if the beneficial owner is a bank and the loan has been granted for at least five years for the financing of the purchase of equipment or of investment projects.
28. The 15% rate applies in case of royalties arising from the use or the right to use trademarks. The 10% rate applies in all other cases.
29. The 10% reduced rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the dividend-paying company throughout a 365-day period that includes the day of the payment of the dividend (for the purpose of computing that period, no account shall be taken of changes of ownership that would directly result from a merger or divisive reorganisation, or from a change of legal form, of the company that holds the shares or that pays the dividend). The 0% rate applies if the beneficial owner is a pension fund (subject to conditions) or the Central Bank.
30. The 5% reduced rate applies if the beneficial owner is the UAE, any political subdivision or local government thereof or a government institution.

# BRITISH VIRGIN ISLANDS

## MEMBER FIRM

| City | Name | Contact Information |
|---|---|---|
| Road Town | Mead Malone | +1 284 499 4388<br>mmalone@mwmglobalhld.com |

## BASIC FACTS

| | |
|---|---|
| Full name: | British Virgin Islands |
| Capital: | Road Town |
| Main languages: | English |
| Population: | 30,593 (2022 estimate) |
| Monetary unit: | USD |
| Internet domain: | .vg |
| Int. dialling code: | +1 |

## KEY TAX POINTS

- There is no corporate income tax, no capital gains tax, no branch profits tax and no VAT in the British Virgin Islands (BVI).
- Customs duties are levied on most goods imported into the BVI at ad valorem rates, expressed as a percentage of the value of the goods. These rates range from 5% to 20%.
- There is no withholding tax on interest, dividends or royalties paid by BVI companies.
- Payroll tax is charged on every employer who carries on business on the BVI. An employer must pay to the BVI Tax Authority 14% of the employee's remuneration over and above USD 10,000 per calendar year, split between the employee and employer at a rate of 8% for the employee (as a deduction from the employee salary) and 6% for the employer.

## A. TAXES PAYABLE

## FEDERAL TAXES AND LEVIES

### COMPANY TAX

Income tax is zero rated in the British Virgin Islands and as such there is effectively no corporate income tax.

### CAPITAL GAINS TAX

There is no capital gains tax in the British Virgin Islands.

### BRANCH PROFITS TAX

There is no branch profits tax in the British Virgin Islands.

### SALES TAX / VALUE ADDED TAX (VAT)

There is no VAT on the British Virgin Islands.

## OTHER TAXES

### HOTEL ACCOMMODATION TAX

Hotel Accommodation Tax is levied on all charges made to the person in respect of accommodation and all services rendered to the person by or on behalf of the proprietor. The tax base is the figure to which the tax rate is applied. The tax base is calculated by deducting the charges that are not associated with those made to the person in respect of accommodation, and all services rendered to the person by or on behalf of the proprietor from the gross amount collected for the month. The tax rate is 10%.

## STAMP DUTY

Instruments to which stamp duty would typically apply include share transfers, charges over and transfers of real estate. The amount of stamp duty payable on a particular instrument will depend on the nature of the instrument.

## CUSTOMS DUTY

Customs duties are levied on most goods imported into the British Virgin Islands at ad valorem rates, expressed as a percentage of the value of the goods. These rates range from 5% to 20%. Goods are valued at the open market price. Some categories of imports are exempt from customs duties, such as personal effects of returning residents and diplomatic personnel, specified drugs and medical equipment and aircraft servicing equipment and fuel, and certain raw materials for local manufactures.

## REAL ESTATE TAX

The Property Tax Act establishes an annual tax on real property which is either, or a combination of, land tax and a building or house tax. British Virgin Islanders are liable for land tax at USD 10 for the first acre and at USD 3 for each additional acre.

Rates for expatriates are as follows: USD 50 on one half acre or less, USD 150 on more than one half acre but not exceeding one acre and USD 50 on each additional acre or part thereof exceeding one acre.

## PAYROLL TAX

Payroll Tax is charged on actual remuneration paid, given or assessed by any employer or self-employed person, to every employee and deemed employee, plus any benefits derived by the employee, deemed employee or self-employed person as a result of his/her employment, whether paid in cash or kind. Payroll tax rates are as follows:

- The Class 1 employer and the class 1 self-employed person pay at a rate of 10% of the tax base.
- The Class 2 employer and the class 2 self-employed person pay at a rate of 14% of the tax base.

Effective 2007 employment income up to USD 10,000 is tax free.

## SOCIAL SECURITY

Social security is deducted from all employment income to a maximum of USD 44,500 (insurable earnings) as follows:

- Private employees: 8.5% of insurable earnings (employers contribution 4.5% and employee 4%);
- Civil servants: 7.5% of insurable earnings (employers contribution 4% and employee 3.5%);
- Self-employed persons: 8.5% of insurable earnings;
- Voluntary contributors: 7% of earnings by the Board.

## NATIONAL HEALTH INSURANCE

Employers are required to from insurable income (wages or salary) contribution rate of 7.5% (employer 3.75% and employee 3.75%). The maximum amount on which NHI premiums will be assessed, is two times the upper wage limit for social security contributions, which presently equals USD 7,500 per month. Therefore, the maximum amount payable per month by employees and employers would be USD 281.25 each.

## VARIOUS LEVIES

The following annual fees are levied on BVI companies. The fees vary by authorised share capital and by type of licence.

| Details | Annual Fees |
|---|---|
| Up to USD 50,000 or Foreign currency equivalent or authorised to issue up to 50,000 shares | USD 450 effective 1 January 2018 |
| Exceeding USD 50,000 or foreign currency equivalent or authorised to issue more than 50,000 shares | USD 1,200 effective 1 January 2018 |
| General banking licence | USD 125,000 to USD 250,000 |
| Restricted Class I bank licence | USD 75,000 to USD 150,000 |
| Restricted Class II banking licence | USD 75,000 to 150,000 |
| Insurance company licence | Up to USD 10,000 |
| Class I trust licence | USD 16,000 |
| Class II trust licence | USD 14,000 |
| Class III trust licence | USD 12,000 |
| Restricted trust licence | USD 5,000 |

## B. DETERMINATION OF TAXABLE INCOME

Not applicable.

## C. FOREIGN TAX RELIEF

Not applicable.

## D. CORPORATE GROUPS

Not applicable.

## E. RELATED PARTY TRANSACTIONS

The British Virgin Islands do not have anti-avoidance legislation in force.

**Country-by-Country reporting**

The BVI International Tax Authority (ITA) has announced that, with effect from March 2020, it is accepting electronic filings for Country-by-Country Reporting.

An MNE Group is a group that, with respect to any fiscal year, includes:

- Two or more enterprises which are tax resident in different jurisdictions; or
- An enterprise that is resident for tax purposes in one jurisdiction and is subject to tax through a permanent establishment in another jurisdiction and, in either case, has a total consolidated group revenue of equal to or more than EUR 750 million for its preceding fiscal year.

Any Constituent Entity of an MNE Group that is resident for tax purposes in the BVI must register with the ITA no later than the last day of the reporting fiscal year of the relevant MNE Group.

A Constituent Entity of any MNE Group which fails to register with the ITA within the applicable timeframe will be liable on conviction to a fine not exceeding USD 100,000.

CbC Reports must be filed within 12 months after the last day of the reporting fiscal year of the relevant MNE Group.

## F. WITHHOLDING TAX

There is no withholding tax on interest, dividends or royalties paid by BVI companies. However, the BVI (like other dependent territories) applies the European Union (EU) Savings Directive effective since 1 July 2005.

## G. EXCHANGE CONTROL

Not applicable.

## H. PERSONAL TAX

As income tax in the British Virgin Islands is zero rated, there is effectively no personal income tax in the British Virgin Islands.

Payroll tax is charged on every employer who carries on business on the British Virgin Islands in respect of:

- remuneration paid by him to every employee; and
- deemed remuneration paid by him to every deemed employee for services rendered by the employee or deemed employee wholly or mainly on the British Virgin Islands, whether or not the remuneration is paid on the British Virgin Islands. In addition, a self-employed person is liable to payroll tax on his deemed remuneration.

An employer must pay to the British Virgin Islands Tax Authority 14% of the employee's remuneration over and above USD 10,000 per calendar year. The 14% tax liability is split between the employee and employer at a rate of 8% for the employee (as a deduction from the employee salary) and 6% for the employer.

A self-employed person is deemed to employ himself and to pay himself "deemed remuneration", which is the greater of his actual remuneration or his "notional remuneration". A self-employed person is an individual who carries on business, otherwise than as an employee, and benefits from income of the business, otherwise than by way of being paid actual remuneration.

## I. TREATY AND NON-TREATY WITHHOLDING TAX RATES

The British Virgin Islands have concluded double tax treaties with Australia, Denmark, Finland, New-Zealand, Norway, Sweden and the United Kingdom.

In addition, the BVI has entered into tax information exchange agreements with 28 countries: Aruba, Australia, Canada, China, Curaçao, Czech Republic, Denmark, the Faroe Islands, Finland, France, Germany, Greenland, Guernsey, Iceland, India, Ireland, Isle of Man, Japan, the Netherlands, New Zealand, Norway, Poland, Portugal, St. Maarten, South Korea, Sweden, the United Kingdom and the United States.

# BRUNEI

## CORRESPONDENT FIRM

| City | Name | Contact Information |
|---|---|---|
| Brunei Darussalam | Lee Yun Chin | +673 223 7905<br>yunchin@lr-brunei.com |

## BASIC FACTS

| | |
|---|---|
| Full name: | Brunei Darussalam |
| Capital: | Bandar Seri Begawan |
| Main languages: | English, Malay |
| Population: | 445,073 (2022 estimate) |
| Monetary unit: | Brunei Dollar (BND) |
| Internet domain: | .bn |
| Int. dialling code: | +673 |

## KEY TAX POINTS

- Income tax in Brunei is governed by the Income Tax Act (Chapter 35) and Income Tax (Petroleum) Act (Chapter 119), Laws of Brunei.

- Resident and non-resident companies are liable for corporate income tax on income accrued in, derived from or received in Brunei from outside Brunei.
- Companies with Gross Sales or Turnover that does not exceed BND 1 million are exempted from corporate tax or taxed at zero rate. Audited financial statements are not required for the submission of tax return.
- The period of assessment is on a preceding year basis. Year of assessment is based on a calendar year ending 31 December.
- Dividends received from a corporation taxable in Brunei are exempt from tax.
- There is no capital gains tax in Brunei.
- There is no goods and services tax in Brunei.
- Tax exemption is available for pioneer industry companies between 5 to 20 years, depending on certain criteria being met.
- There are various tax exemptions and incentives to encourage trading and investment in Brunei.
- Up to a certain amount, chargeable income (CI) of new companies is tax-exempt for the first 3 tax years of assessment. There are also exemptions on 75% of the first BND 100,000 of CI and on 50% of the next BND 150,000 of CI.
- Transactions involving related resident and non-resident entities must be conducted on an arm's length basis. There are no thin capitalisation or controlled foreign company (CFC) provisions.
- Dividends are not subject to withholding tax in Brunei. Interest, royalty and certain other payments by Bruneian companies to non-resident companies are, however, subject to withholding tax.
- There is no personal income tax in Brunei.

## A. TAXES PAYABLE

### COMPANY TAX

Resident and non-resident companies are taxed on income accruing in or derived from Brunei as well as on foreign income received (actual or deemed) in Brunei. Remittance of foreign income (dividends, branch profits, services income) may be tax exempt when remitted by a resident company under certain conditions.

A company, whether incorporated locally or abroad, is considered to be resident in Brunei for tax purposes if the control and management of its business are exercised in Brunei. The control and management of a company are vested in its directors and a company is normally regarded as resident in Brunei if, among other things, its directors' meetings are held in Brunei.

A resident company is taxed on its worldwide income to the extent of the income derived or accrued outside Brunei that is (actually or deemed) to be received in Brunei, whereas a non-resident company is taxed solely on income that has a source in Brunei or on profits from businesses in Brunei operated through a branch or permanent establishment.

The standard corporate tax rate for non-oil and gas related companies is 18.5% with effect from the 2015 year of assessment. The corporate tax rate for companies that are engaged in the exploration and production of oil and gas is 55%.

A partial tax exemption is given for the first BND 250,000 of chargeable income (CI). Under this scheme, 75% of the first BND 100,000 of CI is tax exempt and 50% of the next BND 150,000 of CI is tax exempt. Qualifying newly incorporated Bruneian companies may enjoy a separate tax exemption scheme for their first 3 consecutive years of assessment. This scheme allows qualifying new companies to enjoy a tax exemption on the first BND 100,000 of CI and on 50% on the next BND 150,000 of CI.

A 50% COVID-19 tax discount applies to any tax payable by companies for financial year 2021 (Year of Assessment 2022) in selected sectors such as tourism, hospitality (including registered hotels and lodging houses), restaurants and cafes, and sea and air passenger transportation services.

The tax year, referred to as the year of assessment (YA), runs from 1 January to 31 December of each year. Income for the YA is computed based on the income derived in the preceding calendar year (known as the basis year) from all sources. For businesses with a non-31 December accounting year-end, the Collector of Income Tax of Brunei (CIT) accepts the accounting year as the basis year instead of the calendar year. Under such circumstances, tax is assessed for each YA on the income for the accounting year preceding that YA.

A company is required to file an estimate of its CI along with the estimated tax payment within 3 months after the end of its financial year. The annual corporate income tax return must be filed along with payment of tax by 30th June of the YA. All completed returns will be accepted under self-assessment and any tax adjustments must be submitted separately to the tax authority.

Failure to file returns is an offence against the Income Tax Act. Upon conviction, offenders are liable to a fine of BND 10,000, and in default of payment, can be sentenced to imprisonment for up to 12 months.

Books of accounts including complete and accurate records of opening and closing inventories, purchases, sales, receipts, invoices and all other documents relating to the business are to be kept for 7 years from the YA the income relates to.

### GOODS AND SERVICES TAX (GST)

There is no GST in Brunei.

### STAMP DUTY

Stamp duties are levied at fixed or ad valorem rates on various business documents.

## B. DETERMINATION OF TAXABLE INCOME

Brunei-incorporated companies are required to prepare their financial accounts according to International Financial Reporting Standards (IFRS) for Public Interest Entities and Brunei Darussalam Accounting Standards (BDAS) for Non-Public Interest Entities.

The accounting profits are adjusted in accordance with Brunei tax rules to arrive at the taxable income.

Companies whose financial accounts are prepared with non-Brunei dollar functional currency are required to furnish their tax computation in Brunei dollar. Expenses must be incurred wholly and exclusively for the production of income in order to be tax deductible unless specifically disallowed or restricted (e.g. non-commercial motor vehicles, entertainment, expenses of a capital nature, donations and gifts).

B

## INTEREST DEDUCTIONS

Interest expenses are tax deductible unless they are incurred in respect of non-taxable income or are regarded to be of a capital nature. There are no thin capitalisation rules in Brunei.

## STOCK / INVENTORY

There are no prescribed valuation methodologies under domestic income tax law. As such, the CIT will generally accept the valuation methodology under the IFRS and BDAS.

## CAPITAL GAINS AND LOSSES

There is no capital gains tax in Brunei. Gains of a capital nature are not subject to income tax. Similarly, expenses of a capital nature are not deductible for income tax purposes. The tax authority will look at the facts and circumstances of the transaction to determine whether the gain is capital in nature or a trading gain which is subject to income tax.

## DIVIDENDS

Dividends accrued in, derived from or received in Brunei by a corporation are included in taxable income. However, dividends received from a corporation taxable in Brunei are exempt from tax.

Dividends received in Brunei from the United Kingdom or from Commonwealth countries are grossed up in tax computations, and credit is claimed against the Brunei tax liability for tax suffered either under the double tax treaty with the United Kingdom or the provision for Commonwealth tax relief.

## CAPITAL ALLOWANCE

Capital allowances, instead of accounting depreciation, are granted for plant and machinery acquired and used in trade or business. Most plant and machinery qualify for three-year straight line tax depreciation. Low cost items (costing not more than BND 2,000 per item) may be tax depreciated in full, subject to a total claim of BND 30,000 for each YA. Automation equipment qualifies for 100% tax depreciation in the year of acquisition.

Capital expenditure incurred for the construction or acquisition of an industrial building qualifies for the Industrial Building Allowance (IBA) if the building is used for qualifying purposes.

Effective from YA 2015, 150% capital allowance is given to companies in the manufacturing sector that have their plant and machinery installed from 1 January 2014 to 31 December 2019.

Unutilised capital allowances can be carried forward indefinitely but must be set off against income from the same trade.

## TAX LOSSES

Losses that are incurred by a company can be carried forward for a maximum of 6 years and set off against future income.

## TAX INCENTIVES

Full tax exemption is granted for pioneer status companies between 5 to 20 years, dependant on certain criteria being met.

| **Pioneer Status Companies** |
|---|
| Exempt from Corporate Income Tax |
| Exempt from import duties on machinery |
| Exempt from import duties on raw materials |
| Tax exemption for up to 11 years |
| |
| **Expansion of Established Enterprise** |
| Exempt from Corporate Income Tax |
| Minimum capital expenditure of BND 500,000 |
| Additional tax exemption for up to 9 years |
| |
| **Foreign Loans for Productive Equipment** |
| Exemption from withholding tax for interest paid |
| Minimum amount BND 200,000 |

Companies dealing with exports can choose to pay tax at a fixed rate of 1% on approved exports, in lieu of corporate tax. The total turnover of the exporter is treated as exports if local sales do not exceed 20% of total turnover.

## C. FOREIGN TAX RELIEF

Brunei has signed Avoidance of Double Taxation Agreements (DTA) with 18 countries. Brunei will grant a tax credit for foreign tax suffered in the treaty country. The tax credit granted is limited to the lower of the foreign tax suffered and the Brunei tax payable on that income.

Apart from these DTAs, Brunei has also signed Exchange of Information Agreements with 11 countries. Brunei has also signed the Convention on Mutual Administrative Assistance in Tax Matters (MAC), which allows Brunei Darussalam to exchange information on tax matters with its signatory countries.

## D. CORPORATE GROUPS

Group taxation is not permitted. The grouping of corporations has no tax implications as the tax laws treat each corporation in isolation.

B

## E. RELATED PARTY TRANSACTIONS

Related party transactions have to satisfy the arm's length principle.

## F. WITHHOLDING TAX

Withholding tax will arise if the following payments are made and such expenses are borne by a person resident in Brunei or having a permanent establishment in Brunei or which are deductible against any income accruing in or derived from Brunei:

| | Nature of payment | Withholding tax rate |
|---|---|---|
| 1. | Interest, commission, fee or other payment in connection with any loan or indebtedness | 2.5% |
| 2. | Royalties, lump sum payments or otherwise for the use of movable properties | 10% |
| 3. | Payment for the use of or the right to use scientific, technical, industrial or commercial knowledge or information | 10% |
| 4. | Payment for rendering assistance or services in connection with the application or use of scientific, technical, industrial or commercial knowledge or information | 10% |
| 5. | Payment for the management or assistance in the management of any business | 10% |
| 6. | Rent or other payments for the use of movable property | 10% |
| 7. | Non-resident directors' remuneration | 10% |

Branch profits being remitted and payment of dividends to non-resident are not subject to withholding tax.

## G. EXCHANGE CONTROLS

Since 1967, the local currency has been at par and interchangeable with the Singapore dollar. There are no restrictions on currency movements or exchange controls; however, in line with international practice to deter money laundering, money brought in and out of the Brunei exceeding the equivalent of BND 15,000 must be declared.

## H. PERSONAL TAXATION

There is no personal tax on individuals in Brunei (residents and non-residents).

There are no social security taxes in Brunei. However, all citizens and permanent residents of Brunei must contribute 5% of their salary to a State managed provident fund, Tabung Amanah Perkerja (TAP). The employer will have to also contribute the same amount for its employees to the provident fund.

In addition to the above, all citizens and permanent residents of Brunei must also contribute 3.5% of their salary to a Supplemental Contributory Pension Scheme (SCP). The employer will have to also contribute the same amount (subject to a minimum of BND 17.50) for its employees to the Scheme. However, both the employer's and employee's monthly contributions are capped up to a salary of BND 2,800 per month.

## TREATY WITHHOLDING TAX RATES

The chart shows the withholding tax rates applicable under the tax treaties that are currently in force. Brunei adopts a refund method on DTA reliefs to ensure that the non-resident are entitled to the treaty benefits. The domestic withholding tax will apply when the payments are made to non-resident. The non-resident may claim treaty benefit for reasons such as having no Permanent Establishment in Brunei.

- Brunei does not levy any withholding taxes on dividend payments.
- Interest and royalties paid by resident companies to non-resident companies are subject to respectively a 2.5% and 10% final withholding tax.

| | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| **Treaty countries:** | | | |
| Bahrain | 0 | 5 | 5 |
| Cambodia | 10 | 10 | 10 |
| China | 5 | 10 | 10 |
| Hong Kong | 0 | 5/10[1] | 5 |
| Indonesia | 15 | 15 | 15 |
| Japan | 5/10[2] | 10 | 10 |
| Kuwait | 0 | 0 | 15 |
| Laos | 5/10[3] | 10 | 10 |
| Luxembourg | 0/10[4] | 10 | 10 |
| Malaysia | 10 | 10 | 10 |
| Oman | 5 | 10 | 10 |
| Pakistan | 10 | 15 | 15 |
| Qatar | 0 | 0 | 5 |
| Singapore | 10 | 5/10[5] | 10 |
| South Korea | 5/10[6] | 10 | 10 |
| United Arab Emirates | 0 | 0 | 5 |
| United Kingdom | 0 | --[7] | --/0[8] |
| Vietnam | 10 | 10 | 10 |

Notes:

1. 5% applies to interest payments to any bank or financial institutions; and 10% of interest payments in all other cases.
2. 5% applies if the beneficial owner is a company that has owned directly or indirectly, for the period of 6 months ending on the date on which entitlement to the dividends is determined, at least 10% of the voting shares of the paying company; and 10% of gross dividends in all other cases.
3. 5% applies if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the company paying the dividends; and 10% of gross dividends in all other cases.
4. 0% applies if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the company paying the dividends; and 10% of gross dividends in all other cases.
5. 5% applies to interest payments to any bank or financial institutions; and 10% of interest payments in all other cases.
6. 5% applies if the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the capital of the company paying the dividends; and 10% of gross dividends in all other cases.
7. No reduction under the treaty; the domestic rate applies.
8. The exemption does not apply to royalty payments in respect of the operations of mines, quarries or exploitation of natural resources. These payments are subject to the domestic rate; no reduction under the treaty.

## KEY TAX POINTS

- Corporate Income tax in Bulgaria is a 10% flat rate on the taxable profit.
- The standard VAT rate is 20%. There is a reduced rate of 9% for hotel accommodation services.
- Withholding tax is due on dividends, interest, royalties and various other types of income, when distributed to a non-resident entity.
- Bulgarian tax residents are taxed on their worldwide income. Non-residents are taxed only on their Bulgarian-sourced income.
- An inheritance received by the surviving spouse, children and their descendants is exempt. Various rates of inheritance tax apply to other relatives.

## A. TAXES PAYABLE

## COMPANY TAX

Corporate income tax in Bulgaria is levied at a 10% flat rate on taxable profits. Taxable entities are:

- Companies and partnerships established under Bulgarian law; and,
- Permanent establishments of non-resident entities in Bulgaria.

The taxable profit is the financial result adjusted for tax purposes. Accounting and reporting rules usually apply IFRS or use local Bulgarian GAAP (for small and medium-sized enterprises). The annual corporate tax return has to be submitted from 1 March to 30 June of the following year. The tax year is the calendar year. Quarterly or monthly advance corporate tax instalments are due during the year. The corporate tax is due by 30 June after deducting the advance corporate tax paid.

A separate tax declaration for Advance Corporation Tax (ACT) instalments is filed from 1 March to 15 April. The ACT payments are calculated on the basis of net sales revenue for the year before the previous one. For example, the ACT payments for year 2022 are based on year 2020 net sales revenue.

Newly incorporated entities do not make ACT instalments for the year of establishment and for the subsequent year.

The deadlines that are introduced are:

- Changing the ACT instalment amount - to be determined by 15 November of the current year;
- Payment of the last ACT instalment (monthly or quarterly) – 1 December of the respective year.

The allowable excess of the overall Corporation Tax over the ACT instalments paid for the corresponding year is 25%. In case the excess is higher than 25%, penalty interest is calculated on the excess amount for the period from 16 April until 31 December.

**Possibility to file a corrective annual corporate income tax return**

Taxpayers are able to file a one-off corrective corporate income tax return in case of errors identified after 30 June of the following year and the submission of the regular corporate income tax return. The corrective tax return should be filed by 30 September.

**Mandatory electronic submission of tax returns**

Taxpayers are obliged to submit all returns under the Corporate Income Tax Act electronically.

## ONE-OFF TAX ON CERTAIN EXPENSES

Certain expenses paid to employees, or on behalf of employees, are subject to a one-off tax. Expenses subject to the one-off tax are:

- “representative” expenses;
- social expenses provided in-kind to the employees (e.g. fringe benefits) except for food vouchers up to BGN 80 and voluntary insurance contributions (social, health and life insurance) up to BGN 60 per employee per month;
- expenses related to personal use of company assets.

The one-off tax rate is 10% on the above expenses. Both the respective expense and the applicable one-off tax are deductible for corporate income tax purposes. The taxes are due by 30 June of the following year.

## CAPITAL GAINS TAX

Capital gains of companies are treated as ordinary trading income and are taxed at the corporate tax rate of 10%.

## BRANCH PROFITS TAX

Branch offices of foreign registered companies are taxed as domestic entities.

There is no branch remittance tax in Bulgaria.

## VALUE ADDED TAX (VAT)

The Bulgarian VAT legislation is based on the EU VAT rules and Directive 2006/112/ EC. The VAT rates are:

- 20% for domestic supplies, intra-community acquisitions and importation from non-EU countries; and,
- 9% for hotel accommodation services
- The 9% reduced VAT rate which was implemented in response to the COVID-19 crisis will continue to be applicable until the end of 2022 for the following taxable supplies:
  - sale of books (including e-versions);
  - restaurant and catering services;
  - baby foods and products;
  - the use of certain sport facilities;
  - tour operator services, including bus excursions.

**Exemptions:**

- With the right to deduct input VAT - intra-community supplies, export to non-EU countries, international transport of goods and passengers, certain supplies related to international transport, sale of duty-free goods under certain conditions, certain transactions related to international trade, specific supplies under international treaties, etc.
- No right to deduct input VAT - transfer or rental of land or rights over land (except for building land and land adjacent to new buildings), the transfer of old buildings or parts thereof, rental for residential purposes to individuals (an option to tax these transactions is available); financial and insurance services; gambling; certain services related to health, education, religion, culture, etc.; other specific supplies (e.g., importation of certain goods and up to a certain limit).

**VAT Registration:**

Entities are obliged to register for Bulgarian VAT purposes if they have performed:

- Transactions with a place of supply in Bulgaria for which VAT should be charged by the supplier exceeding BGN 50,000 (approximately EUR 25,600) for the last 12 months;
- Intra-community acquisitions exceeding BGN 20,000 (approximately EUR 10,200) during the calendar year; or,
- If two or more related parties carry out in succession similar business in the same commercial premises; or,
- Businesses that are providing telecommunications, broadcasting and electronic services have to register for local VAT purposes if their customers are established in Bulgaria, subject to certain conditions. This is in accordance with the provisions of Directive 2008/8/EC, which establishes the rules concerning the place of supply of telecommunications, broadcasting and electronic services rendered to non-taxable persons within the EU.

Foreign taxpayers who have no place of business in Bulgaria but make local taxable supplies, for which the reverse charge mechanism does not apply, should register for VAT purposes in Bulgaria no later than seven days prior to the date on which the tax in respect of their first supply in Bulgaria becomes due.

Entities established in an EU Member State performing supply of goods with installation in Bulgaria to customers non-registered for VAT purposes are obliged to register irrespective of their taxable turnover. Foreign entities which receive services with a place of supply in Bulgaria for which the recipient has to self-charge Bulgarian VAT are also obliged to register irrespective of their taxable turnover. Any entity may apply for voluntary VAT registration. However, if voluntarily registered, such entity will not be able to deregister for one year following the year of registration.

**Distance sales of goods:**

New rules will apply for the EU scheme and the non-EU scheme respectively, which gives taxpayers the opportunity to report and pay VAT in a single Member State regardless of where the VAT is due.

Since 1 July 2020 the threshold for distance sales for all Member States is EUR 10,000 (excluding VAT) per annum.

Distance sales of imported goods, where the importation of non-excisable goods have a value below EUR 150, are exempt from VAT at import. The VAT should be settled by persons applying this scheme in the respective Member State of registration.

The scope of the non-EU scheme is extended and covers all services performed by non-EU suppliers to non-taxable persons in the EU (B2C). Examples of such services that were not covered by the scheme until now are accommodation services, access to events, transport services, car rentals, etc.

The scope of the EU scheme applies to intra-Community distance sales (including domestic distance sales) performed by EU suppliers and non-EU suppliers. The scheme also applies to B2C services supplied to non-taxable persons by EU suppliers established in a Member State different from the one of the customer.

**VAT returns and payment:**

Monthly VAT returns are filed and the tax is due by the 14th of the following month. The tax period is a calendar month. European sales list (VIES) returns have to be filed monthly by the same deadline if intra-community supplies of goods or certain services have been performed during the respective month.

**VAT refund:**

VAT can be refunded through a VAT return within:

- 2 months (period for carry forward and offsetting of input VAT against output VAT) and 30 days of filing the last VAT return (period for effective refund); or,
- 30 days of filing the VAT return for entities which have performed certain zero-rated supplies exceeding 30% of the total turnover from taxable supplies for the last 12 months.

An investor in a large investment project which has received authorization by the Ministry of Finance can receive a refund within 30 days. The investor can also apply reverse charge for VAT on import of goods (without effective cash outflow). EU based foreign entities which are not registered and established for VAT purposes in Bulgaria can receive a refund of the local input VAT incurred for goods and services used for supplies with a place of supply outside Bulgaria. A specific procedure with the authorities of the EU Member State of establishment has to be followed. Non-EU based entities may be entitled to a refund on a reciprocal basis (i.e., if their country of tax residence provides the right to a VAT refund to Bulgarian entities).

**Pro-rata VAT deduction in specific cases:**

VAT-registered persons will be obliged to claim a pro-rata VAT credit for the acquisition of long-term assets, which will be used both for business and personal use. A VAT credit can be claimed only for the part used for economic activities. The pro-rata should be determined based on an allocation key, which guarantees the most precise calculation of the VAT which can be deducted.

The pro-rata deduction above is different from the existing proportional (partial) deduction. The latter applies when the acquired goods or services are used both for taxable and exempt services. For example, if the part of the long-term asset used for the economic activity of the entity is utilized both for taxable and exempt supplies, the taxable person will be entitled to claim a pro-rata VAT deduction, as well as a proportional (partial) VAT deduction.

The definition of long-term assets for VAT purposes includes real estate, vehicles and other goods and services, which are or would have been long-term assets under the Corporate Income Tax Act with a value of BGN 5,000 (EUR 2,550) or greater.

Taxable persons will be able to claim a pro-rata VAT credit for the acquisition of goods and services, which are not or would not have been long-term assets, if these goods and services are used partially for personal needs or VAT exempt supplies. In this case, the taxable person could claim a VAT credit only for the part used for taxable supplies. This part should be determined based on a reasonable method. If the taxable persons decide to use this option, they will not have to observe the rules for proportional (partial) deduction in respect of the same goods and services, when these are also used for exempt supplies.

## LOCAL TAXES

## REAL ESTATE TAX

Real estate tax is levied between 0.01% and 0.45% annually on the higher of the gross book value and the tax value of the immovable property (on the tax value for residential property). The exact rate is determined by the municipality in which the real estate is situated.

## TRANSFER TAX

Transfer tax is levied between 0.1% and 3% on the higher of the sales price and the tax value of the transferred real estate/the insurance value of cars. The exact rate is determined by each municipality.

## VEHICLE TAX

Vehicle tax is levied depending on the type and characteristics of the vehicle. It applies to cars, ships and airplanes. The tax rate is determined by each municipality within the ranges stipulated in the law.

## DONATION TAX

Donation tax is levied between 3.3% and 6.6% on the value of the donation. The exact rate is determined by each municipality. Lower rates and exemptions apply to donations between relatives.

## INHERITANCE TAX

An inheritance received by a surviving spouse, their children and their descendants is exempt. The tax is between 0.4% and 0.8% on an inheritance exceeding BGN 250,000 (approximately EUR 128,000) in favour of brothers, sisters and their descendants (between 3.3% and 6.6% for other heirs). The exact rate is determined by each municipality.

## TOURIST TAX

Tourist tax is levied between BGN 0.2 and 3 (approximately EUR 0.1 and 1.5) per night. The exact rate is determined by the municipality in which the accommodation facilities are located.

## B. DETERMINATION OF TAXABLE INCOME

Profits include all income and capital gains. The taxable basis is the accounting profit adjusted for prescribed items. Broadly, expenses incurred wholly and exclusively for business purposes are deductible. The accounting profit is adjusted in accordance with the rules of the corporate income tax legislation, the most important of which are listed below.

## DEPRECIATION

For tax purposes, the straight-line method is normally adopted. Assets purchased during the year should have the depreciation time apportioned.

| Asset | Annual rate of depreciation (%) |
|---|---|
| Buildings, industrial facilities, communication devices and lines, electricity grid | 4 |
| Machinery, fittings and manufacturing equipment | 30/50* |
| Vehicles, excluding automobiles; roads and airplane runways | 10 |
| Computers, software and rights of using software | 50 |
| Automobiles | 25 |
| Assets with limited term of use under contract or under legal obligations | 100/years of use; not more than 33 1/3 |
| All other depreciative assets | 15 |

* Possibility to be 50% when new investment is made and the equipment is brand new.

## INVENTORY

Inventory is generally valued at the lower of cost or market value. Cost may be determined on the basis of FIFO or average cost method.

## CAPITAL GAINS AND LOSSES

In general, capital gains and losses are included in the trading income of companies, and in normal income for individuals, and taxed accordingly with the normal rates of corporate or personal income tax.

## DIVIDENDS

Subject to 5% withholding tax when distributed to individuals, resident non-profit entities and non-residents (except for EU/EEA entities). Dividends distributed to resident companies are not included in their taxable income except for dividends distributed by:

- Special purpose investment companies; and,
- Non-EU/EEA foreign entities.

## INTEREST DEDUCTIONS

Interest paid by a company is treated as an ordinary business expense unless it falls under the provision of thin capitalisation. Under the thin capitalization rules, if the debt-to-equity ratio of the company exceeds 3:1 (some of) the interest expense may not be tax deductible in the current year.

If the threshold of EUR 3 million borrowing costs per year is reached, the excess interest costs will be deductible up to 30% of the taxpayer's EBITDA.

If the borrowing costs are under EUR 3 million per year, then a modified version of the existing thin capitalisation regime will be applied in parallel to the new interest limitation rules where the conditions therefore are met. The existing 5-year limitation for carry forward of the non-deductible interest expenses under the thin capitalisation rule has been abolished.

## LOSSES

Corporate tax losses can be carried forward over the next five consecutive years. Losses cannot be carried back against profits of previous years.

## FOREIGN SOURCED INCOME

The Bulgarian tax authorities levy taxes on resident companies on all profits arising from foreign sources in the same way as income from local sources.

## INCENTIVES - TAX HOLIDAY

The amount of the annual corporate income tax due by entities on their profits from manufacturing, including toll manufacturing, may be partly or fully reduced. The application of the tax holiday is subject to certain limitations and conditions, including EU state aid restrictions.

## EXEMPTIONS FROM CORPORATE TAX

Special purpose investment companies, collective investment schemes authorized for public offering in Bulgaria and national investment funds are not subject to corporate income tax.

## C. FOREIGN TAX RELIEF

Bulgaria has concluded some 70 international treaties for avoiding double taxation (see table below and comments in the "Withholding Tax" section below). Foreigners may also be exempt from social security contributions in Bulgaria or the contributions they make can be recognised in their home country under an applicable bilateral or multilateral social security agreement.

## D. CORPORATE GROUPS

There is no group taxation for corporate income tax or for VAT purposes in Bulgaria.

## E. RELATED PARTY TRANSACTIONS AND TRANSFER PRICING RULES

Although Bulgarian legislation requires entities to prove the arm's length principle in related party transactions, there is no Act with legislative power that obliges the multinational entities to publish Local and Master files, unless specifically required by the tax authorities. The OECD Transfer Pricing Guidelines are generally followed in such cases. However, Country-by-Country reporting is mandatory.

The taxpayers required to prepare annual transfer pricing documentation are the entities which at 31 December of the prior year exceed two of the following thresholds:

- Net book value of assets: BGN 38 million; or
- Net sales: BGN 76 million; or
- Average number of employees during the reporting period: 250.

The Bulgarian transfer pricing rules require that taxpayers apply arm's length prices in their related party transactions. Bulgarian transfer pricing rules envisage five methods for determining arm's length prices:

- The Resale Minus Method;
- The Comparable Uncontrolled Price Method;
- The Cost Plus Method;
- The Transactional Net Margin Method; and,
- The Profit Split Method

A taxpayer is obliged to prove the arm's-length character of its related party transactions during a tax audit by applying one of the above methods.

## F. WITHHOLDING TAX

Withholding tax is due on the following types of income when distributed to a non-resident entity:

- Dividends and liquidation quotas;
- Interest, royalties, franchising and factoring fees; exemptions apply to interest on bonds issued by EU/EEA entities, traded on regulated markets, and loan interests for loans provided by EU/EEA entities to local entities, where the EU/EEA entity has issued bonds in order to provide the loan, and these bonds are traded on an EU/EEA regulated market;
- Technical (including consultancy) and management services fees;
- Income from hiring out movable or immovable property;
- Capital gains from transfer of real estate;
- Capital gains from disposal of financial assets issued by resident entities or the State and municipalities (exemption for capital gains from disposal of shares on a regulated Bulgarian/EU/EEA market);
- Penalty or damages payments (except for insurance compensation) distributed to entities tax resident in low tax jurisdictions.

### Withholding Tax Rates

- 5% on the gross amount of dividends and liquidation quotas (0% for distributions to EU/EEA entities);
- 0% on interest and royalties distributed to related party legal entities resident in the EU (subject to certain conditions);
- 10% on the gross amount for all other taxable income.

The withholding tax rates may be reduced under an applicable double tax treaty.

### Refund Opportunities

Entities resident in the EU/EEA may declare tax deductible expenses and claim a corresponding refund of the withholding tax paid on a gross basis. The claim is annual and should be filed by 31 December of the following year.

### Payment

The tax should be withheld by the resident payer and remitted to the budget within one month following the quarter of accrual of the income. In case of capital gains, it is their recipient which should remit the withholding tax due within the term indicated above.

### Tax Treaty Application

If available, double tax treaty relief may be applied by the income recipient directly if the income accrued for the calendar year does not exceed BGN 500,000 (approximately EUR 255,000). In all other cases a non-resident can benefit from tax treaty relief if an advance clearance is obtained from the Bulgarian tax authorities under a specific procedure.

## G. EXCHANGE CONTROLS AND LIMITATIONS OF PAYMENTS IN CASH

There are no exchange controls in Bulgaria. The limit for cash payments is BGN 10,000.

## H. PERSONAL TAX

The personal income tax rate is a flat rate of 10% on the taxable income for individuals and 15% for the taxable income of sole traders. In general, individuals are considered Bulgarian tax residents if:

- They have stayed in Bulgaria for more than 183 days in any 12-month period;
- The centre of their vital interests is in Bulgaria (determined in view of their personal and economic ties to the country, e.g. factors like permanent address in Bulgaria, family, employment, possession of property, etc.).

Generally, taxable income includes monetary income, as well as benefits received in-kind (except for non-taxable items and "in-kind social expenses"). Bulgarian tax residents are taxed on their worldwide income, while non-residents are taxed only on their Bulgarian-sourced income.

## EXEMPT INCOME

Certain types of income are exempt from taxation, including capital gains from the disposal of shares on a regulated Bulgarian/EU/EEA market, income from disposal of certain real estate, etc.

## DEDUCTIONS

Tax deductions apply in some cases, including:

- Mandatory social security and health insurance contributions;
- Statutory deductions for freelancers, for rental income, etc.;
- Voluntary personal insurance up to certain limits;
- Certain donations and other specific situations (e.g. disabilities).

**Tax relief for children and children with disabilities:**

- BGN 4,500 for one child;
- BGN 9,000 for two children;
- BGN 13,500 for three or more children;

The amount of the tax relief for disabled children is BGN 9,000 Tax relief for payments for labour for improvements and/or repair works in one residential property is introduced. The amount of the tax relief is up to BGN 2,000, subject to conditions that should be simultaneously met.

## LUMP-SUM TAXATION

Lump sum taxation is applicable to certain sole traders with annual turnover of less than BGN 50,000 (approximately EUR 25,000).

## FILING PERSONAL TAX RETURNS

The annual personal income tax return has to be submitted by 30 April of the following year (the tax year coincides with the calendar year). The tax has to be paid by the same deadline. A 5% reduction of the outstanding tax can be applied if:

- The annual tax return is filed electronically and the tax is paid before 31 March of the following year; and,
- The taxpayer currently has no outstanding liabilities towards the Budget.

Individuals who fulfil the above requirements may utilise the 5% discount from their outstanding tax liability, but no more than BGN 500 (EUR 256). Individuals are generally not obliged to file annual tax returns if they have received only employment income for which the full tax due has been withheld by the employer on a 'pay as you earn' basis, non-taxable income and/or income subject to one-off tax.

Individuals will be allowed to file a corrective tax return once until 30 September of the following year if they find an error in their submitted annual tax return. Certain types of foreign-sourced income under Art. 38 of the PITA (e.g. dividends, interest, etc.), which was previously subject to quarterly reporting and taxation by Bulgarian tax residents is now reported and taxed with the individual's annual Bulgarian tax return for the respective year.

Successors will be able to file annual tax returns for the income of deceased individuals. If one of the successors submits a tax return, the others are exempted from this obligation.

## ONE-OFF TAXATION OF CERTAIN INCOME

One-off tax is due on income received by non-resident individuals from:

- Dividends and liquidation quotas distributed by a Bulgarian resident company;
- Management and technical services fees;
- Interest, royalties, franchising and factoring fees;
- Income from hiring out movable and immovable property;
- Capital gains from disposal of real estate and financial assets; and,
- Certain other income.

One-off tax is due on dividends and liquidation quotas distributed to a Bulgarian resident by a Bulgarian or by a non-resident entity. EU resident individuals may declare deductible expenses and claim a corresponding refund of the one-off tax paid on a gross basis under certain conditions.

## ONE-OFF TAX RATES

- 0% for capital gains from the disposal of shares on a regulated Bulgarian/EU/EEA market by EU/EEA residents;
- 5% for dividends and liquidation quotas;
- 7% for income from voluntary life insurance received after the termination of the insurance policy (if the policy term is more than 15 years);
- 10% for all other income.

The one-off tax rates may be reduced under an applicable double tax treaty.

## SOCIAL SECURITY AND HEALTH INSURANCE

## MANDATORY INSURANCE CONTRIBUTIONS

Between 32.7% and 33.4% paid by both the employer and the employee according to 55:45 ratio. This includes:

- 14.8% - pension fund;
- 5% - universal pension fund;
- 0.4% - 1.1 % - occupational accident and professional disease fund (rate depending on the field of activity); The range is unchanged, although the rates for certain economic activity groups have been adjusted with effect from 1 April 2022;
- 3.5% - general illness and maternity fund;
- 1 % - unemployment fund; and,
- 8% - health insurance fund.

The social security base is the gross remuneration less statutory deductions in some cases and is capped at BGN 3,400 (approximately EUR 1,700) monthly.

Minimum income for social security purposes has also been increased, namely:

- The minimum monthly taxable income for self-employed is increased from BGN 650 to BGN 710 from 1 April 2022; and
- The minimum monthly taxable income for registered farmers is increased from BGN 420 to BGN 710 from 1 April 2022.

| Monetary unit: | 1 USD = 4,000 Riels (KHR) |
| Internet domain: | .kh |
| Int. dialling code: | +855 |

## KEY TAX POINTS

- **General overview**

  Most business activities and investments in Cambodia will be affected by the following taxes:
  - Corporate income tax/Tax on income
  - Minimum tax
  - Withholding tax
  - Value added tax
  - Tax on salary of employees
  - Fringe benefit tax

  There are various other taxes that may affect certain activities in specific industries, including:
  - Specific tax on certain merchandise and services (excise tax)
  - Custom duty
  - Public lighting tax
  - Other taxes
- **Cambodian tax system**

  Cambodia's tax system is a self-declaration regime. The estimated and simplified regimes were eliminated in 2016, and the term 'real regime' has been replaced by the term 'self-declaration regime'. Taxpayers under the self-declaration regime are classified into three categories:
  1. Small taxpayer is any sole proprietorship or partnership that has:
     - annual turnover from KHR 250 million to KHR 1,000 million (approximately USD 62,500 to USD 250,000) for agricultural, service and commercial sectors; or
     - annual turnover from KHR 250 million to KHR 1,600 million (approximately USD 62,500 to USD 400,000) for the industrial sector; and
     - turnover of at least KHR 60 million (approximately USD 15,000) for any three-month period ending in the current fiscal year; and
     - expected turnover for the next three-month period to be at least KHR 60 million (approximately USD 15,000); and
     - participate in any bidding or quotation for the supply of goods or services, including market stall management.
  2. Medium taxpayer includes any sole proprietorship or partnership that has:
     - annual turnover from over KHR 1 billion to KHR 4 billion (approximately USD 250,000 to USD 1,000,000) for the agricultural sector, or
     - annual turnover from over KHR 1 billion to KHR 6 billion (approximately USD 250,000 to USD 1,500,000) for service and commercial sectors; or
     - turnover from over KHR 1.6 billion to KHR 8 billion (approximately USD 250,000 to USD 2,000,000) for the industrial sector.

     A medium taxpayer also includes:
     - enterprises that have been incorporated as a legal entity, representative office; or
     - national and subnational government institutions, all types of organisations or associations, including non-governmental organisations; or
     - foreign consulates and embassies, international organisations, and technical cooperation agencies of other countries.
  3. Large taxpayer includes any sole proprietorship, partnership or legal entity that has:
     - annual turnover exceeding KHR 4 billion (approximately USD 1 million) for the agricultural sector; or
     - annual turnover exceeding KHR 6 billion (approximately USD 1.5 million) for service and commercial sectors; or
     - annual turnover exceeding KHR 8 billion (approximately USD 2 million) for the industrial sector.

     A large taxpayer also includes:
     - Branches of foreign companies;
     - subsidiaries of multinational companies;
     - Enterprises registered as Qualified Investment Projects ("QIPs") approved by the Council for the Development of Cambodia.

Under Prakas 009 the GDT now has the authority to re-determine the classification of a taxpayer if the declared turnover does not reflect actual turnover. In this circumstance a taxpayer will be classified using the value of their assets (current and non-current) as follows:

1. Small taxpayer is any sole proprietorship or partnership that has:
   - assets valued at KHR 200 million to KHR 1,000 million (approximately USD 50,000 to USD 250,000) for agricultural, service and commercial sectors; or
   - assets valued at KHR 200 million to KHR 2,000 million (approximately USD 62,500 to USD 500,000) for the industrial sector.
2. Medium taxpayer includes any sole proprietorship, partnership or legal entity that has:
   - assets valued at KHR 1 billion to KHR 2 billion (approximately USD 250,000 to USD 500,000) for agricultural, services and commercial sectors, or
   - assets valued at KHR 2 billion to KHR 4 billion (approximately USD 500,000 to USD 1,000,000) for the industrial sector.
3. Large taxpayer includes any sole proprietorship, partnership or legal entity that has:

- assets valued above KHR 2 billion (approximately USD 500,000) for agricultural, services and commercial sectors; or
- assets valued above KHR 4 billion (approximately USD 1 million) for the industrial sector.

Anyone falling within one of the above categories is required to begin the tax registration process within 15 working days of commencing business activities or incorporating. One of the main hurdles in registering for tax is the General Department of Taxation's ("GDT") requirement that one of the principals of the entity appear in person at the GDT at the time of registration.

A taxpayer's classification will determine the amount of patent tax that must be paid. Additionally, small taxpayers have fewer requirements when it comes to record-keeping. Small taxpayers are permitted to use a simplified accounting system, whereas medium and large taxpayers are expected to keep proper accounting records and books in line with Cambodian Accounting Standards.

Currently, Cambodia does not have a comprehensive personal income tax system that requires individuals to file and pay tax to the GDT directly.

- **Tax service agents**

  On 12 April 2013, Prakas on Tax Service Agents No. 455 SHV.PrK was issued requiring that those who offer tax services for entities other than their own employer must be licensed as a tax service agent ("TSA"). With the GDT's issuance of Notification No. 17509 GDT on 18 October 2016 advising that TSA licenses had been issued to 34 companies, this requirement is now being enforced.

  For taxpayers, this means that they may continue to file their own monthly and annual returns and represent themselves at the GDT. However, if they hire outside tax service assistance, a licensed TSA must be engaged, and they must provide a written power of attorney for the TSA to act as their tax representative.

  As of 1 January 2017, individuals or companies that do not have a TSA license are not allowed to provide tax services, or act as a taxpayer representative. Those found to be in breach of this provision will be penalised and taxpayers who engage unlicensed TSAs will be subject to a fine of KHR 5 million.

- **Tax Audits**

  Taxpayers may be subject to tax audits at the discretion of the GDT. These may be conducted up to 10 years after the initial filing of a tax return.

  There are three kinds of tax audits:

  1. Desk audit: This level of control is designed to verify the accuracy of declared information by cross-checking it with the tax return or other information requested by the tax administration.
  2. Limited audit: This audit is more extensive. The tax auditors will use all available resources, including visits to the taxpayer's place of business, to verify the accuracy of the taxpayer's returns.
  3. Comprehensive tax audit: In practice, this is the same as a limited audit, only more extensive and thorough. The important distinction between a comprehensive audit and a limited audit is that once the audit has been completed, and any resulting tax reassessments have been paid, all tax years covered by the audit will be closed.

Although a comprehensive tax audit is normally final, if the tax administration has reason to believe a taxpayer has committed tax evasion or fraud, they may re-open the case. Taxpayers achieving Gold or Silver Compliance Status are exempt from desk audits, and may be subject to other audits on a less frequent basis.

## A. TAXES PAYABLE

## CORPORATE INCOME TAX (CIT)/TAX ON INCOME (TOI)

### Scope of taxation

All foreign companies registered in Cambodia fall under the self-declaration regime. Unless otherwise noted, the content of this publication applies to self-declaration regime taxpayers only.

### Residency and source of income

Resident taxpayers are subject to tax on their worldwide income while non-residents are taxed on Cambodian-sourced income only. Residents earning foreign-sourced income can receive credits for foreign taxes paid, as Cambodia unilaterally accepts foreign tax credits.

Resident taxpayers include companies organised, managed or having their principal place of business in Cambodia. A non-Cambodian national will become a resident if they have their residence or principal place of abode in Cambodia, or are present in Cambodia for more than 182 days in any 12-month period ending in the current tax year.

A permanent establishment (PE) is subject to tax on its Cambodian-sourced income only.

### Tax rates

| Type of supply | Rate |
|---|---|
| Standard rate | 20% |
| Oil and gas, and certain mineral exploitation activities | 30% |
| General risk (non-life) insurance activities | 5% (on gross premium income) |
| Resident individuals | 0% to 20% |
| Tax exemption (tax holiday) | 0% |

### Prepayments

A monthly prepayment of TOI ("PTOI"), equal to 1% of monthly turnover including all taxes except VAT, must be paid by the 20th day of the following month. The PTOI can be offset against the annual TOI liability or the minimum tax liability. If the PTOI exceeds the annual TOI liability or minimum tax liability, the excess PTOI can be carried forward indefinitely to offset against a future TOI liability.

If a taxpayer is not subject to minimum tax, monthly PTOI must still be made. But unused PTOI from prior years can be offset against the PTOI due in the current tax year and there may not be any physical payment required.

A company that has been granted a tax holiday, and is therefore subject to 0% TOI is not required to pay PTOI on turnover derived from the project that has been granted tax incentives. But the entity must still prepare the TOI return and submit it to the tax authority.

On 29 January 2020, The Ministry of Economy and Finance (MEF) has issued Prakas No. 098 MEF.Prk to redefine the PTOI in a way that 1% PTOI is applied to income from both principal business activities and subsidiary income. Subsidiary income refers to rental income from immovable property, immovable property given for free use to a third party (the income is at market price), immovable property given for free use to staff (the income is at market price) unless it is in accordance with the labour law, royalty, sale of scrap, rental of business equipment, income from packaging.

**Tax holidays**

Foreign investors seeking to make significant investments into Cambodia outside of the sectors restricted by law may apply to the Council for the Development of Cambodia ("CDC") for QIP status in order to become entitled to a tax holiday. The tax holiday period is composed of:

1. the trigger period, which begins upon issuance of the Final Registration Certificate and ends either upon the first year of profit or three years after revenue is first derived;
2. a three-year period; and
3. the priority period, which is between 0 and 3 years, depending on the industry and level of investment.

Most QIP companies benefit from a tax holiday during which investment activity income is exempt from both TOI and PTOI. However, as later at distribution, any income generated during this time will be subject to the additional dividend distribution tax ("ADDT"), which taxes income not previously subject to TOI at the usual rate of 20%.

**Calculation of taxable income**

Taxable income is essentially the difference between total taxable revenue, whether from a domestic or foreign source, and deductible expenses incurred to carry on the business, plus other passive income such as interest, royalties and rent.

Taxpayers must prepare an annual TOI return which includes a section for making adjustments to accounting profit to arrive at the taxable profit and tax payable.

**Deductible expenses**

As a general rule, expenses are deductible if they are paid or incurred in a tax year to carry on the business of the taxpayer. There are further provisions which disallow specific types of expenses, as follows:

| Type of expenses | Deductibility |
|---|---|
| Personal expense | Non-deductible |
| Donations and grants (not including charitable contributions) | Non-deductible |
| Tax payments, tax penalties, and interest on penalties | Non-deductible |
| Loss on sale of property between related parties | Non-deductible |
| Expense not related to the business, extravagant expense of little use to the business | Non-deductible |
| Amusement, recreation, or entertainment expense | Non-deductible |
| WHT, TOS, and FBT paid on behalf of recipients | Non-deductible |
| Expense pertaining to previous or subsequent periods | Non-deductible |
| Provisions | Generally non-deductible, with some exceptions |
| Depreciation | Deductible when calculated using the method set out in the tax law |
| Unpaid expense due to unrelated parties | Deductible if it is a genuine liability |
| Unpaid salary | Deductible if paid within 60 days after the end of the tax year |
| Related party expense that is not salary | Deductible if paid within 180 days after the end of the tax year |
| Interest expense | Deduction is limited to an amount equal to 50% of adjusted income without taking into account any interest income or expense, plus the interest income |
| Charitable contribution | Deduction limited to an amount equal to 5% of taxable income, without taking the charitable contribution deduction |

There is a further limitation on the deductibility of interest expenses with regard to related parties. For loans from a related party, the interest rate cannot exceed the market interest rate; while for those from an unrelated party, the allowed interest rate is up to 120% of the market interest rate.

The market interest rate is determined and announced on an annual basis by the GDT and is an average of the interest rates of at least five large commercial banks. For 2019, the market interest rate was 8.35% per annum for USD and 9.44% for KHR.

**Utilisation of losses**

If a company sustains a loss, this can be offset against future income and can be carried forward for up to five years.

The accumulated tax losses can be carried forward if all of the following conditions are met:

- There is no change in the business activities of the entity;
- There is no change in the ownership of the entity;
- The loss is recorded in the tax return that has been submitted to the tax administration within the period of time as specified in the tax provisions; and
- The GDT has not issued a unilateral tax assessment for any of the tax years in question.

## MINIMUM TAX

Minimum Tax ("MT") is a separate and distinct tax from TOI, and is calculated at 1% of annual turnover. Turnover is not defined under the LOT, but is inclusive of all taxes excluding value added tax ("VAT").

A taxpayer will be subject to either TOI or MT, whichever is greater. If only MT is due, this should have already been paid in advance by way of the PTOI payments, which are also calculated at 1% of turnover.

Note that QIPs are not subject to PTOI, but will still be required to pay MT.

Newly-introduced legislation allows for an exemption from MT for all taxpayers maintaining proper accounting records, imposing MT only on taxpayers found to have "improper accounting records".

Prakas 638 details what are considered improper accounting records, and states that a GDT committee will evaluate taxpayers' accounting records based on the criteria detailed in the Prakas. This evaluation will take place every two years. At the time of publication, the committee had not yet been formed. However, the GDT has indicated that taxpayers with audited financial statements, or those having Gold

Compliance Status may be assumed to have proper accounting records.

## VALUE ADDED TAX

### Overview

VAT is applicable on the taxable supply of goods and services. An entity registered under the VAT provisions is required to charge VAT on all sales of taxable supplies (output VAT). Such entities can offset the VAT paid on purchases (input VAT) against their output VAT.

### Scope of application

Taxable supplies are the supply of goods, services or imports for taxable sale or for use in producing taxable supplies. Taxpayers must charge and collect VAT on taxable supplies. The supply of goods includes the transfer of the rights to movable property; meaning all property except land or money.

### Sale of land and buildings

As per Notification No. 1728 dated 9 October 2013, the GDT has confirmed that for the sale of land with buildings, registered taxpayers are required to charge VAT on the building component (but not on the land component).

### Non-taxable goods and services

In order to promote the provision of certain key public services, specific taxable supplies have been exempted from VAT. The following is a list of non-taxable supplies under the LOT:

- Public postal services
- Hospital, clinic, medical and dental services, and the sale of medical and dental goods incidental to the performance of such services
- Transportation of passengers by a wholly state-owned public transportation system
- Insurance services
- Primary financial services
- Imported articles for personal use that are exempt from customs duty
- Non-profit activities in the public interest that have been recognised by the Ministry of Economy and Finance
- Education services
- The supply of electricity and clean water
- Unprocessed agricultural products
- Services related to the collection and/or cleaning of solid or liquid waste

If a business makes non-taxable supplies only, it will not be able to claim any input VAT; the VAT on purchases must be borne as a cost. If a business makes a mix of non-taxable and taxable supplies, it will be able to claim a portion of input VAT based on the portion of taxable supplies.

### Registration

Compulsory VAT registration applies to any self-declaration taxpayer who makes taxable supplies. Further, all companies, import/export businesses and QIPs must register for VAT. Other taxpayers are required to register as VAT taxpayers if they meet certain turnover thresholds. Other businesses not compelled to register by law may register voluntarily.

### Tax rates

Taxable supplies made in or imported into Cambodia are subject to VAT at one of two rates:

| Type of supply | Rate |
|---|---|
| Standard rate | 10% |
| Zero-rated supplies, which include:<br>• Exported goods<br>• Exported services<br>• The supply of international transportation services<br>• Services in support of the supply of international transportation<br>• Other specific sectors, including supporting industries that supply the export-oriented garment, textile and footwear industries; the supply of rice; and the import and supply of certain goods for agricultural purposes. | 0% |

Zero-rated supplies are not the same as non-taxable supplies, as it is possible for entities providing zero-rated supplies to claim input VAT credit.

**Administration**

Taxpayers must file VAT returns to declare and pay VAT each month. Payment must be made by the 20th day of the following month or the 25th day of the following month by e-filing. In the event that the deadline falls on a Saturday, Sunday, or public holiday, it will be extended to the next working day. VAT on imports is paid to the General Department of Customs and Excise at the time of import.

If the taxpayer's input VAT exceeds the output VAT for a period of three months or longer, the taxpayer can then apply for a refund from the tax authorities.

There are detailed rules about invoicing and record-keeping obligations. There are also specific requirements for invoices based on whether the invoice is issued to a VAT-registered taxpayer or a non-registered person. The GDT will seek to deny expense deductions or input VAT claims if they are not supported by proper VAT invoices.

## Specific Tax on Certain Merchandise and Services

**Overview**

Specific Tax on Certain Merchandise and Services (ST) is a form of excise tax imposed on the importation or domestic production and supply of certain goods and services. Tax is levied once only: for imports, this is at the inward checkpoint, and for domestic goods, it is upon the sale from the factory

if the products are locally produced.

We expect that, in light of the reduction in import duty tariffs as noted in the Customs Duty section, greater emphasis will be placed on excise tax in the future. Accordingly, it is likely that there will be a number of changes to the calculation and collection of ST.

**Tax rates**

The ST amount due is calculated by applying the applicable rate to the applicable tax base, as per the table below (not an exhaustive list):

| Goods/services | Rate |
|---|---|
| Local and international air tickets sold in Cambodia | 10% |
| Entertainment services | 10% |
| Locally produced or imported cigarettes and cigars (excluding beer) | 20% |
| Locally produced or imported beer | 30% |
| Certain locally produced carbonated and similar non-alcoholic beverages | 10% |
| All types of locally produced or imported wine products | 35% |
| Lubricant, brake oil, raw material for producing engine oil (imported) | 10% |
| Local and international telecommunications services | 3% |

**Basis of taxation**

For locally supplied goods, ST is calculated on the "ex-factory selling price", which is defined as 90% of the selling price excluding VAT and ST. For locally supplied services, the tax base is the invoice price of the services supplied.

For imported goods, ST is calculated inclusive of customs duty and the cost, insurance and CIF value, excluding VAT.

## CUSTOMS DUTY

**Import duties**

There are a number of goods on which import duty applies when they are brought into Cambodia, with some exemptions, including goods temporarily imported into Cambodia, goods for personal use, goods exempted by international treaty, humanitarian aid, and imports for use by a QIP. Exemptions from import duty may also be granted by the CDC for specific industries.

Customs duty is levied on goods entering Cambodia at rates ranging from 0% to 35%. Cambodia is part of ASEAN and therefore party to the ASEAN Free Trade Agreement and Common Effective Preferential Tariff scheme. This requires ASEAN Member States to offer preferential tariff rates on a broad range of products originating from other ASEAN countries.

Accordingly, the customs duty rates in Cambodia have been reduced so that now many goods coming from other ASEAN countries have a maximum 5% import duty imposed.

**Export duties**

There are no export duties other than on a limited list of restricted products at rates of 2% to 10% as follows:

- Natural rubber
- Uncut precious gemstones
- Processed wood
- Fish, crustaceans, mollusks and other aquatic products.

## OTHER TAXES

### Tax on property rental

House and land rental tax is set at 10% of gross rental income from the lease of buildings and land, when the lessor is an individual.

### Fiscal stamp tax

A fiscal stamp tax is due on advertising leaflets and banners, levied at different bands of rates, based on the dimensions of the advertising item, the number of letters and whether the lettering is Khmer only or includes a foreign language.

### Patent tax

Patent tax is a registration tax that is paid by all business enterprises upon establishment of a business and by 31 March on an annual basis thereafter. Patent tax ranges from KHR 400,000 to KHR 5,000,000 (approximately USD 100 to USD 1,250) depending on the taxpayer's classification, and must be paid for each separate business activity, and for each branch located in a different province.

### Registration tax

Also referred to as seal tax or stamp duty, registration tax is a tax imposed on the transfer of ownership or possession of certain types of property.

It is payable by the person who receives the ownership and is applied to the transfer value at rates as follows:

| Applied on | Tax rate |
|---|---|
| Transfer of ownership of all immovable property, including buildings and other structures, and land, which also includes the contribution of immovable property as capital in kind into a Cambodian company | 4% |
| Transfer of ownership of all means of transportation, including passenger vehicles | 4% |
| Transfer of ownership or possession of shares in a Cambodian company | 0.1% |
| Registration of "government contracts related to the supply of goods or services" | 0.1% |
| Certain legal documents | KHR 1 million |

There are certain exemptions and relief available on the transfer of immovable property between relatives.

The tax base used to calculate the registration tax on the transfer of immovable property is the value set by the Ministry of Economy and Finance for all cities and provinces in Cambodia.

### Unused land tax

Land is determined to be unused if it does not have any structure on it or there is a structure, but it is unused. Unused land tax is levied on an annual basis at a rate of 2% on the market value per square meter, with the market value determined by the Unused Land Valuation Commission. The unused land tax is paid annually by the landowner. Since the introduction of property tax, it was understood that ifproperty tax is paid on a piece of land, then unused land tax no longer applies. This was codified under Article 12 of the 2015 Law on Financial Management dated 18 December 2014.

### Accommodation tax

Accommodation tax ("AT") is an indirect tax imposed on the supply of accommodation services at a rate of 2%. AT must be charged by hotels, hotel apartments, motels, lodges, guesthouses, campgrounds and similar, but does not include the rental of houses or apartments.

### Public lighting tax

Public lighting tax ("PLT") is an indirect tax imposed on sales of alcohol and cigarettes at all stages of supply, on both imports and domestically-produced goods, at a rate of 3%. All types of cigarettes, including e-cigarettes, and alcohol are subject to PLT, including beer, grape wine and spirits, with the exception of palm wine. In late 2017, the method of calculating PLT was amended such that for importers and producers the tax base remains the selling price, but for distributors, the tax base was reduced to 20% of the selling price.

### Property tax

Property tax is a direct tax imposed on the value of immovable property, including land and buildings, on property valued above KHR 100 million (approximately USD 25,000) at a rate of 0.1%. The property value is as per the valuation issued by the Property Evaluation Commission.

Property taxpayers may be individuals or companies. Owners, possessors or "final beneficiaries" of immovable property may be liable for the property tax. A final beneficiary includes those with the right to use the property, and so includes long-term lessees.

### Capital gains tax

Effective 1 January 2022 and possibly subject to delay until 1 January 2024 pending announcement from the GDT, capital gains tax will be levied at a flat 20% rate on income from the sale or transfer of taxable capital, less allowed deductions. The tax applies to resident individuals and non-resident individuals and legal entities. Taxable capital includes:

- Immovable property, including land, buildings, and other constructions on land;
- Investment assets, including shares, bonds, and other securities issued by private companies;

- Lease agreements, including subleases;
- Goodwill, including licences, customer lists, and brand names;
- Intellectual property, including patents, literary and artistic works, logos, and pictures and drawings used for commercial purposes; and
- Foreign currency, including any currency other than KHR.

Regarding deductions, taxpayers are generally required to use the actual expense method to calculate the capital gain. However, with respect to immovable property, taxpayers may opt to use the actual expenses method or a determination-based deduction equal to 80% of income received without having to provide supporting documentation for expenses. Where a capital gain subject to tax is made, a prescribed return is required to be filed within three months, with payment.

**Administration**

| Type of tax | Filing and payment date |
|---|---|
| Tax on income | TOI must be paid and filed within 3 months of the end of the tax year, which is normally 31 December unless an application to amend the tax year is approved. |
| Prepayment of tax on income | PTOI must be paid and filed by the 20th of the following month or the 25th of the following month for e-filing. |
| Minimum tax | MT must be paid at the same time the annual TOI return is due, that is, 3 months after the end of the tax year. |
| Withholding tax | WHT must be paid to the GDT by the 20th of the following the month or the 25th of the following month for e-filing in which the payment is made or accrued. |
| Additional dividend distribution tax | ADDT must be paid and declared on the PTOI return, by the 20th of the following the month or the 25th of the following month for e-filing the dividend was paid out. |
| Value Added Tax | VAT is to be paid on the 20th of the following month or the 25th of the following month for e-filing for the VAT liabilities accrued during the previous month. VAT on imported goods is collected by the customs administration at the time of import. |
| Tax on salary | TOS and FBT are deducted by the employer and remitted to the GDT by the 20th of the month following the month that the salary and fringe benefits were provided to the employee. |
| Specific tax on certain merchandise and services | ST on domestic sales must be paid and declared on the PTOI return, by the 20th of the following month or the 25th of the following month for e-filing on the time of supply.<br>ST on imported goods is due at the time of import, and is collected by the customs administration along with VAT and customs duty. |
| Customs duty | Customs duty is collected by the customs administration at the time of import. |
| Patent tax | Patent tax is payable by 31st March each year. |
| Fiscal stamp tax | Signboard tax is payable by 31st March each year. |
| Registration tax | Registration tax is due within 3 months of the transfer |
| Unused land tax | Unused land tax is due on an annual basis by 30 September each year. |
| Accommodation tax | AT is declared in the PTOI return, due with payment by the 20th of the month following the time of supply. |
| Public lighting tax | PLT is declared in the PTOI return, due with payment by the 20th of the month following supply. |
| Property tax | Property tax is due on an annual basis by 30th September each year. |
| Capital gains tax | Capital gains tax is due when there is sale of property effective 1 January 2022 and may be delayed until 1 January 2024 pending announcement from the GDT. |

## B. DETERMINATION OF TAXABLE INCOME

### TAX DEPRECIATION

Under Cambodian tax law, depreciation rates and methods are specified based on the asset class, and therefore, only the depreciation expense allowed under the rate for the asset's particular class may be deducted in calculating taxable income.

| | Asset | Depreciation rate | Depreciation method |
|---|---|---|---|
| **Intangible assets** | Having no specific useful life | 10% | Straight Line |
| | Having a specific useful life | Over the useful life of the property | Straight Line |
| **Tangible assets** | Class 1: Buildings and basic components | 5% | Straight Line |
| | Class 2: Computers, electronic information systems, data handling | 50% | Declining Balance |
| | Class 3: Automobiles, trucks, office furniture and equipment | 25% | Declining Balance |
| | Class 4: All other tangible assets | 20% | Declining Balance |

## SPECIAL DEPRECIATION

A QIP is entitled to 40% special depreciation of assets in the first year of purchase or the first year the assets are used. Special depreciation only applies to assets used in 'manufacturing and processing' (not defined) and only if the taxpayer has elected not to use a tax holiday. A claw-back provision exists for assets held for less than four years.

## C. RELATED PARTY TRANSACTIONS

**Transfer pricing**

In October 2017 the Royal Government issued Prakas 986 concerning the allocation of income and expense between related parties. This Prakas (the "TP Prakas") is consistent with OECD guidelines, and requires that transactions between related parties should be at arm's length values, as determined under one of the five acceptable methods listed in the TP Prakas. The five acceptable methods are:

- Comparable Uncontrolled Price
- Resale Price Method
- Cost Plus Method
- Transactional Net Margin Method
- Profit Split Method.

The TP Prakas also requires that taxpayers having related party transactions have a transfer pricing report with the following content:

- Corporate Background – including a description of the company, the corporate and ownership structure, the nature of the business, and summary financial information;
- Business Analysis – including the competitive environment, the market and its trends, added value, and unique selling points;
- Overview of Related Party Transactions – describing the nature and volume of such transactions and the pricing method used;
- Functional Analysis – describing the activities performed by each party to the related party transactions;
- Economic Analysis – including a discussion and justification of the appropriate transfer pricing method, and an analysis of comparable prices for the related party transactions;
- Conclusion – including an identification of the acceptable range of "arm's length" prices.

Although not stated in the TP Prakas, the GDT has confirmed that the transfer pricing report must be available at the time the 2018 TOI return is filed.

## D. WITHHOLDING TAX

**Scope of withholding taxes**

Withholding Tax (WHT) needs to be withheld on certain payments (in cash or in kind) made by residents. In practice, only self-declaration regime taxpayers are required to withhold tax. The withheld tax constitutes a final tax.

The following types of payments are subject to withholding tax:

*Payments to residents:*

- Rental: 10%
- Services: 15% (except payments to a registered taxpayer supported by proper tax invoices)
- Royalties: 15%
- Interest: 15% (except payments to a bank in Cambodia)
- Interest on fixed-term deposits: 6% (for payments from a bank in Cambodia only)
- Interest on non-fixed term savings deposits: 4% (for payments from a bank in Cambodia only).

*Payments to non-residents:*

A resident taxpayer including permanent establishment making payment of Cambodian-sourced income to a non-resident is required to withhold 14% WHT. This withholding tax does not apply to payment of premium for reinsurance of property or other risks in Cambodia.

Withholding tax is due when the expense is paid. An expense is considered paid when it is recorded in the accounting records as an expense or when it is physically paid. Withholding tax must be remitted by the 20th day of the following month.

On 5 April 2019, the Ministry of Economy and Finance issued Prakas No. 372 to replace Prakas No. 518 MEF.BrK of 2017 on the guidelines for implementation of withholding tax on dividend distributions as stated in the new Articles 26 and 33 of the Law on Taxation. Notable points of the new Prakas:

1. The conversion of retained earnings to share capital is not considered a dividend distribution if the conversion is approved by the company's board of directors and the relevant competent authorities.
2. If a resident taxpayer has undistributed retained earnings, any reduction of share capital is considered a dividend distribution and subject to 14% withholding tax on the portion distributed to non-residents. The amount considered distributed dividends subject to withholding is capped at the amount of undistributed retained earnings of the company in the balance sheet.
3. If shareholders sell all or a portion of the shares of a resident company, the retained earnings attributable to the disposed shares are considered a dividend distribution at the time of the share disposal, regardless of whether the retained earnings were previously converted to share capital.

The retained earnings that are subject to withholding tax as noted above will not be subject to withholding tax again when the company distributes retained earnings as dividends to shareholders in future. Prakas No. 518 MEF.BrK is cancelled.

On 29 January 2020, The Ministry of Economy and Finance (MEF) has issued Prakas No. 098 MEF.Prk that became effective on 29 January 2020:

- Withholding Tax (WHT) exemption additionally includes the following transactions:
  - o Software payments to a VAT registered company for shrink-wrap software, site license, downloadable software, and software bundled with computer hardware, provided that a valid VAT invoice is obtained from the VAT registered company;
  - o Service payments for taxi, tuk tuk and motorcycle, worth less than KHR 50,000 (approximately USD 12.5);
  - o Rental payments to a VAT registered company, provided that a valid VAT invoice is obtained from the VAT registered company.
- Non-resident WHT
  - o Among other listed items classified as Cambodian source income, Prakas 098 also includes “gain from financial or investment assets or capital gains from sale of direct shares in a Cambodian enterprise” as Cambodian source income.
  - o The terms “management service” and “technical service”, with regards to Cambodian source income, have also been further defined as follows:
    - The term “management service” refers to all services, which are management in nature, performed to function in the management of business such as recruiting staff, training or managing sale agents; and
    - The term “technical service” refers to all services, which are technical in nature, required to have technical skill or knowledge in the development or creation of inputs in the business such as services in science, physics, medicine, dentistry, pharmacology, legal, hydraulics, physiology, art, education, engineering, architecture, research study, accounting, economy, welfare, nuclear power including consultation services, etc. The term “consultation service” refers to consultations by skilled or professional persons relating to the technical services.

**Deductibility of withholding taxes**

If a taxpayer fails to withhold taxes from suppliers or employees, the taxpayer is not allowed to gross up the base to calculate those taxes. Any withholding taxes borne by the taxpayer are not deductible for TOI purposes.

## E. PERSONAL TAX

Prior to 2020, there was no personal tax in Cambodia. Instead, a monthly salary tax was imposed on individuals who derive income from employment.

However, the Law on Financial Management (LoFM) provides that the progressive Tax on Income rates for physical persons and the monthly Tax on Salary rates for employees can now be set by the Ministry of Economy and Finance through a Sub-Decree giving the Ministry more flexibility with respect to how and when it sets these rates.

Sub-Decree No. 09 dated 13 February 2020 provides the tables of taxable thresholds for the Annual Progressive Tax on Income rates for physical persons as outlined below:

**Progressive Tax on Income rates for physical persons:**

| Annual taxable income (KHR) | Equivalent to USD | Tax rate |
|---|---|---|
| 0 – 16,000,000 | 0 – 4,000 | 0% |
| 16,000,001 – 24,000,000 | 4,000 – 6,000 | 5% |
| 24,000,001 – 102,000,000 | 6,000 – 25,500 | 10% |
| 102,000,001 – 150,000,000 | 25,500 – 37,500 | 15% |
| Over 150,000,000 | 37,500 | 20% |

It should be noted that while the income threshold is updated yet again, there is still no official mechanism or procedure for individual persons to declare their income for the annual ToI yet. We expect the MEF or the GDT to issue instructions on the procedure and forms for this sort of individual income tax when they are ready to implement it.

## TAX ON SALARY

**Overview**

Employers are liable to deduct Tax on Salary (“TOS”) from payments of salaries, wages, and other remuneration made to all employees. Employees that are tax residents of Cambodia are taxed on their worldwide employment income at progressive rates, whereas non-residents are taxed only on their Cambodian sourced employment income at a flat rate.

**Residency**

An individual is considered a resident for tax purposes if they fulfil any one of the following criteria: (i) their residence is in Cambodia; or (ii) their principal place of abode is in Cambodia; or (iii) they are present in Cambodia for more than 182 days in any period of 12 months ending in the current tax year.

**Taxable salary**

Salary as defined by the LOT includes “remunerations, wages, bonuses and overtime, compensations, and fringe benefits which are paid to an employee, or which are paid for the direct or indirect advantage of the employee for the fulfilment of employment activities” and is taxed at TOS rates.

Payments that are exempt from TOS include reimbursements of business expenses incurred by the employee on a work assignment, indemnity payments upon employee dismissal up to a limit, social security contributions, and uniforms and equipment required for the performance of employment duties.

**Deductions**

Deductions for dependent family members reduce the monthly taxable base on which TOS is calculated. A deduction of KHR 150,000 per month (approximately USD 37.50) may be deducted for each minor dependent child under 14, or under 25 and in full-time education, and a deduction for the same amount for one non-working spouse.

**Tax rates**

Non-residents are subject to TOS only on their salary income at a flat rate of 20%.

Residents are taxed at progressive rates effective February 2020 accordance to Sub-Decree No. 09 dated 13 February 2020 as follows:

| Taxable part of the monthly salary | | |
|---|---|---|
| **From – to (KHR)** | **Equivalent to USD** | **Tax rate** |
| 0 – 1,300,000 | 0 – 325 | 0% |
| 1,300,001 – 2,000,000 | 325 – 500 | 5% |
| 2,000,001 – 8,500,000 | 500 – 2,125 | 10% |
| 8,500,001 – 12,500,000 | 2,125 – 3,125 | 15% |
| Over 12,500,000 | 3,125 | 20% |

*Using an exchange rate of KHR4,000:US$1

## FRINGE BENEFITS TAX

Employers may also provide employees with additional cash or in-kind employee benefits, such as home leave air tickets or private use of motor vehicles. These fringe benefits are subject to a flat Fringe Benefit Tax ("FBT") of 20% on the market value of the fringe benefits provided to an employee.

The Ministry of Economy and Finance issued Circular No. 011 on 6 October 2016 which allows for certain benefits provided to all employees to be exempt from FBT. These include items such as meal allowances or transportation allowances.

Although the circular does not specify that this applies only to Cambodian employees, the practice thus far is that it does not apply to expatriate employees. In order to access this exemption, an employer must provide notification to the GDT.

## F. TREATY AND NON-TREATY WITHHOLDING TAX RATES

| | Dividends (%) | Interest[6] (%) | Royalties (%) | Technical fees (%) |
|---|---|---|---|---|
| **Domestic rates** | | | | |
| Companies | 14 | 14 | 14 | |
| Individuals | 14 | 14 | 14 | |
| **Treaty countries:** | | | | |
| Brunei[1] | 10 | 10 | 10 | 14 |
| China[1] | 10 | 10 | 10 | 10 |
| Hong Kong[3] | 10 | 0/10[7] | 10 | 10 |
| Malaysia[4] | 10 | 10 | 10 | 10 |
| Singapore[2] | 10 | 10 | 10 | 10 |
| Thailand[2] | 10 | 10/15[5] | 10 | 10 |
| Vietnam[3] | 10 | 10 | 10 | 10 |

Notes:

1. Effective date: 1 January 2019.
2. Effective date: 1 January 2018.
3. Effective date: 1 January 2020.
4. Effective date: 1 January 2021.
5. The 10% reduced rate applies if the interest is received by any financial institution (including an insurance company).
6. Certain treaties provide for an exemption for certain types of interest (not considered in this column), e.g. interest paid to the state, local authorities, the central bank, export credit institutions or in relation to sales on credit.
7. A 0% rate applies if the beneficial owner of the interest is the Hong Kong SAR Government, the Hong Kong Monetary Authority, the Exchange Fund, or a financial establishment appointed by the Hong Kong SAR Government and mutually agreed upon by the competent authorities of the contracting parties. For all other cases, a 10% rate applies.

## KEY TAX POINTS

- Cameroon operates a declarative tax system in which the taxpayer declares and pays monthly tax collections to the taxation authorities. False declarations are punishable by penalties and interest on late payments.
- In Cameroon, there are two types of income taxes:
  - o Income tax on individuals;
  - o Income tax on entities.
- There is a tax on turnover, borne by the final consumer known as the value added tax.

## A. TAXES PAYABLE

### COMPANY TAX

Income tax in Cameroon is imposed on undertakings deemed to be operating in Cameroon, which are the following:

- Undertakings headquartered in Cameroon or with an effective management office in Cameroon;
- Undertakings that have a permanent establishment in Cameroon;
- Undertakings that have a dependent representative in Cameroon.

The profits of undertakings that do not fulfil the conditions referred to above are taxed in Cameroon if they carry out activities that form a full business cycle in Cameroon.

**Tax rates**

The regular corporate income tax rate is 30% (plus a 10% additional council tax) but for medium-sized companies with a turnover of less than or equal to XAF 3 billion the rate of the income tax is reduced to 28% applicable as from 1 January 2021 (article 17bis PFL). For companies operating under the real earnings tax regime, the minimum tax payable is 2% (plus 10% additional council tax) of monthly gross sales (turnover). The minimum tax payable is higher for companies under the simplified tax regime (3.3% for non-importing traders, and 5.5% for producers, service providers and importation traders). The minimum tax is creditable against corporate tax due for the current financial year.

- The annual summary declaration of the income of non-professional persons must be made no later than 30 June at the tax centre of their place of residence. (or the declaration of the remaining professionals due by 15 March);
- Companies falling under the real scheme or belonging to an approved management centre which recruit a young person under 35 years of age as part of a first job are exempt from tax and employer charges on the salaries paid to these young people;
- Companies that precede the admission of their ordinary shares to the Central African Stock Exchange benefit from the application of a reduced corporate tax rate of 25% and reduced deposit rate of 1.5%. Companies that issue securities on the BVMAC bond markets benefit from a reduced CIT rate of 25%; companies that make a public offering and admit and exchange their equity and debt securities listed on BVMAC benefit from a reduced IS rate of 25%;
- Companies in the agricultural sector are exempt from VAT.

Innovative start-ups in the field of information and communication techniques:

- Tax exemption during the incubation period (5 years maximum);
- At the end of the incubation phase, exempt from the business licence, employer tax burden on wages, reduced IS rate of 15%, 50% allowance on the IS deposit (5 years);
- For more than 5 years: application of the common law tax regime.

Introduction of the obligation for investors to use raw materials produced in an economic disaster area in order to benefit from tax incentives granted for the rehabilitation of the said area. Introduction of a tax credit of 30% for enterprises that invest in the reconstruction of their production facilities in an economic disaster area. The tax credit is capped at XAF 100 million and chargeable to taxable income for the three years following the year of investment, by taxpayers approved by the tax authorities. (Finance Law 2019).

The 2018 Finance law enshrines the option, already provided by the 2017 Finance Law Circular, between the income tax instalment on turnover and that on the gross margin (article 21 of the CGTC). The tax rate on gross margin being 14% while the rates on turnover remain the same as above.

### CAPITAL GAINS TAX

Capital gains include gains on the sale of real estate, corporate shares and business assets.

With respect to the Finance law 2019, there is a reduction of the withholding tax due on capital gains earned on the disposal of real property from 10% to 5%. Also, interest on savings not exceeding XAF 50 million is exempt.

### BRANCH PROFITS TAX

Profits realised in Cameroon by branches of foreign companies are presumed to be distributed and are consequently subject to a branch withholding tax of 16.5% on after-tax income. This rate is subject to reduction by a double tax treaty.

## SPECIAL INCOME TAX (SIT)

Subject to the application of a double tax treaty, Special Income Tax (SIT) shall be applicable to remunerations paid by Cameroonian companies to foreign companies at the general rate of 15%, average rate of 10% and reduced rate of 3%:

- The general rate of 15% applies to remunerations paid abroad in respect of certain services provided and used in Cameroon;
- The average rate of 10% applies to remunerations for one-time supplies of services paid to non-resident companies having a PE in Cameroon that have waived the obligation to file a tax return;
- The reduced rate of 3% applies to remunerations for all types of services provided to oil companies during the research and development phase, to remunerations paid by maritime transport companies governed by Cameroonian law for the rental and chattering of ships, the rental of space on foreign ships and for commissions paid to port agents abroad, and commissions paid to money transfer agencies abroad after deduction of the share due local partners.

**Exemption from SIT**

Holders of petroleum contracts and their subcontractors shall be exempted from the Special Income Tax, in the research and development phase, with respect to remunerations for assistance, rental of equipment and material, and other services rendered to them in connection with oil operations by foreign providers.

Notwithstanding the provisions stated above, holders of petroleum contracts and their subcontractors in the research and development phase may opt for an abated rate of special income tax of 3% if they are not compliant with the required conditions (i.e. the contractors should offer their services at actual market prices and not have a PE in Cameroon).

## EXPORT TAX

- Exports are no longer zero-rated as before though certain essential goods are still exempt;
- Banana, industrial products manufactured in Cameroon, and domestic products of animal, plant or mineral origin produced or processed in Cameroon as finished products are exempt from export duty.
- Imposition of export duties at a rate of 2% on cash crops (cotton, rubber, palm oil, banana, beans and pineapple) previously excluded from this levy by the 2017 Finance law (now tax free);
- 1% Export duty on semi-finished products;
- Imposition of export duties at a rate of 10% on the following local products: Gum arabic, rice, palm oil, chilli, kola nut, millet, sorghum, pepper, vegetable (Gnetum Africanum / Eru Ekok);
- Taxation of timber exported in logs at a rate of 35% of the taxable value of each gasoline and no longer at a rate of 30% of the FOB value of each gasoline.
- There is an imposition on the exit duties of the worked and semi-worked timber of tariff headings 44.06, 44.07 and 44.09 at a rate of 10% of the FOB value of their volume;
- Also, an imposition of the import of arms on excise duties except for the one imposed by the general government as well as customs, software, licenses, royalties regardless of the means of entry into Cameroon.

There is however an abolition of customs duties at the reduced rate of 5% on imports of capital goods intended for investment.

## SALES TAX / VALUE ADDED TAX (VAT)

The effective standard VAT rate is 19.25% (a 17.25% VAT and 10% surcharge). All corporate businesses with taxable turnover are required to register. Non-resident VAT payers are required to appoint a solvent resident representative to be jointly responsible for the payment of VAT and the discharge of other VAT obligations.

E-commerce platform operators are henceforth required to collect VAT on their sales and pay on behalf of their suppliers.

VAT returns (and any tax payable) are due by the 15th of each month. Late payment incurs interest penalties at a rate of 1.5% per month up to a maximum of 50% of the principal liability. Fines are levied for various omissions in discharging VAT obligations. For taxable transactions of at least XAF 100,000, the right to deduction may be authorised only where they have been carried out through bank transfers.

There is a list of basic necessities that are exempted from VAT in the general tax code, also the following are exempted from VAT: real estate transactions of all kinds realised by non-professionals, consumption of water and electricity by households when these do not exceed 20 m³ per month for water and 220kw per month for electricity. Contracts and commissions on life insurance products with a savings component are also exempt from VAT.

It should be noted that only companies under the actual regime with a turnover equal to or above XAF 50 million are eligible for invoicing VAT in Cameroon.

- Production companies in the agriculture, livestock and fishing sectors benefit from tax advantages such as: exemption from VAT on the purchase of pesticides, fertilizers and inputs, as well as equipment and materials for agriculture, livestock and fishing;
- Material services that can be located in Cameroon are taxable in Cameroon at the general rate provided for in Article 142 of the CGJ regardless of the place of establishment of the lessee (article 130 para. 2 Finance Law);
- Intangible services are taxable at the place of establishment or residence of the policyholder (article 130 para. 3 Finance Law);
- Notwithstanding the provisions of para. 3 above, intangible services are taxable in Cameroon at the general rate provided for in article 142 of the CGJ, when the lessee is not subject to VAT (article 130 Finance Law).

## NOT-FOR-PROFIT ORGANISATIONS

Subject to the new finance law 2022, Not-for-Profit Organisations (NPO) shall be liable to:

- VAT at the rate of 19.25% on their acquisition of goods and services;
- Registration and stamp duties;
- Income tax at a preferential rate of 16.5% on the share of commercial activities carried out by the NPO. A monthly instalment of 1.1% on the turnover of commercial activities shall be paid to the tax centre under which they fall;
- The withholding taxes for which they are legally liable.

**Other obligations**

NPOs shall also be subject to the following:

- Monthly declaration of the taxes for which they are liable;
- Annual DSF declaration submitted in accordance with the OHADA accounting system by 15 March of each year;
- Production at the end of each fiscal year of a detailed statement of all amounts paid to third parties during the past fiscal year.

## LOCAL TAXES

No local taxes are payable in respect of income of companies.

## OTHER TAXES

**Business licence tax**

New enterprises shall be exempt from the payment of the business licence tax during the first year of operation. After this first year the enterprises shall be liable to a business licence tax. The business licence tax is paid annually and shall be calculated by applying a rate to the turnover of the previous financial year-ended as follows:

- 0.159% on the turnover of large companies (those under the jurisdiction of the large taxpayers unit), for a minimum contribution of XAF 5 million and a maximum contribution of XAF 2.5 billion.
- 0.283% on the turnover of medium-sized companies (those under the jurisdiction of the Medium Size Taxpayers Centre, Specialised Tax Centre, and Specialised Tax Centre for Liberal Professions and Real Estate), for a minimum contribution of XAF 141,500 and a maximum contribution of XAF 4.5 million.
- 0.494% on the turnover of small-sized companies (those under the jurisdiction of the divisional tax centres), for a minimum contribution of XAF 50,000 and a maximum contribution of XAF 140,000.

## FRINGE BENEFITS TAX (FBT)

Fringe benefits are considered to be a part of the salary paid to an employee: they are subject to social security and personal income taxes. Taxable fringe benefits are evaluated on the basis of their market value and there is a maximum amount that can be taxed.

## REGISTRATION DUTY

Registration duty on rent contract for commercial use is 10% of annual rent and 5% of annual rent when it is for residence use. Government Contracts are 4% of the contract amount.

## REAL ESTATE WITHHOLDING TAX

Withholding tax on rent is 15% of annual rent retained and paid by the tenant.

## B. DETERMINATION OF TAXABLE INCOME

General - Taxable income is based on financial statements prepared according to generally accepted accounting principles and the OHADA (Organisation for the Harmonization of Business Law in French-speaking Africa) standard statements.

Business expenses are generally deductible unless specifically excluded by law or by the provisions of an international convention. Expenses that are not deductible include the following:

- Head office overhead, research costs and technical, financial and administrative assistance fees paid to residents or non-residents that exceed any of the following:
  - 5% of taxable profits for ordinary law companies before their deduction;
  - 2.5% of turnover for public works projects;
  - 7.5% of turnover for design and engineering services.
- Royalties from patents, brands, models or designs paid to a non-CEMAC corporation participating directly or indirectly in the management of, or owning shares in, the Cameroonian corporation are deductible up to an overall limit of 2.5% of taxable income before the deduction of the expenses.
- Rent expense for movable equipment paid to a shareholder that manages the company in fact or by right and holds, directly or indirectly, more than 10% of the capital.
- Losses related to bad debts that do not comply with the enforcement measures provided for in the OHADA Uniform Act relating to the organization of simplified procedures for collection and enforcement.
- Liberalities, gifts and subsidies exceeding 0.5% of the turnover of research, philanthropic, development, educational, sports, scientific, social and family institutions or bodies.
- Gifts and subsidies exceeding 5% of turnover of clubs participating in official national competitions and the bodies in charge of organizing these competitions.
- Interest paid to shareholders in excess of the central bank annual rate plus two points. Under the 2014 Financial Law, the deductibility of interest paid to shareholders owning directly or indirectly at least 25% of the capital or voting rights of the company is subject to the following two cumulative conditions:
  - o Interest paid may not exceed one and one-half of the amount of real capital for all shareholders;
  - o Interest paid to such affiliates may not exceed 25% of the income before income tax and deduction of such interest and depreciation.
- Commissions and brokerage fees for services on behalf of companies located in Cameroon that exceed 5% of purchased imports and sales of exports.
- Remuneration granted to wage earners that are excessive in comparison to the services rendered and that do not correspond to effective work and conventional norms.

- Amounts set aside for self-insurance.
- Certain specific charges (such as contributions other than those for retirement paid to a foreign social security organization, which are deductible up to a limit of 15%, and premium insurance paid to companies located in Cameroon for employees' retirement indemnities), gifts, subsidies and penalties (to some extent).
- Expenses paid in cash of XAF 500,000 or more. The XAF 500,000 limit is assessed with respect to the total amount of specific expenses recorded in the expenditures account. Accordingly, splitting an expense worth XAF 500,000 into two equal parts of XAF 250,000 each and paying them in cash does not result in the deductibility of the expenses. Under the 2014 Financial Law, all reimbursements of loan advances to shareholders paid in cash are treated as dividends and are accordingly subject to dividend withholding tax.
- Expenses paid to local suppliers without reference to a Cameroonian tax identification number and without an invoice that complies with the standard requirements for the deductibility of expenses.
- Remuneration paid to liberal professionals in violation of the regulations governing their respective professions.
- Expenses for services and certain purchases paid to natural persons or non-resident legal entities established in territories or states considered to be tax havens.
- Disbursements from tax havens invoiced to local companies by other companies located in or outside tax havens.
- Losses resulting from irregularities, misappropriation or fraud within an enterprise where the irregularities, misappropriation or fraud is directly or indirectly attributable to the directors, shareholders or partners.

## CAPITAL ALLOWANCES

Land and intangible assets, such as goodwill, are not depreciable for tax purposes. Other fixed assets may be depreciated using the straight-line method at rates specified by the tax law. Small equipment and other items that have a value not exceeding XAF 500,000 without tax are directly accounted for as charges and considered deductible expenses.

## DEPRECIATION

The Cameroon General Tax code specifies allowable depreciation rates: any deviation is disallowed for tax purposes.

## STOCK / INVENTORY

Inventory is normally valued at the acquisition cost or at the lower of cost or market value. Cost must be determined on a weighted average cost-price method. The first-in, first-out (FIFO) method is also generally acceptable.

## CAPITAL GAINS AND LOSSES

Capital gains are taxed at a rate of 16.5%, subject to tax treaties. Capital gains realised in Cameroon or abroad from the direct or indirect transfer of stocks, bonds and other capital shares of enterprises located in Cameroon are subject to tax. If the business is totally or partially transferred or discontinued (such as in the event of a merger, liquidation or sale of the business), only ½ of the net capital gain is taxed if the event occurs less than five years after the start-up or purchase of the business, and only ⅓ of the gain is taxed if the event occurs five years or more after the business has begun or been purchased.

Capital gains realised on the Cameroon stock market are exempt from corporate income tax and the tax on movable capital. However, under the 2014 Finance Law, capital gains realised in Cameroon or abroad that are derived from the sale of shares by an individual or corporate entity holding an exploitation or exploration permit for natural resources extracted from the Cameroonian subsoil are subject to income tax on the gains.

## DIVIDENDS

Dividends paid to residents in Cameroon are subject to a 16.5% withholding tax (15% plus the 10% council surtax). Resident recipients must include the gross dividend in taxable income, but they receive a corresponding 16.5% tax credit to prevent double taxation. Dividends paid to non-residents are subject to a 16.5% withholding tax, which is a final tax.

A parent corporation may exclude up to 90% of the dividends received from a 25%-owned subsidiary if the parent company and the subsidiary have their registered office in a Central African Economic and Monetary Community (CEMAC) country (Cameroon, Central African Republic, Chad, Congo, Equatorial Guinea and Gabon). In this case, however, no withholding tax credit is allowed. Instead, the tax can be offset against any withholding tax due on its own dividend distributions.

## INTEREST DEDUCTIONS

Interest paid to shareholders in excess of the central bank annual rate plus two points. Under the 2014 Financial Law, the deductibility of interest paid to shareholders owning directly or indirectly at least 25% of the capital or voting rights of the company is subject to the following two cumulative conditions:

- Interest paid may not exceed one and one-half of the amount of real capital for all shareholders.
- Interest paid to such affiliates may not exceed 25% of the income before income tax and deduction of such interest and depreciation.

## LOSSES

Losses may be carried forward for four years. Losses attributable to depreciation may be carried forward indefinitely. Losses may not be carried back.

## FOREIGN SOURCED INCOME

Generally, foreign tax credits are not allowed. Foreign-source income is taxable after deduction of any related foreign tax. Bilateral relief is provided under Cameroonian double tax treaties. Non-resident legal entities are taxable only on their Cameroon-sourced income.

## TAX INCENTIVES

The law of 18 April 2013 introduced investment incentives, which are summarized below.

**Installation phase:**

Incentives that are available during the installation phase (five years after the issuance of the approval) include exemption from registration duties, transfer duties, customs duties and VAT for certain items.

**Operational phase:**

Incentives available during the operational phase (10 years for all companies qualifying for the incentives) include exemptions or reductions with respect to minimum tax, corporate tax, customs duties on certain items and other specified taxes and fees.

In the first year of operation, the company is exempt from the tax on the business license. In addition, companies may carry forward losses to the fifth year following the year in which the losses are incurred.

## C. FOREIGN TAX RELIEF

In general, foreign tax credits are not allowed; income of residents and non-residents subject to foreign tax that is not exempt from Cameroonian tax under the territoriality principle is taxable, net of the foreign tax.

The French tax treaty, however, provides a tax credit that corresponds to withholding tax on passive income.

## D. CORPORATE GROUPS

The Cameroon tax code does not provide for taxation of local group companies: each company is evaluated and taxed independently.

## E. RELATED PARTY TRANSACTIONS

In 2012, Article M19bis in Book II of the General Tax Code on Manual of Tax Procedures was introduced to increase the regulation and control of transfer pricing. Under the new rules, if in the course of an accounts audit, the administration has evidence that a company has indirectly transferred profit, it may request that the company provides information and documents with respect to certain items, including the following:

- Relationships between the company and one or more companies or groups established outside Cameroon.
- The pricing method for industrial, commercial or financial operations in which the company engages with the related parties mentioned in the first bullet and justification for this method and the agreed consideration in these operations.
- The activities carried out by the related parties mentioned in the first bullet.
- The tax treatment for the company and related parties mentioned in the first bullet with respect to the operations performed with the related parties.

The 2014 Finance Law requires *"a detailed statement of transactions with companies which control or which are controlled by them up to 25%, in addition to other existing disclosure and documentation requirements."* Companies in the large taxpayer unit must transmit the following information to the tax authorities by 15 March of each year at the same time as the filing of the annual tax return:

- A statement of their shareholdings in other companies if the holdings exceed 25% of the share capital;
- A detailed statement of intergroup transactions.
- TP documentation as per the 2018 Finance law.

Non-compliance with the above deadline after formal notice or the communication of false information or incomplete information exposes the taxpayer to penalties provided for in Article L104 of the CGTC, i.e. the application of a fixed fine that may go up to 50 million FCFA.

The Finance Act for the 2018 financial year strengthens the mechanism to combat indirect transfers of profits by extending the notion of transfer pricing to transactions with unrelated companies established in tax havens. A tax haven within the meaning of Article 8ter of the CGTC is considered to be a State or territory whose income tax rate is less than one-third of that practiced in Cameroon, or considered as non-cooperative in terms of transparency and exchange of information for tax purposes by the international financial institutions or the tax affairs committee of the OECD or the Economic and Social Committee of the European Union. Non-cooperative jurisdiction means any state or territory whose laws and practices are found to be in non-compliance with the transparency and exchange of information standards for tax purposes established by the OECD.

## F. WITHHOLDING TAX

| Description | Rate (%) |
|---|---|
| Dividends | 16.5 (a) |
| Interest | 0/16.5 (b) |
| Rents | 15 |
| Royalties from Patents, Know-how, etc. | 15 |
| Fees for Technical Services, Digital Services and Professional Activities | 15 (c) |
| Specific Payments to Resident Individuals or Companies | 5.5 (d) |
| Branch Remittance Tax | 16.5 |

a) This withholding tax also applies to directors' fees, non-deductible expenses and adjustments of profits following a tax audit. The withholding tax also applies to allowances granted to members of commissions, ad hoc or permanent committees and to members of public, semi-public, regional or local bodies and apply as well to residents and non-residents.

b) Interest on savings of up to XAF 10 million is exempt from withholding tax. Interest on state bonds is exempt from corporate income tax and the tax on movable capital (this tax is withheld at a rate of 16.5% from income on shares and negotiable bonds and from certain other income). The 2014 Finance Law confirms that interest on loans paid to non-resident lenders or creditors is exempt from withholding tax. Special income tax applies to all types of deliveries that are part of public contracts or orders and that are paid for by state, regional or local authorities, public institutions, public corporations or semi-public companies, or that are paid for through external financing. The rate is 15%, which is withheld at source.

c) This withholding tax applies to non-residents. The 2012 Finance Law provides that this tax also applies to "software," which is defined as computer applications and programs relating to the operation or functioning of an enterprise.

d) This withholding tax applies to fees, commissions, emoluments and remuneration for services that are paid to resident individuals or companies. These payments include the following:

- Payments made to persons in the self-employed professions, such as consultants, experts, architects, physicians, auditors in charge of damages, trade intermediaries and salesmen;
- Payments made to magistrates and representatives of the law (attorneys, bailiffs and notaries);
- Payments made to forwarding agents, customs brokers, stevedores, accounting firms and internet service providers.

The withholding tax does not apply to payments made for services related to transport, bank interest, insurance premiums and commissions, air ticket expenses and commissions, and water, electricity and telephone expenses. The 10% surtax applies to the withholding tax rate of 5%, resulting in a total withholding tax rate of 5.5%.

e) Withholding tax on purchases

The following companies shall be subject to advance payment:

- Imports by traders, including those under the flat-rate tax;
- Purchases made by traders from manufacturers, farmers, importers, wholesalers, semi wholesalers, forest exploiters;
- The purchase of oil products by service station operators and commodities by exporters;
- The operations carried out by enterprises without a taxpayer's card.

The advance payment rate shall be fixed at:

- 14% on the gross margin for the purchase of goods with regulated prices;
- 10% of the amount of transactions, for taxpayers not registered with a taxation centre and for taxpayers subject to the flat rate tax;
- 5% of the amount of transactions carried out, for traders subject to the simplified tax system and for taxpayers subject to discharge tax;
- 2% of the amount of transactions, for traders subject to the actual earnings tax system.

## G. EXCHANGE CONTROL

All transfers of funds outside the CEMAC, including loans obtained by resident companies abroad and the solicitation of foreign securities in the CEMAC Zone must be declared and are subject to special control measures for statistical purposes. Transfers of amounts in excess of XAF 5 million must be lodged with an authorised intermediary (i.e. a bank authorised by the Central Bank). Documentation must be submitted to the authorities for currency transfers in settlement of imports in excess of XAF 100 million. Expatriate employees may apply for authorisation to repatriate their net earnings on a regular basis. Any savings accumulated by expatriates may be repatriated upon departure from Cameroon. All foreign direct investment exceeding XAF 100 million is subject to prior notification to the Ministry of Finance and a post notification after realisation.

## H. PERSONAL TAX

| Income tax rates for individuals (XAF) | | |
|---|---|---|
| **Taxable income** | | **Rate** |
| Up to | 2,000,000 | 10% |
| 2,000,001 | 3,000,000 | 15% |
| 3,000,001 | 5,000,000 | 25% |
| Over | 5,000,000 | 35% |

Progressive rates are imposed from 10% to 35%. A surcharge of 10% of the principal tax is also levied on the rates (for additional council tax).

## I. TREATY AND NON-TREATY WITHHOLDING TAX RATES

| | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| **Domestic rates** | | | |
| Companies | 11/16.5 | 0/5.5/11/16.5 | 5/10/15 |
| Individuals | 16.5 | 0/16.5 | 15 |
| **Treaty countries:**[8] | | | |
| Canada | 10/12/20[1] | 10/20[2] | 10/20[3] |
| Central African Republic | --[5] | --[5] | --[6] |
| Chad | --[5] | --[5] | --[6] |
| Congo | --[5] | --[5] | --[6] |
| Equatorial Guinea | --[5] | --[5] | --[6] |
| France | 15 | 15 | 7.5/15[7] |
| Gabon | --[5] | --[5] | --[6] |
| South Africa | 10/15[4] | 10 | 10 |
| Tunisia | 12 | 15 | 15 |

Notes:
1. The rate for dividends under the treaty is 20%. However, by virtue of a most favoured nation clause (under the Cameroon-South Africa and Cameroon-Tunisia treaty the qualifying dividend and general rates are 10% and 12% respectively) the rate is reduced to 10% if the beneficial owner is a company which holds at least 25% of the capital of the company paying the dividends and 12% in all other cases.
2. The rate for interest under the treaty is 20%. However, by virtue of a most favoured nation clause (under the Cameroon-South Africa treaty the rate is 10%) the rate is reduced to 10%.
3. The rate for royalties under the treaty is 20%. However, by virtue of a most favoured nation clause (under the Cameroon-South Africa treaty the rate is 10%) the rate is reduced to 10%.
4. The 10% reduced rate applies if the beneficial owner is a company which holds at least 25% of the capital of the dividend-paying company.
5. No limitation under the treaty. The domestic WHT rate is applicable.
6. No WHT is imposed if the income is subject to tax in the state of the recipient.
7. The 7.5% rate applies to payments for studies, technical, financial or accounting assistance. The 15% rate applies to other royalties.
8. Next to Cameroon, the CEMAC tax treaty was signed by the Central African Republic, Chad, Congo (Rep.), Equatorial Guinea and Gabon.

## KEY TAX POINTS

- Companies pay federal, provincial, and municipal taxes. The combined federal and provincial or territorial corporate tax rates vary depending upon the province or territory where a corporation conducts business and the nature of its operations.
- There is a 25% branch tax on non-resident companies carrying on business in Canada, payable on notional distributions of branch profits to the foreign head office. The rate of tax is subject to reduction when there is a tax treaty between Canada and the corporation's country of residence.
- The federal government imposes a Goods and Services Tax (GST) of 5% on a wide range of goods and services. (5% GST in Alberta, British Columbia, Manitoba, Northwest Territories, Nunavut, Quebec, Saskatchewan, and Yukon.) Exemptions are provided for basic foods, health care and education. Also zero-rated goods and services are taxable at a 0% rate. However, in some provinces or territories the HST (harmonised sales tax) rate is 13%. In Brunswick, Newfoundland and Labrador, Nova Scotia, and Prince Edward Island, the HST rate is 15%.
- No provision is made for filing consolidated tax returns for corporate groups. However, loss utilisation among members of a corporate group is often implemented by amalgamation or merger of group members.
- Non-resident withholding tax applies to many types of income paid or credited to non-residents including dividends, interest, royalties, pension payments and rents. The statutory rate of withholding is 25% but this may be reduced or eliminated by treaty provisions.
- Canadian Residents are subject to tax on their worldwide income. Non-residents are subject to tax in Canada on Canadian-sourced employment income and business income only. However, if Canada and the country of residence of the taxpayer have concluded a tax treaty, then the tax rate might be reduced; 50% of the capital gain from the disposal of certain Canadian assets and 100% of the capital gain on disposal of certain property such as resource property or certain life insurance policies.

## A. TAXES PAYABLE

### FEDERAL TAXES AND LEVIES

Legal entities subject to corporate income tax include the following:

- all corporate residents in Canada; and
- non-resident corporations, but only to the extent of income from certain Canadian sources.

The corporate income tax rate depends on the type of income earned, the status of the corporation, and the Canadian province or territory in which the income is earned. The general federal tax rate on corporations is 38%. A 10% rebate applies to the extent the income has been earned in a Canadian province, bringing the federal rate down to 28%. The tax rate on corporate income that is earned in a Canadian province and that does not currently benefit from a preferential tax treatment is further reduced by a general rate reduction of 13. This makes the general rate 15%. Various types of corporate income currently benefit from a preferential treatment and do therefore not qualify for the reduced rate, including Canadian manufacturing and processing income, investment income earned by a Canadian-controlled private corporation (“CCPC”), income from non-renewable natural resource activities and income earned by mutual fund corporations, mortgage investment corporations and investment corporations.

A non-resident company is subject to a 25% branch profits tax on taxable income earned in Canada (after deduction of federal and provincial income tax and after deduction of an allowance for investments in certain types of Canadian property), which may be reduced under a double tax treaty.

The appropriate provincial income tax rate is added to the federal rate (general or reduced) to get the effective combined tax rate. The rates of provincial income tax vary. The following are the combined general federal and provincial tax rates effective 1 January 2022:

| | A | B | C | D | E | F |
|---|---|---|---|---|---|---|
| **Province** | **General rate (%)** | **General reduced rate (%)** | **General Rate Reduction (A-B)** | **General Rate or M&P reduction** | **Manufacturing & Processing M&P rate (%) (15% + D)** | **CCPC active rate (%)** |
| Alberta | 38 | 25 | 13 | 8 | 23 | 11 |
| British Columbia | 40 | 27 | 13 | 12 | 27 | 11 |
| New Brunswick | 42 | 29 | 13 | 14 | 29 | 11.5 |
| Manitoba | 40 | 27 | 13 | 12 | 27 | 9 |
| Northwest Territories | 39.5 | 26.5 | 13 | 11.5 | 26.5 | 11 |
| Newfoundland | 43 | 30 | 13 | 15 | 30 | 12 |
| Nunavut | 40 | 27 | 13 | 12 | 27 | 12 |
| Nova Scotia | 42 | 29 | 13 | 14 | 29 | 11.5 |
| Prince Edward Island | 44 | 31 | 13 | 16 | 31 | 11 |
| Saskatchewan | 40 | 27 | 13 | 10 | 25 | 11 |
| Quebec | 39.5 | 26.5 | 13 | 11.5 | 26.5 | 13 |
| Yukon Territory | 40 | 27 | 13 | 12 | 17.5 | 11 |
| Ontario | 39.5 | 26.5 | 13 | 10 | 25 | 12.2 |

Notes:

- Alberta changed its rate to 8% effective 1 January 2020;
- British Columbia changed its rate to 12% effective 1 January 2018;
- Nova Scotia changed its rate to 12% effective 1 April 2020.

Corporate income taxes exceeding the CAD 3,000 threshold are payable in monthly instalments with the balance due by the end of each month during the tax year or quarterly for some eligible CCPC corporations. Returns must be filed no later than six months after year-end, with no extensions available. For CCPCs that have claimed small business deduction from the previous or current year, the deadline for the tax return filing is three months from the end of the taxable year.

Non-resident corporations, with or without tax liability, need to adhere to the same deadline, which is subject to penalties for failure to meet it.

Generally, a refund will not be issued if the income tax return has not been filed within three years of the end of the year (four years for a Quebec income tax return filed by a non-CCPC).

## INVESTMENT TAX CREDITS (ITC)

Qualified expenditures in respect of scientific research and experimental development (SR&ED) in Canada qualify for a 15% federal ITC. Certain qualifying CCPCs are entitled to a 35% federal ITC on SR&ED up to specified maximums.

The ITCs may be used to offset federal income taxes payable in the current year, the preceding three years, or the 20 succeeding years. CCPCs may qualify to receive a cash refund when ITCs claimed exceed tax payable for the year. Nine provinces (all but Prince Edward Island) and the territories offer provincial or territorial tax credits as an incentive for conducting qualifying SR&ED activities in their jurisdiction. The amount of federal ITC claimed is included in taxable income in the year following the claim. Provincial credits are generally included in taxable income in the year of entitlement.

The acquisition of qualified property for use in Atlantic Canada, the Gaspé Peninsula or prescribed offshore regions (other than qualified resource property) may qualify for a federal ITC of 10%. Qualified property encompasses a wide range of assets related to manufacturing and processing operations as well as assets used in specific industries such as farming, fishing, and logging, as well as in storing grain, harvesting peat, new energy generation and electrical energy processes. The acquisition of qualified resource property used mainly in Atlantic Canada, the Gaspé Peninsula or prescribed offshore regions and used primarily for oil and gas, and mining activities, if acquired after 28 March 2012, and before 1 January 2016 may qualify for a 10% federal ITC.

In 2016, a transitional relief rate applied for certain qualified resource property. This credit is eliminated for assets acquired after 2015. The federal ITC on certain pre-production mining exploration and development expenditures was eliminated for amounts incurred after 2015.

The regional opportunity investment tax credit is a 10% refundable tax credit available to CCPCs that make qualifying investments in eligible geographic areas of Ontario. Eligible properties are those capital properties classified under capital cost allowance class 1 or class 6. Expenditures will include construction or renovating expenses. The tax credit is eligible for expenditures of more than CAD 50,000 and up to CAD 500,000 in a year for investments that became available for use on or after 25 March 2020. This tax credit has temporarily been doubled for the years 2021-2023.

## BRANCH PROFITS TAX

The federal government imposes a branch tax on profits under Part XIV of the Income tax Act of 25% on non-resident corporations carrying on business in Canada. The tax is payable on notional distributions of branch profits to the foreign head office. A tax treaty may reduce the rate of tax and may provide a cumulative exemption amount (e.g., the first CAD 500,000 of income is tax-exempt under Article X (6) of the Canada-US tax treaty).

## GOODS AND SERVICES TAX (GST)

The federal government imposes a goods and services tax (GST) of 5% on a wide range of goods and services. Exemptions are provided for basic foods, health care and education. All businesses providing taxable services or selling taxable goods of more than CAD 30,000 in a single calendar quarter or in the last four consecutive calendar quarters must register for and collect the GST. The GST rate must be applied on all taxable items or services provided by a GST registrant. GST paid on purchases made by a registrant is credited against its GST collections on its GST return. A net credit is refunded.

Except for the three territories and Alberta, all provinces impose a provincial sales tax on a wide variety of goods. The application of sales tax to services will vary depending on the province. General provincial sales tax rates vary from 6% to 10% as described below. The federal government and the provinces of Newfoundland, New Brunswick, Nova Scotia, Prince Edward Island, and Ontario are parties to a sales tax harmonisation agreement. Under the harmonised sales tax (HST) agreement, the participating provinces have ceased to collect provincial sales tax. In its place, the federal government collects HST under the GST rules. The HST is 13% in Ontario and 15% in Newfoundland, Nova Scotia, New Brunswick and in Prince Edward Island. New Brunswick and Newfoundland HST increased from 13% to 15% effective 1 July 2016.

British Columbia, Saskatchewan, Manitoba, and Quebec are not harmonized with the Federal government and have their own Provincial Sales Tax regimes (and independently collect their own Provincial Sales taxes). The rates of Provincial Sales Tax for these provinces are as follows: British Columbia (7%-discussed below), Saskatchewan (6%), Manitoba (7%) and Quebec (9.975% discussed below). In July 2019 the PST rate in Manitoba was reduced from 8% to 7%.

British Columbia was party to the sales tax harmonization agreement, but as a result of a British Columbia referendum in 2011, British Columbia removed the HST and reinstated the former 7% British Columbia provincial sales tax (PST) and 5% GST effective 1 April 2013. In Quebec, the GST and Quebec sales tax (QST) systems are essentially harmonised and administered by Quebec. As of 1 January 2013, QST was increased to 9.975% but was levied on the price before GST. Therefore, the effective rate will remain unchanged at 14.975% (GST of 5% and Quebec sales tax of 9.975%).

## FRINGE BENEFITS TAX (FBT)

The Northwest Territories and the provinces of Newfoundland, Quebec, Ontario, and Manitoba levy a tax on payroll costs to support provincial health care and other programs. Rates and exemptions vary from province to province. The territory of Nunavut levies a payroll tax on high income employees.

The federal government does not impose FBT on employers but requires employer (and employee) contributions to Employment Insurance (EI) and the Canada Pension Plan (CPP) based on payroll costs. Employers are required to remit EI, CPP and income tax with respect to their employees who are in regular and continuous employment in Canada, regardless of whether the employees (or employer) are resident in Canada. This can be reduced by a social security agreement between Canada and the home country. Certain fringe benefits are taxable to employees and are required to be reported on their personal income tax returns.

However, the Quebec government is managing its own provincial income tax, Quebec Pension Plan (QPP), and Quebec Parental Insurance Plan (QPIP). EI for Quebec has increased from 1.18% to 1.2% effective 1 January 2022.

## LOCAL TAXES

Provincial, territorial and municipal governments impose various taxes that need to be confirmed in each situation. These taxes include real property taxes, real property transfer taxes, carbon taxes, business licences and several industry-specific taxes such as mining and petroleum resource taxes, logging tax and hotel tax.

**COVID Pandemic subsidies**

The Canada Emergency Wage Subsidy (“CEWS”), which was introduced in April 2020 in response to the pandemic, provides for a subsidy to qualifying employers for wages paid to employees, depending on the extent of an employer’s revenue reduction. A similar response of Canada Emergency Rent Subsidy (“CERS”) was introduced in December 2020 to help eligible businesses to claim a subsidy of up to 65% of eligible rent expenses. These payments are taxable and qualifying claimants must include them in their taxable business income immediately before the end of the related claim period.

In order to allow more organisations to benefit from the proposed programmes, the federal government has decreased the requirement of revenue loss from 40% to 25%. In addition, the benefit programme expands its reach by letting more companies take part in which capacity and revenue was impacted by public health order. These changes are applied to the qualifying period from 19 December 2021 to 12 February 2022. As for personal benefits, the government reduced restrictions and expanded the capacity of workers.

On 23 October 2021, CEWS and CERS was replaced by the Canada Recovery Sickness Benefit (CRSB) and Canada Recovery Caregiving Benefit (CRCB). CRSB is a programme for employers who are unable to carry on their business for at least 50% of the week or those needing self-isolation due to COVID-19. CRCB is also a program for workers who need to take care of their children or family members under 12 years old due to unavailability of day-care premises during the Covid-19 lockdown. All these programme benefits are available until 7 May 2022.

Furthermore, each province announced additional grants and tax subsidies to stimulate the economy during the pandemic downturn. The Alberta government pays attention to its tourism industry by introducing a policy called revenue-tested tourism levy abatement. It aims to help accommodation providers with a reduced tourism levy for 6 weeks. In British Columbia, the provincial government provides business grants from CAD 1,000 to CAD 10,000 depending on their business scale.

In Manitoba, a program called Sector Support Programme was provided to business owners. They can apply through different grant levels based on the number of employees in a corporation.

Nova Scotia provided business grants based on their gross payroll cost in November 2021.

Ontario has adopted a different approach. Ontario Business Costs Rebate provides rebate, in property tax and energy, to those businesses that meet the 50% reduced capacity requirement caused by the Omicron variant. The Ontario government also supports businesses by providing a six-month interest- and penalty-free period for provincial tax, which started on 1 January 2022 and ends on 1 July 2022.

The Quebec government helps businesses by providing various type of loans, e.g. Assistance for Businesses in Regions on Maximum Alert (“AERAM”) is part of the emergency Assistance to Small and Medium-Sized Enterprises (“PAUPME”) programme, which can help businesses to obtain loan forgiveness and get money to pay fixed costs. In addition, the period of interest was also extended to 31 March 2022.

### OTHER TAXES

The federal government also imposes certain industry-specific taxes in addition to customs and excise duties. The federal large corporations tax, which was a minimum tax based on capital, was repealed effective 1 January 2006, there are no provincial capital taxes for general businesses. The federal government and several provinces still have capital taxes that apply to certain types of financial institutions and life insurance corporations. For corporations with a permanent establishment in Ontario, Ontario imposes a corporate minimum tax on corporations with total assets or gross revenues above certain threshold amounts in certain circumstances. The corporate minimum tax rate is 2.7%, which applies to large corporations with total assets equal to or more than CAD 50 million and total revenue equal to or more than CAD 100 million.

## B. DETERMINATION OF TAXABLE INCOME

The taxable income of a corporation is determined by using the accrual method of accounting. Certain professional, agricultural, or fishing businesses are permitted to follow a cash or modified cash method of accounting. For a corporation resident in Canada, taxable income is based on its worldwide income less allowable deductions. For a non-resident corporation, taxable income earned in Canada is essentially defined to include:

- Income from carrying on business in Canada;
- 50% of capital gains from the disposition of certain specified Canadian assets or specified foreign assets with significant values attributable to underlying specified Canadian assets included in the definition of ‘taxable Canadian property’;
- Income from the disposition of resource property and certain other assets included in the definition of ‘taxable Canadian property’;
- Income from the disposition of certain other assets with a connection to Canada included in the definition of ‘taxable Canadian property’; and
- Recaptured Canadian tax depreciation.

The scope of the definition of ‘taxable Canadian property’ was significantly narrowed effective 4 March 2010 in order to exclude shares of corporations and other interests (such as an interest in certain partnerships and trusts) that have not derived their fair market value principally from real property situated in Canada, Canadian resource property or timber resource property, at any time within the 60 months immediately preceding the disposition. A treaty may limit Canada’s ability to tax a non-resident on the various components of taxable income earned in Canada listed above.

### DEPRECIATION

Canada has a complex system of determining the depreciation or amortization for tax purposes with respect to capital assets. Depreciable property is subject to several regulations that specify the amount that may be written off in any particular year. One is called Capital Cost Allowance (CCA). When a depreciable property is acquired, its full cost cannot be deducted in the year it is acquired; its capital cost can be deducted over several years. Depreciable properties need to be classified into a CCA class and CCA is to be claimed based on the class rate.

There are also several detailed restrictions that have the effect of limiting write-offs for depreciable property. Expenditures for exploration, development and maintenance of resource properties are subject to rules that categorise the expenditures and specify the amounts which may be deducted in a year. Qualifying Canadian exploration costs may be deducted at 100% against any type of income if desired.

Canadian development expenses can be deducted at a rate of 30% per year. Other expenditures are subject to less generous deductions. Capital assets used for SR&ED are subject to regular tax depreciation rules rather than a 100% deduction if they were acquired after 2013.

### INVENTORY

Inventory must be valued at the lower of cost or fair market value unless the taxpayer elects to value all inventory at fair market value. Special rules apply for the valuation of animals and certain derivatives. For those properties used as nature of trade, it must be valued at its acquisition cost.

### CAPITAL GAINS AND LOSSES

Taxable capital gains are included in taxable income and taxed at normal rates. A capital gain is essentially the proceeds of disposition for a capital property less the aggregate of the cost of the property and costs of disposition. However, only 50% of the gain is taxable. Capital gains from the sale of property are also eligible for lifetime capital gain deduction (limited to CAD 892.218

in 2021). Capital losses may only be used to offset capital gains but may be carried back three years and forward indefinitely, subject to change of control rules (discussed under the 'Losses" heading below). As noted above, under 'Determination of Taxable Income', non-residents are only taxed on certain specified capital gains.

### DIVIDENDS

Dividends received by a private Canadian corporation from another resident corporation are subject to a refundable tax of 38.33% of the amounts received. In the event that the recipient corporation holds more than 10% of the payer-corporation (measured by votes and value), refundable taxes payable are based on the amount of tax refunded to the payer-corporation as a result of the dividend.

Dividends received by most public corporations from another Canadian corporation are effectively excluded from income. Dividends received from non-resident corporations are subject to tax unless received from a subsidiary out of its active business profits from a designated treaty country (a country with which Canada has entered into a comprehensive agreement or convention for the elimination of double taxation on income, or a comprehensive tax information exchange agreement).

Other dividends from foreign affiliates are netted against a grossed-up adjustment for the underlying foreign affiliate tax and withholding tax. Portfolio dividends from foreign corporations are included in taxable income, but the Canadian-resident recipient is entitled to a foreign tax credit for the foreign withholding tax.

### INTEREST DEDUCTIONS

Interest paid on funds borrowed to finance business operations or the acquisition of income-producing assets is generally fully deductible. In certain cases, interest payable relating to the acquisition of bare land is only deductible to the extent the land generates net income. The deductibility of interest incurred during the construction of real property is also restricted. Interest payable on funds borrowed to pay dividends is deductible if the corporation has taxed retained earnings at least equal to the amount of the dividend.

Statutory 'thin capitalisation' rules restrict the deductibility of interest paid to a non-resident shareholder or group that owns 25% or more of the shares of a Canadian corporation. Essentially, these rules prevent the deduction of interest paid to said non-residents (or non-residents not dealing at arm's length with them) where the ratio of outstanding debt to shareholders' equity exceeds 1.5-to-1 for the taxation years after 2012. A ratio of 2-to-1 applies for taxation years that begun prior to 2013. The equity is measured by taking the aggregate of the retained earnings at the beginning of the year and the average paid-up capital of shares owned by certain non-resident shareholders and related contributed surplus computed on a monthly-average basis. Effective 29 March 2012, the disallowed interest will be treated as a deemed dividend paid to the non-resident and will be subject to withholding tax of 25%, unless reduced by a treaty. If a debtor's outstanding liabilities to related non-residents exceeds 1.5 times, the interest deduction will be limited.

For taxation years beginning on or after 29 March 2012, the thin capitalisation rules apply to partnerships that have a Canadian-resident corporation partner and for taxation years that begun after 2013. The thin capitalization rules apply to Canadian resident trusts and non-resident corporations and trusts that operate in Canada.

### LOSSES

Losses arising from business operations may be carried back three years or carried forward up to twenty years. The carry-forward period increased from seven to ten years and from ten to twenty years for losses arising in taxation years ending after 22 March 2004 and after 31 December 2005, respectively.

Capital losses are discussed separately above. In the event of a change of control of a corporation, there is a deemed taxation year-end. Business losses incurred prior to the change of control may only be deducted in subsequent years from income from the same or similar business but only if the business which generated the losses continues to be carried on with a reasonable expectation of profit. A similar restriction applies to the carry-back of subsequent business losses to the three years preceding a change of control.

On a change of control, a number of complementary rules come into play that have the effect of deeming most types of assets to be disposed of at fair market value if fair market value is less than that particular asset's tax carrying value. The purpose of these rules is to realise any unrealised losses that may exist at the time of the change of control. These deemed losses are added to the existing losses and are subject to the carry-forward restrictions mentioned above. Unclaimed net capital losses expire on a change of control. A special election to crystallise unrealised capital gains to use expiring capital losses should be considered when filing a change of control tax return. Post-change of control capital losses cannot be carried back to pre-change of control taxation years.

### FOREIGN SOURCE INCOME

Canadian corporations are taxable on worldwide income regardless of its source. Income earned by foreign affiliates in active businesses is generally not subject to taxation in the Canadian parent until the profits are repatriated (refer to the discussion on Dividends above). Corporations having an investment in a controlled foreign affiliate earning passive income, or deemed passive income, are subject to tax on that income in the year it is earned by the foreign corporation.

## C. FOREIGN TAX RELIEF

Foreign income earned by a Canadian corporation is generally subject to tax in the year received or receivable. Credit is given for foreign income taxes paid, including withholding taxes. Depending upon the tax rate of the foreign country, foreign tax credits may or may not provide full relief for the foreign taxes paid. The amount of the foreign tax credits is effectively limited to the amount of Canadian tax paid on the foreign income. Foreign business income taxes not utilised in a particular year may be carried forward ten years (seven years if incurred before 23 March 2004) and back three years. Excess foreign non-business income tax paid cannot be carried over but may be available as a deduction in computing income.

Dividends arising from active business income received from foreign affiliates residing in treaty countries are not subject to further tax in Canada if the business is carried on in Canada or a designated treaty country. No credit is given for foreign withholding taxes in these cases. Dividends arising from other business income received from foreign affiliates are netted against a grossed-up adjustment for the underlying foreign tax and withholding tax. Dividends arising from passive income received from controlled foreign affiliates residing in treaty countries or arising from all sources in non-treaty countries are subject to tax as ordinary income.

Deductions will be given for underlying foreign tax and withholding tax, as well as Canadian tax which may have been payable at the time the income was earned. In addition, dividends received by Canadian resident corporations from non-resident corporations are eligible for a 38.33% tax refund.

## D. CORPORATE GROUPS

No provision is made for filing consolidated tax returns for corporate groups. Certain tax provisions require the aggregation of amounts for members of related groups for purposes of determining access to certain tax incentives and benefits. Loss utilisation among members of a corporate group is often affected by amalgamation or merger of group members.

## E. RELATED PARTY TRANSACTIONS

Domestic transactions between related parties are subject to rules that require such parties to transfer property at fair market value. Failure to effect transfers at fair market value may result in one-sided adjustments to income or cost basis. Charges between domestic group members are also subject to reasonableness and income earning tests. Transactions with related non-residents are subject to both transfer pricing and foreign reporting rules. Contemporaneous documentation of transfer pricing methodologies is required to avoid exposure to transfer pricing penalties on adjustments. Substantial penalties may be levied where transactions with related non-residents are not in compliance with prescribed procedures.

Certain multinational entities, with taxation years commencing after 1 January 2016, will be required to disclose information relating to each country in which the multinational group operates; only multinational entities within multinational groups with combined revenues of EUR 750 million or more will be subject to such reporting requirements.

## F. WITHHOLDING TAX

Canada imposes non-resident withholding tax on many types of income paid or credited to non-residents including dividends, interest, royalties, pension payments and rents. The statutory rate of withholding is 25% but may be reduced or eliminated by treaty provisions. Section I Treaty and Non-Treaty Withholding Tax Rates summarises the rates of withholding under Canada's present income tax treaties. As of 1 January 2008, withholding tax is not payable under Canada's domestic legislation on most interest payments made by Canadian borrowers to arm's length non-resident lenders.

Canada also has a clearance certificate procedure that requires a purchaser to withhold from the proceeds paid to a non-resident seller on the sale of certain Canadian properties.

The amount of withholding is generally 25% (50% for certain types of properties) of the net gain on disposition if proper notice is given to the tax authorities and a clearance certificate is provided to the purchaser. If a clearance certificate is not obtained, the amount of withholding tax increases to 25% (or 50%) of the gross proceeds instead of the net gain. Amounts withheld are deductible from Canadian taxes payable by the non-resident seller. If the amount withheld exceeds the Canadian taxes payable by the non-resident seller, a refund will be granted on filing a Canadian federal tax return. The March 2010 changes to the definition of 'taxable Canadian property' have streamlined the withholding and compliance procedures impacting non-residents and those that acquire property from them. In addition to the federal withholding tax, Quebec has a similar withholding tax regime on sales of taxable Quebec property. The general rate of withholding is 12.875% and can be higher for certain types of property.

Non-residents are also subject to a 15% withholding on amounts received for services rendered in Canada. Said withholding is credited on the non-resident's Canadian income tax return and will reduce the tax due or result in a refund. A refund due to a corporation will not be processed if the return is not filed within three years from the end of the taxable year. In addition to the federal withholding tax, Quebec has a 9% withholding tax on services rendered in Quebec by non-residents of Canada.

## G. EXCHANGE CONTROL

Canada does not impose currency or exchange controls.

## H. PERSONAL TAX

Individual residents in Canada are subject to tax on their worldwide income. Non-residents are subject to tax in Canada on Canadian-sourced employment income and business income; 50% of the capital gains from the disposal of certain specified Canadian assets; and 100% of gains on disposal of certain property such as resource property or certain life insurance policies. Investment or passive income earned by non-residents is subject to withholding tax as discussed above.

Residency is determined based on common law tests of residency relating to social and economic ties. The significant residential tie to Canada refers to having a primary residence, spouse or common-law and dependants in Canada.

Individuals who stay in Canada for 183 days or more in a particular year may be deemed to be resident in Canada. Canada's tax treaties may contain further provisions regarding determination of residency.

Also, if you leave Canada for temporary reasons and you maintain residential ties with Canada, you may be considered a factual resident of Canada.

Tax returns are filed based on the calendar year and generally are due by 30th April of the following year. An extended deadline of 15th June of the following year is available for business proprietors and partners of most partnerships, as well as their spouses. However, if a self-employed person owns investment accounts, the return must be filed by 30th April following the taxable year. There is no provision for joint spousal tax returns. Certain pension benefits may be allocated between two spouses by election.

Virtually all income earned is subject to taxation. Employment income (including certain employment benefits) and some forms of investment income are included in taxable income on a cash basis.

If you received federal, provincial, or territorial government COVID-19 benefit payments, such as the CRB, CRSB and CRCB, the taxpayer will receive a T4A slip with instructions on how to report these amounts on the 2021 tax return.

Business income and some investment income, notably interest, are included in income on an accrual basis. Income earned from farming, fishing and certain professions is subject to a cash or modified cash method of accounting.

Taxable Canadian dividends received by an individual resident in Canada are subject to a gross-up and dividend tax credit mechanism.

Employees are subject to withholding on their earnings from employment in respect of income tax and contributions for Canada

Pension Plan and Employment Insurance. Self-employed individuals and those with income from other non-employment sources are required to make quarterly instalments of estimated taxes due for the year. The balance of taxes and Canada Pension Plan owing for a calendar year is due by 30th April of the following year for all individuals. If you are unable to pay the balance pending before the deadline, you will incur interest and if you file the tax return after the deadline and have a balance pending you will be subject to penalties.

Individuals are permitted various deductions including contributions to Registered Pension Plans and Registered Retirement Savings Plans, interest paid on funds borrowed to earn income, and qualifying alimony or spousal support payments. In 2022, the RRSP contribution limit is CAD 29,210 and for 2023 it is CAD 30,780. Child maintenance payments are neither deductible by the payer nor taxable to the recipient if paid pursuant to an agreement entered into after 30 April 1997 or if an agreement or Court Order made before that date is modified after 30 April 1997.

There are also tax credits available for personal exemptions, donations, medical and education expenses, and Canada Pension Plan (CPP) and Employment Insurance (EI) contributions.

Updated federal EI premium rates and maximums for 2022 are as follows (figures in CAD):

| Year | Maximum annual insurable earnings | Rate (%) | Maximum annual employee premium | Maximum annual employer premium |
|---|---|---|---|---|
| 2022 | 60,300 | 1.58 | 952.74 | 1,333.84 |
| 2021 | 56,300 | 1.58 | 889.54 | 1,245.36 |
| 2020 | 54,200 | 1.58 | 856.36 | 1,198.90 |
| 2019 | 53,100 | 1.62 | 860.22 | 1,204.31 |

Updated CPP contribution rates, maximums and exemptions for 2022 are as follows (figures in CAD):

| Year | Maximum annual pensionable earnings | Basic exemption amount | Maximum contributory earnings | Employee and employer contribution rate (%) | Maximum annual employee and employer contribution | Maximum annual self-employed contribution |
|---|---|---|---|---|---|---|
| 2022 | 64,900 | 3,500 | 61,400 | 5.7 | 3,499.80 | 6,999.60 |
| 2021 | 61,600 | 3,500 | 58,100 | 5.45 | 3,166.45 | 6,332.90 |
| 2020 | 58,700 | 3,500 | 55,200 | 5.25 | 2,898.00 | 5,796.00 |
| 2019 | 57,400 | 3,500 | 53,900 | 5.1 | 2,748.90 | 5,497.80 |
| 2018 | 55,900 | 3,500 | 52,400 | 4.95 | 2,593.80 | 5,187.60 |
| 2017 | 55,300 | 3,500 | 51,800 | 4.95 | 2,564.10 | 5,128.20 |
| 2016 | 54,900 | 3,500 | 51,400 | 4.95 | 2,544.30 | 5,088.60 |
| 2015 | 53,600 | 3,500 | 50,100 | 4.95 | 2,479.95 | 4,959.90 |
| 2014 | 52,500 | 3,500 | 49,000 | 4.95 | 2,425.50 | 4,851.00 |
| 2013 | 51,100 | 3,500 | 47,600 | 4.95 | 2,356.20 | 4,712.40 |
| 2012 | 50,100 | 3,500 | 46,600 | 4.95 | 2,306.70 | 4,613.40 |
| 2011 | 48,300 | 3,500 | 44,800 | 4.95 | 2,217.60 | 4,435.20 |
| 2010 | 47,200 | 3,500 | 43,700 | 4.95 | 2,163.15 | 4,326.30 |

Hereafter is the table for 2022 on non-refundable tax credits (all figures in CAD):

| Description | 2022 | 2021 | 2020 | 2019 |
|---|---|---|---|---|
| Basic personal amount for 2019 and prior years | NA | NA | NA | 12,069 |
| Basic personal amount for individuals whose net income for the year is greater than or equal to the amount at which the 33% tax bracket begins | 12,719 | 12,421 | 12,298 | NA |
| Basic personal amount for individuals whose net income for the year is less than or equal to the amount at which the 29% tax bracket begins | 14,398 | 13,808 | 13,229 | NA |
| Spouse or common-law partner amount (maximum) for 2019 and prior years | NA | NA | NA | 12,069 |
| Spouse or common-law partner amount (maximum) for individuals whose net income for the year is greater than the amount at which the 33% tax bracket begins | 12,719 | 12,421 | 12,298 | NA |
| Spouse or common-law partner amount (maximum) for individuals whose net income for the year is less than or equal to the amount at which the 29% tax bracket begins | 14,398 | 13,808 | 13,229 | NA |
| Spouse or common-law partner amount (maximum if eligible for the Canada caregiver amount for a dependent spouse or common-law partner) for 2019 and prior years | NA | NA | NA | 14,299 |
| Spouse or common-law partner amount for individuals whose net income for the year is greater than or equal to the amount at which the 33% tax bracket begins (maximum if eligible for the Canada caregiver amount for a dependent spouse or common-law partner) | 15,069 | 14,716 | 14,571 | NA |

| Description | 2022 | 2021 | 2020 | 2019 |
|---|---|---|---|---|
| Spouse or common-law partner amount for individuals whose net income for the year is less than or equal to the amount at which the 29% tax bracket begins (maximum if eligible for the Canada caregiver amount for a dependent spouse or common-law partner) | 16,748 | 16,103 | 15,502 | NA |
| Amount for an eligible dependant (maximum) for 2019 and prior years | -- | -- | -- | 12,069 |
| Amount for an eligible dependant (maximum) for individuals whose net income for the year is greater than or equal to the amount at which the 33% tax bracket begins | 12,719 | 12,421 | 12,298 | NA |
| Amount for an eligible dependant (maximum) for individuals whose net income for the year is less than or equal to the amount at which the 29% tax bracket begins | 14,398 | 13,808 | 13,229 | NA |
| Amount for an eligible dependant (maximum if eligible for the Canada caregiver amount for a dependant) for 2019 and prior years | NA | NA | NA | 14,299 |
| Amount for an eligible dependant for individuals whose net income for the year is greater than or equal to the amount at which the 33% tax bracket begins (maximum if eligible for the Canada caregiver amount for a dependant) | 15,069 | 14,716 | 14,571 | NA |
| Amount for an eligible dependant for individuals whose net income for the year is less than or equal to the amount at which the 29% tax bracket begins (maximum if eligible for the Canada caregiver amount for a dependant) | 16,748 | 16,103 | 15,502 | NA |
| Canada caregiver amount for children under the age of 18 | 2,350 | 2,295 | 2,273 | 2,230 |
| Age amount | 7,898 | 7,713 | 7,637 | 7,494 |
| Net income threshold for age amount | 39,826 | 38,893 | 38,508 | 37,790 |
| Canada employment amount (maximum) | 1,287 | 1,257 | 1,245 | 1,222 |
| Canada caregiver amount for other infirm dependants age 18 or older (maximum amount) | 7,525 | 7,348 | 7,276 | 7,140 |
| Net income threshold for Canada caregiver amount | 17,670 | 17,256 | 17,085 | 16,766 |
| Disability amount | 8,870 | 8,662 | 8,576 | 8,416 |
| Supplement for children with disabilities (maximum) | 5,174 | 5,053 | 5,003 | 4,909 |
| Threshold relating to allowable childcare and attendant care expenses | 3,030 | 2,959 | 2,930 | 2,875 |
| Adoption expenses (maximum per adoption) | 17,131 | 16,729 | 16,563 | 16,255 |

Individuals pay income tax at graduated marginal rates, effective 1 January 2020, as follows:

| Taxable income (CAD) | Tax rate (%) |
|---|---|
| First 49,020 | 15 |
| 49,021 - 98,040 | 20.5 |
| 98,041 - 151,978 | 26 |
| 151,979 - 216,511 | 29 |
| over 216,511 | 33 |

Federal and provincial tax rates for 2022:

| Taxable income (CAD) | Tax rate (%) |
|---|---|
| First 50,197 | 15 |
| 50,198 - 100,392 | 20.5 |
| 100,393 - 155,625 | 26 |
| 155,626 - 221,708 | 29 |
| over 221,708 | 33 |

Provincial and territorial tax rates for 2022 (all figures in CAD):

| Provinces and territories | Rates |
|---|---|
| Newfoundland and Labrador | 8.7% on the first 39,147 of taxable income, plus<br>14.5% on the next 78,294 plus<br>15.8% on the next 139,780 plus<br>17.8% on the next 195,693 plus<br>19.8% on the amount over 250,000 |

| Nunavut | 4% on the first 47,862 of taxable income, plus<br>7% on the next 95,724 plus<br>9% on the next 155,625 plus<br>11.5% on the amount over 155,625 |

## I. TREATY AND NON-TREATY WITHHOLDING TAX RATES

Due to space limitations, the following summary does not reflect detailed information on the statutory or treaty provisions relating to withholding tax rates. Rates shown are in effect on 1 January 2018 subject to the notes at the end of the table below.

The reader should ensure careful reviews of the statutory rules and treaty provisions are undertaken when considering a particular cross-border transaction. For example, refer to note 1 pertaining to the elimination of Canadian withholding tax on arm's-length interest payments. The domestic rate may be lower than the treaty rate. Special care should also be taken to review the effective date of changes for new treaties and protocols. Care should be taken with respect to Canada-US payments involving fiscally transparent entities with changes effective in 2009 and 2010.

The Canada Revenue Agency (CRA) has provided declaration forms that are recommended for use by non-residents of Canada to provide the CRA and Canadian resident payers with information regarding their residency status and eligibility for treaty benefits.

| | Dividends (%) | Interest[1] (%) | Royalties (%) |
|---|---|---|---|
| Corporations and individuals resident in Canada: | Nil | Nil | Nil |
| Non-resident corporations/individuals of non-treaty countries: | 25 | 25 | 25 |
| ***Treaty countries:*** | | | |

NOTES:

1. Effective 1 January 2008, Canada's Income Tax Act eliminates the Canadian withholding tax on arm's-length payments of interest (other than participating debt interest) to all non-residents of Canada.
2. Depending upon the particular treaty, the lower rate applies where a corporate recipient of a dividend (beneficial owner) holds, at least, 10% to 25% of the voting control or at least 10% to 25% of the share capital of the company paying the dividend.
3. The 5% rate applies if at least 70% of the voting power is controlled by the recipient corporation. The 10% rate applies if between 25% and 70% of the voting power is controlled by the recipient corporation.
4. The lower rate only applies if the payment arises in Canada.

5. The 15% rate is applicable where the payment arises in Canada or if paid from a company engaged in an industrial undertaking.
6. Maximum withholding rate. Lower rates may apply depending on the nature of the royalty.
7. Lower rates apply to banks, insurance companies and lending institutions.
8. A protocol signed on 12 September 2014 entered into force on 26 June 2015 and is effective as of 1 August 2015 (withholding taxes) and 1 January 2016 (other taxes) for Canada and as of 1 August 2015 (withholding taxes) and 1 April 2016 (other taxes) for New Zealand.
9. See separate listing for treaty with Hong Kong, signed on 11 November 2012 (entry into force on 29 October 2013).
10. Initial treaty which is not in force as of 10 January 2017. Table shows rates which will be in force when implemented. General rates are in effect until that time.
11. Canada is presently renegotiating a treaty with this country.
12. Canada is presently negotiating an initial treaty with San Marino.
13. The withholding rate for non-arm's length interest paid to the US was reduced to 0% effective 1 January 2010. The rate for arm's-length interest payments was reduced to 0% effective 2008. Interest on participating debt is excluded from these exemptions, but the withholding rate on such interest is limited to a 15% withholding rate.
14. Effective 1 January 2010, changes to the Canada – US Tax Treaty eliminated treaty benefits for payments from an entity which is treated as a corporation by Canada but as a fiscally transparent entity in the US and certain other conditions are met. For example, a payment from a Canadian unlimited liability company to its US owner will not be eligible for a treaty rate reduction where the tax treatment of the transaction under US rules differs from the treatment it would have received if the payer was not fiscally transparent for US purposes. Effective 1 February 2009, payments from Canada to a US fiscally transparent entity such as a US limited liability company, or a US partnership require consideration of the US treaty status of the individual members of the recipient entity. A US S Corporation will also generally be a fiscally transparent entity subject to the same look-through rules but Canada has indicated that it will give an S Corporation a reduced treaty rate where it qualifies for such rate as a recognized entity under the treaty. Specific tax advice should be sought to establish the withholding rate for Canada – US cross-border payments involving fiscally transparent entities. In April 2011, the CRA issued forms NR302 and NR303 for declaring the eligibility for treaty benefits for a partnership and other fiscally transparent or hybrid entities. The applicable withholding rate is calculated on worksheets included with these forms.
15. The limitation of benefits clause in the Canada-US Tax Treaty became effective on 1 February 2009 for Canadian withholding taxes, and may in certain circumstances deny treaty benefits on payments to US entities with non-US owners.
16. Dividends paid by a company resident in Cyprus to a Canadian owner are not subject to withholding tax. Dividends paid by a company resident in Canada to an owner in Cyprus are subject to a withholding tax of 15%.
17. The lower 10% rate applies if the recipient company owns directly or indirectly at least 20% of the capital of the dividend-paying company.

## KEY TAX POINTS

- Resident corporations are subject to Cape Verde corporate income tax (CIT) on their worldwide income. Non-resident companies with a permanent establishment in Cape Verde are liable for CIT on the income attributable to that permanent establishment.
- There is a CIT simplified regime for micro and small-sized companies in place.
- A tax-neutral regime for mergers and spin-offs is available, subject to certain conditions.
- Transfer pricing legislation enables the tax authorities to make corrections to taxable income when the conditions (and prices) agreed upon between related parties are different from those that would have been agreed upon and accepted between independent entities (arm's-length principle). In certain cases, transfer pricing documentation is required.
- Companies licensed in the International Business Centre of Cape Verde are taxed at a reduced CIT rate.
- Payments between resident companies are generally subject to withholding tax.
- The standard rate of VAT is 15%.
- Resident individuals are subject to income tax on their worldwide income whilst non-residents are liable to income tax only on income sourced in Cape Verde. There is a special tax regime for non-habitual resident taxpayers.
- Social security is due on remunerations at a 15% rate for the employer and 8% for the employee.

## A. TAXES PAYABLE

### CORPORATE INCOME TAX

Resident corporations are subject to corporate income tax (CIT) on their worldwide income. Resident companies are those which have their head office or place of effective management in Cape Verde.

Non-resident companies with a permanent establishment (PE) in Cape Verde are liable for CIT on the income attributable to that PE. Non-resident companies without a PE are subject to tax on specified categories of income sourced in Cape Verde, including services and commissions, rental income, dividends, interest, and royalties.

There are two different CIT regimes:

- the general regime; and
- a simplified regime for micro and small-sized companies.

Under the simplified regime, applicable for micro and small-sized companies, CIT is replaced by a Single Special Tax (SST), which is levied at a 4% rate on the gross turnover amount. The SST is payable on a quarterly basis (in April, July, October, and January of the following year).

Criteria to determine micro and small-sized companies are:

- Micro-sized company: an entity that employs up to five persons with an annual turnover (gross amount of sales and services) that does not exceed CVE 5 million;
- Small-sized company: an entity that employs between six and ten persons with an annual turnover (gross amount of sales and services) between CVE 5 million and CVE 10 million.

Under the general regime, the taxable profit is subject to a 22% tax rate. In addition to the CIT charge, resident companies and PEs domiciled in the municipalities of Praia and Mindelo are subject to a fire brigade surcharge (*Taxa de Incêndio*), levied at a 2% rate on corporate taxable income.

Certain expenses, such as costs related to vehicles and non-documented expenses, are subject to autonomous taxation at rates varying from 10% (e.g. travel and kilometres allowances) to 40% (undocumented expenses).

The tax year usually coincides with the calendar year (1 January to 31 December). However, PEs of non-resident companies may opt for a different tax year. Resident companies may also opt for a different tax year, subject to authorisation from the Minister of Finance. Tax is payable by the end of the fifth month following the end of the tax year – generally the 31st of May.

Payments on account of the final tax liability are due in March, August, and November of the respective tax year, totalling 80% of the previous tax year's CIT liability.

Permanent establishments of non-resident companies are taxed at the rates applicable to resident companies. The tax rate for non-resident companies having no permanent establishment obtaining Cape Verde-sourced income ranges from 10% to 20%.

### CAPITAL GAINS TAX

Worldwide capital gains obtained by resident companies are included in their taxable income.

### BRANCH PROFITS TAX

All income attributable to a Cape Verdean branch (permanent establishment) is subject to corporate tax. No tax is imposed on remittances of profits from the branch to the head office.

### VALUE ADDED TAX (VAT)

VAT is a sales tax levied on the supply of goods and services as well as on the import of goods into the territory. The VAT system in Cape Verde closely follows the European Union VAT system and the standard VAT rate is 15%.

The 2021 State Budget (Law 109/IX/2020, of 31 December 2020) introduced, as from 1 January 2021, a 10% reduced VAT rate applicable to:

- lodging in hotels and similar facilities, as well as catering; and
- tour operators who are resident micro, small and medium-sized companies – on all combined services rendered in Cabo Verde in 2021.

VAT exemptions are mainly applicable to medical services, services related to education and social support, transactions performed by non-profit-making organisations, banking and financial transactions, insurance, and reinsurance operations, as well as to imports of certain essential goods.

### PROPERTY TAX (IUP)

IUP ("Imposto Único Sobre Patrimómio") is a municipal property tax levied on the value of real estate on the territory of each municipality, calculated in accordance with the classification of each property at a rate of 1.5%. IUP is due on the ownership of immovable property on an annual basis by the owner of the real estate, registered as such on 31 December of the relevant year. The taxable basis corresponds to 25% of the value attributed to the property by the Evaluation Commission.

IUP is also due on the transfer of real estate, based on the value of the contract declared by the transferee, being the tax payable by the transferee.

There are some exemptions from IUP on the acquisition of real estate.

### STAMP DUTY (IS)

Stamp tax is due on several documents, acts, and transactions, which occur or are presented for legal purposes in Cape Verde. The rates may be set at specific amounts or on a percentage basis.

Among others, stamp duty is due on the following transactions/acts at the following rates:

| Item | Stamp duty rate |
|---|---|
| Loans | 0.50% |
| Bank interest | 3.50% |
| Bank fees and commissions | 3.50% |
| Insurance | 3.50% |
| Guarantees | 0.50% |
| Promissory notes, securities | 0.50% |
| Emoluments, registration acts | 15% |
| Contracts | CVE 1,000 |

## B. DETERMINATION OF TAXABLE INCOME (CIT)

### GENERAL REGIME

Taxable income is determined by adjusting the accounting profit for non-taxable income and non-deductible expenses. As a general principle, costs are only deductible when necessarily incurred for the purpose of producing income.

### DEPRECIATION

Tangible fixed assets and intangible assets can be depreciated/amortised for tax purposes. The depreciation rates are set by specific legislation and include 3% for office buildings and 5% for industrial buildings. No depreciation is allowed on land. The normal method of calculation is the straight-line basis, but the declining-balance method may be used except for items such as buildings, cars, and office furniture.

### STOCKS / INVENTORY

Inventory must normally be valued at the effective cost of acquisition or production (historic cost). Other methods which may be adopted include:

- The standard cost method, which must be calculated in accordance with the appropriate technical and accounting principles;
- The sale price method, which is based on the market value less a normal profit margin.

### CAPITAL GAINS AND LOSSES

Capital gains (or losses) are calculated as the difference between the sales proceeds and the acquisition cost which may be updated using official inflation coefficients. If the proceeds of the sales are reinvested in other eligible assets, 50% of the gain obtained (net of the related losses) will be excluded from taxation. For this purpose, re-investments made in the preceding year, in the year of sale and in the two subsequent years will be taken into account.

When only part of the consideration is re-invested, only the corresponding part of the gain qualifies for the relief.

### DIVIDENDS

There is a full participation exemption on domestic and overseas dividend income, provided the distributing company is subject to and not exempt from CIT. An exception applies for entities with a reduced CIT rate, where the tax relief is only 50%.

### INTEREST DEDUCTIONS

The deductibility of net financing costs is limited to the higher of:

- CVE 110 million; or
- 30% of the tax EBITDA.

The tax EBITDA is based on the taxable income or tax loss that is not exempt, adjusted by the net financial expenses as well as the depreciation and amortisations that are tax deductible. The net financial expenses are calculated as the balance of borrowing expenses and financing revenue.

Non-deductible net borrowing expenses may be deducted in the following seven years, provided the total financial costs (costs of the year plus costs carried forward) do not exceed the above limits.

If the financial costs are below 30% of the EBITDA, the amount of the limit that was not used may be carried forward to offset against the financial costs of the following 7 tax years.

### DOUBTFUL DEBTS IMPAIRMENT

The deduction for tax purposes of impairment losses on overdue debt is limited to the following percentages, computed on the amount of the debt:

| Delay on payment | Limit |
|---|---|
| More than 6 and up to 12 months | 25% |
| More than 12 and up to 18 months | 50% |
| More than 18 and up to 24 months | 75% |
| More than 24 months | 100% |

### TAX LOSSES

Tax losses incurred by resident companies, or by a branch of a non-resident company, may be carried forward to be offset against taxable profits for seven years. However, companies are only allowed to deduct tax losses up to 50% of the taxable profits in any given period.

Tax loss carry-back is not allowed.

## FOREIGN SOURCED INCOME

Resident companies are taxed on their worldwide income.

## INCENTIVES

Incentives under Cape Verde tax legislation include the International Business Centre of Cape Verde; investment tax credits; a Youth Start-Up program incentive; and tax credits for hiring unemployed persons and interns.

## C. FOREIGN TAX RELIEF

Foreign-sourced income, gross of tax paid abroad, is included in taxable income. A unilateral credit for foreign income tax suffered can be offset against Cape Verde CIT. The tax credit is restricted to the lower of:

- The income tax paid abroad;
- The Cape Verde income tax chargeable on that foreign income.

## D. RELATED PARTY TRANSACTIONS

Transfer pricing legislation enables the tax authorities to make corrections to taxable income when the conditions (and prices) agreed upon between related parties are different from those that would have been agreed upon and accepted by independent entities.

According to Ministerial Order no 75/2015, preparation of transfer pricing documentation is required for entities subject to corporate income tax that are:

- Classified as “large taxpayers” under the terms of proper regulations;
- Beneficiaries of a privileged taxation regime, as defined in the General Tax Code;
- Permanent establishments of non-resident entities;
- Entities that the tax authorities designate for this purpose.

## E. WITHHOLDING TAX

Non-resident companies without a PE in Cape Verde are generally subject to a final withholding tax on the following categories of income and at the following rates:

| Type of income | Tax rate |
|---|---|
| Rental income | 10% |
| Interest payments | 10%/20% |
| Dividends | 10% |
| Royalties | 20% |
| Services rendered/used in Cape Verde | 15% |

The withholding tax rates may be reduced under the terms of an existing double tax treaty signed by Cape Verde.

## F. PERSONAL INCOME TAX

Income tax is payable by individuals on income obtained from employment, a business activity or independent profession, pension income, investment income, rental income, and capital gains. Resident individuals are subject to income tax on their worldwide income while non-residents are liable to income tax only on income sourced in Cape Verde. Tax residence is determined by physical presence in Cape Verde for more than 183 days in aggregate, consecutive or not, during any 12-month period. Having remained for less time, the residence is also determined by having a place of abode on 31 December in a way that may lead to the supposition of an intention to keep and occupy it as a habitual home/ residence.

Individuals can be taxed under two different tax methods:

- Under the declarative method, individuals are taxed according to their annual income statement. This method is mandatory for taxpayers included in Category B (business and professional income) with organised accounting, and individuals taxed under Category C (rental income). This method is also applicable to dependent workers, Category A, (employment income) who opt to file the tax return, to income obtained abroad by resident taxpayers, and to income obtained in Cape Verde by non-resident taxpayers that could not be taxed at flat rates. Total income will be subject to tax at progressive rates ranging between 16.5% and 27.5%.
- A final withholding method is applied to taxpayers who are not obliged to submit their annual income statement in the following cases: Categories A, D (investment income), E (Capital Gains), and under the Special Regime for Small and Micro-Sized Companies (SRSMC).

There are specific deductions for each category of income, using as a criterion the costs or charges necessary to obtain them. Thus, expenditure on health and education, pensions, housing rents, housing debt interest, construction and improvement of real estate, amounts paid for health or personal accident insurance, as well as some life insurance, and amounts invested annually in government bonds and contributions to social security or single social tax for the taxable person or their dependents may be deducted from the taxable income. Donations to certain entities can also be deducted from the total income.

### Employment and pension income

Employment and pension income are generally subject to monthly withholding tax (WHT). As a rule, the monthly WHT is levied as final taxation, unless the taxpayer chooses to file a tax return in which case the withheld tax acts as an advance payment.

### Rental income

Rental income is subject to a 20% withholding tax, which has the nature of an advance payment on account of the final annual income tax liability. In computing the net rental income, taxpayers may deduct maintenance and repair expenses of up to 30% of gross rental income.

**Investment income**

In general, investment income is subject to a flat 20% rate. However, some exceptions apply:

- dividends are subject to a 10% flat rate;
- interest on bonds is subject to a 10% flat rate;
- other interest is subject to a 20% flat rate;
- a special tax regime foreseen in the Tax Benefits Code provides for an exemption from taxation on interest on long-term deposits received by Cape Verdean emigrants.

**Capital gains**

Capital gains earned by individual taxpayers are subject to a flat 1% rate in case of gains on the disposal of real estate, intellectual property, or shares.

**Non-habitual tax residents**

A special tax regime for non-habitual residents is in place. Individuals becoming tax residents and who have not been resident in Cape Verde for tax purposes for the past five years may apply for this regime, under which certain foreign-sourced income, such as investment income, may be exempt from taxation in Cape Verde, subject to certain conditions, for a period of 10 years. In addition, non-habitual residents may benefit from a reduced 10% tax rate on Cape Verde sourced employment and self-employment income, if derived from high value-added activities performed there. Non-habitual resident status is acquired upon registration with the tax authorities until March 31 of the year following that in which they become tax residents in Cape Verde.

## G. SOCIAL SECURITY

Employees are subject to social security contributions on their monthly gross income at a rate of 8%. Social security contributions due by the employer are levied at 15%.

Self-employed individuals are subject to monthly social security contributions computed in accordance with a rate ranging from 11% to 19.5%. The payment of contributions shall take place by the 15th of the subsequent month to which they are related.

## H. TREATY AND NON-TREATY WITHHOLDING TAX RATES

**Foreign tax relief**

A resident employee, entrepreneur, or professional may deduct the lower of the following amounts in order to mitigate double taxation on foreign income taxed in another jurisdiction:

- Income tax paid abroad; or
- PIT fraction computed before deductions due on the income taxed in the source state.

**Double tax treaties**

Cape Verde has signed double tax treaties with Macau, Mauritius, Portugal and Spain. The Cape Verde Parliament has approved the ratification of new double tax treaties with Angola, Equatorial Guinea, and São Tomé e Príncipe. In addition, negotiations are ongoing to conclude a double tax treaty with Guinea-Bissau and Senegal.

| | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| **Non-treaty countries** | 10 | 10/20[1] | 20[2] |
| **Treaty countries:** | | | |
| Macau | 10 | 10 | 10 |
| Mauritius | 0/5[3] | 0/10[4] | 7.5 |
| Portugal | 10 | 0/10[5] | 10 |
| Spain[8] | 0/10[6] | 0/5[7] | 5 |

Notes:

1. As of 1 January 2015, interest paid to non-residents is subject to a final 20% withholding tax%, except interest on bonds, government bonds and similar public securities derived from public debt, financial investment instruments such as promissory notes and bills of exchange, which are subject to a final 10% withholding tax.
2. Royalties (representing know-how, technical assistance, and leasing of equipment) paid to non-resident companies are subject to a final 20% withholding tax.
3. The 5% rate applies if the beneficial owner of the dividends owns directly less than 25% of the capital stock (capital social) of the dividend-paying company. In all other cases the 0% rate applies.
4. The 0% rate applies if (i) the debtor of the interest is the Cape Verde Government, a political or administrative subdivision or a local authority or a statutory body thereof (ii) interest is paid to the Government of Mauritius, a political or administrative subdivision or a local authority or a statutory body thereof (iii) interest is paid to an institution (including a financial institution) in connection with any financing granted by them under an agreement between the Governments of the Contracting States.
5. The 0% rate applies if (i) the payer of the interest is the Cape Verde Government or a political or administrative subdivision or local authority thereof (ii) interest is paid to the Government of Portugal or a political or administrative subdivision or local authority thereof, or to an institution or body (including a financial institution) in connection with any financing granted by them within the framework of agreements between the Governments of the contracting States.
6. The 0% rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the capital of the dividend-paying company.

7. The 0% rate applies if (i) the beneficial owner is the Spanish State or the Central Bank, or a political subdivision or local authority thereof (ii) the interest is paid by the State in which the interest arises (i.e. Cape Verde) or by a political subdivision or local authority or statutory body thereof (iii) the interest is paid in respect of a loan or credit owed to, or granted, made, guaranteed or insured by the Spanish State or a political subdivision, local authority or export financing agency thereof (iv) the beneficial owner of the interest is a financial institution (v) the interest is paid in connection with the sale on credit of equipment, goods or merchandise, or services (vi) the beneficial owner of the interest is a pension fund approved for tax purposes by Spain and the income of the fund is, in general, exempt from tax in Spain.
8. Effective date: 1 January 2022.

# CHILE

## MEMBER FIRM

| City | Name | Contact Information |
|---|---|---|
| Santiago | Antonio Melys | +56 22650 4332<br>amelys@pkfchile.cl |

## BASIC FACTS

| | |
|---|---|
| Full name: | Republic of Chile |
| Capital: | Santiago |
| Main languages: | Spanish |
| Population: | 19.41 million (2022 estimate) |
| Monetary unit: | Chilean Peso (CLP) |
| Internet domain: | .cl |
| Int. dialling code: | +56 |

## KEY TAX POINTS

- The Chilean income tax system applies to all individuals and entities domiciled or resident in Chile in respect of their worldwide income. Non-residents are subject to tax on Chilean-sourced income.
- Two categories of income tax apply in relation to different types of income (activities). The rules for calculating tax under each category are different.
- In general, profits from commercial activities (including relevant capital gains) are taxed at 25% under 'First Category tax'.
- However, as of 2020 the general tax system (Partially integrated system) affects profits made by enterprises that determine the income tax taking into account the results of financial statements based on full accounting records, at a rate of 27%. Such system has a maximum tax burden of 44.45%, taking into account both the tax on the company (First Category tax at 27%) and the owners (Additional tax at a rate of 35% or Global Complementary tax with progressive tax rates). Under the Partially integrated system the higher burden results from the owners having to refund 35% of corporate tax (First Category Tax) on the same taxable profit distributed or withdrawn. However, the restriction in the use of corporate tax as a credit will not be applicable to investors domiciled or resident in countries that have a double tax treaty with Chile, in which the application of the Additional Tax on the income distributed or withdrawn has been agreed upon provided that the First Category Tax is deductible of said tax, or another clause is included producing the same effect. This beneficial rule is also applicable when a double tax treaty with Chile has been signed before 1 January 2020 although it is not in force yet. The latter rule will stay applicable up to 2026, the year when it is expected that those conventions will be in force. That is the case for investors domiciled in the United States and the United Arab Emirates.
- Gross taxable income arising from wages, salaries, overtime payments, bonuses, fees, gratuities, profit sharing and any other form of remuneration is taxed under the Second Category which is a progressive tax, the highest rate of which is 40% from 2020 onwards.
- Profits remitted or withdrawn from Chile (such as by way of payment of dividends to non-residents in enterprises subject to the Partially Integrated System) are subject to a 35% 'Additional Tax', although relief is given for any First Category tax paid on the relevant profits. Some of the taxpayers domiciled or resident abroad may have to refund the 35% of the tax credit, which means that in practice they could only use the 65% of the First Category tax as a tax credit. This restriction is applicable only to taxable income generated since 1 January 2017.
- Transfers and other operations regarded as sales, as well as services other than those rendered by employees and consultants, are subject to 19% Value Added Tax (VAT). Exports of all products and services qualified as exports by the Customs Service are exempt for VAT purposes. VAT paid on imports and on local purchases and services may be deducted from VAT surcharged on sales or services rendered.
- There are various other types of payments to non-residents which are subject to withholding tax. Chile has signed double tax treaties with a number of countries under which the withholding tax rate may be reduced or the tax may not be applicable.
- Credits are available for overseas taxes paid on foreign-sourced income. Where the income consists of dividends or overseas profits, the credit is capped at a maximum of 35% of the gross dividends or profits.
- Although individuals resident in Chile generally pay income tax on their worldwide income, foreigners who establish their domicile or residence in Chile pay income tax only on their Chilean-sourced income for the first three years of residence.

## A. TAXES PAYABLE

### COMPANY TAX

The income tax legislation provides for a scheduler system divided as follows:

## FIRST CATEGORY TAX

First Category tax is due on income derived from commercial, industrial and agricultural activities, mining, fishing and other extractive activities, investment, and real estate. All income not specifically taxed under another category and not tax exempt is included. Capital gains are included in gross income subject to First Category tax with certain exceptions which include:

(a) Gains from the sale of publicly traded Chilean corporations' stock acquired and sold under certain conditions such as to be carried out on the Stock Exchange, which are tax exempt.

(b) Sale of mining rights up to the amount represented by the variation in the cost of living index between the date of purchase and that of sale, carried out by taxpayers not subject to the First Category tax on effective income.

(c) Sale of real estate other than that included in the assets of a taxpayer subject to the First Category tax on effective income. The maximum cumulative income not taxable under this rule amounts to 8,000 UF (approximately USD 309,000), regardless of the number of operations made by the taxpayer.

### FIRST CATEGORY INCOME TAX SYSTEMS

Taxpayers required to declare their income subject to First Category tax, based on the results of a balance sheet according to full cycle accounting are subject to a partially integrated regime. This is the standard applicable regime, under which shareholders, partners and individual entrepreneurs must include in their own income tax return the profits distributed by or withdrawn from the company but in practice they can only use 65% of the corporate tax as a tax credit as they have to refund 35% of the First Category corporate tax. The maximum tax burden on profits affecting investors under this system is therefore 44.45%. Said restriction on the use of corporate tax as a credit is not applicable to investors domiciled or resident in countries that have concluded a double tax treaty with Chile, in which the application of the Additional Tax on the income distributed or withdrawn has been agreed upon provided that the First Category Tax is deductible of said tax, or another clause producing the same effect is included. The same tax benefit is also granted when the double tax treaties have not yet entered into force but have been signed by Chile before 1 January 2020, but that rule will only stay applicable until 31 December 2026.

Micro, small and medium-sized enterprises (Pymes) that meet certain conditions and generate income not exceeding 75,000 UF (approximately USD 2,860,000 ) on average over the last three years can benefit from a special tax system, under which the First Category Tax is applied to the result determined on a cash basis, i.e. income and effective disbursements. In other words, the Pro Pyme tax regime is based on the difference between the proceeds, i.e. income effectively received by the taxpayers, and the disbursements made in the same period, regardless of whether the payments correspond to purchases of fixed assets or inventories. The entrepreneurs, partners or shareholders will be taxed on withdrawals, remittances or distributions of profits and the 25% First Category tax can be fully used as a tax credit against their personal income tax. Taxpayers can opt to become subject to the partially integrated system within the first quarter of the year.

There is an additional special tax regime called Transparent Pro Pyme Regime, applicable to companies whose owners are subject to final taxes. The income is determined based on the receipts received and expenses paid. The company is not subject to tax, but the income determined by the company is subject to owners' personal taxes, although the profit has not been withdrawn or distributed.

## SECOND CATEGORY TAX

Second Category gross taxable income refers to the one arising from wages, salaries, overtime payments, bonuses, fees, gratuities, profit sharing and any other form of remuneration. It is a progressive tax, the highest of which is 40%, applicable on a monthly basis to the excess of 310 monthly tax units (approximately USD 21,000).

## COMPLEMENTARY TAX (IMPUESTO GLOBAL COMPLEMENTARIO)

This is a progressive tax assessed on a resident individual or domiciled in Chile with respect to income received or withdrawn in the preceding year. Its highest rate is 40%, applicable to the excess of 310 yearly tax units (approximately USD 252,000 ).

## ADDITIONAL TAX (IMPUESTO ADICIONAL)

This tax affects, among others, the Chilean-sourced income withdrawn or remitted abroad to non-residents or non-domiciled individuals and of companies or juridical entities organised abroad with or without a permanent establishment in Chile in the form of branches, offices, agents or representatives. This tax also affects foreign payments such as royalties, technical assistance and others at varying rates.

## SPECIAL TAX OF ARTICLE 21° OF THE INCOME TAX LAW

This tax affects almost all entities regardless of the legal structure they have (individuals, corporations, permanent establishments of non-resident entities, etc.). It is applied at a 40% rate on all amounts that are disallowed as an expense, when they represent disallowed actual disbursements or withdrawals of assets, regardless of the way in which they may have been accounted for. Under certain circumstances this kind of disallowed expense must be included in the income tax return of the correspondent shareholder, partner or individual owner which has to pay a 10% additional surcharge on such amounts.

## SPECIFIC TAX IN OPERATIONAL MINING INCOME

Since 2006, there is a specific tax on the operational income of the mining activity obtained by a mining operator. This progressive tax rate currently ranges from 0.5%, if annual turnover is equal to or exceeds 12,000 metric tons of fine copper, to 4.5% if annual turnover is between 40,000 metric tons and 50,000 metric tons. If turnover exceeds 50,000 metric tons, the tax is applied on the mining operational profit margin1 and the progressive tax rate ranges from 5% on the operational profit margin not exceeding 35 to 14% if the operational profit margin exceeds 85. The operational taxable income2 on which this tax is applied is determined in a specific way. Certain expenses such as losses from past periods, accelerated depreciation of fixed assets, etc. are not allowed for this purpose.

- This is the mining operational taxable income divided by the mining operational revenue, multiplied by 100.
- This is the net income (that is, the total mining revenues less the cost and expenses) and making the adjustments indicated in the Income Tax Law for the application of the corporate tax.

## CLASSES OF TAXPAYERS

Any person or entity domiciled or resident in Chile must pay tax on income, whatever its origin, whether its source is located in Chile or abroad. Non-residents are subject to tax on income, the source of which is located within Chile. An individual is considered resident for tax purposes when remaining in Chile, uninterruptedly or not, for a period or periods exceeding 183 days in aggregate during any twelve-month period. Foreigners working in Chile are subject to tax only on their Chilean-sourced income during the first three years of domicile or residence period which may be extended. After this period, they become subject to tax on their worldwide income.

Thus, the income tax system covers individuals and legal persons, resident or non-resident, foreign or national, whose income source is located in Chile and also, in the case of a resident's income, foreign-sourced income. For example, partnerships are subject to a 25% or 27% First Category tax on their profits, depending on the tax system which they are subject to. Under the Partially integrated system the income tax of partners is payable or included in the personal income tax return when distributed or remitted abroad. The credit is 27% First Category tax but 35% of it must be refunded, except in some cases such as that of taxpayers of countries that have a double tax treaty with Chile (see paragraph First Category Income Tax Systems).

## VALUE ADDED TAX (VAT)

Transfers and other operations regarded as sales, as well as services other than those rendered by employees and consultants, are subject to 19% VAT. In addition, certain items are subject to sales tax. For imports, the taxable basis is the customs value or CIF value, including customs duties. Certain capital goods forming part of foreign investments of at least USD 5 million may be exempt from VAT, for which the investor must submit an application to the Ministry of Finance.

The tax applies to the sale of all movable and immovable physical assets (except land) sold by a person who is a customary seller. The tax basis is the sales price, including monetary correction, interests, finance charges and penalty interests. The tax itself is excluded from the basis. Exports of all products are exempt for VAT purposes. VAT paid on imports and on local purchases and services may be deducted from VAT surcharged on sales or services rendered. VAT paid on importation and on acquisition or services received, when accessory to operations exempt from VAT (unless they are exports) or not related directly to the activities of the seller, is not recoverable.

Some products like alcoholic and non-alcoholic beverages, jewels, furs, articles made of gold, silver or ivory are subject to a sale surtax at different rates.

## LOCAL TAXES

No local income taxes are payable in addition to central government taxes. However, Chile imposes taxes on real estate and a stamp tax on documents that contain loans and credit operations (bill of exchange, promissory notes, etc.). Enterprises have to pay an annual municipal licence, calculated on the taxpayer's equity at a minimum rate of 0.25% and a maximum of 0.5%, set by each municipality. The total amount cannot exceed 8,000 monthly tax units (approximately USD 542,000 ), which is allocated among the municipalities in which the taxpayer has an office, factory or other establishment.

## B. DETERMINATION OF TAXABLE INCOME

Gross income is arrived at by deducting from gross receipts the direct cost of goods and services required to produce such receipts. The direct cost of locally acquired goods will be the purchase price, to which the cost of freight and insurance to deliver to the taxpayers' premises may be added. For imported goods, it will include CIF value, duties and customs charges, and local freight and insurance costs as above could optionally be added. For manufactured or processed goods, direct cost will include raw material, costs in the manner described, and labour charges. Business income is determined on the accrual basis, whereas the dividend income on corporate shares is assessed on a cash basis. In the case of long-term projects, the tax authorities are empowered to issue rulings regarding the determination of income for tax purposes.

Business expenses are deductible from gross income provided that they have not already been deducted in arriving at such gross income and that the expenses are required for the income to be obtained. Expenses incurred in the acquisition, maintenance or exploitation of assets not used in the regular course of business are not deductible. The accounting period in Chile coincides with the calendar year.

### CFC (Controlled Foreign Company) Rules

Certain foreign income is taxable in Chile not only when it is received but also accrued. In fact, profit consisting of passive income (interests, dividends, etc.) received or accrued by foreign entities controlled by Chilean taxpayers or patrimonies, must be considered as received or accrued by these Chilean taxpayers. The taxable profit of the foreign entity is determined by applying the Chilean tax regulations.

## DEPRECIATION

Depreciation on fixed assets, except for land, is tax deductible under the straight-line method based on their useful lives in accordance with the guidelines of the Chilean Internal Revenue Service (IRS), computed on the restated value of the assets. A shorter lifespan is stated in the Income Tax Law as an option for depreciation, applicable to fixed assets purchased since 2003. The option means an accelerated depreciation for new assets when acquired locally, or new or used assets when imported, with useful lives of over five years. For this purpose, the assets will be assigned useful lives equivalent to one-third of the normal, eliminating fractions of months.

There is an alternative according to the amount of turnover of the taxpayers (100,000 UF; approximately USD 3,860,000 ) on average over the last three years), which allows them to accelerate the depreciation to 1/10 of the normal lifespan of the fixed assets. The lifetime thus obtained cannot be less than one year. Taxpayers may discontinue the use of the accelerated method at any time but may not return again to the accelerated method. The difference between accelerated and straight-line method will not reduce the taxable profit that can be withdrawn by partners or distributed to shareholders.

No allowance is made for amortisation of intangible assets such as, patents, trademarks, etc. Goodwill in mergers and acquisitions that cannot be allocated to non-monetary assets, is considered as an expense only at the winding up of the enterprise. Depletion of ore in mining properties is not tax deductible.

## STOCK / INVENTORY

The cost of goods sold or production materials and supplies consumed is based on the first-in, first-out (FIFO) basis, although the 'average' method may be elected. The method adopted determines the basis for the valuation of the closing inventory. The valuation so determined is, however, adjusted in the manner stipulated for the annual monetary correction procedures.

## DIVIDENDS

Dividends received from Chilean corporations are exempt from First Category tax. There is no distinction in Chile between dividends and inter-company dividends. A dividend in kind as such does not exist. Dividends are necessarily expressed in cash, notwithstanding the fact that the company may distribute certain assets corresponding in value to the dividend amount. Stock dividends in the form of bonus shares or increases in the par value of existing shares are not considered income for tax purposes.

## INTEREST DEDUCTIONS

Generally, interest accrued or paid in the financial year is a deductible expense, provided that it has been incurred in connection with loans related to the business. Regarding the interest and other amounts, when originating in acts or contracts concluded with related parties abroad, the expense will only be deductible in the year such amounts are paid, credited to account or placed at the disposal of the beneficiary. It is also required that the correspondent Additional tax is paid unless such amounts are tax exempt.

## LOSSES

Losses incurred in the fiscal year are deductible. Furthermore, there is no limit on carry forward of losses. There are no loss carry-back provisions, nor is it available to group profitable and unprofitable affiliates for tax purposes. However, dividends received or income withdrawn from third companies can be offset against losses for tax purposes. This leads to a refund of the First Category tax that affected the dividends or the income withdrawn. This tax benefit will be reduced yearly and it will no longer be applicable from 2024 onwards.

## FOREIGN SOURCE INCOME

Non-domiciled or non-resident corporations are only subject to income taxes on their Chilean-sourced income. If the domestic corporation receives amounts in excess of the book value of an investment when a foreign subsidiary is liquidated, these are considered as income subject to regular taxes. From 2012 onwards, the income received or accrued from derivatives such as forwards, futures, swaps and options, by persons or entities without domicile or residence in the country, will not be subject to income tax, except for those arising from derivatives that are settled by physical delivery of shares or rights in companies incorporated in Chile.

## INCENTIVES

Foreigners may remit their earnings or be paid abroad. Remittances have to be reported to the Central Bank of Chile. Non-domiciled or non-resident individuals in Chile are subject to an Additional income tax, at a rate of 35%. However, if the nature of the foreign activities is scientific, cultural or sports-related, the tax rate is only 20% as a sole tax as long as the foreigner's stay is insufficient to be considered a resident. This tax is also applicable to engineering or technical jobs and professional or technical services rendered, in Chile or abroad, by individuals or juridical entities at a 15% rate. This rate will be 20% in the cases pointed out in the summary showed below.

## ROYALTIES

Royalties are deductible expenses:

(a) Provided they are necessary to produce income;

(b) Provided the rate is that normally paid in similar circumstances with respect to their nature;

(c) As a result of the relationship existing between the parties. In this case, the royalty is deductible when it is paid, credited to account or placed at the disposal of the beneficiary, and Additional income tax is paid unless the royalty is tax exempt.

Deduction of outbound royalties is limited to 4% of receipts from sales and services effected in the tax year. The 4% limit is not applied if in the tax year there is no capital, control or administration relationship, whether direct or indirect, between the taxpayer and the recipient of the royalties. Likewise, the 4% limit is not applied if the royalties are taxed in the recipient's country at a rate of at least 30%. In calculating the 4% limit, it is necessary to first compute the royalties not subject to the limit and then the royalties subject to the limit. Also the effect of double tax treaties entered into by Chile need to be considered.

## C. FOREIGN TAX RELIEF

- Foreign tax credits are allowed in Chile. A resident taxpayer who is taxed in Chile on dividends or profits received from enterprises set up abroad which have already been taxed in the source country may be entitled to have the foreign tax levied on that income credited against his tax liability, with a cap equivalent to 35% of the gross dividends or profits. This credit must be computed into the tax basis. Foreign taxes paid in excess of the cap, which cannot be used as a tax credit, are allowed as a deduction from taxable income. The foreign tax is set off against First Category tax at the corresponding tax rate and, in the case of companies, the balance against the Additional or Complementary taxes when the profits are distributed.
- Law 19.840, published in the Official Gazette on 23 November 2002, allows foreign investors to establish Chile as a base for their investments into third countries. That law states special regulations (Article 41 D) to publicly traded corporations and closely held corporations ruled by the regulations of the former, constituted in Chile and in accordance with Chilean laws, incorporated with foreign capital permanently owned by partners or shareholders not domiciled nor resident in Chile, nor in countries or territories that are considered tax haven jurisdictions, or harmful preferential tax regimes. The same tax treatment will be applicable to non-domiciled or non-resident shareholders of said companies for remittances and distribution of profits or dividends obtained from them and from partial or total repatriations of capital, as well as for the capital gains obtained from the disposal of shares in companies governed by the abovementioned Article 41 D.
- According to this article, such companies are not considered as domiciled in Chile for the purposes of the Chilean Income Tax Law and, therefore, they will only pay taxes in the country on their Chilean-sourced income. The line of business of the aforementioned companies must be investments in Chile and abroad and the capital contributed by the foreign investor must

have a foreign source. The regulations related to bank secrecy will not be applied to them. This rule has been cancelled with effect from 1 January 2022. However, as of 23 November 2017 new companies could no longer join this regime.

- Expenses incurred in approved training plans for personnel, up to 1% of the yearly payroll, are allowed as a credit against the First Category income tax.
- Immovable property tax will be creditable against the First Category tax only if paid by the owner or usufructuary of agricultural land or if they have given the property on lease, usufruct or other forms of temporary assignment to a person or entity, except when they are relatives or related parties. Construction companies and real estate companies may credit property tax paid on immovable property built to be sold.

## D. CORPORATE GROUPS

For tax purposes, consolidation of affiliated companies is not allowed. Losses can only be offset against profits of the same company ( or against dividends or taxable profits withdrawn from third companies until 2023).

## E. RELATED PARTY TRANSACTIONS

Charges from foreign affiliates or head offices are only allowable for specific items related to the local company or branch. A pro-rata allocation of the foreign entity's expenses is not generally acceptable for tax purposes (see under 'Royalties' above).

## F. PROFIT REMITTANCES, WITHDRAWALS OR DISTRIBUTIONS

Broadly speaking, profit remitted, withdrawn or distributed to investors not domiciled or resident in Chile that is taxed with the Additional Tax, is subject to a withholding tax. Regarding taxpayers subject to the Partially Integrated System, profit remittances and dividends paid to the shareholders not domiciled or resident in Chile are subject to Additional Tax upon distribution at a rate of 35%, which has to be withheld. However, if the taxpayer has an accumulated credit originating from amounts subject to the First Category tax, a credit is granted against the withholding tax, taking into account the First Category tax rate in force in the year of remittance or withdrawal. It must be kept in mind that in such case 35% of the credit has to be returned by increasing the amount of the withholding, unless the taxable profit remitted has been generated before 2017, subject to the old tax regime. However, such restriction is not applicable to investors domiciled or resident in those countries that have concluded a double tax treaty with Chile (see paragraph "First Category Income Tax Systems" letter b). The same tax procedure is applicable to remittances of profit to partners or profit withdrawn by individuals not domiciled or resident in Chile.

## G. THE 42% ALTERNATIVE

Foreign investors that have a Decree Law 600 contract entered into with the State of Chile and have opted for the 42% rate are subject to the First Category tax (payable by the branch or subsidiary) at the corresponding rate and an Additional tax at a rate that completes the 42%, on the same tax base. Thus, the total theoretical tax burden is 42% on pre-tax income instead of the 35% currently paid under normal taxation. The investor who has opted for the 42% invariable rate can elect at any time to be taxed at the normal rates. This election is irrevocable. Decree Law 600 has been cancelled with effect from the beginning of 2016, and has been replaced with a new regulation that does not consider any income tax rules. However, foreign investors were still allowed during the four years following the entry into force of the law to apply for investment contracts with the State of Chile subject to Decree Law 600. In any case, the invariable income tax rate would be 44.45%.

## H. PAYMENTS ABROAD

Other payments to a non-resident not domiciled in Chile are subject to an additional withholding tax as follows:

| Type of Payment | Rate |
|---|---|
| Royalties | 30% |
| Royalties paid abroad for patents of invention, industrial designs, new vegetal varieties, software and other specific cases | 15%[1] |
| Engineering and technical jobs | 15%[2] |
| Professional and technical services | 15%[2] |
| Other services paid abroad | 35% |
| Interest to foreign entities | 35% |
| Interest to foreign banks | 4% |
| Interest to foreign related banks, on the part of the loans that exceeds three times the equity (sole tax on excess indebtedness) | 35% |
| Marine freight (exemptions on the basis of reciprocity) | 5% |
| Insurance premiums to foreign insurers | 22% |
| Reinsurance premiums to foreign insurers | 2% |
| Individuals who carry out scientific, cultural or sports activities in Chile | 20% |

Notes:

1. The rate is 30% when the creditor or beneficiary of the remuneration is incorporated, domiciled or a resident in a country considered as a preferential tax regime according to the rules stated in article 41 H of the Income Tax Law.
2. The rate is 20% in the same situation as described in note 1 above.

## I. PERSONAL TAX

All individuals, domiciled or resident in Chile are subject to income tax whatever the source of the income. Non-domiciled or non-resident individuals in Chile are subject to tax on their Chilean-sourced income. An individual is considered resident for tax purposes when remaining in Chile, uninterruptedly or not, for a period or periods exceeding 183 days in aggregate during any twelve-month period. During the first three years of residence in the country, foreigners who establish domicile or residence in Chile pay income taxes only on their Chilean-sourced income. This term may be extended by the tax authorities for an additional three years after which they are taxed on their worldwide income. All remuneration for personal services as well as income derived from other services is included in gross income. All forms of remuneration are included in taxable salary. The only deduction is for social security contributions.

Items like reimbursement of travel expenses, housing provided for the sole interest of the employer, moving expenses, and reasonable relocation allowances are considered non-taxable income and are excluded from the tax calculation. Items like cost of living allowance, area allowance, car allowance, vacation travel, and utilities are taxable.

Capital gains of individuals are treated mostly as any normal income, subject to First Category tax and Complementary Tax. However, certain capital gains have special treatments as in the case of shares and immovables.

Necessary business expenses incurred on behalf of others are reimbursable and exempt from taxes, provided that they are duly proved. Professionals can deduct their effective expenses or standard deduction. The only deductible non-business expenses are social security contributions, on a voluntary basis where maximum amounts are determined in the same way as it is applicable to employees. Employees must pay a variable percentage for pension plans of around 12% and 7% for health insurance, applicable on a maximum of up to 81,6 UF (approximately USD 3,150 ), adjustable yearly. On a voluntary basis, employees are allowed to make additional contributions to the pension fund of up to 50 UF (approximately USD 1,900), also deductible from salaries for tax purposes. Tax computation for individuals varies depending on the type of income.

Basically, the following categories exist:

(1) Professionals – working as independent consultants must compute all their yearly income less the expenses necessary to produce such income or presumed expenses of up to 30% of the annual gross income with a top limit equivalent to 15 yearly tax units (approximately USD 12,200). They can also deduct the social security contributions with equal caps applicable to employees.

(2) Employees – taxable income is the salary minus social security contributions either mandatory or voluntary (see paragraph above). No other deductions from taxable income are allowed. The tax applicable is the Sole Second Category income tax, mandatorily withheld by the employer on a monthly basis.

(3) Combined income – income received by individuals such as dividends, profits in partnerships or derived from personal business is subject to complementary tax. In the case of dividends and profits distributed by a First Category taxpayer, the individual has a credit originated in the payment of the First Category tax, whether the 35% tax credit should be returned or not. In the case of employment income, the individual has a credit for the payment of the Sole Second Category income tax.

(4) Professionals and employees domiciled or resident in Chile subject to Sole Second Category tax or Complementary Tax have a credit equivalent to the foreign tax levied on their foreign-source income. There is a cap of 35% on the gross foreign income.

### EMPLOYEE REMUNERATION

A deduction is allowed for wages, salaries and remuneration paid for personal services, including bonuses paid in accordance with the law or a contract. Voluntary participations and profit sharing granted to employees and workers are deductible, provided the taxes they are subject to have been paid.

A deduction is also allowed in connection with remunerations paid to persons who, due to their controlling position in the enterprise, are able to influence the setting of their remuneration. The deduction is limited to that part which, in the opinion of the tax administration, is proportionate to the importance of the enterprise, its reported income, services rendered by the recipient and capital profitability. Subject to the same conditions, remuneration paid for actual and permanent work to owners of sole proprietorships, partners of companies, managing partners of partnerships limited by shares and shareholders are also deductible. Likewise, the remuneration paid to the spouse or civil partner of the owner or to his children who actually work in the company or business will be accepted as a deductible expense to the extent that it is a reasonably remuneration in terms of the previous paragraph.

A deduction is allowed for remuneration paid for services rendered abroad, provided that it is substantiated by reliable documents and provided that, in the opinion of the tax administration, the remuneration is necessary or convenient for the production of income in Chile.

## J. TREATY AND NON-TREATY WITHHOLDING TAX RATES

Chile has signed a number of double tax treaties referenced to in the table below. Chile has also signed treaties with the United States of America, the United Arab Emirates, the Netherlands and India although these are not yet effective at the time of publication.

| | Dividends | | Interest (%) | Royalties (%) |
|---|---|---|---|---|
| | **Individuals, companies (%)** | **Qualifying companies[1] (%)** | | |
| **Non-treaty countries** | 35% (Chilean sourced income) | | 0/4/35 | 0/4/35 |
| **Treaty countries:** | | | | |
| Argentina | 15 | 10 | 4/12[28] | 3/10/15[19] |
| Australia | 15 | 5[2] | 5/10[7] | 5/10[33] |
| Austria | 15 | 15 | 58/15[31] | 5[18]/10 |
| Belgium | 15 | 03 | 5/15[40] | 5/10[33] |
| Brazil | 15 | 10 | 15 | 15[30] |
| Canada | 15 | 5[4] | 10[9] | 10/15[20] |
| China | 10 | 10 | 4[32]/10 | 2/10[33] |
| Colombia | 7 | 0 | 5/15[10] | 10[29] |

| | Dividends | | Interest (%) | Royalties (%) |
|---|---|---|---|---|
| | Individuals, companies (%) | Qualifying companies[1] (%) | | |
| Croatia | 15 | 55 | 5/15[10] | 5/10[33] |
| Czech Republic | 15 | 15 | 5[11]/15[31] | 5[18]/10 |
| Denmark | 15 | 5 | 5[11]/15[31] | 5[18]/10 |
| Ecuador | 15 | 5 | 5[8]/15[31] | 10[22] |
| France | 15 | 15 | 4/5/10[35, 12] | 2[39]/10 |
| Ireland | 15 | 5[5] | 5[8]/15[31] | 5[18]/10 |
| Italy | 10 | 5 | 4/5/10[41] | 2/5/10[23] |
| Japan | 0/15 | 0/5[6] | 4/10/15[13,14] | 2/10[33] |
| Korea (Rep.) | 10 | 5 | 5[11]/15[31] | 5[21]/15[21] |
| Malaysia | 15 | 5[5] | 15 | 10 |
| Mexico | 10 | 5[5] | 5/10[15] | 10[24] |
| New Zealand | 15 | 15 | 10/15[10] | 5/10[25] |
| Norway | 15 | 5 | 5/15[36] | 5/10/15[34] |
| Paraguay | 10 | 10 | 10/15[10] | 15 |
| Peru | 15 | 10 | 15 | 10/15[26] |
| Poland | 15 | 5[5] | 5[16]/15[31] | 5[18]/10 |
| Portugal | 15 | 10 | 5/10/15[17] | 5/10[33] |
| Russia | 10 | 5 | 15 | 5/10[33] |
| South Africa | 15 | 5 | 5/15[35] | 10/15[33] |
| Spain | 10 | 5[5] | 5[8]/15[31] | 5[18]/10 |
| Sweden | 10 | 5[5] | 4/5/15[10, 12] | 2[39]/10 |
| Switzerland | 15 | 15 | 5/15[35] | 5/10[33] |
| Thailand | 10 | 10 | 10/15[10] | 10/15[27] |
| United Kingdom | 15 | 5[5] | 5[8]/15[31] | 5[18]/10 |
| Uruguay | 15 | 5[37] | 4/15[38] | 10 |

Notes:

1. The rate applies to a participation of at least 25% of capital or voting power, unless stated otherwise.
2. Applies to a participation of at least 10% of voting power.
3. Applies to a participation of at least 10% of capital.
4. The treaty rate is 10%, which is reduced to 5% with respect to a participation of at least 25% of voting power (by virtue of a most favoured nation clause under the Chile-Mexico treaty; Circular 62, 2005 Chilean IRS).
5. Applies to a participation of at least 20% of capital or voting power.
6. A 5% rate applies if the beneficial owner is a company that has owned directly, for the period of six months ending on the date on which entitlement to the dividends is determined, at least 25% of the voting power in the company paying the dividends and 0% if the beneficial owner of the dividends is a pension fund, provided that such dividends are not derived from the carrying on of a business by such pension fund or through an associated enterprise.
7. The lower rate applies to interest derived by financial institutions. The rate of 15% stated in the treaty was reduced to 10% since 1 January 2019 by virtue of a most favoured nation clause under the Chile-Japan treaty (Circular 27, 2019 Chilean IRS).
8. A 5% rate applies to interest derived from bonds or securities that are regularly and substantially traded on a regulated securities market. A 4% rate applies to interest derived from loans granted by banks and insurance companies and a sale on credit paid by the purchaser of machinery or equipment to a beneficial owner that is the seller of the machinery or equipment. However if the interests derived from an agreement that implies a back to back credit or similar, the rates will be 5% or 10% as the case may be (by virtue of most favoured nation clauses in the Chile-Japan treaty; Circulars 22 and 50, 2018 Chilean IRS).
9. The treaty rate is 15%, which is reduced to 10% with respect to interest derived from (i) loans granted by banks and insurance companies (ii) bonds or securities that are regularly and substantially traded on a regulated securities market and (iii) a sale on credit paid by the purchaser of machinery or equipment to a beneficial owner that is the seller of the machinery or equipment (by virtue of a most favoured nation clause under the Chile-Spain treaty; Circular 8 2005 Chilean IRS). By virtue of a most favoured nation clause under the Chile-Japan treaty, 10% is the only tax rate applicable to interest as from 1 January 2019. Circular 59 2021 Chilean IRS.
10. A 4% rate applies to interest derived from loans granted by banks and insurance companies, and a sale on credit paid by the purchaser of machinery or equipment to a beneficial owner that is the seller of the machinery or equipment and other cases. A 5% rate applies to interest derived from bonds or securities that are regularly and substantially traded on a regulated securities market. Interests from back to back credits are subject to 5% or 10% depending on the case. All these percentages are applicable since 1 January 2017, by virtue of a most favoured nation clause under the Chile-Japan treaty; Circular 27, 2019 Chilean IRS).
11. A 5% rate applies to interest derived from bonds or securities that are regularly and substantially traded on a regulated securities market. A 4% rate applies to interest derived from loans granted by banks and insurance companies and a sale on credit paid by the purchaser of machinery or equipment to a beneficial owner that is the seller of the machinery or equipment. However if the interests derived from an agreement that implies a back to back credit or similar, the rates will be 5% or 10% as the case may be (by virtue of most favoured nation clauses Chile-Japan treaty; Circular 22, 2018 Chilean IRS).

12. The treaty rate is 15%, which is reduced to 10% since 1 January 2019 (by virtue of a most favoured nation clause under the Chile-Japan treaty; Circular 27, 2019 Chilean IRS).
13. General rates under the treaty are 5% and 15%, which are reduced to (i) 4% if the beneficial owner of the interest is a bank, an insurance company, a lending or finance business, an enterprise selling machinery or equipment on credit, or any other enterprise, provided that in the three taxable years preceding the taxable year in which the interest is paid, the enterprise derives more than 50 per cent of its liabilities from the issuance of bonds in the financial markets or from taking deposits at interest, and more than 50 per cent of the assets of the enterprise consist of debt-claims against unrelated persons and to (ii) 10% for interest paid as part of an arrangement involving back-to-back loans or other arrangement that is economically equivalent and intended to have a similar effect to an arrangement involving back-to-back loans (by virtue of a most favoured nation clause under the Chile-Japan treaty). Moreover, under the MFN clause of the Chile-Japan treaty, the aforementioned 15% general rate will be reduced to 10% as from 1 January 2019 onwards.
14. The 15% general rate applies up to 31 December 2018 and 10% applies as from 1 January 2019 onwards. (Circular 27 2019 Chilean IRS). Regarding the application of the 4% and 10%, see footnote 13, (i) and (ii).
15. The general treaty rate is 15%, which is reduced to 5% for interest from loans granted by banks and to 10% for interest from loans granted by insurance companies, from bonds or securities regularly and substantially traded on a recognized securities market and for interest related to sales of machinery and equipment on credit (by virtue of most favoured nation clauses; Circular 62 and 8, 2005 Chilean IRS). As from 1 January 2019 a 5% tax rate applies to interest paid to banks and 10% in the rest of the cases (by virtue of a most favoured nation clause under the Chile-Japan treaty Circular 59 2021 Chilean IRS).
16. A 5% rate applies to interest derived from bonds or securities that are regularly and substantially traded on a regulated securities market. A 4% rate applies to interest derived from loans granted by banks and insurance companies and a sale on credit paid by the purchaser of machinery or equipment to a beneficial owner that is the seller of the machinery or equipment. However if the interests derived from an agreement that implies a back to back credit or similar, the rates will be 5% or 10% as the case may be (by virtue of most favoured nation clauses under the Chile-Japan treaty; Circular 22, 2018 Chilean IRS).
17. The general treaty rate is 15%, which is reduced to 10% for interest from loans granted by banks and insurance companies and sales on credit of machinery and equipment where the beneficial owner is the seller and to 5% for interest from bonds or securities regularly and substantially traded on a recognized securities market
18. The 5% rate applies to royalties from the use of, or right to use, any industrial, commercial or scientific equipment, was reduced to 2% by virtue of a most favoured nation clause (Chile-Japan treaty. Circulars 22 and 50, 2018 Chilean IRS).
19. The general treaty rate is 15%, which is reduced to 3% for news-related royalties and to 10% for copyright royalties (other than royalties related to films or tapes), patents, trademarks, know-how, certain lease-related royalties and technical assistance.
20. The general treaty rate is 15%, which is reduced to 10% (by virtue of a most favoured nation clause under the Chile-Spain treaty; Circular 8, 2005 Chilean IRS).
21. The general treaty rate is 15%, but reduced to a general rate of 10% by virtue of a most favoured nation clause (Chile-Spain treaty. Circular 62 and 8 2005 Chilean IRS). Treaty rate of 5% applicable to royalties from the use of, or right to use, any industrial, commercial or scientific equipment was reduced to 2% by virtue of a most favoured nation clause (Chile-Japan treaty; Circular 22, 2018 Chilean IRS).
22. The general treaty rate is 15%, but reduced to a general rate of 10% by virtue of a most favoured nation clause (Chile-Spain treaty; Circular 8, 2005 Chilean IRS). 10% also applies to royalties from the use of, or right to use, any industrial, commercial or scientific equipment.
23. The general treaty rate is 10% while a 5% rate applies to royalties from the use of, or right to use, any industrial, commercial or scientific equipment. However, the 5% for such royalties is reduced to 2% since 1 January 2017 under the application of a most favoured nation clause (Chile-Japan treaty; Circular 5, 2020 Chilean IRS).
24. The general treaty rate is 15%, but reduced to a general rate of 10% by virtue of a most favoured nation clause (Chile-Spain treaty; Circular 62 and 8, 2005 Chilean IRS ).
25. The general treaty rate is 10%, which is reduced to 5% under the application of a most favoured nation clause with respect to royalties paid for the use of, or the right to use, any industrial, commercial or scientific equipment. However this reduction has not yet been confirmed by the Chilean IRS.
26. The general treaty rate is 15%, but reduced to a general rate of 10% by virtue of a most favoured nation clause (Chile-New Zealand treaty). However this reduction has not yet been confirmed by the Chilean IRS.
27. The general treaty rate is 15% while a 10% rate applies to royalties from the use of, or the right to use, any copyright of literary, artistic or scientific work, or for the use of, or the right to use, industrial, commercial or scientific equipment.
28. The treaty rate is 15%, which is reduced to 12% with respect to interest derived from loans granted by banks and insurance companies, bonds or securities that are regularly and substantially traded on a regulated securities market and a sale on credit paid by the purchaser of machinery or equipment to a beneficial owner that is the seller of the machinery or equipment. Since 1 January 2019 the rate is also reduced to 12% applicable to interests which rate are not stated in other part of the article 11 of the treaty, by virtue of a most favoured nation clause under the Chile-Japan treaty (Circular 27, 2019 Chilean IRS)
29. Technical and consulting services are included in the concept of royalty.
30. The provision of technical services and technical assistance are included in the concept of royalty.
31. The general treaty rate is 15%, which was reduced to 10% as from 1 January 2019 (most favoured nation clause under the Chile-Japan treaty; Circulars 22 and 50, 2018 Chilean IRS).
32. A 4% rate applies to interest derived from loans granted by banks and insurance companies and a sale on credit paid by the purchaser of machinery or equipment to a beneficial owner that is the seller of the machinery or equipment. However if the interests derived from an agreement that implies a back to back credit or similar, the rates will be 10%. A 5% rate applies to interest derived from bonds or securities that are regularly and substantially traded on a regulated securities market (by virtue of most favoured nation clauses Chile-Japan treaty; Circular 22, 2018 Chilean IRS).
33. The lower rate applies to royalties from the use of, or right to use, any industrial, commercial or scientific equipment.
34. The general treaty rate is 15%, but reduced to a general rate of 10% by virtue of a most favoured nation clause (Chile-Spain treaty; Circular 62 and 8, 2005 Chilean IRS). 5% applies to royalties from the use of, or right to use, any industrial, commercial or scientific equipment.
35. A 4% rate applies to interest derived from loans granted by banks and insurance companies, and a sale on credit paid by the purchaser of machinery or equipment to a beneficial owner that is the seller of the machinery or equipment and other cases. 5% applies on interest derived from bonds or securities that are regularly and substantially traded on a regulated securities market. Interests from back to back credits are subject to 5% or 10% depending on the case. All these percentages are applicable since 1 January 2017, by virtue of a most favoured nation clause under the Chile-Japan treaty (Circular 27, 2019 Chilean IRS).
36. The general treaty rate is 15%. The 5% tax rate applies to interest derived from loans granted by banks and insurance companies, bonds or securities that are regularly and substantially traded on a regulated securities market and a sale on credit paid by the purchaser of machinery or equipment to a beneficial owner that is the seller of the machinery or equipment (by virtue of most favoured nation clauses; Circular 8, 2005 Chilean IRS).

37. A 5% rate applies when a company has a participation of at least 25% of capital or voting power. This tax rate is the maximum applicable to dividends distributed by any Chilean entities set up in Uruguay.
38. A 5% rate applies to interest from sales of machinery and equipment carried on credit.
39. The lower rate applies to royalties from the use of, or right to use, any industrial, commercial or scientific equipment (since 1 January 2017 by virtue of a most favoured nation clause under the Chile-Japan treaty; Circular 27, 2019 Chilean IRS).
40. A 5% rate applies to interest derived from loans granted by banks and insurance companies, bonds or securities that are regularly and substantially traded on a regulated securities market and a sale on credit paid by the purchaser of machinery or equipment to a beneficial owner that is the seller of the machinery or equipment.
41. A 4% rate applies to interest derived from loans granted by banks and insurance companies, and a sale on credit paid by the purchaser of machinery or equipment to a beneficial owner that is the seller of the machinery or equipment. A 5% rate applies to interest derived from bonds or securities that are regularly and substantially traded on a regulated securities market and 10% on interests produced in other operations. 4% and 10% rates are applicable since 1 January 2017 and 2019, respectively, by virtue of a most favoured nation clause under the Chile-Japan treaty (Circular 5, 2020 Chilean IRS).

Chile has also signed several agreements for the avoidance of double taxation of income from international shipping and/or air transport. Some of the agreements were concluded by means of an exchange of diplomatic notes. The agreements have been concluded with the following countries: France (air transport), Germany (air transport and shipping), Panama (air transport), Singapore (shipping), Switzerland (air transport), the United States (air transport), Uruguay (air transport), United Arab Emirates (air transport and shipping) and Venezuela (air transport and shipping).

Several agreements on information exchange are in force (Bermuda, Guernsey, Jersey, Uruguay and Multilateral Convention subscribed by members of the OECD).

## KEY TAX POINTS

- Corporate residents of China are taxed on their worldwide income. A foreign tax credit is allowed for income taxes paid in other countries. This credit is capped at the China income tax payable on the same income calculated under the Enterprise Income Tax Law.
- The Enterprise Income Tax Law unified the rate for domestic and foreign enterprises at 25% from 1 January 2008. For small profit making companies, the rate could be reduced to 20%. Since 2010, the government authorities have issued favourite policies to promote the business of small profit making companies and thus the effective enterprise income tax rate could be further reduced to 2.5% and 10% by now.
- Foreign enterprises with establishments in China deriving the above income which is not effectively connected with that

establishment is also subject to withholding tax. The statutory rate is 20% which is reduced to 10% by the Enterprise Income Tax Law Implementation Regulations. The 10% withholding tax may be reduced under an applicable treaty.

- Foreign enterprises without establishments in China are subject to Enterprise Income Tax on a withholding basis on the income of dividends, royalties, interest, rental income, earnings from assignment of assets in China and any other income derived from inside China.
- Individuals are taxed on the comprehensive income and business income at progressive rates.
- There is no separate tax on capital gains. Capital gains will be considered as general taxable income and thus subject to Enterprise Income Tax or Individual Income Tax.
- Turnover taxes include VAT on all goods and services and Consumption Tax on consumable or luxury goods.
- Land Value Appreciation Tax applies to transfers of land use rights and immovable properties.
- Stamp duty is levied on a variety of contracts and certain legal documents.

## A. TAXES PAYABLE

### ENTERPRISE INCOME TAX (ELT)

All foreign invested enterprises (FIEs) and those foreign enterprises (FEs) having their effective management office in China are subject to EIT on their worldwide profits. FEs with permanent establishments (PEs) in China are subject to EIT on profits derived from and attributed to the PEs. FEs without PEs in China are subject to EIT on China-source income only.

The EIT Law introduced a wider concept of management in determining tax residency. A company is recognised as a Chinese tax resident if it is incorporated in China or its place of effective control and management office is in China.

All FIEs (i.e. sino-foreign joint ventures and wholly owned foreign enterprises) and foreign enterprises (FEs) with or without establishments in China are now taxed at the same rate as domestic enterprises. EIT is charged at the rate of 25% on taxable profits in a calendar year.

In recent years, the government has introduced a series of preferential tax policies to stimulate economic growth, such as a reduced EIT rate of 15% for High & New Technological Advanced Enterprise (HNTE), qualified technology-advanced service enterprises, qualified western region enterprises and Hainan Free Trade Port enterprises as well as an effective EIT rate at 2.5% or 10% for small-scale enterprises.

The tax year in China is the calendar year (i.e. year ended 31 December).

### BRANCH PROFITS TAX

When a corporate resident enterprise has branch offices registered in different regions in China, the head office and the branches are consolidated to calculate EIT payables. If a corporate resident enterprise has overseas branch offices, the losses of overseas branch offices cannot be deducted from profit made in China, while the profit of overseas branch offices needs to be subject to EIT in China. If a FE has branches in China, the branches are subject to EIT in China.

### CAPITAL GAINS TAX

There is no separate capital gains tax. Capital gains are subject to income tax as ordinary income and are combined together with operating income to calculate income tax.

### VALUE ADDED TAX (VAT)

VAT is levied on the sales amount in respect of selling, transferring or importing of commodities, selling or transferring of properties and intangible assets, provision of repairs and processing, as well as rendering services covering research and development, and technical services; information technology services; cultural creative services; logistic auxiliary services; certification and consulting services; and tangible movable property leasing services; radio and television services; postage services, telecommunication services; construction; financing and consumer services et in China.

VAT taxpayers could be classified into two categories: general VAT payers and small-scale VAT payers depending on the annual sales amount. Generally, a small scale business is broadly defined as one with an annual turnover of less than CNY 5 million.

China has cut the VAT rates since 1 April 2019 as part of a tax reduction package. For a general VAT taxpayer, the standard VAT rates for goods sales and services are listed below:

- Goods sale/processing/repair and replacement Revenue from provision of labour services: 13% or 9% (for a small category of goods such as agricultural products);
- Lease of movable tangible assets: 13%;
- Basic telecommunication services: 9%;
- Construction: 9%;
- Postal services: 9%;
- Transportation services: 9%;
- Real estate (leasing and sale of immovable properties): 9%;
- Transfer of land use rights: 9%;
- Consumer lifestyle services: 6%;
- Financial services: 6%;
- Value-added telecommunication services: 6%;
- Sale of intangibles (except land use rights): 6%;
- Other modern services: 6%.

From 1 January 2020, the income obtained by taxpayers from the provision of public transportation services and daily life services and from the provision of express delivery services for daily necessities of residents shall be exempt from VAT. This preferential tax policy is effective from 1 January 2020 until the date to be announced separately depending on the developments of the COVID-19 pandemic.

A VAT credit mechanism is allowed for a general taxpayer where VAT payable equals output VAT less input VAT by means of VAT special invoices. Input VAT is incurred on the purchase of material, services as well as purchase or construction of fixed assets.

Taxpayers engaged in small-scale business are subject to VAT at a special rate of 3%, but there is no credit for input VAT. During the pandemic period, the tax rate for small-scale taxpayers is reduced to 1% for 2020 and 2021. 1% could still be effective for year 2022 until further notice is released by the China tax authorities.

Generally, for ordinary VAT taxpayers, export goods are subject to a zero VAT rate and are entitled to a tax refund in relation to the purchase or manufacture of the exported goods on which VAT has previously been paid. The VAT refund rate depends on the categories of the goods exported.

Goods exported by small-scale VAT payers shall be exempted from VAT and consumption tax. However, the input tax shall not be deducted or refunded.

A collection rate of 5% may also be applied to:

- Property leasing or property transfer for the transition period of property industries;
- Labour dispatch services choosing to make balance-based tax payments, which is to deduct the wages and benefits paid to despatched persons from the total consideration;
- Security protection services choosing to make balance-based tax payments;
- Human resource outsourcing services which applied the simplified tax calculation method;
- Exploitation of crude oil and natural gas jointly exploited by the Chinese-Foreign cooperative oil (gas) field.

## CONSUMPTION TAX (CT)

CT is imposed on 15 categories of consumable or luxury goods (e.g. cigarettes, alcohol, petrol and motor vehicles). The tax is calculated based on the sales value of goods, the sales quantity or a combination of the two. CT rates range from 1% to 56%. Part collection of this tax has been shifted to the retailer and is levied by the tax authorities of the retailer’s site.

## FRINGE BENEFITS TAX

No separate fringe benefits tax is levied in China.

## REAL ESTATE TAX (RET)

RET is imposed on owners, users or custodians of houses and buildings. RET is imposed at a flat rate of 12% on annual rental income of the leased property or at the rate of 1.2% on the purchase cost of self-used property. For self-used property, a discount of 10% to 30% on the purchase/construction cost is often offered by some local governments in determining the RET. The tax also applies to FIEs, Fes and foreign individuals. RET is deductible for EIT purposes.

## LAND VALUE APPRECIATION TAX (LVAT)

LVAT applies to domestic enterprises, FIEs, Fes and individuals realising gains from the transfer of land use rights, buildings and premises and associated structures. LVAT is charged at progressive rates ranging from 30% to 60% depending on the percentage gain realised from the transfer of land use rights, buildings or associated structures. LVAT could be deducted when computing EIT.

## DEED TAX (DT)

DT is imposed on the transferee or assignee to which land use rights or building ownership rights are transferred (sales, exchange or gifts). The tax rate ranges from 3% to 5% depending on the location of the property. The transferee or the assignee is the taxpayer.

## STAMP DUTY (SD)

Stamp Duty is levied on various contracts including purchase and sale contracts, property leasing, loan contracts, documents for the transfer of property rights, engineering and design contracts, construction and installation, commodity transportation, storage and property insurance contracts, and registered capital as well as accounting books. Tax rates range from 0.005% to 0.1%. A fixed amount of CNY 5 is charged on certificates evidencing rights, patents, trademarks, and licenses.

## ENVIRONMENTAL PROTECTION TAX

Enterprises, entities, other producers and operators that directly emit taxable pollutants into the environment within the territory and other sea areas under the jurisdiction of the People’s Republic of China are taxpayers of environmental protection tax. This Law has become effective as from 1 January 2018.

## SOCIAL INSURANCE CONTRIBUTIONS

All enterprises are required to contribute to social security insurance (including pension, medical, unemployment, work-related injury, maternity), and housing funds (in certain cities) every month for their employees including foreign employees in China.

## B. DETERMINATION OF TAXABLE PROFIT FOR ENTERPRISES

The taxable profit of a corporate resident is calculated as ‘taxable gross income less deductible costs, expenses, non-taxable and tax-exempt items, and losses incurred in a tax year’. It is normally calculated in accordance with audited accounts prepared on an accrual basis subject to tax adjustments by reference to the prevailing tax regulations.

## TAXABLE GROSS INCOME

The taxable gross income of an enterprise refers to the revenues derived from various sources, whether in monetary terms or in-kind, which shall include:

- Revenue from sales of goods;

- Revenue from provision of labour services;
- Gross proceeds from transfer of property;
- Dividend income from private and listed enterprises and other distributions with respect to equity interests;
- Interest income;
- Rental income;
- Royalty income;
- Revenue from donations; and
- Other income.

## TAX-EXEMPT INCOME

- Interest income from government bonds;
- Dividends, bonus and other equity investment income from qualified resident enterprises;
- Income from qualified non-profit organisations;
- Income from China Clean Development Mechanism Fund;
- Income distributed to investors of securities investment funds;
- Proceeds or income from acquisition of local government bond interest.

## TAX- REDUCTION INCOME

- Income from production of goods by comprehensive utilisation of resources (10% reduction);
- Agriculture-related interest and premium income obtained by financial and insurance agencies (10% reduction);
- Income from China Railway Construction Bond Interest (50% reduction);
- Income from community-based family service (10% reduction).

## DEDUCTIBLE COSTS

## DEPRECIATION

Fixed assets under the EIT Law mean the non-monetary assets owned and used for over 12 months in production or business operations. Generally, fixed assets are depreciable on a straight-line basis over their useful lives. Enterprises shall, in terms of the nature and operating conditions of the fixed assets, reasonably evaluate the new residual value of the fixed assets.

| The minimum depreciation periods for various kinds of assets are as follows: | | Years |
|---|---|---|
| (a) | For houses and buildings | 20 |
| (b) | For airplanes, trains, ships, machinery and other production facilities | 10 |
| (c) | For apparatus, tools and furniture and fittings in connection with production / business operations | 5 |
| (d) | For transportation facilities other than airplanes, trains and ships | 4 |
| (e) | For electronic equipment | 3 |
| (f) | For production-nature biological assets in the nature of forestry | 10 |
| (g) | For production-nature biological assets in the nature of livestock | 3 |
| (h) | For acquired software (subject to approval) | 2 |

The scope of fixed assets to enjoy the accelerated depreciation method got expanded to all manufacturing industries as from 1 January 2019.

In respect of equipment and instruments which are newly purchased from 1 January 2018 to 31 December 2023, and if the unit price is below CNY 5 million, the entire cost could be deducted on a one-off basis when computing taxable income. If the unit price of such newly purchased equipment exceeds CNY 5 million, the enterprises may either adopt the straight-line method or an accelerated depreciation method.

There are two ways the accelerated depreciation method can be used:

- Shorter of depreciation life: A shorter of depreciation life should not be less than 60% of the regular depreciation life of the asset.
- Accelerated depreciation: An accelerated depreciation method can be a double declining method or a sum of the years' digit method.

From 1 January 2020, the cost of relevant equipment newly purchased for capacity expansion by enterprises that manufacture key supplies indispensable for the prevention and control of the pneumonia outbreak could be accounted for, on a lump-sum basis, into the costs and expenses of the current period and be deductible before the calculation of enterprise income tax.

## AMORTISATION OF INTANGIBLE ASSETS

Intangible assets, including technical know-how, patents and trademarks, can be amortised using the straight-line method over a period of not less than ten years or the stipulated time limit as set out in the acquisition agreement.

## PRE-OPERATION EXPENSES

Pre-operation period starts from the date when the enterprise is approved for set up until the enterprise begins operations (trial operation is included). The deductible pre-operation expenses include salary, office expenses, training expenses, travelling, printing expenses, registration fees and interest (that would not be capitalised) and foreign exchange gain/loss during the pre-operation period.

Pre-operation expenses can be deducted on a lump sum basis in the year in which the enterprise commences business operations or amortised as a long term prepaid expenditure to be amortized within three years.

## RESEARCH AND DEVELOPMENT (R&D)

R&D expenses incurred for new and high technology, new products or new craftsmanship can benefit from an extra 50% super-deduction of the actual expenses incurred as a tax incentive after proper filing with the relevant tax authorities. If the R&D expenses are qualified for capitalisation, an additional 50% super-deduction could be allowed for the amortisation when computing annual EIT settlement.

From 1 January 2018 until 31 December 2023, the extra/additional deduction ratio is increased from 50% to 75% for the eligible entities.

From 1 January 2021, the extra/additional deduction ratio is further raised from 75% to 100% for most manufacturing entities, which are referred to as enterprises whose principal activities are manufacturing projects stipulated in 'Industrial Classification for National Economic Activities (GB/T 4574-2017)', and whose income from their principal activities constitutes 50% or more of their total income.

## STOCK/INVENTORY

Inventory is to be valued at cost and the acceptable allocation methods include first-in, first-out (FIFO), weighted average, or specific identification basis. The last-in, first-out (LIFO) basis is not acceptable for tax purposes. The method chosen must be applied consistently.

## MANAGEMENT FEE & INTERCOMPANY CHARGES

Management fees between enterprises shall not be deductible for EIT purposes. As management fees are generally regarded as shareholder costs, they cannot be deducted before income tax for China enterprises.

The intercompany charges need to pass the six tests of benefit, necessity, duplication, value creation, remuneration and authenticity carried out by the tax authorities before China enterprises could remit the charges to the offshore companies.

A Cost Sharing Agreement (CSA) for joint development of intangible assets and sharing of services (generally limited to group procurement and group marketing synergies) are allowed. Under the CSA, the principle of matching costs with expected benefits shall be followed. The taxpayer can claim the tax deduction for shared costs provided the CSA could be filed with the local tax authorities

## LOSSES

Operating losses cannot be carried back but they can be carried forward for up to five years.

From 1 January 2018, high-tech enterprises or technology-oriented small or medium-sized enterprises (SMEs) may carry forward losses for a maximum period of up to ten years.

Losses incurred in 2020 by certain enterprises (transportation, food catering, accommodation, and tourism, including travel agency and related services, scenic area management, among others) as a result of the pandemic may be carried forward for a period of up to eight years, instead of the previous five years.

## TAX INCENTIVES

In general, enterprises engaged in encouraged projects may apply for certain tax incentives as follows.

## HIGH & NEW TECHNOLOGICALLY ADVANCED ENTERPRISES (HNTE)

If the enterprise is qualified as an HNTE, it can enjoy a reduced EIT rate of 15%. An enterprise has to fulfil a set of prescribed criteria and be subject to annual assessment in order to be qualified as an HNTE.

On 29 June 2016, the Ministry of Science and Technology, Ministry of Finance and State of Administration of Taxation jointly released an announcement regarding the guidance for HNTE recognition to replace the previous regulations. The government authorities will exert a much more severe administration on HNTE enterprises.

## WESTERN REGION DEVELOPMENT POLICY

From 1 January 2021 to 31 December 2030, enterprises (i) that are based in the western region; (ii) whose primary business is listed in one of the industry items provided in the Catalogue of Encouraged Industries in Western Regions; and (3) the annual primary business revenue of which accounts for more than 60% of the total enterprise revenue, may pay EIT at the reduced tax rate of 15% subject to their application to the competent tax authority and upon the examination and confirmation by the said authority.

## SPECIFIED BASIC INFRASTRUCTURE

When enterprises are engaged in basic infrastructure such as harbours, wharfs, airports, railways, highways, city public transportation, electric power and water resources utilisation projects, such income generated can enjoy a '3+3 years' tax holiday which means, starting from the first income generating year, three years of exemption from EIT followed by three years of 50% reduction of applicable EIT.

## ENVIRONMENT PROTECTION PROJECTS

When enterprises are engaged in environmental protection projects and energy/water conservation projects such as public sewage treatment, public refuse treatment, comprehensive development and utilisation of methane, technologies alteration for energy-saving and emission reduction and seawater desalination projects, such income generated can also enjoy a '3+3 years' tax holiday.

This means, starting from the first income generating year, three years of exemption from EIT followed by three years of 50% reduction of applicable EIT.

## QUALIFIED TECHNOLOGY-ADVANCED SERVICE ENTERPRISES

Since 1 January 2018, qualified technology-advanced service enterprises would qualify for a reduced EIT rate of 15%.

## INTEGRATED CIRCUIT DESIGN AND SOFTWARE ENTERPRISES

From 1 January 2020, a series of preferential tax policies for qualified integrated circuit design enterprises or software enterprises came into force The preferential policy grants several years of tax holidays as well as a tax deduction based on the line width of the integrated circuits. For integrated circuits with a line width of less than 28 nanometres, they could be granted a 10-year tax exemption. For integrated circuits with a line width of less than 130 nanometres, they could be granted a 10-year tax loss carry-forward.

## HAINAN FREE TRADE PORT POLICIES

From 1 January 2020 to 31 December 2024, enterprises in encouraged industries registered in the Hainan Free Trade Port with substantive operations are entitled to EIT at a reduced tax rate of 15%. Enterprises in encouraged industries are referred to as enterprises whose principal activities are industrial projects stipulated in the list of encouraged industries in the Hainan Free Trade Port, and whose income from their principal activities constitutes 60% or more of their total income.

Income derived by enterprises in the tourism industry, modern service industry and high-tech industry established in the Hainan Free Trade Port from newly increased overseas direct investment are exempted from EIT subject to certain conditions: (i) operating profit obtained from the newly established overseas branches; or dividend income corresponding to the newly increased overseas direct investment obtained from the overseas subsidiaries in which more than 20% (inclusive) of the equity is held; (ii) the statutory EIT rate of the invested country (region) shall not be less than 5%.

Based on the Overall Plan for the Construction of the Hainan Free Trade Port, the reduced EIT rate of 15% would be applied to all Hainan enterprises except for those that qualify for the industrial negative list from 1 January 2025 to 31 December 2034.

## SMALL-SCALE ENTERPRISE

EIT rate shall be reduced to 20% for small-scale enterprises if they meet the following criteria:

- The annual taxable income does not exceed CNY 3,000,000;
- The number of staff does not exceed 300; and
- The total assets do not exceed CNY 50 million.

From 1 January 2021 to 31 December 2022, small enterprises with annual taxable income equal to or lower than CNY 1 million may enjoy an 87.5% deduction on calculating the taxable income (i.e. an effective EIT rate of 2.5%).

From 1 January 2019 to 31 December 2021, small enterprises with annual taxable income exceeding CNY 1 million but lower than CNY 3 million may enjoy a 50% deduction on calculating the taxable income (i.e. an effective EIT rate of 10%).

## C. FOREIGN TAX RELIEF

Corporate residents can claim tax credits for corporate income taxes paid by them or their branches in other countries in respect of income derived from sources outside China based either on a country-basket principle or on a comprehensive basis that income from all countries and of all types are considered together to calculate the tax credit starting from January 1, 2017. Once the credit basis is selected, it shall not be changed within 5 years. However, the amount of tax credit is restricted to the Chinese tax payable on the foreign income as calculated according to the EIT law.

## D. CORPORATE GROUPS

There are no group relief tax consolidation provisions in Chinese tax law.

## E. RELATED PARTY TRANSACTIONS

All companies should conduct business with their associated companies on an arm's length basis. The Chinese tax authorities are empowered to disregard, vary or make any necessary adjustments to the arrangements that are carried out for tax avoidance purposes.

## TRANSFER PRICING

The New Law imposes transfer pricing documentation requirements. Specific information must be submitted to the Tax Authorities together with the enterprise's annual income tax returns or subsequently in the course of a transfer pricing audit. Interest will be payable in respect of any late tax payments arising from a transfer pricing adjustment.

China adopts stringent requirements on the related party transactions disclosure and taxpayers have to disclose related party transactions in Related Party Transaction Forms. The acceptable transfer pricing methods are comparable uncontrolled price (CUP); resale price method (RPM); cost-plus method (CPM); transactional net margin method (TNMM); profits split method (PSM); and other methods that are consistent with the arm's length principle approved by the in charge tax authorities.

In June 2016, the China tax authorities issued new transfer pricing compliance requirements whereby transfer pricing documentation has adopted a three-tiered structure, i.e. Master File, Local File and Special Issue File. The Local File and Special Issue File should be completed by 30 June 2017 for related party transactions carried out during the year 2016; the Master File should be completed within 12 months after the end of the same fiscal year of the group's ultimate holding company. Taxpayers should submit the transfer pricing report within 30 days upon the tax authorities' request.

If the company meets either of the following criteria, it shall prepare a Master File:

- Have cross-border related party transactions, and belong to a group which has prepared the master file, or
- The total annual related party transactions exceed CNY 1 billion.

For the Local File, the thresholds for preparing a local file depend on the types of related party transactions, which are listed below:

- CNY 200 million for tangible assets transfer (in the case of tolling manufacturing, the total amount in the annual customs record including raw material should be taken into account);
- CNY 100 million for financial assets transfer;
- CNY 100 million for intangible assets transfer; and
- CNY 40 million for other related party transactions in total.

The special issue file is required for taxpayers who are engaged in cost sharing agreements or fall in the thin capitalization threshold.

The new transfer pricing compliance regulations also require the submission of a Country-by-Country (CbC) report if a Chinese resident company is the ultimate holding company of the group and the consolidated revenue is over CNY 5.5 billion or it is nominated as the reporting entity by the group.

Chinese companies that only have domestic related party transactions do not need to prepare a master file, local file and special issue file.

Single function enterprises, which are making losses, are also required to prepare the contemporaneous documentation regardless of the transaction amount threshold.

When an enterprise is audited for transfer pricing issues, the enterprise will be followed up by the tax authorities for five years and during the follow-up period enterprises are also required to prepare the contemporaneous documentation.

### ADVANCE PRICING AGREEMENT (APA)

An Advance Pricing Agreement (APA) is available in China. The State Administration of Taxation encourages taxpayers to use an APA to ascertain the transfer pricing position and reduce the tax compliance burden.

From 1 September 2021, the procedures for unilateral APAs have been further simplified, thus improving the efficiency of APA negotiations and signing by simplifying the phases of the application and specifying time limits, where decisions on whether or not to accept the APA application must be made within 90 days and negotiations and signing must be completed within six months.

### THIN CAPITALISATION

In China, for non-financial enterprises, when the ratio of loans received from related parties to equity investments exceeds a prescribed ratio (2:1) (or 5:1 for financial institutions), the portion of interest expense related to the debt exceeding the ratio shall not be deductible when computing the taxable income in accordance with the thin capitalization rule under the EIT law. However, enterprises could provide supporting documents to demonstrate that the financing is set at arm’s length in order to claim the EIT deduction upon the agreement of the tax authorities.

### GENERAL ANTI-AVOIDANCE

China requires a *bona fide* business purpose for any commercial arrangement that could result in reducing, deferring or avoiding taxable revenue or taxable income. When the absence of reasonable purposes is sustained, the tax authorities are authorized to disregard the arrangement and impose EIT. China is currently more focused on cross-border anti-avoidance.

### CONTROLLED FOREIGN COPORATION

Foreign controlled corporation (CFC) is defined as a non-Chinese company controlled by China tax residents (both companies and individuals, each of which must hold 10% or more of the voting shares and jointly own 50% or more of the shares) through direct or indirect share ownership.

CFC rules were introduced such that undistributed profits derived by CFCs located in low-tax jurisdictions with an effective corporate income tax rate of less than 12.5% may be taxed in China as a deemed distribution to the parent company in China.

### BASE EROSION AND PROFIT SHIFTING (BEPS)

BEPS refers to tax planning strategies that exploit the gaps and mismatches in tax rules to artificially shift profits to low or no-tax locations where there is little or no economic activity, resulting in little or no overall corporate tax being paid. The OECD and G20 countries worked together on an equal footing to tackle BEPS issues. The BEPS initiative aims to enhance the integrity and fairness of the international tax system by aligning jurisdictional tax rights with the location where value is created and business activities are actually incurred.

The new transfer pricing compliance requirements discussed in the Transfer Pricing Section are one of the most important developments of China’s commitment to the BEPS action plans.

## F. WITHHOLDING TAXES

Foreign enterprises without establishments in China are subject to Enterprise Income Tax on a withholding basis on the income of dividends, royalties, interest, rental income, earnings from assignment of assets in China and any other income derived from inside China. Foreign enterprises with establishments in China deriving the above income which is not effectively connected with that establishment is also subject to withholding tax. The statutory rate is 20% which is reduced to 10% by the EIT Law Implementation Regulations. The 10% withholding tax may be reduced under an applicable treaty.

When foreign enterprises obtain active income in China, the revenue is subject to turnover taxes, and EIT will be levied on the active income if the foreign enterprises have or are deemed to have a permanent establishment (“PE”) in China. The domestic payers are the withholding agents to retain such turnover taxes and EIT from the total payments to foreign enterprises.

## G. EXCHANGE CONTROL

Foreign currency transactions are controlled by the State Administration of Foreign Exchange Control and its branch offices. Financial institutions cannot engage in foreign exchange business without prior approval.

## H. PERSONAL TAX (Individual Income Tax)

China is enforcing new individual income tax (IIT) laws effective from 1 January 2019 onwards.

According to the new IIT law, a tax resident is determined as follows:

(1) A person who has a domicile in China; or

(2) A person who does not have a domicile in China but has resided in China for more than 183 days in a calendar year.

A tax resident is subject to IIT on his/her worldwide income. A non-China-domiciled individual would generally be exempt from China IIT on foreign-source income that is not paid by a China domestic entity or resident individual, unless the non-China-domiciled individual has stayed in China for more than 183 days in each calendar year for six consecutive years in China.

Under the IIT Law, the following nine categories of income are subject to IIT in China:

| | |
|---|---|
| Comprehensive Income | • Wages and salaries<br>• Income from labour service<br>• Remunerations to authors<br>• Royalties |
| Income from Business Operation | • Income of individual industrial and commercial operators from production or business operation |
| Other Income | • Interests and dividends<br>• Income from leasing of property<br>• Income from transfer of property<br>• Contingency income |

(1) Comprehensive Income

Effective from 1 January 2019, the first four categories including salary, personal labour service income, royalty income and author's remuneration are combined into one comprehensive income base to be taxed together at the level of resident individuals. However, it will still be taxed on a separate basis for non-resident individuals.

Comprehensive Income shall be taxable at the following rates:

| Annual Taxable Income (CNY) | Tax Rate(%) |
|---|---|
| 0 – 36,000 | 3 |
| 36,001 – 144,000 | 10 |
| 144,001 – 300,000 | 20 |
| 300,001 – 420,000 | 25 |
| 420,001 – 660,000 | 30 |
| 660,001 – 960,000 | 35 |
| 960,001 or above | 45 |

For comprehensive income, a yearly deduction of CNY 60,000 is allowed (CNY 5,000 per month). Apart from that, the following items are introduced to be deducted from comprehensive income.

- Dependent children's education expenditure;
- Serious illness medical expenditure;
- Continuous education expenditure;
- Rental or housing mortgage interest;
- Dependent parents;
- Public welfare donations.

From 1 January 2019 to 31 December 2023, non-resident individuals working in China could enjoy certain deduction items including rental, meal subsidy, children's education, home leave trip transportation expense, laundry etc.

Where there is a withholding agent, the withholding agent shall withhold and prepay tax on a monthly basis or based on each income item. Where there is no withholding agent for the taxable income, the taxpayer shall file tax returns within the first 15 days of the following month after obtaining the income, and pay tax.

Annual filing for the comprehensive income is required the next year from 1 March to 30 June.

Non-resident individuals are not subject to annual filing for comprehensive income.

From 1 January 2019 to 31 December 2021, for the comprehensive income obtained by individual residents, if the annual comprehensive income is less than CNY 120,000 or the supplementary tax payment is less than CNY400, such individual resident is exempt from annual filing.

(2) Income from Business Operation

Net income derived from production and business operations by individuals (i.e. annual gross income less business costs, expenses and losses) shall be taxable at the following rates:

| Annual Taxable Income (CNY) | Tax Rate(%) |
|---|---|
| 0 – 30,000 | 5 |
| 30,001–90,000 | 10 |
| 90,001–300,000 | 20 |
| 300,001–500,000 | 30 |
| 500,001or above | 35 |

Taxpayers obtaining income from business operation shall compute individual income tax on a yearly basis, file tax returns within 15 days after the end of each month or quarter, make prepayment of tax, and complete the annual filing before 31 March of the following year.

(3) Other Income

Income derived from interest, dividends and bonuses, or contingency income and other income is taxed at a flat rate of 20%.

## TAX INCENTIVES

From 1 January 2020 to 31 December 2024, personnel with high-end and urgently-needed skills that work in the Hainan Free Trade Port qualify for a partial IIT exemption when their individual income tax burden exceeds 15% of comprehensive income (including salary, royalties, labour service and author's remuneration) and Hainan-sourced business income. Taxpayers may enjoy this tax incentive when performing their individual income tax annual filing in Hainan Province.

Based on the Overall Plan for the Construction of the Hainan Free Trade Port, Hainan Free Trade Port would offer more IIT incentives to qualified individuals and the applicable IIT brackets on comprehensive income and business income would be 3%, 10% and 15% from years 2025 to 2034.

From 1 January 2019 to 31 December 2023, Guangdong Province and Shenzhen offer subsidies to overseas high-level talent and urgently-needed talent working in the Greater Bay Area (including Guangzhou, Shenzhen, Zhuhai, Foshan, Huizhou, Dongguan, Zhongshan, Jiangmen and Zhaoqing), according to the difference between the amounts of individual income tax levied by the Mainland and by Hong Kong, and such subsidies are exempt from individual income tax.

## ANTI-TAX AVOIDANCE CLAUSES FOR INDIVIDUALS

The new IIT law also introduced anti-tax avoidance clauses for the first time. The tax authorities may perform tax adjustments and collect additional tax plus interest thereon pursuant to the law under any of the following circumstances:

- **Related Party Transactions**

  If a transaction between an individual and his/her related party does not comply with the arm's length principle, and the tax payable amount of the individual or his/her related party is reduced as a result, when there are no justifiable reasons.

- **CFC Rules**

  An enterprise established in a country (region) with significantly lower tax burden which is controlled by a resident individual or jointly controlled by a resident individual and a resident enterprise, does not distribute or reduces distribution of profits which are attributable to the resident individual, when there are no reasonable business purposes.

- **Others**

  An individual makes other arrangements without reasonable business purposes and obtains improper tax gains.

## I. TREATY WITHHOLDING TAX RATES

The Mainland China Government has signed tax treaties with more than 100 countries. The following table summarises the withholding tax rates applicable to dividends, interest and royalties as provided by the double taxation agreements concluded by Mainland China government with some major countries and regions.

| | Dividends[1] (%) | Interest[2] (%) | Royalties (general) (%) | Royalties[3] (%) |
|---|---|---|---|---|
| Non-treaty countries: | 10 | 10 | 10 | 10 |
| **Treaty countries:** | | | | |
| Albania | 10 | 0/10 | 10 | 10 |
| Algeria | 5/10 | 0/7 | 10 | -- |
| Angola[4] | | | | |
| Argentina[5] | 10/15 | 0/12 | 3/5/7/10 | 10 |
| Armenia | 5/10 | 0/10 | 10 | 10 |
| Australia | 15 | 10 | 10 | 10 |
| Austria | 7/10 | 0/7/10 | 10 | 6 |
| Azerbaijan | 10 | 0/10 | 10 | 10 |
| Bahrain | 10 | 0/10 | 10 | 10 |

NOTES:

1. Dividends received by non-resident shareholders holding at least 25% of the shares in FIEs were eligible for a reduced withholding tax rate in China based on the percentage of equity holding. This exemption was repealed under the New Law. The withholding tax rate for dividends under the New Law is 10%, effective from 1 January 2008. However, distribution of pre-2008 profits can still enjoy withholding tax exemption even if the dividend is declared and distributed after 1 January 2008.
2. Exemption of interest from withholding tax generally applies in the following situations:
   a. Interest on loans made by international financial organisations at a preferential rate to the Chinese government or resident enterprises; or
   b. Interest on loans made by foreign governments to Chinese government. A lower withholding tax rate may apply to interest paid by an enterprise in China to a foreign enterprise without establishments in China.
3. The rates of withholding tax on royalties for the use of industrial, commercial or scientific equipment is 10% and the taxable income is generally taken to be 60% or 70% of the remittance depending on the location of the enterprises. Accordingly, the effective withholding tax rate is 6% or 7% as shown above.
4. A double taxation agreement between Angola and the People's Republic of China was signed on 9 October 2018 but is not yet in force until both jurisdictions have completed their legislative procedures. The official content has not yet been published.
5. A double taxation agreement between Argentina and the People's Republic of China was signed on 2 December 2018 but is not yet in force until both jurisdictions have completed their legislative procedures.
6. A double taxation agreement between the Republic of Congo and the People's Republic of China was signed on 5 September 2018 but is not yet in force until both jurisdictions have completed their legislative procedures.
7. A double taxation agreement between Gabon and the People's Republic of China was signed on 1 September 2018 but is not yet in force until both jurisdictions have completed their legislative procedures.
8. A new amendment to the double taxation agreement between Hong Kong or Macau and Mainland China to specify for the tax levying on the royalty income arising from airplane and ship leasing shall be less than 5%.
9. A new double taxation agreement between Italy and the People's Republic of China was signed on 23 March 2019 but is not yet in force until both jurisdictions have completed their legislative procedures.
10. A double taxation agreement between Kenya and the People's Republic of China was signed on 21 September 2017 but is not yet in force until both jurisdictions have completed their legislative procedures.
11. A new double taxation agreement between Rwanda and the People's Republic of China was signed on 7 December 2021 but is not yet in force until both jurisdictions have completed their legislative procedures.
12. A double taxation agreement between Taiwan and Mainland China was signed on 25 August 2015 but is not yet in force until both jurisdictions have completed their legislative procedures.
13. A double taxation agreement between Uganda and the People's Republic of China was signed on 11 January 2012 but is not yet in force until both jurisdictions have completed their legislative procedures.

From 1 January 2020, non-resident taxpayers shall judge by themselves whether or not meet the requirements for entitlement to treaty benefits, and obtain such entitlement themselves. At the same time, they shall collect and retain relevant support documents for future reference, and accept the follow-up administration from Chinese tax authorities. The support documents may include:

a) Tax resident status certificate issued by the competent tax authority;
b) Contracts, agreements, resolutions of the board of directors or shareholders' meeting, payment vouchers, etc;
c) Relevant information proving the status of "beneficial owner"; and
d) Other information which can prove that the non-resident taxpayer meets the requirements for entitlement to treaty benefits.

- On 27 August 2013, China signed the Convention on Mutual Administrative Assistance in Tax Matters (Convention). The Convention can be described as a multilateral agreement designed to promote international cooperation regarding tax laws. The Convention includes provisions aimed at preserving the rights of taxpayers in relation to the exchange of information between countries.

- On 16 December 2015, China signed the Multilateral Competent Authority Agreement on Automatic Exchange of Financial Account Information.
- On 7 June 2017, China signed the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting.

## KEY TAX POINTS

- Companies resident in Colombia and foreign entities are subject to corporate income tax at a single rate of 31% for 2021 and 35% for 2022 and subsequent years (according to the new tax regulations) on their worldwide income (a reduced 20% rate applies to 'free-trade zone' areas).
- Capital gains are taxed at nominal tax rate as ordinary income if the asset sold has remained for less than two years in the hands of the taxpayer. Capital gains on the sale of assets owned for more than 2 years are taxed as an occasional profit at a rate of 10 % (there are some exemptions, such as gains from lotteries and similar sources that may be subject to a different tax rate).
- Value Added Tax (VAT) is levied at a general rate of 19% on taxable supplies of goods and services by a taxable person within Colombia and on the importation of goods into Colombia by any person. VAT at a rate of 5% applies to staples products and 0% is applied to certain specific services and goods.
- There are a number of 'free-trade zones' and 'special import-export systems' which provide duty-free entry of capital goods and materials to be used in the production goods for exportation.
- Financial entities are subject to a surcharge for the additional income tax as follows: three percentage points are added in the year 2021 amounting to a total of 34% and in the year 2022 and subsequent years three percentage points are added amounting to a total of 38% on their worldwide income. This surtax is applied to financial entities that have taxable income equal to or exceeding COP 4.560 million in a fiscal year since year 2022.

## A. TAXES PAYABLE

The following are the main taxes that apply throughout Colombia.

## COMPANY INCOME TAX

Companies resident in Colombia and foreign entities are subject to corporate income tax at a rate of 31% for 2021 and 35% for 2022 and subsequent years on their worldwide income. Resident corporations are those organised under Colombian law and those foreign companies that have a branch in Colombia. Permanent establishments are also submitted to income tax. A reduced 20% rate applies to 'free-trade zone' areas. The presumptive income tax system applies when the net equity of the previous year is higher than the net taxable income for the current year. For the year 2021 and subsequent years, the rate of presumptive income tax will be 0%.

**Temporary reduction of the statute of limitation for certain income tax returns**

For years 2022 and 2023, Law 2155, which includes the 2021 tax reform, reduces the standard time the tax authorities may audit income tax returns from five years to 6 or 12 months, depending on whether the net income tax increased by 35% or 25% from the prior year, respectively.

## CAPITAL GAINS TAX

Capital gains are taxed at the same rate as ordinary income if the asset sold was owned for less than two years by the taxpayer. Capital gains derived from a sale of assets owned for more than two years is taxed as an occasional profit at a rate of 10 % (there are some exemptions, however, such as gains from lotteries and similar sources that may be subject to a tax rate of 20%).

## VALUE ADDED TAX (VAT)

VAT is applicable on taxable supplies of goods and services by a taxable person within Colombia and on the importation of goods into Colombia by any person. There are currently three VAT rates as follows:

- 19% general rate;
- 5% for staples; and
- 0% for certain services and goods.

For the year 2022, the hotel and tourism industry will be subject to a 0% VAT rate. In addition, for the year 2022, taxpayers who fall under the Simple Tax Regime will be excluded from VAT if the economic activity carried out by them consists solely of the sale of food and beverages.

## COLOMBIAN HOLDING COMPANY (CHC) REGIME

This tax regime was approved via Law 1943 of 2018 (tax reform) and became effective on 1 January 2019. Despite it being ruled unconstitutional, it remained in force with the Ley 2010 of 2019. It was created to serve domestic corporations that have as one of their principal activities, the holding of shares or stakes in domestic and/or foreign entities or corporations, and/or the administration of such investments.

**Requirements**

- Direct or indirect participation in at least 10% of the capital of two or more Colombian and/or foreign companies or entities for a minimum period of 12 months; and
- Having at least three employees, a physical address in Colombia and being able to demonstrate that strategic decisions regarding the investments and assets of the CHC are carried out in Colombia. The simple formality of holding the annual meeting of Shareholders will therefore not suffice.

**Main benefits**

- Dividends or shares distributed by non-resident entities in Colombia to a CHC will be exempt from income tax and will be declared as capital-exempt income;
- Dividends distributed by a CHC to an income taxpayer (resident natural person or resident legal person) would be taxed at the dividend income rate, which ranges from 7.5% to 15%;
- Dividends distributed by a CHC to a non-resident natural or legal person will be qualified as foreign source income and therefore no tax on dividends will be charged.

## OTHER TAXES

## WEALTH TAX

- A wealth tax applied through 2021 for individuals whose net equity is higher than COP 5 billion as per 1 January 2020. This equity is calculated by including the aggregate value as per 1 January of the assets owned (real estate, investments, vehicles, financial products, accounts, etc.) and subtracting the liabilities and debts.
- It should be noted that the net equity is not the taxable base. The taxable base is calculated taking the net equity and subtracting the value of the home of dwelling (up to approximately USD138,000).
- The flat tax rate is 1% and not deductible for income tax purposes.
- Further to the most recent tax reform, Law 2155 of 2021 did not include any wealth tax as a result of which there is no wealth tax for individuals as of 2022.

## PROPERTY TAX

Real estate property is subject to municipal taxation. The tax is usually levied at rates ranging from 5.5 to 11.3 per thousand, with reference to the cadastral value of each urban residential property. Non-residential property is subject to rates ranging from 5 to 33 per thousand.

## VEHICLE TAX

Vehicle possession is subject to municipal taxation. The tax base is the commercial value of the vehicle.

## FINANCIAL TRANSACTIONS TAX

A 0.4 % tax is imposed on all financial transactions, including money withdrawals from an ATM, wire transfers, internet banking, bank drafts and bank checks, money on term deposit, overdrafts, instalment loans and securities underwriting commitments. As of 1 January 2013, income taxpayers are allowed to deduct 50% of bank debit tax from taxable income.

## NATIONAL CONSUMPTION TAX

This tax is applied to restaurants and bars for consumption at a rate of 8%. It is also applied to mobile telephone services at a 4% rate and to certain vehicles, air balloons and aircrafts at 16%.

In addition, for the year 2022 taxpayers that fall under the Simple Tax Regime will be excluded from the Consumption Tax if the economic activity carried out by them consists solely of the sale of food and beverages.

## INDUSTRY AND COMMERCE TAX

This is a municipal tax applied to developing commercial, industrial and service activities in a municipality. The tax rate ranges from 0.2% to 1.38%, is adjusted according to the activity of the company and is fully deductible for income tax purposes. As of 2021 and subsequent years, income taxpayers are allowed to offset 50% of the municipal tax against income tax.

## B. DETERMINATION OF TAXABLE INCOME

### DEPRECIATION

Tax deductions are available for reasonable depreciation rates which reflect the normal wear and tear or obsolescence of the property concerned. The methods of depreciating assets are established in the accounting technique.

### TAX ON DIVIDENDS

Law 2010 of 2019 introduced a dividend tax on profits derived as from 1 January 2020 by non-resident companies:

- 10% final withholding on non-taxable dividends; and
- 31% for 2021 and 30% for 2022 and subsequent years.

Dividends paid to resident natural persons, from the distribution of non-taxable profits, are subject to the following income tax rates:

| Type of dividend | Dividend amount (COP) | Rate (%) |
|---|---|---|
| Non-taxable dividends | Up to 10.6 million | 0 |
| | Above 10.6 million | 10 |
| Taxable dividends received by a resident company (2022) | any amount | 30 |
| Dividends received by a non-resident company (2022) | any amount | 30 |

Dividends received by foreign companies and non-resident natural persons are subject to a 7.5% withholding tax.

### INTEREST DEDUCTIONS

Taxpayers are allowed to deduct interest derived from debts only up to an amount that does not exceed a 2:1 debt-to-equity ratio, taking into account the taxpayer's net equity as of 31 December of the previous year. Any interest payment derived from debts exceeding the said ratio is not deductible. This limitation applies where interest-generating debts are directly or indirectly contracted with related parties.

### DEDUCTION OF TAXES

Are 100% deductible from taxable income: taxes, levies and contributions, which have been effectively paid during the taxable year or period and are directly related to economic activity. Regarding the financial transactions tax, income taxpayers are allowed to deduct 50% of bank debit tax from taxable income. As of 2021 and subsequent years, income taxpayers are allowed to offset 50% of the tax on industry and commerce paid in the taxable year or take it as a 100% deductible item.

### LOSSES

Losses sustained by a company in a tax year can be carried forward and deducted during the following twelve tax years. Loss carry-back is not allowed.

### FOREIGN SOURCE INCOME

Foreign source income for non-residents is not subject to income tax.

### EXPENSES ABROAD

Expenses abroad that are necessary and related to the activity of the company and that generate fiscal income that is not submitted to withholdings are deductible with a limitation of 15% of the taxable base.

## C. FOREIGN TAX RELIEF

Colombia relieves international double taxation unilaterally by granting an ordinary foreign tax credit, i.e. taxpayers may credit the amount of foreign tax paid on foreign-source income up to the amount of domestic Colombian tax that would be due on the income, subject to certain conditions.

## D. CORPORATE GROUPS

There is no concept of group relief for Colombian tax purposes.

## E. TRANSFER PRICING

As a general rule, transactions between related parties must be carried out on arm's length basis, i.e. the prices should be the same as those that would be arrived at in comparable transactions with independent parties. The tax authorities may adjust the prices at which the taxpayer acquires or sells goods, as well as the consideration of other transactions, and modify the taxable base or the relevant loss of a taxpayer for income tax purposes.

Taxpayers that are subject to TP rules must comply with TP obligations, i.e. they must file an annual informative return and submit supporting documentation if exceeding certain thresholds of gross equity in excess of UVT 100,000, or revenues in excess of UVT 61,000, subject to the following exceptions:

- transactions with related parties not exceeding UVT 61,000 during the taxable year are not subject to the obligation of submitting TP supporting documentation;
- transactions listed by article 11 of Decree 3030 of 2013 conducted with related parties not exceeding UVT 32,000 during the taxable year are not subject to the obligation of submitting TP supporting documentation; and
- transactions between a Colombian resident and a resident in a low-tax jurisdiction are only subject to the obligation of submitting TP supporting documentation if the total amount of the transactions carried out during the taxable year exceeds UVT 10,000.

**Country-by-Country reporting**

CbC-reporting applies for fiscal years beginning on or after 1 January 2016 to MNEs with an annual consolidated group revenue equal to or exceeding UVT 81,000,000 in the previous year.

The Master File:

- Applies for fiscal years beginning on or after 1 January 2017.
- Applies to companies that have operations with related parties which have gross assets that exceed UVT 100,000 and/or gross income that exceeds UVT 61,000 and have intercompany transactions (per type) greater than UVT 45,000.

## G. EXCHANGE CONTROL

Certain foreign currency transactions must be channelled through authorized exchange intermediaries:

- Import of property;
- Export of property;
- External indebtedness;
- Foreign investment in Colombia;
- Colombian investment in foreign countries;
- Financial investments and fixed assets based in foreign countries;
- Endorsements and guarantees;
- Derivative transactions.

## H. PERSONAL INCOME TAX

There are three types of income baskets:

- General income basket;
- Pension income basket; and
- Dividend income basket.

The general income basket includes employment income, capital income and non-employment income.

The rates applicable to the general and pension income basket are as follows:

| Taxable income (UVT) | Marginal tax rate (%) | Tax due |
|---|---|---|
| 0 – 1,090 | 0 | 0 |
| 1,091 – 1,700 | 19 | (taxable base in UVT less 1,090 UVT) * 19% |
| 1,701 – 4,100 | 28 | (taxable base in UVT less 1,700 UVT) * 28% + UVT 116 |
| 4,101 – 8,670 | 33 | (taxable base in UVT less 4,100 UVT) * 33% + UVT 788 |
| 8,671 – 18,970 | 35 | (taxable base in UVT less 8,670 UVT) * 35% + UVT 2,296 |
| 18,971 – 31,000 | 37 | (taxable base in UVT less 18,970 UVT) * 37% + UVT 5,901 |
| Above 31,000 | 39 | (taxable base in UVT less 31,000 UVT) * 39% + UVT 10,352 |

## I. TREATY AND WITHHOLDING TAX RATES

| | Dividends | | Interest (%) | Royalties (%) |
|---|---|---|---|---|
| | Individuals, companies (%) | Qualifying companies[1] (%) | | |
| **Treaty countries:** | | | | |
| Bolivia | --[1] | --[1] | --[1] | --[1] |
| Canada | 15 | 5/15[2] | 10 | 0/10 |
| Chile | 7 | 0/7[3] | 5/15[4] | 0/10 |
| Czech Republic | 15 | 5/15[3] | 0/10 | 0/10 |
| Ecuador | --[1] | --[1] | --[1] | --[1] |
| France[9] | 5/15[7] | 0 | 0/10 | 10 |
| India | 5/15 | 5/15 | 10 | 10 |
| Italy[10] | 15 | 5[11] | 0/5/10[12] | 10 |
| Mexico | 0/33[6] | 0/33[6] | 5/10[4] | 10 |
| Peru | --[1] | --[1] | --[1] | --[1] |
| Portugal | 10/33 | 10/33 | 10 | 0/10 |
| South Korea | 10 | 5/10[7] | 0/10[5] | 10 |
| Spain | 5 | 0/5[7] | 5/10 | 0/10 |
| Switzerland | 15 | 0/15[7] | 0/10 | 0/10 |
| United Kingdom[8] | 5/15[7] | 0 | 0/10 | 10 |

NOTES:

1. Domestic rate applies, no reduction under the tax treaty. Source state has exclusive right to tax.

2. The reduced 5% rate applies if the beneficial owner is a company that controls directly or indirectly at least 10% of the voting power in the dividend-paying company.
3. The reduced rate applies if the beneficial owner is a company which holds directly at least 25% of the capital of the dividend-paying company.
4. The lower rate applies to interest derived by banks or insurance companies.
5. The lower rate applies to interests derived by the government, central bank or any financial institution performing functions of a governmental nature.
6. Exclusive taxation by the resident country.
7. The lower rate applies if the beneficial owner is a company other than a partnership which holds directly at least 20% of the capital of the dividend-paying company.
8. Effective date: 1 January 2020.
9. Effective date: 22 October 2020.
10. Effective date: 1 January 2022.
11. The 5% reduced rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 20% of the capital of the dividend-paying company.
12. The 5% reduced rate applies if the beneficial owner is (i) a statutory body or an export financing agency or (ii) a recognised pension fund. The 0% rate applies if the beneficial owner is a Contracting State, a political subdivision or a public law entity thereof, including the Central Bank of that State or if the interest is paid (i) by the State in which the interest arises or by a political subdivision, a local authority (ii) in respect of a loan, debt-claim or credit that is owed to, or made, provided, guaranteed or insured by, that State or a political subdivision or local authority (iii) on the sale on credit of any industrial, commercial or scientific equipment or on the sale on credit of any goods or merchandise by an enterprise of a Contracting State to an enterprise of the other Contracting State (iv) in respect of any loan or credit of whatever kind granted by a bank, but only if the loan or credit concerned is granted for a period not less than three years (v) by a financial institution of a Contracting State to a financial institution of the other Contracting State.

# COOK ISLANDS

## MEMBER FIRM

| City | Name | Contact Information |
|---|---|---|
| Avarua | Stefaan De Ceulaer | +44 20 3691 2511<br>stefaan.deceulaermark@pkf.com |

## BASIC FACTS

| | |
|---|---|
| Full name: | Cook Islands |
| Capital: | Avarua |
| Main languages: | English, Cook Islands Maori |
| Population: | 17,594 (2022 estimate) |
| Monetary unit: | New Zealand Dollar (NZD) |
| Internet domain: | .ck |
| Int. dialling code: | +682 |

## KEY TAX POINTS

- A resident company pays a flat 20% corporate income tax on worldwide profits while a non-resident company pays 28% corporate tax on profits derived from Cook Islands-sourced income.
- VAT is levied at 15% on most goods and services.
- Dividends, interest, royalties, and technical/management fees paid to non-resident companies are subject to a 15% withholding tax.

## A. TAXES PAYABLE

### CORPORATE TAX

A resident company pays a flat 20% corporate income tax on worldwide profits. A non-resident company pays 28% corporate tax on profits derived from Cook Islands-sourced income.

Residents trusts are taxed at 30%. Non-resident trustees are taxed at 30%.

### CAPITAL GAINS TAX

In general, capital gains are not taxed. However, provisions deeming certain income classes to be derived from the Cook Islands include categories that may apply to capital gains.

### BRANCH PROFITS TAX

Non-resident companies are subject to income tax on their Cook Islands-sourced income under the normal income tax rules applicable to resident companies at a rate of 28% (resident companies pay 20%).

There is no branch remittance tax.

### VALUE ADDED TAX (VAT)

VAT is levied at 15% on most goods and services.

The threshold for VAT registration is an annual turnover of NZD 40,000 or more or an expected turnover of NZD 40,000 or more in the next twelve months.

If taxable annual turnover is less than NZD 40,000 one can opt to register for VAT. If annual turnover does not exceed NZD 20,000 one cannot register for VAT.

## B. DETERMINATION OF TAXABLE INCOME

Income is taxed after deduction of exempt income, deductible expenses, depreciation allowances and losses.

### DEPRECIATION

Assets which cost NZD 500 or less can be written off immediately.

Some depreciation rates according to the straight line method are as follows:

| Assets | Rate (%) |
|---|---|
| Agriculture and aquaculture | 7 – 25 |
| Audio, video and photography | 12.5 – 33 |
| Building and engineering industry | 7 – 25 |
| Buildings | 2.5 – 5 |
| Food industry | 10 – 33 |
| Fuel industry | 4 – 12.5 |
| Leisure | 7 – 33 |
| Motels and hotels | 7 – 20 |
| Office equipment | 7 – 33 |
| Transportation | 4 – 50 |
| Default rate (for assets not described above) | 10% |

### LOSSES

Losses may be carried forward indefinitely but cannot be carried back.

## C. FOREIGN TAX RELIEF

Foreign tax relief is available in the form of a credit for foreign tax paid subject to the condition that is substantially of the same nature as domestic income tax. The credit may not exceed the amount of Cook Islands tax payable on foreign income concerned.

## D. CORPORATE GROUPS

There is no group taxation regime in the Cook Islands.

## E. ANTI-AVOIDANCE RULES

**Transfer pricing**

TP adjustments may be made under the 2014 Income Tax Regulations in respect of international non-arm's length dealings between associated persons.

Transactions must be consistent with the arm's length principle as laid down in article 9 of the OECD Model Tax Convention.

APAs (Advance pricing agreements) can be requested for.

**Controlled foreign companies (CFC)**

There are no CFC regulations.

**Thin capitalisation**

A 1.5:1 debt-to-equity ratio is in place at the level of a foreign-controlled resident company. A deduction for interest paid over this ratio is disallowed.

## F. WITHHOLDING TAX

Dividends, interest, royalties, and technical/management fees paid to non-resident companies are subject to a 15% withholding tax.

## G. PERSONAL TAX

Income tax is levied at the following rates for the 2021 income year.

| Taxable income (NZD) | Marginal rate (%) |
|---|---|
| Up to 14,600 | 0 |
| 14,601 – 30,000 | 17 |
| 30,001 – 80,000 | 27 |
| Over 80,000 | 30 |

Note: The 14,600 tax free threshold (as of 1 January 2021) is for a full year of residence in the Cook Islands. The exemption is apportioned to the number of days of residence for individuals who have not been present in the Cook Islands for a full year.

## H. TREATY AND NON-TREATY WITHHOLDING TAX RATES

The Cook Islands have not entered into any double tax treaties.

# COSTA RICA

## MEMBER FIRM

| City | Name | Contact Information |
|---|---|---|
| San José | Franklin Noguera | +506 2253 3060<br>fnoguera@pkf.co.cr |

## BASIC FACTS

| | |
|---|---|
| Full name: | Republic of Costa Rica |
| Capital: | San José |
| Main languages: | Spanish, Mekatelyu, Bribri, Patois |
| Population: | 5.18 million (2022 estimate) |
| Monetary unit: | Costa Rican Colón (CRC) |
| Internet domain: | .cr |
| Int. dialling code: | +506 |

## KEY TAX POINTS

- Corporate income tax ranges from 5% to 20% for small enterprises with annual gross income not exceeding CRC 112,070,000. Companies with annual gross income exceeding this threshold are subject to a 30% tax rate.
- Costa Rica's general VAT rate is 13%. However, there is a 4% tax on airline tickets and healthcare services while a 2% tax is levied on medical products, raw materials and machinery used for production, insurance premiums, purchase and sale of university issued products. Basic food necessities from a specific list are subject to a 1% tax.
- Dividends paid to individuals or foreign entities are subject to a 15% final withholding tax. A lower rate of 5% applies if the stock of the company distributing dividends is traded on the Stock Exchange and if such stock was acquired on that market.
- Interest, commission, fees and other financial expenses paid or credited to non-residents are subject to a 15% final withholding tax applied to the gross amounts, subject to certain exemptions.
- Royalties from a Costa Rican-source paid or credited to non-residents are subject to a 25% final withholding tax on the gross amount.
- Technical and financial advice fees are subject to a 25% final withholding tax on the gross amount.

## A. TAXES PAYABLE

### COMPANY TAX

Costa Rica has a classical corporate tax system, where a general income tax (*impuesto sobre las utilidades*, GIT) is taxed both at the corporate level and at the shareholder level.

Under the territoriality principle, both residents and non-residents are only taxed on Costa Rican-source income. The GIT is levied on net income derived by resident corporations. Non-resident corporations are subject to a final withholding tax.

The fiscal year runs from 1 January until 31 December. Companies need to make 3 instalments of income tax during the year (on the last working day of June, September and December).

Executive Decree No. 4198-H sets the income tax brackets for the tax year as follows:

- 5% on the first CRC 5,286,000 of annual net income;
- 10% between CRC 5,286,001 and CRC 7,930,000 of annual net income;
- 15% between CRC 7,930,001 and CRC 10,573,000 of annual net income;
- 20% on the excess of CRC 10,573,000 of annual net income.

The above mentioned brackets are applicable for small enterprises with annual gross income not exceeding CRC 112,070,000. Companies with annual gross income exceeding this threshold are subject to a 30% tax rate.

In addition, the following exemptions are established for micro and small businesses registered with the Ministry of Economy, Industry, and Commerce or with the Ministry of Agriculture and Livestock:

- 0% of tax on profits in the first year of commercial activities.
- 25% of tax on profits in the second year of commercial activities.
- 50% of tax on profits in the third year of commercial activities.

### BRANCH PROFITS TAX

In Costa Rica branches of foreign companies are subject to corporate income tax according to the rates set out in the table under 'Company Tax'. There is no branch remittance tax.

### CAPITAL GAINS TAX

As from 1 July 2019, the Tax Reform law created a capital gains tax of 15% which applies to investment income and real estate, which is still in place. For real estate the law provides a one-time exemption for those property owners that own property before the law comes into effect. Those will pay 2.25% of the properties' selling price rather than on the capital gained. Also, the primary residence is exempt from capital gains.

### VALUE ADDED TAX

Costa Rica's general tax rate is 13%, however there is a 4% tax on airline tickets and healthcare services. A 2% tax is levied on medical products, raw materials and machinery used for production, insurance premiums, purchase and sale of university issued products. Basic food necessities from a specific list are subject to a 1% tax.

### OTHER TAXES

- Municipal Office Taxes: taxes are paid according to set rates and total assets of the company but the local municipality imposes the payment depending on several factors.
- Corporation Tax: all commercial companies have to pay this tax in January. It varies from USD 100 to USD 300.
- Social Security Tax: payments made monthly by employers and employees on the payroll of companies for the purpose of guaranteeing the functioning of the worker social security system and retirement benefits at the national level.
- Consumption tax: imposed on the import or domestic manufacture of goods. The rates are variable and selective, affecting only certain types of goods.
- Solidarity tax: imposed on dwellings (real estate) including those used habitually, occasionally or for recreational use and calculated on the estimated value of the real estate asset taking into account land and constructions. The rates are as follows:

| Amount (CRC) | Rate (%) |
|---|---|
| Up to 133,000,000 | 0 |
| 133,000,000.01 – 335,000,000 | 0.25 |
| 335,000,000.01 – 672,000,000 | 0.30 |
| 672,000,000.01 – 1,008,000,000 | 0.35 |
| 1,008,000,000.01 – 1,345,000,000 | 0.40 |
| 1,345,000,000.01 – 1,679,000,000 | 0.45 |
| 1,679,000,000.01 – 2,017,000,000 | 0.50 |
| Over 2,017,000,000 | 0.55 |

## B. DETERMINATION OF TAXABLE INCOME

### CAPITAL ALLOWANCES

There are currently no capital allowances in Costa Rica.

### DEPRECIATION

Deprecation methods allowed are the straight-line method and the sum-of-the-year's digits method although the tax authorities may authorize the use of other methods.

Annual rates of depreciation based on the straight-line method are the following:

| | |
|---|---|
| Buildings in general | 2% |
| Wooden buildings | 4% - 6% |
| Construction machinery and equipment | 15% |
| Motor vehicles | 10% |
| Machinery and equipment | 10% |
| All types of boats | 10% |
| Farming machinery | 10% |
| Computer equipment | 20% |

### STOCK/INVENTORY

Stock/inventory is not taxable in Costa Rica.

### CAPITAL GAINS AND LOSSES

Capital gains are not taxable in Costa Rica subject to certain exceptions (see above under 'Capital Gains Tax').

### DIVIDENDS

Dividends are not taxable at the level of corporations in Costa Rica, i.e. dividends received by an operating resident company from another resident company are exempt from corporate income tax. However, this income is subject to a 15% final withholding tax when paid to individuals or foreign entities.

### INTEREST DEDUCTIONS

Thin capitalisation rules were introduced further to the 2019 Tax Reform and are applicable to financing from shareholders or related parties. In such cases, interest will be deductible up to 20% of the earnings before tax, depreciation, and amortization (EBDITA). The difference may be deducted in the following years until the expense is amortised. Thin capitalisation rules do not apply to loans granted by local banks or non-domiciled financial entities supervised in their country of origin.

## LOSSES

- Business losses from industrial and commercial enterprises may be carried forward for 3 years and deducted in equal or different percentages, provided the aggregate does not exceed 100%.
- Agricultural enterprises may carry forward losses for up to 5 years.

## FOREIGN SOURCED INCOME

The corporate tax system is based on the territoriality principle. Tax is only due on business income generated in Costa Rica, i.e. income from services rendered, capital invested and goods located in the country.

## INCENTIVES

Companies operating in a Free Zone enjoy a number of exemptions which are valued according to the conditions of each company that wants to be established in these zones.

## C. FOREIGN TAX RELIEF

There is no double taxation relief for foreign taxes as the Costa Rica tax system is based on the territoriality principle. Foreign taxes paid are not deductible for income tax purposes.

## D. CORPORATE GROUPS

Costa Rican law does not allow group consolidation.

## E. RELATED PARTY TRANSACTIONS

Since 2013 there are first-time transfer pricing rules applicable to business entities or individuals conducting transactions with related parties. These rules follow the OECD Transfer Pricing Guidelines and are based on the at arm's length principle. They provide for advance pricing agreements (APAs), documentation requirements, an annual information return and a transfer pricing methodology.

On 2 February 2018, Costa Rica gazetted Resolution No. DGT-R-001-2018, setting out the rules for filing a Country-by-Country ('CbC') report.

The parent company of a multinational group resident in Costa Rica with consolidated group revenue of the equivalent of EUR 750 million in the Costa Rican currency – presently CRC 529.3 million (USD 924.7 million) – must comply with the obligation to file a CbC report, in line with the rules set out in the Resolution, which is intended to align Costa Rica's transfer pricing documentation regime with the recommendations put forward by the OECD in its Action 13 report on tackling base erosion and profit shifting.

The Resolution provides that groups covered by the regime must identify the entity that will file a CbC report by the last working day of the month of March each year, beginning in March 2018, through an official letter that must be sent digitally and signed by the local representative of the entity, addressed to the Director General of Taxation. The same deadline and rules apply to groups whose ultimate parent entity is in Costa Rica that have elected to file a CbC report in a different territory.

The Resolution provides that regardless of the month in which a reporting entity's fiscal period ends, the first CbC report must be furnished by 31 December 2018, at the latest, relating to the 2017 fiscal year. The same schedule applies to future years: the CbC report is required by 31st December of each year following the relevant fiscal period.

## F. WITHHOLDING TAX

Dividends paid to individuals or foreign entities are subject to a 15% final withholding tax. A lower rate of 5% applies if the stock of the company distributing dividends is traded on the Stock Exchange and if such stock was acquired on that market.

Interest, commission, fees and other financial expenses paid or credited to non-residents are subject to a 15% final withholding tax applied to the gross amounts.

However, interest is exempt from tax when paid to:

- multilateral or bilateral development institutions;
- development banks; or
- non-profit entities that are exempt from income tax.

Royalties from a Costa Rican-source paid or credited to non-residents are subject to a 25% final withholding tax on the gross amount.

Technical and financial advice fees are subject to a 25% final withholding tax on the gross amount.

Public spectacles are subject to a 15% final withholding tax on the gross amount.

## G. EXCHANGE CONTROL

There is no foreign exchange control. Repatriation payments may be done in any currency. Both residents and non-residents may hold bank accounts in any currency.

## H. PERSONAL TAX

As from 1 January 2022 the salary and income tax brackets and tax credit amounts for individuals for the tax year are as follows:

**Self-employed individuals**

| Annual income (CRC) | Rate |
|---|---|
| Up to 3,836,000 | 0% |
| 3,836,001 to 5,729,000 | 10% |
| 5,729,001 to 9,555,000 | 15% |
| 9,555,001 to 19,150,000 | 20% |
| Over 19,150,000 | 25% |

**Salaried individuals**

| Monthly income (CRC) | Rate |
|---|---|
| Up to 863,000 | 0% |
| 863,001 to 1,267,000 | 10% |
| 1,267,001 to 2,223,000 | 15% |
| 2,223,001 to 4,445,000 | 20% |
| Over 4,445,000 | 25% |

## I. TREATY AND NON-TREATY WITHHOLDING TAX RATES

Costa Rica has a Free Commerce Treaty with the USA, Central America and the Dominican Republic and double tax treaties with Germany, Mexico, Spain and the United Arab Emirates.

| | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| **Non-treaty countries:** | | | |
| Companies | 5[4]/15 | 0[3]/15 | 25 |
| Individuals | 5/15 | 8/15 | 25 |
| **Treaty countries:** | | | |
| Germany[2] | 5[1]/15 | 0/5[12] | 10 |
| Mexico[5] | 5[1]/12 | 10 | 10 |
| Spain | 5[1]/12 | 0[6]/5[7]/10[8] | 10 |
| United Arab Emirates[9] | 5/15[10] | 5/10[11] | 12 |

Notes:

1. The 5% reduced rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 20% of the capital of the dividend-paying company.
2. Effective date: 1 January 2017.
3. Interest is exempt from withholding tax if paid to: (i) multilateral or bilateral development institutions (ii) development banks or (iii) non-profit entities that are exempt from income tax.
4. The 5% reduced rate applies if the stock of the dividend-distributing company is traded on a recognized Stock Exchange and if such stock was acquired in that market.
5. Effective date: 1 January 2020.
6. The 0% rate applies if (i) the beneficial owner is a contracting State or a political subdivision or local authority thereof or (ii) the interest is paid in connection with the sale on credit of merchandise or equipment to an enterprise of a contracting State or (iii) the interest is paid in respect of a loan made by a bank or another credit institution.
7. The 5% rate applies if the term of the loan is 5 years or more.
8. As from 1 January 2017, under the application of a most favoured nation clause the 10% general rate is reduced to 5% (general rate is 5% under the Costa Rica-Germany tax treaty).
9. Effective date: 1 January 2022.
10. The 5% reduced rate applies if the beneficial owner is a company (excluding groups of persons) that owns directly at least 20% of the capital of the dividend-paying company; if the described conditions in these provisions are met during a period of 365 days that comprehend the day of the payment of the dividends (in order to calculate this period, will not be considered changes in the property that could derive directly from an entrepreneurial reorganisation, as for example a fusion or split) of the owner company of the shares or that pays the dividends.
11. The 5% reduced rate applies if the maturity of the loan is at least 5 years.
12. The 0% rate applies (i) in case of interest arising in Costa Rica and paid in consideration of a loan guaranteed by the Federal Republic of Germany in respect of export or foreign direct investment or paid to the Government of the Federal Republic of Germany, the Deutsche Bundesbank, the Kreditanstalt für Wiederaufbau or the Deutsche Investitions-und Entwicklungsgesellschaft (ii) if interest is paid in connection with the sale of commercial or scientific equipment on credit (iii) if interest is paid in connection with the sale of goods by an enterprise to another enterprise on credit (iv) if interest is paid for a loan of any kind made by a bank being a resident of one of the Contracting States.

# CROATIA

| Internet domain: | .hr |
| Int. dialling code: | +385 |

## KEY TAX POINTS

- Companies residents in Croatia are subject to corporate tax on profit generated domestically and abroad. Non-resident companies are subject to corporate tax only on profit generated domestically.
- There are no specific rules for branches or groups of companies. Each company is taxed separately.
- Transactions between related companies have to respect transfer pricing principles.
- The standard VAT rate is 25%. There are also reduced rates: 13% and 5% for certain supply of goods and services.
- Many types of payments are subject to withholding tax, such as salaries, dividends, interest and other income.
- Croatian residents – natural persons are subject to income tax on their worldwide income. Non-residents are taxed on income generated in Croatia.
- Real estate tax is paid on real estate transactions (purchase, replacement, gift, etc.). A tax exemption may be applicable subject to certain conditions.

## A. TAXES PAYABLE

## FEDERAL TAXES AND LEVIES

## COMPANY TAX

Resident companies with a registered office or place of management and supervision in Croatia are taxed on their worldwide income. Non-resident companies are taxed only on income derived in Croatia.

The tax year is usually the calendar year. However, the taxpayer can choose to have a fiscal year different from the calendar year, which is subject to approval by the Tax Administration.

The profit tax is paid based on the determined tax base at the rate of:

- 10% if, during the tax period, revenue has been generated up to HRK 7,500,000; or
- 18% if, during the tax period, revenue has been generated over HRK 7,500,000.

Taxpayers are required to submit a corporate income tax return no later than four months following the end of the tax period. During the Covid crisis, the deadlines for submitting tax returns were extended from four to six months. For 2022, it is not yet known if the postponed deadlines will be maintained or if a return to the old deadlines will be adopted.

## CAPITAL GAINS TAX

Companies - Capital gains derived by a company from the sale of any capital assets are generally included in its ordinary profits. However, gains from the company's own shares (treasury shares) are not taxed.

## BRANCH PROFITS TAX

There is no separate branch profit tax in Croatia. Trading profits and capital gains of a Croatian branch of a foreign company are calculated and taxed on the same basis as those of a Croatian resident company and only for Croatian sourced income.

Based on an official opinion issued by the Croatian Tax Authority on 17 August 2017, distribution of 'dividends' from a Croatian permanent establishment to its foreign head office is subject to withholding tax in Croatia.

## VALUE ADDED TAX (VAT)

VAT is payable on sales of goods and supplies of services, import of goods and intra-community acquisitions of goods.

The general VAT rate is 25%. Reduced rates of 13% (bed and breakfast accommodation, half board or full board at hotels or similar establishments, newspapers and magazines of a newspaper publisher having a media statute, edible oils and fats, vegetable and animal origin, baby car seats, baby diapers and baby food, tickets for concerts, water supply in terms of public water supply, electricity supply, public utility waste collection service, fresh meat and fish supply, etc.) and 5% (all kinds of bread, all kinds of milk, books of professional, scientific, artistic, cultural and educational content, medicines approved by the competent authority for medicines and medical products, medical equipment, movie tickets, newspapers of publishers with a daily newspaper statute, scientific journals, etc.) are also levied.

## SPECIAL TAX AND EXCISE DUTIES

Special taxes are applicable to:

1. motor vehicles;
2. coffee and non-alcoholic beverages;
3. vehicle liability insurance premiums and comprehensive car insurance premiums.

Excise duties are applicable to:

1. alcohol and alcoholic beverages;
2. tobacco products;
3. energy;
4. electricity.

## LOCAL TAXES

In Croatia, the following local taxes are payable:

1. inheritance and gift tax;
2. motor vehicles tax;
3. vessels tax;
4. slot machines tax;
5. surtax;
6. consumption tax;
7. holiday homes tax;
8. use of public areas tax.

## OTHER TAXES

## FRINGE BENEFITS TAX

Fringe benefits are subject to salary tax according to the value of the benefit in kind. The fringe benefits are taxed at the level of the employee and include the private use of a company vehicle, interest fee loans of 2% and any other non-business-related expense for the benefit of the employee.

## REAL ESTATE TRANSFER TAX

Tax is charged at a rate of 3% of the market value of the real estate for transactions that include sale and any other means of transfer of ownership of real estate. If VAT is paid, the transaction is not subject to real estate transfer tax.

## B. DETERMINATION OF TAXABLE INCOME

The taxable income of a company (corporate income tax base) is determined in accordance with the accounting regulations as the difference between revenue and expenses assessed in the profit and loss statement, adjusted for certain items that increase or decrease the tax base.

The tax base can also be determined by the cash principle for realised revenue not exceeding HRK 7.5 million in the previous tax period. The option is granted to taxpayers who are at the same time VAT taxpayers and are paying VAT based on the realised income.

## DEPRECIATION

Depreciation is calculated by using the straight-line method over the estimated useful life of an asset. Standard annual depreciation rates prescribed by the Corporate Income Tax Act can be doubled for tax purposes. The deduction for tax depreciation cannot exceed the expense for accounting depreciation. Depreciation expense for personal cars and other vehicles used for personal transportation, whose purchase cost exceeds 400,000 HRK, is tax deductible only for depreciation calculated on the amount of up to 400,000 HRK. If the purchase cost exceeds said threshold, any depreciation above this amount is recognised only if the vehicle serves for a registered rental or transport activity.

Standard depreciation rates prescribed by the Corporate Income Tax Act (max. tax deductible):

| Assets | Rate |
|---|---|
| Buildings and ships over 1,000 gross registered tons | 10% |
| Personal cars and primary herd | 40% |
| Intangible assets, equipment, vehicles (excluding personal cars), machinery | 50% |
| Computers, computer hardware and software, mobiles and network equipment | 100% |
| Other non-mentioned assets | 20% |

## STOCK / INVENTORY

Inventories are valued at the lower of acquisition cost or net realizable value. They include acquisition costs, conversion costs and other costs incurred in bringing inventories to their current location and condition. Accepted valuation methods include “first in, first out” (FIFO) or weighted average method.

Allowable limits of inventory shortages are prescribed.

## CAPITAL GAINS AND LOSSES

Capital gains and losses are included in taxable income and are subject to regular corporate income tax rates. Specific rules apply to unrealised gains and losses on certain types of assets and may not be taxable or not tax deductible, and may be recognised for tax purposes in the period of the realisation of the asset.

## DIVIDENDS

Dividends (profit distribution) are subject to:

- income tax on income from capital for resident natural persons - 10%;
- income tax on income from capital for non-resident natural persons - 10% (when a double tax treaty is not applicable);
- withholding tax for foreign companies - 10% (when a double tax treaty is not applicable).

Profit distribution to domestic companies is not taxable.

## INTEREST DEDUCTIONS

Interest on late payment is tax deductible unless due to related companies.

Interest expense on loans between related companies is deductible up to the amount prescribed by the Finance Minister and published by the Croatian National Bank. For 2022 the maximum allowed interest rate is 2.68%. Interest expense calculation must also comply with thin capitalisation rules.

The interest rate determined according to the transfer pricing rules and applicable to all contracts may be applied instead of maximum interest rate allowed of 2.68%.

**Thin capitalisation**

Interest paid or accrued on a loan is not deductible if (i) the loan is granted by a shareholder or member owning more than 25% of the share capital or voting power of the company and (ii) the loan exceeds the amount of four times the shareholder's or member's share in the capital or voting rights. The thin capitalization rules do not apply to loans granted by banks or other financial institutions.

**Interest limit rule**

As from 1 January 2019, the tax deductibility of interest is limited, in line with the EU Anti-Tax Avoidance Directive (ATAD) (2016/1164). A deduction of excessive borrowing costs from the taxable base is limited if the following criteria are met:

- the borrowing costs exceed 30% of earnings before interest, tax, depreciation and amortisation (EBITDA).
- the borrowing costs in a financial year exceed EUR 3 million; and

If both criteria are established, it must be assessed whether the company is in a profit or loss-making position in order to determine whether the borrowing costs which exceed EUR 3 million and 30% of EBITDA exceed the loss incurred. The portion exceeding the loss will be taxed.

Non-deductible excessive borrowing costs can be carried forward for 3 years.

**CFC rules**

As of 1 January 2019, controlled foreign company (CFC) rules apply. A foreign company is regarded controlled by a Croatian taxpayer if:

- the taxpayer by itself or together with its related parties holds a direct or indirect participation of more than 50% of the voting rights, owns directly or indirectly more than 50% of capital or is entitled to more than 50% of the profits of the foreign company; and
- the actual corporate income tax paid on its profits by the foreign company is lower than 50% of the corporate income tax that would apply for such profits under the corporate income tax law applicable to the taxpayer.

Under CFC rules, the following non-distributed income of a CFC may be attributed to the Croatian taxpayer, unless the CFC can prove to have sufficient personnel, equipment, assets and premises:

- interest and other income generated by financial assets;
- royalties and any other income generated from intellectual property;
- dividends and income from the disposal of shares;
- income from financial leasing;
- income from insurance, banking and other financial activities; and
- income of invoicing companies deriving income from purchasing and selling goods and services purchased from and sold to related parties.

Tax losses of the CFC may not be included in the taxable base of the taxpayer and the income of the CFC must be included in the taxable base of the Croatian taxpayer proportionally to the participation in the CFC.

**Exit taxation**

Exit tax rules were implemented as of 1 January 2020 in compliance with the EU Anti-Tax Avoidance Directive (ATAD1; Council Directive (EU) 2016/1164). The difference in the market value and the tax value of property is subject to tax when transferred out of Croatia or tax residence is transferred out of Croatia, which may be paid over five tax periods where property is transferred to an EU or EEA Member State with which a mutual assistance agreement has been concluded.

**Hybrid mismatches**

Hybrid mismatch rules were implemented in order to address double deduction and deduction without inclusion mismatches in compliance with the EU Anti-Tax Avoidance Directive as amended by Council Directive (EU) 2017/952 (ATAD2). This includes provisions for the disallowance of a deduction in the case of double deduction mismatch or when a payee does not include the income in its tax base, and provisions for the inclusion of income that would otherwise lead to a mismatch if a corresponding deduction is not disallowed in the payer's jurisdiction.

The provisions regarding reverse hybrid mismatches entered into force on 1 January 2022.

## LOSSES

Tax losses can be carried forward for up to five years. Carry-back of tax losses is not allowed.

Tax losses carried forward may be lost after a business combination (merger, acquisition, i.e.) and/or change of ownership of more than 50% if the taxpayer did not perform any business activity in the two years preceding such an event or if the business activity of the taxpayers changed within two years after such an event.

## TAX INCENTIVES

Tax incentives are available in accordance with the Corporate Income Tax Act and other special legislation regulating incentives. Incentives can be granted for investment activities, business support activities, and activities with higher added value. The tax base can hence be reduced by 50% to 100%.

Investment incentives depend on the amount invested and number of employees contracted. Employment incentives are granted for creating new jobs and for training required by the new job.

## C. FOREIGN TAX RELIEF

Foreign tax paid on income earned by a Croatian resident may be credited against his income or corporate tax liability. The income should be earned directly or through a permanent establishment abroad. The tax relief may be granted up to the amount of the Croatian corporate tax payable.

## D. CORPORATE GROUPS

Consolidated returns or other tax reliefs for corporate groups are not allowed. Companies within the group must submit separate tax returns and are taxed separately.

## E. RELATED PARTY TRANSACTIONS

Related parties shall mean parties wherein one party participates directly or indirectly in management, supervision, or capital of the other party, or both parties participate directly or indirectly in management, supervision or capital of the company.

Transactions between related parties must be contracted under the terms and conditions that would be agreed between unrelated parties. Companies should prepare and maintain transfer pricing documentation.

Interest paid or accrued between related parties must correspond to interest as would have been agreed between unrelated parties. Excessive interest payment is not deductible.

Transfer pricing rules also apply to transactions between related domestic entities if one of the entities is entitled to tax relief or has a right to carry forward tax losses from previous tax years.

## F. WITHHOLDING TAX

Withholding tax at the rate of 15% is applied to payments of fees related to intellectual property rights, services of market research, business consulting, tax consulting, auditing, and interest to foreign legal entities. Withholding tax on performance of artists, entertainers, athletes, dividends and profit sharing is taxed at the rate of 10%.

The Corporate Income Tax Act and certain EU Directives provide for special treatment for dividends, royalties, and interest paid to related companies in other EU states. A full exemption may be applied under certain conditions.

An increased 20% withholding tax is applicable for all payments subject to withholding tax and paid to countries on the EU list of non-cooperative jurisdictions.

If a country has concluded a double tax treaty with Croatia, withholding tax rates may be lower than the non-treaty rates. To benefit from lower rates, a special application needs to be completed and submitted.

The MLI (Multilateral Instrument) is in force in Croatia from June 2021.

## G. EXCHANGE CONTROL

The Croatian National bank and the Foreign Exchange Act regulate domestic and foreign currency transactions. There are no restrictions on transfers of paid-in share capital, dividends, profit, interest, loyalty, and similar payments.

## H. PERSONAL TAX

Income tax is chargeable on Croatian residents natural persons for income generated in Croatia and abroad.

Croatian residents are taxed on the following types of income:

- income from employment (progressive taxation, rates 20% (up to HRK 360,000) and 30% (over HRK 360,000));
- income from self-employment (progressive taxation, rates 20% and 30%);
- income from property and property rights (tax rate 10% and 20%)
- income from capital (tax rate 10%, 20% and 30%)
- other income (tax rate 20%).

Income from employment, self-employment and other income are annual income. For these types of income, the annual tax calculation is carried out. When calculating the annual tax liability, advanced paid tax (paid withholding tax for salaries and other income) is included.

Income from property, property rights and capital is considered final income. They are subject to withholding tax and are not included in the annual tax liability.

### CAPITAL GAINS

- Capital gains from the sale of movable property and securities are currently not subject to tax. The capital gains tax at a rate of 10% plus city surcharge applies to gains derived from financial instruments. However, such gains are not taxable if the financial instruments are held for more than 2 years.
- Capital gains from the sale of immovable property and proprietary rights are taxed by way of final withholding. The taxable amount is the market value of the property less the acquisition price (adjusted for inflation) and costs of alienation. However, such gains are not taxable if (i) the sale takes place after 2 years of ownership, (ii) the taxpayer or his dependants lived on the property before the sale or (iii) the sale is directly connected with a divorce or with an inheritance.

### ANNUAL INCOME

The withholding liability for personal tax lies with the employer. The taxable base is calculated by applying prescribed tax deductions and tax allowances to the total amount of the so called “annual income”. The taxpayer’s personal deduction is a non-taxable part of the income which amounts to HRK 4,000 per month. Tax rates are progressive and applicable to the taxable base when assessing annual income, comprised of employment income, self-employment income and other income not considered as final other income.

The applicable tax rates are:

| Taxable income (HRK) | Rate (%) |
|---|---|
| Up to 360,000 | 20 |
| Over 360,000 | 30 |

Employers are obliged to withhold tax from salaries at the following progressive rates:

| Taxable income (HRK per month) | Rate (%) |
|---|---|
| Up to 30,000 | 20 |
| Over 30,000 | 30 |

Municipalities are authorised to introduce a surcharge on the income tax at rates between 10% and 30%, depending on the number of inhabitants. The actual highest rate of the surcharge is currently 18% (e.g. in Zagreb).

## SOCIAL CONTRIBUTIONS

Employers calculate and pay contributions for their employees. Pension insurance contributions are calculated at a rate of 20% on gross salary. Pension insurance contributions are withheld from the salary. Contributions for health insurance (16,5%) are calculated on the gross salary but are at the employer's expense.

## I. TREATY AND NON-TREATY WITHHOLDING TAX RATES

Croatia has signed double tax treaties on avoidance of double taxation with 65 countries listed below. If double tax treaty applies, double taxations avoidance is ensured in accordance with the provisions of relevant treaty, mostly by granted tax relief on a credit basis.

| | Dividends with capital share (%) | Dividends in all other cases (%) | Interest (%) | Royalties (%) |
|---|---|---|---|---|
| **Non-treaty countries** | | | | |
| Corporations | 10 | 10 | 0/15/20 | 0/15/20 |
| Individuals | 10 | 10 | 10 | 20 |
| **Treaty countries:** | | | | |
| Albania | 10 | 10 | 10 | 10 |
| Armenia | 0[2] | 10 | 10 | 5 |
| Austria | 0[3] | 15 | 5 | 0 |

Notes:

1. If the beneficial owner is a company which holds directly at least 25% of the capital of the company paying the dividends.
2. If the beneficial owner is a company (excluding partnership) which holds directly at least 25% of the capital of the company paying the dividends.
3. If the beneficial owner is a company which holds directly at least 10% of the capital of the company paying the dividends.
4. When the dividends are paid by a company which is a resident of Croatia to a resident of Malta who is the beneficial owner.
5. If the beneficial owner is a company (excluding partnership) which holds directly at least 10% of the capital of the company paying the dividends.
6. If the beneficial owner is a company (excluding partnership) which holds directly at least 25% of the capital of the company paying the dividends and this share should be at least 100,000 USD.
7. If the beneficial owner is a company which holds directly at least 20% of the capital of the company paying the dividends.
8. If the dividends are paid to a company the capital of which is wholly or partly divided into shares, as long as it holds directly at least 25% of the capital of the company paying the dividends.
9. If the beneficial owner is a company which holds directly at least 10 per cent of the capital of the company paying the dividends where that latter company is a resident of Israel and the dividends are paid out of profits which are subject to tax in Israel at a rate which is lower than the normal rate of Israeli company tax.
10. If the beneficial owner is a company (excluding partnership) which holds directly at least 25% of the capital of the company paying the dividends and has invested to the capital of that company at least 150,000 EUR.

11. If the beneficial owner is a company which is a resident of the other Contracting State and controls, directly or indirectly, at least 25% of the capital of the company paying the dividends (other than where the dividends are paid by an investment vehicle as mentioned in subparagraph (b)).
12. When dividends are paid out of income (including gains) derived directly or indirectly from immovable property within the meaning of Article 6. by an investment vehicle which distributes most of this income annually and whose income from such immovable property is exempted from tax.

## KEY TAX POINTS

- Companies resident in Cyprus are subject to corporation tax on all their income: non-resident companies only on profits derived from Cyprus. Branches managed and controlled from Cyprus are taxed as resident companies.
- Capital gains tax applies to residents and non-residents disposing of immovable property situated in Cyprus, and shares in companies owning such assets.
- VAT is charged on taxable supplies and imports. A reduced rate, zero rate and exemption regime applies to the supply of certain goods and services.
- In the absence of a tax treaty, the tax paid on overseas income in a non-treaty country is normally allowed as a tax credit by concession and proof of payment. The tax credit may not exceed the Cyprus corporation tax on the overseas income.
- Cyprus tax resident individuals are subject to income tax on worldwide income, non-residents are subject to income tax on Cyprus-sourced income only.
- Cyprus tax resident and domicile individuals are subject to defence contributions on dividend, interest and rental income. Cyprus tax residents who are not Cyprus domiciles are exempted from defence contribution.
- An individual is considered of a Cyprus domicile if he/she has a domicile of origin in Cyprus based on the provisions of the Will and Succession legislation. Examples of domicile may include domicile of the parents at the time of birth or permanently living and intending to live in a country.
- Notwithstanding the above, an individual who although not of a Cyprus origin has been a Cyprus tax resident for 17 out of the last 20 years, prior to the relevant tax year, is considered as a Cyprus domicile.

## A. TAXES PAYABLE

### COMPANY TAX

A Cyprus resident company is subject to corporation tax on its worldwide income. Non-resident companies are subject to corporation tax only on profits derived in the Republic. Resident companies are those companies whose management and control is exercised from Cyprus.

The corporation tax rate is 12.50%. Taxes are paid by two instalments in advance based on a provisional assessment, which should be at least 75% of the final tax charge. A fiscal year is the calendar year.

### CAPITAL GAINS TAX

Gains in respect of the sale of immovable property situated in Cyprus (including shares of a company having immovable property) are subject to Capital Gains Tax. Both residents and non-resident persons are subject to capital gains tax if they own immovable property in Cyprus. The applicable rate on the taxable income is 20%.

No tax is levied in respect of immovable property situated abroad. No tax is levied on capital gains in respect of profits on disposal of shares of companies (other the ones which own immovable property).

## BRANCH PROFITS TAX

Branches of foreign companies managed and controlled from Cyprus are taxed as if they were Cyprus resident companies. Foreign branch profits of Cyprus companies are relieved from Cyprus tax.

## VALUE ADDED TAX (VAT)

VAT is generally imposed on taxable supplies of goods and services and undeveloped land for business purposes at the standard rate of 19%.

Certain supplies of goods and services are charged at the reduced rates of 5% - 9%; others are zero-rated, notably ship management services. Some supplies of goods and services are exempt from VAT: specifically, financial services, health and welfare, insurance, and education.

The annual VAT registration threshold is EUR 15,600.

Cyprus has adopted the provisions of the EU Directive 2008/8/EC effective from 1 January 2010. Exports of goods or provision of services to non-EU or to EU VAT registered persons are subject to 0%.

## FRINGE BENEFITS TAX

Certain benefits such as use of cars for private purposes, rent, school fees etc are considered as benefits in kind and taxed accordingly.

## LOCAL TAXES

Local taxes include transfer fees on sale and purchase of property, stamp duty (only in respect of assets situated in Cyprus or agreements executed in Cyprus).

## OTHER TAXES

Contributions to the social insurance fund are paid on the salaries of resident employees. The total amount paid by an employer can vary from 12 to 14% of the gross salary. The employee pays a further 8.3%. Employers contribute a further 2.90% and the employees 2.65% on the National Health Scheme. The maximum salary on which contributions are paid is currently EUR 4,840 per month and for the NHS EUR 180,000 per annum.

## B. DETERMINATION OF TAXABLE INCOME

Resident companies pay taxes on their net taxable profits. These are determined by pooling their worldwide income and deducting allowable expenses, charges and capital allowances. Non-resident companies pay taxes on their Cyprus-sourced income only.

## CAPITAL ALLOWANCES

Annual wear and tear allowances are allowed on various assets including plant and machinery; fixtures and fittings; commercial vehicles; hotels; commercial buildings; industrial buildings; computer hardware and software; and loose tools. Allowances range from 3% to 33% per annum. No capital allowances are given for saloon cars not used in the business.

## DEPRECIATION

Depreciation included in the financial statements of entities is disallowed for tax purposes, as capital allowances are given instead. For accounting purposes, depreciation rates applied are those which write-off the assets over their useful life.

## STOCK / INVENTORY

Opening and closing stocks are normally stated at the lower of cost and net realizable value on a FIFO basis.

## CAPITAL GAINS AND LOSSES

Capital gains are computed separately and do not form part of the annual taxable income for corporation tax purposes. Indexation allowance is available for the determination of the taxable gains and losses. Capital losses can be offset against capital gains.

## DIVIDENDS

Dividends receivable are exempt from corporation tax. Resident companies withhold contributions to the defence fund of the Republic on dividends paid only to Cyprus tax domicile and resident individuals at the rate of 17%.

## INTEREST DEDUCTIONS

Interest expense is deductible if the borrowing is wholly and exclusively for the purposes of producing income. Interest paid to a connected party is a deductible expense.

Notional interest deductions are given on issue of share capital to encourage avoidance of thin capitalisation up to 80% on the annual taxable income. Interest deductibility restrictions exist to the extent that a company has non-business assets.

The Anti-Avoidance Tax Directive (ATAD) provisions have been transposed into domestic tax legislation regarding interest limitation rules. As from 1 January 2019, exceeding borrowing costs shall be deductible in the tax period in which they are incurred only up to 30% of the taxpayer's earnings before interest, tax, depreciation and amortisation (EBITDA). Exceeding borrowing costs means the amount by which the deductible borrowing costs of a taxpayer exceed the taxable interest and related revenues that the taxpayer receives according to national law. In cases where the companies are part of the same group, exceeding borrowing costs and the EBITDA are calculated at the level of the group and comprise the results of all its members.

The above provisions do not apply in the following circumstances:

a) When exceeding borrowing costs are up to EUR 3 million;

b) When the taxpayer is a standalone entity.

Excess borrowing costs which cannot be set off against the taxable income in the current tax period can be carried forward to be set off against the income of the taxpayer for the next five subsequent years.

## INTEREST INCOME

Where interest in considered as profit close to the ordinary activities of the company, then such type of income is considered as trading profit and not interest. Hence it is not subject to defence contribution and taxed at the corporate tax rate of 12.5%. Examples include financing and insurance companies, interest from trade receivables etc.

Interest income is subject to a 30% defence contribution tax. If the recipient is a Cyprus non domicile individual defence contribution is exempted.

## INCOME FROM INTANGIBLE ASSETS

Please note the following with respect to income from Intangible assets:

- The cost of acquisition or development of the Intellectual Property is amortized equally for a period of 5 years, giving a 20% taxable allowance each year.
- The existing IP Box regime grants deductions under a formula with a maximum deduction up to 80% of the profit deriving from either royalty income (including compensation for improper use), or sale of qualifying intellectual property is deducted as a tax expense, leaving only 20% of the net profit being taxed.
- Qualified IP include, *inter alia*, computer software and patents but not trademarks and goodwill.

## LOSSES

Trading losses may be carried forward for a period of 5 years. Losses from overseas activities can be set off against chargeable income for the year and can be carried forward subject to the 5 year period.

If, within any period of three years, there is both a change in the beneficial ownership of a company and a major change in the nature of trade and, at any time before the change of ownership the activities in the trade become small or negligible, then no trading losses incurred prior to the change in ownership are allowed.

## FOREIGN SOURCE INCOME

Cyprus has controlled foreign company legislation (CFC) legislation as to the extent of dividends from an overseas company. Such dividends are taxed if the companies paying the dividend have activities the nature of which amounts to more than 50% investment income and their country of residence imposes corporation tax which is less than 6.25% per annum. Both criteria must apply in order for the tax to be charged.

The Anti-Avoidance Tax Directive (ATAD) provisions have been transposed into domestic tax legislation regarding CFC rules. As from 1 January 2019, an entity or a permanent establishment of which the profits are not subject to tax or are exempt from tax in Cyprus, is treated as a CFC where the following conditions are met:

a) In the case of an entity, the taxpayer by itself, or together with its associated enterprises holds a direct or indirect participation of more than 50% of the voting rights, or owns directly or indirectly more than 50% of capital or is entitled to receive more than 50% of the profits of that entity; and
b) The actual corporate tax paid on its profits by the entity or permanent establishment is lower than 50% of the corporate tax that would have been charged on the entity or permanent establishment under the applicable corporate tax system of Cyprus.

Where an entity or permanent establishment is treated as a CFC, Cyprus shall include in the tax base the non-distributed income of the entity or the income of the permanent establishment which is derived from the following categories:

i) Interest or any other income generated by financial assets;
ii) Royalties or any other income generated from intellectual property;
iii) Dividends and income from the disposal of shares;
iv) Income from financial leasing;
v) Income from insurance, banking and other financial activities;
vi) Income from invoicing companies earning sales and services income from goods and services purchased from and sold to associated enterprises, adding no or little economic value.

The CFC rules are subject to certain exemptions.

## TAX INCENTIVES

Some of the main incentives are as follows:

a) Low corporation tax of rates at 12.50%;
b) Non-resident entities are only taxed on their Cyprus-sourced income;
c) No withholding tax on payments of dividend and interest to non-residents and Cyprus domiciled individuals;
d) Profits and dividends from abroad are tax-free free subject to CFC rules stated above;
e) Restructuring legislation in line with the EU Merger Directive extending to companies in non-EU countries;
f) Up to 80% deduction from income from qualifying intellectual properties (royalties etc.);
g) Tax incentives on investors on issue of new share capital to innovative companies;
h) Notional interest tax deductions on new share capital issued;
i) A Cyprus holding company can pay virtually no tax on its profits; and
j) Tax incentives for employees coming to Cyprus from overseas (see further).

## C. FOREIGN TAX RELIEF

Foreign tax paid on income of a Cyprus resident company is credited against the corporation tax, subject to Double Tax treaty conditions. In the absence of a tax treaty, the tax paid in a non-treaty country is normally allowed as a deductible expense. Tax paid is credited only if a similar concession is given to Cyprus companies in that particular country. The foreign tax relief cannot exceed the Cyprus corporation tax on these profits.

## D. CORPORATE GROUPS

Group loss relief is available to a group of Cyprus resident companies in relation to current year losses. Two companies will be considered as part of a group if one company holds 75% of the voting share capital or distributable profits of the other, or both companies are 75% subsidiaries of a third company. The group must be in existence within the whole fiscal year unless a company was incorporated in the year.

## E. RELATED PARTY TRANSACTIONS

Transactions between related parties do not need to be adjusted for tax purposes as long as they are on 'an arm's length' basis. When there are transactions which are deemed as not at arm's length, then tax adjustments apply on a notional basis.

## F. WITHHOLDING TAX

Irrespective of the existence of a double tax treaty, national tax legislation does not impose withholding tax with the exception of certain royalty payments if the IP is utilised in Cyprus. Cyprus has entered into double tax treaties with over 60 countries. Non-resident companies have no obligation to withhold taxes on any payments they make.

Dividends paid (directly or indirectly) to non-resident shareholders and interest paid to non-residents are not subject to withholding tax.

## G. EXCHANGE CONTROL

There are no exchange controls in Cyprus.

## H. PERSONAL TAX

A person who is resident for 183 days or more in aggregate during the tax year is deemed to be tax resident.

A person who is resident for more than 60 days and does not spend more than 183 days in another country has the option to become a Cyprus tax resident.

All individuals who are tax residents of the Republic are taxed on their worldwide income. Non-resident individuals are taxed on income derived from Cyprus only. Income tax is payable on assessable income less allowable deductions. Assessable income includes income from employment, rent, interest and profits from trade and business or professions.

Allowable expenses include social insurance and national health contributions and pension contributions.

Individuals taking up employment in the Republic, who were non-resident prior to employment are entitled to an allowance of 20% of remuneration up to a maximum of EUR 8,543 for a period of five years. Individuals with annual remuneration in excess of EUR 100,000 are entitled to an increased allowance of up to 50% for a period of five years, without a maximum ceiling. Salaried services rendered abroad for a total period of more than 90 days to a non-resident employer or at a PE abroad of a resident employer are exempt from income tax.

The current tax rates are as follows:

| Taxable income (EUR) | Normal tax rate (%) |
|---|---|
| 0 – 19,500 | 0 |
| 19,501 – 28,000 | 20 |
| 28,001 – 36,300 | 25 |
| 36,301 – 60,000 | 30 |
| Over 60,000 | 35 |

Pensions receivable from abroad by a resident in respect of services rendered outside Cyprus are still taxed at 5%, after deduction of the first EUR 3,417 if the individual elects to do so.

## TREATY AND NON-TREATY WITHHOLDING TAX RATES

According to domestic tax legislation there is no withholding tax on dividend and interest payments to non-residents.

Notes:

1. The 0% rate applies if the beneficial owner has invested in the capital of the dividend-paying company not less than the equivalent of EUR 150,000 at the time of the investment.
2. The 10% rate applies if the beneficial owner holds directly at least 25% of the share capital of the company. The 5% rate applies if the beneficial owner of the dividends has invested in the share capital of the dividend-paying company not less than EUR 200,000.
3. The 10% rate applies if the beneficial owner is a company which holds directly or indirectly at least 25% of the capital of the dividend-paying company.
4. The 5% rate applies if the beneficial owner is a company which owns directly at least 25% of the capital of the dividend-paying company.
5. The 0% rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the dividend-paying company where such holding is being possessed for an uninterrupted period of no less than one year.
6. The 5% rate applies if the beneficial owner is a company (other than a partnership) which controls directly at least 10% of the voting power in the dividend-paying company.
7. The 10% rate applies if the beneficial owner is a company (other than a partnership) which controls directly at least 10% of the voting power in the dividend-paying company.
8. The 5% rate applies if the beneficial owner is a company which holds directly at least 10% of the capital of the dividend-paying company.
9. The 0% rate applies if the beneficial owner is a company (other than a partnership).
10. The 0% rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the dividend-paying company.
11. The 0% rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the dividend-paying company for an uninterrupted period of 24 months.
12. The 5% rate applies if the beneficial owner is (i) an insurance undertaking or a pension fund or (ii) a company whose shares are listed on a registered stock exchange provided that no less than 15% of the voting shares of that company are in free float and which holds directly at least 15% of the capital of the dividend-paying company throughout a 365 day period that includes the day of payment of the dividends or (iii) the government, a political subdivision or local authority thereof or (iv) the Central Bank.
13. The 5% rate applies if the beneficial owner is a company which holds at least 10% of the capital of the dividend-paying company.
14. The 0% rate applies if the capital of the dividend-receiving company is wholly or partly divided into shares and provided that it holds directly at least 10% of the capital of the dividend-paying company.
15. The 0% rate applies if the capital of the dividend-receiving company (other than a partnership) is wholly or partly divided into shares and provided that it holds directly at least 10% of the capital of the dividend-paying company during an uninterrupted period of at least one year.
16. The 0% rate applies if the capital of the dividend-receiving company is wholly or partly divided into shares and provided that it holds directly at least 25% of the capital of the dividend-paying company.
17. The 5% rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 20% of the capital of the dividend-paying company and at least has invested in the acquisition of the shares or other rights of the company the equivalent of at least EUR 100,000.
18. The 15% rate only applies if the dividend arises mainly out of profits from immovable property in the country where the property is located.
19. Effective date: 1 January 2021.
20. The 5% rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 20% of the capital of the dividend-paying company throughout a 365 day period that includes the day of the payment of the dividend.
21. The 0% rate applies if the beneficial owner is (i) an insurance undertaking or a pension fund or (ii) the government, a political subdivision or a local authority thereof or (iii) the Central Bank or (iv) a bank or the interest is paid in respect of the following securities listed on a registered stock exchange: government bonds, corporate bonds or Eurobonds.

    The 5% rate applies if the beneficial owner is a company whose shares are listed on a registered stock exchange provided that no less than 15% of the voting shares of that company are in free float and which holds directly at least 15% of the capital of the interest-paying company throughout a 365 day period that includes the day of payment of the interest.
22. Dividends paid to non-residents are not subject to withholding tax. However, effective 31 December 2022 dividends are subject to a 17% withholding tax when paid by a Cyprus tax resident to companies that are:
    - Resident in jurisdictions included in the EU blacklist of non-cooperative jurisdictions; or
    - Incorporated/registered in a jurisdiction included in the EU blacklist and are not tax resident in any other jurisdiction not included in the EU blacklist.

    The following conditions apply:
    - The dividend-receiving company holds directly, either alone or jointly with associated companies, more than 50% of the capital or voting rights, or is entitled to receive more than 50% of the profits in the dividend-paying company; and
    - The associated companies are also resident in an EU blacklisted jurisdiction or incorporated/registered in an EU blacklisted jurisdictions and are not tax resident in any other jurisdiction not included in the EU blacklist.

    Dividend payments from shares listed on a recognised stock exchange are not subject to withholding tax.
23. Interest paid to non-residents is not subject to withholding tax. However, effective 31 December 2022 interest is subject to a 30% withholding tax when paid by a Cyprus tax resident company to companies that are:
    - Resident in jurisdictions included in the EU Blacklist; or
    - Incorporated/registered in a jurisdiction included in the EU Blacklist and are not tax resident in any other jurisdiction not included in the EU Blacklist.

The withholding tax does not apply to:

- Interest payments on securities listed on a recognised stock exchange; or
- Interest payments made by individuals.

24. Royalties paid to non-residents who are not engaged in any business (irrespective of the existence of a permanent establishment) in Cyprus for the use of rights in Cyprus are subject to a final withholding tax:
    - 5% on film royalties; and
    - 10% on any other royalties, subject to the application of a lower rate under a tax treaty.

    However, effective 31 December 2022, royalties are subject to a 10% withholding tax when paid by a Cyprus tax resident company to companies that are:
    - Resident in jurisdictions included in the EU Blacklist; or
    - incorporated/registered in a jurisdiction included in the EU Blacklist and are not tax resident in any other jurisdiction not included in the EU Blacklist.

    The withholding tax does not apply in case of royalty payments made by individuals.

    Under Cyprus domestic law implementing the provisions of the Interest and Royalties Directive (2003/49), outbound royalties are exempt from withholding tax, provided that the beneficial owner of the royalties is an associated company of the paying company and is resident in another Member State or such a company's permanent establishment situated in another Member State. Two companies are "associated companies" if (i) one of them has a direct minimum holding of 25% in the capital of the other, or (ii) a third EU company has a direct minimum holding of 25% in the capital of the two companies. The relevant companies must have a legal form listed in the Annex of the Directive and be subject to a corporate income tax. No minimum holding period is required.

## KEY TAX POINTS

- Czech resident companies are subject to tax on their worldwide income. Non-resident companies are subject to tax on Czech-sourced income.
- Capital gains are not taxed separately but included within ordinary income.
- VAT is applied to the provision of goods, transfer of real estate, provision of services and imports. The basic rate is 21% although there is a lower rate of 15% and from 1 January 2015 a second lower rate of 10%.
- Transfer pricing rules apply to non-arm's length profit-sharing arrangements agreed between related parties.
- A real estate tax is levied on land and buildings.
- Ordinary credits for foreign income tax on overseas income are available for Czech resident taxpayers where a relevant double tax treaty exists. If there is no tax treaty, the overseas tax is included in the tax expenses for the following period.
- For 2021, the personal income tax rate is 15% and 23%. The 23% rate applies to the part of the income which exceeds 48 times the annual average salary (CZK 1,701,168 for 2021 and CZK 1,867,728 for 2022 due to the increase of the annual average salary). The 15% rate applies to a separate tax base, in particular for foreign income from capital assets.
- In addition to income tax, employees also pay social security and medical insurance contributions at the rate of 11 % withheld by their employers from their gross wage. The employer´s part of social security and medical insurance contributions represents an additional cost of 33.8%.
- Withholding tax applies to dividends, licence fees, interest and related income and royalties.

## A. TAXES PAYABLE

### COMPANY TAX

Company tax is payable by Czech resident companies on income derived from worldwide sources. Non-resident companies are required to pay the tax on income sourced in the Czech Republic. Resident companies are those which have their registered office or place of management located in the Czech Republic. The corporate income tax rate is 19% for 2021 and this is applied to all taxable profits of a business, including capital gains from the sale of shares (if not exempt under the participation exemption regime). A 5% and 0% tax rate applies to income from defined investments and pension funds respectively.

A company may choose either a calendar year or an accounting year as its tax year. Tax returns are due within three months of the end of the tax period (in case of electronic submission the period is 4 months) or within six months for audited entities or entities represented by a chartered tax advisor. The tax is payable within the deadline for filing the tax return. Estimated company tax payments (advance tax payments) are paid semi-annually or quarterly.

**Online registration of sales**

Taxpayers in the Czech Republic were obliged until Q1 2020 to electronically evidence sales derived from business activities when they are made in cash, cheque, voucher or in any similar way. After suspension of the obligation due to the Covid-19 pandemic there is currently a legal procedure underway to abolish said obligation completely.

**Exit tax**

The relocation of the taxpayer´s business assets from the Czech Republic to another state will be treated as a transfer of assets for a consideration and corporate income tax will be levied. The consideration is determined as the price agreed between unrelated parties under current business conditions.

## CAPITAL GAINS TAX

Capital gains such as dividends, interest from owed securities, deposit accounts and deeds are subject to a 15% withholding tax. Income of residents of countries outside the EU or EEA that don't have a double tax treaty or tax information exchange agreement in force with the Czech Republic are subject to a 35 % withholding tax. Dividend income is exempt from withholding tax if paid to a resident of an EU member state in accordance with the EU Parent-Subsidiary Directive No. 2011/96/ EU.

The parent company must have a minimum 10% holding in the subsidiary's registered capital for an uninterrupted period of at least 12 months. The subsidiary must have the form of the entities indicated in the Parent-Subsidiary directive, be a tax resident in an EU Member State and be subject to corporate income tax in this State. An exemption also applies under the same conditions to dividends distributed by subsidiaries with their seat in Switzerland, Norway, Iceland or Liechtenstein. Moreover, a similar exemption applies to the income arising from a transfer of shareholdings by a parent company in its subsidiaries within the EU.

The scope of exemption is extended to dividends distributed by qualified subsidiaries with their seat outside the EU where a relevant double tax treaty is applicable and that are subject to a tax rate at a minimum of 12% both in the year of payment of distribution of the dividend and in the previous year. The exemption also applies to income from the transfer of shareholdings by parent companies in subsidiaries outside the EU under the same conditions.

Interest and royalties are tax exempt when paid by a Czech company to a parent company in another member state in the EU or EEA (which is a shareholder of the Czech company and has held at least 25% of its share capital for a period of at least 24 months). It is necessary to apply for this tax exemption with the Czech tax authorities. The following documents must generally be: tax domicile certificate of the parent company, extract of the commercial register of the parent company, extract of commercial register of the Czech company, the title of the licence fees, and confirmation from the tax authority of the parent company that it has its tax domicile in the EU or EEA state.

For companies, capital gains are included within ordinary income in the year they arise and are taxed as part of their respective taxable profits for the period. Capital gains are not taxed separately in the Czech Republic except for those from a foreign source.

## BRANCH PROFITS TAX

There is no separate branch profits tax in the Czech Republic. The income of a Czech branch of a foreign company is subject to taxation at the standard applicable 19% rate for 2021. Attribution of profits to a branch, if it does not result from its separately held bookkeeping, is commonly determined on the basis of the margins that are generally realised by resident companies undertaking similar activities.

## VALUE ADDED TAX (VAT)

Value Added Tax (VAT) is imposed on the domestic provision of goods, transfer of real estate, provision of services, including the transfer or use of rights and importation of goods. There are three rates of VAT; basic rate 21% and reduced rates of 15% and 10% since 2015. The 21% rate applies generally to supplies of goods and most services with some exceptions while the 15% rate applies to selected services and some goods such as foodstuff. The 10% rate applies in particular to pharmaceutical products, printed books, certain children's nutrition and qualified mill products, and services, such as transport, catering, accommodation, spa, barber and hairdresser, tickets to theatres, museums and other cultural facilities, supply of heat, cold, water.

With effect from 1 January 2021, the following changes to VAT legislation apply:

- Exemption of rent from VAT;
- Refund of the undisputed part of the excess VAT deduction.

Goods and services exported from the Czech Republic to non-EU countries are exempt from VAT. The principles of the Sixth VAT Directive (771388/EU) have applied since 1 May 2004 to goods and services exported from the Czech Republic to EU countries. A group of related parties may register as a single VAT taxpayer.

Selected VAT payers will be obliged to submit the VAT Control Statement after 1 January 2016. It is introduced as an effective tool to detect and prevent tax evasion and fraud. Its aim and purpose is to enable the tax authority to obtain information on selected transactions carried out by taxable persons registered for VAT and along with other available information to identify suspicious groups of taxable persons (chains, carousels), which are illegally withdrawing funds from the public budget. VAT Control Statement is based on records for the purposes of VAT, which taxable persons registered for VAT are already obliged to keep. Transactions which are declared in the VAT Control Statement:

1. Domestic taxable supplies (CZ) or receipt of advance payment;
2. Domestic acquisition of goods/services or providing of advance payment;
3. Received transactions from which the acquirer is obliged to declare VAT;
4. Special scheme for investment gold:
    - Received Intermediary Service for which VAT is applied;
    - Supply of VAT exempt investment gold for which a taxable person registered for VAT is entitled to deduct VAT; or

- Production of investment gold or transformation of gold into investment gold.

Deadline for submission of the VAT Control Statement (CZ taxable persons registered for VAT):

- Legal entities or group registration have to submit the VAT Control Statement no later than the 25th day after the end of each month,
- Individuals have to submit the VAT Control Statement on the same day as the VAT return (no later than the 25th day after the taxable period: month or quarter, or special taxable period e.g. in an insolvency procedure etc.).

The VAT Control Statement has to be submitted electronically.

## OTHER TAXES

Tax on real estate property is levied on buildings, structures and land situated within the Czech Republic. The taxpayer is the actual owner or in limited cases the user of the property. The rate depends on the size, quality, type and location of the property. This tax is a tax deductible expense if it has been paid and is not part of the valuation of the property.

Income from inheritance and gifts is not subject to a specific tax but is included in the income tax regime and subject to tax at a rate of 15% and 23% for individuals, and 19% for companies (broad exemptions apply to donations for individuals while income from inheritance is exempt for all taxpayers).

Employers' payment on behalf of their employees towards the workers' social security and medical insurance is at the rate of 33.8 % of the gross payroll (social security premium payments are capped at CZK 1,701,168 for 2021 and CZK 1,867,728 for 2022).

There is no Stamp Duty in the Czech Republic although a notarial fee may apply for certain documents. There is no net wealth/worth tax in the Czech Republic.

## B. DETERMINATION OF TAXABLE INCOME

The company's taxable income is determined by ascertaining assessable income and then subtracting all allowable expenses. In general, to be tax deductible, all expenses must be related to the gaining or producing of assessable income and are not exempt pursuant to the law on income tax.

## DEPRECIATION

The tax law prescribes six groups of tangible assets for tax depreciation purposes using depreciation periods ranging from three to fifty years. Either straight-line or accelerated depreciation methods are available. The choice of a method is made by the taxpayer and, once selected, cannot be changed for the remaining life of the asset.

| Assets | Depreciation group | Depreciation period (minimum years) |
|---|---|---|
| Office machines and computers, tools | 1 | 3 |
| Engines, motor vehicles, machines, audio-visual equipment | 2 | 5 |
| Elevators, escalators, turbines, air conditioning equipment, electric motors, and generators | 3 | 10 |
| Buildings made of wood and plastic, long-distance lines, and pipes | 4 | 20 |
| Buildings (except for those listed in groups 4 and 6), roads, bridges, tunnels | 5 | 30 |
| Administrative buildings, department stores, historical buildings, and hotels | 6 | 50 |

Tangible assets with economic useful lives of more than one year and acquisition prices higher than CZK 80,000 (instead of CZK 40,000 until 31 December 2020) are subject to tax depreciation. Buildings are always considered tangible assets. For tangible assets purchased in the year 2020 there is the option to apply the acquisition price of CZK 80,000.

From 1 January 2021 intangible assets are no longer defined in the Income Tax Act. For tax purposes, intangible assets are depreciated according to the Czech Accounting Act.

In connection with the COVID pandemic an accelerated depreciation regime has been adopted for assets falling into depreciation groups 1 and 2 according to Annex No. 1 to the Income Tax Act (ITA). Assets purchased between 1 January 2020 and 31 December 2021, subject to the condition that the taxpayer is the first depreciator, may be depreciated as follows:

- Tangible assets included in depreciation group 1 purchased during the period 2020-21 may be depreciated equally without interruption up to 100% of the acquisition price for 12 months;
- Tangible assets included in depreciation group 2 purchased during the same period may be depreciated equally without interruption by the taxpayer up to 100% of the acquisition price for 24 months (for the first 12 months up to 60% of the acquisition price, for the next 12 months up to 40% of the entry price).

## STOCK / INVENTORY

All trading stock is valued at purchase price, including ancillary costs incurred. Stock produced by the company's own operation is valued at internal costs. If a temporary reduction of stock value is non-tax deductible, corrective provisions are applied. Accepted valuation methods include the use of the arithmetical average cost and first in first out (FIFO) methods but not last in first out (LIFO) or the replacement-cost methods (except for livestock).

## DIVIDENDS

If dividends are not tax exempt under the participation exemption regime, they are subject to a final withholding tax of 15 % or the rate set in an applicable double tax treaty if paid to a non-resident. A tax exemption does not apply to a profit share paid out as result of the liquidation of a company. A withholding tax of 35 % applies to dividends paid to resident entities of countries which are not part of the EU or EEA and do not have an enforceable double tax treaty or tax information exchange agreement with the Czech Republic.

## INTEREST DEDUCTIONS

Interest incurred for business purposes is broadly tax deductible. However, thin capitalisation rules apply which can restrict its deduction. Notably, financial costs (e.g. interest plus other related costs, such as bank fees) of credits and loans for the relevant tax period shall be considered non-deductible expenses for the proportion of related-party loans which exceed four times the accounting equity (based on Czech GAAP) of the borrower. The non-deductible expense is the amount of the interest connected to the part of the sum of credits and loans (including financing costs) from related parties by which it exceeds a 4:1 debt-to-equity ratio (6:1 for banks and insurance companies) in the period for which the tax return is submitted.

Apart from the thin capitalisation rule, an additional interest limitation rule has been introduced:

- The part of financial costs that exceeds 30% of EBITDA or 80 million CZK is non-deductible;
- All financial costs are taken into account for calculation purposes (not just interest paid to related parties);
- For calculation purposes the financial costs are reduced by financial costs which are non-deductible according to the thin capitalisation rule and by the financial revenue.

## LOSSES

Tax losses may be carried forward for five tax periods following the year in which the tax loss has been declared. As of 1 July 2020 losses may be carried back up to two tax periods before the period in which the loss arose. Losses arising (after 2004) may be transferred within the framework of common taxation of a parent company and its subsidiary(ies) within the EU territory (transfers of enterprises, mergers and demergers of enterprises) subject to strict conditions.

## INCENTIVES

Investment incentives including tax relief are governed by the Investment Incentives Act and apply only to Czech entities (including Czech subsidiaries of foreign companies). A variety of incentives are available including financial support for training or retraining of employees or the creation of new jobs, capital expenditure grants and income tax relief. There are also incentives to support technology centres, strategic services and the manufacturing industry of the Czech Republic.

## C. FOREIGN TAX RELIEF

Ordinary credits for foreign income tax are available to resident taxpayers under Czech law where a double tax treaty exists which indicates a tax credit as a method of avoidance of double taxation. The clearance or exemption method is available, according to the particular double tax treaty. If there is no tax treaty relief, the legal entity will include the foreign tax paid as a tax expense for the following period provided it was imposed on income which has been included in the Czech entity's taxable income.

## D. CORPORATE GROUPS

There is no group taxation in the Czech Republic. Each company is taxed as a standalone entity regardless of its ownership or control relationships.

## E. RELATED PARTY TRANSACTIONS

Non-arm's length pricing arrangements between related parties are addressed by transfer pricing legislation which allows the tax authority to adjust the prices to reflect third party arm's length values.

Where such adjustments are made by the tax authorities, which can be the result of an audit, additional tax liabilities and penalties can arise which can also affect a company's ability to claim investment incentives. As of the tax period 2014 qualified companies are obliged to file a special form describing arrangements between related parties together with the corporate income tax return. The Czech Republic tax authorities follow OECD pricing guidelines and an Advance Pricing Agreement (APA) between a company and its related parties can be agreed upon.

CFC legislation is in force since 2020. A Czech entity has to include in its tax base selected income of its controlled foreign company(ies), i.e. a company in whose capital the Czech company participates directly or indirectly for more than 50 %.

Another condition for the inclusion in the domestic tax base is that the foreign company does not carry out any substantial economic activity and its tax liability abroad is lower than one half of the tax liability that such company would have if it were taxed under domestic tax laws. If the foreign subsidiary qualifies as a controlled company under these conditions, its Czech parent company will have to include its selected income, such as income from dividends, interest and royalties in its own tax base. The Czech parent company may then offset any tax paid by the subsidiary on this foreign-sourced income against its tax liability.

## F. WITHHOLDING TAX

Certain types of income of companies are subject to withholding tax at source. In the case of resident taxpayers, dividends from Czech sources are subject to a final withholding tax at 15 % whereas interest and royalties are not subject to withholding tax and are included in the general tax base. In the case of non-residents, dividends, interest and royalties are all subject to 15 % withholding tax if an exemption does not apply – see more in particular above under the chapter 'Capital Gains Tax'. Income of residents of countries outside the EU or EEA which do not have a double tax treaty or tax information exchange agreement in force with the Czech Republic are subject to 35 % withholding tax.

In case the exemption applies a taxpayer paying income exceeding CZK 300,000 to a foreign resident needs to inform the Czech tax authority about this payment.

## G. EXCHANGE CONTROL

The Foreign Exchange Act allows the Czech currency to be used freely to pay for business and other costs, for direct investment and reinvestment and for purchase of real estate property abroad. Capital transfers have been deregulated but the reporting duty has been retained. Sales of foreign currency and gold are permitted where one of the parties is an entity holding a licence or foreign currency permit.

C

## H. PERSONAL TAX

Income tax is payable by Czech resident individuals on income derived from worldwide sources. Non-resident individuals are only required to pay tax on Czech-sourced income. Tax residence is determined by reference to permanent home or whether the individual has spent at least 183 days of the relevant calendar year in the Czech Republic.

Income tax is payable on the total tax base from different types of income. Taxable income of individuals includes employment income, business income, certain capital gains, dividend income, rental income, interest income, annuities and other income including benefits in kind related to such income. Generally, the tax base is calculated as the difference between assessable income and tax-deductible allowable expenses. Expenses cannot be claimed for employment income or capital gains (most of which are subject to withholding tax). Employment income cannot be reduced by losses of any other categories of income. Income from business or rental operations can be reduced by losses derived from other categories. Income from employment is taxable on an individual basis and is reduced by some deductible items and personal allowances.

For 2021, the personal income tax rates are 15% and 23%. The 23% rate is applied to the amount which in aggregate exceeds 48 times the annual average salary (CZK 1,701,168 for 2021 and CZK 1,867,728 for 2022).

Employees hired under an employment contract under Czech law pay social security and medical insurance contributions at the rate of 11% withheld by their employers from their gross wages. This represents 6.5% for social security and 4.5% for health insurance. The contribution rates for the employer are 24.8% for social security and 9% for health insurance. Medical insurance and social security contributions are also paid by self-employed individuals.

The maximum annual social security contributions limit which applies to both employees and entrepreneurs is 48 times the average monthly wage per year ((CZK 1,701,168 for 2021 and CZK 1,867,728 for 2022).

A deduction of up to CZK 24,000 per year is available for private contributions paid on private life insurance. A deduction is also available for up to CZK 24,000 per year (subject to certain conditions) for private contributions paid to a private pension insurance fund.

- A deduction of up to CZK 150,000 per year is available for interest paid on a mortgage for the taxpayer´s permanent home, subject to certain strict conditions.
- Income from a sale of shares represents part of an individual’s total income tax base and is subject to a 15 % tax rate. Shares sold for less than CZK 100,000 in the course of one taxable period are exempt from taxation. Similarly, if an individual has owned property for longer than a certain time (depending on property), the gain arising from the sale of that property is exempt from tax.

Tax returns are due on 1 April (1 May in case of electronic submission) or 1 July if prepared by a chartered tax advisor. Instalments to income tax from employment income are paid monthly. Payments on account of tax on income from business operations, rental income, etc. are made semi-annually and quarterly, as for corporations, based on the last known tax liability.

Inheritance and Gift Taxes have been abolished. From 2014 any income from an inheritance and from gifts is part of personal income tax (and therefore subject to the flat rate of 15% and 23%). Any income from an inheritance is exempt from income tax whereas the exemption of the income from a gift depends on the level of kinship of the beneficiary of the gift to the donator.

From 1 January 2021 a personal income taxpayer may opt for the flat rate tax regime. Individuals shall apply to the competent tax authority until the 10th day of the beginning of the tax period.

## I. TREATY AND NON·TREATY WITHHOLDING TAX RATES

| | **Dividends[1] (%)** | **Interest[2] (%)** | **Royalties[3] (%)** |

| Vietnam | 10 | 0/10 | 10 |

Notes:

1. If the recipient is a company that owns at least a certain amount of the capital, or a certain amount of the voting shares of the company paying the dividend directly, then the lower rate applies. Dividends paid to residents of countries outside the EU and the EEA which do not have an enforceable double tax treaty or tax information exchange agreement with the Czech Republic are subject to 35 % withholding tax.
2. When interest is received by the government or a state-owned institution or is paid by the government then the lower rate applies. Interest paid to residents of countries outside the EU and the EEA which do not have an enforceable double tax treaty or tax information exchange agreement with the Czech Republic are subject to 35 % withholding tax.
3. Cultural royalties are generally subject to the lower rate. Royalties paid to residents of countries outside the EU and the EEA which do not have an enforceable double tax treaty or tax information exchange agreement with the Czech Republic are subject to 35 % withholding tax.
4. Effective from 1 January 2022.

## KEY TAX POINTS

- Danish resident companies are subject to corporate income tax on Danish profits (including gains) and to some extent on foreign-sourced income. Non-resident companies pay tax on income sourced in Denmark.
- Branches of foreign companies are subject to tax on income derived from activities in Denmark.
- Danish companies within a group, along with Danish permanent establishments and real estate owned by foreign subsidiaries are subject to compulsory Danish joint taxation.

- Value added tax is applied at a standard rate, but subject to zero-rating and exemption. Danish legislation generally follows EU Directives.
- A property tax is levied locally.
- A controlled foreign company (CFC) system operates to attribute profits of a foreign subsidiary to a Danish parent where the activities of the subsidiary are mainly financial.
- Unilateral and tax treaty relief are available for foreign tax levied on profits subject to Danish corporate income tax.
- Dividends, interest and royalty payments are subject to withholding tax, unless exempted under a relevant double tax treaty.
- Individuals resident in Denmark are taxable on worldwide income, non-residents on Danish-sourced income.
- A special basis of assessment is available for some expatriates employed temporarily in Denmark for a maximum of 84 months.

## A. TAXES PAYABLE

## FEDERAL TAXES AND LEVIES

### COMPANY TAX

Resident corporations are subject to Danish corporate income tax on their profits in Denmark and, to some extent, on income sourced abroad. Non-resident companies are required to pay tax on income sourced in Denmark. Resident corporations include all Danish companies registered with the Danish Commerce and Companies Agency, as well as certain non-registered companies that are treated as residents. Companies incorporated under the laws of another country may be considered to be resident in Denmark if their central management and control is exercised in Denmark.

Corporate income tax is charged at 22%. Tax is paid on account on a current year basis in two instalments on 20 March and 20 November during the tax year, with a final instalment due on 20 November following the end of the tax year.

### CAPITAL GAINS TAX

Capital gains/losses on disposals of assets are, in general, included in taxable income and subject to tax at the normal corporate tax rate. Capital gains on disposals of shares are exempt unless the shareholding is less than 10% in a listed company. Capital losses on disposals of other shares are deductible, if they can be offset against gains on other shares in a listed company. Capital gains on disposals of assets and liabilities of a Danish permanent establishment are taxable in Denmark. This applies also to Danish real estate.

### BRANCH PROFITS TAX

Branches of foreign companies are taxed on income derived from their activities in Denmark. Tax is calculated at the corporate tax rate of 22%.

### VALUE ADDED TAX (VAT)

Danish value added tax (VAT) is levied at a standard rate of 25% of the sale price of most goods and services and the legislation generally follows EU Directives. No graduated rates exist. Certain services are exempt, including most banking and medical services. Instead, a payroll tax of between 3.54% and 15.3% is charged on the actual payroll or, in certain cases, on the result before interest and capital gains. Exports are zero rated.

### FRINGE BENEFITS TAX (FBT)

The tax value of most benefits in kind is, in principle, the fair market value. Employees are taxed on benefits in kind received. The cost of benefits in kind is deductible for tax purposes by the company.

## LOCAL TAXES

### PROPERTY TAX

Owners of real estate are subject to a local property tax based on the value of the land. The tax is levied at various local rates ranging from 1.8% to 4.4%.

### OTHER TAXES

Transfer tax is levied on registration only. A change in ownership of real estate is charged at the rate of 0.6% + DKK 1,750 and on mortgages at 1.45% + DKK 1,730. Different rates apply to registrations of ships and aircraft.

Stamp Duty only applies to certain insurance policies.

### SOCIAL SECURITY TAXES

Social security is funded almost entirely through income taxes. The only exceptions are the ATP and Health Contribution. ATP is a supplementary State pension scheme. The employer pays DKK 2,271 (2022) annually and employees pay DKK 1,136 (2022) annually.

Health Contribution is collected from employees and self-employed persons. The contribution is levied on gross salary and business income respectively at the rate of 8%. The employer withholds the contribution for the employee and the amount of the contribution is deductible when computing the employee’s personal income.

## B. DETERMINATION OF TAXABLE INCOME

Net or taxable income is arrived at by adjusting the accounting profits for non-taxable income and non-deductible items.

### DEPRECIATION

Assets which cost less than DKK 31,000 (2022) or have an estimated useful life of less than three years can be written off immediately. Ships of less than 20 tons, machinery, furniture and other equipment are generally depreciated collectively using the declining-balance method. The balance may be written off at a maximum rate of 25%.

Buildings for manufacturing etc. are depreciated under the straight-line method according to the useful life. The normal rate is 4% per annum. If the useful life is less than 25 years, the rate will be increased accordingly. Depreciation of office buildings and dwelling houses is not allowable for tax purposes.

The cost of goodwill, know-how, etc., may be depreciated over seven years using the straight-line method.

## STOCK / INVENTORY

Inventory may be valued at cost or market value.

## CAPITAL GAINS AND LOSSES

See discussion above.

## DIVIDENDS

Dividends received from a subsidiary are basically exempt from tax if the parent company owns 10% or more of the share capital during a 12-month period in which the dividend is received. It is a requirement that the dividend-paying company is resident within the EU or in a tax treaty country and that it is not a ‘flow-through’ entity. Specific rules apply to dividends received from a subsidiary in a non-EU and non-treaty country. Withheld tax will be considered as a tax payment on account.

## INTEREST

Interest income, except interest on overpaid corporate tax, is included in taxable income. Companies must compute this income on an accruals basis. In general, interest paid is deductible whether due to foreign or resident creditors and regardless of the purpose of the debt. However, limitations may apply due to Danish thin capitalisation rules and limitations apply if net financial expenses exceed DKK 21.3 million (2022). Interest on overdue tax is not deductible.

## LOSSES

Losses may normally be carried forward indefinitely. It is possible to deduct DKK 8,767,500 (2021). If the profit exceeds DKK 8,767,500 (2021), it is possible to deduct 60% of the remaining profit. However, losses may not be offset against interest and other capital income, net of interest paid, if more than 50% of the shares in the company have changed ownership since the loss was incurred. If a company enters into a settlement with creditors, losses carried forward are reduced by the nominal amount of debt cancelled.

In cases where the company receives a capital contribution in connection with a reconstruction from a principal creditor and the company subsequently repays its debts to the creditor, tax losses from income years up to and including the year of the capital contribution will be reduced by an amount equal to the capital reduction. Furthermore, tax losses cannot be offset against future taxable income if the company has no activity at the time the transfer was agreed. Losses cannot be carried back.

## CONTROLLED FINANCIAL COMPANY (CFC) INCOME

Profits made by Danish financial companies or foreign subsidiaries will be taxed in Denmark if the Danish parent company (directly/indirectly) controls the company (votes/decisive influence) and if the business of the company is mainly of a financial nature (i.e. more than half of its gross income is derived from certain financial activities).

Credit is given for foreign taxes paid on foreign income. Losses resulting from activities in foreign countries cannot generally be deducted from the Danish-sourced income unless voluntary global joint taxation has been chosen.

## C. FOREIGN TAX RELIEF

Danish tax law provides for unilateral relief for foreign taxes paid on some types of income (dividends, royalties, etc). Such relief may not exceed the Danish tax liability that relates to the foreign income concerned. If a tax treaty is in force, relief may be restricted to the tax that the foreign state is entitled to levy under the treaty. If income is earned in a country with which Denmark has no tax treaty, any foreign tax is relieved by the credit method under domestic tax rules. No Danish tax credit is given for foreign permanent establishment profit or real estate profit unless voluntary global joint taxation is elected for. Thus, Denmark has adopted the territoriality principle for Danish companies.

## D. CORPORATE GROUPS

Danish companies within a group, along with Danish permanent establishments and real estate of foreign subsidiaries are subject to compulsory Danish joint taxation. Such companies must have the same financial year. The group taxation allows the pooling of profits and losses. Losses of one company can be offset against profits of another company.

Such a group may elect to enter into a voluntary global joint taxation arrangement with foreign group companies and foreign permanent establishments and real estate. If voluntary global joint taxation is opted for, all foreign group companies, permanent establishments and real estate ‘above’ and ‘below’

Denmark must be included in the joint taxation (cf. ‘global’). In this case, capital gains derived by non-residents from disposals of Danish shares or bonds may be subject to tax in Denmark.

The foreign entities’ income, assessed according to Danish rules, is then included in the Danish taxable income of the group, but normally no additional Danish tax is imposed because a tax credit for foreign corporate tax paid is allowed. The inclusion may allow foreign tax losses to be offset against Danish taxable profits. Special rules apply with respect to exemption/credit for foreign taxes and claw back provisions respectively.

## E. RELATED PARTY TRANSACTIONS

Related party transactions must be in accordance with the arm’s length principle.

## F. WITHHOLDING TAX

Danish outbound dividends are generally subject to a 27% withholding tax. Outbound interest payments are generally subject to a

30% Danish withholding tax. However, several modifications apply, and under most tax treaties this withholding tax is reduced or refunded. Outbound royalty payments under industrial, commercial or scientific agreements are subject to a 30% withholding tax. Under most tax treaties, this withholding tax is reduced or refunded.

## G. EXCHANGE CONTROLS

In general, Denmark does not impose exchange controls on business activities.

## H. PERSONAL TAX

Individuals are deemed to be residents of Denmark for tax purposes if they occupy accommodation in Denmark as their permanent place of abode or remain in the country for a period of six months or more. Tax residency is normally terminated upon emigration. Some assets will be deemed to be taxed as sold at market value on the date of departure. Any profit will be taxed in Denmark.

Residents are subject to Danish taxation on their worldwide income. Non-resident individuals are subject to tax on Danish-sourced income, including dividends, royalties, profits from Danish permanent establishments, profits from real estate and salaries earned from work performed in Denmark.

Profits made by more than 50% held (shares/votes) financial companies established in low tax countries are taxable in Denmark at 22% (CFC). The CFC taxation generally only applies if the company's financial income is more than 50% of its total income but may not apply if the company is established in an EU or a tax treaty country. Dividends and gains and losses on the disposals of shares are taxed jointly. The tax rate on this income is 27% on amounts up to DKK 57,200 and 42% on the surplus (2022).

Personal income includes all remuneration received from the taxpayer's employer, whether in cash or kind, such as free lodging, free use of a car, free use of the telephone etc. Pension payments, unemployment benefits etc. are also included in personal income. After deduction of Labour Market Contributions of 8% (for 2022) on gross salary and business income, tax due on the total taxable income and its components is determined as follows:

- A basic charge of 24.6% (average) on taxable income is due to the municipality and church, in which the taxpayer lives;
- The basic State tax rate is 12.1% on taxable personal and positive interest income (2022); and,
- An additional higher rate of 15% is levied on income exceeding DKK 552,500 (2022).

Some expatriates who are employed in Denmark for a maximum period of 84 months can, under certain conditions, choose to be taxed on their gross salary by a final tax instead of ordinary income tax. The tax rate is 27% plus Labour Market Contributions of 8%.

| Maximum tax rates (including local and national taxes) | |
|---|---|
| **2022** | **(%)** |
| Personal income | 56.50 |
| Net capital expenses[1] | 25.60 |
| Deductions[2] | 25.60 |

NOTES:

1. Tax value of interest expenses and capital losses if deductible.
2. Tax value of other tax deductions such as car allowance etc.

## I. TREATY AND NON-TREATY WITHHOLDING TAX RATES

NOTES:

1. Denmark imposes withholding taxes on outbound interest payments at a rate of 30%. However, Danish withholding tax does not generally apply to interest payments to a foreign group company in an EU Member State or protected by a tax treaty.
2. The lower rate applies to 25% ownership.
3. The lower rate applies to 10% ownership.
4. The zero rate applies to 10% ownership.
5. The treaty was terminated on 1 January 2009. A new treaty is expected.
6. The zero rate applies to 50% ownership.
7. The zero rate applies if the EU Parent/subsidiary Directive applies.
8. The lower rate applies if 50% of the votes are held.
9. The treaty does not apply to 1929 Luxembourg holding companies.
10. The 5% rate applies if paid to an approved entity.
11. The zero rate applies if 80% of the votes are held.
12. The 5% rate applies to 70% ownership or an investment of at least USD 12 million.
13. The 10% rate applies between 25% and 70% ownership.
14. The 10% rate applies if 25% of the votes are held.
15. 0% rate applies where recipient of the dividend holds at least 10% of the capital of the company paying the dividend, or is the Central bank, a Government agency or a pension fund in Cyprus.
16. The lower rate applies to 20% ownership and an investment of at least EUR 1 million.
17. The zero rate applies to a pension fund.

## BASIC FACTS

| | |
|---|---|
| Full name: | Republic of Djibouti |
| Capital: | Djibouti |
| Main languages: | French, Arabic, English |
| Population: | 1.015 million (2022 estimate) |
| Monetary unit: | DJF (Djibouti Franc) |
| Internet domain: | .dj |
| Int. dialling code: | +253 |

## KEY TAX POINTS

- In the Republic of Djibouti, the main taxes are: Value Added Tax (VAT), Domestic Consumption Tax (TIC), Tax on salaries (ITS), Minimum Lump-sum Tax (IMF), Business Profit Tax (IBP), and Exceptional Contribution (CE).
- Resident companies in Djibouti (Eurl, Sàrl, SA, SAS) are subject to income tax at 25% and must pay the business licence.
- Non-resident companies in Djibouti but operating on Djibouti territory are subject to tax on profits derived from within the country.
- Capital gains are taxed in the same way as standard income (Business Profit Tax (IBP) at 25%.
- The Minimum Lump-sum Tax is applicable on realised turnover excluding VAT and is set at a rate of 1%. It is due if it exceeds the amount of the tax on profits or in case of a loss. The minimum IMF is DJF 120,000.
- There are two main tax incentive schemes for investors. Regime A and Regime B. Regime A relates to investments with a

minimum amount of DJF 5 million (approximately USD 28,000) and Regime B to investments with a minimum amount of DJF 50 million (approximately USD 280,000).

- A zero % contribution is levied at the level of new companies and enterprises investing in the hotel sector, real estate (hire and sale) and processing industry under the Investment Code regime on their imports during the construction phase or set-up/ installation prior to the production phase (art. 19 of Finance Act 2022).
- Exceptional Contribution (CE): a rate of 1% on turnover or 10% on profits will be applied to the 2021 results of companies exempted under the Investment Code or located in freezones (art. 14 of Finance Act 2022). However, the tax authorities retain the higher of said rates.
- Dividends are not subject to tax in Djibouti.

## A. TAXES PAYABLE

### BUSINESS PROFIT TAX

- Companies (natural or legal persons) resident in or carrying out commercial activities in the Republic of Djibouti are subject to corporate income tax.
- The tax to which these companies are subject comes at a rate of 25%, is based on a calendar year (from 1 January to 31 December of the same year) and is established each year according to the profits made by the natural or legal person during the last year.
- This tax is settled, controlled and collected by the General Tax Directorate and must be declared before 31 March of the following year.
- Traders in freezones now need to pay an Exceptional Contribution (CE) on the 2021 turnover.

The following are exempt from business profit tax:

- Movie theatres;
- Agricultural cooperative societies and their unions;
- Companies whose sole purpose is trading in securities;
- Profits reinvested under the conditions referred to in articles 25 to 29 of the Code of investments.

### MINIMUM LUMP-SUM TAX (IMF)

Business profit tax is levied on net profits, i.e. on total revenue minus the expenses related to the exploitation (unless specifically excluded in the tax code) excluding the income and expenses of real estate, which is subject to property tax.

If the natural or legal person realises a loss during the year (expenses exceeding total income) it will have to pay the minimum lump-sum tax. The minimum lump-sum tax is the higher of 1% of the turnover, exclusive of VAT, and DJF 120,000. The minimum lump-sum tax cannot be offset against the corporate income tax liability.

### CAPITAL GAINS TAX

Capital gains realised by resident companies are generally treated as part of business income and subject to business profit tax at the standard rate.

### BRANCH PROFITS TAX

Branches of non-resident companies are subject to standard corporate income tax at a rate of 25%. There is no branch remittance tax.

### VALUE ADDED TAX (VAT)

- VAT is levied on transactions carried out in Djibouti by individuals and legal entities, such as purchasing goods for resale, industrial, commercial or handicraft making activities, including services.
- Companies or individuals that supply goods or services are subject to VAT if their annual turnover is equal to or exceeds DJF 10 million. The taxpayer is required to comply with VAT rules as of the financial year following the one in which the threshold is met.
- The standard VAT rate is 10%. A reduced 7% rate applies to freight forwarding services, port forwarding invoiced to freight forwarders and services of shipping agencies to freight forwarders. Exportations and related services are zero-rated.
- Subject to a commitment to the Directorate General of Taxes (DGI) to charge VAT at the start of their activity and to present a detailed estimate of the equipment to be imported or purchased locally, new companies and enterprises that invest in the hotel, real estate (rental, sale) and processing industry sector will benefit from a zero % rate for their imports during this construction phase, excluding services performed on their behalf. For local purchases, the invoice issued by the supplier will have to be previously checked by the DGI (art. 19 of Finance Act 2022). At the end of the construction or set-up phase these enterprises will mandatorily become subject to VAT.
- A Domestic Consumption Tax (TIC) is levied for the benefit of the State budget on all goods imported or produced on the territory and intended for consumption there, except for exemptions provided for by the Tax Code (CGI). The TIC rate depends on the type of goods and is comprised of five ad valorem rates: 0, 8, 10, 20, and 23% on the value of the goods (Art. 22 of Finance Act. 2022).

### OTHER TAXES

- Real property tax;
- Property tax on developed land;
- Property tax on undeveloped land;
- Stamp duties;
- Business licence tax;
- General solidarity tax.

## B. DETERMINATION OF TAXABLE INCOME

Tax is generally calculated on an accrual basis taking into account commercial accounts. Corporate income tax is then computed by applying the rules and regulations set out in the tax code (CGI).

Net profits are computed as total gross income less deductible expenses provided for by the tax code, excluding exempt income.

A resident company employing more than 5 foreign workers can only deduct 20% of their remuneration from its taxable base (art. 15 of Finance Act 2019). Remuneration constitutes all benefits in cash and in kind paid monthly in accordance with art. 13 and 17 of the Tax Code.

### DEPRECIATION

The tax code only provides for the straight-line method of depreciation.

| Assets | Rate (%) |
|---|---|
| Computer equipment | 33.33 |
| Buildings | 5 |
| Tractors | 20 |
| Office furniture | 10 |
| Machinery and equipment | 20 |
| Plantations | 5 |

### INTEREST DEDUCTIONS

There are no thin capitalisation rules in Djibouti.

### LOSSES

Losses may be carried forward for up to 3 years. Loss carry-back is not allowed.

## C. FOREIGN TAX RELIEF

No unilateral double taxation relief is granted under domestic tax law for foreign tax paid.

## D. CORPORATE GROUPS

There is no specific regime for groups of companies.

## E. RELATED PARTY TRANSACTIONS

**Transfer pricing**

Djibouti does not have specific TP rules, but the tax authorities can adjust the pricing of transactions between related parties.

**Controlled foreign company rules**

Djibouti does not have CFC rules.

**Thin capitalisation rules**

There are no formal thin capitalisation rules in Djibouti. However, interest paid by a company to its shareholders is deductible up to an amount computed on the basis of the average annual Central Bank interest rate, increased by 1 percentage point.

Interest paid to a majority shareholder of an SA or a limited liability company is deductible only if the loan does not exceed the capital of the company.

## F. WITHHOLDING TAX

- Dividends and interest paid to non-resident companies are exempt from withholding tax;
- Royalties derived by non-resident companies are subject to a final 15% withholding tax on the gross amount
- The following payments are subject to a 15% withholding tax on the gross amount, exclusive of VAT:
  - Payments for services of any kind, performed or used in Djibouti;
  - Management fees;
  - Head office costs paid by branches to their foreign headquarters;
  - Fees for technical assistance, commercial prospection or research of any kind; and
  - Amounts paid as consideration for the exercise on Djibouti territory of a non-commercial activity.
- A withholding tax of 10% for remunerations paid to local companies that cannot present a licence and 15% for foreign companies that cannot present a Djiboutian tax registration number.

## G. PERSONAL TAX

Progressive tax rates on employment income are as follows:

| Taxable income (DJF) | Rate (%) |
|---|---|
| Up to 30,000 | 2 |
| 30,000 – 50,000 | 12 |
| 50,001 – 150,000 | 15 |
| 150,001 – 300,000 | 22 |

| Taxable income (DJF) | Rate (%) |
|---|---|
| 300,001 – 600,000 | 25 |
| 600,001 – 1,000,000 | 30 |
| 1,000,001 – 2,000,000 | 35 |
| Over 2,000,000 | 45 |

## H. TREATY AND NON-TREATY WITHHOLDING TAX RATES

Djibouti has not signed any double tax treaties.

# DOMINICAN REPUBLIC

## MEMBER FIRM

| City | Name | Contact Information |
|---|---|---|
| Santo Domingo | Hector Guzman Desangles | +1809 540 6668<br>hguzman@guzmantapiapkf.com.do |

## BASIC FACTS

| | |
|---|---|
| Full name: | Dominican Republic |
| Capital: | Santo Domingo |
| Main languages: | Spanish |
| Population: | 11.04 million (2022 estimate) |
| Monetary unit: | Dominican Pesos (DOP) |
| Internet domain: | .do |
| Int. dialling code: | +1809 |

## KEY TAX POINTS

- The corporate tax system is based on the territoriality principle. Corporate income tax is only due on business income generated by enterprises operating in the Dominican Republic. Certain types of investment income derived by Dominican residents from sources outside the Dominican Republic are also subject to Dominican taxation.
- Non-resident companies operating through a permanent establishment in the Dominican Republic are taxed on income attributable to the permanent establishment as well as on Dominican-sourced income. Non-residents without a permanent establishment in the Dominican Republic are taxed on Dominican-sourced income only.
- Companies are subject to the higher of corporate income tax (at 27%) or alternative minimum tax (1% of the total asset value after deducting depreciation).
- The standard rate of VAT is 18%.

## A. TAXES PAYABLE

### COMPANY TAX – GENERAL REGIME

The corporate tax system is based on the territoriality principle, whereby tax is only levied on business income derived from Dominican sources. Companies are subject to the higher of corporate income tax (27%) or alternative minimum tax. Dividends paid to residents or non-residents out of Dominican-source income are subject to withholding tax at the rate of 10% on the gross amount. This is a final tax on dividends.

Corporate income tax is levied on residents and non-residents deriving Dominican-source income. Resident entities are subject to corporate income tax on certain items of investment income derived from foreign sources. Non-residents without a permanent establishment in the Dominican Republic are only taxed on Dominican-sourced income.

Corporate income tax on resident companies and branches of foreign companies is levied at a rate of 27% or alternative minimum tax is applied, whichever is higher. The latter is assessed at a rate of 1% on the assets registered in the taxpayer's accounting books.

Companies will make monthly advance tax payments, which are 1/12 of the equivalent of the tax amount paid in the prior year and at year-end they should correspond to the abovementioned 27% or 1% calculated taxes. When current year taxes are calculated, the monthly payment is compensated in the following period. If the monthly payment was insufficient then the corporation needs to make up for the payment.

### CAPITAL GAINS TAX

Capital gains derived from the sale of assets, immovable property or shares included in gross income and are subject to the 27% standard corporate income tax rate. The capital gain is calculated by deducting the acquisition cost – adjusted for inflation – from the sales price and adding the accumulated earnings/losses

### BRANCH PROFITS TAX

Only the income attributable to the Dominican branch (permanent establishment) is subject to corporation tax. Remittances by permanent establishments of non-residents are subject to a final withholding tax at the rate of 27%.

## VALUE ADDED TAX

VAT (ITBIS) is levied on taxable supplies of goods and services as well as on imports of taxable goods and services into the Dominican Republic. Exports are zero-rated. The standard rate is 18%.

Professional services, rental of movable goods and professional security services are subject to a withholding of the invoiced ITBIS at the rate of 30%.

## LOCAL TAXES

No local tax applies.

## OTHER TAXES

Municipal tax: owners of real estate property are subject to a 1% tax rate. For rural properties, no tax applies.

## FRINGE BENEFITS TAX

There is no fringe benefits tax in the Dominican Republic.

## B. DETERMINATION OF TAXABLE INCOME (ISR)

## GENERAL REGIME

Net income or taxable income is arrived at by adjusting the accounting profits for non-taxable income and non-deductible expenses. As a general principle, costs are only deductible when necessarily incurred for the purpose of producing income.

## SIMPLIFIED SCHEME

Companies who a) during the previous year had a total turnover under DOP 6 million and b) have not elected to be assessed under the General Regime referred to above, are subject to the simplified taxation scheme. Under this scheme, taxable income is computed as 27% of the turnover from sale of goods and merchandise.

## DEPRECIATION

All the items of fixed assets, except land, can be depreciated or amortized for tax purposes. The depreciation rates are set by specific legislation and include 5% for office buildings, 25% for cars and furniture and 15% for other assets.

## STOCK / INVENTORY

Inventory must normally be valued at the effective cost of acquisition or production (historic cost). Other methods which may be adopted include:

- The standard cost method, which must be calculated in accordance with the appropriate technical and accounting principles;
- The sale price method, based on the market value less a normal profit margin.

## CAPITAL GAINS AND LOSSES

Gains realised by resident entities from the disposal of shares are exempt from tax.

## DIVIDENDS

Dividends are normally subject to withholding tax at 10% (when it is paid in cash).

## INTEREST DEDUCTIONS

Interest is deductible on an accrual basis. The Fiscal Administration is entitled to disregard expenses related to interest where related parties are involved.

**Thin capitalisation**

Deductible interest may not exceed the result from multiplying the total amount of interest accrued in the tax period by three times the annual average net equity divided by the annual average balance of all of the taxpayer's interest-bearing debt. Non-deductible interest may be carried forward for 3 years as from the year in which the interest was accrued. The limitation in the interest deduction is not applicable to interest paid to resident individuals and entities and also not to regulated financial entities.

## LOSSES

Operating losses incurred by ordinary corporate taxpayers may be carried forward for 5 years to set off against taxable profits, but only 20 percent of the amount each year. No carry-back is allowed.

## FOREIGN SOURCE INCOME

Regarding active income, taxation of resident companies takes into account only their Dominican-sourced income. However, Dominican-resident companies, branches, and permanent establishments are subject to taxation on income from Dominican sources and on income from foreign sources arising from investments and financial gains, i.e. certain items of passive income.

## TAX INCENTIVES

Incentives under Dominican tax legislation include the free-trade zones, investment in tourism, and companies established in the border between Dominican Republic and Haiti.

## C. FOREIGN TAX RELIEF

Resident companies can obtain a credit for any foreign tax paid abroad on income that is also subject to Dominican corporate income tax. The foreign tax credit is limited to the amount of Dominican tax to which the foreign-source income would be subject in the Dominican Republic.

## D. CORPORATE GROUPS

None. There are no special measures for controlled foreign companies.

## E. RELATED PARTY TRANSACTIONS

Transfer pricing rules are based on the OECD guidelines. The following methodologies are accepted: (i) comparable uncontrolled price method (ii) resale price method (iii) cost plus method (iv) profit split method and (v) transactional net margin method. APAs (advance pricing agreements) are available for all taxpayers and sectors.

On 1 September 2017, the tax authorities published a new (the sixth) version of the transfer pricing information return. All taxpayers within the scope of the transfer pricing regulations must file the return on an annual basis within the first 180 days after the end of the fiscal year. The new version of the return requires taxpayers to:

- Summarise transactions by type;
- Report the profit level indicator of the tested party of each transaction;
- Use the same format as the previous version to allow the information to be validated;
- Complete the information regarding related parties and transactions on the tax administration's virtual platform.

This new version of the return applies for fiscal year 2017 and onwards and as of 1 September 2017 all taxpayers must adopt this new version.

## F. WITHHOLDING TAX

Income paid to non-residents is subject to withholding tax at the following rates:

- Dividends: 10% (final tax);
- Interest: 10%, subject to exceptions;
- Royalties: 27% (final tax);
- Management/technical service fees: 27% (final tax).

## G. EXCHANGE CONTROL

Capital movements are freely transferable.

## H. PERSONAL TAX

Income tax is payable by individuals on income obtained from employment, from a business, from an independent profession, from investment income, from immovable property, capital gains, pensions, and betting and gambling profits. Resident and non-resident individuals are subject to income tax on Dominican-sourced income only. When determining the taxable income, besides some specific deductions concerning each category of income, other deductions may be allowed, such as expenses on health and education.

Tax returns are due on 15 March of the subsequent tax year for taxpayers with income derived solely from employment or pension. The following rate table applies in tax year 2018 to the aggregate net result of employment income, business income, investment income (except interest on bonds and deposits), income from land, capital gains and income from pensions.

| Taxable Income (DOP) | Rate on Excess (%) |
|---|---|
| Up to 416,220 | 0 |
| 416,220.01 – 624,329 | 15% over DOP 416,220 |
| 624,329.01 – 867,123 | 20% over DOP 624,329 |
| In excess of 867,123 | 25% over DOP 867,123 |

## I. TREATY AND NON-TREATY WITHHOLDING TAX RATES

| | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| **Non-treaty countries** | 10 | 10 | 27 |
| **Treaty countries:** | | | |
| Canada | 0/10/18[3] | 18 | 18 |
| Spain | 0[1]/10 | 0/10[2] | 10 |

Notes:

1. The 0% rate applies in case of a 75% holding in the paying company.
2. The lower rate applies to interest paid by public bodies.
3. The rate for dividends under the treaty is 18%. However, by virtue of a most favoured nation clause the rate is reduced to 0% if the beneficial owner is a company (other than a partnership) which holds directly at least 75% of the capital of the dividend-paying company and 10% in all other cases.

## BASIC FACTS

| | |
|---|---|
| Full name: | Democratic Republic of Congo |
| Capital: | Kinshasa |
| Main languages: | French |
| Population: | 94.67 million (2022 estimate) |
| Monetary unit: | Congolese Franc (CDF) |
| Internet domain: | .cd |
| Int. dialling code: | +243 |

## KEY TAX POINTS

- The Democratic Republic of Congo (the 'DRC') operates a declarative tax system in which the taxpayer declares and pays monthly tax collections to the taxation authorities. False declarations are punishable by penalties and interest on late payment.
- In the DRC, there are two types of income taxes:
  - o Income tax on individuals;
  - o Income tax on entities.
- There is a tax on turnover, borne by the final consumer known as Value Added Tax (VAT).

## A. TAXES PAYABLE

## CORPORATE INCOME TAX

Congolese companies are taxed on the territoriality principle. As a result, companies carrying on a trade or business outside the Democratic Republic of Congo (DRC) are not taxed in the DRC on the related profits. Congolese companies are those registered in the DRC, regardless of the nationality of the shareholders or where the company is managed and controlled.

Foreign companies (for example, branches) engaged in activities in the DRC are subject to Congolese corporate tax on Congolese-source profits only. A company is considered to have a permanent establishment in the DRC if it satisfies either of the following conditions:

- It possesses a fixed or permanent place (for example, head office, branch office, factory, plant, workshop, or buying and selling counter);
- In the absence of such place, it carries out a professional activity under its corporate name for at least six months in the DRC.

Rate of corporate tax

The regular corporate income tax rate is 30%. The minimum tax payable is 1% of the annual turnover for larger corporations.

For small corporations with annual revenues of less than CDF 10 million, the corporate income tax is set at CDF 50,000.

For small corporations with annual revenues between CDF 10 million and CDF 80 million, the corporate income tax rate is 1% of the annual revenue for sales of goods and 2% for the provision of services. The corporate income tax rate is 30% for companies holding mining or quarry titles.

## BRANCH PROFITS TAX

Branches of foreign companies are subject to a 20% tax on movable capital levied on 50% of the net profit of the branch (i.e. profits after payment of corporate income tax) that is deemed to be distributed.

## CAPITAL GAINS

Increases resulting from capital gains and depreciation that are realised and either realised or expressed in the accounts or inventories are included in profits and are subject to tax at a rate of 30%.

Increases resulting from unrealised capital gains that are expressed in the accounts or inventories and that are not treated as profits are not yet taxable. This rule applies only if the taxpayer holds a regular accounting and if it fulfils its declarative obligations.

Increases resulting from realised capital gains on buildings, tools, materials and movable assets (regardless of whether they result from rent payments), as well as on participations and portfolios, are taxable to the extent that the sales price exceeds the acquisition price or cost. A deduction is made from the amount of the depreciation that has already been claimed for tax purposes.

## ADMINISTRATION

The fiscal year extends from 1 January to 31 December. Tax returns must be filed by 30 April.

Corporate tax must be paid in four instalments for medium-sized and large enterprises (two before the Finance Act 2020 came into force) before 1 June, 1 August, 1 October and 1 December at the latest. Each instalment must equal 20% of the preceding year's tax (increased by any tax reassessment received by the tax office during the current year).

Small enterprises still pay two instalments only (60% and 40%) by 1 February and 1 June.

The balance of tax due must be paid by the following 30 April. A penalty of 4% per month is assessed for late payment of tax.

Tax is fixed automatically if a tax return is not filed

## DIVIDENDS

In general, dividends paid are subject to a 20% withholding tax. The rate of dividend withholding tax for mining companies is 10%. A notional dividend withholding tax applies to branches. The rates of this tax are 8% for public limited liability companies and 10% for other limited liability companies.

## INTEREST DEDUCTIONS

There are no thin capitalisation rules in the DRC. However, under the 2014 Finance Law, outbound interest payments to a foreign resident shareholder or any other related party are deductible only if the loan is repayable within a maximum period of 5 years and the interest rate does not exceed the annual average rate applied by banks established in the country of the lending entity.

## LOSSES

Tax losses incurred in a tax year may be carried forward indefinitely. However, the deduction of the available tax losses is capped at 60% of the annual taxable income.

Loss carry-back is not allowed.

## OTHER TAXES

| Type of tax | Rate (%) |
|---|---|
| Value Added Tax (VAT) | |
| Standard rate | 16 |
| Reduced rate (applicable to certain food products) | 8 |
| Rate on exports and assimilated transactions | 0 |
| Payroll taxes: | |
| Annual income not exceeding CDF 43,200,000 (progressive rates) | 0 - 30 |
| Annual income exceeding CDF 43,200,000 (flat rate) | 40 |
| Exceptional income tax for expatriates (IERE) | |
| Mining companies | 10 |
| Other companies | 25 |
| Social Security National Institute (CNSS), contributions, payable monthly | 18 |
| Employers | 13 |
| Employees | 5 |
| National Institute for Professional Preparation (INPP), payable monthly by employers | 1 - 3 |
| National Agency for Labour (ONEM), payable monthly by employers | 0.2 |

Payroll taxes cannot exceed 30% of the taxable salary.

# B. DETERMINATION OF TRADING INCOME

## GENERAL

Taxable income is based on financial statements prepared in accordance with principles set by the Organisation for the Harmonisation of Business Law in Africa (*Organisation pour l'Harmonisation en Afrique du Droit des Affaires, or OHADA*) Accounting Act, except for banks and insurance companies. The net amount of income is taxed. This amount equals gross income minus business expenses incurred during the tax year to acquire and retain the income. Business expenses are generally deductible unless specifically excluded by law. The following expenses are not deductible:

- Head office, remuneration or management fees for services paid to non-residents that are not justified;
- Head office overhead or remuneration for certain services (studies and technical assistance) paid to non-residents;
- Expenditure of a personal nature, such as maintenance of household, appraisal fees, holidays and other expenses not necessary for the profession;
- Corporate income tax, as well as real tax (tax on movable assets, tax on vehicles or tax on mining concessions), to the extent that the real tax does not constitute an operating expense;
- All judicial or administrative fines, and fees and charges relating to breaches by income beneficiaries;
- Certain specific charges, gifts, subsidies and penalties;
- Directors' fees allocated under the Corporations Act to members of the General Council;
- Expenditures on leased property, including depreciation of the property;
- Provisions for losses, expenses or depreciation of assets, excluding provisions for the recovery of mineral deposits and provisions for the recovery of bank capital;
- Commissions and brokerage fees if it cannot be proven that the tax on turnover has been paid for these items;
- Most liberalities (payments that do not produce a compensatory benefit, such as excessive remuneration paid to a director).

## TAX DEPRECIATION

Land and intangible assets, such as goodwill, are not depreciable for tax purposes. Other fixed assets may be depreciated using the straight-line method at rates specified by tax law. The following are some of the specified annual rates.

| Asset | Rate (%) |
|---|---|
| Buildings | 2 to 5 |
| Office equipment | 10 |
| Motor vehicles | 20 to 25 |
| Plant and machinery | 10 |
| Fixtures, facilities | 10 |
| Shipping and aviation equipment | 10 to 33 |

Companies can also opt for a regressive method for tax depreciation of specific assets with an annual rate of two to three times the straight-line rate.

## INVENTORIES

Inventories are normally valued at their historical cost or acquisition cost.

## PROVISIONS

In determining accounting profit, companies must implement certain provisions, such as a provision for risk of loss or for certain expenses. These provisions are not deductible for tax purposes. However, provisions for recovery of bank capital and provisions for the recovery of the mineral deposit are deductible for tax purposes.

## C. FOREIGN TAX RELIEF

In general, foreign tax credits are not allowed. Income subject to foreign tax that is not exempt from Congolese tax under the territoriality principle is taxable.

## D. CORPORATE GROUPS

The DRC does not have a fiscal integration system equivalent to a consolidated filing position.

## E. RELATED PARTY TRANSACTIONS

The DRC has several measures applicable to related-party transactions that are not conducted on an arm's length basis. The 2014 Finance Law introduced tighter provisions for deductions with respect to cross-border transactions carried out with related parties. These provisions include the disallowance of loan interest with respect to rates exceeding those offered on the international finance market (for example, the London Interbank Offered Rate [LIBOR]) and the repayment of principal beyond five years. Management fees paid to a related party may be deducted from the corporate income tax base if the following conditions are satisfied:

- The services rendered can be clearly identified (i.e., they are genuine services that are effectively rendered and directly related to operating activities);
- The services cannot be rendered by a local company (that is, overhead expenses recharged to the local entity are excluded);
- The amount paid for the services is not exaggerated in view of the nature of the services. These arm's-length requirements are consistent with those set forth in the Mining Code. The 2015 Finance Law introduced transfer pricing documentation requirements. As a result, companies must put at the disposal of the tax administration during a tax audit, general and specific information on an affiliated group of companies (Master File and Local File), including the following:
    - General description of the deployed activity, including changes that occurred during the year;
    - A general description of the legal or operational structures of the affiliated group of companies, including identification of the related companies engaged in transactions involving the company established in the DRC (local company);
    - A general description of the function performed and risk assumed by the affiliated companies as soon as they affect the local company;
    - A list of the main intangible assets owned, including patents, trademarks, trade names and know-how, relating to the local company;
    - A general description of the group's transfer pricing policy;
    - A description of transactions made with other affiliated companies, including the nature and amount of cash flows, such as royalties;
    - A listing of the cost-sharing agreement, copies of preliminary agreements related to transfer pricing that are concluded under the conditions of the regulation, and the prescription relating to the determination of transfer pricing, affecting the results of the local company;
    - Presentation of the method or methods for determining transfer pricing, in compliance with the arm's-length principle, including an analysis of the functions performed, assets used and risks assumed, and an explanation concerning the selection and application of the methods used;
    - An analysis of comparative elements considered as relevant by the company if the selected method requires it. In addition, the corporate income tax law disallows branches from deducting overhead charges incurred by the parent company and charged back to the branch.

## F. WITHHOLDING TAX

| Description | Rate (%) |
|---|---|
| Dividends | 20 (a) |
| Interest | 20 (b) |
| Royalties from patents, know-how etc. | 20 (c) |
| Fees for technical services, digital services and professional activities | 14 (d) |

a) The rate of dividend withholding tax for mining companies is 10%. A notional dividend withholding tax applies to branches (branch remittance tax). The rates of this tax are 8% for public limited liability companies and 10% for other limited liability companies.

b) Interest on loans abroad to mining companies is not subject to withholding tax.

c) The net amount of royalties is subject to tax. For this purpose, net royalties equal gross royalties minus professional expenses, or 30% of gross royalties (resulting in an effective tax rate of 14%).

d) This withholding tax applies to payments for services provided to Congolese companies by foreign companies and individuals without a permanent establishment in the DRC. The tax base is the gross amount of the applicable invoice.

## G. EXCHANGE CONTROL

The currency in the DRC is the Congolese franc (CDF). The exchange rate is variable. In the DRC, the Central Bank of Congo regulates foreign exchange controls. It also supervises the regulation on the transfer of currency. Cash transfers from or into the DRC are not subject to restrictions if they do not exceed the equivalent of USD 10,000. An exchange control fee of 0.2% is levied on payments to or from abroad.

## H. PERSONAL TAX

The standard progressive rates applicable to wages are as follows:

| Taxable income | Rate (%) |
|---|---|
| 0 – 1,944,000 | 3 |
| 1,944,001 – 21,600,000 | 15 |
| 21,600,001 – 43,200,000 | 30 |
| Above 43,200,000 | 40 |

## I. TREATY AND NON-TREATY WITHHOLDING TAX RATES

| | Dividends | | Interest (%) | Royalties (%) |
|---|---|---|---|---|
| | Individuals, companies (%) | Qualifying companies (%) | | |
| **Domestic rates** | | | | |
| Companies | 10/20 | 10/20 | 0/20 | 20 |
| Individuals | 10/20 | -- | 0/20 | 20 |
| **Treaty countries:** | | | | |
| Belgium | 15 | 10[1] | 10 | 10 |
| South Africa | 15 | 5[2] | 10 | 10 |

Notes:

1. The 15% rate applies if dividends are paid by a company whose profits are exempt from Congolese tax under the Investment Code or under a particular law organising investments in the sectors listed in Article 3 of the said Code, provided that the beneficial owner is a company which holds directly at least 25% of the capital of the dividend-paying company. The 10% rate applies in all other cases.
2. The 5% reduced rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the capital of the company paying the dividends.

## BASIC FACTS

| | |
|---|---|
| Full name: | Republic of Ecuador |
| Capital: | Quito |
| Main languages: | Spanish, indigenous languages |
| Population: | 18.13 million (2022 estimate) |
| Monetary unit: | US Dollar (USD) |
| Internet domain: | .ec |
| Int. dialling code: | +593 |

## KEY TAX POINTS

- Corporate tax is payable by Ecuadorian resident companies on non-exempt income derived from all sources. Non-resident companies are required to pay tax on income sourced in Ecuador.
- The corporate tax rate is 25%. Capitalised profits are subject to a 15% tax rate.
- Value Added Tax (VAT) is applied at a standard rate of 12% to all transactions including imports. There is a 0% rate on food items, agricultural inputs, medical goods, books and government purchases, and some professional services.
- No provisions exist for filing consolidated returns or relieving losses within a group.
- Dividends paid to resident individuals and companies and to non-resident individuals and companies are subject to a 25% withholding tax. The tax base will be 40% of the distributed dividends. Royalties, services, and rental fees are subject to the same 25% withholding tax.
- Income tax is payable by Ecuadorian resident individuals on non-exempt income derived from all sources. Non-resident individuals are required only to pay tax on Ecuadorian-sourced income.

## A. TAXES PAYABLE

## CORPORATE INCOME TAX

Corporate tax is payable by Ecuadorian resident companies on non-exempt income derived from all sources. Non-resident companies are required to pay tax on income sourced in Ecuador. Resident companies are those that are incorporated in Ecuador or carry-on business in Ecuador and have either central management and control in Ecuador or voting power controlled by shareholders who are Ecuadorian residents.

The standard corporate income tax rate is 25%. Small and Medium-sized Entities (SMEs) and regular exporters that meet certain requirements are subject to a tax rate of 22%.

Entrepreneurs and micro-enterprises are subject to a special tax regime.

An increased corporate income tax rate of 28% applies when (1) the resident company fails to fully disclose the required information about its ownership composition or (2) one of the shareholders is established in a tax haven, low-tax jurisdiction, or preferred tax regime and the true beneficial owner is an Ecuadorian tax resident. In such case, the higher tax rate of 28% will be fully applied to the resident company's income tax base if the shareholders reside in tax havens or low-tax jurisdictions, and together or individually own at least 50% of the company's share capital. When that ownership is less than 50%, the corporate tax rate of 28% will be applied proportionally to the income tax base for that ownership.

Capitalised profits are subject to a 15% tax rate.

The tax year runs from 1 January to 31 December. Tax is payable from 10 to 28 April, depending on the ninth digit of the tax identification number (RUC), as follows:

| Ninth digit | Filing deadline |
|---|---|
| 1 | 10 April |
| 2 | 12 April |
| 3 | 14 April |
| 4 | 16 April |
| 5 | 18 April |
| 6 | 20 April |
| 7 | 22 April |
| 8 | 24 April |
| 9 | 26 April |
| 0 | 28 April |

Corporate tax can be prepaid voluntarily at an amount equivalent to 50% of the previous period's income tax due less withholdings for that same period. This prepaid tax constitutes a tax credit for income tax purposes.

Entrepreneurs and micro-enterprises subject to the special tax regime are required to file a corporate income tax return in March (individuals) or April (companies) and pay special tax regime tax in March.

Purchases of goods and services are subject to the following withholding tax rates:

| Type of goods/services | WHT rate |
|---|---|
| Electricity | 1% |
| Private transport of passengers and public and private freight | 1% |

| Type of goods/services | WHT rate |
|---|---|
| Purchase of all types of goods (except oil products) | 1% |
| Interest and commissions derived from credit operations between financial institutions | 1% |
| Transfer on the sale of shares | 1% |
| Construction activities | 1.75% |
| Transfer of real estate property | 1.75% |
| Insurance and reinsurance premiums and cessions | 1.75% |
| Leasing quotes, including purchasing option | 1.75% |
| Media and advertising services | 1.75% |
| Low-skilled labour | 2% |
| Payments by credit card issuers to their merchants | 2% |
| Income from loans and investments | 2% |
| Interest paid by public entities to taxpayers | 2% |
| Any other payments | 2% |
| Fees, commissions, and other payments to professionals for services that are predominantly intellectual not related with their professional title; sport or artistic services; royalties, property rights, copyrights, patents, leasing of real estate property | 8% |
| Fees, commissions and other payments to professionals for services that are predominantly intellectual related to their professional title; image or name rights; capital gains on the sale of shares of listed companies | 10% |
| Payments to non-residents; dividends distributed to individuals or companies when the ultimate beneficial owner is not an Ecuadorian resident; interest on foreign loans | 25% |

The amounts paid become credits available for income tax purposes at the end of the period. Interest paid to financial institutions is not subject to withholding tax. Employment income is subject to a specific withholding regime.

## CAPITAL GAINS TAX

Capital gains on the direct or indirect transfer of shares of an Ecuadorian entity are subject to a standard rate of 10%.

When the seller is a non-resident, the Ecuadorian target entity must act as a “substitute agent” responsible for collecting and paying the tax.

## BRANCH PROFITS TAX

There is no specific income tax for branches. Income generated by branches is taxed according to general income tax rules. An important exception is the treatment of foreign oil companies involved in state contracts. There is no branch remittance tax in Ecuador.

## VALUE ADDED TAX (VAT)

Value Added Tax (VAT) is applied at a standard rate of 12% on the purchase of goods and services (including imports). Food (in natural state), agricultural machinery and equipment, drugs, medicines and other pharmaceutical products, water, electricity, sewage, and other public services, and exported goods and services, are subject to a 0% VAT rate.

The following transactions are exempt from VAT:

- In-kind contributions to companies;
- Inheritances and assets obtained from the liquidation of companies;
- Transfer of business, combinations, mergers, takeovers, and spin-offs;
- Donations to public entities and non-profit organisations;
- Transfers of shares and securities.

The VAT base for local purchases represents the selling price of the goods or services, including other taxes, fees and other related expenses, less discounts and/or refunds. The VAT base for imports represents the customs value (cost, insurance, and freight) plus taxes, tariffs, fees, duties and surcharges included in the import filing.

VAT must be filed and paid monthly depending on the ninth digit of the tax identification number (RUC), except for micro-enterprises subject to the special regime, which are required to file VAT on a bi-annual basis (in July and January), as follows:

| Ninth digit | Filing deadline (general regime) | First semester filing deadline (micro-enterprises subject to special regime) | Second semester filing deadline (micro-enterprises subject to special regime) |
|---|---|---|---|
| 1 | 10th day of following month | 10 July | 10 January |
| 2 | 12th day of following month | 12 July | 12 January |
| 3 | 14th day of following month | 14 July | 14 January |
| 4 | 16th day of following month | 16 July | 16 January |
| 5 | 18th day of following month | 18 July | 18 January |
| 6 | 20th day of following month | 20 July | 20 January |
| 7 | 22nd day of following month | 22 July | 22 January |

| Ninth digit | Filing deadline (general regime) | First semester filing deadline (micro-enterprises subject to special regime) | Second semester filing deadline (micro-enterprises subject to special regime) |
|---|---|---|---|
| 8 | 24th day of following month | 24 July | 24 January |
| 9 | 26th day of following month | 26 July | 26 January |
| 0 | 28th day of following month | 28 July | 28 January |

Entrepreneurs and micro-enterprises may also elect to file VAT on a monthly basis.

## FOREIGN MONEY TRANSFER TAX (ISD)

All remittances abroad are taxed at a standard rate of 5%. A progressive reduction by 0.25% of the tax rate on the remittance of funds during 2022 was established until reaching 4% in the last quarter of 2022, according to the following schedule:

- As of 1 January 2022 the tax rate will be 4.75%
- As of 1 April 2022 the tax rate will be 4.50%
- As of 1 July 2022 the tax rate will be 4.25%
- As from 1 October 2022 the tax rate will be 4%.

Banks act as withholding agents. Payments made from overseas are also subject to the ISD.

Payments on the import of capital assets, raw materials and supplies for production may be used as a tax credit, subject to certain requirements.

ISD on payments of capital and interest on loans provided by foreign financial institutions or non-financial entities qualified by the SB, and on dividends derived from new productive investments, are exempt from the ISD (subject to certain requirements).

Payments on the import of capital assets and raw materials to be used in the development of new productive investments which maintain investment contracts with the Ecuadorian government, and on dividends distributed, are exempt from the ISD (subject to certain requirements).

The ISD rate applicable for foreign airlines (transport, cargo, and courier) authorised to operate in Ecuador is 0%.

## FRINGE BENEFITS TAX

No fringe benefits are deductible as expenses for income tax liquidation purposes. The only exception is that the company can pay and expense its employee income tax and social security contribution if the company has contracted to do so.

## LOCAL AND REAL ESTATE TAXES

Other local taxes include real estate tax (which ranges from 0.025% to 0.3% for rural property and from 0.025% to 0.5% for urban property) and 1.5x1000 of previous year’s total assets.

## OTHER TAXES

### Transitory wealth tax

A transitory wealth tax is applicable to individuals with net assets equal to or greater than USD 500,000 (in the case of community property, the threshold is USD 1 million) as per 31 December 2020, is payable by 31 March 2022 and 2023, and is calculated as follows:

| From USD | Up to USD | Tax on the non-taxable allowance (USD) | Tax rate on the excess fraction (%) |
|---|---|---|---|
| - | 999,999.99 | -- | 0.0 |
| 1,000,000.00 | 1,199,999.99 | -- | 1.0 |
| 1,200,000.00 | Above 1,200,000.00 | 2,000 | 1.5 |

Individuals resident in Ecuador must take into account assets located in and outside of Ecuador while individuals not resident in Ecuador must only take into account assets located in Ecuador.

Investments in corporations required to pay the transitory wealth tax should not be taken into account nor should account payables to related parties.

The transitory wealth tax is also applicable to corporations with net assets equal to or greater than USD 5 million as per 31 December 2020, is payable by March 2022 and March 2023, and is calculated as follows:

| From USD | Up to USD | Tax rate on net assets (%) |
|---|---|---|
| - | 4,999,999.99 | 0.0 |
| 5,000,000.00 | Above 5,000,000.00 | 0.8 |

Payment of the transitory wealth tax is neither a tax credit nor is it tax deductible.

Investment holding companies are not required to file and pay the transitory wealth tax.

### Voluntary tax regime to legalise foreign-held assets and remittances

A voluntary tax regime has been established, applicable to Ecuadorian residents who have maintained assets abroad as per 31 December 2020, derived from operations subject to income tax and/or tax on the remittance of funds that were not declared and/or subject to payment of taxes.

The tax rate depends on the date on which the tax return is submitted and paid, according to the following table:

| Condition | Tax rate applicable |
|---|---|
| If the tax filing and payment are done by 31 March 2022 | 3.5% |
| If the tax filing and payment are done by 30 June 2022 | 4.5% |
| If the tax filing and payment are done by 31 December 2022 | 5.5% |

## B. DETERMINATION OF TAXABLE INCOME

### DEPRECIATION

Assets are subject to depreciation, which is deductible according to the following rates:

| Asset | Annual depreciation rate |
|---|---|
| Buildings, ships and airplanes | 5% |
| Facilities, machinery, equipment, furniture and fixtures | 10% |
| Vehicles and transport equipment | 20% |
| Computer equipment and software | 33% |

Accelerated depreciation is deductible only if authorised by the tax authorities.

Depreciation on the re-valuation of assets is not deductible.

### STOCK / INVENTORY

Losses on inventory written-off are deductible if justified by a notarised sworn statement.

Losses on the adjustment to the net realisable value are deductible when the corresponding stock item is sold. The previous recognition of a deferred tax asset is required.

### CAPITAL GAINS AND LOSSES

Net capital gains and losses are generally included in the determination of assessable income.

### DIVIDEND INCOME

Dividends received by resident companies from other resident companies are tax exempt.

### INTEREST DEDUCTIONS

Interest is deductible. The deduction of both interest and the cost of foreign financing charged by a financial institution or non-financial entity approved by the Superintendence of Banks of Ecuador are allowed provided that the loan has been registered within the Central Bank of Ecuador (BCE) and the interest rate is lower than the one set by the BCE. If not, a withholding of 25% is required on the excess amount to be deductible.

The deduction of both interest and the cost of foreign financing charged by third and related parties is allowed only if the loan has been registered with the BCE, the interest rate is lower than the one established by the BCE and a withholding of 25% has been applied. If the interest rate exceeds the interest rate set by the BCE, the excess will not be deductible, although the tax law requires a withholding of 25%.

The deduction of both interest and the cost of foreign financing charged by related parties are allowed provided that the net interest does not exceed 20% of Earnings before Interest, Tax, Depreciation, and Amortisation (EBITDA), and the loan has been registered with the Central Bank of Ecuador (BCE). The excess amount will not be deductible.

### LOSSES

Companies that have sustained operating losses in a tax year may carry forward such losses to subsequent tax years and offset them over five years at the rate of 20% per year, provided that no more than 25% of the profits obtained in each year are allotted for such purposes.

### FOREIGN SOURCE INCOME

Domestic corporations are subject to tax on their worldwide income with tax credits allowed for income taxes paid abroad.

### INCENTIVES

- Specific incentives are provided for the mining and primary oil production industries. Expenditure on research and development also qualifies for special treatment.
- A reduction of three points on the corporate income tax rate applies for new productive investments for a period of up to 15 years, and a reduction of five points if the taxpayer signs an Investment Agreement with the Ecuadorian Government.
- Remunerations of disabled persons can be considered as an additional deduction for income tax purposes.
- Additional deductions can be applicable to investments in environmental-friendly assets.

## C. FOREIGN TAX RELIEF

Ecuador has double tax treaties with countries listed under Chapter I (see further).

## D. CORPORATE GROUPS

No provisions exist for filing consolidated returns or relieving losses within a group.

## E. RELATED PARTY TRANSACTIONS

- Indirect costs assigned from foreign related parties are deductible given that they do not exceed 5% of the tax base plus those indirect costs.

- Interest, dividends, management and technical fees, consulting services and royalties are subject to a 25% withholding tax rate.
- Losses on the sale of fixed assets or shares and costs derived from leasing operations between related parties are non-deductible.
- Transactions between related parties must be carried out in accordance with the arm's-length principle. Taxpayers are required to submit the Transfer Pricing Annex when the amount of transactions with related parties exceeds USD 3 million in the tax year. If related-party transactions exceed USD 15 million in a tax year, the taxpayer must also file a transfer pricing report.

## F. WITHHOLDING TAX

- Dividends paid to resident individuals and companies and to non-resident individuals and companies are subject to a 25% withholding tax. The tax base will be 40% of the distributed dividends.
- Interest paid on foreign loans, including interest paid to non-resident suppliers financing export, is subject to a 25% final withholding tax. Interest paid to foreign governments, private international financial institutions and non-financial specialised companies is exempt from tax, even if the institutions are based in tax havens, provided that the transaction is registered with controlling agencies in Ecuador and the interest rate does not exceed the one set by the Central Bank.
- Royalties paid to non-residents are subject to a 25% final withholding tax. The rate increases to 35% when royalties are paid to a recipient in a tax haven or a low-tax jurisdiction.

## G. EXCHANGE CONTROL

Limited control is exercised. Direct foreign loans generally must be registered with Ecuador's Central Bank.

## H. PERSONAL TAX

Personal income tax is payable by resident individuals on their worldwide income. Non-residents are taxed only on Ecuador-sourced income. Residence is determined by reference to common law or to domicile or where the individual has spent more than 183 days of the relevant income year in Ecuador, unless he or she has a usual place of abode outside Ecuador and does not intend to take up residence in Ecuador.

Taxable income includes income from employment, income from a profession or business, capital gains, investment income such as dividends, and inheritances. Deductions are allowed up to a maximum threshold subject to certain conditions.

Diplomats, agents, official representatives, consuls, and ambassadors are exempt from paying personal income tax.

The following chart applies to determine personal income tax for the year 2022:

| Year 2022 (USD) | | | |
|---|---|---|---|
| **Minimum allowance** | **Maximum allowance** | **Minimum tax payable (accumulation of prior tax bands)** | **Personal income tax rate** |
| 0.00 | 11,310.00 | 0.00 | 0% |
| 11,310.01 | 14,410.00 | 0.00 | 5% |
| 14,410.01 | 18,010.00 | 155.00 | 10% |
| 18,010.01 | 21,630.00 | 515.00 | 12% |
| 21,630.01 | 31,630.00 | 949.40 | 15% |
| 31,630.01 | 41,630.00 | 2,449.40 | 20% |
| 41,630.01 | 51,630.00 | 4,449.40 | 25% |
| 51,630.01 | 61,630.00 | 6,949.40 | 30% |
| 61,630.01 | 100,000.00 | 9,949.40 | 35% |
| 100,000.01 | Above | 23,378.90 | 37% |

Income derived from an inheritance, legacies, donations, other income and any benefit obtained through an act or contractual agreement received for no consideration of goods and rights, is subject to tax at rates according to the following bands:

| Year 2022 (USD) | | | |
|---|---|---|---|
| **Minimum allowance** | **Maximum allowance** | **Minimum tax payable (accumulation of prior tax bands)** | **Tax rate** |
| 0.00 | 72,750.00 | 0.00 | 0% |
| 72,750.01 | 145,501.00 | 0.00 | 5% |
| 145,501.01 | 291,002.00 | 3,638.00 | 10% |
| 291,002.01 | 436,534.00 | 18,188.00 | 15% |
| 436,534.01 | 582,055.00 | 40,017.00 | 20% |
| 582,055.01 | 727,555.00 | 69,122.00 | 25% |
| 727,555.01 | 873,037.00 | 105,497.00 | 30% |
| 873,037.01 | Above | 149,141.00 | 35% |

**Individual Income tax (IIT)**

Progressive from 5% to 37%.

**Inheritance/ Gift Tax**

Progressive rates from 5% to 35%.

## I. TREATY AND NON-TREATY WITHHOLDING TAX RATES

Decision 578 of the Cartagena Agreement has been adopted by Ecuador. This broadly means that relief from double taxation is provided for natural and juridical persons located in any of the Andean Pact countries (Bolivia, Colombia, Ecuador, Peru, and Venezuela).

| | Dividends | | Interest (%) | Royalties (%) |
|---|---|---|---|---|
| | Individuals, companies (%) | Qualifying companies (%) | | |
| **Domestic rates** | | | | |
| Individuals | 25/35[17] | -- | 25/35 | 25/35 |
| Companies | 0/25/35[16] | 25/35 | 0/25/35[18] | 25/35[18] |
| **Treaty countries:** | | | | |
| Belarus[7] | 10 | 5[6] | 10 | 10 |
| Belgium | 15 | 5/15[2] | 0/10 | 10 |
| Bolivia[10] | –[1] | –[1] | –[1] | –[1] |
| Brazil | 15 | 15 | 0/15 | 15/25 |
| Canada | 15 | 5[3] | 0/15 | 10/12/15 |
| Chile | 15 | 5[3] | 4/5/10/15[11] | 10/15[12] |
| China | 3/5[13] | 3/5[13] | 0/8/10[14] | 8/10[15] |

| Switzerland | 15 | 15 | 0/10 | 10 |
| Uruguay | 15 | 10[8] | 15 | 10/15 |
| Venezuela[10] | –[1] | –[1] | –[1] | –[1] |

NOTES:

1. There is no reduction under the tax treaty, the domestic rates apply. The source state has the exclusive right to tax.
2. The treaty rate is 15% which is reduced to 5% under the application of a most favoured nation clause (China-Ecuador treaty).
3. The 5% reduced rate applies if the beneficial owner is a company that controls directly or indirectly at least 25% of the voting power in the dividend-paying company.
4. The 5% reduced rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the dividend-paying company.
5. The 0% rate applies where the beneficial owner of the dividend is the government of any of the contracting states, their central banks or any institution wholly owned by any of the states.
6. The 5% reduced rate applies if the beneficial owner is a company (other than partnerships) which holds directly at least 25% of the capital of the dividend-paying company.
7. Entry into force: 16 August 2017. Effective date: 1 January 2018.
8. The 10% reduced rate applies if the beneficial owner is a company which holds directly at least 25% of the voting shares of the dividend-paying company.
9. Effective date: 28 December 2019 (exchange of information); 1 January 2020 (other tax matters).
10. In application of Decision 578 of the Andean Community.
11. The treaty rate is 15%. However, a reduced rate got triggered by the Chile-Japan treaty by virtue of a most favoured nation clause as follows:
    - As from 1 January 2017, the rate for certain types of interest is reduced to 4% and 5%;
    - As from 1 January 2019, the general rate is reduced to 10%.
12. The 10% rate applies to royalties for the use of, or the right to use, any industrial, commercial or scientific equipment. The general rate under

the treaty is 15%. However, a 10% reduced rate got triggered by the Chile-Spain treaty by virtue of a most favoured nation clause.

13. The reduced 3% rate applies if the dividend payment from Ecuador to China is subject to foreign exchange control tax in Ecuador (see Protocol, item 3).
14. The 8% reduced rate applies if the interest payment from Ecuador to China is subject to foreign exchange control tax in Ecuador (see Protocol, item 3).

    The 0% rate applies if the interest is paid to any financial institution resident in China, or to the government, a political subdivision or a local authority, the China Central Bank or any institution wholly owned by the government of China or on loans guaranteed or insured by any of the aforementioned governmental bodies of China, in relation to exportation or investment financing programmes.
15. The 8% reduced rate applies if the royalty payment from Ecuador to China is subject to foreign exchange control tax in Ecuador (see Protocol, item 3).
16. A 25% withholding tax applies on 40% of dividends distributed, giving an ETR (effective tax rate) of 10% on the gross amount. However, if the dividend-paying company did not disclose the complete chain of its shareholders up to the ultimate beneficial owner, a 35% withholding tax applies on 40% of dividends distributed, giving an ETR of 14%.

    In case dividends are paid to non-resident entities whose ultimate beneficial owner is an Ecuador resident individual, progressive rates from 0% to 25% apply.
17. A 25% withholding tax applies on 40% of dividends distributed, giving an ETR (effective tax rate) of 10% on the gross amount. However, if the dividend-paying company did not disclose the complete chain of its shareholders up to the ultimate beneficial owner, a 35% withholding tax applies on 40% of dividends distributed, giving an ETR of 14%.
18. Ecuador-sourced income derived by non-residents without a permanent establishment (PE) in Ecuador is generally subject to a final 25% withholding tax rate on the gross amount. However, if the income is derived by residents in tax havens or zero/low-tax jurisdictions, the income is subject to a 35% withholding tax rate on the gross amount.

# EGYPT

## MEMBER FIRM

| City | Name | Contact Information |
|---|---|---|
| Cairo | Hany Rashed | +20 2 2354 7340<br>rashed@pkf.com.eg |

## BASIC FACTS

| | |
|---|---|
| Full name: | Arab Republic of Egypt |
| Capital: | Cairo |
| Main languages: | Arabic |
| Population: | 105.97 million (2022 estimate) |
| Monetary unit: | Egyptian Pound (EGP) |
| Internet domain: | .eg |
| Int. dialling code: | +20 |

## KEY TAX POINTS

- Egyptian resident companies are taxable on their worldwide income, except for profits derived from permanent establishments abroad. Non-residents are only taxed on Egyptian-sourced income.
- Dividends paid to residents and non-residents are not subject to withholding tax. Companies and individuals are not taxed on dividends received from resident companies but are taxed on dividends and other payments from non-residents.
- A credit system is available for relief of double taxation on foreign source income. The credit is subject to a maximum of the Egyptian tax paid on the overseas income concerned.
- There are provisions which limit the tax deductibility of interest based on the rate of interest charged and the debt to equity ratio of the company concerned.
- Transfer pricing rules are based on at arm’s length principles. An advance pricing arrangement is available.
- Domestic tax law provides for a 20% withholding tax applicable to the payment of interest and royalties to non-residents. Double tax treaties with various countries reduce the rate of withholding tax to be applied.
- General sales tax is payable on the supply of goods and services and imports. The standard rate of tax is 10% although rates vary from 0% to 30%.
- Resident individuals are subject to income tax on their worldwide income whereas non-residents are taxed on Egyptian-sourced income.

## A. TAXES PAYABLE

## CORPORATE INCOME AND GAINS TAX

Egyptian corporations are subject to corporate profits tax on their profits derived from Egypt, as well as on profits derived from abroad, unless the foreign activities are performed through a permanent establishment located abroad. Foreign companies resident in Egypt are subject to tax only on their profits derived from Egypt. Oil prospecting and production companies are subject to tax on their profits at a rate of 40.55%. The Suez Canal Company, Egyptian General Petroleum Company (EGPC) and Central Bank of Egypt are subject to tax on their profits at a rate of 40%.

## ADMINISTRATION

Companies must file their annual tax returns, together with all supporting schedules and the original financial statements, before 1st May each year or four months from the financial year-end. The tax return should be signed by the taxpayer. Taxpayers can file a request to extend the due date of filing of the tax return provided they pay an estimated amount of tax. The request must be filed at least 15 days before the due date and the estimated tax due must also be paid before the due date. The extended period can be up to 60 days. An amended tax return can be filed within 30 days from the due date. Any tax due must be paid when the tax return is filed. A late penalty is applied at the rate of 2% plus the credit and discount rate issued by the Central Bank of Egypt as of January each year.

The law has set up appeals committees at two levels - the Internal Committee and the Appeal Committee. The Appeal Committee's decision is final and binding on the taxpayer and on the tax department unless a case is appealed by either of them to the court within 30 days of receiving the decision, which is usually in the form of an assessment.

## DIVIDENDS

Dividends distributed by an Egyptian company are not subject to withholding tax because they are paid out of corporate profits that are taxed under the normal rules. Dividends received by residents from foreign sources are not taxed in Egypt. Interest on bonds listed on the Egyptian stock exchange is exempt from tax subject to certain conditions. Certain exemptions may be provided in some cases.

## CORPORATE TAX RATES

| Nature of Tax | Rate |
|---|---|
| Corporate income tax | 22.5% |
| Capital gains tax | 22.5% |
| Branch tax | 22.5% |
| Withholding tax: | |
| Dividends | 5% - 10%* |
| Interest | 20%** |
| Royalties from patents, know-how, etc. | 20%** |
| Certain services provided from non-resident entities | 20%** |
| Branch remittance tax | 0% |
| Net operating losses (years) | |
| • Carry back | 3 years |
| • Losses incurred in long-term projects can be carried back within the same project without limitation | |
| • Carry forward | 5 years |

NOTES:

* Dividends are subject to tax at a rate of 5% provided that:

1. The acquisition percentage is 25% or more; and,
2. The acquisition period is 2 years

If not the dividends will subject to tax 10%

** Final tax imposed on gross payments. The rate may be reduced under a double tax treaty.

## TAKAFUL CONTRIBUTION 2.5%

- Law No. 2 of 2018, applicable as from 12 July 2018, was issued on the comprehensive health insurance law;
- Unincorporated businesses and companies of whatever nature or legal form are subject to a 25 per mille levy on their total revenues;

## OTHER TAXES

The table below summarises other significant taxes.

| Nature of Tax | Rate |
|---|---|
| General VAT | 14% as from 1 July 2017 |
| • Customs Duties: | |
| • General, ad valorem | Various |
| On value of machinery needed for investments by companies | 5% |
| Stamp duties on bills, promissory notes and letters of guarantee as well as most types of documents, contracts, checks and receipts (shares and bonds listed on the Egyptian Stock Exchange are exempt) | Various |

The amounts paid become credits available for income tax purposes at the end of the period.

## SOCIAL INSURANCE

- The employee contribution percentage is 11% of the total social insurance salary while the employer contribution percentage is set at 18.75%;
- The social security contributions are subject to a contribution base minimum amount of EGP 1,400 and a maximum of EGP 9,400 per month for 2022. These thresholds are increased by 15% on 1 January of each year for a seven-year period, as from 1 January 2020.

| Year | Minimum amount (EGP) | Maximum amount |
|---|---|---|
| 2020 | 1,000 | 7,000 |
| 2021 | 1,200 | 8,100 |
| 2022 | 1,400 | 9,400 |
| 2023 | 1,700 | 10,900 |
| 2024 | 2,000 | 12,600 |
| 2025 | 2,300 | 14,500 |
| 2026 | 2,700 | 16,700 |
| 2027 | 3,200 | 19,300 |

## B. DETERMINATION OF TAXABLE INCOME

Corporate income tax is based on taxable profits computed in accordance with generally accepted accounting and commercial principles, modified for tax purposes by certain statutory provisions primarily concerning depreciation, provisions, inventory valuation, inter-company transactions and expenses. Start-up and formation expenses may be capitalised and amortised in the first year.

The deductibility of a branch's share of head office overhead expenses is limited to approximately 7% of general expenses. Head office expenses other than overhead and general administration expenses are subject to negotiation with the tax authorities. They are fully deductible if they are directly incurred by the branch and are necessary for the performance of the branch's activity in Egypt. Such expenses must be supported by original documents and approved by the head office auditors.

### DEBIT INTEREST

Debit interest of loans/overdraft used in the company's activity is a deductible item after offsetting the interest income. Interest expense paid to individuals who are not subject to tax or exempted from tax is not deductible. Interest expense is limited to the interest rate which will not exceed twice the discount rate determined by the central bank of Egypt.

### DEBT-TO-EQUITY RULES

The tax law has determined the maximum debt to equity ratio to be 4:1. In the event the debt exceeds such ratio, the excess interest is not considered by the Tax Authority to be a deductible expense.

### INVENTORIES

Inventories are normally valued for tax purposes at the lower cost or market value. Cost is defined as purchase price plus direct and indirect production costs. Inventory reserves are not permissible deductions for tax purposes. For accounting purposes, companies may elect to use any acceptable method of inventory valuation such as first-in, first-out (FIFO) or average cost. The method should be applied consistently and the reasons for such change should be stated if the method is changed.

### PROVISIONS

Provisions are not considered as deductible costs except for the following:

- 80% of loan provisions made by banks (required by the Central Bank of Egypt);
- Insurance companies' provisions determined by Law No. 10 of 1981.

### BAD DEBTS

Bad debts are a deductible cost if the company provides a report from an external auditor certifying the following:

- The company is maintaining regular accounting records;
- The debt is related to the company's activity;
- The debt appears in the company's records; and,
- The company has taken the necessary actions to collect the debt.

### DEPRECIATION AND AMORTISATION ALLOWANCES

Depreciation is deductible for tax purposes and may be calculated using either the straight-line or declining-balance method. Depreciation rates are as follows:

| Type of Asset | Rate | Method of Depreciation |
|---|---|---|
| Buildings | 5% | Straight-line |
| Intangible assets | 10% | Straight-line |
| Computers | 50% | Declining-balance |
| Heavy machinery and equipment | 25% | Declining-balance |
| Small machinery and equipment | 25% | Declining-balance |
| Vehicles | 25% | Declining-balance |
| Furniture | 25% | Declining-balance |
| Other tangible assets | 25% | Declining-balance |

Accelerated depreciation is allowable only once at a rate of 30% on new machines and equipment in the year they are placed into service. Normal depreciation is calculated after considering the accelerated 30% depreciation on the net value of new assets, provided that proper books of account are maintained.

Tax losses may be carried forward for five years. Losses incurred in long-term projects can be also carried back within the same project.

## REAL ESTATE TAX

Law No. 196 of 2008 was introduced and applied with effect from 1 January 2009. Tax rate: 10% of the annual rental value after excluding the following assumed maintenance expenses:

- 30% of the rental value for properties used for living accommodation;
- 32% of the rental for properties used for other purposes.

On 7 May 2020, Law No.23 for the year 2020 was issued amending the provisions of the 2008 Law as follows: exemption of real estate used in production and service activities determined by the Council of Ministers from tax on built real estate provided that the decision includes the percentage and duration of the exemption for each production or service activity.

## C. FOREIGN TAX RELIEF

Foreign tax paid by a resident entity outside Egypt can be deducted provided there is supporting documentation. Losses generated outside Egypt cannot be offset against the taxable amount in Egypt. Double tax treaties concluded between Egypt and other countries regulate the credit for taxes paid abroad on income subject to corporate income tax in Egypt.

## D. CORPORATE GROUPS

Associated or related companies in a group are taxed separately for corporate income tax purposes. Egyptian law does not contain a concept of group assessment under which group losses may be offset against profits within a group of companies.

## E. RELATED PARTY TRANSACTIONS

Egyptian tax law contains provisions for transfer pricing. The transfer pricing provisions are based on the at arm's-length principle. Under these provisions, the tax authorities may adjust the income of an enterprise if its taxable income in Egypt is reduced as a result of contractual provisions that differ from those that would be agreed to by unrelated parties.

However, it is now possible to enter into arrangements with the tax department to agree on a transfer pricing policy in advance (Advance Pricing Arrangement). This provides assurance that transfer prices will not be challenged after the tax return is submitted, with the consequent exposure to penalties and interest on late paid taxes.

### Country-by-Country (CbC) reporting

According to the Egyptian TP Guidelines 2018:

- Egyptian parent companies of an MNE group, with an annual consolidated group revenue of equal to or exceeding EGP 3 billion (approximately EUR 168 million), will be required to prepare and file a CbC report with the tax authority; and
- Egyptian subsidiaries of foreign-parented MNE groups, with an annual consolidated group revenue of EUR 750 million, will be subject to the OECD threshold of EUR 750 million, and required to file a CbC report with the jurisdiction in which the ultimate parent entity is resident.

### Submitting a Master and Local File

Any taxpayer who carried out business transactions with related parties should file a Master File and Local File if the value of related-party transactions is EGP 8 million or greater. Furthermore, there is a separate section in the tax return about transactions with related parties. The Master File should be prepared at the ultimate parent level of the group and should be made available to the tax authority by the taxpayer in due course.

### Penalties

- Penalty for transfer pricing non-compliance, including 2% of the value of the related party transactions, if a taxpayer fails to submit the CbC report or CbC notification (fails to submit, non-timely filing, incomplete or incorrect filing);
- Penalty for transfer pricing non-compliance, including 3% of the value of the related party transactions, if a taxpayer fails to submit the Local File or Master File (fails to submit, non-timely filing, incomplete or incorrect filing, not having the Master or Local File available);

## F. WITHHOLDING TAX

No withholding tax is levied on dividends distributed by resident companies, regardless of the residence status of the recipient. Interest derived by non-resident legal persons is subject to a final withholding tax at the rate of 20% on the gross amount, unless a lower treaty rate applies. Royalties derived by non-resident legal persons are subject to a final withholding tax at the rate of 20% on the gross amount, unless a lower treaty rate applies.

## G. EXCHANGE CONTROL

Egypt has a free market exchange system. Exchange rates are determined by supply and demand without interference from the central bank or the Ministry of the Economy.

## H. PERSONAL TAX

Income tax is imposed on the worldwide income of Egyptian residents. Non-residents are subject to tax on income earned or realised in Egypt. An individual is deemed to be a resident of Egypt if:

- The individual is present in Egypt for more than 183 days in a fiscal year;
- The individual's principal place of residence is Egypt. Article 2 of the Executive Regulations states that an individual is considered to have a permanent residence in Egypt if:
  a) The taxpayer stays in Egypt for the majority of the year, either in his own property, in a rented property or in any other place;
  b) The taxpayer has a local commercial presence, professional office, industrial site or any other place where he carries on his activities in Egypt;

c) The individual is an employee who performs his duties abroad and receives a salary from an Egyptian public or private source.

Income tax is assessed each year on the aggregate of the net amounts from each category of income realised during the preceding year. There are four recognised categories of income, namely:

1) Employment income;
2) Business income (which includes income from commercial and industrial activities);
3) Non-commercial income;
4) Income from real estate assets.

**Note:** there is a personal allowance equal to EGP 9,000 per annum.

Graduated rates apply with effect from 1 July 2020 to the aggregate of the six categories of income, as follows:

| **Annual net income (EGP)** | | | | | | |
|---|---|---|---|---|---|---|
| **Less than 600,000** | **600,000 – 700,000** | **700,000 – 800,000** | **800,000 – 900,000** | **900,000 – 1,000,000** | **Over 1,000,000** | **Income tax rate (%)** |
| 1 – 15,000 | | | | | | 0 |
| 15,001 – 30,000 | 1 – 30,000 | | | | | 2.5 |
| 30,001 – 45,000 | 30,001 – 45,000 | 1 – 45,000 | | | | 10 |
| 45,001 – 60,000 | 45,001 – 60,000 | 45,001 – 60,000 | 1 – 60,000 | | | 15 |
| 60,001 – 200,000 | 60,001 – 200,000 | 60,001 – 200,000 | 60,001 – 200,000 | 1 – 200,000 | | 20 |
| 200,001 – 400,000 | 200,001 – 400,000 | 200,001 – 400,000 | 200,001 – 400,000 | 200,001 – 400,000 | 1 – 400,000 | 22.5 |
| Over 400,000 | Over 400,000 | Over 400,000 | Over 400,000 | Over 400,000 | Over 400,000 | 25 |

Individuals are not subject to tax on capital gains except in the case of the disposal of real estate or building sites within the boundaries of Egyptian cities. Such gains are not subject to income tax but are taxed at the rate of 2.5% on the value of the property.

## I. TREATY WITHHOLDING TAX RATES

Dividends paid to non-residents are not subject to withholding tax under Egyptian domestic law. Consequently, the following table sets forth maximum withholding rates provided in Egypt's tax treaties for interest and royalties only.

| | **Interest (%)** | **Royalties (%)** |
|---|---|---|
| Non-treaty countries | 20 | 20 |
| **Treaty countries:** | | |
| Albania | 10 | 10 |
| Algeria | 5 | 10 |
| Austria | 15 | 0 |
| Bahrain | –[1] | –[1] |
| Belarus | 10 | 15 |
| Belgium | 15 | 15/20 |
| Bulgaria | 12.5 | 12.5 |
| Canada | 15 | 15 |

| Serbia | 15 | 15 |
| Singapore | 15 | 15 |
| South Africa | 12 | 15 |
| Spain | 10 | 12 |
| Sudan | 20 | 10/3[4] |
| Sweden | 15 | 14 |
| Switzerland | 15 | 12.5 |
| Syria | 15 | 20 |
| Tunisia | 10 | 15 |
| Turkey | 10 | 10 |
| Ukraine | 12 | 12 |
| United Arab Emirates | 10 | 10 |
| United Kingdom | 15 | 15 |
| United States | 15 | 15 |
| Yemen | 10 | 10 |
| Yugoslavia[5] | 15 | 15 |

NOTES:
1. According to domestic law in each country.
2. A final draft of a new tax treaty with Finland was initiated on 17 September 1997, but the new treaty has not yet been ratified.
3. The higher rate applies to trademarks.
4. Films, otherwise 10%.
5. The treaty with Yugoslavia applies to the republics that formerly comprised Yugoslavia.

## EL SALVADOR

### MEMBER FIRM

| City | Name | Contact Information |
|---|---|---|
| San Salvador | Horacio A. Castellanos Chacón | +503 2273 2555<br>ha.castellanos@pkfelsalvador.com |

## BASIC FACTS

| | |
|---|---|
| Full name: | Republic of El Salvador |
| Capital: | San Salvador |
| Main languages: | Spanish |
| Population: | 6.54 million (2022 estimate) |
| Monetary unit: | US Dollar (USD) |
| Internet domain: | .sv |
| Int. dialling code: | +503 |

## A. TAXES PAYABLE

### COMPANY INCOME TAX

El Salvador's income tax law affects annual revenue from business activities conducted in El Salvador when any of the causes of such revenue occur within the national territory. Income Tax - A tax rate of 25% is applied to the net profit of companies whose taxable income does not exceed USD 150,000. For all others it is 30%.

A corporation is required to prepay its estimated tax liability on a monthly basis of 1.75% of gross revenue. This is deducted as a credit in the annual income tax return. Corporate tax returns are due by the end of the fourth month following the end of the fiscal year. An extension of six months may be granted if requested for the payment only. The tax year of companies corresponds to the calendar year.

### CAPITAL GAINS TAX

The tax involved is a 10% income tax on the net profit of the transaction. Net profit is calculated by deducting the cost of the property plus any related expenses from the sales price. Income from the sale of securities is taxable as follows: the buyer will withhold 10% of the profit and remit it to the Tax Department.

### BRANCH PROFITS TAX

Branches of foreign companies are subject to the same tax rates as Salvadoran companies. There is no branch remittance tax in El Salvador.

### SALES TAX/VALUE ADDED TAX (VAT)

Services and goods are subject to 13% VAT. The following items are exempt from VAT: public health, home rentals, education, state titles, public water, public transportation, pension funds and public lottery.

### AD VALOREM/ SPECIFIC TAXES

Two taxes are paid for alcoholic beverages:

- Ad Valorem taxes at a 5% tax rate;
- A specific tax on the alcoholic grade per litre ranging from 0.04 to 0.16 cents.

For cigarettes a specific tax of USD 0.0225 is levied per cigarette.

### TAX ON FINANCIAL TRANSFERS

1) **TAX ON CHECKS**

   Check payments over USD 1,000 are subject to 0.25% on the operation base. This tax is non-refundable and the bank will charge it to the company bank account.

2) **TAX ON LIQUIDITY CONTROL**

   A tax of 0.25% will be paid on cash payments and deposits, if the accumulated sum is more than USD 5,000 per month. This tax is a credit against any future payment of VAT, Income Tax, or Ad valorem Tax. The bank will charge it to the company bank account.

### LOCAL TAXES

El Salvador's income tax law affects the whole national territory equally.

### OTHER TAXES

Other taxes that are applicable in their various manifestations include:

### MUNICIPAL OFFICE TAXES

Taxes are paid according to a table and total assets. There are different tables for every city in El Salvador. In San Salvador, the table varies depending on whether the company is industrial, commercial or other.

### NATIONAL REGISTRATION TAX

All industrial or commercial businesses are required to have an annual license to operate. This tax is paid according to the total assets and according to the following rates:

- From USD 2,000.00 to USD 57,150.00 a tax of USD 91.43 is levied;
- From USD 57,151.00 to USD 114,286.00 a tax of USD137.14 is levied;
- From USD114,287.00 to USD 228,572.00 a tax of USD 228.57 is levied.

If the asset is worth more than USD 228,572.00 then USD 11.43 will be added to every USD 100,000 in assets or fraction thereof, up to a limit of USD 11,428.57.

## SOCIAL SECURITY TAX

These are payments that are made monthly by employers and employees on the payroll of companies for the purpose of guaranteeing the functioning of the employee's social security system benefits at the national level. The table is as follows:

- Company 7.50% of salary;
- Employee 3.00% of salary.

Maximum salary of USD 1,000 per employee. Social Security has a special education tax called INSAFORP which is 1% of the total amount that the company pays (this applies to companies with more than 10 employees).

## PENSION TAX

These are payments that are made monthly by employers and employees on the payroll of companies for the purpose of guaranteeing the functioning of the employee's pension system and retirement benefits at the national level. The table is as follows:

- Company 7.75% of salary;
- Employee 7.25% of salary.

Maximum salary of USD 6,500.00 per employee.

## B. DETERMINATION OF TAXABLE INCOME

The net taxable income of a corporation or partnership is determined by subtracting all allowable deductions from gross taxable income. Generally, expenditures and/or losses are deductible provided they are incurred in gaining or producing taxable income, or preserving the source of income. Special rules apply in respect of certain expenditures.

## DEPRECIATION

Depreciation is normally calculated by the straight-line method over the estimated useful life of the asset.

## STOCKS / INVENTORY

The Income Tax regulations only allow the use average-cost method according to the normal course of operations. No other method is allowed.

## DIVIDENDS

Dividends are subject to 5% income tax. If the stockholder is located in a country with low or zero taxation (tax havens), the dividends will be subject to 25% income tax. Dividends for profits earned before 2011 are exempt. A decrease in stockholder´s equity is subject to 5% income tax, if the equity originated from capitalisation of profits.

## INTEREST INCOME

Banks will withhold 10% income tax on interest income. Loans given by local companies to its stockholders, related parties, headquarters, or residents/companies located in tax havens are subject to a 5% withholding tax.

## INTEREST EXPENSE

If a loan is made to a Salvadoran company by a foreign bank that was registered by the Central Bank of El Salvador before 2009, the interest expense is exempt from withholding tax. If the foreign bank is registered by the Central Bank from 2010 onwards, a 10% withholding tax will apply. If the loan is made by a foreign company or a bank that is not registered by the Central Bank, withholding tax will be applied at a rate of 20%.

## LOSSES

Losses incurred in any given year can be taken as a valid deduction only for the current year. There is no carry forward or carry back of losses.

## SOURCE OF THE INCOME

Foreign-sourced income is not subject to income tax. Only income earned on the territory of El Salvador is subject to El Salvador income tax. Interest income and gains on market values are the exception. Foreign-sourced income is not subject to VAT. Income received by persons or companies domiciled outside El Salvador will be considered as being from an El Salvadoran source if it arises from services or actions that benefit persons or companies located in El Salvador, including fees, interests and royalties.

## INCENTIVES

The following incentives are available to certain qualifying industries and corporations:

- Companies operating in Free Zones or under the Law of International Services are tax-exempt on profit derived from sales to foreign countries, for a period of 15 years after the companies have been approved by the Ministry of Economy.
- 15 year tax holiday; from 15 to 25 years, 12% income tax; from 25 years onwards, 18% income tax.
- The 5% payment on dividends will become effective after 12 years.
- Dividends paid to stockholders of companies located in Free Zones will be subject to 5% after 12 years.

## C. RELATED PARTY TRANSACTIONS

Transfer Pricing (TP) policies are applicable in El Salvador. If the Company does not have a TP Study, the government is entitled to determine differences between related party transactions and a transaction done by independent parties. If a difference is detected, this would not be deductible for income tax purposes and a 25% or 30% tax would be levied on the difference.

## D. WITHHOLDING TAX

Services (not in payroll) and fees paid to local individuals are subject to a 10% withholding tax. Services and fees paid to foreign corporations or non-resident individuals for work done in El Salvador are subject to a 20% withholding tax rate. Interest, commissions, royalties or technical assistance fees paid to foreign recipients are subject to a 20% withholding tax. International transportation services are subject to 5% withholding tax. Purchases of intangible assets are subject to 20% withholding tax.

Any payment done to non-resident individuals or non-resident companies located in tax havens is subject to a 25% withholding tax. A list of tax havens may be consulted on the Ministry of Finance web page: www.mh.gob.sv

## E. PERSONAL TAX

a) The monthly withholding tax rates set out below are applicable to any individual included in payroll for permanent service:

**Taxable Monthly Income (in USD)**

| From: | To: | Withholding tax |
|---|---|---|
| 0.01 | 472.00 | No withholding tax/exempt |
| 472.01 | 895.24 | USD 17.67 plus 10% in excess of USD 472 |
| 895.25 | 2038.10 | USD 60 plus 20% in excess of USD 895.24 |
| 2,038.11 | In excess of | USD 288.57 plus 30% in excess of 2,038.10 |

b) The annual income tax rates set out below are applicable to any individual included in payroll for permanent service (in USD):

| From: | To: | Withholding tax |
|---|---|---|
| 0.01 | 4,064.00 | Exempt |
| 4,064.01 | 9,142.86 | USD 212.12 plus 10% in excess of USD 4,064.00 |
| 9,142.87 | 22,857.14 | USD 720.00 plus 20% in excess of USD 9,142.86 |
| 22,857.15 | In excess of | USD 3,462.86 plus 30% in excess of USD 22,857.14 |

## F. TREATY AND NON-TREATY WITHHOLDING TAX RATES

El Salvador has a Free Commerce Treaty with the USA, Chile, Mexico and the Dominican Republic. There is a double tax treaty with Spain.

| | Dividends (%) | | Interest (%) | Royalties (%) |
|---|---|---|---|---|
| | Individuals, companies (%) | Qualifying companies (%) | | |
| **Non-treaty countries** | | | | |
| Companies | 0/5/25[1] | 0/3/25[1] | 0/10/20/25[1] | 5/20/25[1] |
| Individuals | 0/5/25[1] | -- | 20/25[1] | 5/20/25[1] |
| **Treaty countries** | | | | |
| Spain | 12 | 0[2] | 0/10 | 10 |

Notes:

1. The 25% rate applies to payments made to residents of countries considered to be tax havens or territories with a preferential tax regime.
2. With respect to a minimum 50% participation in capital.

# ESTONIA

## MEMBER FIRM

| City | Name | Contact Information |
|---|---|---|
| Tallinn | Rein Ruusalu | +372 66 30 829<br>rein.ruusalu@pkf.ee |

## BASIC FACTS

| | |
|---|---|
| Full name: | Republic of Estonia |
| Capital: | Tallinn |
| Main languages: | Estonian, English, Russian |
| Population: | 1.33 million (2022 estimate) |
| Monetary unit: | Euro (EUR) |
| Internet domain: | .ee |
| Int. dialling code: | +372 |

## KEY TAX POINTS

- Estonian resident companies do not pay tax on their profits until they are distributed to shareholders. The taxable period is the calendar month.
- There is no separate capital gains tax. Gains derived by resident companies or branches of foreign companies are exempt until a distribution is made.
- Value added tax applies to most goods and services.
- Local taxes are imposed by only a few municipalities.
- Foreign tax is mostly relieved by exemption by virtue of the provisions of the double tax treaties with most overseas jurisdictions.
- Withholding taxes apply only to certain royalties and in special cases (fees to artists and sportsmen from Estonian source).
- Income tax applies to individuals at a single, flat rate.

## A. TAXES PAYABLE

### COMPANY TAX

Estonian resident companies are liable for corporate income tax on their worldwide income. Corporate income tax is not levied when the company makes profits but when those profits are distributed to the company's shareholders. The standard rate is 20% on the gross profits distributed or 20/80 (i.e. 25%) on the net amount of the dividend distributed to the shareholders. Although the tax applies like a withholding tax on the recipient of the dividend it is, strictly speaking, a tax on the company. The taxable period is the calendar month.

As from 2019, dividends distributed at an amount lower than or equal to the amount of the average of distributed dividends (i.e. excluding distributions of tax-exempt dividends, liquidation proceeds, capital reductions and permanent establishments income) in the previous 3 years, on which income tax has been paid by the resident taxpayer, are taxed at the rate of 14% of the distribution tax (the tax rate on the net amount being 14/86 instead of the regular 20/80). According to the transitional rules, one third of taxed profits of 2018 and one third of taxed profits of 2018 and 2019 may be distributed at the lower rate in 2019 and 2020, respectively.

If dividends are paid to resident or non-resident individuals and the distributing company has paid the distribution tax at the lower 14% rate, the individual recipient is subject to an additional withholding tax of 7%. A lower withholding rate may apply under an applicable tax treaty. Withholding tax will not apply if the recipient of the dividends is a company.

### CAPITAL GAINS TAX

There is no separate capital gains tax in Estonia. Gains derived by resident companies or branches of foreign companies are exempt until a distribution is made.

### BRANCH PROFITS TAX

There is no specific branch profits tax in Estonia. Branches of foreign companies are taxed under the same principles as resident companies, i.e. taxed on the distribution of profits at a rate of 20%.

### VALUE ADDED TAX (VAT)

The supply of most goods and services is subject to VAT. Some goods and services are exempt from VAT. The standard VAT rate is 20%. A lower rate of 9% applies to certain items such as books, medicinal products etc. Exports from Estonia are zero rated.

### FRINGE BENEFITS TAX

Fringe benefits are taxed as income. With effect from 1 January 2008, 20% income tax is levied on the gross value of the benefit plus 33% social security contribution.

### LOCAL TAXES

The local government has the right to impose local taxes but presently only a few municipalities do so.

## B. DETERMINATION OF TAXABLE INCOME

As the income of Estonian-resident companies is exempt from tax, there is no requirement for determining trading income for tax purposes. Tax is levied on the payment of dividends and distributions of profit in other forms such as fringe benefits, gifts and other non-business related payments.

## C. FOREIGN TAX RELIEF

Under Estonia's double tax treaties, foreign tax is mostly relieved by exemption.

## D. CORPORATE GROUPS

Corporations are taxed separately in Estonia. There is no concept of consolidated tax returns.

## E. RELATED PARTY TRANSACTIONS

Related party transactions may be adjusted for tax purposes if the transactions are not at arm's length.

## F. WITHHOLDING TAX

Withholding taxes apply only to certain royalties (see table below) and in special cases (fees to artists and sportsmen from Estonian source).

## G. EXCHANGE CONTROL

There are no exchange controls in Estonia.

## H. PERSONAL TAX

The income tax depends on the person's annual income. The annual income is tax-free up to an amount of EUR 6,000. From a gross annual income of EUR 14,400, the tax-free income will start to decrease until it reaches zero at a gross annual income of EUR 25,200. The income tax rate of 20% applies to income over the annual tax-free threshold of EUR 6,000.

Employers are obliged to withhold income tax from employees' salaries. In addition, the following social security rates apply:

- Social security tax of 33% of gross salary;
- Unemployment insurance:
  - o Employer 0.8% of gross salary;
  - o Employee 1.6% of gross salary.

Dividends received from resident companies and interest received from EU credit institutions are tax free.

## I. TREATY AND NON-TREATY WITHHOLDING TAX RATES

There is no withholding tax on dividends nor on interest in Estonia.

| | Royalties[1] (%) | Royalties[2] (%) |

2. Other royalties.
3. 0% if the beneficial owner is a company. 5% in all other cases.
4. Effective date: 1 January 2022.

## ESWATINI

### MEMBER FIRM

| City | Name | Contact Information |
|---|---|---|
| Ezulwini | Charmain Young | +268 2417 1008<br>charmain@pkf.co.sz |

### BASIC FACTS

| | |
|---|---|
| Full name: | Kingdom of Eswatini |
| Capital: | Mbabane |
| Main languages: | English and Siswati |
| Population: | 1.18 million (2022 estimate) |
| Monetary unit: | Swazi lilangeni (SZL) |
| Internet domain: | .sz |
| Int. dialling code: | +268 |

## KEY TAX POINTS

- Company income tax in Eswatini is a 27.5% flat rate on the taxable profit as adjusted for income tax purposes.
- Resident and non-resident companies are subject to income tax on income accrued or derived from Eswatini. Different rates apply to resident and non-resident companies.
- Currently there is no tax is payable on capital gains.
- VAT Act no. 12 of 2011 was introduced in Eswatini on 1 April 2012. VAT is chargeable on imports and the supply of goods and services in Eswatini. It is imposed at 14% on most goods and services supplied by a vendor. Certain goods and all exports are zero rated. Exempt supplies are provided for in the first schedule and zero rated supplies are provided for in the second schedule of the said VAT Act.
- There is no wealth tax, real estate tax or inheritance tax, sales tax or gift tax in Eswatini.
- Relief for double taxation is provided by means of a credit for overseas tax suffered on overseas income.
- Eswatini has entered into a limited number of double tax treaties with certain countries, including South Africa, the United Kingdom, Taiwan and Mauritius.

## A. TAXES PAYABLE

### COMPANY TAX

The income tax system is source-based, i.e. income from a source within or deemed to be within Eswatini will be subject to taxation. Taxes are paid in two instalments in advance based on a provisional assessment, which should be at least 90% of the prior year tax charge. The tax year is the year ending 30th June. The Eswatini Revenue Authority (SRA) has implemented an electronic system for filing and paying taxes which benefits both the tax authorities and the taxpayer. E-tax is an electronic platform through which taxpayers may submit returns as well as access tax information and forms online. This platform is a live feed into the SRA Revenue Management System (RMS) and was rolled out in 2014.

With effect from 1 July 2013, the standard corporate income tax rate is 27.5%. A reduced corporate income tax rate is applicable for certain qualifying businesses.

The estimate of taxable income may not be less than the taxable income assessed for the preceding year of assessment (where an assessment has been issued not less than twenty one (21) days before the date such an estimate is made), unless the taxpayer can satisfy the Commissioner General that the taxable income for the current year will be less than that of the preceding year. Provisional tax payments are made as follows:

- **First payment:** This payment must be made within six months from the commencement of the year of assessment or approved financial year-end date. The estimate of taxable income may not be less than the taxable income assessed for the latest preceding year of assessment, unless the taxpayer can satisfy the Commissioner General that the taxable income for the current year will be less than that for such preceding year.
- **Second payment:** This payment must be made not later than the last day of the year of assessment or approved financial year end date. Where there has been an increase in the taxable income during the course of the current tax year, all taxpayers are obliged to make good for the difference realised when paying either the first or second provisional tax.
- **Third payment:** It must be paid on or before the due date of the income tax return. Interest at the rate of 18% per annum will be charged on any amount not paid by the date stated and in addition a penalty equal to 20% of such amount may be imposed.

### TRUSTS

(1) Every trustee who makes any payment from trust income to a beneficiary who has a vested right to such income shall withhold tax at the rate of thirty-three per cent of the gross amount.

(2) The tax withheld shall be on account of the liability to tax of such beneficiary on the income derived from the trust.

(3) Every trustee who has withheld any tax shall:

   (a) Within fifteen days from the date of payment remit to the Commissioner the amount of tax so withheld; and,

   (b) Furnish within thirty days after the end of the year of assessment to the beneficiary to whom the payment is made a certificate, showing the amount of the payment made and the tax withheld during the year of assessment.

(4) Every trustee making any payment shall maintain a record showing in relation to each year of assessment:

   (a) The payment made to each beneficiary; and,

   (b) The tax withheld from such payment, and such record shall be kept for the period specified for examination by the Commissioner as and when required.

(5) The deduction of tax shall not relieve a beneficiary from the obligation to furnish a return for the assessment of the tax or any return from any other obligation imposed by the Income Tax Order of 1975 Amended.

(6) A trustee who fails to withhold any tax or having withheld such tax fails to remit such tax to the Commissioner, as required shall, in addition to any penalty for which he may be liable, be personally liable to pay the Commissioner that amount of tax as if it were tax due and payable by such person under Part VII of the Income Tax Order of 1975 as Amended.

### BRANCH PROFITS TAX

Branches of non-resident Companies are subject to tax on Eswatini profits as if they were resident companies. In addition, branch profits tax of 15% is charged on the deemed repatriated income. Such branch profits tax being paid or payable to a company incorporated or registered as such in a neighbouring country (South Africa, Botswana, Lesotho, Mozambique and Namibia) and that it is neither a subsidiary nor a branch of a company incorporated or registered outside a neighbouring country, the rate of tax for which such first mentioned company shall be liable is 12.5%.

### SALES TAX / VALUE ADDED TAX

There is no sales tax in Eswatini. This was replaced by Value Added Tax (VAT) introduced in Eswatini in April 2012. It is administered by the VAT Act No.12 of 2011 as well as the VAT Regulations of 2012. VAT is tax that is charged on the consumption of goods and services in Eswatini and on the importation of goods and services into Eswatini.

**Standard rated supplies:**

These are taxable supplies that are neither exempt nor zero rated. VAT charged on standard rated supplies is 15%.

**Exempt supplies (first schedule of the VAT Act no. 12 of 2011)**

- These are goods and services that do not attract VAT at all;
- Suppliers of these goods and services cannot register for VAT purposes;
- Businesses dealing in exempt goods and services when purchasing taxable supplies have to pay VAT;
- They cannot claim the VAT they incurred from their purchases as input tax because they are not VAT registered.

**Zero-rated supplies (second schedule of the VAT Act no. 12 of 2011)**

- These are goods and services that attract VAT at 0%;
- Suppliers of these goods and services can register for VAT;
- Such businesses can claim the VAT they incurred from their purchases as input tax at the end of each tax period.

**VAT Declaration – Payment /VAT Return**

There are two applicable tax periods:

**Category A - One month tax period**

Businesses who make annual taxable supplies of E20 million and above, or, businesses approved to deferred import VAT.

**Category B – three month tax period**

Businesses that make annual taxable supplies of less than E20 million are required to submit returns at three months intervals (quarterly).The return must be accompanied by proof of payment when applicable.

## SEKULULA/VAT EASY

A Memorandum of Understanding for Processing and Administration of VAT Refunds System between Eswatini Revenue Authority and South African Revenue Services for Sekulula / VAT Easy was rolled out on 1 April 2015. This is a procedure for claiming VAT paid in South Africa to pay import VAT for imports into Eswatini. It covers goods bought from an entity registered for VAT in South Africa on which VAT was charged. The provisions for regulating matters relating to VAT is for the reduction of fiscal invasion.

**Qualifying Purchasers:**

- Companies – registered for business in Eswatini
- Individuals – residing in Eswatini

Qualifying purchasers will submit original tax invoices to SRA to claim and offset import VAT. SARS will refund VAT paid in South Africa on movable goods imported into Eswatini only to SRA. No other VAT administrator will operate in Eswatini. There is no possibility for companies/ persons to directly claim VAT refund from SARS.

**Benefits of the System:**

- No additional border clearance requirements - special simplifications for non-commercial declarations;
- To improve compliance in import declarations;
- Reduced incentive for non-declaration – import VAT settled through invoice instead of cash;
- To improve traders' cash-flow position –no extra cash to settle import VAT liability in Eswatini;
- To increase government revenue;
- Reduced administrative burden.

**Conditions for valid claims:**

- Declaration of imported goods;
- Import goods within 90 days from date of invoice;
- Valid tax invoice and required documents to be submitted to SRA;
- Passport number of the qualifying purchaser.

**Definition of a qualifying purchaser:**

- Must be a non-South African resident;
- The entity must be registered for business purposes in Eswatini.

**Documents required to validate the status of qualifying purchaser:**

- Passport/Travel Document;
- Valid SRA Tax Identity Number (TIN) and trading licence.

**THE BASIS FOR THE CLAIM SHALL BE A TAX INVOICE THAT IS FULL OR ABRIDGED AS FOLLOWS:**

| Full (consideration ≥ E5, 000) | Abridged (consideration < E5, 000) |
|---|---|
| The words "TAX INVOICE" | The words "TAX INVOICE" |
| Name, address and VAT registration number of the supplier | Name, address and VAT registration number of the supplier |
| Invoice number and date of issue | Invoice number and date of issue |

| Full (consideration ≥ E5, 000) | Abridged (consideration < E5, 000) |
|---|---|
| Full and proper description of goods | Full and proper description of goods |
| Price of goods and VAT amount or rate | Price of goods and VAT amount or rate |
| State whether goods are new or used | State whether goods are new or used |
| Name and address of recipient | |
| Quantity or volume of goods supplied | |
| Services supplied shown separately on the invoice | |

**Designated Borders:**
- Ngwenya Border Post;
- Matsamo Border Post;
- Sandlane Border Post;
- Mahamba Border Post;
- Lavumisa Border Post;
- Mananga Border Post.

**Exclusions:**
Refund claims will not be paid in respect of:
- VAT levied and paid on services rendered in South Africa;
- Claims below ZAR 250.00 (VAT incl.);
- A claim made of consolidated invoices – must be from one supplier for commercial declarations
- Goods imported through non-designated borders: Bulembu, Lundzi, Sicunusa, Gege, Nsalitje, Lomahasha and Mhlumeni;
- Goods imported by post or through the airport fall under direct exports and importers must claim from the South African airport.

**Procedure – Commercial:**
- Claims must be submitted with Refund Envelope;
- Businesses must designate and provide passport copy for authorised person;
- VAT on insurance, freight & other costs must be paid at time of entry, using the prepayment account or point of sale;
- Deferred accounts will not be used for "Sekulula/VAT easy" declarations;
- You must provide invoice copies to comply with other requirements, e.g. tax returns, audit.

**Procedure – Motor Vehicles:**
- Declare and pay VAT as per the current procedure;
- Claims to be submitted within 75 days from date of import with, proof of authorised release by SARS;
- A valid original tax invoice;
- The proof of registration in Eswatini;
- The owner's passport copy and SRA Customs Clearance Certificate;
- The manufacturer's certificate (for a new motor vehicle).

**Procedure – Used Goods:**
- 15 % import VAT shall be paid at the time of entry;
- The client applies through SRA for refund;
- SRA remittance form is completed and submitted with proof of payment;
- SARS will verify claims prior to payment;
- The amount refunded will be less any tax reduction on previous claims on the same transaction; (notional input tax) claimed by South African vendor from SARS;
- SRA will then remit upon refund by SARS (amount paid into client's bank account).

**Roles of the parties:**

**SRA**
- Training and sensitization of stakeholders;
- Invoice vetting to ensure validity;
- Collection of invoices and required documents for valid claims;
- Notify and collect payment from importer on non- paid invoices;
- Refund importer where claim for used goods and motor vehicles has been paid by SARS.

**SARS**
- Pay refunds in respect of submitted claims;
- Advise on reasons for rejections;
- Provide database for registered vendors;
- Exchange information where collusion is suspected.

**IMPORTERS**

- Fully declare goods imported into Eswatini;
- Submit original valid invoices and relevant supporting documents to facilitate claim;
- Pay import VAT on rejected invoices;
- Only applies to “Qualifying Purchasers”;
- It applies to Swazi residents;
- It is meant only for businesses registered in Eswatini;
- The importer must have a valid SRA (TIN) and Trading licence;
- VAT paid on movable goods only will be refunded;
- Goods must be imported within 90 days from invoice date through designated borders;
- Goods must be declared at the designated borders.

## ADVANCE PAYMENT ON VAT

Advance payments on VAT came into effect on 1 April 2015:

a. Monthly and quarterly filers are allowed to make advance payments of the VAT due even before the end of their tax period. The return will only be submitted on or before the 20th day of the month following the end of the tax period.
b. Taxpayers must have made all VAT payments relating to that particular tax period on or before the 20th day of the month following the end of the tax period.
c. Advance payment does not absolve the taxpayer from submitting the required VAT Returns as stipulated in Section 32 of the VAT Act. Failure to submit on or before the due date shall continue to attract penalties in terms of Section 57 of the VAT Act.
d. The facility provided by this Practice note is given as an option to both “Category A” and “Category B” taxpayers. Taxpayers who are comfortable with the payment intervals as prescribed in the legislation may continue to make payments in that manner.

## FRINGE BENEFITS TAX

In general, benefits provided to employees are added to their remuneration and taxed accordingly. There are, however, some exceptions, these include all other benefits in kind that an employee may enjoy at the expense of the employer, e.g. remuneration of domestic assistants by the employer on behalf of the employee (the amount of the remuneration paid to the assistants is added to the employee’s salary before calculation of tax). The value of free passage by road, rail, ship, or air that are paid for an employee. Such value is not taxable if the duration for the employment contract is two years or more. If the contract is less than two years the contract should not be renewable.

## STAMP DUTY

Stamp duty is levied on legal instruments relating to the sale, mortgage or lease of immovable property and the sale or mortgage of stocks and shares.

## LOCAL TAXES

Employment income is taxed on a withholding tax (WHT) basis known as Pay As You Earn (PAYE) at a graduating scale of 33% per annum.

**Companies – 2012 to date:**

| Tax rate date from | Tax rate date to | Tax rates |
|---|---|---|
| 1 July 2012 | 30 June 2013 | 30% |
| 1 July 2013 | To date | 27.5% |

**Individuals – 2013 to date:**

| Taxable income (SZL) | Tax rate |
|---|---|
| 0 – 100,000 | 20% |
| 100,001 – 150,000 | SZL 20,000 + 25% of the excess of SZL 100,000 |
| 150,001 – 200,000 | SZL 32,500 + 30% of the excess of SZL 150,000 |
| Above 200,000 | SZL 47,500 + 33% of the excess of SZL 200,000 |

**Part-time employee remuneration:**

| Remuneration income (SZL) | Tax rate |
|---|---|
| 0 – 8,333 | 20% |
| 8,333 – 12,500 | 25% |
| 12,500 – 16,666 | 30% |
| Above 16,666 | 33% |

**Withholding tax for residents and non-residents:**

| Resident and Non-resident Tax | Rate of Tax | Due Date |
|---|---|---|
| Non-resident shareholders’ tax (NRST) on dividends | SACU Area 12.5%.<br>Outside SACU 15% | Within 30 days from the day on which the dividend is declared |

| | | |
|---|---|---|
| Non-resident tax on interest | 10% | Within 15 days after the date of accrual |
| Withholding tax on royalties and management fees | 15% | Within 15 days from the date of payment. |
| Withholding tax on non-resident contractors | 15% | Within 15 days from the date of payment. |
| Withholding tax on entertainers and sportsmen | 15% | Within 15 days from the date of payment. |
| Repatriated Branch Profits | 15% | Within 15 days from the date of payment. |
| Withholding tax on non-resident persons | 15% | Within 15 days from the date of payment. |

**Concessionary rates of normal tax in the case of redundant or retiring individuals – 2013 to date:**

Lump-sum payments in excess of SZL 60,000 made in respect of retirement or redundancy are taxed as follows:

| Taxable income (SZL) | Tax rate |
|---|---|
| 0 – 200,000 | 25% |
| 200,001 – 300,000 | SZL 50,000 + 30% of the excess of SZL 200 000 |
| Above 300,000 | SZL 80,000 + 33% of the excess of SZL 300 000 |

## OTHER TAXES

These include amongst others, customs and excise duties and graded tax. The following are the rates relating to graded tax:

a) The rate for all Swazi adults in receipt of income is E18/annum and this is payable via the first PAYE remittance system.

b) The rate for an adult male person not in receipt of income is E4.20/annum.

c) Female adults not in receipt of any income are not obliged to pay Graded tax.

## EXCISE DUTY

Special excise duties apply to the following:

- Alcohol;
- Tobacco products;
- Perfumes, etc.

**Temporary importation**

Security is provided for the payment of customs duties and other taxes due in the event that the goods are not re-exported within the required deadline. This is to ensure that goods that were imported for other than home consumption are not diverted to such consumption.

**Permanent importation**

Release for free circulation (The term “free circulation” is used to describe imported goods on which all import formalities have been complied with and any customs duties or other charges have been paid and not repaid in whole or in part). At point of entry - obtain data to identify the goods and apply non-tariff measures (e.g. licenses):

- Perform point of entry controls - if necessary;
- Collect or secure import duties;
- Release the goods.

Transit – suspension of duties and other charges, security required.

## B. DETERMINATION OF TAXABLE INCOME

## CAPITAL ALLOWANCES

**Wear And Tear Allowance:**

| Description | Write Off Period |
|---|---|
| Computers software (pc’s); special patterns and tooling; video cassettes | 2 |
| Bulldozers; calculators; computers (pc’s); computers software; concrete transit mixers; Dictaphones; fax machines; motorized concrete mixers; patterns, tooling and dyes; textbooks; trucks (heavy duty) | 3 |
| Aircraft (light – passenger / commercial / helicopters); bicycles; compressors; debarking equipment; delivery vehicles; excavators; fork-lifts trucks; front-end loaders; graders; mobile cranes; mobile refrigeration units; motorcycles; motorized chain saws; pallets; portable concrete mixers; refrigerated milk tankers; tractors; excavators; trucks (others); track mounted cranes; water tankers | 4 |
| Battery chargers; cinema equipment; cash registers; computers (main frame); curtains; dental and doctors equipment; drilling equipment (water); engraving equipment; fire extinguishers (loose units); garden irrigation equipment (movable); hairdressers equipment; laboratory research equipment; Laundromat equipment; mobile caravans; motor mowers; musical instruments; passenger cars; photocopying equipment; portable generators; power tools (hand operated); public address systems; radio communication equipment; scales; solar energy units; staff training equipment; surveyors field equipment; tape recorders; telephone equipment; trailers; washing machines; workshop equipment; x-ray equipment. | 5 |

| Description | Write Off Period |
|---|---|
| Adding machines; air conditioner (movable); arc welding equipment; balers; cheque writing machines; cold drink dispensers; crop sprayers; demountable partitions; drills; electric saws; electrostatic copiers; fertilizers spreaders; fitted carpets; furniture and fittings; gantry cranes; gas cutting equipment; gas heaters; and cookers; gear shapers; grinding machines; guillotines; harvesters; heat dryers; heating equipment; incubators; ironing and pressing equipment; kitchen equipment; knitting machines; lathes; medical theatre equipment; milling machines; ovens and heating devices; ovens for heating food; perforating equipment; photographic equipment; planers; ploughs; refrigeration equipment; refrigerators; sanders; seed separators; sewing machines; shop fittings; spin dryers; spot welding equipment; television sets; video machines; decoders; typewriters; vending machines (including video game machines); water tanks | 6 |
| Burglar alarms (removable); gymnasium equipment; neon signs and advertising boards; surveyors instruments; weighbridges (movable parts) | 10 |
| Lift installation (goods); lift installations (passengers); water distillation and purification plant | 12 |

## DEPRECIATION

Wear and Tear allowances or depreciation in respect of machinery, plant, implements, utensil and articles (including vehicles and equipment) Under Section 14(1)(c):

| Group | Assets Included | Rate |
|---|---|---|
| 1 | Computer hardware and software; lorries; buses; video recorders | 33.33% |
| 2 | Aircraft; construction equipment (mobile) (including – bulldozers, concrete mixers, graders, road scrapers); lifts and elevators; light delivery vehicles (LDV's); motor cycle; tractors; videotapes; plant and machinery working 24 hours per day | 25% |
| 3 | Casino equipment, hotel soft furnishings (including carpets); medical equipment; sound and projection equipment; televisions; trailers; plant and machinery working two shifts per day | 20% |
| 4 | Furniture and fittings; legal and professional libraries; musical equipment; office equipment including (accounting machines, air conditioning plant, binds and curtaining, fans) and any depreciable asset not included in any other group, including plant and machinery working one shift per day | 10% |
| 5 | Railroad cars, locomotives and railroad equipment; engines and turbines; public utility plant | 5% |
| 6 | Industrial Buildings | 4% |

Where a taxpayer elects to claim the deduction of wear and tear allowances on a straight-line basis, such taxpayer shall obtain approval from the Commissioner of Taxes before claiming the wear and tear on straight-line basis. Requests for allowances to be granted on the "straight-line" will be considered if the following conditions in respect of the assets to which such method will be applied are satisfied:

(a) The taxpayer maintains adequate records;

(b) The straight-line basis will apply to all assets of the same class;

(c) The annual return of income contains a schedule disclosing in respect of each asset disposed of during the year of assessment:

  (i) The date of acquisition and the original cost;

  (ii) The income tax value as at the end of the immediately preceding tax year;

  (iii) The price realised on disposal or scrapping as well as the tax value of any profit or loss.

(d) The rates of allowance granted will be such that the rate per annum reduces the value of the asset to nil at the end of its agreed estimated life;

(e) An asset written off in full shall be brought into account at a residual value of E1 for record purposes.

Where a taxpayer applies the straight-line method, the asset shall be written off in equal annual instalments over its estimated useful life. The wear and tear deduction must be reduced proportionately if the asset was acquired and commissioned during the year of assessment. Where a taxpayer has been granted permission to apply the straight-line method, the write-off periods shall be in line with the periods prescribed by the Commissioner. Taxpayers must obtain prior approval to apply a different write-off period to an asset approved, for the proposed write off period from the Commissioner of Taxes.

## TRADING STOCK

(1) There shall be taken into account, in the determination of the taxable income derived by any person, during any year of assessment, from carrying on any trade (other than farming), the value of all trading stock held and not disposed of by him (hereinafter referred to as "the value of trading stock held") at the beginning and end of each year of assessment.

(2) The cost of trading stock disposed of during the year of assessment is determined by adding to the opening value of trading stock the cost of trading stock acquired during the year, and subtracting the closing value of trading stock.

(3) The value of trading stock held by any person at the beginning of any year of assessment shall be deemed to be:

  (a) Where the person carried on trade on the last day of the previous year of assessment, the value of trading stock held on that date; or,

  (b) Where the person commenced the trade during the year of assessment, the cost to the person of any stock acquired prior to the commencement of the trade.

(4) The value of trading stock held at the end of a year of assessment shall be deemed to be the lower of cost or market value to the person carrying on the trade.

(5) For the purposes of this subsection, the cost of any trading stock in relation to any date shall be:

(a) The cost incurred in acquiring such trading stock; and,

(b) Any further costs incurred up to such date in getting such trading stock into its then existing condition or location.

(6) Where any trading stock has been acquired by any person:

(a) For a consideration which cannot be valued; or,

(b) Otherwise than by way of a transaction at arm's length, such trading stock shall be deemed to have been acquired at a cost equal to the price which, in the opinion of the Commissioner, was the current market price of such trading stock on the date of acquisition.

(7) Where particular items of trading stock are not readily identifiable, a person may account for that trading stock on the first-in-first-out method or the average cost method but, once chosen, a stock valuation method may be changed only with the written permission of the Commissioner

## DIVIDENDS

Payments to non-residents and residents:

| Non-residents Tax | Rate of Tax | Due Date |
|---|---|---|
| Dividends for companies in Botswana, Lesotho, Namibia and South Africa | 12.5% | Within 30 days from the day on which the dividend is declared |
| Dividends - for other countries | 15% | Within 30 days from the day on which the dividend is declared |

| Residents Tax | Rate of Tax | Due Date |
|---|---|---|
| Dividends | 10% | Within 15 days from the date of payment |

## INTEREST DEDUCTIONS

**Levy of non-residents tax on interest:**

If any amount of interest accrues to or in favour of:

(a) Any person, other than a company, not ordinarily resident in Eswatini;

(b) The estate of any deceased person who, at the date of his death, was not ordinarily resident in Eswatini; or,

(c) A company not registered in Eswatini; and the debtor in respect of such amount is ordinarily resident or carries on business in Eswatini, there shall be levied and paid a tax (in this Part referred to as non-residents tax on interest) equal to ten per centum of such amount.

**Application of provisions:**

For the purpose of this Part:

(a) If interest is payable or is credited to any person having an address outside Eswatini such interest shall, until the contrary is proved, be deemed to have accrued to any person, estate or company, as the case may be;

(b) If the debtor in respect of any amount of interest is the estate of any deceased person, such estate shall be deemed to be ordinarily resident or to be carrying on business in Eswatini, if such person at the date of his death, was ordinarily resident or was carrying on business in Eswatini;

(c) If the debtor in respect of any amount of interest is a company, such company shall be deemed to be ordinarily resident in Eswatini if it is registered, managed or controlled in Eswatini; and,

(d) Any amount accruing to any shareholder in a building society out of the profits of such society shall be deemed to be interest.

## LOSSES

Tax losses can be carried forward to offset against future profits. Losses that are offset may be carried forward indefinitely. Losses cannot be carried back against profits of previous years.

## FOREIGN SOURCED INCOME

Foreign tax relief is limited only to countries which have a double tax treaty (DTT) with Eswatini.

## INCENTIVES

The Memorandum of Understanding (MOU) sets out terms and conditions, which shall apply in respect of the grant of a Development Approval Order (DAO) by the Minister of Finance to whichever company that has applied for the (MOU). The tax concession is granted under the DAO for a period of 10 years.

## C. FOREIGN TAX RELIEF

Relief for double taxation is provided by means of a credit for overseas tax suffered on overseas income. The credit is the lower of the foreign tax paid and the Eswatini tax on the income concerned. Foreign tax relief is limited only to countries with double taxation relief. These include; Mauritius, South Africa and the United Kingdom.

## D. CORPORATE GROUPS

There is no special regime for the taxation of groups of companies. Each Company is taxed as a separate entity. Losses incurred by one affiliate may not be offset against profits made by another affiliate.

## E. RELATED PARTY TRANSACTIONS

Inter-company pricing between affiliated companies must be carried out on an arm's length basis or the income of both companies is adjusted for income tax purposes. Taxpayers are obliged to provide the tax authorities with documentation containing data about the activities of the taxpayer and other parties to the transaction. This includes a list of the parties to the transaction, the description of the transaction, the terms of the transaction, methods of pricing, terms and conditions of payments etc. Functions of the parties of the transaction, information about accepted risks considered by the taxpayer when concluding the transaction and so on.

## F. EXCHANGE CONTROL

The currency in Eswatini is Lilangeni (SZL). There are no exchange controls in effect.

## G. ASYCUDA WORLD

ASYCUDA (Automated System for Customs Data Administration) is a computerized customs management system which covers most foreign trade procedures and was rolled out as of 1 February 2016 whereby importers/exporters are required to lodge declarations with Customs electronically through ASYCUDA. Capturing of data can be done remotely or at the border post or any one of the inland offices and the airport.

**Registration**

Businesses that have the newly introduced Taxpayer Identity Numbers (TIN) for VAT are not required to be registered on ASYCUDA. Their TINs will be used for all Customs related transactions.

Traders who have not yet been registered for TINs are required to register with ASYCUDA; the following are required on registration:

- Tax clearance certificate
- Trading licence
- Contact details including physical address.

A declarant, other than the owner of the goods, must be licensed as an agent with Customs. Individuals are required to submit a copy of the national identity document and contact details which include the physical address.

**Declarations may be made by:**

Remote Connection (also known as the Direct Trader Input (DTI)): This allows a trader to capture a declaration at his own premises and forward hard copies to customs at his convenience. This has benefits including:-

- Entries can be lodged prior to arrival of goods at the border
- Trader can access any of his declarations passed through Customs at any time.

Using the Bureau at the port of entry (border post or airport or any of the inland offices)

- Provided (at a fee) for people who are not remotely connected
- Mainly used by once off importers/exporters.

## ASYCUDA PREPAYMENT ACCOUNTS

1. **Pre-payment accounting**

The prepayment facility is to be used at all SRA Customs offices where duties / taxes are not deferred but payable upon entry. Under this facility declarants need to pay first the amount of duties / taxes that are reflected on the SAD500 on presentation of their entries to SRA for processing.

2. **Prepayment (Cash) Account Numbers**

a. Each declarant / importer is allocated an 8-digit account number (Series 500) which is attached to their Taxpayer Identification Number (TIN). The TIN is an SRA wide number that is to be used across all SRA tax heads while the Prepayment Account Number and deposits therein is managed at and confined to the Customs office of clearance.

b. The account number must be inserted/captured in Box 48 of the SAD 500. As a security measure the account number may be validated by a secret PIN code. The security of the PIN code is the responsibility of the account holder.

3. **Submission of Entries and Payment of Duties / Taxes due**

a. All entries are to be submitted to Customs through the Cash Office at the port of entry concerned. Once received at the Cash Office the entry will remain always within Customs control and will not be returned to the declarant until it is assessed and released after validation of payment due.

b. No entry will be accepted without being paid for. The SRA will not accept responsibility for delays in clearance of goods arising from an insufficient balance existing in the prepayment account. No entries will be cleared until the account is restored to a credit balance covering the duties / taxes payable.

c. The payment being made will be recorded in ASYCUDA against the prepayment account declared in Box 48 of the SAD500. Where payment is made into a single account, a single receipt for the whole amount being deposited will be issued to the declarant as an acknowledgement of payment.

d. Payment may be effected by any of the methods approved by the SRA. This may be by:
   - Confirmed Electronic Funds Transfer (EFT);
   - Point of Sale (POS);
   - Limited Cash (not more than E10,000.00 per declarant);
   - Company cheque for approved clients or bank cheque (only at remote border posts).

e. A statement of the prepayment account can be produced by the account holder and Customs when required. This will detail entries cleared against the account number, any credit amounts paid in during the selected period and the account balance. Remotely connected declarants will be able to view their accounts status at any time.

4. **Assessment**

a. Upon assessment of a declaration, funds equal to the duties / taxes due on the entry will be automatically transferred from the prepayment account into the SRA Revenue Account. A combined assessment notice and payment receipt will be printed for each assessed entry. If the duties / taxes due are less than the balance in the prepayment account, a credit balance will remain in the account. Such balance will be used for future imports.

b. Where there is an insufficient credit balance in the prepayment account, the entry will not be assessed. Resultantly the goods will not be released from the Customs controlled area.

c. Declarants / importers will get a combined assessment notice and receipt for each consignment declared on a separate SAD500.
   - It is proof of duties / taxes paid for imported goods;
   - It is proof of legitimate release by Customs; and
   - It can be used to support VAT input tax credit claims (along with a copy of the SAD500 and supporting invoices etc.).

5. **Benefits to trade:**

Prepayment Accounts have been put in place for the following reasons:

- To reduce delays associated with the cashier issuing a receipt against each declaration;
- To ensure once a declaration is submitted SRA may be held fully responsible for the time taken to release cargo;
- Confirmation of cash received will be combined with the assessment stage of the declaration as well as the generation of the Customs receipt;
- The assessment notice / receipt shall will support VAT input credit claims.

## H. PERSONAL INCOME TAX

Personal income tax is levied on resident and non-resident individuals, whether or not they are citizens of Eswatini.

**Individuals – 2013 to date:**

| Taxable income (SZL) | Tax rate |
|---|---|
| 0 – 100,000 | 0 + 20% of the excess of SZL 0 |
| 100,001 – 150,000 | SZL 20,000 + 25% of the excess of SZL 100,000 |
| 150,001 – 200,000 | SZL 32,500 + 30% of the excess of SZL 150,000 |
| Over 200,000 | SZL 47,500 + 33% of the excess of SZL 200,000 |

When applying the above rates the following should be taken into account:

- Tax payable by a natural person will be reduced by a tax rebate amount not exceeding SZL 8,200 per tax year (with a further SZL 2,700 for persons over the age of 60 years);
- The rates are applicable on total income exceeding SZL 41,000 per annum;
- The tax rebate does not apply in the case of redundant or retiring individuals.

Taxpayers who are liable to tax on business income are obliged to submit their income tax declarations on business income to the Eswatini Revenue Authority by 31st October of every year. All taxpayers must keep records of their income. They are obliged to keep records for at least five years from the year to which they relate. To avoid double taxation, Eswatini has concluded a number of double tax treaties.

**Exemptions**

There are a number of exemptions within each category of income which are defined in Section 12 of The Income Tax order of 1975 Amended. There shall be exempt from normal tax:

(a) The receipts and accruals of:
   (i) A pension fund, a retirement annuity fund, a benefit fund or a provident fund;
   (ii) Any company, society or other association of persons, whether or not registered under any law, the profits or gains of which, other than profits or gains from investments, are derived solely from transactions with or on behalf of its individual members, and the constitution of which does not admit of the distribution of its profits or gains to any persons other than the members with whom or on whose behalf the transactions took place, and does not confer upon any person any benefit other than benefits accruing to that person from transactions with or on behalf of such person, except as regards any receipts or accruals from investments by any such company, society, or association of persons; and,
   (iii) Any exempt organisation other than business income that is not related to the function constituting the basis for the existence of the organisation.

(b) The income of any person entitled to privileges under the Diplomatic Privileges Act to the extent provided in such Act;

(c) The salaries and emoluments of any person in respect of services rendered to the Government of any country other than Eswatini if that person is not ordinarily resident in Eswatini or is ordinarily resident solely for the purpose of performing such services;

(d) War pensions or gratuities;

(e) Dividends received by or accrued to or in favour of:
   (i) Any person not ordinarily resident or carrying on business in Eswatini;
   (ii) The estate of any deceased person who at the date of his death was not ordinarily resident or carrying on business in Eswatini, if, but for this exemption, such estate would have been liable for normal tax in respect of such dividend; and,
   (iii) Any company.

## I. TREATY AND NON-TREATY WITHHOLDING TAX RATES

| | Dividends (%) | | Interest (%) | Royalties (%) |
|---|---|---|---|---|
| | Individuals, companies (%) | Qualifying companies (%) | | |
| **Non-treaty countries** | | | | |
| Companies | 12.5/15[4] | 12.5/15[4] | 10 | 15 |
| Individuals | 12.5/15 | -- | 10 | 15 |
| **Treaty countries:** | | | | |
| Mauritius | 7.5 | 7.5 | 5 | 7.5 |
| Seychelles | 10 | 7.5[1] | 7.5 | 10 |
| South Africa | 15 | 10[1] | 10 | 10 |
| Taiwan | 10 | 10 | 10 | 10 |
| United Kingdom | 15 | 15 | -[2] | 0[3] |

Notes:
1. The reduced rate applies if the beneficial owner is a company which holds at least 25% of the capital of the dividend-paying company.
2. No reduction under the tax treaty, the domestic rate applies.
3. Subject to tax in the state of residence of the recipient only.
4. A final 15% withholding tax is levied on dividends distributed by resident companies to non-resident companies while the rate is reduced to 12.5% in respect of dividends paid to a company registered or incorporated in Botswana, Lesotho, Namibia or South Africa, which is not a branch of a company registered or incorporated outside these countries.

## KEY TAX POINTS

- The standard corporate tax rate is 20% (10% for companies listed on the South Pacific Stock Exchange).
- Losses incurred in a FY starting on or after 1 January 2019 can be carried forward for up to 8 years (4 years before 2019). Losses cannot be carried back.
- According to domestic tax law, as from 1 August 2017 there is no withholding tax on dividends paid to non-residents.
- Interest paid to non-residents is subject to a 10% final withholding tax on the gross amount.
- Royalties paid to non-residents are subject to a 15% final withholding tax on the gross amount.
- Management fees, professional fees or other independent services, and rental income (i.e. on films) paid to non-residents are subject to a 15% final withholding tax on the gross amount.
- With effect from 1 January 2016, the standard VAT rate is 9%.

## A. TAXES PAYABLE

### COMPANY TAX

Fiji resident companies are subject to tax on their worldwide income. Non-resident companies are required to pay tax in various forms on income derived from Fiji sources. Resident companies are those that are incorporated in Fiji or have their place of management and control in Fiji.

The corporate tax rate is 20%. The tax year in Fiji is the calendar year but companies can opt for a taxable year other than the calendar year. Companies are required to make three advance payments of corporate tax based on the previous year's profit. Corporate tax returns' due date is 3 months after the financial year unless a further extension has been provided by the Fiji Revenue Customs Service.

### CAPITAL GAINS TAX

Capital Gains Tax (CGT) is a tax that is levied on profits or gains realised on the disposal of capital assets and depreciable assets at the rate of 10%. The tax applies to gains arising from the disposal of taxable assets by Fiji residents, irrespective of whether the asset is located in Fiji or not. Resident persons can claim a foreign tax credit in relation to the disposal of foreign capital assets if tax was paid offshore. However, for non-residents, the tax only applies to gains arising from the disposal of taxable assets that are Fiji assets. An exemption may apply subject to certain conditions.

### BRANCH PROFITS TAX

Branch remittance tax was repealed as from 2010.

### VALUE ADDED TAX (VAT)

This is a tax on the supply of goods and services, other than exempt supplies and services, rendered in Fiji by a VAT registered entity only at the rate of 9%.

### FRINGE BENEFITS TAX

Taxable benefits include any non-cash benefits or benefits received in kind that are provided for free by the employer to the employee or persons associated with the employee (e.g. housing, telephone, water, etc.). The value of non-cash fringe benefits received by an employee from his/her employer is subject to fringe benefits tax. It is a final tax on employers and shall not be recovered from the employee. Fringe Benefits Tax (FBT) is a tax levied at the rate of 20% on the fringe benefit taxable amount (non-cash benefits) of the employer for each quarter.

### SUMMARY OF ALL APPLICABLE TAXES

| Tax type | Rate |
|---|---|
| Corporate income tax (CIT) | 20% |
| Stock Exchange Listed Companies | 10% |
| Multinational Headquarters | 17% |
| Pay As You Earn (PAYE) | 7%, 18% 20% |
| Provisional tax (PT) | 5% |
| Fringe benefit tax | 20% |
| Social responsibility tax | 13% to 19% - range over FJD 270,000 |
| Withholding tax | 15% |
| Value Added Tax | 9% |
| Capital gains tax (CGT) | 10% |
| Environmental levy (EL) | 6% |
| Stamp duties (SD) | Not applicable – Act repealed WEF 01/08/20 |
| Fish levy (FL) | FJD 450/tonne |
| Departure tax (DT) | FJD 200 |
| Telecommunication levy (TL) | 1% |
| Credit card levy (CCL) | 3% |
| Third party levy (TPL) | 20% |
| Health levy (HL) | 6% |
| Customs Duty bands | 0%, 5%, 15%, 32% |

## B. DETERMINATION OF TAXABLE INCOME

The taxable income of a company is determined by ascertaining assessable income and then subtracting all allowable deductions. Business expenses are generally deductible for tax purposes. Donations to non-registered charitable organisations are not deductible.

## C. INVESTMENT ALLOWANCES/INCENTIVES

### FILM MAKING & AUDIO VISUAL

**Income tax deductions**

- 150% deduction for capital expenditure on an F1 audio-visual production;
- 125% deduction for capital expenditure on an F2 audio-visual production;
- Levels of expenditure in Fiji for an audio-visual production for F1 and F2 status should not be less than:
  - 40% for a large format film, a feature film or broadcast television programme;
  - 50% for a direct to video programme or video disk programme; and
  - 55% for an audio recording.

**Income tax exemptions**

- Net income from an F1 production is exempt until taxpayer has received a 60% return on capital expended. Thereafter, net income will be fully taxed at the marginal rate;
- Net income from an F2 production is exempt until taxpayer has received a 50% return on capital expended. Thereafter, net income will be fully taxed at the marginal rate;
- Allowable expenditure incurred for services rendered by the producers (producers fees) – provided that such expenditure shall not exceed 10% of the total Fiji Expenditure. Producers are not restricted to remain in Fiji throughout the production of the film;
- 75% of the expenditure incurred to purchase costumes, make-up and set design properties not available in Fiji that will be used in relation to the film production in Fiji provided that any such costumes, make-up and set design properties shall be left in Fiji at the end of the production;
- Expenditure incurred to purchase the writer's story and rights for the production of the film provided that the producer submits the following documentary evidence:
  - Notarised legal contract with the writer which is registered in Fiji with the Registrar of Deeds upon payment of the appropriate stamp duty;
  - Evidence of payment made directly into the writer's bank account from the Fiji bank account; and
  - Receipt of acknowledgment of payment received;
- Approved post-production expenditure on the film paid from a Fiji bank account to the extent that it is incurred or reasonably attributable to approved post-production services in relation to the completion of the film made in Fiji. The maximum payable in rebate shall be granted upon the production of documentary evidence of the expenditure. Rebate is around 2% to 2.5% of production budget;
- Expenditures incurred on the hiring of cameras and filming equipment from outside Fiji, where such cameras and filming equipment are not available in Fiji.

**Additional requirements**

- Companies should engage Audio Visual Agents;
- Fiji as a location needs to be accredited and acknowledged in the film's credits and other accreditation as stipulated by Film Fiji in their approval letter.

**Film tax rebate**

- 75% tax rebate or a credit on production cost spent in Fiji;
- Films and television production as per existing Sixth schedule;
- Minimum spend in Fiji FJD 250,000, for feature films and broadcast television; and FJD 50,000 for production intended as an advertising programme or commercial in at least one significant international market;
- The maximum rebate payable per approved final certificate will not be more than FJD 15 million.

## ENVIRONMENT TAX INCENTIVE

**Biofuel Production**

- Tax holiday is available to a taxpayer undertaking a new activity in processing agricultural commodities into bio-fuels as approved by the Commissioner from 1 January 2009 to 31 December 2028. To qualify, the taxpayer shall be exempt from tax as follows:
  - Capital Investment from FJD 250,000 to FJD 1,000,000 for a period of 5 consecutive fiscal years; or
  - Capital Investment from FJD 1,000,000 to FJD 2,000,000 for a period of 7 consecutive fiscal years; or
  - Capital Investment above FJD 2,000,000 for a period of 13 consecutive fiscal years;
- Employ 20 local employees or more for every income year.

Approved companies involved in the production of biodiesel and ethanol are eligible for various duty concessions under code 262 of the Customs Tariff Act.

**Electric vehicles charging stations**

- The income of any business setting up electric vehicle charging stations shall:
  - be granted a seven-year tax holiday; and
  - be granted a subsidy up to a maximum of 5% of the total capital outlay incurred in the development of electric vehicle charging stations provided that the capital expenditure is not less than FJD 100,000.
  - be allowed to carry losses forward to 8 years.
- Any business investing in electric buses shall be allowed a tax deduction of 55%.

**Renewable energy projects and power co-generation**

- 5-year tax holiday is available for a taxpayer undertaking a new activity in renewable energy projects and power co-generation as approved by the Tax Department;
- Duty-free importation of renewable energy goods is also available.

## HOTEL INVESTMENT ALLOWANCE

### STANDARD ALLOWANCE

An investment allowance of 50% of total capital expenditure is allowed as a deduction.

**Conditions**

- Applicable to the building of new hotel including renovations, refurbishments, an extension of the existing hotel and International Retiree Facilities;
- Recipients shall complete the project within two years from the date the provisional approval was granted;
- Investment Allowance can only be written off against the income of the hotel business or income from the hotel premises;
- Loss carry-forward for 4 years;
- Investors would only need to provide a sketch plan to obtain provisional approval for the investment allowance, and not necessarily a certified approval;
- There should not be any shift of tax revenue to other countries;
- There will be no Investment Allowance from 2017 for existing hotels.

**Extend SLIP to renovations and refurbishments of existing hotels or resorts**

- 5 -year tax holiday for investments of more than FJD 2,000,000. The incentive will be available for the next 18 months effective from 1 August 2021. This incentive can be claimed only once.

### SHORT LIFE INVESTMENT PACKAGE

The existing will be repealed and replaced with the following:

| Capital Investment ($) | Tax Holiday |
|---|---|
| $250,000 to $1 million | 5 years |
| $1 million to $2 million | 7 years |
| $2 million to $40 million | 13 years |
| In excess of $40 million | 25 years |

**Conditions**

- Short Life Investment Package (SLIP) Incentives is available for retirement facilities and hospital resorts;
- SLIP Incentives is also available for New Apartments provided the length of stay is not more than 6 months;
- Recipients of the provisional approval for SLIP shall complete the project within two years from the date the provisional approval was granted;
- Investors would only need to provide a sketch plan to obtain provisional approval for the investment allowance, and not necessarily a certified approval.

**Duty on Importation**

- Duty-free importation for all hotels and resorts for 18 months effective from 1 August 2022. 5% ECAL will also be waived on all imports.

### BACKPACKER OPERATIONS

- Income tax exemptions will be introduced for locally-owned backpacker operators with annual sales turnover of FJD 1 million or less;
- Customs Duty exemption on the importation of raw materials and equipment used for the establishment of a backpacker hotel. (This incentive will only be available to backpacker businesses who are granted the income tax holiday)

## RECYCLING BUSINESS

**Tax Exemption Structure**

| Capital Investment ($) | Tax Holiday |
|---|---|
| $250,000 to $500,000 | 3 years |
| $500,000 to $2 million | 5 years |
| $2M to $5 million | 10 years |
| $5M to $10 million | 15 years |
| In excess of $10 million | 20 years |

**Customs Exemption**

Customs import duty exemption for the establishment of the business which includes raw materials, machinery and equipment including spare parts.

## INFORMATION COMMUNICATION TECHNOLOGY

- 300% deduction allowed to employers exceeding the 6% mandatory FNPF contribution up to 10%;
- 150% deduction allowed on interest paid on corporate bonds.

## D. PERSONAL TAX

- Resident individuals are liable for tax on taxable income accruing in or derived from Fiji or elsewhere. Non-residents are liable for tax only on taxable income accruing in or derived from Fiji;
- Pensions received by non-resident pensioners from a Fiji source will not be taxed;
- When a non-Fiji citizen is in Fiji mainly for employment purposes under a contract of employment of not more than three years, income other than employment income is not subject to tax in Fiji if it is not derived from or does not accrue in Fiji;
- Income tax is assessed on taxable (chargeable) income. Where the taxable income of a resident exceeds FJD 50,000, income tax is FJD 3,600 plus 20% in excess of FJD 50,000;
- In the case of non-residents, income tax is 20% of the taxable income;
- In addition to income tax, social responsibility tax (SRT) and environment and climate adaptation levy (ECAL) are imposed on chargeable income.

**Residents - Income tax, SRT (social responsibility tax) and ECAL (Environment and climate adaptation levy) rates**

| Chargeable income (FJD) | Tax payable (FJD) | SRT (FJD) | ECAL (JFD) |
|---|---|---|---|
| 0 – 30,000 | 0 | Nil | Nil |
| 30,001 – 50,000 | 18% of excess over 30,000 | Nil | Nil |
| 50,001 – 270,000 | 3,600 + 20% of excess over 50,000 | Nil | nil |
| 270,001 – 300,000 | 47,600 + 20% of excess over 270,000 | 13% of excess over 270,000 | 5% of excess over 270,000 |
| 300,001 – 350,000 | 53,600 + 20% of excess over 300,000 | 3,900 + 14% of excess over 300,000 | 5% of excess over 270,000 |
| 350,001 – 400,000 | 63,600 + 20% of excess over 350,000 | 10,900 + 15% of excess over 350,000 | 5% of excess over 270,000 |
| 400,001 – 450,000 | 73,600 + 20% of excess over 400,000 | 18,400 + 16% of excess over 400,000 | 5% of excess over 270,000 |
| 450,001 – 500,000 | 83,600 + 20% of excess over 450,000 | 26,400 + 17% of excess over 450,000 | 5% of excess over 270,000 |
| 500,001 – 1,000,000 | 93,600 + 20% of excess over 500,000 | 34,900 + 18% of excess over 500,000 | 5% of excess over 270,000 |
| Over 1,000,000 | 193,600 + 20% of excess over 1,000,000 | 124,900 + 19% of excess over 1,000,000 | 5% of excess over 270,000 |

**Non-residents - Income tax, SRT (social responsibility tax) and ECAL (Environment and climate adaptation levy) rates**

## E. DIVIDENDS

Dividends declared from tax-paid profits are not subject to any tax – this includes dividends paid to non-residents.

## F. EXCHANGE CONTROL

- There are Exchange Control rules in Fiji;
- Reserve Bank of Fiji (RBF) approval is required where there is any foreign shareholding in a Fiji incorporated company;
- RBF rules for debt-to-equity are in place for local borrowing by foreign companies;
- Exchange control rules are also in place for remittances of funds abroad;
- Rules are reviewed annually and any latest information on Exchange Control Rules can be accessed on https://www.rbf.gov.fj

## G. TREATY AND NON-TREATY WITHHOLDING TAX RATES

- According to domestic tax law, as from 1 August 2017 there is no withholding tax on dividends paid to non-residents;
- Interest paid to non-residents is subject to a 10% final withholding tax on the gross amount;
- Royalties paid to non-residents are subject to a 15% final withholding tax on the gross amount;
- Management fees, professional fees or other independent services, and rental income (i.e. on films) paid to non-residents are subject to a 15% final withholding tax on the gross amount.

| | Dividends (%) | | Interest (%) | Royalties (%) |
|---|---|---|---|---|

## KEY TAX POINTS

- Finnish resident companies are liable to corporate income tax on worldwide income. Non-resident companies are taxed on their Finnish-sourced income only.
- Capital gains are normally taxed as ordinary income. In specific circumstances, capital gains arising on the disposal of shares in a subsidiary are exempt.
- In principle, all sales of goods and services are subject to value added tax, subject to reduced rates and exemptions.
- A local real estate tax is levied on properties owned by companies.
- The transfer of immovable property attracts a transfer tax.
- A controlled foreign company (CFC) system applies.
- Under double tax treaties, foreign tax is most frequently relieved by way of credit, sometimes the exemption method is also applied. Where there is no relevant tax treaty, Finnish domestic tax law grants a credit for foreign tax paid once that foreign tax is final.
- Dividends and royalties paid to non-resident companies are subject to withholding taxes. Tax treaties may provide benefits and exemptions to this.
- Finnish resident individuals are subject to tax in respect of their worldwide income. Non-residents are taxed on their income derived from Finland.
- Individuals are taxed separately on earned income and investment income.

## A. TAXES PAYABLE

### COMPANY TAX

Finnish resident companies are liable to corporate income tax on their worldwide income. Non-resident companies are taxed on their Finnish-sourced income only. Corporate residence is not defined in the tax legislation, but residency is usually associated with registration. The corporate income tax rate is 20% of the taxable income. The tax year consists of the financial period (or periods) that ends during the calendar year. The final tax assessment for the tax year is determined based on the tax return. Corporate bodies must file the tax return within four months of the end of their accounting period. Tax returns are processed within ten months of the end of the accounting period.

## CAPITAL GAINS TAX

Capital gains are normally taxed as ordinary business income. Where shares or land have been held for business purposes, the disposal is subject to normal income tax. In specific circumstances, capital gains from the disposal of shares of a subsidiary are tax exempt. The shares need to be owned for at least one year prior to disposal and the seller has to have owned at least 10% of the company whose shares are being disposed of. There is more detailed legislation for applying this exemption.

## BRANCH PROFITS TAX

There is no specific branch profits tax in Finland. The taxable income for branches of foreign companies in Finland is calculated on the same basis as for Finnish resident companies at a rate of 20%. There is no branch remittance tax in Finland. If the branch is only a cost centre a cost-plus method may be applied.

## VALUE ADDED TAX (VAT)

VAT is paid on the sale of goods and services, on the importation of goods, on intra-community acquisitions and on the removal of the goods from a fiscal warehousing arrangement when the removal takes place in Finland. In principle, all sales of goods and services are subject to VAT. However, there are some supplies of goods and services which are exempt under the conditions defined in the VAT Act. The general VAT rate is 24%. Other applicable rates are as follows:

- 14% for individuals' food and animal feed and restaurant services;
- 10% for medicines, books, cultural events, passenger transportation, hotel accommodation and other services;
- Exports outside the European Union are zero rated.

## FRINGE BENEFITS TAX (FBT)

The benefits in kind are added to the gross salary according to the annual decision of the Finnish Tax Administration on the valuation of taxable in-kind benefits to be applied. However, the employer has a legal responsibility to withhold income taxes and social security contributions from salaries and benefits paid to their employees.

## LOCAL TAXES

Basically, there are no local taxes imposed on companies. However, municipal real estate tax is levied on properties owned by companies. It is normally 0.41% to 1% (residential buildings) and 0.93% to 2.00% (other buildings) of the taxation value of the immovable property, depending on the municipality where the property is situated, and is deductible, up to certain limits, for income tax purposes.

## OTHER TAXES

Employers must make social security contributions to cover the costs of health insurance at the rate of 1.34% on gross remuneration paid to employees between 16 and 68 years of age. Pension insurance contributions are also payable at 17.40% (on average), unemployment contributions (0.50% on the first EUR 2,197,500 and 2.05% on the excess) and accidental injury insurance contribution of approximately 0.7% (average 2022) of annual gross wages and salaries. This varies considerably depending on the work performed by the employees.

## B. DETERMINATION OF TAXABLE INCOME

Taxable income is determined based on financial accounting income adjusted for non-taxable and non-deductible items. In practice, the determination of taxable income is closely connected to the determination of net income for financial statement purposes. Generally, all expenses incurred in acquiring or maintaining business income are deductible (however, e.g. entertainment expenses are 50% deductible only).

## DEPRECIATION

Buildings and other constructions are depreciated for tax purposes using the declining balance method. Depreciation for each building is calculated separately, with the maximum percentage varying from 4% to 20%, depending on the type of the construction. Depreciation of machinery and equipment is calculated using the declining balance method with a maximum rate of 25%. Patents and other intangible rights, such as goodwill, are amortised on a straight-line basis for ten years for tax purposes, unless the taxpayer demonstrates that the asset has a shorter useful life.

Assets with a useful life of less than three years may be written off using the free depreciation method, i.e. deduct up to 100% of the costs of assets in a single tax year where the value for each item is less than EUR 850 and the total value of such assets is no more than EUR 2,500 per tax year. The allowable annual rates of depreciation are doubled for the tax years 2020 – 2023 for the following: New machinery and equipment used for production activities, as specified in the act (increase from 25% to 50%).

## STOCK / INVENTORY

In principle, the acquisition costs of inventories are deducted when assets are sold, consumed or lost. Inventories on hand at the end of the tax year are valued at an amount not exceeding the lower of acquisition cost or market value. Acquisition cost is usually calculated on a FIFO basis, other methods may also be possible. Certain overhead costs can be included in the acquisition cost of products.

## CAPITAL GAINS AND LOSSES

As discussed above, capital gains are usually taxable as ordinary income. Broadly speaking, gains on the disposal of shares in resident companies in which the seller had at least a 10% interest throughout the year ending on the date of disposal are exempt from tax. There are more prerequisites in the relevant act for this exemption.

## DIVIDENDS

Inter-company dividends are tax exempt in most cases, although they are fully taxable if they are distributed by a quoted company to a non-quoted company that holds less than 10% of the capital in the distributing company, or 75% taxable if the recipient company is a financial or insurance company holding the shares as investment assets. Tax agreements may entitle non-residents either to benefit from a lower withholding tax rate or to receive an imputation credit. Dividends are exempt from withholding tax when paid to a company resident in a European Union country if the company pays national corporate tax and holds at least 10% of the share capital in the distributing company. Tax exemption does not apply if the recipient is entitled to an imputation credit. The individual treaty in question must always be verified.

## INTEREST DEDUCTIONS

Normally, interest on loans obtained for business purposes is deductible in full on an accruals basis. New thin capitalisation rules have been introduced from tax year 2014 onwards which apply to interest paid between related parties. Broadly speaking, a company may deduct up to EUR 500,000 of interest expense per year without restriction. Similarly, if a company can demonstrate that its equity ratio (equity/total assets) is at least as high as the group's consolidated equity ratio, then the thin capitalisation rules will also not apply, as specified in more detail in the relevant legislation.

Where neither of these exemptions apply, the maximum deductible amount of interest paid to related parties is 25 % of EBITDA determined for tax purposes. Any interest restricted under these rules can be carried forward to use in future years, but similar restrictions on e.g. EBITDA apply each tax year.

## LOSSES

Losses may be carried forward and set off in the subsequent ten tax years. If more than 50% of the shares of the company are sold during a loss year or thereafter, losses from previous years cannot usually be deducted. There is a dispensation procedure possible to this main rule.

## FOREIGN SOURCED INCOME

If a foreign company falls under the Finnish controlled foreign company (CFC) legislation, then the foreign company's undistributed profits can be allocated to the taxable income of a Finnish shareholder. The preconditions for the application of the CFC legislation are as follows:

- One or more Finnish resident shareholders directly or indirectly own at least 25% of the capital or of the voting rights in the CFC or they are entitled to at least 25% of the yield of the net wealth of the CFC;
- The Finnish resident shareholder owns, directly or indirectly, at least 25% of the CFC;
- The effective tax rate of the CFC in its country of residence is less than three-fifths of the tax of an equivalent company resident in Finland (currently 12%).

## C. FOREIGN TAX RELIEF

Under tax treaties, foreign tax is most frequently relieved by a tax credit. If a tax treaty does not apply, Finnish domestic law grants a credit for foreign tax paid, as specified in more detail. The credit is granted only if the foreign tax is final. From 2010, a requirement to calculate available credits on a source country-by-country basis was removed and the ability to carry forward unused credits was extended from one year to five years.

## D. CORPORATE GROUPS

Corporations are taxed separately in Finland. There is no concept of consolidated tax returns. However, it is possible to make group contributions if the parent company owns at least 90% of the subsidiary during the whole financial year. The payments will be tax deductible at the level of the payer and taxable at the level of the recipient. There are additional requirements in the relevant act.

## E. RELATED PARTY TRANSACTIONS

Related party transactions are usually accepted if they are at arm's length. Arm's-length pricing applies to transactions of all types including the purchasing of inventory and the provision of services and financial facilities.

Mandatory transfer pricing documentation requirements apply to foreign-owned subsidiaries and branches in Finland and Finnish Groups who exceed one of the following limits:

- More than 250 employees;
- Annual turnover in excess of EUR 50 million and balance sheet of more than EUR 43 million;
- The company does not meet the requirements of a small and medium-sized business as defined in EU Commission Recommendation 2003/361/EY.

## F. WITHHOLDING TAX

Withholding tax is not imposed on dividends paid to resident companies. Dividends paid to non-resident companies are generally subject to a withholding tax of 20% which may be reduced or eliminated under tax treaties. Non-resident shareholders are not entitled to an imputation credit unless a tax treaty provides otherwise. Interest paid to resident companies is not subject to withholding tax. Interest paid to non-residents is generally exempt from tax. However, the abovementioned thin capitalisation restrictions may apply.

Withholding tax is not imposed on royalties paid to resident companies. Royalties paid to non-resident companies are generally subject to a withholding tax of 20% which may be reduced or eliminated under a tax treaty. Royalties are, in certain cases, exempted from withholding tax when paid to a company resident in a European Union country. In certain circumstances, tax must be withheld on payments for work carried on by non-residents if they are not registered in Prepayment Register.

## G. EXCHANGE CONTROL

In principle, there are no exchange controls in Finland.

## H. PERSONAL TAX

Finnish resident individuals are subject to tax in respect of their worldwide income. Non-residents are taxed on their income derived from Finland. The tax year for individuals is the calendar year. Married persons are taxed separately both on earned income and investment income. Interest and insurance deductions may be dependent, in certain circumstances, on the marital status of the taxpayer. In general, married persons will have their own deductions.

Individuals are entitled to deduct from their investment income and earned income all expenses incurred in acquiring and maintaining such income, as regulated in more detail. Individuals usually have a right to deduct interest expenses from investment income. Interest expenses are deductible if the debt is related to the acquisition of taxable income. In 2020, 15% of interest on a loan used to purchase the individual's permanent home is deductible.

An individual is taxed separately on earned income and on investment income. Earned income is subject to national income tax, municipal income tax and church tax. Earned income includes salaries, wages and benefits in kind. The rate table for the national income tax levied on earned income is as follows as from 1 January 2022.

| Taxable income (EUR) | Tax on lower amount (EUR) | Rate on excess (%) |
|---|---|---|
| 18,100 – 27,900 | 8 | 6.00 |
| 27,901 – 45,900 | 566 | 17.25 |
| 45,901 – 80,500 | 3,671 | 21.25 |
| Over 80,500 | 11,023.50 | 31.25 |

Investment income includes dividend income, capital gains, certain interest income and income from rental activities. Capital income up to EUR 30,000 is taxed at 30% whereas amounts over EUR 30,000 are taxed at 34%.

Finnish nationals are, in addition, subject to the three-year rule. According to this rule, a Finnish national is considered to remain resident in Finland for three years after the end of the year in which he left the country, unless he shows that he has not maintained essential ties in Finland during the tax years concerned. However, under the terms of tax treaties, the three-year rule may be excluded if the individual is deemed resident in another country. Finland imposes both inheritance and gift tax. The minimum taxable amount for inheritance taxation is EUR 20,000 and for gift tax EUR 5,000. Tax rates for both inheritance and gift tax vary from 7% to 33%, depending on who is the receiver of the inheritance and the value inherited or gifted.

Wages and salaries paid by an employer are subject to an employee withholding tax. The amount withheld is based on the amount of wages or salary as well as on the individual circumstances of the employee.

## I. TREATY AND NON-TREATY WITHHOLDING TAX RATES

The tax treaty withholding tax rates in 2022 are as follows (always check the relevant tax treaty application both source and recipient country before decision making).

For countries not included in the table, the rate is 20% (corporate entity) and 30% (individual or other than corporate entity). In the table the note is 20/30.

| | Dividends[1] (%) | Dividends[2] (%) | Interest[3] (%) | Royalties[7] (%) |
|---|---|---|---|---|
| **Treaty countries:** | | | | |
| Argentina | 15 | 10 | 20/30 | 15 |

| United Kingdom | 0 | 0 | 0 | 0 |
| United States | 15 | 5 | 0 | 0 |
| Uruguay | 15 | 5 | 0 | 10 |
| Uzbekistan | 15 | 5 | 0 | 10 |
| Vietnam | 15 | 10/5 | 20/30 | 10 |
| Zambia | 15 | 5 | 20/30 | 15 |

NOTES:

1. Tax at source on dividend.
2. The recipient is a company whose share in the company making the payment is at least the percentage indicated in the tax treaty. In some cases, the holding refers to share capital and in others to voting power. The relevant tax treaty should be checked to determine the exact requirements.
3. According to domestic tax law, interest paid to a non-resident is usually exempt from taxation in Finland.
4. The treaty concluded between Finland and the former Yugoslavia.
5. No tax, if the recipient proves that he is domiciled (individual) or incorporated in the UAE.
6. A double tax treaty with Brazil is in force. However, the tax-sparing articles only applied for the first ten years since the signing of the treaty. This timeframe ended on 25 December 2007.
7. Payments made for the use of commercial or scientific equipment are not taxable in Finland, although some tax treaties would allow taxing right (article 10 (8) of the Income Tax Act and Supreme Court decision 1986-B-II-501).

### KEY TAX POINTS

- Companies are subject to French corporate tax on the profits of any business carried on in France. There is a lower rate for SMEs.
- Capital gains generated by companies are generally deemed to be ordinary income. Under the participation exemption, 88% of the gains derived from the disposal of qualifying shares are tax exempt. The remaining 12% is taxed in the normal manner.
- The standard tax system is territorial and applies to each company individually. Foreign branch profits are exempt from French corporate tax. French branches of foreign companies will generally only be taxed in France on French-sourced income.
- In general, all supplies of goods and services and importations of goods and most services are subject to Value Added Tax (VAT) at a standard rate of 20% in mainland France.
- Territorial Economic Contribution; which has two elements: a tax on real estate utilized by the business and a tax on the value added generated by the company.
- Other significant government levies include: a land tax (based on the rental value of real estate) and residential tax on the occupation of property.
- Credit for foreign tax on dividends, royalties and interest is allowed under double tax treaties. Where no tax treaty applies relief is granted by way of deduction.
- Transfer pricing requirements apply to related party transactions with overseas parties. Certain transfer pricing documentation must now be provided annually.
- Withholding tax applies to dividends, interest and royalty payments to non-residents, the rate being subject to the status of the recipient and the terms of tax treaties. There are significant exceptions for payments to EU parent companies. Permanent establishments are automatically subject to withholding tax unless specific conditions are met.
- Personal income tax is an annual, family and global tax: it applies to all income received during the civil year by the taxpayer and the persons fiscally attached to his household – tax household (examples: spouse, civil solidarity pact partner, minor children). Personal income tax is applied at progressive rates, subject to mitigation by the family quotient system, which takes account of the family expenses of the taxable household. Income tax, from 2019, is in many cases, e.g. salaries, pensions, now deducted at source. There is a progressive over time exemption from tax and social charges on capital gains on disposals of French property. There is an exemption from capital gains tax on the disposal of the principal residence.

- The wealth tax is based on the current value of real estate assets of the tax household as determined on January 1 of the tax year. It is a progressive tax. French residents are subject to wealth tax on worldwide real estate assets, while the tax basis for non-residents is limited to real estate assets situated in France.
- Inheritance tax is paid by the inheritors of a French resident's estate, the French assets of a non-French resident, and also by the French resident inheritors of the estate of a non-French resident.
- Businesses subject to business taxes, e.g. VAT and corporate income tax must produce a Standard Audit file for tax.

## A. TAXES PAYABLE

### COMPANY TAX

Companies are subject to French corporate tax on profits of any business carried on in France. A company is said to be carrying on a business in France if it has a permanent establishment, a dependent agent or carries out a 'complete commercial cycle' in France. The fiscal year runs to 31 December, although each company can choose its own accounting year end. The standard corporate income tax rate is currently 26.5% or 27.5% depending on the turnover of the company (less or more than EUR 250 million – if the company is part of a consolidated tax group, the turnover to take into account is the sum of the turnovers realised in France by the group members) (2021). Small and medium sized enterprises (SMEs), i.e. enterprises with fully paid up capital owned by individuals or by other SMEs for at least 75% and with a turnover of EUR 10,000,000 or less, are subject to a 15% reduced tax rate on the first EUR 38,120 of profits.

The current standard rate was progressively reduced to 25% by 2022 as follows:

- 2021: companies with a turnover of less than EUR 250 million are subject to a 26.5% rate on their total profits. Companies with a turnover of EUR 250 million or more are subject to a 27.5% rate on their total profits;
- 2022: all companies are subject to a 25% rate on their total profits.

The following table gives an overview of the progressive reduction to 25% over the years:

| Turnover (EUR) | Fraction of taxable profits (EUR) | 2018 (%) | 2019 (%) | 2020 (%) | 2021 (%) | 2022 (%) |
|---|---|---|---|---|---|---|
| Up to 7.63 million[1] | Up to 38,120[3] | 15 | 15 | 15 | 15 | 15 |
| | 38,121 – 500,000 | 28 | 28 | 28 | 26.5 | 25 |
| | Over 500,000 | 33.33 | 31 | | | |
| 7.63 million[1] – 250 million | Up to 500,000 | 28 | 28 | 28 | 26.5 | 25 |
| | Over 500,000 | 33.33 | 31 | | | |
| 250 million and over[2] | Up to 500,000 | 28 | 28 | 28 | 27.5 | 25 |
| | Over 500,000 | 33.33 | 33.33 | 31 | | |

Note:

1. 10 million from 1 January 2021
2. Large companies
3. The 15% rate applies to small enterprises on their profits up to EUR 38,120 (see hereafter)

Companies whose turnover exceeds EUR 7,630,000 also have to pay 3.3% social security contributions, but only when the amount of the corporate tax due exceeds EUR 763,000. The 3.3% contribution applies to the amount of the corporate income tax.

Tax is payable in four instalments, the due dates being respectively 15 March, 15 June, 15 September and 15 December for accounting years ending on 31 December. The balance must be paid by the 15th of the fourth month after the accounting year-end. Instalments are determined by applying the current year's tax rates to the taxable profits of the last complete accounting period. Additional rules apply for payments on account due by very large companies.

### CAPITAL GAINS TAX

Capital gains are generally deemed to be ordinary income and subject to corporate income tax. Under the participation exemption, 88% of the gains derived from the disposal of qualifying shares are exempt from tax. The remaining 12% is taxed in the normal manner (standard corporate tax rate). Shares qualifying for the participation exemption are those in which the shareholder has held at least 5% of the subsidiary's capital for at least two years.

In addition, proceeds from the licensing of patents, patentable inventions and their improvements and associated manufacturing processes qualify, subject to certain conditions, for a reduced capital gains tax rate of 15% although they constitute royalty income in the strictest sense. The reduced rate also applies to the disposal of such patents, except between related companies. Such disposals are classified as producing 'long term' gains or losses.

A net long-term loss can generally only be carried forward to offset against any kind of long-term capital gains arising in the following ten years. Net long-term capital losses can no longer be offset against gains arising on the disposal of qualifying shares.

Capital gains on shares held in subsidiaries established in a non-cooperative state or territory will not benefit from the long-term gains regime (except if it can be demonstrated that the business carried out by the foreign company is real and is not constitutive of tax fraud) or the participation exemption and will be taxed at the standard corporate income tax rate. Moreover, it will only be possible to offset capital losses sustained on the disposal of such securities against capital gains of the same type and not against profits taxed at the standard corporate income tax rate.

### BRANCH PROFITS TAX

The normal system is territorial and applies to each company individually. Foreign branch profits are exempt from corporate income tax. French branches of foreign companies will generally only be taxed in France on French-sourced income, subject to the same corporate income tax rules as a resident company. The rate of the tax and the surcharges thereon are also the same as for resident companies.

As a principle, branch profits are deemed to be distributed to the foreign head office. Withholding tax is levied at the rate of 25% (or a reduced tax treaty rate) on the net profits of the branch. A refund of tax may be claimed to the extent that the branch's net taxable profits exceed the amounts actually distributed by the head office during the 12 months following the end of the fiscal year concerned, or to the extent the amounts are distributed to residents of France. However, the branch remittance tax is not due on profits of foreign companies whose head offices are located in the European Economic Area and which are subject to local corporate income tax with no possibility of opting for taxation or of being exempt.

## VALUE ADDED TAX (VAT)

In general, all economic activities conducted in France are subject to VAT (sales (and importations) of goods, supplies of services, certain self-supplies and intra-community acquisitions). The 20% standard VAT rate applies to transactions in metropolitan France (different rates apply in Corsica and the overseas departments and territories) other than those that are expressly exempt from VAT or subject to one of the reduced rates (10% on for example passenger transport, hotel accommodation, restaurants (except alcohol)), 5.5% reduced VAT rate (e.g. most foods, books) or to the special rate of 2.1% - applicable to reimbursed drugs and to most press items.

The taxpayer is liable for VAT on supplies of goods and services but may offset against this amount any VAT on the purchase (or importation) of goods, equipment and services. VAT returns and payments of VAT must generally be remitted monthly (special rules apply to small businesses). Certain types of domestic supplies may be subject to the reverse charge mechanism e.g. sub-contract building construction works, certain transactions in non-investment gold, supplies of gas, electricity, telecommunications services and transfers of $CO_2$ emission quotas.

Subject to certain conditions VAT registered businesses can also 'reverse charge' the VAT due on imported goods.

Companies must produce and retain a 'VAT audit trail documentation file' to fully justify VAT that is deductible and chargeable.

## FRINGE BENEFITS TAX (FBT)

Goods and services provided to employees are considered as salaries paid in kind, liable to social contributions and income tax.

## LOCAL TAXES

Various taxes are levied by the Government for the benefit of local government. The most important are as follows.

## LAND TAXES

a) **Real Estate tax**

This is based on 50% of the deemed rental value of real estate owned by the taxpayer (80% for bare land).

b) **Territorial Economic Contribution (hereafter CET)**

The CET consists of two separate contributions which apply in combination:

- Corporate Real Estate Contribution (CFE): The CFE is based on the deemed rental value of real estate assets available to the taxpayer for the purposes of its business activity;
- Contribution calculated on the corporate added value (CVAE): The CVAE is based on turnover, increased by certain income and reduced by certain deductible charges.

## RESIDENTIAL TAX

This is a tax on the occupation of property based on the deemed rental value of the property reduced by an allowance for the number of dependants of the occupant. This tax is being substantially reduced over the next few years. This tax is planned to be abolished in 2023 for residential property (primary residence) with progressive partial reductions in 2021 and 2022.

## OTHER TAXES

These include the following minor and indirect taxes:

## SALARIES TAX

This tax (distinct from payroll taxes) is due by companies which are not subject to VAT on at least 90% of their turnover (or turnover giving rise to the right to deduct VAT).Tax rates vary from 4.25% to 13.6% based on the level of remuneration (including benefits in kind) paid to employees.

## UNIQUE CONTRIBUTION FOR APPRENTICESHIP AND WORK-STUDY ('CUFPA')

This tax consists of two separate contributions:

- Apprenticeship tax: Payable at the rate of 0.68% (0.44% in the 3 departments in Alsace-Moselle) on total annual gross wages and salaries. This tax and the employers' training tax (see below) are being substantially revised, starting from 2020, and merged into one tax.
- Employers' training tax: All employers with at least 11 employees pay a contribution of 1 % (1.3% for temporary employment agencies) of total annual wages and salaries as an investment into vocational training programmes. The rate is reduced to 0.55% where there are fewer than 11 employees.

## CONSTRUCTION PARTICIPATION TAX

All employers with 50 employees or more in 2021 must pay a minimum of 0.45% of total gross wages and salaries for the construction of social dwellings.

## COMPANY CAR TAX

Companies pay a tax based on the number of cars registered in France which they own or rent for more than one month or are used by their employees for their professional needs. The tax has two elements – (i) the level of $CO_2$ emissions and (ii) the age of the car and type of fuel used. Non-polluting vehicles are exempt from this tax. This tax is not deductible from the corporate tax base.

## SOCIAL SOLIDARITY CONTRIBUTION (C3S)

This tax (which is effectively a social charge) applies to companies at a rate of 0.16% on annual turnover (as determined from certain lines on the VAT return) exceeding EUR 19 million. This tax is deductible from the tax base for corporate tax.

## RATES OF STAMP OR TRANSFER DUTIES

The sale of goodwill/business/clientele is subject to transfer duties at a rate of 3% (between EUR 23,000 and EUR 200,000) and 5% over EUR 200,000. The rate of transfer duties on the disposal/transfer of shares, such as shares in an SAS, SA is at 0.1%, but at 3% on shares of an SARL and Sociétés civiles. Exemptions may apply for sales between entities part of the same group. For certain companies having substantial real estate assets the rate is 5%. There are also registration duties on sales/transfers of real estate at varying rates.

## FINANCIAL TRANSACTION TAX (TAXE SUR LES TRANSACTIONS FINANCIÈRES)

A 0.3% tax applies to the acquisition of shares in listed companies which have their head office in France and whose market capitalization exceeds EUR 1 billion on 1st December prior to the fiscal year in which the transaction takes place.

## B. DETERMINATION OF TAXABLE INCOME

Taxable income is determined on the basis of the accounting results. When a tax rule diverges from an accounting principle, adjustments are made to the accounting results to determine the taxable result. Business profits are defined as gross trading profits less manufacturing, administrative and selling expenses. All expenses incurred in the conduct of business are deductible if they are directly related to the corporate purpose of the taxable entity. Special rules apply in respect of the categories listed below.

Interest, royalties and payments for services provided by private individuals and legal entities established or domiciled in a non-cooperative state or territory are only deductible if:

- The debtor provides proof of the transactions;
- The transactions are not abnormal or exaggerated; and,
- Has a *bona fide* commercial purpose.

The paying company will be required to submit a detailed breakdown of the expenditure along with its tax return.

## DEPRECIATION

Fixed assets are generally written off over their normal useful life. The straight-line method is the most commonly used. Companies can choose the declining-balance method to compute depreciation although certain assets are excluded from this. Assets acquired for a cost of less than EUR 500 excluding VAT can be completely written off in the first year.

The cost of cars exceeding certain limits cannot be depreciated: For 2021, the maximum depreciation is set at:

- EUR 30,000 for electric cars (less than 20g/km of CO2);
- EUR 20,300 for hybrid cars (more than 20g/km and less than 50g/km of CO2);
- EUR 18,300 for cars with more than 50g/km and less than 160g/km of CO2; and
- EUR 9,900 for cars with more than 160g/km of CO2.

Other items can be written off at specific rates, depending on their effective life and their date of purchase. A company can elect not to take all the depreciation to which it is entitled if it so wishes but the depreciation claimed on its assets in total must be at least equal to the depreciation that would have been claimed on the same assets on a straight-line basis.

## STOCK / INVENTORY

Stock may be valued at each year-end at cost price, market selling value or replacement cost. On the balance sheet, inventories must be shown at cost price. If the market value is lower, a reserve for depreciation of inventories must be disclosed separately as a deduction from cost.

Cost is defined as the actual purchase price or actual production cost (excluding financial charges) or, if lower, the price at which the goods may be sold. FIFO or the average cost method must be applied. LIFO is prohibited.

## CAPITAL GAINS AND LOSSES

See 'Capital Gains Tax' above.

## DIVIDENDS

Dividends distributed by French or foreign companies that meet the parent subsidiary regime conditions (holding of at least 5% of the capital for at least 2 years; subsidiary subject to corporate income tax and which has an economic substance) are 95% exempt at the level of the parent company.

Dividends that do not meet the conditions of the parent-subsidiary regime are taxed at the common corporate income tax rate by the recipient company.

However, in the following cases, only 1% of the value of dividends received by a French company are taxed:

- Dividends distributed between French companies, part of a tax consolidated group;
- Dividends distributed by an EU company (or established in Iceland or Norway) to a French company which is a member of a tax consolidated group, if this EU company is subject to local corporate income tax and would have met the conditions to be part of the French tax consolidation group if it had been located in France;
- Dividends distributed by an EU company (or established in Iceland or Norway) to a French company which is not a member of a tax consolidated group (because not fulfilling the conditions), if this EU company is subject to local corporate income tax and would have met the conditions to form a French tax consolidation group if it had been located in France.

Dividends from companies established in non-cooperative countries or territories, are excluded from this regime, except if it can be demonstrated that the foreign subsidiary has genuine activities whose purpose or effect is not to locate profits in those non-cooperative countries or territories, with a fraudulent intent.

## INTEREST DEDUCTIONS

In principle, interest payments are fully deductible. However, there were major changes made to the interest deduction rules – effective from 1 January 2020 – to comply with the EU's ATAD.

**New general limitation:** net interest expenses will be deductible from a company's taxable income only to the extent that they do not exceed the higher of two thresholds: (i) EUR 3 million or (ii) 30% of the adjusted taxable income of the company (i.e., corresponding to the taxable income before the offset of tax losses and without taking into consideration net financial expenses and – to some extent – depreciation, provisions and capital gains/losses). This is referred to as the "regular threshold." An additional deduction limited to 75% of the non-deductible amount is available when the ratio equity-to-assets is equal to or greater than the same ratio determined at the level of the consolidated group to which the company belongs. Interest expense that cannot be deducted during a year, can be carried forward without any limits as regards time or amount.

A special rule for "autonomous" companies, i.e. companies that are not part of a consolidated group (as defined in 2° of VI of article 212 bis of the FTC) and that do not have a PE outside of France or an associated company (as defined in paragraph (4) of article 2 of the Directive ATAD 1) entered into force. Those companies will be able to deduct 75% of excess borrowing costs deemed non-deductible under the general limitation rule (30% of the EBITDA / EUR 3 million thresholds).

The new interest expense deduction limitation rules apply to fiscal years ending on 31 December 2020 or later.

F

**Debt-to-equity ratio:** should the company be thinly capitalised and exceed a specific 1.5:1 debt-to-equity ratio,

- a portion of the net interest expense, determined by application of the following ratio to the net interest expense, is subject to the regular threshold:
  - o Average amount of indebtedness to unrelated parties + [1.5 x equity] (numerator);
  - o Average amount of indebtedness (denominator).
- a portion of the net interest expense, determined by application of the following ratio to the net interest expense, is deductible up to the higher of the two following thresholds: (i) EUR 1 million or (ii) 10% of the below mentioned adjusted taxable income:
  - o Average amount of indebtedness to related parties exceeding 1.5 x equity (numerator);
  - o Average amount of indebtedness (denominator).

There are new 'safe harbour' rules and rules for dealing with excess interest expense, deduction capacity, impact of reorganisations and tax groups.

## LOSSES

Losses may be carried forward indefinitely. However, losses carried forward are subject to a restriction whereby the maximum amount that can be utilised in any one year is capped at EUR 1,000,000 plus 50% of the profit exceeding this threshold. The portion of the losses that cannot be offset can be carried forward indefinitely by applying the same limitation each year.

Losses can be carried back against undistributed taxable income for the previous financial year up to the lower of EUR 1,000,000 and the profits of that earlier tax year. The portion of losses that cannot be carried back may still be carried forward indefinitely.

Corporate income tax paid in the preceding years is not immediately repaid to the company when this option is exercised but the company becomes entitled to a tax credit. It can be used to pay its corporate income tax liabilities arising in the following five years. If the credit is not used during these five years, the tax is reimbursed by the Administration.

## PATENT INCOME

The tax rate on patent income is10%. This tax rate applies, on an election basis only, to the net income derived from the licensing of qualifying patents, after deduction of R&D expenses, and after the application of a ratio which takes account of the taxpayer's share of the expenses incurred in the creation of the patent to the total costs incurred.

## FOREIGN SOURCE INCOME

Profits earned by subsidiaries not established in an EU country and paying a low rate of tax (below 15.5%) are presumed to have been earned in France and are subject to corporate tax in France, if more than 50% of the shares are owned by the parent company. A tax credit is given for the corporate tax paid in the country where the subsidiary is established.

Withholding tax suffered on dividends, interest and royalties from such subsidiaries is only creditable if the subsidiary is resident in a territory that has signed a double tax treaty with France and that is not on the list of non-cooperative states or territories (as from 4th March 2021 : Anguilla, , British Virgin Islands, Panama, Seychelles, Vanuatu, Fiji, Guam, American Virgin Islands, American Samoa, Samoa, Trinidad and Tobago, Palau, and Dominica). To avoid the application of the aforementioned rule, if the subsidiary is established or set up in a non-cooperative state or territory, the French parent must either:

(i) Demonstrate that the profits of the subsidiary are generated from an effective industrial or commercial activity and do not exceed the ratios for passive income and intra-group services: or,

(ii) Provide to the tax authorities all the documents necessary for it to evaluate the activity performed and the ratios as well as to substantiate that the transactions of the subsidiary have a primary purpose other than to divert profits into that country.

## INCENTIVES

- Research tax credit (CIR): Businesses that spend money on research may be granted a tax credit, which can be offset against corporation tax due. The Research Tax Credit also covers certain 'innovation' investments by SMEs. The tax credit rate for R&D expenditure is 30% of the outlay up to EUR 100 million per year, and 5% over this limit. The tax credit rate for 'innovation' expenditure is 20% of the eligible outlay up to a maximum of EUR 400,000 per year i.e. a maximum credit of EUR 80,000 per year. In certain cases, the tax credit rate may be more than 100% of the research expenditure. The nature of the expenses giving rise to the credit must be disclosed if above EUR 2 million.
- Competitiveness and Employment Tax Credit (CICE): The purpose of the Competitiveness and Employment Tax Credit (CICE) was to enhance the competitiveness of businesses in France, mainly by funding capital expenditure, R&D, innovation, training, hiring, canvasing of new markets, environmental and energy transition costs and the replenishment of working capital. The CICE measure was abolished with effect from 1 January 2019 and was replaced by a reduction in the employer's health

insurance contributions on a company's gross salaries up to 2.5 times the minimum wage. Companies that have not used all their CICE credits before it was abolished retain the right to use it for the payment of other taxes up to the end of 2021.

In certain privileged 'priority zones', companies created to carry out new industrial, commercial or even, under certain conditions, non-commercial activities, are exempt from corporate income tax during the first two years of their operation. They are also exempt from tax on 75%, 50% and 25% of their profits for the next three years respectively. The exemptions also apply to local business taxes, reduced transfer taxes and accelerated depreciation. Various tax incentives are available to enterprises operating in Corsica, Overseas Departments and specified, disadvantaged urban and suburban zones.

### OTHER

Deferred remuneration paid to directors or managers (such as golden parachutes) are deductible up to a maximum of EUR 123,408.

## C. FOREIGN TAX RELIEF

Foreign tax paid on dividends, royalties and interest may be allowed as a credit against the French tax due from a French resident under a double tax treaty (or by way of deduction under domestic law when received from a non-treaty country).

## D. CORPORATE GROUPS

Where a French company holds 95% or more of the shares of one or more French companies, the group may elect to be taxed as a single entity, corporate tax is payable only by the company head of the tax consolidated group. Therefore, profits and losses of group companies may be offset. The French tax consolidation regime also applies to "horizontal" tax consolidated groups (i.e. tax consolidation between sister or cousin companies).

Transactions between group members at cost – both goods and services – are now permitted.

## E. RELATED PARTY TRANSACTIONS

Pre-tax income indirectly transferred abroad either through an increase or decrease of purchase or sales price, or by any other means, to an enterprise established outside France which controls or is controlled by the French corporate taxpayer may be added back to taxable income by the Tax Authorities. Groups of companies may obtain an advance transfer pricing (APA) agreement from the French Ministry of Finance. Transfer pricing documentation for companies of a certain size must be made available to the tax authorities on request. Certain transfer pricing information must be provided each year.

## F. WITHHOLDING TAX

Withholding tax must be deducted from dividends, interest and royalties paid to non-residents to the extent they are not franked. See section J below for more details.

## G. EXCHANGE CONTROL

In principle, inbound non-resident investments in France are free of prior review and approval by the government unless they are in a sensitive economic sector where prior authorisation must be obtained from the French Treasury.

## H. PERSONAL TAX

Income tax is payable by French residents on non-exempt income derived from all sources (worldwide income subject to tax treaties). Non-residents are only required to pay tax on French-sourced income.

French law establishes three criteria, any one of which is sufficient to indicate that an individual is resident in France for tax purposes:

- Home in France (or, in the absence of any home, the place where he/she mainly stays is in France);
- Professional activity in France whether salaried or not, unless that activity is being performed on an ancillary basis
- Centre of economic interest (i.e., the place where the individual has his/her major investments, place of business, from where he/she manages their assets).

Assessable income includes salaries, pensions and life annuities, property income, industrial or commercial profits, certain directors' remuneration, agricultural profits, wages, non-commercial profits and investment income.

For each category of taxable income, the income or gain received is reduced by any amounts incurred for the acquisition and conservation of this income. For example, business expenses properly incurred can be deducted from wages (failing which a flat-rate deduction of 10% applies); the cost of maintaining and repairing a property can be deducted from the taxable property income.

However, interest paid on any borrowings to finance the acquisition of the taxpayer's principal residence cannot be deducted from his taxable income. To obtain the amount of income tax due the taxpayer has to apply a progressive rate, then take into account the family quotient and finally apply various deductions (reductions and tax credits).

The family quotient consists in dividing the taxable income by a number of shares which varies as a function of the composition of the tax household. For example, a single person has a single share of the family quotient; a married couple has two shares. Each child gives an additional half share, and the third child provides a full share. So, the effect of the family quotient is to reduce the tax burden for families with children.

Therefore, a single person with no dependents has a coefficient (number of shares) of one and pays tax on his actual taxable income. By comparison, a married couple with two children has three shares and pays tax by dividing their income first by three, calculating an amount due as if they were single, and then multiplying the amount due by three (there are capping provisions to limit the benefit of this system).

The tax reductions and credits are deducted from personal income tax. For example, a tax credit is granted for childcare expenses, a reduction in the tax base is provided for taxpayers investing in certain properties under certain conditions, which are to be rented out.

The following table gives the rates of tax for income earned in 2021 (i.e. assessment year 2022):

| Bracket of taxable income (EUR) | Rate (%) |
|---|---|
| 0 – 10,225 | 0 |
| 10,226 – 26,070 | 11 |
| 26,071 – 74,545 | 30 |
| 74,546 – 160,336 | 41 |
| Over 160,336 | 45 |

Individuals earning the highest incomes are subject to an additional extraordinary contribution. This contribution is equal to 3% or 4% of the taxable income depending on the amount of the income and the family situation (single person, married couple with or without children).

From 1 January 2019 employers, pension providers etc. apply a 'withholding tax' ('Prélèvement à la Source") as and when salaries/ pensions are paid such that income tax is paid in year Y on the basis of the revenues of year Y (and no longer on the basis of the revenues of year Y-1).

However, the tax return remains to be filed the following year (Y +1) at the latest at the end of May or for certain taxpayers (e.g. non-residents) in June.

**Flat-tax ('Prélèvement Forfaitaire Unique – 'PFU')**

The 2018 Finance law reformed the tax treatment of investment income by creating a single, flat-rate levy ("PFU" or "flat tax").

For French residents, the flat-rate levy is 30% (i.e. 12.8% of income tax and 17.2% of social security contributions). It applies to investment income including dividends, interest and capital gains from the sale of securities and shares. The 40% allowance on dividends and similar income does not apply then. Taxpayers can opt to retain taxation according to the progressive income tax table, in which case the 40% allowance applies.

For non-residents: the withholding tax applicable to capital gains on the sale of shares derived from a "substantial interest" (i.e. greater than 25%) has been reduced to 12.8%.

**Capital Gains**

Capital gains on any immovable property are exempt if the sales price (per property) does not exceed EUR 15,000 or if the asset concerned is the taxpayer's principal residence (applicable to French tax residents).

The sale of a French situs property (or of shares in a deemed French real estate investment company) is subject to capital gains tax as follows:

- French resident: the capital gain is taxed at a rate of 19% plus social contributions (17.2%). A decreasing scale applies if the property is held for more than 5 years. Capital gains are exempted from tax if the property concerned has been held for at least 22 years and are totally exempted from tax and social charges if the property concerned has been held for at least 30 years.
- European Union and Swiss residents: the capital gain is taxed at a rate of 19% plus 7.5% of social contributions. The progressive exemption of the capital gain applies.
- All other non-French residents: The capital gain is taxed at a rate of 19% plus 17.2% of social contributions (if the sale of the property is made by a non-French corporate structure, the taxable gain increases by 2% each year). The progressive exemption for capital gains applies. The rate increases to 75% if the seller is a resident of a non-cooperative state.

In addition, and if greater than EUR 50,000, the capital gain (with certain exceptions) is subject to an additional tax ranging from 2% to 6% (depending on the amount of the capital gain).

**Wealth tax**

Wealth tax is limited in scope and applies to real estate assets (including 'paper' of the tax household). Real estate owned for business purposes is exempt from the tax. It is only possible to deduct debts from the current valuation of the real estate that are related to taxable assets (there are special rules for non-repayment, i.e. interest-only mortgages)

The wealth tax is assessed on individuals whose net wealth exceeds EUR 1,300,000 (threshold). The tax due is computed on the value of the real estate assets held by the taxpayer on 1 January exceeding EUR 800,000. The tax rates range from 0.5% to 1.5%.

The following table gives the rates of tax for wealth tax in 2020:

| Bracket of taxable wealth (EUR) | Rate (%) |
|---|---|
| 0 – 800,000 | 0 |
| 800,001 – 1,300,000 | 0.50 |
| 1,300,001 – 2,570,000 | 0.70 |
| 2,570,001 – 5,000,000 | 1 |
| 5,000,001 – 10,000,000 | 1.25 |
| Over 10,000,001 | 1.50 |

French residents are subject to wealth tax on worldwide real estate assets, while the tax basis for non-residents is limited to real estate assets situated in France. The wealth tax return is generally filed with the tax return. The tax is payable upon filing of the return.

A capping system applies only to French residents, whereby income tax and wealth tax cannot exceed 75% of the worldwide net income received by the taxpayer in the preceding year.

**Inheritance tax**

Inheritance tax is paid by the inheritors of the estate of a French resident or the French assets of a non-French resident. Inheritance tax is also due by French resident inheritors on all the estate of a non-French resident. The tax is due on all property transferred by will, by intestate succession or donation before death.

If the deceased is a French tax resident, all assets owned are subject to inheritance tax, whether the beneficiary is a French tax resident or not, and whether the assets are located in France or not.

But, if the deceased and the beneficiary were not French tax residents, only the assets located in France would be subject to French taxation (except in certain specific cases: art. 750ter of the FTC).

Transfers of assets held through a trust, or earnings capitalized as such, are subject to inheritance tax. A declaration giving a description and valuation of the assets received must be sent to the Administration within six months following the death. Certain tax-free allowances are granted, the amount of which depends on the relationship with the deceased. The tax rates range from 5% to 45% (direct descendants), 55% (up to 4th degree descendants) and 60% (beyond 4th degree).

## I. STANDARD AUDIT FILE FOR TAX (FICHIER D'ÉCRITURES COMPTABLES)

All businesses subject to business taxes, e.g. corporate income tax or VAT, must produce, at tax audit, a Standard Audit file for tax in a predetermined format (providing transaction level detail) as set down by the French tax authorities.

## J. TREATY AND NON-TREATY WITHHOLDING TAX RATES

France has signed a number of supplemental clauses modifying some international tax treaties. Notably, these relate to the exchange of information.

| | Dividends[2] (%) | | Interest[12] (%) | Royalties (%) |
|---|---|---|---|---|
| | Individuals (%) | Qualifying companies (%) | | |
| **Domestic rates** | | | | |
| Companies | 0/15/25/75[1] | 02 | 0/75[12] | 0/25/75[13] |

Notes to the tables above:

1. Unless a tax treaty provides for a lower rate, gross dividends distributed to non-resident corporate shareholders are subject to a final withholding tax of 25% (articles 119bis and 187 of the FTC). The 25% rate is reduced to 15% for dividends distributed by French companies to non-profit organisations (e.g. pension funds) resident in another EEA country (articles 187 and 219bis of the FTC). Dividends distributed by a resident company to a company resident in an NCST (Non-cooperative states or territories) are subject to a 75% final withholding tax, unless the distributing company proves that the distribution made to a resident of an NCST neither seeks nor allows abusive profit shifting to the NCST.
2. Under article 119ter of the FTC implementing the provisions of the (EU) Parent-Subsidiary Directive (2011/96), no withholding tax is levied on dividends paid by a French company to a qualifying parent company resident in the European Economic Area (EEA). The exemption also applies to dividends paid to a permanent establishment located in France with a qualifying EEA parent company. The exemption applies if:
   i. the parent company is the beneficial owner of the dividends;
   ii. the parent company has its place of effective management in an EEA state with which France concluded a tax treaty containing an

administrative assistance clause, and is not deemed to be domiciled outside the EEA pursuant to a tax treaty concluded with a non-EEA state;

iii. the parent company has one of the legal forms listed in the Directive, or a comparable form if its place of effective management is located in an EEA state;

iv. the parent company holds directly at least 10% of the full or bare ownership of the share capital of the French subsidiary for an uninterrupted period of at least 2 years (or commits to hold the shares for at least 2 years). The 10% participation threshold is reduced to 5% if the parent company holds shares that fulfil the conditions provided for in the French participation exemption rules, and is unable to make use of a tax credit for French withholding tax in its country of residence; and

v. the parent company is subject to corporate income tax in the EEA state where its place of effective management is located, with no possibility to opt for such tax and without being exempt from it.

3. A 10% shareholding is required.
4. A 15% shareholding is required.
5. A 20% shareholding is required.
6. A 25% shareholding is required.
7. A 50% shareholding is required.
8. No reduction under the treaty. The domestic rate applies.
9. Treaty concluded between France and the former USSR.
10. Treaty concluded between France and the former Yugoslavia.
11. Extension of the 1950 treaty with the United Kingdom.
12. Generally, no withholding tax is levied on interest paid to non-resident companies and individuals. Only interest paid to a company or an individual located in an NCST (Non-cooperative states or territories) is subject to a final 75% withholding tax, unless the taxpayer proves that the payments are not motivated by tax avoidance.
13. Gross royalties are subject to a 25% withholding tax (2019) unless a tax treaty provides for a lower rate (article 182 B of the FTC). This withholding tax is not final as it is credited against the corporate income tax assessed under the general rules. Under article 182 B bis of the FTC implementing the provisions of the EU Interest and Royalties Directive (2003/49), outbound royalty payments are exempt from withholding tax, provided that the beneficial owner is an associated company of the paying company and is resident in another Member State or such a company's permanent establishment is situated in another Member State. Royalties paid to a company resident in an NCST (Non-cooperative states or territories) are subject to a 75% final withholding tax, unless the taxpayer proves that the payments are not motivated by tax avoidance.

# GAMBIA

## MEMBER FIRM

| City | Name | Contact Information |
|---|---|---|
| Banjul | Donald C Kaye | +220 441 4419<br>donald.kaye@pkf.com |

## BASIC FACTS

| | |
|---|---|
| Full name: | Republic of The Gambia |
| Capital: | Banjul |
| Main languages: | English |
| Population: | 2.55 million (2022 estimate) |
| Monetary unit: | Gambian Dalasi (GMD) |
| Internet domain: | .gm |
| Int. dialling code: | +220 |

## KEY TAX POINTS

- Corporation tax is payable based on the higher of 27% of chargeable profits or 1% and 2% of turnover for audited and unaudited accounts respectively.
- Value Added Tax (VAT) at a standard rate of 15% is payable on taxable supplies made in the Gambia, taxable imports of goods and on taxable supplies of imported services.
- Withholding tax applies in relation to retention of the services of a contractor or subcontractor, a company or partnership paying dividend to a resident individual, and interest paid to resident companies. Tax withheld from Contractors is at the rate of 10% and for dividends and at the rate of 15% for interest.

## A. TAXES PAYABLE

### COMPANY TAX

Corporation tax is payable based on the higher of 27% of chargeable profit or 1 % of total revenue for the tax year. This implies that even if a company has an adjusted tax loss figure for any particular year, it will still be liable to tax. Note that if for any reason a company is not audited, tax on its total revenue will be 2% and not 1%.

Income tax is payable in quarterly instalments, i.e. the three-month period ending on the last day of the third, sixth, ninth and twelfth month of the tax year. This instalment is based on 1% of total revenue for a company with audited accounts or 2% for a company without audited accounts and is due by the 15th of the following month, failing which a penalty equal to 5% of the unpaid tax per month can be applied. Advance payments during the tax year are credited against income tax assessed.

Corporate Income Tax Return form is mandatory for all taxable entities and is expected to be submitted by 31 March of the year following that to which it relates. The form is used to determine annual tax liability.

## CAPITAL GAINS TAX (CGT)

CGT is payable on the disposal of a capital asset. In the case of a partnership, company or trustee, tax is paid on the greater of:

- 25% of the capital gain arising on disposal or;
- 10% of the consideration received for the disposal.

In the case of an individual, body of persons or trustee of a deceased estate:

- 15% of the capital gain arising on percentage of the disposal or;
- 5% of the consideration received on disposal.

Capital gains tax is exempt on the disposal of agricultural land, private residence and if the gain does not exceed GMD 7,500.

## BRANCH PROFITS TAX

A branch's profit is taxed at the higher of 27% on chargeable profit or 1% of total revenue as the branch is considered a permanent establishment meaning a resident company. There is no branch remittance tax in the Gambia.

## VALUE ADDED TAX (VAT)

Value Added Tax (VAT) is payable on:

(a) a taxable supply made in The Gambia;

(b) a taxable import of goods;

(c) a taxable supply of imported services.

**Registration requirements**

- A person is required to register for VAT at the end of any 12-month or shorter period if, during the period, the total value of supplies of goods or services made by the person equals or exceeds GMD 1 million.
- A person is required to register for VAT at the beginning of any 12-month period if there are reasonable grounds to expect that the total value of supplies of goods or services to be made by the person during that period will equal or exceed GMD 1 million.
- A person who is not required to register for VAT is permitted to register within six months of the end of a 12–month or shorter period in which the total value of supplies made by the person exceeded GMD 500,000.

VAT is payable on a taxable supply of goods made in the Gambia. In the case of certain taxable supplies of goods the rate is 0% and in any other case, the rate is 15%. A registered person shall provide a VAT return for each tax period within 15 days after the end of the period, whether or not tax is payable for the tax period.

## FRINGE BENEFITS TAX

Fringe benefits are specific and direct payments of expenditure for and on behalf of an employee, in addition to his /her salary. The tax levied is at a rate of 27% on the grossed-up taxable value of each benefit provided and is payable by the organisation that provides the benefit to the employee. The total amount of fringe benefits plus tax thereon is an allowable deduction for corporate income tax calculation purposes.

## LOCAL TAXES

## NATIONAL EDUCATIONAL LEVY

The threshold for eligibility for payment of the National Education Levy is GMD 1 million. The applicable levy rate is 0.75% of annual business revenue subject to a maximum amount of GMD 100,000. Businesses with annual business revenue of less than GMD 1 million are not liable to pay National Education and Technical Training Levy and business with annual business revenue in excess of D1,000,000 pay between GMD 7,500 and GMD 100,000. The information used to determine how much is payable is the previous year's audited financial statements.

## EXPATRIATE TAX

An annual payment of GMD 40,000 is payable for each employee with citizenship from any country outside the West African region but for employees from West Africa the rate is set at GMD 10,000.

## BUSINESS REGISTRATION

An annual payment of GMD 1,000 should be made by all businesses at the start of the year.

## STAMP DUTY

The duty is levied on juristic acts resulting in a flow of wealth between the parties involved. Thus, stamp tax is applicable *inter alia* to acts whereby transactions on Real Estate or financial obligations are documented. The applicable rates are as follows:

| Document | Current Rate |
|---|---|
| Memorandum of Deposit | GMD 100 |
| Lease Agreement | 20% |
| Tenancy Agreement | 20% |
| Assignment/Conveyance | 5% |
| Bill of Sale | 5% |
| Transfer of Shares | 5% |

| Document | Current Rate |
|---|---|
| Debenture | 5% |
| Mortgage | 1.5% |
| Further Charges | 1.5% |
| Surrender and Release | 1.5% |
| Under Lease | 2.1% |
| Guarantee | 0 |

## CUSTOMS AND EXCISE DUTIES

Are applied on the importation or exportation of certain goods.

## OTHER TAXES – RESIDENTIAL RENT TAX

Tax is imposed for each tax year on a person who has a taxable residential rental amount at a rate of 8% per annum. Tax due on commercial rent is 10%.

## B. DETERMINATION OF TAXABLE INCOME

The calculation of taxable income is arrived at by adjusting the accounting profits/losses for non-taxed income and disallowed expenses.

## CAPITAL ALLOWANCES

The following annual rates are applied against the written down value of assets:

| Annual allowance: | Rate |
|---|---|
| Building | 5% |
| Motor Vehicle | 40% |
| Plant and machinery | 20% |
| Plant and machinery used in manufacturing, mining | 30% |
| Office furniture and equipment | 20% |
| Computers | 40% |

### Initial Allowance

Initial allowance is applied at 20% of the cost of the asset or 10% for buildings, structures or works of a permanent nature. Initial and annual allowance cannot be granted on the same asset in the same year. Therefore, annual allowance is not granted in the year a fixed asset is first put to use, only initial allowance is granted.

### Intangible assets

An amortisation deduction is allowed. The deduction is computed by using the cost of the asset divided by the useful life of the intangible asset in whole years.

## DEPRECIATION

No deduction is allowed in the tax computation but rather capital allowances are allowed.

## STOCK / INVENTORY

A deduction is allowed for the cost of stock in trade disposed of in a tax year in deriving the chargeable income.

## CAPITAL GAINS AND LOSSES

If the consideration received exceeds the written down value of the asset, the excess is business income which has to be included in the person's income for that year and, if less, the difference is allowed as a deduction when computing the chargeable income for the year.

## DIVIDENDS

Dividend withholding tax is at a rate of 15%.

## INTEREST DEDUCTIONS

A deduction is allowed for any interest incurred in a tax year if the company used the proceeds or benefit of the debt on which the interest is payable. The interest not deducted can be carried forward for a period of six years.

## LOSSES

If a company has a business loss for the year, that amount is carried forward to the following year and allowed as a deduction in computing the chargeable income for that year. Losses can only be carried forward for six years after the tax year in which the loss is incurred.

## FOREIGN SOURCED INCOME

A foreign sourced income received by a resident company is exempt from income tax. If foreign income tax has been paid, a tax credit is allowed.

## INCENTIVES

Expenditure on certain pre-commencement expenditure qualifies for accelerated deductions. A deduction is allowed in the tax year in which the expenditure is incurred and in the following three years ( i.e. 25% each year). Granting of investment incentives and tax exemptions can only be obtained from the Gambia Investment and Export Promotion Agency (GIEPA).

## BAD DEBTS

A deduction is allowed for a debt written off if certain conditions are met.

## LOSS RESERVE OF BANKS

A bank is allowed a deduction for the addition to its provision for doubtful debts in a tax year provided the addition has been determined in accordance with the prudential requirements specified by the Central Bank of The Gambia. The amount allowed as a deduction for a tax year shall not exceed 0.5% of the total outstanding debt claims of the bank as at the end of the tax year.

## C. FOREIGN TAX RELIEF

The Government of The Gambia has a double tax treaty with Norway, Sweden, Switzerland, Taiwan and the United Kingdom. If a resident person has a foreign tax loss for a tax year, the amount of the loss can be carried forward to the following tax year and allowed as a deduction against the person's foreign-sourced business income. The loss can be carried forward for a period of six years.

G

## D. CORPORATE GROUPS

Tax on certain payments to non-resident persons does not apply if the conditions below are met:

(i) If the holding giving rise to the dividend is connected with a permanent establishment in The Gambia of a non-resident company;

(ii) Any interest if the debt claim giving rise to the interest is connected with a permanent establishment in The Gambia of a non-resident company;

(iii) Any royalty if the property or right giving rise to the royalty is effectively connected with a permanent establishment in The Gambia of a non-resident company;

(iv) Any technical service fee if the services giving rise to the fee are rendered through a permanent establishment in The Gambia of a non-resident company.

## E. WITHHOLDING TAX

A person who retains the services of a contractor or subcontractor to carry out work or supply labour or materials for the carrying out of work shall withhold tax at the rate of 10% of the gross fees.

A company or partnership paying dividend to a resident individual shall withhold tax at the rate of 15%.

A 15% withholding tax shall be withheld on interest paid to resident companies but it does not apply to interest paid to financial institutions.

## F. EXCHANGE CONTROL

There are no exchange controls in place.

## G. PERSONAL TAX

On 11 April 2018, in accordance with the Budget for 2018 the Gambia Revenue Authority published the revised personal income tax rates and bands which are applicable with effect from tax year 2018:

| Income range per annum | Tax rate |
|---|---|
| GMD 0 – GMD 24,000 | 0% |
| GMD 24,001 – GMD 34,000 | 5% |
| GMD 34,001 – GMD 44,000 | 10% |
| GMD 44,001 – GMD 54,000 | 15% |
| GMD 54,001 – GMD 64,000 | 20% |
| Above GMD 64,000 | 25% |

## H. TREATY AND NON-TREATY WITHHOLDING TAX RATES

| | Dividends (%) | | Interest (%) | Royalties (%) |
|---|---|---|---|---|
| | Individuals, companies | Qualifying companies | | |
| **Non-treaty countries** | | | | |
| Companies | 15 | 15 | 15 | 15 |
| Individuals | 15 | -- | 15 | 15 |
| **Treaty countries:** | | | | |
| Norway | 15 | 5[1] | 15 | 12.5 |
| Sweden | 15 | 5[2] | 5/10/15[3] | 5/10/12.5[4] |
| Switzerland[6] | --[7] | --[7] | --[7] | --[7] |
| Taiwan | 10 | 10 | 10 | 10 |

| | Dividends (%) | | Interest (%) | Royalties (%) |
|---|---|---|---|---|
| | Individuals, companies | Qualifying companies | | |
| Turkey | 15 | 5[5] | 10 | 10 |
| United Kingdom | 15 | 15 | 15 | 12.5 |

NOTES:
1. The 5% rate applies if the beneficial owner is a company which holds directly at least 25% of the capital of the dividend-paying company.
2. The 5% rate applies if the beneficial owner is a company (other than a partnership) which owns at least 15% of the voting stock of the dividend-paying company.
3. The 5% rate applies to interest paid with respect to indebtedness arising on the sale on credit, by an enterprise of a Contracting State, of any merchandise or industrial, commercial or scientific equipment to an enterprise of the other Contracting State, except where the sale or indebtedness is between related persons. The 15% rate applies in all other cases. However, as from 1 January 2019, by virtue of a most favoured nation clause the standard rate is reduced to 10% as under the Gambia-Turkey treaty (see footnote 8: effective date: 1 January 2019) the standard rate is 10%.
4. The 5% rate applies to royalties paid with respect to any patent, secret formula or process, or for information concerning industrial, commercial or scientific experience. The 12.5% rate applies in all other cases. However, as from 1 January 2019, by virtue of a most favoured nation clause the standard rate is reduced to 10% as under the Gambia-Turkey treaty (see footnote 8: effective date: 1 January 2019) the standard rate is 10%.
5. The 5% rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the dividend-paying company.
6. Extension of the 1954 treaty with the United Kingdom.
7. Exempt from tax if such income is subject to Swiss tax and the dividend, interest or royalties are not attributable to a permanent establishment situated in Gambia.

|---|---|---|
| Tbilisi | David Gvetadze | +995 32 2 24 30 30 (office)<br>+995 599 50 19 75 (mobile)<br>david.gvetadze@pkfgeorgia.com |

## BASIC FACTS

| | |
|---|---|
| Full name: | Georgia |
| Capital: | Tbilisi |
| Main languages: | Georgian |
| Population | 3.97 million (2022 estimate) |
| Monetary unit: | Georgian Lari (GEL), 1 Lari = 100 Tetri |
| Internet domain: | .ge |
| Int. dialling code: | +995 |

## KEY TAX POINTS

- There are six main taxes in Georgia: Personal Income Tax (PIT), Corporate Income Tax (CIT), Value Added Tax (VAT), Import Duty, Excise Tax, and Property Tax.
- Companies incorporated and tax residents in Georgia (tax residents) are subject to tax on their worldwide income, whereas companies incorporated overseas are normally treated as non-resident taxpayers and are taxable only on Georgian-sourced income or income arising from business activities carried on through a permanent establishment (PE) in Georgia.
- Georgian and foreign enterprises are subject to CIT on their taxable profits at a flat tax rate of 15%. Companies must file individual tax returns and report their taxes separately. Consolidated tax returns are not permitted. In most cases generated profit is not subject to tax, unless distributed through dividends.
- VAT applies to supply of goods or services in Georgia and imports (in accordance with customs value of goods). The standard VAT rate is 18%.
- Property Tax is a local tax administered by local self-government bodies (up to a maximum limit specified within the Georgian Tax Code (hereinafter the TCG)) and comprises land tax and property tax of individuals and enterprises.
- Individual residents and non-residents of Georgia are subject to PIT only on Georgian sourced income. Standard PIT flat rate is 20%, although lower rates might apply to specific economic activities based on applicable statuses.

## A. TAXES PAYABLE

The principal source of tax law in Georgia is the TCG (adopted by the Parliament of Georgia and effective from 1 January 2011). There are six main taxes in Georgia:

- Personal Income Tax (PIT) – a nationwide tax;
- Corporate Income Tax (CIT) – a nationwide tax;

- Value Added Tax (VAT) – a nationwide tax;
- Import Duty – a nationwide tax;
- Excise Tax – a nationwide tax;
- Property Tax – a local tax.

Levies and duties on the gambling industry and some types of fees for the use of natural resources are also administered by the Revenue Service of Georgia, although such payables are not deemed a tax.

## CORPORATE INCOME TAX

A new system of Corporate Income Taxation (CIT), the so-called 'Estonian model', was introduced in Georgia in 2016, which has become effective as of 1 January 2017. This new system has radically reformed the existing classical corporate income tax system. The core idea behind this reform is to exempt undistributed profits (reinvested or retained profits) from Corporate Income Tax for most businesses (exceptions listed below) and to only tax profit distributions (including 'deemed' profit distributions). CIT applies only if profit is distributed through dividends.

CIT is calculated by dividing the object of taxation by 0.85 and then multiplying it by 15%. This model is intended to stimulate reinvestments as businesses will have an incentive to retain their earnings and reinvest in growth upgrading their facilities and increasing their competitiveness.

CIT applies to:

1. Distribution of profit. Profit, which is distributed by the enterprise as a dividend to its partner(s), in cash or non-cash form;
2. Taxation of distortions (difference between the cost and market price of the transaction with a related party (who is not subject to CIT according to the new regime) or the person exempted from personal income tax/corporate income tax (except for a budget organisation, the Legal Entity under Public Law – the Deposit Insurance Agency and the National Bank of Georgia) and the carrying out of a controlled operation if the conditions set out in this operation do not meet the market principle);
3. Costs incurred or other payments that are not related to economic activity, e.g.:
   - Expense, which is not documented, if this obligation is established in accordance with the TCG.
   - Costs of reimbursement that are not intended for profit, income, or compensation.
   - Costs for goods/services purchased from a natural person with a micro business/fixed taxpayer status.
4. Temporary taxation of some kind, e.g., a loan to a natural person or a non-resident, a person registered in a country with a preferential tax regime, as well as an advance payment to a person exempted from CIT in accordance with the TCG, etc.
5. Delivery of goods/services and/or transfer of cash to gratuitous goods supplied free of charge or rendering of services, which is not intended for profit, income or compensation.
6. Costs above limit:
   - Interest paid with respect to a credit (loan) above the annual interest rate set by the Minister of Finance.
   - A donation to a charitable organisation that does not exceed 10% of the net profit earned during the previous calendar year.
   - Representative expenses incurred during the calendar year above the limit. The marginal amount is 1% of the revenue received during the previous calendar year and 1% of the cost incurred if the expenditure exceeds the received income.

A foreign enterprise carrying out economic activities through a PE in Georgia is also subject to CIT at a flat tax rate of 15% on its profit (distributed profit shall be deemed a disbursement made to the non-resident enterprise in cash or in kind out of the profit gained as a result of the activity of the PE). Also, in cases which are discussed above in para. 2-6.

The CIT rate is calculated based on the outcome of the financial statements, therefore temporary differences are no longer the basis for accounting for deferred taxes.

CIT returns should be submitted to the tax authorities by the 15th day of the following month.

If a resident enterprise distributes a dividend from a net profit gained during the reporting periods from 1 January 2008 to 1 January 2017, it may offset the amount of profit tax assessed and paid based on the reporting periods.

## BRANCH PROFITS TAX

Corporate tax is levied at a rate of 15% on profits derived through and distributed from a PE. There is no branch remittance tax in Georgia.

## CIT - EXCEPTIONS

Until 1 January 2023, commercial banks, credit unions, insurance and microfinance organisations and loan provider entities will be subject to CIT, based on the difference between gross income gained during a calendar year and deductible amounts under the TCG.

Said companies are subject to a flat 15% tax rate. The tax period for CIT is a calendar year. Annual CIT returns must be submitted to the tax authority by 1 April of the year following the reporting year.

Also, foreign companies which do not conduct economic activities through a PE in Georgia are subject to withholding tax on Georgian-sourced gross income. The tax is withheld by the payer at source and no deductions from the gross income are permitted.

The following types of income are treated as received from Georgian sources:

- Income or benefit earned from the supply of goods within the territory of Georgia;
- Income earned from the delivery of services in Georgia;
- Dividend income from a resident entity;
- Royalty income received from a resident entity;
- Interest income on debt obligations issued by a PE of a foreign company or resident entity;
- Income from immovable property, i.e. arising from the sale of immovable property located in Georgia;
- Some other types of income.

## CAPITAL GAINS TAX

There is no separate capital gains tax legislation in Georgia. Capital gains are subject to regular income tax when they are realised. Unrealised capital gains are not subject to taxation.

## FRINGE BENEFITS TAX

All payments or benefits-in-kind provided by an employer to an employee are taxable unless specifically exempted.

## DEFINED CONTRIBUTION SCHEME

As of 1 January 2019, participation in the defined contribution scheme is required for all employees, except for those who have reached the age of 60 (55 for women) before the law's entry into force.

An employee who has reached the age of 40 before this law's entry into force and does not wish to be a member of the defined contribution scheme may opt out of the scheme in accordance with the procedure determined by this law.

Upon making a salary payment, each employer is obliged to deposit in its own name 2% of the gross salary of each employee who is a member of the pension scheme and another 2% on behalf and at the expense of each employee to their individual pension account via an electronic system (i.e., 4% of the gross salary in total).

The state additionally deposits 1 or 2% of the gross salary, depending on the total annual salary of a scheme member, on the individual pension account of an employee.

## SPECIAL TYPES OF ENTERPRISES

The TCG grants a beneficial tax treatment to:

- Free Industrial Zone (FIZ);
- Special Trading Company (STC); and
- International Company.

## FREE INDUSTRIAL ZONE (FIZ)

FIZ Company status for tax purposes may be granted to a company operating in a Free Industrial Zone.

FIZ is a part of Georgian territory (not less than 10 hectares) with defined boundaries, a special legal status granted under the law, and established for a specific period of time. It may be established at the initiative of the Georgian Government or upon the request of an organiser, resident, or non-resident physical or legal person for land that they own or lease.

Companies registered in FIZ are given the following extended tax benefits:

- Transactions in a FIZ may be conducted in any currency;
- Payment between a FIZ enterprise and a regular Georgian enterprise may also be conducted in any currency;
- Income received by a FIZ enterprise from its permitted activities conducted in a FIZ is exempt from CIT;
- The importation of foreign goods into a FIZ is exempt from customs duties and VAT;
- Operations carried out in a FIZ are exempt from VAT;
- Property located in a FIZ is exempt from property tax;
- Bringing (importing) goods produced within a FIZ from the FIZ into other territories of Georgia (outside the FIZ) is exempt from import tax;
- Entities operating in a FIZ are not required to withhold tax from payments to employees.

Under the FIZ Regulations, all activities are permitted in the FIZ, except:

- Manufacturing or selling weapons and military equipment;
- Manufacturing or selling nuclear and radioactive substances;
- Importing, storage, manufacturing, and/or selling drugs and psychotropic substances, etc.;
- Carrying in, keeping, manufacturing, or sale of raw materials or products of tobacco (except for on-site consumption).

In case of a supply of goods to a Georgian registered entity (except to another FIZ enterprise) a FIZ enterprise is required to pay a 4% tax on revenue received/receivable as a result of the supply of the goods (in case of gratuitous supply – fair value). The tax should be paid before the 15th day of the month following the reporting calendar month. A FIZ enterprise should also pay the 4% tax within the same deadline if a Georgia-registered entity (except FIZ enterprise) supplies a FIZ enterprise with goods (except for electricity, water, and gas for local consumption and production).

A FIZ enterprise cannot purchase services from a Georgia-registered entity (except for a FIZ enterprise) except for:

- Purchasing security services and/or leasing property from the FIZ organiser and/or administrator;
- Purchasing transportation, communication, auditing, consulting, financial, fixed assets installation, and construction services.

## SPECIAL TRADING COMPANY (STC)

A STC is an enterprise that has been granted STC status for the purpose of exemption from CIT envisaged under the TCG.

A foreign entity that renders its economic activities in Georgia through its PE has the right to be granted STC status and register a separate PE only in case the PE renders the activities of a STC envisaged by the TCG.

An enterprise having STC status may:

- Re-export foreign goods from a customs warehouse;
- Supply foreign goods from a customs warehouse both to STCs and other enterprises that do not have the status of a STC;
- Purchase foreign goods from enterprises that do not have a STC status at no less than their customs value for subsequent re-export and/or supply in a customs warehouse;
- A STC may also derive income (including Georgian-sourced income) from other allowable activities if such income does not

exceed the sum of GEL 1 million and 5% of the customs value of foreign goods brought into Georgia;
- A STC may derive income exempt from CIT and from the sale of fixed assets used in economic activities for more than two years.

A STC cannot:
- Import goods into Georgia, other than goods intended to be fixed assets of the company;
- Buy Georgian goods within the territory of Georgia for subsequent supply;
- Deliver services to a Georgian enterprise/individual entrepreneur and/or PE of a foreign enterprise in Georgia;
- Have a customs warehouse.

## INTERNATIONAL COMPANY

An International Company shall be a Georgia enterprise performing activities defined by a government ordinance and earning income solely from these activities. The status of International Company shall be granted to an entity by the Georgia government. Government Ordinance No. 619 provides for a list of permitted activities, which include:
- Software development;
- Information technologies and other computer servicing activities;
- Web-hosting;
- Supply of images, texts and information;
- Certain commercial and technical services rendered by a ship owner or in relation to this ownership.

All aforementioned services must be rendered to non-residents whose place of registration or place of management is outside of Georgia, except for the latter service with respect to ships. In addition:

An International Company may not be set up within a FIZ;
- A dividend paid by an International Company shall not be taxed at source and shall not be included in the gross income of a person receiving the dividend;
- The CIT rate for an International Company shall be 5%;
- Salary income received as a result of employment in an International Company is subject to 5% tax;
- An International Company shall be exempt from property (except for land) tax if that property is intended or used for the performance of activities allowed by the government ordinance.

Furthermore, an International Company has the right to reduce the taxable amount of CIT, provided that the below-mentioned expenses are incurred in Georgia:
- Salaries paid to a Georgian citizen resident employee;
- Expenses of scientific research, design, and construction services, which are permitted for an International Company.

## VALUE ADDED TAX

New VAT regulations came into force as from 1 January 2021. The amendments are designed to fulfil Georgia's obligations under the Association Agreement between Georgia and the EU, which foresees the convergence of Georgian tax legislation with the EU's and other international legal instruments.

Pursuant to the Association Agreement, Georgia's tax legislation must reflect the requirements stipulated in Directive 2006/112/EC of 28 November 2006 of the Council of the EU, relating to the establishment of a common VAT system. The amendments aim to elaborate on certain statutes of the TCG and eliminate legislative gaps.

The amendments affect all clauses in the TCG that regulate VAT and define new terms such as "taxable entity/person", "fixed establishment", "assisting", "directly related", "continuous", "regular and electronically provided services", "voucher", "low-cost gifts", "taxable dealer", "real property", etc.

Said amendments also define different rules for determining "the place of delivering the service", so-called "B2B" (Business to Business) and "B2C" (Business to Consumer):
- Place of supplying services in B2B transactions is the place of incorporation of the person receiving services;
- In a B2C transaction the place of supplying services is the place of incorporation of the supplier.

Transactions subject to VAT are:
- Supply of goods on the territory of Georgia, by a taxable person, in exchange for remuneration within the scope of economic activity;
- Service rendering on the territory of Georgia, by a taxable person, in exchange for remuneration within the scope of economic activity.
- Import of goods.

The standard VAT rate is 18%, which is applied to most goods/services. Certain transactions, however, are exempt from taxation. A taxable transaction occurs at the time of supply of goods/services and in the case of a supply of goods involving loading it takes place at the time of loading.

A business with revenue of at least GEL 100,000 within a preceding consecutive 12-month period must register for VAT purposes. The following VAT-exempt transactions are considered in calculating the GEL 100,000 threshold:
- VAT-exempt transactions related to financial and immovable property transactions, unless connected to taxpayers' primary activities;
- Exports; and
- Certain VAT-exempt supplies with the right to recover input VAT and services rendered to an intermediary acting on behalf of another person participating in certain operations or in operations carried out outside of Georgia.

The GEL 100,000 threshold does not apply to transactions subject to reverse charged VAT.

For VAT registration purposes, for a fixed establishment the law no longer establishes a GEL 100,000 threshold. A taxable person with a fixed establishment in Georgia is obliged to pay VAT from the moment of the provision of services/delivery of goods (including such transactions) and to apply to the tax authority for registration as a VAT payer no later than the last day of the reporting period for the transaction.

Advances received by a supplier of goods/services will also be subject to VAT. As from 1 January 2021, the scope of VAT application on advance payments is expanded. In particular, advances received within the framework of regular or continuous operations will also be subject to VAT payment. Exceptions to the general principles of applying VAT to advance payments are as follows:

- Providing telecommunication/communication services on a regular or continuous basis;
- Supplying goods (electricity, gas, water, heat, cooling system, or other similar goods) on a regular or continuous basis.

The advance received within the framework of rental, consulting, legal, and other similar services will be subject to VAT if these services are provided on a regular or continuous basis. Advances will be taxable only when it is possible to identify:

- The delivered goods/services;
- The quantity and volume of delivered goods/services;
- The cost of delivered goods/services;
- Whether the delivered goods/services are exempt from VAT or are subject to taxation.

VAT returns should be submitted to the tax authorities by the 15th day of the following month.

## FOREIGN TAXABLE PERSONS LIABLE FOR VAT PAYMENT ON DIGITAL SERVICES

The obligation to calculate and pay VAT (without registration as a VAT payer in Georgia) arises as from 1 October 2021 for those foreign taxable persons who are not established or have no habitual residence in Georgia, nor have a fixed establishment in Georgia, and who provide digital services to be used in the territory of Georgia by natural persons who are not taxpayers of VAT.

Digital services include telecommunication services, electronically supplied services, and radio or television broadcasting services.

The reporting period is quarterly. A VAT return on digital services should be submitted with the tax authorities no later than the 20th day of the month following the reporting period.

Tax can be paid in foreign and national currency, in Georgian Lari (GEL), U.S. Dollar (USD) or in Euro (EUR).

In order to report and pay VAT foreign taxable persons must register on the website portal of the Revenue Service of Georgia -”VAT Portal on Digital Services”- https://nr.rs.ge/home

## LOCAL TAXES

Property tax is a local tax administered by local self-government bodies (up to a maximum limit specified within the Tax Code) and comprises land tax and property tax of individuals and enterprises.

## PROPERTY TAX (NATURAL PERSON)

The property tax rate applying to an individual depends on the amount of his annual income, regardless of their tax residency status, from sources in and outside Georgia. The tax is levied on:

- Real estate (including an unfinished construction, building or structure, or a part thereof), yachts (cutters), helicopters, airplanes, and motor cars specified under Code 8703 (National Commodity Nomenclature of Foreign Economic Activities) that are owned by such individual.
- Fixed assets used for economic activities, immovable property (building or a part thereof) and construction in progress (it does not apply to land).
- Property received from a non-resident under a lease agreement.

If gross annual worldwide income of a family exceeds GEL 40,000 but is less than GEL 100,000, the property tax rate ranges from 0.05% to 0.2% of the fair market value of the property in Georgia. However, if gross annual worldwide income of a family exceeds GEL 100,000, the tax rate is between 0.8% and 1% of the fair market value of the property in Georgia. A tax return must be submitted by the natural person (individual or joint of the family) before 1st November following the reporting calendar (tax) year and tax must be paid to the tax authority by 15th November.

Income of a non-resident natural person being a citizen of Georgia shall be determined as per the income received from Georgia-based sources.

## PROPERTY TAX (GEORGIAN ENTERPRISES)

Georgian enterprises and foreign enterprises engaged in economic activity in Georgia through a PE and organisations whose property or part of property is used for economic activity may be subject to property tax. For Georgian enterprises and foreign enterprises alike, property tax is imposed only on property located in Georgia.

Unless specifically exempted, property tax applies at a flat rate of 1% on the average annual net book value of fixed assets, uninstalled equipment, construction in progress, investment property and leased property listed on the enterprise’s balance sheet.

## LAND TAX

Natural and legal persons are subject to land tax if they own land plots or use state owned areas, including land used for agricultural and non-agricultural purposes as of 1 April of the calendar year. The amount of land tax depends on where the land is located and its quality. It is not based on the taxpayer’s economic position.

The base maximum annual rate for non-agricultural land is GEL 0.24 per one square meter of the land and the tax is calculated by multiplying the annual base tax rate by the territorial coefficient, however, a territorial coefficient cannot exceed 1.5.

The annual basic property tax rates on agricultural land and forest land are differentiated according to administrative-territorial units and land categories for 1 ha, in GEL and the tax is calculated by multiplying the annual basic tax rate by the territorial coefficient, which is determined by a decision of the representative body of local self-government. However, such rate shall not exceed 150% of the annual basic rate.

A (natural) person is required to submit an annual tax return by 1 November each year. A legal entity is required to submit an annual tax return by 1 April each year. A (natural) person and legal entity is required to pay property tax for land by the 15 November.

## OTHER TAXES

## CUSTOMS DUTIES

The taxation of the import and export of goods is regulated by the TCG. Customs duties include VAT, Import Duty and Excise Tax.

According to the TCG, the export of goods from the territory of Georgia is exempt from VAT and Excise tax, with VAT and Excise input deduction rights.

## IMPORT DUTY

Rate of customs tax varies depending on the goods imported and equals to 0%, 5% or 12% of the price of goods imported.

## EXCISE TAX

Excise Duty applies to certain goods such as alcoholic beverages, tobacco products, oil and gas, motor vehicles and for international calls received from a resident or a non-resident person in a mobile or fixed network. Excise tax rates are fixed per physical unit of excisable good (1 cigarette, pcs., litre, cm³, m³, kg., ml. etc.) and varies from product to product.

## B. DETERMINATION OF TAXABLE INCOME

## FOR ENTERPRISES THAT HAVE NOT YET MOVED TO THE NEW CORPORATE INCOME TAX MODEL

Generally, expenses connected with earning gross income can be deducted to arrive at the net taxable income. Therefore, expenses not connected with the economic activities of an entity such as personal expenses and entertainment expenses are not deductible (unless entertainment is the taxpayer's economic activity).

Any limitations or restrictions relating to certain expenses or deductions which otherwise would be deductible in full, are provided within the TCG. Restrictions, conditions and limitations can apply e.g., to the deduction of interest, doubtful debts, repairs, insurance payments and reserve funds, scientific research expenses, depreciation of fixed and intangible assets.

## LOSSES

Georgian legal entities can carry forward tax losses and offset them against future taxable profits arising in the following five years. Where the statute of limitation is increased from 3 to 11 years a taxpayer can elect a 10-year loss carry forward period. Losses cannot be carried back.

The statute of limitation for assessing taxes on a taxpayer and for submitting a notice of assessment to the taxpayer shall be three years (effective from 2017), unless otherwise provided for by the TCG.

If the CIT is paid only on distributed profit under the new CIT regulations, losses cannot be used to reduce taxable profit.

## CAPITAL ALLOWANCES

The general rules for the operation and deduction of tax depreciation are provided within the TCG and they provide a taxpayer with the option to either deduct tax depreciation on fixed assets over a period of time or deduct 100% of the purchase (production) cost of the asset immediately. Whatever option is selected by a taxpayer, it should be consistently followed for the following five years and applied to all purchased, produced or leased fixed assets.

Tax depreciation allowances can generally be claimed for all capital assets, including fixed and intangible property, except for land, art (such as paintings, jewellery, and antiques), historical objects (except for buildings), biological assets, museum items, and any other assets that are not subject to wear and tear. Fixed assets costing below GEL 1,000 are not subject to tax depreciation but can be deducted in full against the gross income of the accounting year of purchase or production.

Fixed assets are categorised into five groups and the rate of tax depreciation applying to each group is shown below. Please note that tax depreciation is charged individually on buildings and structures as each building or structure is effectively considered as a separate group.

| Group | Types of Fixed Assets | Rate (%) |
|---|---|---|
| 1 | Motor cars; motor-and-tractor equipment for the use on roads; office furniture, movable parts of motor transport; trucks, buses, special motor vehicles and trailers; machinery and equipment for all sectors of industry and the foundry industry; black smith and pressing equipment; construction equipment; agricultural vehicles and equipment. | 20 |
| 2 | Special tools, stock and equipment; computers, peripheral devices and equipment for data processing; electronic devices. | 20 |
| 3 | Railway, maritime and river transport vehicles; power vehicles and equipment; thermos-technical equipment turbine-powered equipment; electric engines and diesel generators; electricity transmission and communication facilities; pipelines. | 8 |
| 4 | Building and structures. | 5 |
| 5 | Assets subject to depreciation not included in other groups. | 15 |

The expenses of an intangible asset can be written off for depreciation (amortisation) over their limited useful life and recorded as a separate group for this purpose. If it is not possible to determine the useful life of an intangible asset it should be depreciated at the rate of 15%.

## INTEREST DEDUCTIONS

Where a taxpayer incurs interest in the course of its business activities it is generally deductible subject to certain limitations. Where the interest paid and/or payable (using the accruals method) does not exceed 24% of the credit (loan) per annum, it is deductible.

## C. DIVIDENDS

Dividends paid to resident companies are not subject to withholding tax and are not included within the taxable income of the recipient resident company.

Dividends paid to resident and non-resident individuals, organizations and non-resident companies are subject to withholding tax. Where a resident natural person/non-entrepreneurial (non-commercial) legal entity receives dividends that have been taxed at source, they will not be subject to further taxation and will therefore be excluded from the taxable income of the recipient.

Dividends distributed by a FIZ Enterprise or an agricultural cooperative (until 1 January 2023) are not subject to withholding tax and are not included in the taxable income of the recipient. Also, dividends paid to the State by a resident enterprise shall not be taxed at source.

## D. FOREIGN TAX RELIEF

Where income from a foreign source has been subject to overseas tax a credit for the overseas tax paid is available. Therefore, the maximum relief available is only up to the amount of the tax that would be payable on the foreign income in Georgia. In order to support the foreign tax relief claim, supporting evidence of the overseas tax paid should be made available to the Georgian Tax Authority.

## E. CORPORATE GROUPS

Companies must file individual tax returns and report their taxes separately. Consolidated tax returns are not permitted. Branches and other units of Georgian companies do not file separate returns or pay CIT independently. They consolidate their taxable profit (or loss) within the main company, which pays corporate income tax on the total taxable profit.

## F. RELATED PARTY TRANSACTIONS

Georgian tax legislation contains transfer pricing (TP) regulations, which generally follow OECD TP principles. Georgia is not a member of the OECD, but local TP regulations follow OECD Guidelines and the matters that are not covered by Georgian tax legislation shall be regulated by the OECD Guidelines.

TP rules became effective on 1 January 2011 and are applicable to companies, which have carried out transactions with non-resident related entities (also PEs) and/or entities registered in preferential tax jurisdictions. For purposes of Georgian TP regulations, the following entities are related:

- One party directly or indirectly participates in the management, control or capital of the other party;
- The same parties directly or indirectly participate in the management, control or capital of two parties.

Georgian TP legislation determines five TP methods: (i) Comparable Uncontrolled Price Method (ii) Cost-Plus Method (iii) Resale Price Method (iv) Transactional Net Margin Method, and (v) Profit Split Method.

Income and expenses between related parties must adhere to the principle of fair market value. Where possible, the tax authority will compare the cost of related-party transactions with the cost of similar transactions between unrelated parties.

If the taxpayer receives an official request from the tax authority to prepare TP documentation, the taxpayer is obligated to provide full TP documentation within 30 days from the official request.

Market price principles are used for internal transactions carried out between related parties, except where the existence of related parties does not affect the result of such a transaction.

## G. WITHHOLDING TAX

Foreign companies that do not conduct economic activities through a PE in Georgia are subject to withholding tax on Georgia-sourced gross income without deductions. However, with respect to non-resident taxpayers receiving certain types of income, the TCG allows them to file a tax return and claim any allowable deductions.

The following withholding tax rates apply to Georgia-sourced income of non-residents where such income is not attributable to any PE of the non-resident in Georgia:

| Income from Georgian Sources | Tax Rate |
|---|---|
| Dividends | 5% |
| Interest | 5% |
| Oil and gas subcontractors | 4% |
| International telecommunication and transportation services | 10% |
| Royalties | 5% |
| Management fees | 10% |
| Income received in the form of wages | 20% |
| Payments to non-residents in respect of other Georgian-source income not connected to their PE in Georgia | 10% |

- Where a non-resident is registered in a preferential or zero/low tax jurisdiction, royalty, interest, management, and other service fee payments will be subject to withholding tax at the rate of 15%;
- Royalties paid by a non-resident's PE or by a resident to a resident natural person (other than a natural person registered as a VAT payer) are subject to withholding tax at the rate of 20%;

- In accordance with the TCG, interest earned from a licensed financial institution is not taxed at source. Such interest is not included in gross income unless the recipient of the interest is a licensed financial institution;
- Interest paid by a resident enterprise to the State is not taxed at source;
- Interest earned from debt securities issued by a Georgian enterprise and listed on a recognised stock exchange of a foreign country is not taxed at source and is not included in gross income;
- Interest earned from a FIZ Enterprise in a FIZ is not taxable at source and is not included in gross income.

## H. PERSONAL INCOME TAX

Individual residents in Georgia are subject to personal income tax (PIT) on their worldwide income (but are exempted for income received which is not Georgian-sourced), whereas non-residents are subject to PIT on Georgia-sourced income only, subject to double tax treaty relief. An individual is a resident of Georgia for PIT purposes if they are present in Georgia for more than 183 days in any consecutive 12-month period ending in a tax (calendar) year.

PIT is levied on salaries and any other compensation paid to employees including benefits-in-kind, subject to certain exceptions. PIT is deducted at source from an employee's salary by an employer. PIT returns should be submitted to the tax authorities by the 15th day of the following month.

Tax is levied on the annual income of an individual entrepreneur, which consists of gross income less the relevant expenses from earning that gross income (except for non-deductible or partially non-deductible expenses).

Unless other rates apply (e.g., for interest and dividends), the income of an individual is taxed at the flat rate of 20%.

Annual PIT returns must be submitted to the tax authority by 31 March of each year. There is no liability to social security payments on income paid or received by employers, employees or individual entrepreneurs. Similarly, there is no inheritance tax or wealth tax in Georgia.

Individuals may obtain the special status of micro-business or small business and fixed taxpayer. Upon obtaining these statuses they become eligible for certain simplified accounting rules and tax benefits.

### MICRO BUSINESS

The status of a micro-business may be granted to a natural person who does not use hired labour and conducts economic activities independently, the gross receivable income from which during a calendar year does not exceed GEL 30,000.

Currency operations, medical, architectural, legal, audit, and similar activities, as well as gambling businesses are prohibited.

A natural person having the status of a micro business shall not pay income tax. A natural person having the status of micro-business shall file a tax return before 1 April of the year following a tax year.

### SMALL BUSINESS

The status of a small business may be granted to an entrepreneur natural person. Gross income of an entrepreneur natural person having the status of a small business received during a calendar year may not exceed a GEL 500,000 threshold.

Currency operations, medical, architectural, legal, audit, and similar activities, as well as gambling businesses and production of excisable goods are prohibited.

Income earned from activities like renting/leasing property, lending, income received from loans, gifts, income received in the form of dividends, royalties, and also income received in the form of interest shall be taxed as per the common tax rules.

Taxable income of a person having the status of a small business shall be taxed at 1% of his/her gross income (without deductions), except if his/her gross income received from the economic activities has exceeded GEL 500,000, in which case the tax rate will be 3%.

A tax return of a person having the status of a small business shall be filed with and tax due shall be paid to the tax authority no later than the 15th day of a month following the accounting month.

### FIXED TAXPAYER

The status of a fixed taxpayer may be granted to a natural person who simultaneously meets the following conditions:

- Is registered as an individual entrepreneur;
- Is not a VAT payer; and
- Carries out one or more activities subject to taxation at a fixed tax, e.g. the supply of goods produced/to be produced in a bakery, hairdresser, hair correction, make-up, solarium, and car workshop.

A flat tax rate according to the types of activity determined by the government may be:

- From GEL 1 to GEL 2,000 where the exact fixed rate is set by the government for each type of activity;
- 3% of total income generated from taxable activities.

Income earned from carrying out additional activities not subject to fixed tax but allowable by the government is subject to tax as per the common rules.

## I. TREATY AND NON-TREATY WITHHOLDING TAX RATES

| Country | PE (months) | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|---|
| Armenia | 6 months | 5/10[12] | 10 | 5 |
| Austria | 6 months | 0/10[1] | 0 | 0 |
| Azerbaijan | 6 months | 10 | 10 | 10 |
| Bahrain | 6 months | 0 | 0 | 0 |
| Belarus | 12 months | 5/10[11] | 5 | 5 |

NOTES:

1. The 0% rate applies where the beneficial owner of the dividends is a company (other than a partnership) which holds at least 10% of the capital of the distributing company.
2. The 0% rate applies where the beneficial owner of the dividends is a resident of UK except beneficial owner of the dividends is a pension scheme, where dividends are paid out of income derived directly or indirectly from immovable property (within the meaning of Article 6 of the Treaty) by an investment vehicle which distributes most of this income annually and whose income from such immovable property is exempted from tax.
3. The 0% rate applies where the beneficial owner of the dividends is a company (other than a partnership that is not liable to tax), which has held directly at least 25% of the capital of the distributing company for an uninterrupted period of at least 12 months prior to the decision to distribute the dividends.
4. The 0% rate applies where the beneficial owner of the dividends is a company which has invested more than USD 3 million (or its equivalent in local currency) in the capital of the distributing company.
5. The 0% rate applies where the beneficial owner of the dividends is a company (other than a partnership) which holds at least 10% of the capital or the voting power of the distributing company.
6. The 0% rate applies where the beneficial owner of the dividends is a company (other than a partnership) which holds at least 50% and has invested more than EUR 2 million (or the equivalent in Georgian currency) in the capital of the distributing company. The 5% rate applies where the beneficial owner of the dividends is a company (other than a partnership) which holds at least 10% and has invested more than EUR 100,000 (or its equivalent in the Georgian currency) in the capital of the distributing company.
7. The 0% rate applies where the beneficial owner of the dividends is a company which holds at least 50% and has invested more than EUR 2 million (or its equivalent in the Georgian currency) in the capital of the distributing company. The 5% rate applies where the beneficial owner of the dividends is a company which holds at least 10% and has invested more than EUR 100,000 (or its equivalent in the Georgian currency) in the capital of the distributing company.
8. The 0% rate applies where beneficial owner of the dividends is a company which holds at least 50% and has invested more than EUR 3 million (or its equivalent in local currency) in the capital of the distributing company. The 5% rate applies where the beneficial owner of the dividends is a company which holds at least 10% and has invested more than EUR 100,000 (or its equivalent in local currency) in the capital of the distributing company.
9. The 0% rate applies where the beneficial owner of the dividends is a company which holds at least 50% and has invested more than USD 2 million (or the equivalent in Euro or Georgian currency) in the capital of the distributing company. The 5% rate applies where beneficial owner of the dividends is a company which holds at least 10% in the capital of the distributing company.
10. The 5% rate applies where the beneficial owner of the dividends is a company (other than a partnership) which holds at least 25% and has invested more than USD 75,000 in the capital of the distributing company.
11. The 5% rate applies where the beneficial owner of the dividends is a company (other than a partnership) which holds at least 25% of the capital of the distributing company.
12. The 5% rate applies where the beneficial owner of the dividends is a company which holds at least 25% of the capital of the distributing company.
13. The 5% rate applies where the beneficial owner of the dividends is a company (other than a partnership) which holds at least 10% of the capital of the distributing company.
14. The 5% rate applies where the beneficial owner of the royalties is an enterprise which is resident of the other Contracting State (not in which royalties arise).
15. The 5% rate applies if royalties are paid for the use of, or the right to use industrial, commercial, or scientific equipment.
16. The 0% rate applies where:
    - The beneficial owner of the interest is the State of Japan, a political subdivision or local authority thereof, the central bank of Japan or any institution wholly owned by Japan or a political subdivision or local authority thereof; or
    - The beneficial owner of the interest is a resident Japan with respect to debt-claims guaranteed, insured, or indirectly financed by Japan, a political subdivision or local authority thereof, the central bank of Japan or any institution wholly owned by Japan or a political subdivision or local authority thereof.
17. The 0% rate applies if the dividends/interest are paid to (i) the Government of the Hong Kong Special Administrative Region (ii) the Hong Kong Monetary Authority (iii) the Exchange Fund (iv) any entity wholly or mainly owned by the Government of the Hong Kong Special Administrative Region as may be agreed from time to time between the competent authorities of the Contracting Parties.
18. Effective date: 1 January 2022.

### Multilateral Tax Convention (MLI)

On 7 June 2017, Georgia signed the “Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting” (MLI). The Multilateral Instrument was ratified by the Parliament of Georgia on 27 December 2018 and the instrument of ratification has been deposited with the OECD secretariat.

The primary purpose of the Multilateral Convention is to implement BEPS treaty-related measures, in particular minimum standards under BEPS Action 5, 6, 13 and 14, in treaties for the avoidance of double taxation. Georgia introduced the minimum standard of the 5th and 6th BEPS action.

The MLI will cover and amend respectively 34 out of 57 agreements on the avoidance of double taxation concluded by Georgia.

## KEY TAX POINTS

- Companies resident in Germany are subject to tax on all of their income. Non-resident companies are subject to tax on German-source income.
- Business enterprises operating in Germany are also subject to a trade tax on business income, as assessed by each municipality.
- There is no separate capital gains tax for enterprises - broadly, capital gains from business assets are taxed at the ordinary tax rate. Capital gains realised by a corporate shareholder on the sale of shares held in an enterprise are almost tax free.
- VAT is applied on the supply of goods and services in Germany by a taxable person, subject to exemptions.
- Profits of foreign companies may be attributed to German shareholders under a controlled foreign companies (CFC) regime.
- A transfer pricing regime imposes record-keeping requirements and provides for income to be adjusted on an arm's length basis.
- Capital gains realised by individuals or partnerships are added to annual income, subject to a 40% participation exemption on the sale of shares held as business assets. Roll-over relief may be available where gains are reinvested in shares.
- Dividends paid to residents and non-residents are subject to a 25% withholding tax, although this is reduced to nil in certain circumstances under the EC Parent/Subsidiary Directive or a Double Tax Treaty.
- Both personal and corporate income taxes carry a surcharge at the rate of 5.5% of the tax. The surcharges on personal income tax will only be levied on income above a certain threshold (taxable income exceeding EUR 62,127 per annum) and on capital gains.
- Income tax is payable by German resident individuals on their worldwide income. Non-resident individuals are only required to pay tax on German-sourced income.
- Assets transferred by gift or inheritance are subject to tax. Other taxes include an annual real estate tax, an insurance tax and a church tax.
- There is a reporting obligation for intermediaries and taxpayers for reportable cross-border arrangements (Germany's national transposition of the EU-Directive (DAC 6)).

G

## A. TAXES PAYABLE

## FEDERAL TAXES AND LEVIES

### COMPANY TAX

German-resident companies are subject to tax on their worldwide income. Non-resident companies are required to pay tax in various forms on income derived from German sources. Resident companies are those that are incorporated in Germany or have their place of management and control in Germany.

The corporation tax rate is 15%. In addition, a solidarity surcharge is levied at the rate of 5.5% of the corporation tax. The tax year in Germany is the calendar year. Companies are required to make quarterly prepayments of tax based on the previous year's income.

The corporate income tax returns shall be submitted by 31 July of the subsequent year and returns shall be prepared by a tax consultant by 28/29 February of the year after the subsequent year. Tax balance sheets have to be handed in electronically following a special tax account mapping. The commercial balance sheet must be published in the Federal Gazette by December 31 of the following year.

From 2022 onward, it will be possible to apply for partnerships to be taxed in the same way as corporations. The taxable income will no longer be taxed at the personal tax rate at the level of the partner, instead it will be taxed at the corporate income tax rate of 15%. For this change of legal form for tax purposes, lock-up periods must be observed. Unrealised gains in the special business assets (operating assets of the company owned by the partners) may be taxed if they are not transferred to the partnership.

### TRADE TAX

Trade tax is applied only to business income. All business enterprises operating in Germany are subject to this tax. The trade tax rate is assessed independently by each municipality. The effective tax rates in relevant municipalities range from 8.75% to 20.30%. Individuals may deduct trade tax as a block credit to a certain extent (up to 14.00 %) against individual income tax. No tax relief by deduction or credit is available to companies. The tax base may differ from the corporate tax base.

### CAPITAL GAINS TAX

There is no special or separate capital gains tax. For privately held shares a flat withholding tax of 25% plus solidarity surcharge of 5.5% of the tax due applies (for details see below under 'Capital gains and losses').

### BRANCH PROFITS TAX

There is no separate branch profits tax in Germany. Trading profits and capital gains of a German branch of a foreign company are calculated and taxed on the same basis as those of a German resident company.

### SALES TAX / VALUE ADDED TAX (VAT)

This is a tax on the supply of goods and services, other than exempt supplies and services, rendered in Germany by a taxable person. The tax rates are as follows:

- Standard rate: 19%;
- Reduced rate: 7%.

### FRINGE BENEFITS TAX

For some services provided to its employees (e.g. canteen food, office outings, transportation of employees, accident insurances and payments to retirement funds), the company has the option to pay the income tax on account for the employee. The tax is paid at a flat tax rate which varies depending on the service provided, from 15% to 30% of the given value.

## OTHER TAXES

In Germany a net wealth tax is not levied. Other taxes include real estate transfer tax (RETT) at a rate of 3.5% to 6.5% and insurance tax (excluding life insurance and private medical insurance) at 19%. RETT is not only due on the transfer of real estate but may also apply in cases of a transfer of shares in companies owning real estate. Certain exemptions for RETT on intra-group restructurings may apply.

Property owners have to pay property tax on their land on an annual basis. The Real Property Tax Law was recently changed so that, among other things, a tax declaration must be submitted for real property in the period between 1 July 2022 and 31 October 2022 to assess new real property values. The real estate tax under the new law and based on the new real property values will arise from 2025.

## B. DETERMINATION OF TAXABLE INCOME

The taxable income of a company is determined by ascertaining assessable income and then subtracting all allowable deductions. Business expenses are generally deductible for tax purposes, although there are some exceptions such as entertainment expenses which are only 70% deductible. Special rules apply in respect of the categories listed below.

## DEPRECIATION

Tangible fixed assets, other than land, are written off over their estimated useful lives at rates prescribed by the tax law or an administrative regulation. Generally the straight-line method of depreciation is used. In case of a long-term devaluation of assets, an extraordinary depreciation is allowed. Movable fixed assets acquired or manufactured after 31 December 2019 and before 1 January 2022 may be depreciated at 2.5 times of the straight-line method but not more than 25% (degressive depreciation). Assets with purchase costs from EUR 250 to EUR 1,000 exclusive of VAT can be pooled every year. The pool for each year has to be written off in five years. Taxpayer may elect for an immediate write-off of goods with a value of less than EUR 800. Good with a value of less than EUR 250 are written off immediately. In addition, as of assessment year 2021 onwards, it will be possible to depreciate certain computer hardware and software over a standard useful lifetime of only one year.

G

## STOCK/INVENTORY

Inventory includes raw materials, work-in-progress, finished goods and payments on account. Each item of inventory must be valued at acquisition cost or cost of production. Accepted valuation methods include ‘last in, first out’ (LIFO) and average cost.

## CAPITAL GAINS AND LOSSES

In principle, capital gains from business assets are taxed at the ordinary tax rate. Profits on the sale of land and buildings may be reinvested tax-free (roll-over relief). Where the shareholder is a corporation, capital gains relating to the sale of shares held in an enterprise (German or foreign) are tax-free. Correspondingly, a write-down of participation does not have tax consequences. Losses arising from the sale of such a stake will not be recognised. However, a lump sum of 5% of the gains is added back to taxable income representing non-deductible business expenses.

Where the shareholder is an individual or a partnership, capital gains arising from the sale of shares held as business assets are taxable, but only 60% of the capital gain is added to the individual’s/partner’s annual gross income. The remainder is tax-free (40% participation exemption). Correspondingly, only 60% of the losses are deductible. Capital gains realised by partnerships may be tax-free if reinvested in shares within two years (roll-over relief).

Where the shareholder is a private individual, capital gains arising from the sale of privately held shares bought after 31 December 2008 are subject to a 25% flat withholding tax plus a solidarity surcharge of 5.5% of the tax due if the participation is below 1%. Capital gains arising from the sale of privately held shares bought before 31 December 2008 are generally not taxed. If the participation is 1% or more, the rules for shares held as business assets apply. Losses from the sale of privately held shares may be deducted only from gains arising on privately held shares. Non-deductible losses may be carried forward. From 1 January 2020, there is a loss deduction limitation of EUR 20,000 per calendar year for futures and options and in the event of unrecoverable capital claims.

Capital gains arising from the sale of other privately held movable assets are not taxed unless the assets are sold within one year. Capital gains arising from the sale of privately held land and buildings are not taxed unless the assets are sold within ten years.

## DIVIDENDS

Dividend income is subject to 25% withholding tax plus a solidarity surcharge of 5.5% of the tax due. The withholding tax rate may be reduced in accordance with tax treaties or EU regulations (Parent-Subsidiary Directive).

Where the shareholder is a corporation, the dividend income is tax-free (100% participation exemption). However, a lump sum of 5% of the gross dividends is added back to taxable income representing non-deductible business expenses, irrespective of the actual expenses incurred by the company. This applies to dividends received from both German and foreign enterprises. To qualify for the above-mentioned tax exemption, a minimum participation of 10% for corporate tax purposes (trade tax: 15%) as per the beginning of the calendar year is required.

Where the shareholder is a partnership, only 60% of the dividend income is added to the partner’s annual gross income. The remainder is tax-free (40% participation exemption). Correspondingly, only 60% of the expenses directly connected to the dividend are deductible. A resident taxpayer may credit the withholding tax which has been deducted by the corporation against his own individual tax liability. Corporation tax cannot be credited against the individual tax.

Where the shareholder is an individual, dividends are subject to a 25% flat withholding tax plus a solidarity surcharge of 5.5% of the tax due. However, if the withholding tax rate exceeds the marginal income tax rate of the shareholder, the shareholder may opt to report the dividend in his income tax return instead. Economically connected expenses such as financing fees are not deductible.

## INTEREST DEDUCTIONS

Interest is deductible to the extent that it is payable on credits raised to generate taxable income. Where interest is paid in order to finance a participation in another company, the above mentioned special provisions concerning business expenses which are directly related to tax-free dividends apply.

In order to combat abusive transfers of profits, an “interest barrier” limiting the deductibility of interest payments as business expenses has been introduced. Interest payments are generally deductible if they do not exceed interest income for the period. The excess amount is only deductible up to 30% of EBITDA as defined for tax purposes. An ‘exemption threshold’ for interest payments of less than EUR 3,000,000 per annum applies. An EBITDA carry-forward mechanism also exists.

The interest barrier is only applicable to companies belonging to a group. Such a group is deemed to exist if a German company may be consolidated with other companies. The interest barrier does not apply to companies that are part of a group if, under IFRS, the ratio of equity to total assets of the company is equal to or higher than the ratio of equity to total assets for the group as a whole. In addition, a shortfall of up to 2% compared to the group ratio is permissible. This escape clause will not be applicable for corporations if more than 10% of the interest expenses are on related party debt, i.e. to shareholders with participations of 25% or more.

Whether the interest barrier is in line with the constitution is currently under review by the constitutional court.

## LOSSES

In the year in which losses are incurred, they may, in principle, be deducted without restrictions. Remaining losses may basically be carried back to the preceding accounting period up to an amount of EUR 1 million. For assessment periods 2020 and 2021 the amount of losses that can be carried back has been increased to EUR 10 million (EUR 20 million in case of joint assessment) to mitigate the consequences of the Corona crisis for companies.

G

Excess losses may be carried forward indefinitely to future years. However, in each future year, the deduction must not exceed EUR 1 million. Profits in excess of this threshold may be set off only to an amount of 60% against a loss carry-forward. Loss carry-forwards may be forfeited as a result of share transfers or corporate restructurings if these measures affect more than 50% of the shares within a 5 year period. Special rules apply for trade tax purposes.

In the case of spouses who are jointly assessed for income tax, double amounts apply (EUR 20 million, EUR 2 million).

## FOREIGN SOURCED INCOME

Foreign sourced income is generally taxable. In addition, Germany has a controlled foreign company (CFC) regime. Its objective is to ensure that profits of German controlled companies are not transferred to, or generated in, low tax jurisdictions. A low tax jurisdiction is deemed to be any country which taxes income at a rate of less than 25%. Where German residents hold more than 50% of the shares or the voting rights of an intermediate corporation with passive income, the income is deemed to be distributed to the German shareholders and taxed at their level if the intermediate corporation is located in a low tax jurisdiction. Under certain conditions, a participation of 1% in the foreign intermediate corporation is sufficient to trigger the CFC taxation.

Profit distributions by corporations and capital gains arising from the sale of these participations are deemed to be active income. Income derived by foreign holding companies is thus effectively exempt from CFC tax.

Since June 2021, the EU Anti-Tax Avoidance Directive (ATAD) has been transposed into domestic law. This has reformed the taxation of the transfer of profits and the taxation of income and exit taxation.

In addition, regulations were created to prevent operating expenses from being taken into account more than once in connection with hybrid arrangements.

## INVESTMENT ALLOWANCE/INCENTIVES

Qualifying investment aids are tax-free and available in selected areas from local authorities for the improvement of the regional economic structure. Investment grants are provided by the tax authorities for the acquisition of new buildings or depreciable, new movable assets in the new federal states. The possibilities for special depreciation in connection with certain investments were expanded in 2020 for small and medium-sized companies. Currently, a special depreciation is granted - subject to certain conditions - for newly built or acquired rental apartments, provided, among other things, that the building application is still submitted in 2021.

## C. FOREIGN TAX RELIEF

Even in the absence of a double tax treaty, foreign tax on income derived by a German resident may be credited against his income or corporation tax liability. The tax relief must not exceed the German tax charged on the same profits. Alternatively, the foreign tax may be deducted from the income of the German resident.

## D. CORPORATE GROUPS

Profits and losses of German group companies may be pooled for corporate tax and trade tax purposes, if the requirements of the so-called ‘Organschaft’ are met. The controlling company must hold, directly or indirectly, the majority of the shares of the controlled company and there must be a profit and loss pooling agreement between the two companies.

## E. RELATED PARTY TRANSACTIONS

Inter-company pricing between affiliated companies must be carried out on an arm’s length basis. If this is not the case, the income of both companies is adjusted for tax purposes. Arbitration proceedings are available within the European Union. Legislation is in force that specifies the duty to document the way in which a taxpayer arrives at the transfer prices on transactions with foreign closely related persons/enterprises. The documentation must encompass the nature and contents of the business relationship and the economic and legal basis underlying the arm’s length prices. Specific legislation applies to a “transfer of functions” between intra-group companies.

## F. WITHHOLDING TAX

Under domestic law, all dividends, regardless of whether they are paid to a resident or a non-resident, are subject to a 25% withholding tax plus a solidarity surcharge of 5.5% of the tax due as a flat tax. This is reduced to nil in the case where the shareholder satisfies the conditions of the EU Parent Subsidiary Directive (broadly that the shareholder is an EU resident company with a 10% or more interest in the company paying the dividend).

Interest is subject to 25% withholding tax plus a solidarity surcharge of 5.5% of the tax due if it is paid to a resident. Interest paid to a non-resident is not subject to withholding tax. Royalties paid to a non-resident are subject to 15% withholding tax plus a solidarity surcharge of 5.5% of the tax due. Certain German double tax treaties provide for an exemption or a reduced rate (see below).

## G. EXCHANGE CONTROL

There are no exchange control requirements.

## H. PERSONAL TAX

Income tax is payable by German resident individuals on their worldwide income. Non-resident individuals are only required to pay tax on German-sourced income. Individuals are deemed resident if they have a residence in or their customary place of abode is in Germany. The latter is generally the case if the continuous stay lasts more than six months while short-term interruptions are not taken into account.

Income tax is payable on assessable income less allowable deductions. Assessable income includes business income, income from agriculture and forestry, income from self-employment, income from employment, certain capital gains, capital investment income, and rental and royalty income. Allowable deductions include personal allowances, deductions for business/professional expenses and contributions to specified (insurance) bodies.

Tax instalment payments are withheld from employees' salaries by their employers. Self-employed individuals and those with non-salary income have to pay instalments on a quarterly basis with reference to the income realised in the previous year. The tax rates effective for single taxpayers in the tax year 2022 are as follows:

| Annual taxable income (EUR) | Marginal rate (%)* | Tax payable (EUR) |
|---|---|---|
| Up to 9,984 | Nil | 0 |
| 9,985 to 14,926 | 14 - 24 | 0 - 938 |
| 14,927 to 58,596 | 24 - 42 | 938 – 15,342 |
| 58,597 to 277,825 | 42 | 15,342 – 107,418 |
| More than 277,826 | 45 | From 107,418 |

* = without solidarity surcharge of 5.5 % of payable income tax.

The highest tax rate is 45% for taxable income of individuals that exceeds EUR 277,825 (EUR 555,650 for married couples). Retained profits from a trade or business, agriculture or self-employment generated by individually-owned firms or partnerships are taxable upon application at a reduced tax rate of 28.25%. When profits are withdrawn, the amount withdrawn is subject to a further tax charge (tax rate 25%) in the assessment year of the withdrawal but is reduced by taxes already paid on the profits distributed.

Interest and dividend income is subject to a 25% flat withholding tax plus solidarity surcharge of 5.5% of the tax due only. Expenses connected with the receipt of investment income are not deductible but a lump sum of EUR 801 can be deducted. The shareholder may opt to report the interest in his income tax return if the withholding tax rate exceeds his marginal income tax rate. If the taxpayer is married, the income of the taxpayer can be combined with the income of the spouse. Then the tax on 50% of the combined income is doubled correspondingly. In addition to the personal income tax, a solidarity surcharge is levied at the rate of 5.5% of personal income tax, if the income exceeds a certain taxable income or is subject to flat withholding tax.

Social security contributions are withheld from employees' salaries and wages. The employer and employee each generally contribute 50% of the total social security contributions. Members of the Roman Catholic, German Protestant, Lutheran and Jewish churches have to pay church tax. The tax rate amounts to about 8% or 9% of the annual income tax liability and varies according to the district of residence. It is a deductible expense for income tax purposes. Assets transferred by gift or inheritance are subject to tax. If either the transferor or the recipient is resident in Germany, all transferred assets are taxed wherever situated. If neither party is a German resident, the tax is limited to property located in Germany. The Federal Republic of Germany keeps tax treaties with six countries for these purposes: Denmark, France, Greece, Sweden, Switzerland and USA

The tax rates and exemptions for Inheritance and Gift Tax vary according to the relationship between the transferor and the recipient and the value of the assets. Where children or the spouse are the recipients, the rates range between 7% (where the assets have a value of EUR 75,000 or less) and 30% (where the assets have a value of more than EUR 26,000,000). The rates for brothers and sisters vary between 15% and 43%. If the transferor and the recipient are unrelated, the rates vary between 30% and 50% respectively. The spouse of the transferor is granted a personal allowance of EUR 500,000 and the children of the transferor are granted an allowance of EUR 400,000.

## I. TREATY AND NON·TREATY WITHHOLDING TAX RATES

| | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| Non-treaty countries | 25 | 0/25[13] | 0/15[14] |

NOTES:

1. Lower rate applicable where recipient holds an interest of at least 25%.
2. Lower rate applicable where recipient holds an interest of at least 20%.
3. Lower rate applicable where recipient holds an interest of at least 10%.
4. Lower rates applicable where recipient holds an interest of at least:
   a. 25% or 70% (Vietnam; Philippines); or,
   b. 15% (Venezuela).
5. The tax rates vary with the nature of the royalty/dividend.
6. The dividend is tax free within the EC where the recipient corporation holds an interest of at least 10% (Parent/Subsidiary EC Directive and domestic law).
7. The 5% rate applies where the dividend is paid to a company which holds directly at least 10% and has invested more than EUR 100,000 in the capital of the distributing company. The 0% rate applies where the dividend is paid to a company which holds directly at least 50% and has invested more than EUR 3 million in the capital of the distributing company.
8. The Treaty between Germany and ex-Yugoslavia is still applicable.
9. Lower rate applicable where the recipients holds an interest of at least 10% for at least 6 months.
10. Dividends are paid from income or proceeds derived earned directly or indirectly from immovable assets.
11. Only for real estate investment companies.
12. Income as a silent partner.
13. Interest payments to non-residents are generally not subject to withholding tax. However, withholding tax is imposed on interest from convertible bonds, profit-sharing bonds, participation loans, as well as income from the participation of silent partners in a trade or business. The rate is 25% (26.375% including the 5.5% solidarity surcharge). Under German domestic tax law implementing the provisions of the EU Interest and Royalties Directive (2003/49), interest and royalty payments are exempt from withholding tax, provided that the recipient is an associated company of the paying company and is a resident in another EU Member State or such a company's permanent establishment situated in another Member State. Two companies are associated companies if (i) one of them has a direct minimum holding of 25% in the capital of the other or (ii) a third company has a direct minimum holding of 25% in the capital of two companies.
14. Royalties paid to non-residents are subject to a 15% withholding tax rate (15.825% including the 5.5% solidarity surcharge). For a 0% rate under the application of the Interest and Royalties Directive (2003/49), see footnote 13.

## BASIC FACTS

| | |
|---|---|
| Full name: | Republic of Ghana |
| Capital: | Accra |
| Main languages: | English, African languages including Akan, Ewe, Ga |
| Population: | 32.27 million (2022 estimate) |
| Monetary unit: | Ghanaian New Cedi (GHS) |
| Internet domain: | .gh |
| Int. dialling code: | +233 |

## KEY TAX POINTS

- The assessment period in Ghana is the calendar year (i.e. January to December). Companies and bodies of persons are allowed to choose their accounting year.
- Companies that are resident in Ghana are liable to income tax on income earned domestically and from foreign sources. Tax credit from foreign sources is allowable as tax credits domestically.
- Non- resident companies are liable to tax only on income with a source in Ghana.
- Companies deemed as permanent establishments are liable to tax on all source of taxable income.
- The basis of assessment is the net profit of the companies. This is adjusted by tax laws to arrive at the chargeable income.
- Repatriated branch profit is taxable at 8%.
- There is no separate rate for capital gains and gifts for companies. Income from the realisation of assets is subsumed in corporate income for tax purpose. Individuals may however opt for a rate of 15%.
- Local production and importation of goods and services attract VAT. Businesses with annual income of GHS 200,000 or more are required to register and charge VAT. There is no obligation to register if you deal in exempt supplies.

  A special rate of 3% applies under the VAT flat rate scheme. The Scheme applies to registrable wholesalers and retailers. Under the Scheme, a supplier is not entitled to an input tax deduction. The 3% flat rate is increased by a 1% Covid-19 Levy making it 4% in aggregate.

  VAT on other supplies ( importers, manufacturers, wholesalers and retailers with annual turnover exceeding GHS 500,000) is 12.5% Standard Rate, calculated on the value of chargeable supply plus a 2.5% National Health Insurance Levy, 2.5% GetFund Levy and 1% Covid-19 Levy.
- Transfer pricing regulations apply to related party transactions.
- Subject to treaty agreements and exemptions, various withholding tax rates apply to payments made for transactions between companies resident in Ghana and non-residents.
- Subject to exemptions that may be available, resident individuals pay tax on income (cash and kind) earned in Ghana and abroad. Non-residents are taxed only on income with a source in Ghana.
- Statutory and voluntary pension deductions apply to employment benefits.
- There is no wealth or inheritance tax due in Ghana. However, municipal authorities charge property rates.

## A. TAXES PAYABLE

National taxes and levies apply in all regions of the country.

## COMPANY TAX

Unless specifically exempted in the law, resident companies are required to pay tax on all income (domestic and foreign) relating to business and investment. Non-resident companies pay tax on income with a source in Ghana. Necessary adjustments are made to the net profit based on tax laws to determine the chargeable income. The rate of tax generally is 25%. There are different rates applicable to certain companies (see ‘Incentives’ below). Mining and petroleum companies are to pay corporate tax at a rate of 35%.

The corporate entity is taxed separately from its shareholders.

The tax year in Ghana is January to December. Companies prepare financial statements on an accrual basis. They may choose their own accounting date without permission, on commencement of operation. However, companies desiring to change their chosen accounting date must obtain prior permission from the Commissioner General of Ghana Revenue Authority (GRA).

All companies have to file tax returns within four months after their accounting year. It is also required that they make quarterly tax payments on the current year’s income based on the provisional assessment made by the Domestic Tax Revenue Division (DTRD) of GRA or the companies’ own estimates (where the DTRD has granted that permission).

## CAPITAL GAINS AND GIFT TAX

What used to be known as Capital Gain and Gift Tax have been incorporated into Corporate or Income Tax and taxed at the corporate tax rate. However, for an individual, the rate of tax for capital gain can be 15% on the gain realized or the income is added to the Chargeable Income of the person and taxed at the graduated rates.

In ascertaining the income of a person from investment or business for a year of assessment one has to include all gains and deduct all losses.

## BRANCH PROFITS TAX

A branch of an external company or a deemed permanent establishment of non-resident companies pay domestic corporate tax at the specified rate applicable to the industry. When the domestically taxed profit is repatriated, branch profit tax of 8% is applied. This operates as dividend tax as may be applicable to local companies.

### Income exempted from tax

Included in exempt income are as listed below. Exemptions apply to other categories of income that may not be relevant to business.

- Income of a non-resident from the business of operating aircrafts where reciprocal exemption is extended to Ghana in the country if residence of the carrier;
- Exemption from gains derived from the realisation of securities that are traded on the Ghana Stock Exchange is now permanent.
- The income of an approved unit trust scheme or mutual fund;
- The income of an approved Real Estate Investment Trust;
- Interest paid to an individual by a resident financial institution or on bonds issued by the Government of Ghana;
- The interest or dividend paid or credited to a holder or member on an investment in an approved unit trust scheme or mutual fund and housing scheme;
- Income of privately-owned universities shall be exempt from tax when they plough back a hundred percent of their profit after tax into the business;
- The income of a state-owned or state-sponsored educational institution;
- The income of an institution or trust of a public character established by an enactment solely for the purpose of scientific research.

## SALES TAX/ VALUE ADDED TAX (VAT)

These are indirect taxes charged by businesses on the supply of some goods and services in Ghana. VAT applies to all the stages of production of goods and services. However, there are supplies that are exempt from VAT. Exports attract VAT at zero rate.

### VAT Rate

All persons registered to charge Value Added Tax (VAT) and are currently operating the standard rate scheme are required to charge and account for VAT at the rate of 12.5% The value on which VAT is to be charged is obtained by adding the following:

i. value of chargeable supply;

ii. 2.5% GetFund levy of chargeable supply;

iii. 2.5% NHIL of chargeable supply;

iv. and 1% COVID-19 levy of chargeable supply.

This in effect amounts to a total charge of 18.5% of the chargeable supply.

### VAT flat rate

The existing VAT law (The Value Added Act, 2013 (Act 870)) was amended in 2017 by Act 948 to re-introduce the Flat VAT Rate Scheme. It has now been amended by Act 1072 Under this scheme, a taxable person who is a retailer in goods with an annual turnover up to GHS 200,000 is to account for VAT at a flat rate of 3% plus a 1% Covid-19 levy calculated on the value of the taxable supply without deducting any input VAT. The Flat Rate Scheme does not include the supply of the following goods:

- Any form of power heat;
- Refrigeration or ventilation;
- Goods manufactured in Ghana;
- Goods imported through the Ports of entry.

### Threshold

As earlier indicated the current threshold for registration of VAT is GHS 200,000 for a 12-month period or GHS 50,000 for a period of 3 months.

However, the following entities are not bound by the threshold and are required to apply for registration upon operation:

- Promoters of public entertainment;
- An auctioneer;
- A national, regional, local or other authority or body.

### VAT WITHHOLDING TAX

In line with the Value Added Tax (Amendment)(No.2) Act 2017, (Act 954) the Commissioner-General of GRA appointed Withholding Tax Agents, effective 1 May 2018, to collect and perform the following:

i. Withhold 7% of taxable value of all local taxable supplies made by a Standard Rated taxable person/supplier and the difference of 10.5% of the taxable value paid to the taxable person/supplier.

ii. Issue Withholding VAT Credit Certificate to Standard Rate VAT suppliers which is used as input tax to reduce the total tax liability payable by the supplier to the GRA.
iii. Submit Withholding VAT Returns together with payment of VAT withheld to the GRA for every month not later than the 15th day of the following month.

It is not every registered VAT person who is authorised to withhold VAT. Authorised Withholding Agents as per 1 May 2018 include the following:

- 28 financial institutions;
- 36 government institutions;
- 24 petroleum subcontractors;
- 17 mining companies and 8 manufacturing companies;
- 3 telecommunication companies; and
- meridian port Services.

Out of the above, five (5) financial institutions have been defunct leaving only 112 companies.

This list has been updated as at Tuesday, October 1, 2019 with an additional 106 companies. Hence, the total companies authorised to withhold VAT being 218.

The first Schedule of the VAT Act 870 has been amended by Act 1005 (2019).

## FRINGE BENEFITS TAX

With the exception of dental, medical, and health insurance expenses, all fringe benefits derived from employment are taxable. Benefits relating to accommodation and cars have their own treatment specified in the Tax Law.

| **Car Element** | | |
|---|---|---|
| Driver and Vehicle with fuel | 12.5% of TCE | Limit GHS 600 per month |
| Vehicle with fuel | 10% of TCE | Limit GHS 500 per month |
| Vehicle Only | 5% of TCE | Limit GHS 250 per month |
| Fuel Only | 5% of TCE | Limit GHS 250 per month |

| **Rent Element** | | |
|---|---|---|
| Accommodation with furnishing | 10% of TCE | No Limit |
| Accommodation Only | 7.5% of TCE | No Limit |
| Furnishing Only | 2.5% of TCE | No Limit |
| Shared Accommodation | 2.5% of TCE | No Limit |

Note:

TCE means Total Cash Emolument.

### Loan benefit

Interest on a loan granted to an employee, Manager, or Director by an employer is taxable. However, there is a Nil Tax where a loan is granted to an employee under the following conditions:

- The loan is from an employer to an employee;
- The term of the loan does not exceed 12 months; and
- The aggregate amount of the loan and any similar loan outstanding at any time during the previous 12 months does not exceed 3 months of basic salary.

### Benefit for tax purpose

In cases other than the above, the employee is considered to have benefited and is to suffer tax at the individual tax rate. The benefit is computed as 25% of Interest at Bank of Ghana Rediscount Rate less interest at employer's rate. For all other benefits, the open market value or a reasonable value is added to taxable income and subject to tax.

## ADMINISTRATIVE SANCTIONS AND PENALTIES

| | |
|---|---|
| Failure to maintain records | Where the failure is deliberate or reckless, 75% of the tax attributable to the period. In any other case, the lesser of 75% or 250 currency points |
| Failure to pay tax on due date | Interest of 125% of the statutory rate, compounded monthly on the amount outstanding |
| Underestimating tax | Interest of 125% of statutory rate, compounded monthly, and applied to the difference between 90% of the Actual Tax and Tax paid in instalment |
| Failure to file Returns (Individual) | 2 currency points and prosecution after 4 months |
| Failure to file Returns (Entity) | 4 currency points and prosecution after 4 months |
| Failure to comply with the Act | Where the failure may result in an underpayment of tax exceeding GHS 200, the fine is, if convicted, between GHS 2,400 - GHS 4,800. For any other case GHS 120 - GHS 2,400 |

| | |
|---|---|
| Making false or misleading statements | a. Where the statement/omission is made without reasonable excuse: a fine of 200% of the tax underpaid<br>b. Where the statement/omission is made knowingly or recklessly: a fine of 300% of the tax underpaid or a fine of GHS 600 – GHS 2,400 or a term of imprisonment between 6 months and 1 year or both<br>c. Any other case: a fine between GHS 600 - GHS 2,400 or a term of imprisonment of 1 month - 3 months or both. Impeding Tax Administration a fine of between GHS 1,200 – GHS 12,000 or term of imprisonment between 6 months and 1 year or both |
| Impeding tax administration | A fine of between GHS 1,200 - GHS12,000 or term of imprisonment between 6 months and 1year or to both |

Act 1065 provided for a waiver on accumulated penalty and interest for tax payments up to 31 December 2020. Act 1073 has extended the period for application for the waiver from September 2021 to June 2022.

## LOCAL TAXES

Taxes are collected by the District, Municipal and Metropolitan Assemblies (authorities) from persons doing business within their localities. They are also responsible for the collection of property taxes.

## OTHER TAXES

### a. STAMP DUTY

Stamp duty is paid at various rates by a person who undertakes certain transactions including the following, subject to certain exemptions:

- Agreement
- Award
- Bond
- Concession
- Contract
- Conveyance or Transfer on sale of a property
- Copy or extract of or from any instrument chargeable
- Counterpart/duplicate of an instrument
- Declaration of a trust concerning a property by the writing
- Deposit of file document
- Lease (land, mining, mineral, timber, etc.)
- Letter of authority / Power of Attorney
- Memorandum of Hypothecation
- Mortgage, Bond, Debenture, Covenant, Guarantee, Lien or Instrument of Security of any kind.

### b. MINERAL ROYALTIES

The Minerals and Mining Act 2006, Act 703 imposes a ground rent on holders of mineral right. Payment of rent in connection with Stool lands are paid to the Administrator of Stool Lands whilst payment of mineral rights is made to the Minerals Commission.

Act 794 has fixed the rate of royalty at 5% on the total revenue earned from minerals obtained. Payment is made on monthly basis.

### c. COMMUNICATION SERVICE TAX

This is a tax on communication service providers based on turnover. The coverage of this tax has been extended to include the following:

- Public/corporate data operators;
- Providers of radio(FM) broadcasting services;
- Providers of free-to-air television services.

The tax rate is currently 9% (Act 998) 2019.

### d. TAX STAMP

This is a tax imposed on business operators in the informal sector. The amount paid is based on turnover and nature of product but not on profit. This is a final tax and will be suspended temporarily for the 1st and 2nd quarters of 2022.

A new excise tax stamp to provide advanced security features for manufacturers and importers of products that pay excise duty was introduced.in January 2021.

### e. VEHICLE INCOME TAX

This is a tax imposed on commercial vehicles. It is paid quarterly and is a tax paid on account. This will be temporarily suspended for taxi services, mini-bus services and other commercial service providers for the 1st and 2nd quarters of 2022.

### f. AIRPORT TAX

This is imposed on both domestic and international travels. It varies depending on the passenger class and the place of destination. The current rates are:

- Domestic travel USD 5;
- Regional travel within West Africa USD 60;
- International travel:
  a) Economy class travel outside West Africa USD 100;
  b) Business class travel outside West Africa USD 150;
  c) First class travel outside West Africa USD 200.

## LEVIES

As stated earlier, the only notable national levies in the country are:

- The National Health Insurance Levy of 2.5% imposed on certain goods and services. The National Health Insurance Levy is administered on the lines of Value Added Tax.
- National Fiscal Stabilisation Levy (NFSL). The NFSL was introduced in 2009 but was abolished in January 2012. It has been reintroduced by Act 862, effective 30 September 2013. The expiry date which was previously extended to 2019 has further been extended to year of assessment 2024 by Act 1011 (2019). The rate of levy is 5% on the profits before tax, payable on a quarterly basis and covers the following entities:
  - o Banks (excluding Rural and Community banks);
  - o Non-Bank Financial Institutions;
  - o Insurance Companies;
  - o Telecommunication companies liable to collect and pay Communication Service Tax under Act 754 of 2008;
  - o Breweries;
  - o Inspection and Valuation Companies;
  - o Shipping lines, Maritime and Airport Terminals.

  The levy is collected upfront by the Ghana Revenue Authority. The levy is not an allowable deduction for the purpose of ascertaining the chargeable income of an entity under the Income Tax Act, 2015, Act 896. For the purpose of enforcing the recovery of the levy, the provisions of the Revenue Administration Act, 2016 (Act 915) relating to collection, enforcement, refund and penalties apply.
- The 2% Special Import Levy which was extended to 2019 has further been extended to year of assessment 2024 by Act 1004 (2019). The Levy is charged on the cost, insurance and freight value of all imported goods into Ghana. This excludes importation of petroleum, fertilizer, machinery and equipment that are listed under Chapters 84 and 85 of the Harmonized System and Customs Tariff Schedules.
- GetFund Levy. Act 970 amended the Value Added Tax (ACT 870) to reduce the rate from 15% to 12.5% by treating the GetFund of 2.5% as a levy.
- Covid-19 Health Recovery Levy which, subject to certain exceptions, imposes a 1% Special Levy chargeable on the supply of goods and services made in Ghana and imported goods and services.
- Energy Sector Levy. Act 1064 provides for an Energy Sector Recovery Levy and Sanitation and Pollution Levy imposed on LPG, Petrol and Diesel.
- Financial Sector Recovery Levy of 5% for banks (other than rural and community banks).

## B. DETERMINATION OF TAXABLE INCOME

Chargeable income is defined by the Income Tax Act 2015, (Act 896):

- 'The chargeable income of a person for a year of assessment is the total of the assessable income of that person for the year from each employment, business or investment less the total amount of deduction allowed that person under this Act.
- A person who determines the chargeable income of that person or of another person shall, determine chargeable income from each source separately.'

## ASSESSABLE INCOME

Assessable Income is made of income from Business, Investment and Employment.

- Business Income includes: income from a trade, profession, vocation or isolated arrangement with a business character; gains from the realisation of capital assets; and, gifts received in respect of the business.
- Investment income includes gains on realisation of investment asset; gifts received in respect of an investment; winning from the lottery; and, consideration for accepting a restriction to conduct investment.
- Employment income includes payments or benefits received by an employee from an employer by way of remuneration, fees, overtime, bonuses, personal allowances, commissions, other payments, including gifts in respect of the employment and lump sum payments. Payments or benefits received also include retirement contributions made to a retirement fund on behalf of an employee (subject to the National Pensions Act, 2008 Act 766), retirement payments received in respect of an employment (subject to the National Pensions Act, 2008 Act 766) and gratuities.

### Assessable Persons

Assessable persons include individuals, partnership, trust, beneficiary of a trust, companies, shareholders.

- **Individuals**

  Individuals are required to pay tax on gains or profit from employment, business or investment. For a resident individual, both income derived from within Ghana and from foreign sources are assessable to tax. However, the income of a resident individual from employment exercised in a foreign country is exempt if

  a) the employer is non-resident;

b) the employer is resident but the employee is present in the foreign country for 183 days or more during the year of assessment.

For a Non-resident individual only income which has its source from Ghana is assessable to tax. Aside deductions allowed, individuals are entitled to personal relief.

- **Partnership**

  A partnership is liable to pay income tax only with respect to final withholding payments.

- **Trust**

  A Trust is liable to pay tax separately from its beneficiaries at a rate of 25%. However, in the case of a trust of an incapacitated individual, the individual tax rate shall apply.

- **Beneficiaries of a Trust**

  A distribution of a resident trust is exempt from taxation if the distribution is in the hands of a beneficiary of the trust. A distribution of a non-resident trust is included in calculating the income of the beneficiary of the trust. A gain on the disposal of the interest of a beneficiary in a trust is included in calculating the income of the beneficiary.

- **Companies**

  A Company is liable to tax separately from its shareholders. For tax purposes a company is defined to include the following:

  - A Partnership with 20 or more partners having a limited liability;
  - A Trust with 20 or more beneficiaries whose entitlement to participate in the income or capital of the trust are divided into trusts.

G

**Deduction Rules**

The following deduction rules should be noted:

- No deduction is allowed in calculating income from employment;
- No deduction is allowed in respect of domestic or excluded expenses;
- An expense is deductible to the extent that it is wholly, exclusively and necessarily incurred in the production of the income from the business or investment;
- No deduction is allowed for an expense of a capital nature.

As per an Administrative guideline from the GRA, no deduction will be allowed for purchases that are not covered by a VAT Invoice. This directive takes effect from 1st October 2021.

**Excluded Expenditure**

These include the following:

- Tax payable under Act 896;
- Bribes and expenses incurred in corrupt practices;
- Interest, penalties and fines paid or payable to a government or a political division of a government of any country for breach of any legislation;
- Expenditure incurred in deriving exempt amounts or final withholding payments;
- Retirement contributions unless they are included in calculating the income of an employee;
- Dividends of a company.

**Domestic Expenditure**

These include the following expenditures:

- Individual expenditure in respect of that individual;
- Expenditure in maintaining the individual, including the provision of shelter, meals, refreshment, entertainment or other leisure activities;
- Expenditure by the individual in coming from home to the office and from the office to home;
- In acquiring clothing for the individual other than clothing that is not suitable for wearing outside of work;
- Expenditure in educating the individual, other than education that is directly relevant to a business conducted by the individual and that does not lead to a degree or diploma.

**The following deductions are not allowed for tax purposes:**

a) Domestic and/ or excluded expenses under Section 130 of Act 896;

b) Expenses which do not meet the requirements of General Principles, Residual Deduction and Specific Deduction rules under Sections 8, 9 and 17 of Act 896.

Some of said include the following:

i. Depreciation;

ii. Capital expenditure;

iii. Donations and Contributions which do not meet the requirement of Section 100 of Act 896;

iv. Income taxes and levies;

v. Bribes;

vi. Penalties and sanctions;

vii. Retirement and pension payments not approved under the Pensions Act;
viii. Transactions which are not at arm's length;
ix. Excess Repairs and improvements as per Section 12 of Act 896;
x. Excess Financial Cost as per Sections 13 and 131 of Act 896;
xi. Dividends of a company.
xii. Clothing allowance which did not suffer tax in the hands of employees

- An expense is deductible to the extent that it is wholly, exclusively and necessarily incurred in the production of the income from the business or investment;
- Amount deductible shall not exceed 5% of the WDV of the pool at the end of the year;
- Deduction is allowed in the order in which the expense is incurred;
- Any excess expense is to be added to the depreciable basis of the pool to which it belongs.

## CAPITAL ALLOWANCE

Capital allowance is granted in respect of fixed assets (depreciable assets), both tangible and intangible, acquired by persons in businesses for each year of assessment. To qualify for these allowances, the following conditions must be met:

a) The assets should be capital in nature;
b) The asset should be owned by the business;
c) The asset should be in the business up to the end of the year of assessment;
d) The asset should be used in carrying on business during the period.

G

***Capital Allowance Schedule***

| Class | Comments | Rate |
|---|---|---|
| 1 | Computers and data-handling equipment. | 40% |
| 2 | Automobiles, buses, minibuses, construction and earth-moving equipment, trailers and trailer-mounted containers, plant and machinery used in manufacturing.<br>Assets resulting from expenses relating to timber concern or large scale rubber, oil palm or other long term crop plantation | 30% |
| 3 | Railroad cars, locomotives and equipment, vessels, barges, tugs and similar water transportation equipment, aircraft, specialized public utility plants, equipment, machinery office equipment and fixtures, and any other depreciable asset not included in another class | 20% |
| 4 | Buildings, structures and similar works of a permanent nature | 10% |
| 5 | Intangible assets. | Useful life |

*An importer or manufacturer of excisable goods who acquires affixing machinery and equipment imported for the implementation of the Excise Tax Stamp Policy shall be granted an accelerated depreciation of 50% of the initial value (i.e. depreciated over two years).

There are 5 classes of Depreciable Assets with the removal of the Mining and Petroleum Class:

- All classes operate under the Pooling System;
- A Class 4 or 5 asset is to be placed in a pool of its own separately from other assets of that Class or any other assets. Additions to that asset are to be added to the Pool. Disposal of the asset amounts to disposal of all the assets in the pool;
- Capital allowance cannot be deferred;
- An additional capital allowance is to be granted where a written down value(WDV) of a Pool falls below GHS 500 and the Pool emptied.

Disposal of depreciable assets in a pool will result in additional income or additional allowance:

- For Class 1,2 or 3 pool, the additional income is arrived at by this formula:
- Consideration received less the depreciation basis of each pool at the end of the year;
- For Class 4 and 5 pool, the additional income is arrived at by this formula:
- Consideration received less (WDV of pool at the end of the year and capital allowance granted);
- For Petroleum Operations, the additional income is arrived by this formula:
- Total Consideration received
- For Mining Operations, the computation is as follows:
    - o Reduce the total WDV of the pool by the total WDV of the asset disposed (X)
    - o Where the consideration received is higher than X the excess is treated as income
    - o Where the consideration received is lower than X, additional depreciation allowance is granted.

**Repairs and Improvements-Sec 12**

- An expense is deductible to the extent that it is wholly, exclusively and necessarily incurred in the production of the income from the business or investment;
- Amount deductible shall not exceed 5% of the WDV of the pool at the end of the year;
- Deduction is allowed in the order in which the expense is incurred;
- Any excess expense is to be added to the depreciable basis of the pool to which it belongs.

## CAPITAL ALLOWANCE ON LEASED ASSETS

The lessee of an asset under a finance lease arrangement is entitled to capital allowance on the principal/capital portion of loan. The interest is however deducted against income.

In the case of the lessor, capital allowance is claimed under an operating lease. The full amount of rent received is included in the lessor's income for the year. Where the arrangement is a finance lease, the lessor does not qualify for capital allowance. The amount of rent payment is included in taxable income for the year is reduced by capital amounts determined by the Commissioner.

## DEPRECIATION

Depreciation of any fixed asset is not an allowable deduction in arriving at the assessable income. The same goes for amortisation of intangible assets. These are compensated for by the granting of capital allowance.

## STOCK/INVENTORY

For the purpose of tax, a person who is ascertaining the income of that person or of another person from a business for a year of assessment shall deduct in respect of trading stock of the business an allowance calculated as follows:

- Adding the opening value of the trading stock to the purchases for the year;
- Deducting from the sum obtained above the closing value of trading stock for the year.

The closing stock is valued at the lower of

- The cost of the trading stock at the end of the year; or
- The market value of the trading stock at the end of the year. However, any method of stock valuation accepted by accounting principle that is consistently applied is accepted.

In determining the cost of trading stock:

- Cost of repair, improvement or depreciation of a depreciable asset is not to be included;
- The absorption-cost method is to be used.

Trading stock or any type of asset prescribed by regulation to be fungible and not readily identifiable, may be determined using the first-in-first-out method or the average-cost method. However, the method opted for may be changed with the written permission of the Commissioner-General.

## CAPITAL GAINS AND LOSSES

As earlier indicated, there is no different rate for capital gains. In ascertaining the income of a person from investment or business for a year of assessment one has to include all gains and deduct all losses.

### Gains

A gain made from the realisation of an asset or liability is the amount by which:

- The sum of the consideration received for the asset exceeds the cost at the time of realisation; or
- The sum of the consideration offered for the liability is less than the amount outstanding at the time of realisation.

The calculation of cost includes:

- Expenditure in the acquisition of the assets (including expenditure of construction, manufacturing or production of the assets);
- Expenditure incurred in altering, improving, maintaining or repairing the assets;
- Incidental expenditure in acquiring and realizing the assets (including legal fees, advertisement/ canvassing).

### Exemptions and adjustment of computation

The following exemptions and adjustments apply under Sections 42 to 50 of Act 896:

- Realisation with retention of asset;
- Transfer of asset to spouse or former spouse;
- Transfer of asset on death;
- Transfer of asset for no consideration;
- Realisation of asset with replacement asset;
- Realisation of asset by way of merger, amalgamation or re-organisation;
- Transfer by way of security, finance lease or instalment sale;
- Realisation by separation;
- Apportionment of costs and consideration received;
- Shares listed on the Ghana Stock Exchange.

### Realisation

A person who owns an asset realises the asset under the following conditions/instances:

- Parting with ownership of that asset, including when that asset is sold, exchanged, transferred, distributed, redeemed, destroyed, lost, expired or surrendered;
- in the case of an asset of a person who ceases to exist, including by way of death, immediately before that person ceased to exist;
- In the case of an asset that is a debt claim owned by a person other than a financial institution, if that person:
    - o Reasonably believes that the debt claim will not be satisfied;
    - o Has taken reasonable steps in pursuing the debt claim; and

  - o Has written off the debt claim as a bad debt.
- Where the underlying ownership of an entity changes by more than 50% at any time within a period of 3 years;
- An asset owned by a resident person immediately before he becomes non-resident is considered as realised by that person on the date the person becomes non-resident.

**Losses**

A loss from the realisation of an asset or liability is the amount by which:

- The cost of the asset exceeds the sum of the consideration received for the asset at the time of realisation; or
- The sum of the consideration offered for the liability is more than the amount outstanding at the time of realisation.

This treatment of gains and losses is in line with the Income Tax law that does not recognize depreciation policies set out by businesses. The pool system adopted by the Ghana Revenue Authority (GRA) for capital allowance purposes for Classes 1,2 and 3 makes it almost impossible to ascertain whether a loss or gain was made on the disposal of a particular asset.

It should be noted that assets disposed of are subject to Value Added Tax (VAT) and National Health Insurance Levy (NHIL).

## DIVIDEND

A shareholder earning dividend from a resident company is subject to a final withholding tax at the rate of 8%. Capitalisation of profit is treated as dividend paid to each of the company's shareholders in proportion to their respective interest in the company and is taxed at 8%.

Where a company (controlled by not more than five persons) records profit over a reasonable period but does not declare dividends, the Commissioner has the authority to treat part of the company income as distributed and demand tax on dividend.

**Exemption Clause**

A dividend paid to a resident company by another resident company is exempt where the company that received the dividend controls directly or indirectly at least 25% of the voting power of the company paying the dividend.

## INTEREST DEDUCTIONS

Interest incurred in respect of a borrowing employed by a business entity in the production of income is a deduction allowed for the purpose of ascertaining the assessable income of the person subject to Section 16 of Act 896. Thin capitalisation rules apply to allowable interest deductions. The debt-equity ratio of 3:1 (2:1 from 2001 to 2015) is applied. Prior to 2016, the ratio was restricted to shareholder or related party debt. However, rules from 2016 apply to all forms of debt.

## TAX LOSSES

In ascertaining the income from a business for a year of assessment, the following deductions are allowed:

- Unrelieved loss of a business in a specified priority sector for any of the previous 5 years of assessment;
- Unrelieved loss of a business in any other sector for any of the previous 3 years of assessment.

The following should be noted:

- An unrelieved loss from a business may be deducted in calculating income from an investment and not the reverse. An unrelieved loss from investment shall be deducted from investment income only.
- Where a person makes a loss and if the loss were a profit, the profit would be taxed at a reduced rate the loss shall be deducted only in calculating income taxed at the same reduced rate or exempt amounts.
- Where a person makes a loss and if the loss were a profit, the profit would be exempt, the loss shall be deducted only in calculating exempt amount.
- Specified Priority Sector include
  - o Petroleum Operations;
  - o Minerals and Mining Operations;
  - o Agro-processing;
  - o Tourism;
  - o Information & Communication Technology;
  - o Farming;
  - o Manufacturing;
  - o Venture Capital Financing;
  - o Energy & Power.
- Unrelieved loss is the amount of loss that is deducted in calculating the income of the person for tax purpose;
- Loss from operation is the excess of amount deducted in calculating the income of that person from investment or business over the amount included in calculating that income;
- Tax Losses are deducted in the order in which they occur (apply the principle of 'first come first served');
- In computing tax losses, it should be reminded that capital allowance cannot be deferred.

**Definitions**

- Manufacturing business means an entity that manufactures mainly at least 70% for export;
- Information Technology-ICT involved in software development;
- Tourism-Entity should be registered with Ghana Tourist Authority.

**Foreign currency exchange losses**

- Gains on foreign currency and financial instruments are taxable whether realized or unrealized;
- Losses on foreign currency and financial instruments are deductible whether realized or unrealized, subject to the rules under Financial Cost.

The amount of financial cost other than interest deductible shall not exceed the sum of:

- Financial gain included in the income from business or investment; and
- 50% of the income from business or investment calculated without including a financial gain derived and also not deducting the financial cost incurred.

Any financial cost denied may be carried forward in the order in which it is incurred during any of the following 5 years of assessment

## FOREIGN SOURCED INCOME

Foreign sourced income of a resident person is included in that person's income for the year and taxed. The same principle applies to Ghanaian permanent establishment (PE) of a non-resident. The person is allowed the deduction of foreign tax credits or entitled to some reliefs where there is a double taxation agreement.

The income of a resident individual from employment exercised in a foreign country is exempt if the employer is non-resident or if the employer is resident but the employee is present in the foreign country for 183 days or more during the year of assessment.

For a non-resident person only incomes which have its source from Ghana are assessable to tax.

The Minister of Finance may by legislative instrument, make Regulations to prescribe the following:

- Criteria for exempting from tax, the income of a foreign Permanent Establishment(PE);
- Criteria for exempting from tax, the foreign income of a resident person;
- Circumstances in which the income of a foreign PE is not exempt, but is taxable in the hands of the resident owner with a foreign tax credit;
- Circumstances in which the income of a foreign trust or company that is controlled by residents is attributed and taxed to the members of the trust or company.

## INCENTIVES

There are a number of incentives provided for in the Income Tax Act, 2015 (Act 896) and other laws and enactments geared towards the development of certain sectors of industry and of certain parts of the country. These incentives include reduced rate of taxes, exemption from the payment of duties and other taxes for specified periods, higher rate of capital allowance, among others. These cannot be exhaustibly dealt with but below are a few of such concessions granted.

### LOCATIONAL INCENTIVES FOR MANUFACTURING BUSINESS

| Location | Rate |
|---|---|
| Location in regional capitals of Ghana | 18.75% |
| Location in free zone enclave for the first 10 years | 0% |
| Location outside regional capitals | 12.5% |

### SECTORIAL INCENTIVES (REDUCED TAX RATES)

Tax rates vary depending upon the area (sector or industry) from which the income is coming from as shown below:

| Sector | Rate |
|---|---|
| Hotel industry | 22% |
| Export of non-traditional production | 8% |
| Loans granted to a farming enterprise | 20% |
| Loans granted to a leasing company | 20% |
| Companies in Free Zones after tax holiday | 15% |

### INDUSTRIAL CONCESSIONS (EXEMPTION PERIOD)

| | |
|---|---|
| Tree Crop Farming | 10 years of assessment from year of first harvest |
| Cocoa tree | Indefinite exemption |
| Livestock Farming | 5 years of assessment from year of commencement of business |
| Cattle Farming | 5 years of assessment from year of commencement of business |
| Agro-Processing Business | 5 years of assessment from year of commencement of commercial production |
| Cocoa By-product Business | 5 years of assessment from year of commencement of commercial production |
| Rural Banking | 10 years of assessment from year of commencement of business |
| Waste Processing | 7 years of assessment from year of commencement of business |
| The income of a certified company from a low-cost housing business | 5 years of assessment from year of commencement of operation |
| Approved Unit Trust Scheme | Indefinite |
| Mutual Fund of business | Indefinite |

| | |
|---|---|
| Real Estate Investment Trust | Indefinite |
| Venture Capital Company | 10 years of assessment from year of commencement of business |
| Venture Capital Financing | 10 years of assessment from year of commencement of business |
| Free Zone Company | 10 years of assessment from year of commencement of business |
| Ghana Automotive Manufacturing Department Provision (Act 1007) | 3 years of assessment from year of commencement of the manufacturing or assembling business for semi-knocked down vehicles |
| | 10 years of assessment from year of commencement of the manufacturing or assembling business for semi-knocked down vehicles |

Apart from companies in the Free Zone, all entities are to pay tax on their profit at the rate of 1% during their tax holiday periods.

**Exclusions**

- A person is not entitled to a concession if an associate person has benefited or is benefiting from that concession;
- The concession shall not apply as between two associated individuals who are residents;
- The concession shall not apply 'where the Government of Ghana has concluded, whether before or after the commencement of this Act, a binding agreement with a person that purports to modify the manner in which tax is imposed, including by reason of a fiscal stability clause'.

G

**Additional Temporary Concessions**

The following additional temporary concessions are provided under the Income Tax Act, 2015 (Act 896):

**1) Young Entrepreneur**

The income of a young entrepreneur, who is not more than 35 years old, from the business of manufacturing, information and communications technology, agro-processing, energy production, waste processing, tourism and creative arts, horticulture and medical plants is exempt from tax for a period of five years.

The tax rate applicable for the next five years after the initial concession period is as follows:

| Location | Rate |
|---|---|
| Accra and Tema | 15% |
| Other regional capitals outside the three Northern Regions | 12.5% |
| Outside other regional capitals | 10% |
| The three Northern Regions | 5% |

Such a young entrepreneur may carry forward an unrelieved loss for a period of five basis periods.

**2) Private Universities**

A Privately-owned university is exempt from tax when it ploughs back 100% of its profit after-tax into the institution.

## C. FOREIGN TAX RELIEF

Foreign tax credits are available to relieve double taxation on overseas income. Credits are calculated separately for each source of business, employment and investment income and may not exceed the average rate of Ghanaian income tax of that person for the year of assessment applied to that person's taxable foreign income for the year.

## D. CORPORATE GROUPS

Corporate groups, irrespective of their affiliations, prepare accounts separately and are taxed separately. Unutilised capital allowance on assets transferred is not transferable. Realisation of asset by way of merger, amalgamation or re-organization is exempt from tax. A dividend paid to a resident company by another resident company where the company that received the dividend controls directly or indirectly at least 25% of the voting power of the company paying the dividend is exempt from tax.

## E. RELATED PARTY TRANSACTIONS

Although nothing in the law disallows related party transactions, the Commissioner General has the authority to disregard or reverse any transaction that is geared towards tax avoidance.

In accordance with Regulation 2(2) of Transfer Pricing Regulation, 2012 (LI 2188): "A transaction is conducted at arm's length between persons in a *controlled relationship*, if the terms of the transaction do not differ from the terms of a comparable transaction between *independent persons."*

Thus, the price of goods and services charged between related parties should be comparable to the price that would be charged between independent persons.

Where the Commissioner-General thinks a transaction is not at arm's length he can disregard or reverse such a transaction.

Transfer Pricing Regulation 2020, LI 2412 has replaced LI 2188

In February 2021, the Registrar General's Department requested companies to provide names of their Beneficial Owners by 30 June 2021. This requirement may result in the Commissioner-General of GRA reclassify transactions between companies and their legal owners.

## F. WITHHOLDING TAX

Tax is withheld at various rates for the following transactions:

| Resident persons | | |
|---|---|---|
| **Income** | **Rate** | **Remarks** |
| Interest earned by individuals from Government of Ghana of Ghana bonds or Mutual Funds | 0% | Final |
| Interest earned by persons other than individuals or financial institution | 8% | Not final |
| Dividend | 8% | Final |
| Rent from residential property deemed as investment income | 8% | Final |
| Rent from a non-residential property deemed as investment income | 15% | Final |
| Rent from residential property deemed as business income | 8% | Not final |
| Rent from a non-residential property deemed as business income | 15% | Not final |
| Remittance for royalties and other natural resource | 15% | Not final |
| Fees for examining, invigilating, supervising an examination, or part time teaching or lecturing | 10% | Final |
| Fes or allowances, to a resident director, manager, trustee or board member of a company or trust | 20% | Not final |
| Endorsement Fees | 10% | Final |
| Commission to resident lotto receiver or agent | 10% | Not final |
| Commission to resident insurance, sales or canvassing agents | 10% | Not final |
| Supply or use of goods exceeding GHS 2,000 | 3% | Not final |
| Supply of works exceeding GHS 2,000 | 5% | Not final |
| Supply of service exceeding GHS 2,000 | 7.5% | Not final |
| Any amount due a local sub-contractor in respect of works or services under a Petroleum Agreement | 7.5% | Not final |
| Payment for unprocessed precious minerals located or won in Ghana | 3% | Not final |

Exemption from Withholding Tax under Contract:

- Premium paid to a Resident Insurance Company;
- Interest paid to a resident financial institution;
- Where goods constitute trading stock of both the vendor and the purchaser;
- Where the payee has an exemption certificate from the Commissioner General.

| Non-resident persons | | |
|---|---|---|
| **Income** | **Rate** | **Remarks** |
| Dividend | 8% | Final tax |
| Royalties, natural resources payments and rents | 15% | Final tax |
| Management, consulting, technical service and endorsement fees | 20% | Final tax |
| Repatriated branch after tax profits | 8% | Final tax |
| Interest | 8% | Not final tax |
| Short-term insurance premium | 5% | Final tax |
| Income from telecommunication, shipping and air transport | 15% | Final Tax |
| Income under a contract for the supply of goods, works or service where the contract gives rise to income in Ghana | 20% | Final Tax |

## G. EXCHANGE CONTROL

Ghana has an Exchange Control Act that regulates, among other things, the following:

- Use of foreign exchange among residents;
- Trading in gold (coins and/or bullion);
- Exports and import on bank notes;
- Exports and export proceeds;
- Capital and money market instruments.

Subject to the Foreign Exchange Act, 2006(Act 723) and the Regulations and Notices issued under the Foreign Exchange Act, an entity shall, through an authorized dealer bank be guaranteed unconditional transfer in freely convertible currency of the following:

- Dividends or net profits attributable to the investment made in the entity;
- Payments in respect of loan servicing where a foreign loan has been obtained;
- Fees and charges in respect of a technology transfer agreement registered under the Ghana Investment Promotion Centre Act,2013 (Act 865);
- The remittance of proceeds, net of all taxes and other obligations, in respect of sale or liquidation of the entity or any interest attributable to the investment in the entity.

There are restrictions to the amount allowed to be repatriated determined by the Bank of Ghana under Act 723. The restrictions relate to Section 15, 16, 18, 19 and 29 of Act 723 which among others require that each payment in foreign currency to or from Ghana between a resident and a non-resident, or between non-residents, shall be made through a bank.

Where the Bank of Ghana has reason to believe that an offence in contravention of Act 723 is likely to be committed or has been committed, the Bank of Ghana may require a bank to obtain its permission prior to the execution of any payment in foreign currency.

## H. PERSONAL INCOME TAX

The assessment period for individuals is January to December. Individuals are required to pay tax on gains or profit from employment, business or investment.

**Reliefs:**

Act 1007 (2019) has introduced improved relief for individuals:

| Type of Reliefs | Previous relief (GHS) | Current relief (GHS) |
|---|---|---|
| **Marriage / Responsibility** | 200 per year | 1,200 per year |
| **Old age**<br>(Granted to persons 60 years and above) | 200 per year | 1,500 per year |
| **Child education**<br>(Granted for a maximum of 3 children enrolled in recognised registered educational institutions in the country) | 200 per year | 600 per child per year |
| **Aged dependant relative**<br>(Granted for up to two (2) dependant relatives of 60 years or more.) | 100 per year | 1,000 per year |
| **Professional training relief** | 400 per year | 2,000 per year |

**Resident Individuals**

Resident individuals are to pay tax on their worldwide income unless specifically exempted under the law. The income of a resident individual from employment exercised in a foreign country is exempt if the employer is non-resident or the employer is resident but the employee is present in the foreign country for 183 days or more during the year of assessment.

Among other definitions, an individual is considered resident if he or she is a citizen of Ghana domiciled in Ghana (or absent from Ghana for 365 days or less), or is an individual who has stayed in Ghana for an aggregate period of 183 days or more in any 12-month period. All incomes are aggregated and taxed after the various adjustments relating to the type of income earned are made.

Tax rates applicable to resident effective January 2022 are as follows:

| ANNUAL RATES | | | MONTHLY RATES | | |
|---|---|---|---|---|---|
| | INCOME (GHS) | RATE | | INCOME (GHS) | RATE |
| First | 4,380 | 0% | First | 365 | 0% |
| Next | 1,320 | 5% | Next | 110 | 5% |
| Next | 1,560 | 10% | Next | 130 | 10% |
| Next | 36,000 | 17.5% | Next | 3,000 | 17.5% |
| Next | 196,740 | 25% | Next | 16,395 | 25% |
| Exceeding | 240,000 | 30% | Exceeding | 20,000 | 30% |

**Non-Resident Person**

For a Non-resident Person only incomes which have a source from Ghana are assessable to tax. The tax rate is 25%.

Fringe benefits earned by individual employees are taxable (Refer to Fringe Benefit Tax above).

## I. TREATY AND NON-TREATY WITHHOLDING TAX RATES

In the absence of any treaty with the Government of Ghana, the provisions of the income tax law apply for the treatment of all tax matters. Thus, tax rates applicable on various income apply. Where there is a treaty with the Government of Ghana, the terms of the treaty prevail over all provisions of the income tax law. However, where the rates of taxes set out in a treaty are higher than those of the laws of Ghana, the lower rates are used.

Tax rates in percentages are as follows:

| | Dividends (Where recipient holds at least 10% of shares) % | Dividends (In any other case) % | Royalties % | Technical/ management service fees % | Interest % |
|---|---|---|---|---|---|
| Belgium | 5 | 15 | 10 | 10 | 10 |
| Czech Republic[4] | 6 | 6 | 8 | 8 | 10 |
| Denmark | 5 | 15 | 8 | 8 | 8 |
| France | 7.5 | 15 | 12.5 | 10 | 12.5 |
| Germany | 5 | 15 | 8 | 8 | 10 |
| Ireland[1] | 7 | 7 | 8 | 10 | 7 |
| Italy | 5 | 15 | 10 | 10 | 10 |
| Malta[1] | 6 | 6 | 8 | 12 | 7 |
| Mauritius | 7 | 7 | 8 | 10 | 7 |

### KEY TAX POINTS

- A company is taxed on profits which accrue, or are derived, in Gibraltar for a financial year at a rate of 12.5%, increased from 10% with effect from 1 August 2021 (although the rate can be 20% in some cases).
- Profits of foreign companies including branches in Gibraltar are taxed at the same rate as resident companies.
- There is no capital gains tax in Gibraltar.
- There is no VAT in Gibraltar.
- The tax year runs from 1 July to 30 June and tax is payable on the actual taxable profits for the year. For tax purposes, individuals can elect between the Allowance and Gross Income Based Systems. The standard rate of tax for individuals is 20%.
- As from 1 August 2021 Gibraltar minimum wage increased from GIP 7.25 to GIP 7.50 per hour.

### A. TAXES PAYABLE

### COMPANY TAX

The standard rate of Gibraltar corporation tax is 12.5%, an increase from 10% with effect from 1 August 2021. For utility companies and companies that enjoy and abuse a dominant position there is a higher rate of tax applied which is 20%. The utility companies are classified as Telecommunications, Petroleum, Water and Sewage. Companies are taxed on profits for the financial year on income accrued or derived in Gibraltar.

### CAPITAL GAINS TAX

There is no capital gains tax in Gibraltar. The Commissioner of Income Tax may refer to case law to judge whether a benefit is of a capital or trading nature.

### INHERITANCE TAX

There is no inheritance tax in Gibraltar.

## BRANCH PROFITS TAX

Profits of foreign companies are taxed at the same rate as resident companies.

## SALES TAX / VALUE ADDED TAX

There is no VAT in Gibraltar.

**Derogation from implementing VAT**

Although Gibraltar joined the EU alongside the United Kingdom at the time of the United Kingdom's accession Gibraltar was granted derogation from implementing VAT. Therefore, there is no VAT in Gibraltar.

**Customs and excise duties**

Goods imported into Gibraltar are subject to import duty at varying rates.

## FRINGE BENEFITS TAX

Perquisites or benefits in kind are taxed as gains from employment. There is specific detailed legislation on how to tax benefits and also the allowances available, particularly with respect to:

- Expense payments; vouchers and credit tokens;
- Living accommodation; removal benefits and expenses;
- Cars, vans and related expenditure;
- Loans to: employees, directors, shadow directors or connected persons.

The Commissioner for Income Tax has the ability to tax benefits not specifically covered in the legislation. Where the benefits to an employee are less than GIP 250 in total for any year of assessment no tax is payable in respect of those benefits. The employer may opt to pay the tax on the benefits on behalf of an employee. When the annual value of these benefits is between GIP 250 and GIP 15,000 the tax under this Schedule shall be paid at the rate of 20%. When the annual value of the benefit is above GIP 15,000 tax shall be paid at the rate of 29%.

## LOCAL TAXES

## GENERAL RATES

General rates are levied on all properties in Gibraltar.

## STAMP DUTY

Stamp Duty is payable on the transfer or sale of any Gibraltar real estate or shares in a company owning Gibraltar real estate (on an amount based on the market value of the said real estate) at the following guidance rates:

First or second time buyers as defined by section 19A the Act:

| Value of property | Stamp Duty |
|---|---|
| First GIP 260,000; | 0% |
| From GIP 260,001 to GIP 350,000 | 5.5% |
| Above GIP 350,000 | 3.5% |

| Non- qualifying Purchasers | Stamp Duty |
|---|---|
| Not exceeding GIP 200,000 | 0% |
| From GIP 200,001 to GIP 350,000 | 2% on first GIP250,000 and 5.5% on balance |
| Above GIP 350,000 | 3% on first GIP350,000 and 3.5% on balance |

Stamp Duty is also payable on mortgages secured on Gibraltar real estate at the following rates:

| | |
|---|---|
| Mortgages up to GIP 200,000 | 0.13% |
| Mortgages over GIP 200,000 | 0.20% |

**Special Stamp Duty**

As from 2 July 2018, a duty of 7.5% applies to the sale of property which classify as affordable Home for and on behalf of the government in the preceding four years.

From 1 July 2021, a special stamp duty rate of 5% is introduced on the purchase of berths at the Small Boats Marina.

## CAPITAL DUTY

Capital duty of GIP 10 is payable on the nominal share capital or any increase thereof with respect to limited liability companies.

## GAMING TAX

As from 1 April 2018 the licence fees are fixed at GIP 100,000 for B2C licensees and GIP 85,000 for B2B licensees per annum. Gambling tax is payable by the B2C operators on their gross receipts, both gaming receipts and betting receipts, at the rate of 0.15%.

## ROYALTIES

Royalties received or receivable by a Gibraltar company are chargeable to tax.

## OTHER TAXES

There are no capital gains, wealth, inheritance or gift taxes in Gibraltar.

## B. DETERMINATION OF TAXABLE INCOME

### INDIVIDUALS

An individual who is ordinarily resident in Gibraltar is chargeable to tax on his/her worldwide income in accordance with tables A to C of schedule 1 of the Income Tax Act 2010.

### INDIVIDUAL ORDINARY RESIDENT

An individual ordinarily resident is a person who is resident in Gibraltar for a period (or accumulated period) totalling at least 183 days in any year of assessment or is present in Gibraltar in any year of assessment which is one of three consecutive years in which the total of the days during which the individual is present in Gibraltar exceeds 300 days. Non-residents who undertake activities in Gibraltar which are ancillary to their employment or self-employment elsewhere and the duration of the activity is less than 30 days in aggregate in any year of assessment or such other number of days that the commissioner may by prior written agreement in his discretion allow, will not be liable to income tax in Gibraltar. This also covers directors' fees.

### CORPORATIONS

A company is taxed on profits which accrue or are derived in Gibraltar. The Act defines accrued or derived by reference to the activities that generate the profit. A company is considered ordinarily resident in Gibraltar if management and control as defined is exercised in Gibraltar.

A regulated company's profit deriving from its regulated activities is subject to tax irrespective of where this income is accrued or derived.

### STOCK OPTIONS

The granting of an option or share to an employee is an event which is taxable. When the option is exercised and there is a disposal of the shares and capital gains arise the capital gain is not taxable on the individual as there is no capital gains tax in Gibraltar.

### CAPITAL ALLOWANCES

**100% First year allowances:** As from 1 July 2021 to 30 June 2023 the capital allowances deduction will be based on the higher of the first GIP 60,000 (capped at GIP 30,000 up to 30 June 2021) of qualifying expenditure on fixtures and fittings, plant and machinery and the first GIP 100,000 (capped at GIP 50,000 up to 30 June 2021) of computer equipment acquired in a year of assessment or 50% of the qualifying expenditure incurred.

**Annual allowances:** There is an additional annual allowance on the surplus balance of the pooled amount at the rate of 25% per annum on a reducing balance basis. For motor vehicles not qualifying as plant and machinery there is an allowance at the rate of 15% per annum on a reducing balance basis. For unincorporated entities and companies on the higher 20% rate of income tax, there is a 20% allowance on the pooled balance. For capital allowances on entertainment centres, hotels, mills, factories or other similar premises (excluding the cost of the land) there is an allowance at the rate of 4% per annum on a straight line basis.

- As from 1 July 2021 to 30 June 2023, there is a wear and tear allowance for properties which are used for the purpose of trade, business, profession or vocation at the rate of 1% per annum on a straight line basis.
- Where the balance of qualifying expenditure is less than GIP 1,000, the full amount is allowed as a deduction in that year.
- If the accounting period is less than 12 months, the pool allowance is prorated.
- Newly established businesses are able to claim 100% of their capital allowances in the first year of trading.

### CAPITAL GAINS AND LOSSES

Capital gains are not subject to tax therefore capital losses are not allowable deductions.

### DIVIDENDS

There is no charge to tax on the receipt by a Gibraltar company of dividends from any other company, whether it is a Gibraltar resident or non-resident. There is no tax on a dividend paid by a Gibraltar company to a non-resident of Gibraltar. There is also no withholding tax on dividends paid, but when a dividend is declared to a Gibraltar resident person, individual or company, a dividend return must be filed with the tax authorities.

### INTEREST DEDUCTIONS

There is no withholding tax on interest payments.

### WITHHOLDING TAX – PAYMENTS TO SUBCONTRACTORS

Payments made to subcontractors (in the construction industry) without a valid tax exemption certificate issued by the Commissioner of Income Tax are subject to 25% withholding tax on that portion of the payment which is not for materials used in construction.

### LOSSES

A trading loss incurred can be carried forward and set off against future trading profit. Non trading losses are not allowable deductions. If within any period of three years there is both a change in ownership of a company and there is a major change in the nature or conduct of a trade carried on by the company no relief shall be given in respect of any losses brought forward from the period beginning before the change of ownership against any profits or gains. There is no provision for the carrying back of losses.

### FOREIGN SOURCED INCOME

Income tax is charged on income accruing in or derived from Gibraltar. Residents of Gibraltar are taxed on their world-wide income.

## INCENTIVES

### DEDUCTION OF APPROVED EXPENDITURE ON PREMISES

Resident taxpayers whether individuals or companies (although there is a different approach to each category) who have an interest in a building situated in Gibraltar, have a special allowance for approved expenditure on the repair or enhancement of the façade of the building. This allowance is in addition to any normal allowance given. The taxpayer will have to comply with the requirement contained within the special provisions in order to be able to reap its advantages. For individuals whose assessable income is based on the gross income based system the allowance is restricted to GIP 5,000 per annum.

### DEVELOPMENT AID

The development Aid Act is aimed at private development in Gibraltar. There are conditions to be met in order to take advantages of the incentives offered. Application for development aid must be made to the Minister responsible.

### NEW START-UP INCENTIVE SCHEME

Businesses setting up in Gibraltar between 5 July 2016 and 30 June 2017 are entitled to a tax credit equal to tax due up to a maximum of GIP 50,000 per annum over each of the first three financial years of trading. This incentive is subject to the following conditions:

- It must be a new business setting up in Gibraltar and not the transfer of an existing business already in Gibraltar.
- The business must employ at least 5 people in the first year.
- The business must be a company or limited partnership but not an individual trading in its own name.

The tax credit does not carry forward from one year to the next.

### DEDUCTION FOR IMPROVEMENT IN ENERGY PERFORMANCE CERTIFICATE RATING

A deduction is available for the investment made by an individual, company or business that makes a significant improvement to the Energy Performance Certificate (EPC) rating. The percentage is subject to the discretion of the Commissioner of Income Tax.

### TRAINING COSTS

Training costs for employees working towards a qualifying qualification are allowable as an expense at a rate of 150%. From 1 July 2021 to 30 June 2023 this is increased to 160%. A self-employed individual undertaking qualifying training may also claim the 50% deduction. 'Qualifying training' means any qualification and training as approved by the Commissioner.

Up until 30 June 2023 a further deduction is available based on 50% of the fixed salary cost of new employees employed after 1 July 2021.

### MARKETING INCENTIVE

Up until 30 June 2023, a 50% deduction is available for business marketing and promotion expenditure.

### PROPERTY INVESTMENT INCENTIVE

Proprietors of property constructed in Gibraltar in the subsequent 30 months from 1 July 2016 and rented for residential purposes will receive a tax credit equal to the tax payable on the profits earned on the first twenty-four months of rent occurring in the first five years after the completion of construction of that property.

### DISABLED ACCESS TO PROPERTY

A company or business shall be entitled to claim a deduction in computing its income chargeable to tax where it has a legal title to a property in Gibraltar from which a trade, business, profession or vocation is carried out and has incurred expenditure for works carried out no later than 30 June 2022 for the modification and improvement of access and inclusion for disabled individuals to that property. The deduction will be limited to a maximum of GIP 15,000 or the cost of the modifications.

### GIFT AID

The amount eligible for registered charities to claim from the Commissioner of Income Tax in respect of donations under Gift Aid rules is GIP 10,000.

### ELECTRIC VEHICLES

Cashback on full electric vehicles of GIP 2,500 (GIP 250 for hybrids) per vehicle and no import duty.

For full electric motorbikes the cashback, is GIP 150 per vehicle and GIP 200 per vehicle for electrically assisted bicycles without a throttle where the electric engine cuts off at a speed of 25 kph.

## C. FOREIGN TAX RELIEF

Any person ordinarily resident in Gibraltar can claim unilateral tax relief on tax paid abroad subject to providing the necessary evidence of the payment to the Commissioner of Income Tax, the taxpayer is entitled to a tax credit equivalent to the lesser of the tax payable on that income in Gibraltar; or the tax payable abroad in respect of that income. If relief from the double taxation has to be made abroad then the relief allowed is reduced accordingly.

## D. CORPORATE GROUPS

There is no group relief available in Gibraltar.

## E. RELATED PARTY TRANSACTIONS

**Anti-avoidance provision**

The Income Tax Act 2010 introduced a number of anti-avoidance clauses which can be invoked to set aside arrangements that can be seen to be fictitious or artificial. Also the promoters of a tax planning schemes have to notify the Commissioner of Income Tax within 30 days of any schemes which result in the payment of less tax. There are a number of clauses that specifically consider and address anti avoidance arrangements that can lead to the reduction or elimination of tax payable as follows:

**Thin capitalisation rules**

This is aimed at shareholder or connected persons and refers to interest paid on a loan by a company to related parties (which is not itself a company) or loans where security is provided by related parties and where at any time in an accounting period the loan capital to equity ratio is greater than 5 to 1. The interest paid will be deemed to be a dividend by the company and received by the connected part and not deductible on the company in computing the profits for the period.

**Transactions with connected persons**

When it appears that transactions with connected persons in the course of the business are arranged with a view to make no profit or reduce profits or increase losses any excess will be deemed to be a dividend paid and not deductible on the company in computing the profits for the period. When expenses incurred in favour of a connected person the expense allowed shall be the least of the expense incurred; 5% of the gross turnover of the person for the accounting period or 75% of the pre-expense net of profit of the person for the accounting period.

**Non-deductibility of interest paid on certain secured loans**

This refers to interest payable and back to back loans. Where a loan is made by a lender at an arm's length and all or part of the loan is secured by a cash deposit or an investment as defined by the Act of any connected person over which the lender has taken security the loan interest will not be deductible when computing the profit or gain.

**Chargeability of dual employment contracts**

Where an employee of an employer ordinarily resident in Gibraltar has one or more other contracts with that or another employer whether resident in Gibraltar or elsewhere who is a connected person to the employer ordinary resident in Gibraltar the income derived shall be subject to tax. If it can be proved to the Commissioner that the purpose of the transactions is not to avoid tax this is a mitigation circumstance that will be considered.

**Transfer of assets abroad**

This is to prevent the transfer of assets abroad by an ordinarily resident individual with the purpose of avoiding taxation in Gibraltar and the income becomes payable by persons resident outside Gibraltar.

When the person affected can demonstrate to the Commissioner that the intention is not to avoid tax the provisions do not apply.

## F. EXCHANGE CONTROL

There are no exchange controls in Gibraltar.

## G. PERSONAL INCOME TAX

**Individuals and partnerships**

The tax year runs from 1 July to 30 June and tax is payable on the actual taxable profits for the year. Individuals can elect between the allowance and Gross Income Based Systems

**Allowance based system**

Under the allowance based system the individual will be taxed on their income less allowances (see below). The main allowances (which are reduced by one twelfth for each complete calendar month that the individual is not resident in Gibraltar during the year of assessment) for the tax year 2020/2021 are as follows:

| Type of allowances | GIP |
|---|---|
| Personal allowance | 3,455 |
| Spouse allowance | 3,455 |
| Child allowance – first child only | 1,190 |
| Child studying abroad allowance (each child) | 1,375 |
| Maternity grant | 700 |
| Apprentice allowance | 380 |
| Nursery allowance | 5,480 |
| Single parent allowance | 5,800 |
| Blind person allowance | 5,475 |
| Dependent relative (non-resident) allowance | 250 |
| Dependent relative (resident) allowance | 400 |
| Disabled individual allowance | 10,000 |
| House Purchase allowance | 13,000 |
| House Purchase (special deduction) allowance | 4,000 (GIP 1,000 max p.a.) |
| Medical allowance | 5,395 |
| Social Insurance (employee) allowance | 335 |
| Social Insurance (self-employed) | 432 |

### "Topping-up" allowances

Individuals with allowances amounting to less than GIP 4,343 will have their allowances topped up to that amount. For elderly individuals (men over 65 and women over 60) the allowances are topped up to GIP 12,645.

### Low incomes earners allowance

Taxpayers with assessable income of GIP 11,450 or less will be brought out of the taxation system altogether and will pay no income tax. This applies to taxpayers in both the Allowance Based System and the Gross Income Based System.

Under the allowance based system the minimum allowance of GIP 4,343 will be tapered for taxpayers whose earned income for the tax year is between GIP 11,451 and GIP 19,712.

### Tax credit

A tax credit equal to the higher of GIP 300 or 2% of the tax payable is available for the year.

For employed individuals aged 60 and over who are in receipt of an occupational pension or annuity income below GIP 6,000 are entitled to a tax credit amounting to GIP 4,000.

### Students

The earnings of a full time student are exempt from tax.

### Life assurance Relief

Premiums allowed up to 1/7th of assessable income or 7% of capital sum assured. Relief is granted at the rate of 17%.

### Personal pension schemes or retirement annuity contracts

The lesser of 20% of the earned assessable income or GIP 35,000.

### Occupational pension schemes

Relief is restricted to one-sixth of the assessable income.

### Health Insurance

Premiums paid for the purpose of an approved health insurance for an individual, spouse or his dependent children. The deduction is limited to GIP 5,395 in aggregate.

### Installation of Solar energy for boilers and renewable energy

Up to a maximum of GIP 6,000 (GIP 3,000 for 2020/21) over two years in respect of expenditure incurred towards the installation of renewable energy systems and of solar energy for boilers, including photovoltaic panels or wind turbines for the supply of electricity to a property.

### Approved expenditure on premises

A deduction from their assessable income in respect of approved expenditure incurred on the enhancement of the frontage of their property.

### Mortgage Interest Relief

Interest payable on a loan taken by an individual to acquire or improve a Gibraltar property to be used as a tax payer's principle residence is allowable on loans up to a value of GIP 350,000.

### Electric vehicle charging installation

A deduction against tax liabilities for the first GIP 2,000 of the cost of installing a mechanism for the purpose of charging electric vehicle in the taxpayer's home, garage or parking space, subject to approval.

### Disabled individuals tax exemption

An additional earned income allowance exempts individuals in employment from tax, if they are recipients of disability allowance paid by the Department of Social Security.

### Property Frontage Enhancement

An unlimited deduction from assessable income is available in respect of expenditure incurred on painting, decorating, repairing, and enhancing the appearance of the frontage of premises (must be expenditure certified by the Town Planner).

### Gibraltar Savings Bank Retirement Savings Bond

A deduction from assessable income of up to GIP 1,000 is available for individual contributions to the Gibraltar Savings Bank Retirement Savings Bond.

### Tax bands under the allowance bases system for ordinary resident taxpayers

| Taxable Income | Tax Rate |
|---|---|
| First GIP 4,000 | 14% |
| Next GIP 12,000 | 17% |
| The remainder of taxable income | 39% |

### Tax bands under the allowance bases system for non-resident taxpayers

| Taxable Income | Tax Rate |
|---|---|
| First GIP 16,000 | 17% |
| The remainder of taxable income | 39% |

**Standard rate of tax**

The standard rate of tax for individuals is 20%.

**Tax bands under the gross income based system**

Ordinary residents with taxable income of up to GIP 25,000 opting for GIB system:

| Taxable Income | Tax Rate |
|---|---|
| The first GIP 10,000 | 6% |
| The next GIP 7,000 | 20% |
| The remainder of taxable income | 28% |

Ordinary residents with taxable income of more than GIP 25,000 opting for GIB system:

| Taxable Income | Tax Rate |
|---|---|
| The first GIP 17,000 | 16% |
| The next GIP 8,000 | 19% |
| The next GIP 15,000 | 25% |
| The next GIP 65,000 | 28% |
| The next GIP 395,000 | 25% |
| The next GIP 200,000 | 18% |
| The remainder of taxable income | 5% |

Persons under the gross income based system may also benefit from:

- A deduction from their assessable income up to a maximum of GIP 1,500 in respect of mortgage interest payments;
- A deduction from their assessable income of GIP 1,500 per annum in respect of pension contributions;
- A deduction from their assessable income of up to GIP 3,000 per annum in respect of medical insurance premiums;
- A deduction from their assessable income up to a maximum of GIP 5,000 in respect of approved expenditure incurred on the enhancement of the frontage of their property;
- First time buyers: a deduction from their assessable income up to a maximum of GIP 7,500 in respect of approved expenditure incurred towards the purchase of their home during the year available for purchases after 1 July 2015;
- Up to a maximum of GIP 6,000 (GIP 3,000 for 2020/21) over two years in respect of expenditure incurred towards the installation of renewable energy systems and solar energy for boilers including photovoltaic panels or wind turbines for the supply of electricity to a property;
- For the next three years commencing 1 July 2018 a deduction is available against tax liabilities for the first GIP 2,000 of the cost of installing a mechanism for the electric charging of a vehicle in their home, or in a parking space or garage owned by them, subject to approval;
- A deduction from assessable income of up to GIP 1,000 is available for individual contributions to the Gibraltar Savings Bank Retirement Savings Bond.

## TAX INCENTIVES FOR HIGH NET WORTH INDIVIDUALS

**Qualifying (Category 2) Individual Rules 2004**

Individuals may apply to the Finance Centre Director to acquire Category 2 status and on successful application will be issued a certificate to this effect. The conditions to become a Category 2 individual are as follows

- Must have not been resident of Gibraltar within a period of 5 years immediately preceding the year of assessment in which the application is made or have been resident for 183 days in any one of those years or an average of 90 in any 3 of those years.
- Not have been engaged in any trade or employment in Gibraltar other than on incidental duties.

The application form to become a Category 2 individual must be supported by 2 character references from recognised and established professionals; copy of passport; a curriculum vitae and proof is worth a minimum of GIP 2 million; must also prove that they have approved accommodation in Gibraltar for their and their family use. The application fee is GIP 1,000.

The advantages associated with becoming a Category 2 is that the individual can engage in certain commercial activities and as from the 1 August 2021 their tax payable will be limited to the first GIP 105,000 (GIP 80,000 for 2020/21) of taxable income. The minimum tax payable will be GIP 32,000 (GIP 22,000 for 2020/21) and the maximum GIP 37,310 (GIP 27,560 for 2020/21).

**High Executive Possessing Specialist Skills Rules 2008**

This scheme for executives possessing specialised skills (HEPSS) as from 1 August 2021 only taxes the first GIP 160,000 (GIP 120,000 for 2020/21) and the maximum tax payable under the current Gross Income Based system is GIP 39,940 (GIP 29,940 for 2020/21).

They must also comply with the following criteria:

- must have approved residential accommodation in Gibraltar for their exclusive use and families;
- not have been occupied or resident in Gibraltar for the past 3 years.

The application fee is GIP 1,000.

## SOCIAL SECURITY CONTRIBUTIONS

Social insurance is payable on earning by all individuals working in Gibraltar either as employees or self-employed. Employees' contributions to social insurance are made up of a proportion payable by the employer and another paid by the employee. Self-employed only pay their share. The rates applicable from 1 July 2021 are as follows:

| Contributions payable by: | Rate Payable on Gross earnings | Minimum payable per week / month | Maximum payable per week / month |
|---|---|---|---|
| Employees | 10% | GIP 12.10 / GIP 52.44 | GIP 36.30 / GIP 157.30 |
| Employers | 20% | GIP 28.00 / GIP 121.34 | GIP 50.00 / GIP 216.66 |
| Self-employed | 20% | GIP 25.00 / GIP 108.34 | GIP 50.00 / GIP 216.66 |

Detached workers will not make a contribution of employees and employers social insurance as per above rates.

Individuals with a second job, working pensioners and individual employed in essential services will be exempt from employee social insurance and the employer will also be exempt from employer social insurance.

Employees still in employment aged 60 and over are exempt from paying social insurance contributions.

Social insurance contributions are payable by every employee or self-employed person in any week in which they work.

A social insurance credit of GIP 100 per employee applies to companies with 10 or less employees, and to new companies with up to 20 employees in their first year of operation.

## H. TREATY AND NON-TREATY WITHHOLDING TAX RATES

Countries that do not have a double taxation treaty with Gibraltar can enjoy unilateral relief for foreign taxes paid that are also subject to tax in Gibraltar.

The Government of Gibraltar has negotiated tax treaties with both the United Kingdom and Spain and these have already been ratified.

## I. TAX INFORMATION EXCHANGE AGREEMENTS

Gibraltar is a fully self-governing and fully self-financing British Overseas Territory. Gibraltar was part of the European Union and on the 31 December 2020 Gibraltar ceased to be a member as a result of Brexit. Gibraltar is currently negotiating its relationship with the European Union going forward.

**Automatic Exchange of Information on Taxation matters:**

Gibraltar has signed a FATCA Intergovernmental Agreement with the United Kingdom, and with the United States and has signed a formal commitment to the Common Reporting Standard on automatic exchange of information with close to 100 countries committed to exchanging information; the first wave in 2017 (including Gibraltar) and the second wave in 2018.

In addition, Gibraltar applied the EU Savings Directive which first came into force in 2005. This Directive was repealed by the European Union with effect from 1 January 2016.

Gibraltar has transposed the EU Directive 2014/107/EU on automatic exchange of information with all member states of the EU (the 'EU Common Reporting Standard').

## J. TAX PAYMENTS

| | |
|---|---|
| **Employment income** | It's the responsibility of the employer to deduct from the employees' emoluments a specified amount of tax and make payment by the 15th day of the following month. |
| **Companies** | Advanced payment on account by 30 September and 28 February. Each payment should be equal to 50% of the tax liability of the previous year. Any remaining balance payable after deducting the actual liability from the payment on accounts should be paid within nine month of the financial year-end of the company. |
| **Self-employed and trust** | Advanced payment on account by 31 January and 30 June. Each payment should be equal to 50% of the tax liability of the previous year. Any remaining balance payable after deducting the actual liability from the payment on accounts should be paid by 30 November following the end of the tax year. |

## K. SUBMISSION OF ACCOUNTS AND TAX RETURNS

| | |
|---|---|
| **Individuals** | Tax return (Form IT1P) up to 30 June should be submitted by every individual in employment by 30 November. |
| **Companies** | Corporate tax return (Form CT1), dividend return (Form CT2) and financial statements are due within nine months after the financial year-end. All Gibraltar resident companies have a duty to file returns and accounts with the Income Tax Office. The accounts to be filed depend on the size of the company. |
| **Self-employed** | Tax return (Form IT1S) and financial statement up to 30 June should be submitted by every self-employed individual by 30 November. |
| **Trusts** | Tax return (Form ITT) and financial statement up to 30 June should be submitted by every representative of the trust by 30 November |

After 1 January 2016 all companies registered in Gibraltar have a duty to file a tax return even if they don't have income assessable to tax in Gibraltar.

## L. PENALTIES AND SURCHARGES

| Penalties for late filing of returns | |
|---|---|
| Failure to file a return by the due date | GIP 50 |
| Failure to file within three months from the due date | GIP 300 |
| Failure to file within six months from the due date | GIP 500 |

**Surcharges for late payment of tax liability**

There is a surcharge imposed of 10% of the amount of tax due on the day after such payment was due. If unpaid for a further 90 days a further surcharge of 20% of the tax is due is charged.

## KEY TAX POINTS

- Companies resident in Greece are subject to corporate income tax on their worldwide income. Non-resident companies are liable for tax on income derived through a permanent establishment in Greece.
- There are no special rules for groups and each company is taxed separately. However, for transactions between group companies, transfer pricing rules should be adhered to.
- Capital gains are treated differently in company taxation in relation to individual taxation rules. In company taxation, capital gains are generally added to and taxed together with normal business income. Specific tax rates apply on capital gains obtained from individuals.
- VAT is imposed on the sale of goods and supply of services at a standard rate of 24%. There is also a reduced rate of 13% and an extra reduced rate of 6%.
- Company's profits are taxed at 22%. In addition, dividends are subject to a dividend tax of 5%.
- Many types of payments are subject to withholding tax (including payments for salaries, interest and royalties).
- Greek residents are subject to income tax on their worldwide income. Non-residents are taxed on net income sourced in Greece.
- An annual real estate tax is imposed on the value of real estate property.

## A. TAXES PAYABLE

## COMPANY TAX

Companies resident in Greece are subject to corporate income tax on their worldwide income from all sources. Non-resident companies that have a permanent establishment in Greece are subject to corporate income tax on income derived through the permanent establishment. Companies are deemed to be resident if they are incorporated in Greece (the registered office is in Greece) or have their place of effective management in Greece.

The fiscal year usually runs from 1 January to 31 December. However, all companies maintaining a double-entry accounting system can choose to have the fiscal year ending on 30 June. Also, if a Greek company is a subsidiary of a foreign parent company with the parent company holding a minimum of 50% of the share capital, the Greek company can choose to align the fiscal year with that of the foreign parent company.

The tax rate applicable to undistributed profits is 22% for all forms of companies including Public Limited Companies (SA), Limited Liability companies (EPE) and branches of foreign companies.

Distributed or capitalised profits are subject to an additional income tax of 5%. Dividends paid to parent companies based in European countries are exempted from such dividend tax if certain conditions are met.

## CAPITAL GAINS TAX

Taxation of capital gains obtained by companies is different from the taxation of capital gains obtained by individuals. In company taxation capital gains are treated as ordinary business income. This applies to different kinds of capital gains including:

- Capital gains derived from the sale of shares, stocks, bonds and other securities (whether listed or not listed on the Stock Exchange);
- Capital gains derived from the sale of real estate property;
- Capital gains derived from the sale of fixed assets in general.

As of 1 July 2020, the Participation Exemption Regime (PER) came into force, which provides for a tax exemption of capital gains derived by Greek tax resident companies from the sale of shares held in Greek and EU subsidiaries, provided they hold a minimum participation of 10% for a period of at least two years, and subject to the fulfilment of the conditions set forth under the Parent-Subsidiary Directive (EU PSD).

Capital gains obtained by individuals are treated as follows:

- Capital gains from the sale of shares listed on the Stock Exchange are taxed at a rate of 15%, on the condition that the shares sold represent more than 0.5% of the company's capital;
- Capital gains from the sale of shares not listed on the Stock Exchange are taxed at a rate of 15%;
- Capital gains derived from the sale of real estate property are taxed at a rate of 15%. However, the application of this tax has been postponed and will become effective as of 1 January 2023.

Capital gains are exempted from taxation in the following cases:

- Sale of shares of listed companies that were acquired before 1 January 2009;
- Sale of less than 0.5% of shares of listed companies.

## BRANCH PROFITS TAX

The calculation of tax on the taxable profits of branch offices of international companies is the same as the tax applicable to Greek companies in general. The tax is calculated at 22% of net taxable income. There is no branch remittance tax in Greece.

## VALUE ADDED TAX (VAT)

VAT is imposed on the sale of goods and supply of services at a standard rate of 24% which applies to the majority of goods and services. For specific categories of goods and services a reduced rate of 13% and an extra reduced rate of 6% applies. The above rates are reduced by 30% for sales to a few specific remote Aegean islands.

## PROPERTY TAXES

For each transfer of real estate, the following taxes are paid:

- For land and old buildings: Transfer tax 3%.
- For new buildings: VAT 24%.

Owners of real estate property (individuals or companies) are subject to a yearly real estate property tax. This tax includes Main tax on land and buildings and Additional tax.

Main tax calculation depends on the size, geographical location of the property, year of construction, use, zone price and other characteristics. Main tax is ranging from EUR 2.00 to EUR 13.00 per square meter.

Additional tax on real estate property owned by legal entities is imposed on the total value of the property and is calculated at the rate of 0.55% of the total property value.

For individuals the Additional tax is imposed on real estate property value if it is exceeding EUR 200,000 calculated according to the following table:

| Property Value (EUR) | Tax rate |
|---|---|
| 0.01 – 250,000 | 0% |
| 250,000.01 – 300,000 | 0.15% |
| 300,000.01 – 400,000 | 0.30% |
| 400,000.01 – 500,000 | 0.50% |
| 500,000.01 – 600,000 | 0.60% |
| 600,000.01 – 700,000 | 0.80% |
| 700,000.01 – 800,000 | 0.90% |
| 800,000.01 – 900,000 | 1.00% |
| 900,000.01 – 1,000,000 | 1.05% |
| 1,000,000.01 – 2,000,000 | 1.10% |
| above 2,000,000 | 1.15% |

This additional tax is expected to be cancelled from 2022 onwards.

## OTHER TAXES

Transactions not subject to VAT are subject to Stamp Duty at rates ranging from 1.2% to 3.6%.

## SOCIAL SECURITY CONTRIBUTIONS

Companies pay contributions to the social security organisation (EFKA) for their employees. For year 2021, the employer's contribution is computed on the employee's gross salary at a rate of 22.54%. For limited specific employment categories and the self-employed social security contribution rates vary.

## B. DETERMINATION OF TAXABLE INCOME

Taxable income is based on the profit or loss shown in the financial statements. The accounting profit or loss is then adjusted according to the specific tax provisions of Greek tax law. Generally, expenses are deductible if they are properly documented and have been incurred to generate taxable income with the exception of particular types of expenses specified in tax law as non-deductible (such as all types of provisions except for bad debt provisions, expenses over EUR 500 repaid with cash, fines, etc.).

### DEPRECIATION

Fixed asset depreciation for tax purposes is computed annually using the following fixed rates:

- Plant and other buildings: 4%;
- Public Transportation means (including airplanes, ships, trains): 5%;
- Machinery: 10%;
- Furniture and other equipment: 10%;
- Intangible assets: 10%;
- Rights and intangible assets with a useful life other than 10 years: 1 divided by the contractual duration of the right;
- Transportation means for cargo: 12%;
- Transportation means for personnel: 16%;
- Computers, hardware and software: 20%.

### STOCK / INVENTORY

Stock is valued according to acceptable valuation methods. Cost of sales is deductible during the process of calculating taxable profit.

### INTEREST DEDUCTIONS

Interest on loans is tax deductible if it does not exceed 30% of the company's EBITDA. However, interest is fully tax deductible if the total amount does not exceed EUR 3 million per year.

In any case, the amount of interest exceeding the EBITDA rule can be carried forward without a time limitation.

### LOSSES

Losses incurred in a business year may be carried forward to be offset against profits of the following five business years. Tax losses carried forward may be forfeited if there is a change in company ownership of more than 33 % of the capital together with a change in the company's activities of more than 50% of its turnover, unless it can be proved that the change was made for valid commercial reasons.

Foreign losses may not be utilised for the calculation of a tax year's profits or be offset against future profits, with the exception of losses arising from business activities exercised through a permanent establishment situated in an EU/EEA country with which Greece has concluded a DTT, according to which profits from business activities are not treated as tax-exempt.

### TAX INCENTIVES

Subject to certain conditions, expenses for scientific and technological research are deductible at an additional amount of 100%.

The current investment law (Law 4399/2016) provides for incentives for investment projects in all economic sectors with very few exceptions. A special focus is given to investments in innovative and pioneer technology.

Different kinds of incentives are provided by the law including:

- Exemption from corporate income tax for a specified period;
- Subsidy of the investment;
- Subsidy of the employment cost;
- Fixed corporate income tax rate for a specified period.

A new Bill has been submitted to parliament for discussion and approval and is expected to apply as from 1 January 2022. Subject to certain conditions, several tax incentives are granted in connection with mergers and corporate transformations, providing a reduced tax rate by 30% for the profits of the merged/transformed entity for 3 years following the year of the merger.

## C. FOREIGN TAX RELIEF

In the absence of a double tax treaty, a Greek resident company is entitled to a credit for foreign tax paid on foreign-sourced income against Greek corporate income tax levied on that income. The credit amount is limited to the Greek tax amount attributable to the foreign-sourced income. When the double tax treaty relief is more advantageous than the unilateral relief, the former relief is applied. However, if unilateral relief is more advantageous then this will apply.

## D. CORPORATE GROUPS

There are no special tax provisions for corporate groups. Each company of the group is taxed separately.

## E. RELATED PARTY TRANSACTIONS

Transactions between related parties must be carried out following arm's length rules. Companies should prepare and maintain transfer pricing documentation based on the OECD Multinational Transfer Pricing Guidelines for Enterprises and Tax Administration.

#### CbC (Country-by-Country) Reporting

The obligation for annual filing of the CbC report arises for multinational enterprise groups with a consolidated group turnover exceeding EUR 750 million in the fiscal year preceding the year to which the CbC report applies. The CbC report must be submitted within 12 months from the last day of the reporting fiscal year. The entity required to file the CbC report is the ultimate parent entity of an MNE group that has tax residence in Greece (or any other surrogate entity in Greece).

The CbC report must include the following information, which will be provided and exchanged using standard tables:

- Aggregated data relating to revenue, profit (loss) before income tax, income tax paid, income tax due, share capital, accumulated profits, number of employees, and tangible assets other than cash or cash equivalents for each jurisdiction the group operates in;
- Identification documents for the jurisdiction where each constituent entity has its tax residence, and in case the latter differs from the jurisdiction of tax residence, the jurisdiction under which this constituent entity is organised and the nature of its primary business or businesses.

On 4 December 2017, the Public Revenue Authority published its Decision (POL 1184/2017) containing clarifications for filling CbC reports and other disclosure requirements.

With the Decision POL 1111/2018, the exchange of CbC reporting has been extended to include a list of countries with which Greece will exchange CbC reports on a mandatory basis and a list of countries with which exchange of CbC reporting will take place on a voluntary basis.

**Summary information table**

For risk assessment purposes, the Greek Tax Authority requires that in each calendar year taxpayers prepare and submit a summary table of all their related party transactions, disclosing key elements such as amounts, basic FAR analysis and transfer pricing method used.

G

## F. WITHHOLDING TAX

Many types of payments are subject to income withholding tax (salaries, payments to individuals for services, contractors of technical works, etc.).

## G. EXCHANGE CONTROL

Greece's foreign exchange market conforms to EU rules on the free movement of capital. Controls only exist to facilitate the enforcement of money laundering and terrorist financing laws. As from 1 September 2019 there are no more controls or other restrictive measures.

## H. PERSONAL TAX

An individual is subject to income tax on his total net income in Greece and abroad (worldwide taxation). Net income sourced in Greece is taxed irrespective of the residence of the individual. Income arising abroad is taxed if the relevant individual is a resident of Greece. The tax year is the calendar year. Personal tax on net income is calculated as follows:

**Salary income, Income from pensions, Income from individual business practice.**

Taxable income is calculated after deducting the social security contributions. The remaining amount is taxed as follows:

| Income bracket (EUR) | Tax rate (%) | Tax per bracket (EUR) | Aggregate | |
|---|---|---|---|---|
| | | | Income (EUR) | Tax (EUR) |
| Up to 10,000 | 9% | 900 | 10,000 | 900 |
| Next 10,000 | 22% | 2,200 | 20,000 | 3,100 |
| Next 10,000 | 28% | 2,800 | 30,000 | 5,900 |
| Next 10,000 | 36% | 3,600 | 40,000 | 9,500 |
| Over 40,000 | 44% | -- | -- | -- |

The tax calculated according to the above table is reduced by the following amounts:

- EUR 777 to 1,340 in relation to the number of children for taxable income up to EUR 12,000. For taxable income, which exceeds the amount of EUR 12,000, the amount of the reduction shall be EUR 20 per EUR 1,000 of taxable income.
- 20% of the amount given for donations with a minimum of EUR 100, provided that the total amount of donations within the tax year does not exceed 5% of the taxable income.

The taxpayer is required to use bank payment instruments for at least 30% of declared income. If this threshold is not met, an additional tax of 22% is applied on the excess income.

The following types of income earned by individuals are taxed separately using different tax rates:

- Interest income is taxed at the rate of 15%;
- Income from royalties is taxed at the rate of 20%;
- Real estate property rent income is taxed at the following tax rates :
  - For income up to EUR 12,000: 15%;
  - From EUR 12,001 to EUR 35,000: 35%;
  - For income exceeding EUR 35,000: 45%.

**Special Solidarity Tax Contribution**

In addition to ordinary income tax, individuals are subject to Special Solidarity Tax Contribution calculated on taxable income according to the following table:

| Total Income (EUR) | Tax rate |
|---|---|
| 0,0 – 12,000 | 0% |
| 12,001 – 20,000 | 2.20% |
| 20,001 – 30,000 | 5% |

| Total Income (EUR) | Tax rate |
|---|---|
| 30,001 – 40,000 | 6.50% |
| 40,001 – 65,000 | 7.50% |
| 65,001 – 220,000 | 9% |
| above 220,000 | 10% |

For year 2021, the application of the Special Solidarity Tax Contribution is suspended. For year 2022, the exemption applies only for salaried personnel and only for employment in the private sector.

## I. TREATY AND NON-TREATY WITHHOLDING TAX RATES

On 26 January 2021 Greece has ratified the Multilateral Instrument (MLI).

Under the tax treaties which have been concluded by Greece, the residents of certain foreign countries may enjoy reduced rates of withholding taxes on dividends, interest and royalties as follows:

| | Dividends (%) | Interest (%) | Royalties[1] (%) |
|---|---|---|---|
| Non-treaty countries | 10 | 10/25 | 20 |
| **Treaty countries:** | | | |
| Albania | 5 | 5 | 5 |
| Armenia | 10 | 10 | 5 |
| Austria | 15/5 | 8 | 7 |
| Azerbaijan | 8 | 8 | 8 |
| Belgium | 15/5 | 0/10 | 5 |
| Bulgaria | 10 | 10 | 10 |
| Canada | 15/5 | 10 | 10 |
| China | 10/5 | 10 | 10 |
| Croatia | 10/5 | 10 | 10 |
| Cyprus | 25 | 10 | 0/5 |
| Czech Republic | --[7] | 10 | 10/0[3] |
| Denmark | 38 | 8 | 5 |
| Egypt | 10 | 15 | 15 |
| Estonia | 15/5 | 10 | 5/10[2] |
| Finland | 47 | 10 | 0/10 |
| France | --[7] | 10 | 5 |

| Ireland | 15/5 | 5 | 5 |
| Israel | --[7] | 10 | 10 |
| Italy | 15 | 10 | 5/0 |
| Korea (South) | 15/5 | 8 | 10 |
| Kuwait | 5 | 5 | 15 |
| Latvia | 10/5 | 10 | 5/10 |
| Lithuania | 15/5 | 10 | 5/10 |
| Luxembourg | 38 | 8 | 7/5 |
| Malta | 10/5 | 8 | 8 |
| Mexico | 10 | 10 | 10 |
| Moldova | 15/5 | 10 | 8 |
| Morocco | 10/5 | 10 | 10 |
| Netherlands | 35 | 10/8[4] | 7/5[5] |
| Norway | 40 | 10 | 10 |
| Poland | --[7] | 10 | 10 |
| Portugal | 15 | 15 | 10 |
| Qatar | 5 | 5 | 5 |
| Romania | 45 | 10 | 7/5 |

| | Dividends (%) | Interest (%) | Royalties[1] (%) |
|---|---|---|---|
| Russia | 10/5 | 7 | 7 |
| San Marino | 10/5 | 10 | 5 |
| Saudi Arabia | 5 | 5 | 10 |
| Serbia | 15/5 | 10 | 10 |
| Slovak Republic | --[7] | 10 | 0/10 |
| Slovenia | 10 | 10 | 10 |
| South Africa | 15/5 | 0/8 | 5/7 |
| Spain | 10/5 | 0/8 | 6 |
| Sweden | 0 | 10 | 5 |
| Switzerland | 15/5 | 7 | 5 |
| Tunisia | 35 | 15 | 12 |
| Turkey | 15 | 12 | 10 |
| Ukraine | 10/5 | 0/10 | 10 |
| United Arab Emirates | 5 | 5 | 10 |
| United Kingdom | --[7] | 0 | 0 |
| United States | --[7] | --[6] | 0 |
| Uzbekistan | 8 | 10 | 8 |

NOTES:

1. Where the withholding tax rate on royalties is indicated as nil, no income tax is due. The withholding tax on rental payments may also be reduced under the provisions concerning royalties in various tax treaties. The text of the relevant treaty should be consulted.
2. The 5% rate applies to royalties paid for the use of industrial, commercial or scientific equipment. The 10% rate applies to all other royalties.
3. No tax on royalties on intellectual property.
4. 8% if paid to a bank or other institution.
5. 5% for copyright and film royalties.
6. Where the US resident receiving the interest is not engaged in a trade or business through a permanent establishment in Greece, the interest is exempt from tax in Greece to the extent that it does not exceed a rate of 9% per annum. The exemption is not available (and the domestic withholding tax rate therefore applies) where the US corporation holds more than 50% of the voting power of the Greek interest-paying company.
7. The domestic rate applies. There is no reduction under the treaty.

## GRENADA

### MEMBER FIRM

| City | Name | Contact Information |
|---|---|---|
| St. George's | Henry A. Joseph | +1473 440 2562<br>hjoseph@pkfgrenada.com |

### BASIC FACTS

| | |
|---|---|
| Full name: | Grenada |
| Capital: | St. George's |
| Main languages: | English (official), French patois |
| Population: | 113,451 (2022 estimate) |
| Monetary unit: | East Caribbean Dollar (XCD) |
| Internet domain: | .gd |
| Int. dialling code: | +1473 |

### KEY TAX POINTS

- Grenadian resident companies are taxed on their income earned in Grenada. Non-residents are taxed on the profits of branch operations in Grenada.
- There is no tax on capital gains derived by companies although a transfer property tax applies as well as a Stamp Duty charge in respect of certain transactions.
- Withholding taxes are charged on payments to non-residents of dividends, royalties and other charges at a rate of 15%.
- Individuals who are resident, ordinarily resident or domiciled in Grenada pay income tax only on income earned in Grenada. Non-residents are subject to tax on income arising from the carrying on of a business in Grenada. Withholding taxes apply to other payments to non-residents.

## A. TAXES PAYABLE

### COMPANY TAX

Grenadian resident companies are liable to income tax on all sources of non-exempt income wherever arising. A company is regarded as resident in Grenada if its central management and control is located and exercised in Grenada or if it was incorporated in Grenada. A non-resident company is taxed on income of a branch carrying on a trade or business in Grenada, i.e. the income arises in Grenada. The tax rate on companies is 28% on the annual net profit. The tax year or 'year of assessment' is a period of 12 months commencing on 1 January in each year. Any business with gross income less than $300,000 per annum and paying 0.5% in annual stamp tax is exempt from filing income returns and there is no tax on the business profits.

Companies are assessed to tax on their income that arises in the basis period. Where the company usually makes up its accounts for a period other than the calendar year, this period will be substituted for the calendar year. The company is expected to submit its tax return by the end of March or three months following the year of assessment and pay any balance of tax due. The company is required by law to make monthly advance payments of income tax based on the results of the preceding year (estimated tax). Any balance of tax is due and payable when the return is filed.

### CAPITAL GAINS TAX

There is no income tax on capital gains secured on the disposal of capital assets. However, there is a transfer property tax of 5% of the value of property sold with or without improvement. There is also an aliens' landholding tax: for a foreign company buying into a local company, the foreigner pays 15% and the local pays 10%. For a foreign company buying into another foreign company, each pays 15%.

There is a 1% Stamp Duty charge.

### BRANCH PROFITS TAX

Branches of a non-resident corporation or companies doing business in Grenada are taxed on the profits arising in Grenada. The rate of tax is 28%. There is no branch remittance tax in Grenada.

### VALUE ADDED TAX

VAT is levied on the sale of goods and services at the rate of 15% except for accommodation at hotels which is at 10% and telecommunications services at 20%. The tax applies to both input and output so that at the end of a month a credit may be claimed where the input is greater than the output. Businesses with income lower than XCD 300,000 per annum are exempted from VAT.

### LOCAL TAXES

National Insurance is payable on emoluments up to a maximum of XCD 5,000 per month at a rate of 5% from the employee (XCD 250) and 6% from the employer (XCD 300). This compulsory contribution made both by employer and employee goes towards the provision of a pension at age 60 for women and 65 for men.

Stamp tax is paid on the gross income of businesses. The rates are as follows:

| | |
|---|---|
| Gross annual income of over XCD 36,000 but less than XCD 300,000 | 0.5% |
| Gross annual income exceeding XCD 300,000 | 0.70% |

The charge shall not be less than XCD 100 and is payable by 31 March of each year.

### OTHER TAXES

Common External Tariff (CET) and Customs Service Charge (CSC) are imposed. CET is levied at a rate of between 6% and 40% on the CIF value of the landed price of goods purchased outside of CARICOM. Property tax is ad valorem, i.e. the property is assessed at market value and a taxable rate is applied based on the land use classification.

| Category | Land Rate (%) | Building Rate (%) |
|---|---|---|
| Agricultural | 0.0 | 0.00 |
| Amenity | 0.2 | 0.20 |
| Commercial | 0.5 | 0.30 |
| Hotel | 0.3 | 0.02 |
| Industrial | 0.3 | 0.20 |
| Institutional | 0.1 | 0.10 |
| Residential | 0.1 | 0.15 |
| Reserve | 0.1 | 0.00 |
| Waste | 0.1 | 0.00 |

## B. DETERMINATION OF TAXABLE INCOME

The chargeable income of a company is determined by deducting all non-capital disbursements and expenses wholly and exclusively incurred in acquiring the income from all taxable income brought into charge. Domestic and private expenses are not allowable.

### CAPITAL ALLOWANCES

Capital allowances are granted for depreciation of equipment, plant and machinery and other assets used in the business at the following rates per annum:

| | |
|---|---|
| Plant, machinery and equipment | 15% |
| Air conditioning units, computers, elevators, ships, and other vessels | 20% |
| Motor vehicles other than heavy vehicles | 25% |
| Aircraft and equipment, heavy plant and machinery, public transport | 25% |

A deduction of up to a maximum of XCD 100,000 is allowed on purchases of plant and machinery in the year of purchase as a one-off deduction.

## STOCK / INVENTORY

Stock and work-in-progress are valued at the lower of cost or net realisable value.

## CAPITAL GAINS AND LOSSES

Capital gains are not taxed in Grenada.

## DIVIDENDS

Dividends are not taxed in Grenada.

## INTEREST DEDUCTIONS

Interest paid upon any money borrowed on capital employed in acquiring the income is deductible.

## LOSSES

Losses sustained in a trade, profession or business on the island or through the ownership or occupation of land situated on the Island are allowed as expenses in arriving at the chargeable income of the person sustaining the loss. The loss should not be a capital loss. The loss is available to be set off against other income arising in the year of assessment and may be carried forward and deducted in ascertaining the assessable income of the current or until the assessed loss has been fully utilised, whichever is earlier.

## FOREIGN SOURCED INCOME

Where income arises outside Grenada and such income is derived from any act incidental to business carried on in Grenada, such income shall be included in the assessable income of the business in Grenada whether received in Grenada or not. This includes:

(a) Branch or agency profits from business outside Grenada;

(b) Interest, royalties and rents outside Grenada.

## INVESTMENT ALLOWANCE / INCENTIVES

The Government of Grenada encourages the establishment and development of new businesses and offers a wide range of incentives to potential investors. All of these incentives and concessions are designed to make investments more profitable. Concessions are available under the following various enactments:

- Fiscal Incentives Act 1974;
- Qualified Enterprise Act;
- Investment Code Incentive Law 1983;
- Hotels Aid Act 1954;
- Common External Tariff (SRO 37 /99); and,
- General Consumption Tax Act 7/95.

## TOURISM SECTOR

There is full exemption from taxes on corporate profits for up to ten years. There is also exemption from Customs duties (CET) and taxes (GCT) on articles of hotel equipment to equip and upgrade the hotel property, service vehicles, material tor construction, repair, renovation or alteration to hotel properties.

## MANUFACTURING SECTOR

There is full exemption from taxes on corporate profits for up to 15 years. There is also exemption from Customs duties (CET) and taxes (GCT) on plant, machinery, equipment (including equipment for the transportation of goods), spare parts, raw materials and components.

## SERVICE SECTOR

There is relief from duties (CET) and taxes (GCT) on equipment.

## C. FOREIGN TAX RELIEF

There is no foreign tax relief in Grenada.

## D. CORPORATE GROUPS

Tax liability in a group basis is not permissible. The liability of each company within the group is determined separately.

## E. RELATED PARTY TRANSACTIONS

Related party transactions which are carried out for considerations not at arm’s length, intended to secure a benefit or tax advantage or to reduce the tax payable, are counteracted by the Comptroller who will take appropriate actions to negate this advantage.

## F. WITHHOLDING TAX

Dividends derived by non-resident companies are taxable in Grenada at a rate of 15% on the gross amount of the dividend. Interest derived by non-resident companies is not subject to tax. Royalties derived by non-resident companies are subject to a 15% final withholding tax, which is imposed on the gross amount of the royalties. Other income derived by non-resident companies (i.e. discounts, commissions, fees, management charges, rents, lease premiums and licence charges) is subject to a 15% final withholding tax on the gross amount of the income.

## G. EXCHANGE CONTROL

There are no exchange controls in Grenada at this time. Foreign currency up to a maximum equivalent of XCD 250,000 can be purchased from any of the commercial banks. Amounts in excess of this limit are subject to permission being obtained from the Ministry of Finance. This permission is generally not withheld and can be obtained within a short time period.

## H. PERSONAL TAX

An individual who is resident, ordinarily resident and domiciled in Grenada is subject to income tax on his or her income as it arises. Non-residents are subject to tax on income accruing directly or indirectly from the carrying on of business in Grenada. Income from any source other than from the carrying on of business shall be liable to withholding tax and not form part of the assessable income.

## RESIDENCE IN GRENADA

The residency requirements are as follows:

- An individual's permanent place of abode is in Grenada and the individual is physically present therein for some period of time in that year of assessment;
- Physical presence in Grenada for a period of not less than 183 days in that year of assessment;
- Physically present in Grenada for some period of time in that year of assessment and such period is continuous with a period of physical presence in the immediately preceding or succeeding year of assessment of such duration as to qualify him for the resident status.

Broadly, an individual is domiciled in the country or state which he regards as his permanent home. He acquires a domicile of origin at birth, normally that of his father, and retains it until he acquires a new domicile of choice. To acquire a domicile of choice, a person must sever his ties with his domicile of origin and settle in another country with the clear intention of making it his permanent home.

In ascertaining the chargeable income of an individual who is resident in Grenada, the amount of XCD 36,000 per annum is allowed as a deduction. Income from XCD 36,001 to XCD 60,000 is taxed at the rate of 10% while income in excess of XCD 60,000 is taxed at the rate of 28%.

| Salaries Per Annum | Rate |
|---|---|
| Up to XCD 36,000 | exempt |
| XCD 36,001 to XCD 60,000 | 10% |
| Above XCD 60,000 | 28% |

The Pay-As-You-Earn (PAYE) system of collection is in operation. The employers, who act as agents, deduct tax from employees' gross monthly emoluments. The tax so deducted must be remitted to the Inland Revenue Department by the seventh day of the month following the period for which the deduction was made. Any tax deducted and not paid within the time specified shall bear interest at the rate of 2% per month or part thereof for the period during which it remains unpaid. Employees whose income is in excess of XCD 36,000 are required to submit an annual income tax return and attach a certification from the employer by the end of March following the year of assessment.

## I. TREATY AND NON-TREATY WITHHOLDING TAX RATES

Grenada has not entered into any double tax treaty.

# GUATEMALA

## BASIC FACTS

| | |
|---|---|
| Full name: | Republic of Guatemala |
| Capital: | Guatemala City |
| Main languages: | Spanish, more than 20 indigenous languages |
| Population: | 18.54 million (2022 estimate) |
| Monetary unit: | Guatemalan Quetzal (GTQ) |
| Internet domain: | .gt |
| Int. dialling code: | +502 |

## KEY TAX POINTS

- Companies are subject to income taxes, known as the income on lucrative activities regime, at a rate of 25% on net taxable income.
- Solidarity tax is a way to anticipate income taxes so that the amount paid may be credited to income taxes over the following three years.
- VAT is payable on the domestic supply of goods and services and the import of goods. A standard rate of 12% applies although some supplies are exempted.
- For income from entities not residing in the country and acting with or without a permanent establishment, tax regimes do exist for the specific computation of withholding tax at rates ranging from 5% up to 15%.

## A. TAXES PAYABLE

### TAXES AND LEVIES

Tax laws in Guatemala are based on the territoriality principle. There are a few exceptions, mainly those related to withholdings in origin, and all taxes are applicable to activities conducted within the Guatemalan territory. The Political Constitution of Guatemala provides legislative power to the Congress of the Republic. This provides certainty that no other entity, either local or foreign, shall create indirect or direct taxes.

Guatemala is part of the Multilateral Investment Guarantee Agency (MIGA), which is responsible for facilitating a private capital investment flow to developing countries, while providing guarantees against risks such as expropriation, lack of currency convertibility, civil war or riots, etc. In addition, the country has benefited from the Overseas Private Investment Corporation (OPIC) with the promotion and fostering of private investments from the United States of America.

### COMPANY TAX

Companies are subject to income taxes, known as the income on lucrative activities regime, at a rate of 25% on net taxable income. There is also an optional simplified regime on income from lucrative activities with rates ranging from 5% to 7%. In addition, a 5% income tax payment exists on distribution of dividends, earnings and profits.

### SOLIDARITY TAX

This tax is a way to anticipate income taxes so that the amount paid may be credited against income taxes over the following three years. The tax rate is 1% on gross income or the net asset amount and is applicable only to taxpayers opting for taxes on income from lucrative activities (25% income tax regime). Taxpayers that pay taxes under the optional simplified tax regime on income from lucrative activities (5% tax regime) are exempt from this tax.

### CAPITAL GAINS TAX

Current laws provide for an applicable tax rate on capital from furniture and real estate gains at 10%.

A 5% income tax rate is applicable to payments made to stockholders upon the distribution of dividends, earnings or profits.

### BRANCH PROFITS TAX

There is no separate branch profits tax. Overseas companies with a permanent establishment in Guatemala pay tax on the profits of the permanent establishment under the same rules as applied to Guatemala resident companies. There is a 5% branch remittance in Guatemala.

### VALUE ADDED TAX (VAT)

VAT is collected during the exchange of goods or services at the local level as well as during the provision of services and importation of goods. Exportation of goods and services are tax exempt. The tax rate is 12%, although some exemptions do exist including:

- Services provided by entities controlled by the Superintendent of Banks, stock exchange brokers, insurance and reinsurance operations;
- Issuance and transfer of some securities;
- Grants and donations to not-for-profit entities;
- Transactions among co-operative entities and their participants;
- Importation of furniture by cooperative entities exclusively for their operations;
- Imports under the temporary importation system: VAT tax returns shall be filed on a monthly basis within a month following that month reported in the tax return. The tax amount in debt shall be payable on the due date.

### FRINGE BENEFITS TAX

All benefits in kind are taxable in the hands of individuals receiving those benefits from their employers.

### OTHER TAXES - REAL ESTATE TAX

An annual tax is payable on the owners of real estate and levied at the following rates:

| Taxable amount (GTQ'000) | Rate |
|---|---|
| Up to 2,000 | 0.0% |
| 2,000.01 to 20,000 | 0.2% |
| 20,000.01 to 70,000 | 0.6% |
| Over 70,000 | 0.9% |

Tax is also charged on rural land declared to be uncultivated (i.e. not used for agricultural purposes).

## SOCIAL SECURITY CONTRIBUTIONS

Employer's social security is payable at a rate of 10.67% on the total salary of employees.

## SOCIAL SECURITY CONTRIBUTIONS, IRTRA AND INTECAP

Contributions made by employers to the social security and other recreational or training institutions shall be payable at 12.67% on the overall employees' salaries.

A contribution made by employees to the social security scheme is 4.83% on their salaries.

## B. DETERMINATION OF TAXABLE INCOME

The information provided in the following section is applicable to taxpayers opting for the income on lucrative activities regime.

## CAPITAL ALLOWANCES (DEPRECIATION)

A tax deduction is available in respect of fixed assets used in the business. Generally speaking, only the straight-line method is allowed, although other methods may be used if agreed by the tax authorities. Maximum depreciation rates are set and include the following:

| Assets | Rate |
|---|---|
| Buildings and construction | 5% |
| Furniture and equipment | 20% |
| Vehicles | 20% |
| Computers (including software) | 33.33% |
| Tools | 25% |

G

## STOCK / INVENTORY

In general, the following four methods may be used for valuation of inventories:

(1) Production cost;

(2) First-in, first-out system (FIFO);

(3) Weighted average; and,

(4) Historic cost of goods.

Other methods are allowed upon prior authorisation from the Tax Office.

## INTEREST DEDUCTIONS

Interest payments are deductible, but the deductible amount is limited to the amount resulting from multiplying the interest rate authorized by the Guatemala Monetary Board by an amount equal to three times the average total net assets reported by the company on its annual tax return (thin capitalisation rule). This limitation is not applicable to banks and financial institutions subject to the surveillance of the Guatemalan Superintendence of Banks, or to co-operatives legally authorized.

## LOSSES

Losses other than capital losses may not be carried back or forward. Capital losses may only be offset for two years against capital gains.

## FOREIGN SOURCE INCOME

Tax is only chargeable on Guatemala-sourced income.

## TAX INCENTIVES

## EXPORT AND DRAW-BACK ACTIVITIES

Some incentives exist, such as exemption of import tax, income tax and VAT for industrial and commercial outfits established under the incentive to exportation and draw-back incentive law.

## FREE-TRADE ZONE

Incentives including exemption of import tax, income tax and VAT exist for industrial and commercial entities established within the country's free-trade zone.

## INVESTMENT IN RENEWABLE ENERGY SOURCES

Exemption of import tax, income tax and VAT exists by way of the "Incentives for development of renewable energy projects' law".

## C. FOREIGN TAX RELIEF

Only Guatemala-sourced income is subject to tax and therefore Guatemalan law does not provide relief for foreign income taxes paid.

Foreign investment is governed by the Foreign Investment Act, which among others, provides for equal conditions for either domestic or foreign investors. Likewise, this law establishes that the Government may not directly or indirectly expropriate investments made by foreign investors.

## D. CORPORATE GROUPS

There are no special tax provisions relating to groups of companies.

## E. RELATED PARTY TRANSACTIONS/TRANSFER PRICING

In January 2015, transfer pricing rules entered into force. Consequently, taxpayers with non-resident related parties that carry on transactions with such related parties must submit a transfer pricing report attached to their annual tax return (i.e. within the first 3 months of each calendar year – March 31 of the following year). The arm's-length principle should be adhered to and must be determined by means of the following methods:

- The comparable uncontrolled price method;
- The resale price method;
- The cost-plus method;
- The profit split method; or
- The transactional net margin method.

Taxpayers may seek to obtain an advance pricing agreement (APA) from the tax authorities under certain conditions.

There is no CFC (Controlled Foreign Companies) legislation in Guatemala.

## F. WITHHOLDING TAX

For income from non-resident entities and acting with or without a permanent establishment, tax regimes exist for the specific computation of withholding taxes at rates ranging from 5% up to 15%:

- Dividends and other profit distributions derived by non-residents are subject to a 5% final withholding tax on the gross amount of the payment;
- Interest derived by non-residents is generally subject to a 10% final withholding tax on the gross amount. However, interest paid by the state to non-resident entities is exempt from tax. Furthermore, interest paid to non-resident banks and financial institutions, duly organised and supervised by their corresponding banking authorities, is also exempt from tax;
- Royalties paid to non-residents are subject to a 15% final withholding;
- Income derived by non-residents from the rendering of services, including scientific, economic, technical or financial assistance, is subject to a 15% final withholding;
- Income derived by non-resident insurance companies from insurance, reinsurance, secondary bails and cancellations is subject to a 5% final withholding tax;
- Capital gains derived by non-resident enterprises are subject to a 10% final withholding tax on the amount of the gains.

## G. EXCHANGE CONTROL

There are no exchange controls in Guatemala (Decree Number 94-2000 Law of Free Negotiation of Foreign Currency).

## H. PERSONAL TAX

Individuals residing in the country and receiving income from labour under a dependency relationship are subject to a progressive tax rate as shown below:

| Taxable Base (GTQ) | Fixed Tax Amount (GTQ) | Marginal Rate On Excess |
|---|---|---|
| 0.01 to 300,000 | 0 | 5% |
| Over 300,000 | 15,000 | 7% |

Social security contributions and total personal expenses for up to GTQ 60,000 are deductible.

## I. TREATY WITHHOLDING TAX RATES

Guatemala does not have any double tax treaties in force. Guatemala entered into an agreement regarding the Multilateral Convention on Mutual Administrative Assistance in Tax Matters, regarding tax information exchange with 42 countries, which includes among others, taxes on transfer pricing as explained in the preceding paragraphs.

# GUERNSEY

## MEMBER FIRM

| City | Name | Contact Information |

| St. Helier<br>Jersey | Garry Bell | +44 1534 883000<br>garryb@pkfbba.com |

BASIC FACTS

| | |
|---|---|
| Full name: | Bailiwick of Guernsey |
| Capital: | Saint Peter Port |
| Main languages: | English |
| Population: | 63.4 thousand (January 2022 estimate) |
| Monetary unit: | Pound Sterling (GBP) |
| Internet domain: | .gg |
| Int. dialling code: | +44 1481 |

## KEY TAX POINTS

- There are no capital taxes i.e. capital gains tax or inheritance tax.
- Residents are subject to Guernsey income tax on their worldwide income as it arises. The standard rate of Income Tax is 20%.
- Non-residents are normally only subject to income tax on income arising in Guernsey.
- Double taxation relief is available in accordance with various double tax treaties.
- A company tax resident in Guernsey is chargeable to tax at 0%, 10% or 20% depending upon the nature of its income. Generally trading companies and investment holding companies are taxed at 0%. Financial service entities are liable to tax at the 10% corporate rate. Utility companies and companies with Guernsey rental income and Guernsey property development companies, companies involved in the importation and/or supply of hydrocarbon oil or gas in Guernsey and large retail business carried on in Guernsey where the company has a taxable profit of more than GBP 500,000 are taxed at 20%.
- Non-resident companies are not liable to Guernsey tax unless managed and controlled in Guernsey and therefore Guernsey tax resident.

## A. TAXES PAYABLE

### COMPANY TAX

All companies incorporated in Guernsey or managed and controlled in Guernsey are treated as tax resident and, therefore chargeable to Guernsey income tax. A Guernsey resident company is liable to tax at 0%, 10% or 20%.

Income from banking business, domestic insurance business, fiduciary business, insurance intermediary business and insurance manager business, fund administration business and provision of custody services is subject to a 10% rate.

Public utility companies such as those providing electricity, water, gas, telecommunications and postal services are taxed at 20%. Guernsey rental income and profits from property development in Guernsey are taxed at the rate of 20%. Income from the importation and/or supply of hydrocarbon oil or gas in Guernsey is taxed at the rate of 20%.

Large retail business carried on in Guernsey where the company has taxable profits arising or accruing from which in a year of charge exceed GBP 500,000 is taxed at 20%.

Most other companies are liable at the standard rate of 0%.

Collective investment vehicles may apply for exempt status in Guernsey.

The tax year runs from 1 January to 31 December, although companies may adopt an accounting year end of their choice. Income is assessable on a current year basis. Assessments are notified to the company in the year following the year of assessment. Income tax returns must be filed by 28 February following the end of the relevant year. Electronic filing of these returns is mandatory. The tax is due in two instalments, by 30 June and 31 December, in the tax year.

Guernsey has economic substance legislation for tax resident companies.

### CAPITAL GAINS TAX

There is no capital gains tax in Guernsey. Capital gains are not included in ordinary taxable income.

### SALES TAX / VALUE ADDED TAX (VAT)

There is no sales tax or value added tax in Guernsey.

### LOCAL TAXES

Taxes are levied at a state level only.

### OTHER TAXES

The self-employed rate of Social Security is 11% of earnings from self-employment.

Social security contributions are charged on non-employed people at a rate of 10.4% of income for people under 65 and 3.4% of income for people over 65.

Contribution rates for employees and employers are 6.6% each of earnings from employment.

### FRINGE BENEFITS TAX (KNOWN AS BENEFITS IN KIND IN GUERNSEY)

Taxable benefits include, amongst other things, the private use of a company motor vehicle, rent-free accommodation and free board and lodging. Employees are responsible for payment of tax on benefits.

### TAX ON REAL PROPERTY

In Guernsey, there is a list/register of ownership of real property known as Cadastre, and there is a tax on real property.

## B. DETERMINATION OF TAXABLE INCOME

For a company or business, taxable trading profits are calculated by ascertaining assessable income and subtracting allowable deductions. Generally, to be deductible, expenditure must be wholly and exclusively incurred for the purposes of the trade and be revenue in nature rather than capital.

### CAPITAL ALLOWANCES AND DEPRECIATION

No deduction is permitted in respect of depreciation on capital items. However, annual allowances, calculated using the reducing-balance method, are allowed as follows:

- Plant and machinery: 20%
- Motor vehicles: 20%

If, in any year, there are insufficient profits to cover balancing allowances, which are treated as a deduction from profits, any unrelieved amount is carried forward and treated as an allowance for the following year. This surplus capital allowance and balancing allowances may be carried forward indefinitely, if necessary.

## CAPITAL GAINS AND LOSSES

There is no capital gains tax in Guernsey. Capital losses are not allowable.

## INTEREST DEDUCTIONS

Interest is deductible to the extent that it relates to monies borrowed for the purpose of the business.

## C. FOREIGN TAX RELIEF

Guernsey has double tax treaties with the United Kingdom and Jersey. A new treaty between Guernsey and the UK came into force in Guernsey on 1 January 2020. Double taxation relief is available under those treaties. Associated with its negotiations in relation to Tax Information Exchange Agreements, Guernsey has entered into limited double tax treaties relating to income and mutual agreement procedures with:

| | | |
|---|---|---|
| Australia | Denmark | Faroes |
| Finland | Greenland | Iceland |
| Ireland | Japan | New Zealand |
| Norway | Poland | Sweden |

Tax Information Exchange Agreements (TIEAs) have been signed with:

| | | |
|---|---|---|
| Anguilla | Argentina | Australia |
| Austria | Bahamas | Belgium |
| Bermuda | Botswana | Brazil |
| British Virgin Islands | Bulgaria | Canada |
| Cayman Islands | Chile | China |
| Costa Rica | Czech Republic | Denmark |
| Eswatini | Faroes | Finland |
| France | Germany | Gibraltar |
| Greece | Greenland | Hungary |
| Iceland | India | Indonesia |
| Ireland | Italy | Japan |
| Korea | Latvia | Lesotho |
| Lithuania | Macao | Mauritius |
| Mexico | Montserrat | Netherlands |
| New Zealand | Norway | Poland |
| Portugal | Romania | San Marino |
| Seychelles | Slovakia | South Africa |
| Spain | St Kitts & Nevis | Sweden |
| Switzerland | Turkey | Turks & Caicos |
| United Kingdom | United States of America | Uruguay |

## D. RELATED PARTY TRANSACTIONS

There is no transfer pricing or related party legislation in Guernsey.

## E. WITHHOLDING TAX

There are no withholding taxes in Guernsey.

## F. EXCHANGE CONTROL

There are no exchange control rules in Guernsey.

## G. PERSONAL TAX

Income tax is charged on Guernsey resident individuals on their worldwide income and profits regardless of whether such profits or income are remitted to Guernsey. The tax year is the calendar year i.e. to 31 December. There are complicated residence rules in Guernsey. Generally, individuals are treated as resident in a year if they are present in Guernsey for more than six months or if they are present for three months or more, on average, over a period of four consecutive years.

An individual that is “resident only” can elect to pay a standard surcharge of GBP 30,000 and is then exempt from Guernsey tax on their worldwide income.

Guernsey resident individuals can elect for a cap on their income tax liability, so they only pay GBP 110,000 on non-Guernsey source income.

Income from offices and employment is assessable on an arising basis. Income tax is levied on the assessable income of the individual less personal allowances and deductions at a rate of 20%.

Where income is chargeable to tax, personal allowances are available as follows:

- Single person (GBP 11,875)
- Infirm Person's Allowance (GBP 3,850)
- Charge of Child Allowance (GBP 8,075)
- Dependent Relative Allowance (GBP 3,850)
- Housekeeper Allowance (GBP 3,850)
- Mortgage Interest relief

There is tax relief for pension contributions up to GBP 50,000 per person. The only other deduction is for employment expenses.

Some reliefs are restricted and have conditions attached to them which need to be satisfied.

Tax returns must be filed by 28 February of the year following the relevant tax year. Tax is due in two instalments, by 30 June and 31 December, with final balancing payments due once the final assessment has been made.

(Based on 2022 rates and allowances)

## H. TREATY AND NON-TREATY WITHHOLDING TAX RATES

| | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| **Domestic rates** | | | |
| Companies | 0 | 0 | 0 |
| Individuals | 0 | 0 | 0 |
| **Treaty countries:** | | | |
| Cyprus | 0 | 0 | 0 |
| Estonia | 0/10 | 0/10 | 5 |
| Hong Kong | 0 | 0 | 4 |
| Isle of Man | 0 | 0 | 0 |
| Jersey | 0 | 0 | 0 |
| Liechtenstein | 0 | 0 | 0 |
| Luxembourg | 5/15[1] | 0 | 0 |
| Malta | 0 | 0 | 0 |
| Mauritius | 0 | 0 | 0 |
| Monaco | 0 | 0 | 0 |
| Qatar | 0 | 0 | 5 |
| Seychelles | 0 | 0 | 5 |
| Singapore | 0 | 12 | 8 |

Notes:

1. The lower rate applies in case the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the company paying the dividends.

# GUYANA

## MEMBER FIRM

| City | Name | Contact Information |
|---|---|---|
| Georgetown | Harry Narine | +592 225 3221<br>harry@pkfgy.com |

## BASIC FACTS

| | |
|---|---|
| Full name: | Co-operative Republic of Guyana |
| Capital: | Georgetown |
| Main languages: | English and various regional languages |
| Population: | 786,559 (2022 estimate) |
| Monetary unit: | Guyana Dollar (GYD) |
| Internet domain: | .gy |
| Int. dialling code: | +592 |

## KEY TAX POINTS

- Companies are subjected primarily to Corporation and Property Tax.
- Companies are classified into Commercial (taxable at 25%) or non-Commercial (2% on Turnover or 40% on adjusted profit). Telecommunication companies are subjected to 45% tax on adjusted profit. The 2% on turnover is creditable against Corporation tax, whenever the 40% is higher in the future.

- VAT is levied at 14%.
- Unlimited loss carry-forward provided that it does not reduce taxable income in any year by more than 50% for non-commercial companies and below 2% of turnover for commercial companies. Loss carry-back is not allowed.
- A limited unilateral double taxation relief is available.
- Branch remittance tax is 20% subject to the application of a double tax treaty.
- Dividends, interest, royalties and fees are generally subject to a 20% withholding tax unless a double tax treaty or multilateral treaty applies.
- Effective 1 January 2020, Private Corporate Educational Institutions and Private Corporate Medical HealthCare Institutions are exempt from Corporation tax.

## A. TAXES PAYABLE

## FEDERAL TAXES AND LEVIES

### COMPANY TAX

Company tax rates are:

- Non-commercial companies: 25% of chargeable profit. Losses may be carried forward indefinitely and set off is limited to 50% of the chargeable profits in future years.
- Commercial companies: 40% of chargeable profits or 2% of turnover whichever is the higher or lower could be paid at the discretion of the Commissioner General. Any payment in excess of 40% of profit is carried forward as a credit to be used to reduce the tax whenever it is higher than 2% of turnover.
- Dual Rate: For companies that are engaged in commercial and non-commercial activities, the non-commercial activity of the company shall be taxed at the rate of 25% and the commercial activity of the company shall be taxed at the rate of 40%, except for telecommunication companies which are subject to 45%.

A Commercial Company means a company which is trading in goods not manufactured by it (where trading in goods is more than 75% of overall turnover) and includes commission agency and any telecommunication company. It also includes Banks and Insurance Companies other than long-term Insurance business.

### PROPERTY TAX (WEALTH TAX)

This is payable on the net assets of the company as per 1 January of each year. Assets which attract Wear and Tear Allowances will be included at their income tax values. The rates on net property are as follows:

- The first GYD 40 million is exempt;
- The next GYD 20 million is taxed at 0.5%;
- The remainder is taxed at 0.75%.

A set off would be granted to investors who hold shares in local companies at the appropriate rate. Assets owned prior to 1 January 2011 are required to be revalued at that date. This becomes the new value for Property tax.

### CAPITAL GAINS TAX

The rate is 20% on the gain on disposal. Capital losses are carried forward indefinitely and could be offset against future capital gains until fully recouped. A short-term gain is taxed as income (disposal within 12 months).

Gain on disposal of investments in local public companies and any assets owned in excess of 25 years are exempt.

### BRANCH PROFITS TAX

The after-tax profits of a branch of a non-resident company is deemed distributable whether distributed or not and will be subject a 20% withholding tax rate or at tax treaty rates unless the company has reinvested to the satisfaction of the Commissioner General such profits or any part thereof in Guyana.

### VALUE ADDED TAX (VAT)

A standard VAT rate of 14% applies to all taxable transactions other than those that are zero rated. Some items are zero rated and very few are exempt. Registration is required if the turnover exceeds GYD 15 million per annum.

### FRINGE BENEFITS TAX

There are no specific rules for granting of tax-free allowances except for overseas travel assistance which is described in the Income Tax Act. In practice some management staff may obtain car and entertainment allowances but the amount would be limited to 10% or 15% of their remuneration in each case, which must be justifiable to the Commissioner General.

## B. DETERMINATION OF TAXABLE INCOME

### CAPITAL ALLOWANCES

The annual rates for Wear and Tear Allowances for different categories of assets are as follows:

- Aircraft: 33,33%;
- Furniture and fitting: 10%;
- Plant and machinery: 20%;
- Building (housing machinery): 5%;
- Buildings (use for Service): 2%;
- Boats: 10%;

- Motor vehicles: 20%;
- Computers: 50%;
- Office equipment (electrical): 20%; other 15%.

The claim is computed on reducing balance basis except as stated otherwise. An accelerated write off is granted to pioneer industries and certain other undertakings. The rates for the initial allowances are:

- Plant, equipment and motor vehicle: 40%;
- Industrial buildings: 10%.

There is a special regime for gold, diamond and bauxite mining companies which enjoy a 20% write off on all assets for each year.

There is no limit to the carried forward losses to be set off for each year.

## DIVIDENDS

Dividends paid to residents are tax-free. Dividends paid to non-residents are subject to withholding tax at a rate of 20% or at treaty rates.

## TAX INCENTIVES

Income Tax in Aid of Industry Act

This Act was passed in order to encourage the establishment or development of certain industries in Guyana including the working of any mine (other than a gold or diamond mine).

The salient features of this Act are:

1. **Accelerated Depreciation (wear and tear) on Capital Expenditure**

   An initial allowance of 40% of the cost of the Machinery and Plant and 10% of the cost of Industrial Buildings and Structures could be claimed in the year of acquisition or the year following. This is in addition to the standard wear and tear granted under the Income Tax Act. So that in year one the Company could claim 60% of the cost of Machinery and Plant and 15% on Industrial Buildings and Structures.

2. **Tax Holiday**

   Section 2, Part 1 of the Act pertaining to Tax Holiday was amended by the Fiscal Enactments (Amendment) Bills 2003 and 2008 whereby the Minister of Finance may grant exemption from Corporation Tax in respect of Income from Economic Activity qualifying under one of the following circumstances.

   (a) The Activity demonstrably creates new employment in one of the following regions:

   | | |
   |---|---|
   | Region 1: | Barima – Waini |
   | Region 7: | Cayuni – Mazaruni |
   | Region 8: | Potaro – Siparuni |
   | Region 9 | Upper Takatu – Upper Essequibo |
   | Regional 10 | Upper Demerara – Upper Berbice |

   Such other Regions as the minister may, by Order, subject to negative resolution of the National Assembly specify;

   (b) The activity is new economic activity in one of the following fields:

   i. Non-traditional agro processing including aquaculture and production of Bio-fuels;
   ii. Information and communication technology;
   iii. Petroleum explorations, extraction or refining;
   iv. Mineral exploration, extraction or refining;
   v. Tourist facilities;
   vi. Value-added wood processing;
   vii. Textile production;
   viii. Bio technology;
   ix. Development and manufacturing of new pharmaceuticals products, chemical compounds and the processing of raw materials to produce injectables;
   x. Infrastructural development, including the production of electricity using renewal sources of energy;
   xi. Such other fields as the Minister may, or Order, subject to negative resolution of the National Assembly, specify.

The tax holiday period could be between 5-10 years.

Section 2AExemption from Corporation Tax

(1) Notwithstanding anything in the Income Tax Act or the Corporation Tax Act, the Minister may grant an exemption from the following activities
   (a) The provision of Wind and solar energy;
   (b) The provision of water treatment and water recycling facilities;
   (c) The provision of waste disposal and recycling facilities for plastic items.

(2) An exemption granted under this section shall be for a period not exceeding two years.

## C. FOREIGN TAX RELIEF

When a double tax treaty provides that foreign-paid tax will be allowed as a credit against tax payable in Guyana, the credit may not exceed the amount which would result from applying to the income a rate calculated by dividing the income tax chargeable (before allowance of the credit) on total income by the amount of total income. The total credit granted cannot exceed the total tax payable by a taxpayer in any year of assessment.

Guyana may grant unilateral relief for foreign-paid tax where those taxes are calculated by reference to the income arising in that country.

## D. CORPORATE GROUPS

There are no group provisions. Each company needs to file its own return.

## E. RELATED PARTY TRANSACTIONS

The Commissioner-General may disallow a deduction for expenses which he deems unreasonable and unnecessary taking into account the requirements of the trade and business or the actual services rendered (for directors' fees or various payments for services).

Head office expenses in excess of 1% of sales or gross income will be disallowed for deduction purposes.

There are no thin capitalization rules nor is there CFC (controlled foreign companies) regulation in Guyana.

## F. WITHHOLDING TAX

Dividends, interest, rental income, fees and royalties paid to non-residents are subject to a 20% final withholding tax rate, or as per treaty rates.

Non-Resident (less than 183 days) Oil and Gas workers have to pay 20% withholding tax on their income earned in Guyana.

## H. PERSONAL TAX

### Definition of Resident in Guyana

When applied:

1. To an individual means an individual who:

(b) Resides permanently or being in Guyana intends to reside permanently in Guyana except for such temporary absence as to the Commissioner may seem reasonable and not inconsistent with the claim of such individual to be resident in Guyana; or

(c) Resides in Guyana for more than 183 days in the year.

2. To a body of persons means any body of persons the control and management of whose businesses are exercised in Guyana.

### Employment Non Resident

In the case of income arising outside Guyana which is earned income or which arises to a person who is not ordinarily resident in Guyana or not domiciled therein, the tax shall be payable on the amount earned in Guyana. The gains or profits from any employment exercised in Guyana shall be derived from Guyana whether the gains or profits from such employment are received in Guyana or not.

Tax shall not be payable in respect of any income arising out of Guyana to any person who is in Guyana for some temporary purpose only and not with the intent to establish his residence therein and who has not actually resided in Guyana at one or more times for a period equal in the whole six months in the year preceding the year of assessment.

### Income Tax

There are two categories for income tax computations with effect from 1 January 2022: Those earning less than GYD 2,460,000 and those that earn more:

- If you earn more than GYD 900,000 per annum and less than GYD 2,460,000 per annum there is a standard deduction of GYD 900,000 per annum plus:
  - (a) National Insurance contribution of the employee after which the balance of chargeable income is taxed at 28%;
  - (b) A deduction for contributions to Life and Medical insurance of a maximum of 10% of salary or GYD 360,000, whichever is lower;
- If you earn more than GYD 2,460,000 per annum, one third of the gross plus National Insurance contribution (5.6% income less than or equal to GYD 280,000) of the employee is the non-taxable income. The next GYD 1,560,000 is taxed at 28% and the remainder is taxed at 40%.

There are no other allowances except for Home Mortgage Interest Allowance for which the taxpayer has to apply directly to the Commissioner General for the credit.

### Property Tax

Individuals have to state their net property which is taxed as follows:

(Wealth Tax)

- The first GYD 40 million is exempt;
- The Remainder is taxed at 0.75%.

The income tax value of the assets is used when computing net property.

## I. TREATY AND NON-TREATY WITHHOLDING TAX RATES

The following table contains the withholding tax rates applicable to dividends, interest, royalties and management fees paid by Guyanese companies to non-residents under the double and multilateral1 treaties in force. When the domestic rate (see under Section 'Withholding taxes') is lower than the treaty rate, the former applies.

| | Dividends (%) | Interest (%) | Royalties (%) | Management/technical fees (%) |
|---|---|---|---|---|
| **Domestic rates** | | | | |
| Companies | 20 | 20 | 20 | 10 |
| Individuals | 20 | 20 | 20 | 10 |
| **Treaty countries:** | | | | |
| Canada | 15 | 25 | 10 | 10 |
| CARICOM[1] | 0/15[3] | 15 | 15 | 15 |
| United Kingdom | 10/15[2] | 15 | 10 | 10 |

Notes:

1. Guyana is a signatory to the CARICOM multilateral tax treaty. Countries that have ratified the treaty include Antigua and Barbuda, Barbados, Belize, Dominica, Grenada, Guyana, Jamaica, Saint Kitts and Nevis, Saint Lucia, Saint Vincent and the Grenadines and Trinidad and Tobago. The Bahamas is an Associate member of CARICOM and does not enjoy the benefits of the tax treaty.
2. The 10% rate applies if the beneficial owner is a company which controls, directly or indirectly, at least 10% of the voting power in the dividend-paying company.
3. The 15% rate applies to dividends paid on preference shares.

| Tegucigalpa | Eddy A.Tovar | +504 2270 7365<br>eat@pkfhonduras.com |
| Tegucigalpa | Jorge A. Tovar | +504 2270 7366<br>jat@pkfhonduras.com |

## BASIC FACTS

| | |
|---|---|
| Full name: | Republic of Honduras |
| Capital: | Tegucigalpa |
| Main languages: | Spanish |
| Population: | 10.21 million (2022 estimate) |
| Monetary unit: | Honduran Lempira (HNL) |
| Internet domain: | .hn |
| Int. dialling code: | +504 |

## KEY TAX POINTS

- Legal companies are subject to 25% income tax, known as the income on lucrative activities regime.
- Legal companies and individuals resident in Honduras are subject to Alternative Minimum Tax (AMT). As from 2020, companies performing General activities that generate more than HNL 1 billion will be subject to AMT at a rate of 1% while companies performing Special activities that generate more than HNL 1 billion will be subject to AMT at a rate of 0.50%.
- Special activities include natural or legal persons who produce or market: cement, public services provided by state companies, pharmaceutical drugs, oil and its derivatives, bakery sector or industry, products derived from steel for construction, production, marketing and export of coffee.
- Solidarity Tax is payable at a rate of 5% calculated on net taxable income exceeding HNL 1 million and is applicable only to taxpayers opting for taxes on income from lucrative activities (25% income tax regime).
- VAT is payable on the domestic supply of goods and services and the import of goods. A standard Rate of 15% applies although some supplies are exempted.
- Transfer Pricing (TP) policies are applicable in Honduras. If the company does not conduct a TP study, the government is entitled to determine differences between related party transactions and a transaction done by independent parties. If a difference is detected, this would not be deductible for income tax purposes and a 15% or 30% tax would be paid on the difference.
- No restrictions are imposed on foreign-trade operations or foreign currency transactions.

## A. TAXES PAYABLE

### COMPANY INCOME TAX

Company profits are taxed at a rate of 25%.

**Solidarity Tax**

The tax rate is 5% calculated on net taxable income exceeding HNL 1 million and is applicable only to taxpayers opting for taxes on income from lucrative activities (25% income tax regime), with the exception of Special Regimes of Export and Tourism.

**Alternative minimum tax (AMT)**

An alternative minimum tax (*impuesto mínimo alternativo*, AMT) applies if the income tax determined for the relevant tax year is less than the AMT assessed.

Individuals and legal entities that obtained a gross income equal to or lower than HNL 1 billion in the previous tax year are not subject to the application of the AMT.

As from 2020, companies performing General activities that generated gross income higher than HNL 1 billion in the previous tax year will be subject to AMT at a rate of 1% on their gross income while companies performing Special activities that generated gross income higher than HNL 1 billion in the previous tax year will be subject to AMT at a rate of 0.50% on their gross income.

Special activities include natural or legal persons who produce or market: cement, public services provided by state companies, pharmaceutical drugs, oil and its derivatives, bakery sector or industry, products derived from steel for construction, production, marketing and export of coffee.

The AMT does not apply to:

- individuals, on their income derived from wages or salaries;
- the written press;
- companies, on their income obtained during the 2 years following their incorporation;
- individuals and legal entities that incur losses due to force majeure, up to 2 years as from the year in which these losses were incurred;
- individuals and legal entities that derive income from the production, sale and distribution of oil and its derivatives; and
- individuals and legal entities with a favourable tax ruling issued by the tax authority as a result of a tax audit.

H

**Tax instalment**

A 1% instalment of gross income tax applies to taxpayers that meet the following conditions:

- During open tax periods, they have reported operating losses in two consecutive or alternate tax periods.
- In the prior tax period, they derived gross income equal to or greater than HNL 100 million (approximately USD 4,395,604). The income tax instalment is a tax credit that may be applied against income tax, asset tax or the temporary Solidarity Contribution Tax on the filing of the year-end tax return. Companies operating under the following special regimes are exempt from income tax, sales tax, customs duties and certain municipal taxes:
  a. Free Trade Zone;
  b. Industrial Processing Zone (Zona Industrial de Procesamiento, or ZIP);
  c. Temporary Import Regime (Régimen de Importación Temporal, or RIT);
  d. Agroindustrial Export Zone (Zona Agro-Industrial de Exportación, or ZADE);
  e. Free Tourist Zone (Zona Libre Turística, or ZOLT).

## ASSET TAX

The taxable base will be the resulting difference of the assets reflected in the taxpayer´s Statement of Financial Position minus a deduction of HNL 3,000,000 (USD 131,868), minus the doubtful accounts provisions, loans payables, the accumulated depreciations permitted by the Income Tax Law, revaluation of fixed assets, as long as such are not disposed of and the values from registered investment expansions, such as projects or fixed assets in progress that are not in operation. Income tax may be credited against asset tax. If the income tax equals or exceeds the asset tax for the tax year, no asset tax is due. If the income tax is less than the asset tax, the difference is payable as asset tax. In such circumstances, the asset tax represents a minimum tax for the year.

## CAPITAL GAINS TAX

Capital gains tax is calculated on the net profit of the transaction at a rate of 10%. Net profit is calculated by deducting the cost of the property plus any related expenses from the sales price.

## BRANCH PROFITS TAX

Branches of foreign companies are subject to the same tax rates as Honduran companies.

## VALUE ADDED TAX (VAT)

Services and goods are subject to a 15% value added tax and 18% on alcoholic beverages, tobacco and first-class air tickets.

## TAX ON FINANCIAL TRANSFERS

1) Checks, debit or credit card payments and transfers are subject to a 0.30% tax on the operation base. This tax is non-refundable and the bank will charge it to the company bank account.
2) It also applies to mobile communications that are subject to a 1% rate while the minerals extraction industry is subject to a 5% rate on the exports FOB (Free on Board) for the protection of the environment. The contribution of the fast food sector under any franchise is subject to 0.5% on monthly sales.

## MUNICIPAL OFFICE TAXES

Taxes are paid according to a table and total assets. There are different tables for every city in Tegucigalpa, San Pedro Sula and La Ceiba. In Tegucigalpa, the table varies depending on whether the company is industrial, commercial or other.

Real estate is subject to a rate of up to HNL 3.50 per every thousand for Urban Real State and up to HNL 2.50 per thousand for Rural Real State.

## MUNICIPAL REGISTRATION TAX

All industrial and commercial businesses are required to have an annual licence to operate (which is paid monthly and deductible for income tax purposes) depending on the amount of production, sales or income and calculated at the following progressive rates:

| Production, sales or income (HNL) | Per thousand (%) |
|---|---|
| 0 – 500,000 | 0.30 |
| 500,001 – 10,000,000 | 0.40 |
| 10,000,001 – 20,000,000 | 0.30 |
| 20,000,001 – 30,000,000 | 0.20 |
| Over 30,000,000 | 0.15 |

## SOCIAL SECURITY TAX:

These are payments that are made monthly by employers and employees on the payroll of companies for the purpose of guaranteeing the functioning of the worker social security benefits system (IHSS) at national level. The table is as follows:

- Company: 5.2% of salary (USD 365);
- Employee: 2.5% of salary (USD 365).

As from 2016 the law of Social Protection also establishes a new pension plan whereby 1.5% of the current contributions go to RAP Social Fund for Housing.

## PENSION TAX

These are payments that are made monthly by employers and employees on the payroll of companies for the purpose of guaranteeing the functioning of the employee contribution from the State which will complete the regime for the disabled, old aged and deceased (IVM). The table is as follows:

- Company: 3.5% of salary;
- Employee: 2.5% of salary.

Maximum salary of USD 381 per employee. Professional Training Institute (INFOP) which is 1.0% of the total amount that the company pays (this applies to companies with more than 10 employees).

## TAXES FOR THE DISPOSAL OF PROPERTY

For property sales, which will be valued at the market price, the previous owner pays 1.5% on the value of the transaction. For the transfer of immovable property or rights and values carried out with a non-resident, the buyer must withhold 4% of the transfer value.

## RATE OF TOURIST SERVICES

Individuals pay a tax of 4% for daily accommodation in hotels, car rentals and tour operators.

## INCENTIVES

The following incentives are available to certain qualifying industries and corporations:

### Free zones

Companies operating in Free Zones or under the Law of International Services are tax-exempt on profit derived from sales to foreign countries, for the next 10 years after the companies have been approved by the Ministry of Economy and Commerce. Income tax will be exempt for 10 to 20 years, municipal income tax for 10 years.

### Export and draw-back activities

Some incentives such as exemption from importation taxes, income tax and VAT for industrial and commercial outfits established under the incentive to exportation and draw-back incentive law exist.

### Free-trade zone and tourist zone

Incentives including exemption from importation, income tax and VAT exist for industrial and commercial entities established within the country's free-trade zone. Likewise, companies established in the Bay Islands under the Free Trade Tourist Zone of the the Bay Islands.

### Investment in renewable energy sources

Ten years of exemption of importation, twelve year in income tax, Ten years income and value-added taxes exist by way of the Incentives for development of renewable energy projects, law.

## B. DETERMINATION OF TAXABLE INCOME

The net taxable income of a corporation or partnership is determined by subtracting all allowable deductions from gross taxable income. Generally, expenditures and/or losses are deductible provided they are incurred in gaining or producing taxable income, or preserving the source of income. Special rules apply in respect of certain expenditures.

## ACCOUNTING STANDARDS

In general, the Professional Accounting Standards approved by Technical Rulings aim at converging local accounting standards with International Financial Reporting Standards (IFRS) issued by the IASB (International Accounting Standards Board).

## DEPRECIATION

A tax deduction is available in respect of fixed assets used in the business. Generally, only the straight-line method is allowed, although other methods may be used if agreed by the tax authorities. Maximum depreciation rates are set and include the following:

| Assets | Rate |
|---|---|
| Buildings and construction | 2.5% to 3.33% |
| Furniture and equipment | 10% to 20% |
| Vehicles | 20% to 33.33% |
| Computers (including software) | 10% to 20% |
| Tools | 33% |

## STOCKS / INVENTORY

In general, the following four methods may be used for valuation of inventories:

1) Production cost;
2) First-in, first-out system (FIFO);
3) Weighted average; and,
4) Historic cost of goods.

Other methods are allowed upon prior authorisation from the Tax Office.

H

## DIVIDENDS

Dividends paid to domiciled or resident legal entities are subject to tax at the rate of 10%. Dividends paid from Honduran sources to persons or companies not domiciled in Honduras are also subject to tax at the rate of 10%. Dividend distributions that were already subject to the 10% withholding tax are not subject to such withholding tax when the dividends received by companies are redistributed. Dividends received by holding companies that have already been subject to the 10% withholding tax are not subject to such withholding tax when the dividends are redistributed.

## INTEREST INCOME

Banks will withhold 10% income tax on interest income. Loans given by local companies to its stockholders, related parties, headquarters, or residents/companies located in tax havens are subject to a 10% withholding tax.

## INTEREST EXPENSE

Constitutes a non-deductible expense, interest paid on shareholder loans and loans made to a company by the owners, spouses, relatives, associates, partners or parent company. This rule does not apply where the interest is paid to a financial institution. There are no thin capitalisation rules in Honduras.

## PROVISIONS

Provisions for contingent liabilities, such as severance pay, are not deductible for tax purposes. However, payments of such liabilities are deductible expenses.

## LOSSES

Losses incurred in any given year can be taken as a valid deduction only for the current year. There is no carry forward of losses. Companies engaged in agriculture, manufacturing, mining and tourism may carry forward net operating losses for three years. However, certain restrictions apply. Net operating losses may not be carried back.

## FOREIGN SOURCE INCOME

As from 1 January 2017 the Honduran corporate tax system is based on the territoriality principle. Companies, whether or not resident in Honduras are subject to tax only on Honduran-source income. Companies domiciled abroad that have agents or representatives in Honduras are taxed in the same manner as residents on their income derived from activities undertaken in Honduras.

## C. FOREIGN TAX RELIEF

Because of the territoriality principle of the Honduran tax system (see above, under ‘Foreign Source Income’), Honduras does not provide double taxation relief measures for taxes paid abroad.

## D. CORPORATE GROUPS

Honduran law does not allow the filing of consolidated income tax returns or provide any other tax relief to consolidated groups of companies.

## E. RELATED PARTY TRANSACTIONS

The Law on the Regulation of Transfer Pricing (Ley de regulación de precios de transferencia, LRPT), entered into force on 1 January 2014, provides guidelines for the valuation of transactions between related parties at arm’s length. According to the LRPT, the transfer pricing rules apply to any transaction carried out between a Honduran resident (individual or legal person) and its non-resident related parties or entities operating under a special tax regime.

According to the RLRPT, the transfer pricing rules apply to any transaction carried out between a Honduran resident (individual or legal person) and its related parties or entities operating under a special tax regime. Thus, the RLRPT do not limit the application of the transfer pricing rules to cross-border transactions between related parties.

Companies and individuals with related or associated parties within the country, are not obliged to submit a transfer pricing study. However, individuals and companies related or associated with individuals or companies, subject to a special tax regime, must submit such study. If a difference is detected, this would not be deductible for income tax purposes and a 15% or 30% tax would be paid on the difference.

## F. WITHHOLDING TAX

- Dividends, interest, commissions, air, sea and land transport, reinsurance, and other fees paid to foreign recipients are subject to a 10% withholding tax;
- Royalties, Leasing of Movable and Immovable Property, Public Entertainment Shows, Mining Royalties, Fees and Commissions, Videos and Films, Salaries, Services and fees paid to foreign corporations for work done in Honduras are subject to a 25% income tax withholding rate.

## G. EXCHANGE CONTROL

No restrictions are imposed on foreign-trade operations or foreign currency transactions.

## H. PERSONAL TAX

Individuals residing in the country and receiving income from labour under a dependency relationship are subject to a progressive tax rate as shown below (updated for 2022):

| Taxable Annual Income (HNL) | Tax rate (%) |
|---|---|
| 0.01 – 181,274.56 | 0% |
| 181,274.57 – 276,411.57 | 15% |
| 276,411.58 – 642,817.63 | 20% |
| Over 642,817.63 | 25% |

## I. TREATY AND NON-TREATY WITHHOLDING TAX RATES

Honduras has a Central American Free Trade Agreement (CAFTA-DR) with the USA, Central America and the Dominican Republic. Honduras does not have double tax treaties in force.

# HONG KONG

## MEMBER FIRM

| City | Name | Contact Information |
|---|---|---|
| Hong Kong | Henry Fung | +852 2806 3822<br>henryfung@pkf-hk.com |

## BASIC FACTS

| | |
|---|---|
| Full name: | Hong Kong |
| Capital: | N/A. Hong Kong is a Special Administrative Region of the People's Republic of China |
| Main languages: | Chinese (Cantonese) |
| Population: | 7.41 million (2022 estimate) |
| Monetary unit: | Hong Kong Dollar (HKD) |
| Internet domain: | .hk |
| Int. dialling code: | +852 |

## KEY TAX POINTS

- Profits tax is charged on any person (including a corporation, partnership or individual) carrying on a trade, business or profession in Hong Kong. Income derived from outside Hong Kong is exempt (subject to rules deeming certain receipts to be derived from Hong Kong) regardless of residence status.
- Property tax is charged at 15% on the net assessable value of any land or buildings in Hong Kong.
- Transfer pricing regime was enacted and came into effect in 2018. Mandatory transfer pricing documentation is required based on the three-tiered structure recommended by the OECD.
- Dividends received by a Hong Kong corporate, whether from a domestic or overseas company, are not subject to tax and dividend payments made by Hong Kong resident companies are not subject to withholding tax.
- There is no VAT or sales tax in Hong Kong.
- There is no capital gains tax, and capital gains are not subject to personal or corporate income tax.
- There is no inheritance tax or estate duty in Hong Kong.

## A. TAXES PAYABLE

### PROFITS TAX

Profits tax shall be charged on every person (including corporations, partnerships and individuals) carrying on a trade, business or profession in Hong Kong. Income derived outside Hong Kong is generally exempt from tax. No distinction is made between residents and non-residents.

## TAX YEAR

The tax year covers a period of 12 months commencing on 1 April and ending on 31 March of the following year. Profits earned by a person during an accounting year ending within the tax year will be deemed to be their profits for that tax year.

## TAX RATES

The profits tax rates for 2021/22 (year ended 31 March 2022) are as follows:

- Corporations: 8.25% on assessable profits up to HKD 2 million and 16.5% on any part of assessable profits over HKD 2 million*;
- Persons other than corporations: 7.5% on assessable profits up to HKD 2 million and 15% on any part of assessable profits over HKD 2 million*.

* Each group of connected entities could only nominate one entity in the group to benefit from the two-tiered rates. Other entities within the group will be subject to the rate of 16.5% for corporations and the rate of 15% for unincorporated businesses.

## DEEMED TRADING RECEIPTS

The following income of a non-resident person is deemed to be receipts from a trade, profession or business carried on in Hong Kong:

1) Royalties receivable from the exhibition or use in Hong Kong of cinematograph or television film or tape, any sound recording or any advertising material connected with such film, tape or recording;
2) Royalties receivable for the use of, or right to use in Hong Kong a patent, design, trademark, copyright, layout-design (topography) of an integrated circuit, performer's right, plant variety right, formula, or other property of a similar nature;
3) Royalties receivable for the use of, or right to use outside Hong Kong a patent design, trademark, copyright, layout-design (topography) of an integrated circuit, performer's right, plant variety right, formula, or other property of a similar nature if the payee of such royalties has claimed a tax deduction in Hong Kong;
4) Sums received by or accrued to a performer or an organiser for an assignment of, or an agreement to assign, a performer's right in relation to a performance given by the performer in Hong Kong on or after 29 June 2018;
5) Sums receivable for the use, or the right to the use or for imparting or undertaking to impart knowledge directly or indirectly connected with the use outside Hong Kong of any intellectual property or know-how generated from any research and development activity in respect of which a deduction for such research and development expense has been claimed in Hong Kong; and
6) Sums received or accrued in respect of the hire, rental or similar charges for the use of movable property in Hong Kong.

The assessable profits for cases (1) to (3) above are equal to 30% of the sum receivable by the non-resident person if the Inland Revenue Department ("IRD") is satisfied that no person carrying on a trade, profession or business in Hong Kong has, at any time, wholly or partly-owned the relevant intellectual property or the royalty recipient is not an associate of the royalty payee. If the above condition is not satisfied, the assessable profits will be the full amount receivable by the non-resident person.

## BRANCH PROFITS TAX

There is no distinction between branch profits tax and corporation profits tax. Branch profits of foreign corporations are also taxed at the flat rate of 16.5% on assessable profits or at two-tiered tax rates for the year of assessment 2021/22.

## OTHER TAXES

Other important taxes imposed include the following:

## PROPERTY TAX

Property tax is charged at a standard rate of 15% on the net assessable value of any land or buildings in Hong Kong. The net assessable value is the rent payable to the owner of the land or building after deducting the following amounts:

a) Unpaid rent;
b) Government rates paid by the owner; and
c) 20% of the assessable value after deduction of (a) and (b) above.

Any building occupied by the owner as their residence is exempted from tax.

## STAMP DUTY

Stamp Duty applies to the following categories of transactions:

a) Contract notes on Hong Kong shares and marketable securities;
b) Assignment of immovable property;
c) Leases and assignment of leases of Hong Kong property; and
d) Insurance of bearer instruments.

Provided certain requirements are met, taxpayers may apply with the IRD for exemption from stamp duty for the transfer of shares and immovable properties within a corporate group.

**Transactions in Hong Kong Shares and Marketable Securities**

With effect from 1 August 2021, transactions in Hong Kong shares or marketable securities will attract an ad valorem duty of HKD 2.6 per HKD 1,000 (i.e. 0.26%) payable equally by the buyer and the seller (i.e. 0.13% each payable by the buyer and the seller). Stamp duty is waived for the transfer (including allotment and redemption) of shares or units of all Exchange Traded Funds.

**Transactions in Assignment of Immovable Property**

Stamp Duty on assignment of immovable property is sub-divided into three categories as follows:

1. AD VALOREM STAMP DUTY (AVD)

The AVD rate for residential property transactions executed on or after 5 November 2016 is levied at a flat rate of 15% on the sales consideration or value of the properties (whichever is higher), unless specifically exempted or provided otherwise. The major exemption is where the residential property buyer is a Hong Kong permanent resident who acts on his/her own behalf and does not own any other residential property in Hong Kong at the time of acquisition. In such case, the AVD is levied at lower rates which vary from HKD 100 to 4.25% on the sales consideration or value of the properties (whichever is higher), depending on the sales consideration of the relevant properties.

The AVD for transactions of immovable properties other than residential properties is computed at rates which vary from 1.5% to 4.25% on the sales consideration or value of the properties (whichever is higher), depending on the sales consideration of the relevant properties.

2. SPECIAL STAMP DUTY (SSD)

Residential properties acquired, either by an individual or a company (regardless of where it is incorporated), and resold within 36 months, will be subject to SSD. The applicable SSD rates vary from 10% to 20% on the sales consideration or value of the properties (whichever is higher), depending on the holding period of the relevant properties.

3. BUYER'S STAMP DUTY (BSD)

Unless specifically exempted, BSD is payable on residential property transactions, except where the purchaser or the transferee is a Hong Kong permanent resident acquiring the property on his/her own behalf. BSD is charged at 15% on the sales consideration or the value of the properties (whichever is the higher), if applicable.

## CAPITAL GAINS

There is no capital gains tax in Hong Kong and capital gains are not subject to corporate or personal income tax.

## SALES TAX / VALUE ADDED TAX

There is neither sales tax nor value added tax in Hong Kong.

## FRINGE BENEFITS TAX

There is no fringe benefits tax in Hong Kong.

## LOCAL TAXES

There are no local taxes in Hong Kong.

## B. DETERMINATION OF TAXABLE INCOME

Generally, in arriving at profits assessable to tax, deductions are allowed for revenue expenditure to the extent that they are incurred in the production of chargeable profits in the basis period. Special rules apply in respect of the following categories of expenditure.

## CAPITAL ALLOWANCES

Capital allowances are available to a taxpayer who incurs qualifying capital expenditure on specified assets used in the production of chargeable profits. Capital allowances can be classified into industrial building allowance, commercial building allowance, depreciation allowance for plant and machinery and refurbishment allowance as summarised below:

1. **INDUSTRIAL BUILDING ALLOWANCE**

   An initial allowance of 20% is granted in the year of purchase for capital expenditure incurred on the construction of an industrial building or structure occupied for the purposes of a qualifying trade. An additional allowance of 4% of the capital expenditure (on a straight-line basis) is given annually.

2. **COMMERCIAL BUILDING ALLOWANCE**

   A building or structure used for the purposes of a trade, profession or business other than an industrial building or used as stock in trade can qualify for a commercial building allowance. An annual allowance of 4% of the capital expenditure incurred on the construction of the building is provided.

3. **DEPRECIATION ALLOWANCE ON PLANT AND MACHINERY**

   Depreciation allowance on plant and machinery is in the form of an initial allowance and an annual allowance. An initial allowance of 60% is granted in the year of purchase for capital expenditure incurred in acquiring the plant and machinery. The annual allowance is based on the reducing value of each class of plant and machinery (the 'pool').

   A pool is made up of all items of plant or machinery carrying the same rate of depreciation. It is only necessary for the assets to be or to have been owned and used in the production of chargeable profits to qualify for the deduction. The annual allowance is equal to the reducing value of the pool multiplied by the appropriate depreciation rate, currently at 10%, 20% or 30% per annum.

4. **EXPENDITURE ON PRESCRIBED FIXED ASSETS**

   Capital expenditure incurred on certain prescribed fixed assets in any year of assessment is allowed to be fully written off in the year it is incurred. 'Prescribed fixed assets' include computer hardware and software and certain defined plant and machinery used specifically and directly for any manufacturing process.

5. **EXPENDITURE OF PRESCRIBED ENVIRONMENTAL PROTECTION FACILITIES**

   Capital expenditure incurred on certain prescribed environmental protection facilities is entitled to a preferential tax deduction. Expenditure incurred on environmental protection machinery is allowed to be fully written off in the year it is incurred whereas those on environmental protection installation is allowed to be deducted equally in five years of assessment.

6. **CAPITAL EXPENDITURE ON INTELLECTUAL PROPERTY**

   Capital expenditure incurred in the registration of a trademark or design or patent (collectively referred to as "intellectual property (IP)") or incurred in the acquisition of patent rights and rights to any know-how (collectively referred to as "properties") qualify as a tax deduction in the year it is incurred if the IP and properties are used in the production of assessable profits irrespective of whether they are used in or outside Hong Kong.

   Capital expenditure incurred in the acquisition of copyrights, performer's economic rights, protected layout design (topography) rights, protected plant variety rights, registered designs or registered trademarks (collectively referred to as "specified IP rights"). The capital expenditure incurred on the purchase of specified IP rights is to be deducted equally over five years (or over the remaining years of protection) if certain conditions are met.

7. **REFURBISHMENT ALLOWANCE**

   Taxpayers are eligible to claim deduction on refurbishment expenditure equally over a five-year period.

## INVENTORY

All trading stock should be valued at the lower of cost or market value. Accepted valuation methods include FIFO and average cost but not LIFO, base stock method or replacement value. The term 'market value' would normally mean realisable value.

## CAPITAL GAINS AND LOSSES

Capital gains and losses are not taxable or deductible in arriving at the assessable profits.

## DIVIDENDS

Dividend income, whether from Hong Kong or overseas, is not taxable. Dividends paid to either a resident or non-resident of Hong Kong are not subject to any withholding tax.

## INTEREST DEDUCTIONS

Only interest expenses falling within specific categories and incurred in the production of a taxpayer's chargeable profits are tax deductible. In addition, deductibility of interest expenses is subject to certain additional anti-avoidance provisions.

## LOSSES

Losses incurred can be carried forward indefinitely for set-off against any future assessable profits of the same entity. However, there are anti-avoidance provisions in the Inland Revenue Ordinance ("IRO") that restrict the use of tax losses where a change in shareholding was undertaken solely or predominantly for the purpose of utilising the losses to obtain a tax benefit. Losses cannot be carried back.

## OFFSHORE INCOME

Generally, income derived from or arising outside Hong Kong is exempt from tax under the territorial taxation system.

## TAX INCENTIVES

a) The low tax rates and territorial basis of taxation adopted by Hong Kong are in themselves major incentives to foreign investors;

b) Under two-tiered profits tax rates regime, the first HKD 2 million of profits derived by corporations or unincorporated businesses are subject to a 50% reduction in profits tax rates. For connected entities, only one entity in the group can elect to benefit from the lower tax rates;

c) Profits derived by a fund (regardless of its structure, size, location of management and control) from qualifying transactions or transactions incidental to the carrying out of qualifying transactions are exempt from profits tax provided that such transactions are carried out in Hong Kong by a specified person or the fund is a qualified investment fund. Besides, profits derived by a special purpose entity established by the aforementioned fund from the disposal of an interposed special purpose entity or shares issued by an investee private company also qualify for profits tax exemption;

d) For non-residents or special purpose vehicles wholly or partially owned by non-residents that do not satisfy the qualifying criteria as mentioned in c) above, their profits derived from the sale of certain financial instruments, including investments in excepted private companies incorporated offshore, are exempt from profits tax provided that other specific conditions are met;

e) Interest income derived from deposits placed in Hong Kong with authorised financial institutions by any person carrying on business in Hong Kong is exempt from profits tax provided that the deposits have not been pledged as collateral against any loans borrowed and certain conditions are met;

f) Scientific research expenditure, including payments to an approved research institute and payments for technical education, qualify as allowable deductions;

g) Enterprises are allowed to enjoy a 300% tax deduction for the first HKD 2 million qualifying R&D expenditure, and a 200% tax deduction for the remainder;

h) Profits derived by qualifying insurance business and insurance brokerage business in Hong Kong are entitled to a 50% reduction in profits tax rate;

i) Profits derived from qualified debt instruments are exempt from profits tax;

j) Profits derived from specified qualifying treasury activities carried on by a qualifying corporate treasury centre are entitled to a 50% reduction in profits tax rate;

k) Profits derived from qualifying activities by qualifying aircraft lessors and qualifying aircraft leasing managers are entitled to a 50% reduction in profits tax rate;

l) Profits derived from operating lease or finance lease activities carried out by a qualifying ship lessor are exempt from profits tax. In addition, profits derived from qualifying ship leasing management activities carried out by a qualifying ship leasing manager are exempt from profits tax for services provided to an associated qualifying ship lessor or entitled to a 50% reduction in the profits tax rate for services provided to a non-associated qualifying ship lessor; and

m) Any carried interest received by or accrued to a qualifying person from the provision of investment management services for a certified investment fund or specified entity in Hong Kong are exempt from profits tax.

## C. CORPORATE GROUPS

Companies of the same group are assessed to profits tax separately. There is no group tax relief in Hong Kong, with the exception of a court free amalgamation which takes place under Part 13 of the Hong Kong Companies Ordinance, in which case tax losses may be allowed to be transferred to another entity under certain circumstances.

## D. RELATED PARTY TRANSACTIONS

The IRD is empowered to adjust the profits or losses of an enterprise where the actual provision made or imposed between associated persons (associated in terms of management, control and capital) departs from the arm's length provision and has created a Hong Kong tax advantage. The transfer pricing rules shall apply to all Hong Kong enterprises including a permanent establishment ("PE") maintained by non-Hong Kong resident persons, covering both cross-border and domestic transactions which involve tangible assets, financial arrangements, intangible assets and services.

The TP legislation also provides that the income or loss of a non-Hong Kong resident person attributable to the person's permanent establishment in Hong Kong will be determined as if the PE were a distinct and separate enterprise based on the functions performed, assets used and risk assumed by the person through the PE and through the other parts of the person.

In addition, mandatory TP documentation has been implemented in Hong Kong based on the three-tiered documentation structure recommended by the OECD, which consists of the local file, the master file and the Country-by-Country ("CbC") report. All enterprises carrying on a trade or business in Hong Kong which engage in transactions with associated enterprises will be required to prepare the master file and local file for each accounting period within 9 months from the end of the accounting period, except enterprises which meet certain exemptions.

The requirement for CbC reporting applies to multinational enterprise groups whose annual consolidated group revenue for the immediately preceding accounting period reaches the specified threshold amount, i.e. HK$6.8 billion ("Reportable Group(s)"). The primary obligation to perform CbC reporting is on the ultimate parent entity ("UPE") and such reporting will normally have to be filed with the tax authority of the jurisdiction where the UPE resides. If the UPE of a Reportable Group is a Hong Kong entity, the UPE has an obligation to file a CbC Return (including a CbC Report) with the IRD. On the other hand, if the UPE of a Reportable Group is not a Hong Kong entity, then depending on the tax residency of the UPE, the Reporting Group may have a secondary obligation to file a CbC Return (including a CbC Report) with the IRD in Hong Kong.

Furthermore, every Hong Kong entity of a Reportable Group is required to make a notification for determining the obligation for filing a CbC return unless it is not the entity which is to file a CbC return and another Hong Kong entity has already made the notification. The IRD will automatically exchange this report with the jurisdictions in which the MNE is active and with which Hong Kong has concluded relevant agreements for the automatic exchange of tax information.

## E. WITHHOLDING TAXES

Royalties and licence fees paid to non-residents for the use of certain intellectual property in Hong Kong, payments to non-resident entertainers or sportsmen for their performance at commercial occasions or events in Hong Kong and payments to performers or organisers (for an assignment of or an agreement to assign a performer's right) in relation to a performance given by the performer in Hong Kong are subject to profits tax on a withholding basis based on the assessable profits. There are no withholding taxes levied on dividends and interest.

## F. FOREIGN TAX CREDIT

Hong Kong has concluded double taxation agreements with many countries/jurisdictions. Where there is an applicable double taxation agreement, foreign income tax paid may be credited against the Hong Kong tax levied on the same profits, subject to a ceiling of the amount of the Hong Kong tax payable. For the non-treaty countries, Hong Kong grants a deduction on foreign income taxes on certain interest income and gains deemed to be taxable in Hong Kong.

## G. EXCHANGE CONTROL

There are no exchange controls in Hong Kong.

## H. PERSONAL TAX

## SALARIES TAX

Salaries tax is charged on individuals in respect of all income arising in or derived from Hong Kong in relation to any office, employment, pension or payments for services rendered in Hong Kong. The tax charge is calculated at the lower of:

a. 15% of chargeable income after allowable deductions; or,

b. The applicable progressive rates on net chargeable income after the deduction of charitable donations and personal allowances. The progressive salaries tax rates for the years of assessment 2021/22 and 2022/23are as follows:

| **Net Chargeable Income (HKD)** | | **Progressive Tax Rate for 2021/22** | **Net Chargeable Income (HKD)** | | **Progressive Tax Rate for 2022/23** |
|---|---|---|---|---|---|
| First | 50,000 | 2% | First | 50,000 | 2% |
| Next | 50,000 | 6% | Next | 50,000 | 6% |
| Next | 50,000 | 10% | Next | 50,000 | 10% |
| Next | 50,000 | 14% | Next | 50,000 | 14% |
| Remainder | 17% | Remainder | 17% | | |

NOTES:

Net chargeable income= Taxable income – Allowable deductions – Personal allowances

Salaries tax payable = Net chargeable income × Progressive tax rates

| | Personal Allowances | 2021/22 (HKD) | 2022/23 (HKD) |
|---|---|---|---|
| 1. | Basic allowance | 132,000 | 132,000 |
| 2. | Married person | 264,000 | 264,000 |
| 3. | Child (each):<br>First to ninth child: | | |
| | - Year of birth | 240,000 | 240,000 |
| | - Other years | 120,000 | 120,000 |
| 4. | Dependent parent/grandparent: | | |
| | (a) Aged 55 to 59:<br>- basic | 25,000 | 25,000 |
| | - additional (for dependent living with taxpayer) | 25,000 | 25,000 |
| | (b) Aged 60 or above:<br>- basic | 50,000 | 50,000 |
| | - additional (for dependent living with taxpayer) | 50,000 | 50,000 |
| 5. | Dependent brother/sister[1] | 37,500 | 37,500 |
| 6. | Single parent | 132,000 | 132,000 |
| 7. | Disabled dependent | 75,000 | 75,000 |
| 8. | Personal disability allowance | 75,000 | 75,000 |
| **Maximum amount of additional deductions:** | | | |
| 1. | Self-education expenses[2] | 100,000 | 100,000 |
| 2. | Home loan interest[3] | 100,000 | 100,000 |
| 3. | Elderly residential care expenses | 100,000 | 100,000 |
| 4. | Contribution to recognised retirement schemes | 18,000 | 18,000 |
| 5. | Donations to charitable organisation[4] | 35% of income | 35% of income |
| 6. | Qualifying premiums paid under Voluntary Health Insurance Scheme Policy | 8,000 per insured person | 8,000 per insured person |
| 7. | Qualifying annuity premiums and tax deductible MPF voluntary contributions | 60,000 | 60,000 |
| 8. | Domestic rent deduction[5] | - | 100,000 |

NOTES:

1. For whom no child allowance is being claimed.
2. The maximum amount that can be claimed as deductible expense for training courses attended at approved institutions.
3. The entitlement period for tax deduction is 20 years.
4. The maximum allowable deduction is restricted to 35% of the taxpayer's assessable income after deduction of allowable expenses and depreciation allowances
5. The domestic rent deduction applies to taxpayers who are not owners of any domestic property, subject to the fulfilment of certain conditions and the enactment of the relevant laws.

## OTHER INCOME TAXES

Under the Hong Kong tax system, various sources of income are taxed under separate categories i.e. business income is subject to profits tax, rental income is subject to property tax and employment income is subject to salaries tax.

Sometimes, it may be advantageous for an individual to elect to pay tax under 'personal assessment' if he/she has expenses which may be non-deductible against a particular source of income (e.g. mortgage interest payments or allowable tax losses which cannot be completely absorbed by his/her business profits). Under personal assessment, all his/her assessable sources of income are aggregated in a single assessment. Applicants must be permanent or temporary residents of Hong Kong. An election for personal assessment must be made within a stipulated time limit.

## I. TREATY WITHHOLDING TAX RATES

The Hong Kong Government recognises that there are merits in concluding double taxation agreements with its trading partners, particularly in the aviation and shipping industries. Hong Kong therefore has reached different limited double taxation relief arrangements with many countries: Bangladesh, Belgium, Canada, Croatia, Denmark, Estonia, Ethiopia, Fiji, Finland, Germany, Iceland, Israel, Jordan, Kenya, the Republic of Korea, Kuwait, the Lao People's Democratic Republic, Macao Special Administrative Region, Mainland China, Maldives, Mauritius, Mexico, the Netherlands, New Zealand, Norway, the Russian Federation, Seychelles, Singapore, Sri Lanka, Sweden, Switzerland, the United Kingdom and the United States of America in order to avoid double taxation of airline and/or shipping income.

Apart from the limited double taxation agreements applicable to airline and shipping income, the Hong Kong Government also concluded comprehensive double taxation agreements with many countries/jurisdictions. The following table summarises the maximum withholding tax rates of treaty countries/jurisdictions specified in the comprehensive double taxation agreements for the payments of dividend, interest and royalty, provided certain requirements are met:

| | Date of signing | Effective year | Dividend[35] (%) | Interest[35] (%) | Royalty (%) |
|---|---|---|---|---|---|
| Non-treaty countries: | – | – | – | – | 2.475 to 4.95[1] |
| **Treaty countries:** | | | | | |
| Austria | 25.05.2010 | 2012/13 | 0/10[2] | – | 3 |
| Belarus | 16.01.2017 | 2018/19 | 0/5[3] | 0/5[4] | 3/5[5] |
| Belgium | 10.12.2003 | 2004/05 | 0/5/15[6] | 10 | 5 |

| Vietnam | 16.12.2008 | 2010/11 | 10 | 10 | 7/10[34] |

NOTES:

1. If the two-tiered tax rates are applicable, 2.475% applies for the first HKD 6.67 million on royalty income and 4.95% applies for the remaining amount of royalty income. If the two-tiered rates do not apply, the withholding tax rate is 4.95 % for the whole amount of royalty income. If the royalty income is derived by a non-resident person who is an associate of the Hong Kong payer and the IRD is satisfied that no person carrying

on a trade, profession or business in Hong Kong has at any time wholly or partly owned the relevant intellectual property, the withholding tax rate is 16.5% on the whole amount of royalty, or 8.25% for the first HKD 2 million on royalty income and 16.5% for the remaining amount if the two-tiered tax rates apply.

2. 0% applies if the beneficial owner is a company which holds / controls directly or indirectly at least 10% of the payer's capital or voting power or holds directly at least 25% of the capital of the company paying the dividend (applies to Spain only); and 10% of dividend applies in all other cases.
3. 0% applies if the dividend is derived and beneficially owned by (a) the Hong Kong Government (b) the Hong Kong Monetary Authority (c) the Exchange Fund or (d) any institution wholly or mainly owned by the Hong Kong Government; and 5% applies in all other cases.
4. 0% applies if the interest is derived and beneficially owned by (a) the Hong Kong Government (b) the Hong Kong Monetary Authority (c) the Exchange Fund or (d) any institution wholly or mainly owned by the Hong Kong Government; and 5% applies in all other cases.
5. 3% applies to royalty payments for the use of or the right to use aircraft; and 5% applies in all other cases.
6. 0% applies if the beneficial owner is a company which holds directly at least 25% of the capital of the company paying the dividend for an uninterrupted period of at least 12 months; and 5% applies if the beneficial owner is a company which holds directly at least 10% of the capital of the company paying the dividend; and 15% applies in all other cases.
7. 5% applies to interest payments to any bank or financial institutions; and 10% applies in all other cases.
8. 0% applies if the interest is paid to (a) the Hong Kong Government (b) the Hong Kong Monetary Authority (c) the Exchange Fund or (d) a financial establishment appointed by the Hong Kong Government; and 10% applies in all other cases.
9. 5% applies if the beneficial owner is a company which holds / controls directly or indirectly at least 10% of the capital or voting power of the company paying the dividend; and 15% of dividend in all other cases.
10. 5% applies if the beneficial owner is a company which holds / controls directly or indirectly at least 10% of the payer's capital or voting power (applies to Finland, Hungary, Portugal, Malaysia, Japan and South Africa) or holds directly at least 25% of the payer's capital (applies to Indonesia and Mainland China); and 10% applies in all other cases.
11. 5% applies to royalty payments to an aircraft and ship leasing business; and 7% applies in all other cases.
12. 0% applies if the dividend is paid to (a) the Hong Kong Government, (b) the Hong Kong Monetary Authority, (c) the Exchange Fund, (d) any institution wholly or mainly owned by the Hong Kong Government or (e) a beneficial owner which is a company (a company other than a partnership for Latvia); and 10% of dividend applies in all other cases.
13. 0% applies if the interest is paid to (a) the Hong Kong Government, (b) the Hong Kong Monetary Authority, (c) the Exchange Fund, (d) any institution wholly or mainly owned by the Hong Kong Government or (e) a beneficial owner which is a company (a company other than a partnership for Latvia); and 10% of interest applies in all other cases.
14. 0% applies if the dividend is paid to (a) the Hong Kong Government, (b) the Hong Kong Monetary Authority, (c) the Exchange Fund, (d) any entity wholly or mainly owned by the Hong Kong Government; and 5% of dividend applies in all other cases.
15. 0% applies if the interest is paid to (a) the Hong Kong Government, (b) the Hong Kong Monetary Authority, (c) the Exchange Fund, (d) any entity wholly or mainly owned by the Hong Kong Government; and 5% applies in all other cases.
16. 10% applies if the beneficial owner is a company which holds directly at least 25% of the payer's capital; and 15% of dividend applies in all other cases.
17. 0% applies if the beneficial owner is the Hong Kong Government or any of its institutions or other entity wholly-owned directly by the Hong Kong Government; and 5% of dividend in all other cases.
18. 0% applies to royalty payments for the use of, or the right to use, industrial, commercial or scientific equipment or for information concerning industrial, commercial or scientific experience if the beneficial owner is a company (other than a partnership); and 3% applies in all other cases.
19. 0% applies if the dividend is paid to (a) the Hong Kong Government, (b) the Hong Kong Monetary Authority, (c) the Exchange Fund, (d) any institution wholly or mainly owned by the Hong Kong Government or; and 5% of dividend applies in all other cases.
20. 0% applies if the interest is paid to (a) the Hong Kong Government, (b) the Hong Kong Monetary Authority, (c) the Exchange Fund, (d) any institution wholly or mainly owned by the Hong Kong Government; and 5% applies in all other cases.
21. 4.9% applies to interest payments to any bank; and 10% of interest payments applies in all other cases.
22. 0% applies if (a) the beneficial owner is a company that holds directly or indirectly at least 50% of the payer's voting power, and meets specified requirements or (b) the dividend is paid to the Hong Kong Government, the Hong Kong Monetary Authority or any institution wholly or mainly owned by the Hong Kong Government, 5% applies if the beneficial owner is a company which holds directly at least 10% of the payer's voting power; and 15% of dividend applies in all other cases.
23. 0% applies if the interest is derived and beneficially owned by (a) the Hong Kong Government (b) the Hong Kong Monetary Authority (c) the Exchange Fund or (d) any entity wholly or mainly owned by the Hong Kong Government; and 10% applies in all other cases.
24. 0% applies if the dividend is derived and beneficially owned by (a) the Hong Kong Government (b) the Hong Kong Monetary Authority (c) the Exchange Fund or (d) a financial institution wholly or mainly owned by the Hong Kong Government; 3% applies if the beneficial owner is a company (other than partnership) which holds directly at least 15% of the payer's capital; and 5% applies in all other cases.
25. 0% applies if no withholding tax is levied in Hong Kong or the interest is derived and beneficially owned by (a) the Hong Kong Government (b) the Hong Kong Monetary Authority (c) the Exchange Fund or (d) a financial institution wholly or mainly owned by the Hong Kong Government; and 3% applies in all other cases.
26. 0% applies if the dividend is paid to (a) the Hong Kong Government (b) the Hong Kong Monetary Authority (c) the Exchange Fund or (d) any entity wholly or mainly owned by the Hong Kong Government; 5% applies if the beneficial owner is a company (other than partnership) which holds directly at least 15% of the payer's capital and 10% of dividend applies in all other cases.
27. 5% applies to royalty payments for the use of, or the right to use, industrial, commercial or scientific equipment; and 8% applies in all other cases.
28. 5% applies if the beneficial owner is a company which holds directly at least 25% of the payer's capital throughout a 365-day period that includes the day of the payment of the dividends; and 10% of dividend applies in all other cases.
29. 5% applies to royalty payments for the use of, or the right to use, any copyright of literary, artistic or scientific work including cinematograph films or films or tapes used for radio or television broadcasting; and 10% applies to royalty payments for the use of, or the right to use, any patent, trade mark, design or model, plan, secret formula or process, or for the use of or the right to use, industrial, commercial or scientific equipment, or for information concerning industrial, commercial or scientific experience.
30. 10% applies if the interest is beneficially owned by (a) any financial institution or insurance company, or (b) a resident of Hong Kong and is paid with respect to indebtedness arising as a consequence of a sale on credit by a resident of Hong Kong of any equipment, merchandise or services, except where the sale was between persons not dealing with each other at arm's length, and 15% applies in all other cases.
31. 5% applies to royalty payments for the use of, or the rights to use, any copyright of literary, artistic or scientific work; 10% applies to royalty payments for the use of, or the rights to use, any patent, trademark, design or model, plan, secret formula or process; and 15% applies in all other cases.

32. 15% applies if, other than the beneficial owner of the dividends is a pension scheme, dividends are paid out of income (including gains) derived directly or indirectly from immovable property by an investment vehicle which distributes most of this income annually and whose income from such immovable property is exempted from tax; and 0% applies in all other cases.
33. 0% applies if (a) the interest is beneficially owned by specified persons which include the Hong Kong Government, an individual, a listed company, a pension scheme and a financial institution which is unrelated to and dealing wholly independently with the payer or (b) the interest is paid by the Hong Kong Government, by a bank in the ordinary course of its banking business, or on a quoted Eurobond.
34. 7% applies to royalty payments for the use of, or the rights to use, any patent, design or model, plan, secret formula or process; and 10% applies to royalty payments in all other cases.
35. Withholding taxes are generally not levied, except on royalties.

## BASIC FACTS

| | |
|---|---|
| Full name: | Republic of Hungary |
| Capital: | Budapest |
| Main languages: | Hungarian |
| Population: | 9.62 million (2022 estimate) |
| Monetary unit: | Hungarian Forint (HUF) |
| Internet domain: | .hu |
| Int. dialling code: | +36 |

## KEY TAX POINTS

- Companies resident in Hungary are taxed on their worldwide income. A company is resident in Hungary if it is incorporated or has its place of management there. Non-residents carrying on business through a branch or permanent establishment are taxed on income of the branch or establishment.
- Corporate income tax is levied at 9% of the tax base.
- Capital gains of companies are treated as income.
- Local taxes include a local business tax at a maximum rate of 2%. As a part of Hungary's COVID-19 economic recovery plan the tax rate has been capped at 1% for SMEs until the end of fiscal year 2022.
- There is a range of tax incentives for investment, including special incentives for small and medium-sized companies.
- Transfer pricing rules allow adjustment of taxable profits in respect of transactions between related parties.
- VAT at 27% applies to the supply of goods and services while reduced rates or exemptions apply to certain supplies.
- Individuals resident in Hungary are taxed on their worldwide income. Non-residents are taxed only on Hungarian-sourced income.

## A. TAXES PAYABLE

### COMPANY TAX

Hungarian resident companies are liable to corporate income tax on all sources of income wherever arising and whether or not remitted to Hungary. A company is resident in Hungary if it is incorporated or has its place of management in Hungary. Branch offices are liable to corporate tax based on their local activity. Generally, the fiscal and accounting years are both required to end on 31 December. However, companies are entitled to use a different fiscal year if their course of business makes it reasonable.

Generally, tax is charged on the positive CIT base. If both the profit before taxation and the CIT base are below the minimum tax base (2% of total revenue with certain modifying items) then taxpayers may decide whether to pay tax on the minimum CIT base or to present their cost structure on an additional form attached to their tax returns.

Resident companies are required to make advance payments on corporate tax. The advance payments are based on the preceding year's tax results. Legal entities generally file their tax return and pay the taxes by 31st May, except where the fiscal year differs from the calendar year.

Fortune managed by fiduciaries or foundations has become subject to CIT. As a general rule, yield is taxable as if it were a dividend. However, a tax exemption is available subject to certain conditions.

### CAPITAL GAINS TAX

Capital gains of companies are treated as ordinary income and taxed accordingly. A participation exemption scheme exempts the disposal of 'reported participations' from corporate income tax. The reported participation scheme can be applied regardless of the rate of participation in the capital of the relevant company, except for controlled foreign companies. The exemption only applies to participations announced to the tax authority within 75 days after the acquisition of shares and held for at least one year.

In case of preferential restructuring, transfer of assets or exchange of shares capital gains are not taxable, if some conditions are met.

## BRANCH PROFITS TAX

Based on the Act of Hungarian Branch Offices and Commercial Representative Offices of Foreign Registered Companies, branch offices receive the same treatment as domestic companies.

## EXIT TAX

Transfer of business or branches or assets abroad can result in an exit tax liability as of 2020. The tax base is the difference of the fair market value and the book value of the transferred business/branch/asset. Tax can be paid in instalments within 5 consecutive years.

## VALUE ADDED TAX (VAT)

As an EU Member State, Hungary follows EU VAT Directives and Regulations. However, slight differences may occur, in particular with respect to goods and services not suitable for VAT deduction and the scope of domestic reverse charges. ECJ cases cannot be referred to directly during tax procedures, however, in litigation proceedings courts are willing to accept them in case of analogy.

A VAT group system is also available, where transactions among group members are not liable for VAT. Members of the group are related companies, established in Hungary. A VAT group is created upon request of the taxpayers and approved by the Hungarian Tax Authority. In relation to third parties, a VAT group is treated as a homogenous VAT taxpayer.

The general VAT rate is 27%. A discount rate of 18% is applicable to dairy products, cereals, flour, starch, and certain services provided exclusively for the control of entry into outdoor events. Certain pharmaceuticals and medicinal products, books, newspapers, sale of specific residential buildings, district heating, internet services, certain types of meat, catering and (as of 1 January 2020) accommodation services are taxed at 5%. Financial and investment services are tax-exempt. Quick fixes from 2020 are implemented in compliance with the EU directives.

As of 1 July 2018, all taxpayers who issued an invoice with VAT exceeding HUF 100,000 to another domestic taxpayer had a real-time data provision obligation. As from 1 July 2020 this threshold was reduced to zero, therefore all transactions performed in Hungary between domestic taxable persons had to be reported. As of 4 January 2021, the reporting obligation extends to each invoice (except those invoices that are related to the (M)OSS return).

In case of invoices issued by invoicing software transmission of data must be provided instantaneously, without any human intervention. When printed invoices are used for invoicing, the last day for submitting data is the 4th calendar day after issuing the invoice, but if VAT indicated in the invoice exceeds HUF 500,000, the final deadline for reporting is the following day after the issue of the invoice. If the transmission has failed due to breakdown or maintenance, the Tax Authority informs taxpayers in a notice. If there is a malfunction or other technical problem on the taxpayer's side, it is obliged to transmit the missing data to the HTA within 24 hours after the termination of technical issues. In case of non-compliance the default penalty is up to HUF 500,000 per unreported invoice.

Furthermore, cash registers also have an online connection to the Tax Authority.

Generally, VAT is refunded within 75, 45 or 30 days after the assessment was filed to the HTA, depending on the sum of the claim and the status of the taxpayer (is he classified as reliable or risky or without any classification). Considering the hardship endured by taxpayers due to the pandemic, temporary refunds are accelerated by 30 or 20 days (the latter is applicable to reliable taxpayers).

## LOCAL TAXES

Local authorities are permitted to levy the following taxes on individuals and businesses in accordance with a framework law (only foundations with public benefit goals can be ab novo tax exempt organisations). These taxes are deductible expenses for the computation of the CIT taxable base.

## LOCAL BUSINESS TAX

Economic activity carried out on the territory of a municipality may be taxed at up to 2% of net sales revenue less the cost of goods sold, the cost of mediated services, sub-contractors' expenses, material costs and the cost of R&D subject to the completion of certain administrative requirements. If the taxpayer runs a business related to different local governments, the tax liability has to be split among the municipalities involved according to total assets and labour costs of the business. As of 1 January 2021, the tax liability for temporary business activities has been abolished and calculation of tax liability as a flat rate daily liability cannot be used anymore.

Also, due to the pandemic, the rate of local business tax is capped at 1% for 2021 and 2022 for SMEs having less than HUF 4 billion in revenue or total assets on a consolidated basis. In this regard, taxpayers concerned must pay only 50% of their local business tax instalment.

## BUILDING TAX

The owner of a building may be taxed at up to HUF 2,086 per m² (2021) of the surface area or 3.6% of the market value.

## LAND TAX

The owner of land not built upon may be taxed at up to HUF 379 per m² (2021) or 3% of the market value of the land.

## COMMUNAL TAX OF PRIVATE PERSONS

The owner of a building or land, as well as the owner of a rental right on a flat not owned by a private person, may be subject to this tax. The upper annual limit of the tax is HUF 17,000 per real estate or rental right.

## B. DETERMINATION OF TAXABLE INCOME

Profits include all income and capital gains. The taxable basis is the accounting profit adjusted by prescribed items. Generally, expenses incurred wholly and exclusively for business purposes are deductible. The accounting profit is adjusted in accordance with the rules of the corporate income tax legislation, the most important of which are listed below.

## DEPRECIATION

For tax purposes, the straight-line method is normally adopted. Assets should have depreciation time apportioned.

| Asset | Annual Rate of Depreciation (%) |
|---|---|
| Industrial structures | 2 |
| Agricultural structures | 3, 5, 10, 15 |
| Motor vehicles | 20 |
| Computer equipment | 33, 50 |

Assets costing less than HUF 200,000 may be fully written off in the year of purchase. In the case of leased assets, the lessor is allowed to claim depreciation of 5% for buildings and 30% for machinery and equipment. Any depreciation rate can be applied to intellectual property between the rate calculated based on the useful lifetime and 50%.

## INVENTORY

Inventories are generally valued at the lower of cost and market value. Cost may be determined on the basis of FIFO or average cost method.

## CAPITAL GAINS AND LOSSES

See discussion above.

## DIVIDENDS

Dividends received from non-CFC companies are not subject to corporate income tax. As of 1 January 2021, dividends received from a CFC can be exempted from CIT liability to the extent they are associated with 'genuine' transactions.

## INTEREST DEDUCTIONS

Following the implementation of the Anti-Tax Avoidance Directive 2016/1164 (ATAD) into domestic legislation, a new interest limitation rule replaced the previous debt-to-equity ratio-based thin capitalisation rule that came into effect in Hungary on 1 January 2019. As a main rule the interest expense is tax deductible if:

- the net financing cost does not exceed HUF 939,810,000 (approximately EUR 3 million); or
- the net financing cost does not exceed 30% of the company's EBITDA for tax purposes (which is higher).

Taxpayers are allowed to carry forward the non-deductible net financing costs and utilise them (i.e. make them tax deductible), provided that the taxpayer has unutilised interest deduction capacity in a certain tax year.

Former thin capitalisation rules (i.e. a debt-to-equity ratio cannot exceed 3:1) are applicable for intercompany loans granted before 17 June 2016, unless the term or sum of the loan is extended. New rules relate to the extension only.

## LOSSES

Losses can be carried forward for 5 tax years and can only be used up to 50% of the tax base for any particular year. Losses may not be carried back against profits of previous years. No distinction is made between trading and capital losses.

## FOREIGN SOURCE INCOME

Hungarian authorities levy taxes on resident companies on all profits arising from foreign sources in the same way as income from Hungarian sources.

## TAX INCENTIVES

Tax incentives for innovative investments (developments) are granted by the Hungarian Government at the request of the taxpayer. These incentives are granted to companies that meet the requirements set out in law. The value of the incentive is capped at 80 % of CIT due. The minimum value of the investment must be at least:

- HUF 3 billion;
- HUF 1 billion in certain regions determined by the Government;
- HUF 6 billion or HUF 3 billion for investment serving job creation which results in product diversification and/or new process innovation;
- HUF 200 million for investment made by small enterprises;
- HUF 300 million for investment made by medium-sized enterprises;
- HUF 100 million in the case of research and development, environment-protecting investments, zoogenic food production and film and video production;
- HUF 100 million at present value in projects started after issuing quoted shares;
- HUF 100 million in 'free entrepreneurial zones' designated by the Government;
- Job creation (there is no minimum value).

The incentives are available subject to conditions effective in the year when the investment is made and in the subsequent twelve years.

Effective 1 January 2022, the value threshold of investments made by small enterprises is HUF 50 million, while the value threshold of investments made by medium-sized enterprises is HUF 100 million.

## TAX CREDITS ON DONATIONS

A tax saving is available for companies on donations granted to film productions and certain sports clubs and associations (football, handball, basketball, volleyball, hockey and water polo). This can be achieved through a tax credit or a tax base decrease.

## TAX INCENTIVES FOR INVESTORS IN "START-UPS"

Pre-tax profit may be decreased by three times the cost of shareholdings acquired in "start-up" companies determined by the act up to HUF 20 million per tax year. The tax incentive can be applied in four equal instalments, in the tax year of acquisition of shares and in the subsequent three tax years.

## TAX INCENTIVES FOR IMMOVABLE PROPERTIES TREATED AS CULTURAL HERITAGE

The maintenance costs related to immovable properties subject to national or local heritage protection are deductible from the tax base at up to 50 % of the pre-tax profit.

In case of renovation 200% of the incurred costs are deductible from the tax base in addition to the amortisation costs. The tax relief can be split among related companies, but the sum cannot exceed EUR 50 million in case of maintenance and EUR 100 million in case of renovation. This tax incentive can be used in the tax year when finishing the investment and in the subsequent five tax years.

## OTHER TAX INCENTIVES

- Micro, small and medium-sized companies may deduct investment expenses incurred for putting business assets into use of up to the amount of pre-tax profits if: (i) the company qualifies as a micro, small or medium size company at the end of the tax year and (ii) the owners of the company are exclusively private persons throughout the whole tax year.
- A development reserve is available up to the pre-tax profit. Amounts classified as development reserve are tax-exempt but can only be used for investment purposes in the four tax years following the creation of the reserve.
- Taxpayers may decrease their corporate income tax base with regard to rental homes built by employers for their employees.
- Small and medium-sized companies may reduce their tax liability by the interest paid on loans granted by financial institutions for purchasing tangible assets.
- Taxpayers may decrease their corporate income tax liability with regard to investments related to energy savings.

## C. FOREIGN TAX RELIEF

Domestic law provides unilateral relief in the form of credits for foreign taxes paid. The credit is calculated separately for each item and for each source country. It is limited to 90% of foreign tax paid and cannot exceed Hungarian tax on the same income.

In addition, there are international treaties for the avoidance of double taxation.

## D. CORPORATE GROUPS

As from 1 January 2019, taxpayers may opt for a group taxation regime for corporate income tax purposes. Group taxation is available to affiliated entities (corporate entity, economic interest grouping, European public limited liability company, cooperative, European Cooperative Society, a foreign entity that has its place of management in Hungary, and a Hungarian branch of a non-resident taxpayer) resident in Hungary for tax purposes where:

- a taxpayer holds at least 75% of the voting rights in another taxpayer; or
- a person (domestic or foreign, legal or natural person) has at least 75% voting rights in two taxpayers.

Both direct and indirect voting rights are taken into consideration, subject to the condition that the person has at least a 75% direct interest in the intermediary person. Foreign subsidiaries of Hungarian companies cannot participate in a group. Foreign permanent establishments do not participate in their own right, but as part of a Hungarian legal person.

By opting for group taxation, group members are able to offset their operating losses and tax incentives against the income of, or tax payable by, another group member subject to conditions. In addition to the above, group taxation also substantially eases the transfer pricing obligations (e.g., preparing transfer pricing documentation and adjusting the tax bases) as the group members do not need to fulfil these obligations in respect of transactions performed between them. The taxpayer may opt for the group taxation regime by submitting a declaration to the tax authorities between the first and twentieth day of the month before the last month of the tax year.

## E. RELATED PARTY TRANSACTIONS

Transfer pricing rules allow the tax authorities to adjust taxable profits where transactions between related parties are not at arm's length. Transfer pricing documentation must be prepared if there are controlled transactions with related parties.

## F. WITHHOLDING TAX

There is no withholding tax on dividends, royalties and interest paid to non-resident companies.

## G. EXCHANGE CONTROL

There is no exchange control in Hungary.

## H. PERSONAL TAX

Resident individuals are taxed on their worldwide income, although special rules apply to foreign nationals residing in Hungary only for employment purposes. Non-residents are taxed only on their income from Hungarian sources or income taxable in Hungary on the basis of an international convention or reciprocity.

An individual is considered a Hungarian tax resident if one of the following criteria is met:

- Hungarian citizen;
- Citizen of any Member State of the European Economic Area ("EEA") whose stay in Hungary exceeds 183 days in the tax year which corresponds with the calendar year in Hungary;
- Third country citizen who has permanent residence status or is a stateless person in Hungary.

Even if the above-mentioned criteria are met, other criteria of the Hungarian legislation have to be reviewed as well. However, the provisions of double tax treaties override domestic tax legislation.

A flat rate of 15% applies to all income of private individuals, including both the consolidated tax base and separately taxed income (i.e. interest, dividends, etc.). Fringe benefits are treated as taxable income.

- Benefits specified in the Act include vouchers for hospitality only, and are subject to 15% personal income tax on fringe benefits (13% social contribution is payable as well);
- Other fringe benefits need to be multiplied by 1.18 and the amount received is taxed at a rate of 15% PIT while also a 13% social contribution is levied. These fringe benefits include only gift coupons distributed under limited circumstances and allocations into the voluntary mutual insurance funds determined by law.

Several incentives are available supporting families or newly married couples.

Depending on the number of dependents, a family allowance scheme can be put in place: HUF 66,670 per child is deductible from the monthly consolidated tax base if the employee has one child, HUF 133,330 per child if the employee has two children, and HUF 220,000 per child is deductible if the employee has at least three children, subject to certain conditions. The unused family personal income tax allowance can be deducted from social security contribution liability and can be distributed among parents as well.

In addition, families with children can get support for the tax-exempt acquisition or renovation of residencies.

Resident expatriates are taxed on 100% of their remuneration. A social security contribution exemption is available for secondments not exceeding 2 years. Social security contributions are paid by the employee at a rate of 18.5%. Employers pay 13% social contribution tax on the gross income of their employees.

## I. TREATY AND NON-TREATY WITHHOLDING TAX RATES

There is no withholding tax under domestic law on dividends, interest and royalties and no tax is withheld on such payments to non-resident companies, even where a treaty allows such tax.

| | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| **Domestic rates:** | | | |

On 4 March 2021, Hungary published the law for the ratification of the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (MLI). Hungary has stated to implement the minimum standard (i.e., the general purpose for the avoidance of double non-taxation, adopting the general anti-abuse rule, adopting the rules on arbitration) in its ratification instrument.

## KEY TAX POINTS

- Companies resident in India are subject to income tax on their worldwide income and capital gains. Non-resident companies are subject to income tax on their income from Indian sources.
- Dividend distribution tax payable by the Company has been abolished from tax year 2020-21 onwards.
- Transfer pricing rules provide for income from or expense or interest arising from international transactions among associated enterprises to be computed at an arm’s length basis.
- Authority for Advance Rulings to be discontinued and replaced by Board for Advance Rulings (‘BAR’).
- There is also a mechanism of unilateral and bilateral Advance Pricing Agreements (APA mechanism) for transfer pricing transactions.
- The profits of small businesses or professions may be subject to presumptive taxation; income is deemed to be a percentage of gross receipts in case of presumptive taxation.
- There is no inheritance tax and wealth tax.
- Any person earning taxable income from India, should obtain PAN (Permanent Account Number) and file income tax return in India (subject to certain exceptions).

## A. TAXES PAYABLE

The following are the major taxes applicable:

1. Income Tax/Corporate tax – A direct tax levy on Income.
2. Goods and Services Tax – An Indirect Tax levy on transaction of supply of goods and services, being a combined levy by Central and State Governments.
3. Securities Transaction tax on dealing in securities through recognised stock exchanges.
4. Commodities Transaction tax on dealing in commodities through recognised commodity exchanges.
5. Equalisation Levy on gross consideration paid/payable for online advertisement, provision of digital advertising space and any other services as may be notified by Government.
6. Customs Duty – It is an indirect tax collected on import and export of goods.
7. Stamp Duty – Tax levied on legal documents.
8. Land and Property Tax – It is an ad valorem tax on the value of property.

## INCOME TAX

The Indian tax year is a financial year from 1 April to 31 March. The amount of tax payable by Companies is computed after reckoning income tax at prescribed rates and surcharge (SC) computed on income tax.

The aggregate of income tax and Surcharge (SC), wherever applicable, is further increased by 4% Cess. All tax rates mentioned hereinafter in this Country Chapter are net effective rates, inclusive of SC & Cess specified above.

Section 40 (a)(ii) of the IT Act has been amended to clarify that the term "Tax" shall include and shall be deemed to have always included any surcharge or cess paid along with tax. Accordingly, payment of surcharge and cess are not allowed as a deduction.

## COMPANY TAX

Residential status

The scope of taxable income varies depending upon the residential status of the Company. The following companies are resident in India:

a) Company incorporated in India.

b) Any other Company whose place of effective management is in India.

Non-resident companies are those which are not resident companies.

Resident companies are subject to income tax on all sources of income and capital gains wherever arising. Foreign companies are subject to income tax only on their income from Indian sources. Company tax is levied as follows for the tax year 2021-22:

## DETERMINATION OF TAXES

| Companies | Rate*: if net income does not exceed INR 10 million | Rate*: if net income is in the range of INR 10 million – 100 million | Rate*: if net income exceeds INR 100 million |
|---|---|---|---|
| Optional Rate for domestic Company as per Section 115BAA*** | 25.17% | 25.17% | 25.17% |
| Optional Rate for new domestic company into manufacturing as per Section 115BAB** | 17.16% | 17.16% | 17.16% |
| Domestic companies with a turnover up to 400 crores in financial year 2020-21 | 26.00% | 27.82% | 29.12% |
| Domestic companies other than covered above | 31.20% | 33.384% | 34.944% |
| Foreign companies | 41.60% | 42.432% | 43.680% |

*The rates given are after considering surcharge and cess. Surcharge is applicable at 7% for domestic companies and 2% for foreign companies if the net income exceeds INR 10 million but does not exceed INR 100 million and 12% for domestic companies and 5% for foreign companies if the net income exceeds INR 100 million.

Surcharge applicable in case of Section 115BAA and Section 115BAB is at 10%. However, there are marginal relief provisions for border line cases transitioning into a higher tax slab. Cess is applicable at 4% on income tax and surcharge.

**In order to provide relief to new domestic companies engaged solely in the business of manufacture or production of any article or thing, a new section 115BAB has been inserted with effect from tax year 2019-20 onwards, which provides an option to domestic companies to pay tax at 15%, provided inter-alia, the following conditions are met:

- The Company has been setup and registered on or after 1 October 2019 and commenced manufacturing on or before 31 March 2024;
- The Company is engaged in the business of manufacture or production of any article or thing and is not engaged in any other business;
- The Company is a new Company and not formed by splitting up or by reconstruction, of a business already in existence;
- The Company has not used any machinery or plant previously used for any purpose;
- The Company has not used any building previously used as a hotel or a convention centre;
- The Company does not claim certain deductions specified in the section and loss pertaining to the same.

Once the option is exercised it will apply to subsequent assessment years and it cannot be subsequently withdrawn for the said year or any other previous year.

***Domestic companies have been given an option to opt for income tax rate at 22% as per section 115BAA with effect from tax year 2019-20 onwards, provided inter alia, the following conditions are met: the Company does not claim certain deductions specified in the section and does not claim the loss pertaining to the same.

Once the option is exercised it will apply to subsequent assessment years and it cannot be subsequently withdrawn for the said year or any other previous year.

The following income of foreign companies is taxed at the following specified rates on a gross basis and not at the regular tax rate.

| Income | Rate: if net income does not exceed INR 10 million | Rate: if net income is in the range of INR 10 million – 100 million | Rate: if net income exceeds INR 100 million |
|---|---|---|---|
| Royalties and fees for technical services (subject to certain conditions) received pursuant to an agreement, if such agreement is made after 31 March 1976* | 10.40% | 10.608% | 10.92% |
| Interest income received by a foreign company or a non-resident non corporate taxpayer from Government or an Indian concern on money borrowed or debts incurred by Government or the Indian Concern in foreign currency | 20.80% | 21.216% | 21.84% |
| Interest Income from an infrastructure debt fund referred to in clause (47) of Sec 10 | 5.20% | 5.304% | 5.460% |
| Interest income from units of Mutual Funds purchased in foreign currency | 20.80% | 21.216% | 21.84% |
| Income (including dividend) from Global Depository Receipts (GDRs) under section 115AC | 10.40% | 10.61% | 10.92% |
| Income of offshore funds (overseas company) under section 115AB | 10.40% | 10.61% | 10.92% |
| Payment by way of interest by an Indian specified company or a business trust to a foreign company on foreign currency approved loans or long-term infrastructure bonds from outside India or by way of issue of rupee denominated bonds, as referred to in sec 194LC | 5.20% | 5.304% | 5.460% |
| Payment by way of interest by an Indian specified company or a business trust to a foreign company by way of issue of any long-term bond or rupee denominated bonds during the period from 1 April 2020 to 30 June 2023 which is listed on a recognised stock exchange in any International Financial Services Centre, as referred to in sec 194LC | 4.16% | 4.243% | 4.368% |
| Interest income received by a non-resident or a foreign company from a business trust with effect from 1 October 2014 | 5.20% | 5.304% | 5.460% |
| Any other dividend income | 20.80% | 21.22% | 21.84% |
| **Income of Foreign Institutional Investors (FIIs) in listed securities:** | | | |
| - Short-term capital gains in respect of transactions chargeable to Securities Transaction Tax | 15.60% | 15.912% | 16.380% |
| - Long-term capital gains in excess of INR 0.1 million in respect of transactions chargeable to Securities Transaction Tax | 10.40% | 10.608% | 10.92% |
| - Short-term capital gains in cases other than the one mentioned above | 31.2% | 31.824% | 32.76% |
| - Long-term capital gains other than those subjected to Securities Transaction Tax (without indexation) | 10.40% | 10.608% | 10.92% |
| - Interest income of a rupee denominated bond of an Indian company or Government security which is payable after 31st May 2013 but before 1st July 2023, received by a foreign institutional Investor or a qualified foreign investor as referred to in section 194 LD | 5.20% | 5.304% | 5.460% |
| - Interest income of a municipal debt securities of an Indian company or Government security which is payable after 31st March 2020 but before 1st July 2023, received by a foreign institutional Investor or a qualified foreign investor as referred to in section 194 LD | 5.20% | 5.304% | 5.460% |
| - Any Income from securities (Dividends & Interest ) Sec 196D | 20.80% | 21.216% | 21.84% |

* The definition of ‘royalty’ includes the transfer of all or any right for use (or right to use) computer software (including granting of

license) irrespective of the medium through which such right is transferred. Furthermore, royalty includes any consideration in respect of any right, property or information, whether or not:

a) The possession or control of such right, property or information is with the payer.

b) Such right, property or information is used directly by the payer.

c) Location of such right, property or information is in India.

Royalty also includes any consideration for the use of any process, where the process includes transmission by satellite (including up-linking, amplification and conversion for down linking of any signal), cable, and optic fibre or by any other similar technology, whether or not such process is secret.

## CAPITAL GAINS TAX

Gains arising from transfer of a long-term capital asset, i.e., assets held for a period of more than two years (one year in case of shares/securities of companies listed on a recognised stock exchange in India or a unit of an equity-oriented fund or a unit of business trust and two years in case of unlisted shares and immovable property) are regarded as long-term capital gains.

Gains arising from transfer of a short-term capital asset i.e., assets held for less than the respective period stated above are regarded as short-term capital gains.

Long-term capital gains on the sale of other assets are taxed separately at the following rates:

| Particulars | Rates | | | | | |
|---|---|---|---|---|---|---|
| | Income does not exceed INR 10 million | | Income exceeds INR 10 million but does not exceed INR 100 million | | Income exceeds INR 100 million | |
| **Long-term capital gains:** | **For foreign companies** | **For Indian companies** | **For foreign companies** | **For Indian companies** | **For foreign companies** | **For Indian companies** |
| For listed securities or zero-coupon bonds (Without STT) | 10.40% without indexation or 20.80% with indexation, whichever is lower. | 10.40% without indexation or 20.80% with indexation, whichever is lower | 10.61% without indexation or 21.22% with indexation, whichever is lower | 11.13% without indexation or 22.26% with indexation, whichever is lower | 10.92% without indexation or 21.84% with indexation, whichever is lower | 11.65% without indexation or 23.30% with indexation, whichever is lower |
| For unlisted securities (in case of residents) | NA | 20.80% with indexation | NA | 22.26% with indexation | NA | 23.30% with indexation |
| For unlisted securities (in case of non- residents) | 10.40% without indexation or foreign exchange conversion benefit | NA | 10.61% without indexation or foreign exchange conversion benefit | NA | 10.92% without indexation or foreign exchange conversion benefit | NA |
| **Short-term capital gains:** | **For foreign companies** | **For Indian companies** | **For foreign companies** | **For Indian companies** | **For foreign companies** | **For Indian companies** |
| For listed securities or units or zero-coupon bonds (subject to securities transaction tax) | 15.60% | 15.60% | 15.912% | 16.69% | 16.377% | 17.472% |
| For others | 41.60% | 31.20% | 42.428% | 33.384% | 43.68% | 34.944% |

Long-term capital losses can only be set off against long-term capital gains. Short-term capital losses can be set off against any capital gain. Capital losses can be carried forward for a period of eight years for set off against capital gains of the same type in subsequent years. There are no provisions for carrying back losses to earlier years. Capital gains are taxable in India even on account of indirect transfers of assets.

Non-resident Indians (NRIs) earning long-term, capital gains on specified assets acquired in convertible foreign exchange are taxed at 11.44% or 11.960% (if SC is applicable) or 10.40% and on other assets at 22.08% or 23.920% (if SC is applicable) or 20.8%. Any other income from investments is taxed at 22.08% or 23.920% (if SC is applicable) or 20.8%.

## INCOME FROM OTHER SOURCES

Income from other sources is the residual head of income. Any income which is not specifically taxed under any other head of income will be taxed under this head. For example, when the consideration received by a company (in which the public are not substantially interested) from a resident person, for issue of shares exceeding the face value of such shares (share premium), the difference between the consideration and the fair market value of such shares shall be chargeable to tax under "income from other sources".

## MINIMUM ALTERNATE TAX (MAT)

With effect from FY 2019-20, in the case of companies, if the tax payable on their taxable income for any financial year is less than

15%* of their 'book profit', minimum alternate tax is payable on the total income for financial year of such book profits. MAT is also applicable to foreign companies. The rate of MAT is as follows:

| | If book profit doesn't exceed INR 10 million | If book profit is in the range of INR 10 million – 100 million | If book profit exceeds INR 100 million |
|---|---|---|---|
| Domestic Company | 15.60% | 16.692% | 17.472% |
| Foreign Company | 15.60% | 15.912% | 16.38% |

*If the Company is located in International Financial Service Centres, then applicable MAT will 9%.

'Book profit' means net profit as per the profit and loss account as adjusted (increased or reduced) by certain specified items, which includes income tax paid or payable and the provisions made for unascertained liabilities, amounts carried to any reserves, provision for diminution in the value of assets, losses brought forward or unabsorbed depreciation, whichever is less as per books, deferred tax, interest on tax, SC, Cess, income exempt from tax.

**Other key points with respect to MAT**

a. For the purpose of computing book profits, income charged under presumptive basis should be excluded. The MAT paid could be carried forward and set off against normal tax (in excess of MAT for that year) of future years for up to 15 years. With effect from FY 2011-2012, carried forward MAT shall also apply to a limited liability partnership which has been converted from a private company or unlisted public company.

b. MAT is also applicable in respect of SEZ units as well as developers. MAT is not applicable to:
   - Any income arising from life insurance business referred to in section 115B.
   - Domestic company who has exercised the option referred to under section 115BAA or section 115BAB.

c. With effect from 1 April 2021, where there is an increase in the book profit of the income of a financial year due income of past year(s) on account of secondary adjustment or APA ('Advance Pricing Agreement') entered by the taxpayer, the tax officer shall recompute the book profit and tax payable of past years in the prescribed manner.
   - The taxpayer will have to make an application in this regard to the assessing officer.
   - The procedure and time periods applicable for "rectification proceedings" will be applicable.

## TONNAGE TAX FOR SHIPPING INDUSTRY

The tonnage tax scheme for eligible shipping companies provides for a tonnage-based presumptive tax. Indian shipping companies now have the option to pay taxes on tonnage income in place of normal taxable income. There is a lock-in period of 10 years. If a company opts out, it is debarred from re-entry for 10 years. Tonnage income is to be taxed at the normal corporate tax rate. Tax is payable even if there is a loss in a year. Tonnage income is separately calculated for each qualifying ship by multiplying the number of days in the previous year with the daily tonnage income as per specified slab rates.

## DIVIDEND DISTRIBUTION TAX

Until 31 March 2020, the dividend was not taxable in the hands of the recipient due to the applicability of Dividend Distribution Tax (DDT). From tax year 2020-21 onwards, the DDT is abolished, and any dividend received after the aforesaid year shall be taxable in the hands of the recipient. Dividend declared, distributed or paid by a domestic company shall be subject to deduction of tax at source under Section 194 of the Act. Such tax shall be deducted at the rate of 10% on dividend subject to the threshold limit of INR 5,000. However, a beneficial tax rate as per tax treaty, if any, may be availed by the recipient.

## DIVIDENDS FROM FOREIGN COMPANIES

An Indian Company receiving a dividend from a Foreign Company in which the Indian Company holds 26% or more of equity share capital is liable to tax at 15% with surcharge and cess as applicable.

It has now been provided that the special rate of tax under section 115BBD shall not be available to Indian Companies with effect from Assessment year 2023-24.

## BRANCH PROFITS TAX

Profits of a branch office of a Foreign Company in India are taxed @ 40% in India on income received and/or accrued in India (net of allowable expenses) at the rate applicable to Foreign Companies.

| | |
|---|---|
| If net income does not exceed INR 10 million, plus health and education cess @4% | 41.60% |
| If net income exceeds INR 10 million but does not exceed INR 100 million, plus an additional @ 2% surcharge and health & education cess | 42.432% |
| If net income exceeds INR 100 million, plus an additional @ 5% surcharge and health & education cess | 43.68% |

Under section 285, every person, being a non-resident having a liaison office in India set up in accordance with the guidelines issued by the Reserve Bank of India under the Foreign Exchange Management Act, 1999 (42 of 1999) will have to file a statement (Form No 49C- Rule-114DA, duly verified by the Chartered Accountant) pertaining to the liaison office to the authority within 60 days from the end of such financial year.

There are special provisions relating to the conversion of the Indian branch of a foreign bank into a subsidiary Indian Company under section 115JG in the Act.

## ADVANCE RULINGS

In order to determine the tax liability in India in advance, and thereby avoid litigation and uncertainty in tax matters, a mechanism of 'Advance Rulings' is available to non-residents in relation to Indian transactions. Indian residents can also seek advance rulings on transactions undertaken or proposed to be undertaken with non-residents.

The 'Authority for Advance Rulings' (AAR) has been empowered to determine whether an arrangement which is proposed to be undertaken by any person (whether resident or non-resident) is an impermissible avoidance arrangement as referred to in Chapter X-A or not. A resident (falling within any such class or category of persons as the Central Government notifies) can approach the Advance Ruling authority in relation to its tax liability arising out of a transaction which is undertaken (or is proposed to be undertaken) by it.

The advance ruling is binding on the applicant and on the tax authorities. Application can be made to the AAR seeking a ruling on any question of fact or law on payment of a prescribed fee. The ruling is generally delivered within six months of making the application and is made in writing giving reasons for the decision of the AAR.

From tax year 2021 onwards, AAR is discontinued and replaced by Board for Advance Rulings ('BAR'). The BAR shall consist of two members, each being an officer not below the rank of Chief Commissioner. Orders of the BAR appealable before the High Court by the taxpayer or the tax department. BAR shall function on and after a notified date.

## GOODS AND SERVICE TAX

The 101st Constitutional Amendment Act has amended various Articles in the Constitution of India to provide concurrent power to both the Central Government and State Governments to levy tax on supplies that now subsume earlier taxable events of manufacture, sale and service under the erstwhile tax regime. The GST Law was introduced with effect from 1st July 2017.

The Central GST Act provides for levy of Central Goods & Services Tax (CGST) on Intra-state supplies of goods or services or both. Concurrently, respective State GST Acts provide for levy of respective State GST (SGST) on intra-State supplies of goods or services or both. The Integrated GST Act provides for levy of IGST on Inter-State supplies of goods or services or both. Thus, in short, CGST and SGST will be levied on intra-State supplies of goods and services whereas IGST will be levied on inter-State supplies of goods and services. Each State Government has enacted statute for levy of GST on supplies of goods and services. Union Territories Goods & Services Tax (UTGST) is applicable in case of Union territories (UT) which do not have legislature. They do not have SGST. Delhi and Puducherry are Union Territories that have their own legislature. Hence, they have their own SGST. The GST Law was extended to Jammu and Kashmir with effect from 8 July 2017. Area up to 200 nautical miles from baseline inside sea is also part of "India" for the purpose of GST.

I

It is a blanket indirect tax that had subsumed several indirect state and federal taxes such as Value added tax (VAT) and Central Excise duty, and different state taxes, central surcharges, entertainment tax, luxury tax and a slew of related levies by local bodies.

GST is based on the VAT concept of allowing input tax credit of tax paid on inputs, input services and capital goods, for payment of output tax. This avoids a cascading effect of tax on taxes.

In addition, GST Compensation Cess is payable on most of luxury such as motor cars, sin or unhealthy goods and services like pan masala, tobacco products, coal, aerated waters, etc.

In case of a supply within State/Union Territory, CGST will be 50% of IGST Rate and SGST/UTGST will be the remaining 50% of applicable IGST rate.

**Rates of Tax under GST (Equal to IGST rates)**

| Goods | Services |
|---|---|
| 0% | 0% |
| 0.25% | - |
| 3% | - |
| 5% | 5% |
| 12% | 12% |
| 18% | 18% |
| 28% | 28% |

## INPUT TAX CREDIT MECHANISM

Uninterrupted and seamless chain of credit for taxes paid on purchases (Input Tax Credit, shortly ITC) is one of the key features of Goods and Services Tax. Under the earlier system of taxation before GST, credit of taxes being levied by Central Government was not available as set-off for payment of taxes levied by State Governments, and vice versa. One of the most important features of the GST system is that the entire supply chain would be subject to GST to be levied by Central and State Government concurrently. As the tax charged by the Central or the State Governments would be part of the same tax regime, credit of tax paid at every stage would be available as set-off for payment of tax at every subsequent stage except for certain notified supplies on which ITC is not available to supplier/taxpayer. Tax credit is not allowed on purchase of goods and services which are used for further supply (interchangeably used with word "sale" which is normal and major form of supply) of goods/services/both which are exempted.

As GST seeks to consolidate multiple taxes into one, various transitional provisions are incorporated into GST law to ensure that the transition to the GST regime was very smooth and hassle-free, and no ITC/benefits earned in the existing regime are lost.

Though credit on both Central tax (CGST), State Tax/Union Territory tax (SGST/UTGST) and Integrated Tax (IGST) is available freely, the following protocol to be adhered, to avail and utilise the credit of these taxes.

Input tax credit availed, utilised, refunded and carry-forward balance is maintained electronically for all registered taxpayers at common portal namely 'Goods and Service Tax Network'.

Credit of CGST cannot be used for payment of SGST/UTGST and credit of SGST/UTGST cannot be utilised for payment of CGST. Credit of IGST can be used for payment of CGST/SGST/UTGST or vice versa. It is to be noted that only after the credit of IGST has been fully utilised the credit of CGST or SGST/UTGST, lying in balance in Electronic Credit Ledger, can be utilised in any order.

The amendments to the CGST Act now provide for additional conditions to be satisfied by a person registered under GST to be entitled for availing input tax credit after reconciling the details of the invoice available with him against the statement of outward supplies furnished by the corresponding supplier with effect from 1 January 2022.

These conditions have been imposed to arrest the issue of tax frauds by way of fake tax invoices/circular trading of tax invoices. Taxes paid on purchases shall be eligible for credit consequent upon suppliers furnishing the details of such tax invoices in their statement of outward supplies and availability of details of such tax invoices in the recipient's statement of inward supplies. The condition has been imposed in addition to the basic conditions such as recipient in possession of tax invoices & goods or services or both with intention to use in course or furtherance of business.

Additional conditions have now been imposed vide Finance Act 2022 to provide that credit of input tax on purchases communicated to the recipient statement of inward supplies shall be restricted, if the supplier has

- Defaulted in payment of tax for such continuous periods as may be prescribed;
- Tax payable in excess of tax paid to the Government for such periods as may be prescribed;
- Availed input tax credit more than credit entitled to him.

The statutory time limit to avail input tax has been extended up to 30th November following the end of the financial year to which the tax invoice or debit note pertains to or furnishing of the annual return, whichever is earlier. Furthermore, the statutory time limit to rectify an omission or incorrect particulars already furnished in the tax return has also been extended up to 30th November following the end of the financial year, or the actual date of furnishing of the relevant annual return, whichever is earlier. These amendments made by the Finance Act 2022 would be notified in due course of time to bring the provisions into force.

Every registered taxpayer shall now be required to self-assess the entitlement to input tax credit which shall be a credit to his electronic credit ledger and concept of provisional credit has been done away with by the Finance Act 2022 which will be notified in due course of time to bring the provisions into force.

The taxpayer is expected to maintain records of inward supplies (purchases) & input tax credit availed at each place of business specified in the certificate of registration for a minimum period of 72 months from the due date for furnishing an annual return for the year pertaining to such accounts and records.

## ANTI-PROFITEERING MECHANISM TO PROTECT CONSUMERS

From the experience of many countries, it was expected by the Indian Government that when GST is introduced it could lead to inflation and increase in the prices of the commodities. The availability of the tax credit right from the production stage to the final consumption stage should have reduced the final prices. However, some suppliers were not passing on the benefit of reduced tax or tax credit to the consumer, thereby indulging in undue profiteering which could lead to inflation.

National Anti-profiteering authority was therefore constituted by the Central Government to examine whether tax credits availed by any registered person or the reduction in the tax rate have actually resulted in a commensurate reduction in the price of the goods or services or both supplied by him, and this is to ensure that the consumer is protected from arbitrary price increase in the name of GST. Such Authority originally constituted with a validity of 2 years from the date of introduction of GST, has been extended for a further period of 2 more years.

## REGISTRATION REQUIREMENT UNDER GST LAW

Any person whose aggregate turnover (computed on all India basis) in a financial year exceeds INR 4 million (for persons dealing exclusively in goods) or INR 2 million (for persons dealing in goods "and" services or only services), is required to apply for registration under Indian GST Law to get GST Identification Number (GSTIN). Such limits would be INR 2 million and INR 1 million respectively for persons conducting business in special category states including a few north-eastern states.

Under compact scheme of composition, a taxpayer with an aggregate turnover of up to INR 15 million in a financial year who exercises such an option is required to pay subsidised and consolidated rates of GST, subject to certain conditions. Simplified Composition Scheme is also introduced for very small taxpayers who are having an aggregate turnover of up to INR 5 million.

In case of import of services and other notified goods/services, a mechanism has been prescribed whereunder the recipient of the supply is liable to pay tax which is referred to as Reverse Charge Mechanism (RCM).

Business entities who are liable to pay such tax under RCM mechanism, Non-resident Taxable persons, Electronic Commerce Operators, Persons who are making supply through such Electronic Commerce Operators are a few notable exceptional categories of taxpayers, who are required to take mandatory registration under GST law without any limit on aggregate turnover.

## SPECIAL PROVISIONS FOR TAXPAYERS OF FOREIGN ORIGIN AND SPECIFIED ORGANISATIONS

Persons/Entities who are in India for specified period/purpose are broadly classified into following categories mainly to manage compliance with tax laws and to administer payment of taxes and its refund:

a. Non-Resident taxable person
b. Specialised Agencies/Institutions of International Importance
c. Foreign Tourist

In GST registration, normally a taxpayer is allotted a 15-digit GST identification number called "GSTIN" in which 10 digits (3rd digit to 12th digit) are "PAN" number under Income tax Laws.

Specialised Agencies/Institutions of International Importance shall be granted a Unique Identify Number instead of the GST registration number. Such persons would be entitled to claim refund of tax paid on notified purchases from registered suppliers subject to fulfilment of prescribed conditions.

## NON-RESIDENT TAXABLE PERSONS

"Non-resident taxable person" (NRTP) means any person who occasionally undertakes transactions involving supply of goods or services or both, whether as principal or agent or in any other capacity, but who has no fixed place of business or residence in India.

NRTPs need to get themselves registered under GST at least 5 days before commencement of business and they will be given registration for a temporary period of 90 days which are extendable for a further 90 days. Application for registration is to be signed by Authorised Signatories appointed in India. NRTPs are not entitled to Input Tax credit except for goods imported by them. NRTP entities need to file monthly tax statements during such period they remain in India. Taxes are expected to be estimated and paid in advance before commencement of business. Any shortage in taxes will attract interest and any excess tax paid will be refunded after filing of all tax statements which are due. If the business is expected to continue beyond such period, they are expected to go through normal registration route rather than registration as NRTP.

## SPECIALISED AGENCIES/INSTITUTIONS OF INTERNATIONAL IMPORTANCE

A specialised agency of the United Nations Organisation or any Multilateral Financial Institution and Organisation notified under the United Nations (Privileges and Immunities) Act, 1947, Consulate or Embassy of foreign countries or any other such notified persons or class of persons, are entitled to refund of tax paid by them on purchase of goods or services or both.

## INTERNATIONAL TOURISTS

Tax refund for international tourists' scheme provides an opportunity for foreign tourists to buy goods manufactured during their stay in any Country and claim the refund of tax suffered by such goods at the time of their exit from the Country. This is an internationally accepted practice by various Countries to encourage the sale of their goods to foreign tourists. In GST regime, this practice is being implemented by the Government of India, subject to certain exceptions.

## ZERO RATED SUPPLY

By zero rating it is meant that the entire value chain of the supply is exempt from tax. This means that in case of zero rating, not only is the sale exempt from payment of tax, but also there is no bar on taking and enjoying credit of taxes paid on the input side for making/providing the supply of goods and services. Such an approach would in true sense make the goods or services zero rated. In India (a) Export of goods and services (b) Supply of goods and services to Special Economic Zone which are considered as duty free zones and under the supervision of Indian Customs department are termed as zero-rated supply.

The amendment by the Finance Act 2021 made to the provisions under Integrated Goods & Services Act, would restrict the benefit of zero rating on supply made to SEZ unit or SEZ developer which are used for authorised operations. This amendment made by Finance Act 2022 would be notified to be brought into force in due course of time which would necessitate the registered suppliers to obtain confirmations from SEZ unit/developers that the supplies made to them have been used for authorised operations.

Until such amendment is notified registered suppliers would be required to maintain at a minimum necessary documentary evidence that supplies have been made to SEZ Unit/developers.

The former option to make zero rated supplies either on payment of tax and claim refund of tax paid as such or export under letter of undertaking or Bond without payment of tax and claim refund of unutilised input tax credit will not be available once the Central Government issues the notification under the amendments made to the IGST Act by Finance Act 2021 specifying the category or persons or class of supplies in respect of which supplies shall be made only under the cover of letter of Undertaking without payment of IGST.

The exporter of goods shall be responsible to ensure realisation of export proceeds within the timelines prescribed under Foreign Exchange Management Act and non-compliance would result in depositing back to the Government Exchequer any amount of refund claimed along with interest.

The exporter of services is required to realise receivables in foreign exchange or such mode prescribed by the Reserve Bank of India within 1 year from the date of issue of a tax invoice failing which applicable tax along with interest would be required to be paid by the supplier.

## E-WAY BILL MECHANISM

Electronic Waybill (e-way bill) is basically a compliance mechanism where by way of a digital interface the person causing the movement of goods uploads the relevant information prior to the commencement of movement of goods and generates e-way bill on the tax portal. This mechanism facilitates faster movement of goods, improves the turnaround time of trucks and helps the logistics industry by reducing the travel time as well as costs. This also helps the Government to ensure that goods being transported comply with the GST Law, track movement of goods and check tax evasion.

## E-INVOICING

The GST Council has approved the introduction of electronic invoicing ('e-invoice') in GST in a phased manner. Steps have been initiated to introduce 'e-invoicing' for reporting of Business to Business (B2B) invoices and exports and accordingly certain classes of registered persons have been notified who shall register the details of invoices issued by them on 'Invoice Registration Portal' developed by National Informatics Centre and generate Invoice reference number. Effective 1 April 2022 notified registered persons whose aggregate turnover exceeds an amount of Rs 200 million crores shall ensure compliance with E-invoice process.

## REFUNDS

The provisions enabling a right to refund are contained in the CGST Act. The Act provides for the following circumstances under which a person who has paid tax, interest, penalty, fees or any other amount can make an application for a refund, subject to a minimum of INR 1,000:

- Refund of excess balance in the electronic cash ledger.
- Refund of input tax credit on exports of goods and services without payment of tax.
- Refund on account of supplies to a SEZ unit/developer without payment of tax.
- Refund on account of input tax credits accumulated due to the inverted tax structure (i.e., the rate of tax on inputs is higher than the rate of tax on onward supply).
- Refund by the recipient of a deemed export.
- Refund on account of supplies to a SEZ unit/developer with payment of tax.
- Refund on account of export of services with payment of tax.
- Refund of tax paid on an intrastate supply which is subsequently held to be an interstate supply, and vice versa.
- Refund of excess payments of tax.
- Refund on account of assessment/provisional assessment/appeal/any other order.

The CGST Act provides for a statutory limitation period of two years from the relevant date specified for each of the circumstances within which the refund application may be made. Claims for refund for any tax period may be made monthly/quarterly/half-yearly/annually or may even combine multiple financial years provided the application is filed within the statutory time limit.

Refund of any unutilised input tax credit is allowed only against zero-rated supplies made without payment of tax under letter of undertaking or in respect of supplies made for which the rate of tax is under the inverted duty structure (see below). The registered person must carry forward to subsequent tax periods any input tax credit that remains unutilised for any other reason until the closure, transfer or change in registration category of the business, in which case the treatment of input tax needs to be dealt with in the manner already discussed above in this chapter.

The Indian government may, however, restrict the claim of credit accumulation under the inverted duty structure for certain specified supplies of goods or services (or both). A registered person is also unable to claim a refund of unutilised input tax credit where the goods exported are subject to export duty and in cases where the supplier has already availed drawback in respect of CGST or claims a refund of IGST paid on such supplies.

Inverted duty structure means the rate of GST on purchases is higher than the rate of GST on outward supplies, resulting in an accumulation of input tax credit. A refund is allowed for accumulated input tax credit in the taxpayer's account which is unutilised.

The applicant must prove, by way of documentary evidence prescribed in the CGST Rules, entitlement to the refund and that the amount of tax, interest or any other amount paid in relation to which the refund is claimed was collected from the applicant or paid by the applicant, and that the liability to tax and interest has not been passed to any other person.

The statutory time limit to file an application for claim of refund of tax is two years from the specified relevant date. In respect of zero-rated supplies made to Special Economic Zone units or developers, the due date for filing refund application where a refund of tax paid is available in respect of such supplies themselves, or as the case may be, the inputs or input services used in such supplies now would be two years from the due date of furnishing tax returns in respect of such supplies. This amendment made by Finance Act 2022 would be notified to be brought into force in due course of time.

The statutory time limit to file an application for claim of refund of tax paid by Specialised Agencies/Institutions of International Importance now would be two years from the last date of the quarter in which such supplies were received. This amendment made by Finance Act 2022 would be notified to be brought into force in due course of time

## RECORD KEEPING REQUIREMENTS & AUDIT

It is a legal requirement for all Indian GST registered entities to keep accounting records. The main items to be kept include the following:

- Purchase and sales invoices.
- Records of input tax incurred and claimed.
- Details of output tax payable, collected and paid, including under the reverse charge.
- Documentation relating to the import or export of goods or services.
- Details of supplies attracting payment of tax on a reverse charge basis, along with relevant documents.
- Register of tax invoices, bills of supply, debit notes, credit notes, receipt vouchers, payment vouchers and refund vouchers.
- Details of advances received, paid and adjusted.
- The name and complete address of suppliers and recipients.

The registered person supplying services is required to maintain the accounts showing quantitative details of goods used in the provision of services, and details of all services purchased and supplied.

Books of account include any electronic form of data stored on any electronic device.

The provisions of mandatory GST audit by Chartered Accountant or Cost Accountant have been omitted from the CGST Act. Going forward, there would be no requirement to submit an audited reconciliation statement reconciling the turnover between the books of accounts and tax returns filed and process of submission of reconciliation statement under self-certification route has been stipulated in the Act.

Normal registered persons would be required to furnish a self-certified annual return and reconciliation statement between returns and books of accounts.

## INTEREST FOR NON-COMPLIANCE

The delayed filing of tax returns beyond the specified due date shall attract an obligation to pay interest only on that portion of the tax that is paid in cash and not through utilising an input tax credit. This amendment has been introduced retrospectively effective from 1 July 2017.

Incorrect benefit and utilisation of input tax credit attracts interest at 24% and the registered taxpayer is now mandated to reverse his input tax credit where the applicable tax payable by the supplier has not been paid to the Government. Such input tax credit reversed may be re-availed where the supplier has made the payment of the tax payable to the Government. This amendment made by Finance Act 2022 would be notified to be brought into force in due course of time.

## EQUALISATION LEVY

Considering the potential of the new digital economy and the rapidly evolving nature of business operations, it is found essential to address the challenges in terms of taxation of digital transactions.

In order to address such challenges, a new Chapter titled "Equalisation Levy" was introduced in the Finance Act 2016 to provide for an equalisation levy of 6 % of the amount of consideration for specified services (online advertisement) received or receivable by a non-resident not having a permanent establishment ('PE') in India, from a resident in India who carries out a business or profession, or from a non-resident having a permanent establishment in India. No levy shall be made if the aggregate amount of consideration for specified services received or receivable by a non-resident from a person resident in India or from a non-resident having a permanent establishment in India does not exceed INR 0.10 million in any financial year.

The scope of EL has been expanded. As from 1 April 2020, an equalisation levy of 2% would be levied on the amount of consideration received or receivable by an e-commerce operator from an e-commerce supplier (goods/services owned by the e-commerce operator). Further, no levy shall be made on account of the sale, turnover or gross receipts as the case may be is less than INR 20 million during the FY.

In addition, as from tax year 2021-22 onwards, equalisation levy shall not be levied on consideration received or receivable for specified services or for e-commerce supply which is taxable as royalty or fees for technical services.

## CUSTOMS DUTY

Basic Customs duty, Social Welfare Surcharge, and IGST, (in few cases GST Compensation Cess, Road and Infrastructure Cess) are payable on import of goods. In respect of specified petroleum products like Petrol, Diesel, Crude, Natural Gas, Aviation fuel, and on Tobacco Products, there is a Countervailing Duty (CVD) in lieu of IGST.

In the Finance Act 2020, a new Cess called "Health Cess" at the rate of 5% is imposed on the import of medical devices. Proceeds of Health Cess shall be used for financing the health infrastructure and services. Such (additional) Health Cess shall not be leviable on import of inputs/parts used in the manufacture of medical devices.

Customs duty is payable on goods imported into India. The normal rate of import Duty is:

| Particulars | Rate |
|---|---|
| Basic Customs Duty (Generally prevalent rate) | 10% |
| Social Welfare Surcharge (in lieu of Customs Cess in the form of Education Cess & Secondary & Higher Education Cess until February 2018) | 10% |
| IGST on import of goods | Equal to IGST under GST Laws. |
| GST Compensation Cess (for some luxury or demerit goods) | Equal to GST Compensation Cess under GST Laws |
| Health Cess on import of specified medical devices | 5% |

The Tariff rate may vary depending upon the products. In addition to the above, Additional Customs duty, Road and Infrastructure Cess are levied on certain items like Petroleum products.

The jurisdiction of Customs Law is up to 200 Nautical miles from base line. It has been extended for limited purposes to prevent offences or contraventions committed outside India by any person.

Finance Act 2020 has brought in a new section of provisions in Customs law to provide for additional safeguards and checks in case of importers claiming preferential tariff treatment in line with Foreign Trade Agreements. These procedures are expected to go beyond origin certificates as normally secured by importers and to include furnishing security equal to differential duty in certain cases.

Finance Act 2021 has brought in a new section to impose liability by way of penalty on any person not exceeding five times the amount of refund claimed of any duty or tax on goods, by way of obtaining any invoice by fraud, collusion, wilful misstatement or suppression of facts to utilise input tax credit on the basis of such invoice for discharging any duty or tax on such goods that are entered for exportation under claim of refund.

## CENTRAL EXCISE DUTY

After GST, Central Excise duty is getting continued but levied on few selected goods like tobacco and tobacco products, petroleum products, i.e., petroleum crude, high speed diesel, motor spirit (commonly known as petrol), natural gas and aviation turbine fuel.

## SALES TAX & STATE LEVY

State VAT has been subsumed in GST with effect from 1 July 2017. Alcoholic beverages for human consumption, on sale would be subject to levy of State Excise duty and State Value Added Tax (VAT) while specified Petroleum products are subject to State VAT.

## SECURITIES TRANSACTION TAX

Securities transaction tax (STT) is applicable to the purchase or sale of equity shares, derivatives, units of equity-oriented funds through a recognised stock exchange or the sale of a unit of an equity-oriented fund or to a mutual fund. STT is also applicable on the sale of unlisted equity shares under an offer for sale to the public included in an initial public offer (IPO) and where such shares are subsequently listed on a recognised stock exchange.

STT will also be applicable on the transactions in units of a business trust, on the same line as are applicable to transactions in equity shares in a Company. STT is to be collected by the Recognised Stock Exchange for taxable securities in that stock exchange, a prescribed person for the sale of units in a mutual fund and a lead merchant banker for an initial public offer. The transaction value is determined as follows:

a) Options - aggregate of strike price and option premium.

b) Futures - traded price.

c) Other securities - purchase/sale price.

STT is to be collected by the Recognised Stock Exchange for taxable securities, the mutual funds in the case of sale of units to the mutual funds and paid to the Government. STT paid is allowable as a deduction in the computation of taxable income under the head profits or gains from a business or profession. STT Rates applicable are given below:

| Product | Transaction | STT rate | Basis for charge |
|---|---|---|---|
| Equity – Delivery | Purchase | 0.10% | Turnover |
| | Sale | 0.10% | Turnover |
| Equity – Intraday | Purchase | Nil | - |
| | Sale | 0.025% | Turnover |
| Futures | Purchase | Nil | - |
| | Sale | 0.010% | Turnover (Lot*Lot size*Price) |

| Product | Transaction | STT rate | Basis for charge |
|---|---|---|---|
| Options | Purchase | 0.125% | Settlement price on exercise |
| | Sale | 0.17% | Premium |
| Equity Oriented Mutual Fund- Delivery | Purchase | Nil | - |
| | Sale | 0.001% | Turnover |
| Equity Oriented Fund to Mutual fund | Sale | 0.001% | Turnover |
| Unlisted Equity under offer of sale | Sale | 0.2% | Turnover |

## COMMODITIES TRANSACTION TAX

Commodities transaction tax (CTT) is levied on taxable commodities transactions entered into in a recognised stock exchange. The CTT rate with effect from the 1st day of April 2020 are as follows:

| Sl. No. | Taxable commodities - Transaction | Rate | Payable by |
|---|---|---|---|
| 1. | Sale of commodity derivative | 0.01 per cent. | Seller |
| 2. | Sale of commodity derivatives based on prices or indices of prices of commodity derivatives | 0.01 per cent. | Seller |
| 3. | Sale of option on commodity derivative | 0.05 per cent. | Seller |
| 4. | Sale of option in goods | 0.05 per cent. | Seller |
| 5. | Sale of option on commodity derivative, where option is exercised | 0.0001 per cent. | Purchaser |
| 6. | Sale of option in goods, where option is exercised resulting in actual delivery of goods | 0.0001 per cent. | Purchaser |
| 7. | Sale of option in goods, where option is exercised resulting in a settlement otherwise, then by the actual delivery of goods | 0.125 per cent. | Purchaser |

The salient features of CTT are as follows:

a) Taxable commodities transaction means sale of commodity derivatives or sale of commodity derivatives based on prices or indices of prices of commodity derivatives or option on commodity derivatives or option in goods in respect of commodities, other than agricultural commodities, traded on a recognised stock exchange.

b) Every recognised commodity exchange shall collect the commodities transaction tax from the seller who enters into taxable commodities transaction in that recognised stock exchange.

c) The taxpayer will deposit commodities transaction tax within 7 days immediately after the end of the month in which such tax is collected. For non-payment or short payment or payment after due date, interest would be charged at the rate of 1% per month (or part thereof).

In order to mobilise growth of International Financial Services Centres (IFSC), the Budget 2016 amended that no Securities Transaction Tax (STT) and Commodities Transaction Tax (CTT) shall be levied on transactions of securities carried out through recognised stock exchange located in IFSC where the consideration for such transaction is paid or payable in foreign currency.

## LOCAL TAXES

## STAMP DUTY

Stamp Duty is payable at the prescribed rates on instruments recording certain transactions, including transfers of immovable property and shares. Generally, Stamp Duty is levied by the respective states as per the state Act. In the absence of such a state enactment, the provisions of the central Act (i.e. Indian Stamp Act 1899) shall apply.

The Finance Act 2019 amended the Indian Stamp Act, 1899 (Amended Stamp Act). The amendments came into force from 1 April 2020. Pursuant to the Amended Stamp Act, the Indian Stamp (Collection of Stamp Duty through Stock Exchanges, Clearing Corporations, and Depositories) Rules 2019 (Rules) have been enacted. The Rules also came into force from 1 April 2020.

The Amended Stamp Act relates to the levy of stamp duty on securities. The Amended Stamp Act aims to clarify and streamline the process for the payment of stamp duty on securities.

The Rules have been introduced as a guidance note for the stock exchanges and the depositories for collection of stamp duty, determination of transactions (whether on delivery basis or not), transfer of duty to respective states, filing of returns, etc.

In addition, the Rules also provide clarity on the modalities of payment of stamp duty for transactions involving issue/transfer of shares in dematerialised form.

**Key reforms of the Amended Stamp Act and the Rules**

- Definitions: The Amended Stamp Act amends the existing definitions to align them with the definitions provided under other statutes. The Amended Stamp Act also introduces some new definitions such as “debenture”, “market value” and “securities”. The new definition of “securities” is extensive and has the net effect of extending the list of instruments liable to stamp duty.
- Dispensation of exemption to transfer of securities: under the former regime, transfer of securities in physical form was subject to the payment of stamp duty and transfer of securities in dematerialised form was exempted. This exemption has been done away with, and stamp duty is now payable on transfer of securities (with consideration) in dematerialised form.
- Similarly, the transfer of units of a Mutual Fund including units of the Unit Trust of India, that are dealt by a depository, were previously exempted from stamp duty. This exemption has been removed.
- Stamp Duty on principal instrument only: a single transaction through the stock exchange or depository often involves the

execution of several instruments (e.g., notes, memorandums, etc.). In order to avoid multiplicity of payments of stamp duty on such transactions, the Amended Stamp Act provides that stamp duty is payable only on the principal instrument. The principal instrument for different transactions is specified in the Amended Stamp Act. The Amended Stamp Act clarifies that no stamp duty shall be charged on any instrument (other than the principal instrument) on a single transaction.

- Onus of payment of stamp duty: the Amended Stamp Act specifies the persons liable to pay stamp duty in different transactions. The table below summarises the newly introduced provisions in this regard:

| Nature of transaction | Onus |
|---|---|
| Sale of security through stock exchange | Buyer |
| Sale of security otherwise than through stock exchange | Seller |
| Transfer of security through depository | Transferor |
| Transfer of security otherwise than through a stock exchange or depository | Transferor |
| Issue of security (whether through a stock exchange or a depository or otherwise) | Issuer |
| In case of any other instrument not specified in Section 29 of the Indian Stamp Act, 1899 | By the person making, drawing or executing such instrument |

- Revised Stamp Rates: Prior to the introduction of the Amended Stamp Act, stamp duty was payable at a flat rate of 0.25% of the consideration on a transfer of shares. There was no stamp duty prescribed on the issue of shares (apart from the share certificate issued to the shareholder). The Amended Stamp Act specifies the following rates of stamp duty for different kinds of transactions involving securities:

| Sl. no | Entry | Stamp duty |
|---|---|---|
| 1. | Debentures | |
| i | Issuance of debentures | 0.005% |
| ii | Transfer or re-issuance of debentures | 0.0001% |
| 2. | Securities other than debentures | |
| i | Issuance of securities | 0.005% |
| ii | Transfer of securities on delivery basis | 0.015% |
| iii | Transfer of securities on non-delivery basis | 0.003% |
| iv | Derivatives | |
| a) | Futures (equity and commodity) | 0.002% |
| b) | Options (equity and commodity) | 0.003% |
| c) | Currency and interest rate derivatives | 0.0001% |
| d) | other derivatives | 0.002% |
| v | Government securities | 0% |
| vi | Repo on corporate bonds | 0.00001% |

- Mechanism for collection of stamp duty: The Amended Stamp Act and the Rules provide for the mechanism for collection of stamp duty for different transactions as follows:

a) Stamp duty viz.-à-viz. sale of listed securities made through stock exchanges:
   1. Date of collection of stamp duty: the stamp duty in respect of sale of listed securities through the stock exchange will be collected on the settlement day.
   2. Stamp duty on consideration: Where a transaction in securities is reported to a stock exchange, the stamp-duty will be collected on the entire sale consideration when the transfer is reported, even if the consideration is paid in part or in instalments to be paid in future.
   3. Stamp duty on tender offer, open offer, private placements, etc.: where a transaction arises from tender offer, open offer or offer for sale or private placements through stock exchange, the stamp-duty will be collected from the offeror on the market value of the security being acquired or sold out, at the offer price once the offer is successfully completed.

b) Stamp duty viz.-a-viz. transfer of securities in the depository system:
   1. Date of collection of stamp duty: the stamp duty in respect of transfer of securities in the depository system will be collected before the execution of all off-market transfers.
   2. Stamp duty on consideration: The stamp duty will be collected on the consideration amount specified by the transferor in the delivery instruction slip. The consideration reported to the depository will be considered as the actual consideration amount.
   3. Stamp duty on pledge of securities: the stamp duty will be collected from a pledgee on the market value of securities, at the time of transfer of securities pursuant to invocation of pledge.

c) Stamp duty viz.-à-viz. creation of a new security and change in records in the depository upon the issue of securities:
   1. Date of collection of stamp duty: the stamp duty in respect of creation of new security and change in records in the depository upon issue of securities will be collected from the issuer prior to executing any transaction in the depository system.
   2. Stamp duty on total market value: the stamp duty is payable on the total market value of the securities contained in the allotment list.
   3. No stamp duty on creation or destruction of securities: stamp duty in respect of creation or destruction of securities on account of corporate actions such as stock split, stock consolidation, mergers and acquisitions, or such similar actions, etc.

will not be collected by the depository to the extent that it does not involve a change in beneficial ownership. However, a fresh issue to an investor as part of a corporate action will be subject to stamp-duty.

4. Stamp duty on tender offer, open offer, private placements, etc.: in case of transactions arising from tender offer or open offer or offer for sale or private placement conducted through a depository, stamp-duty shall be collected from the offeror, on the market value of the security being acquired or sold out, at the offer price, once the offer is successfully completed.

## LAND AND PROPERTY TAX

Land and Property Tax is levied by each state separately.

## B. DETERMINATION OF TAXABLE INCOME

A Company is considered to be resident in India if it is incorporated in India. However, the concept of Place of effective management (POEM) introduced in the Finance Act, 2016 will play an important role in determining whether the Company is resident in India or not. Indian companies are taxable in India on their worldwide income, irrespective of its source and origin. Foreign companies are taxed only on income that arises from operations carried out in India or income deemed to have arisen in India. The Central Board of Direct Taxes (CBDT) has issued a set of guidelines for determining the POEM of companies for taxation purposes. Since residence is to be determined each year, POEM would also be determined on a year-to-year basis.

In the case of non-resident taxpayers engaged in certain businesses, income is assessed on a presumptive (deemed income) basis as follows:

| Nature | Business income as a percentage of gross receipts |
|---|---|
| Shipping | 7.5% |
| Exploration of mineral oil | 10% |
| Operations of aircraft | 5% |
| Turnkey power projects | 10% |

## DEDUCTIONS AND ALLOWANCES

In computing business income, expenditure (payable to a resident) from which tax is not deducted or deducted but not deposited till the due date of filing of return such expenditure will be disallowed to the extent of 30% and the same can be claimed in the year when the tax is deposited. In case of payment to non-resident on which tax is not deducted or deducted but not deposited by the due date of filing of return, the entire expenditure will be disallowed, and it will be only allowed in the year when the tax is deposited.

## CAPITAL ALLOWANCES

Certain expenditure qualifies for a weighted deduction of 100%. For instance, capital expenditure on research and development (other than land) qualifies for full tax write-off and in certain cases, is eligible for a 100% deduction subject to fulfilment of prescribed conditions. Expenditure incurred on merger/demerger of an undertaking is allowed as a deduction in five equal instalments beginning with the year in which the merger/demerger takes place.

## DEPRECIATION

Depreciation allowance is available as per the following rates depending on the nature of the asset and the same is classified below into specified blocks:

| Assets | Rates |
|---|---|
| Buildings (depending upon its nature) | 5%, 10% |
| Buildings<br>i. Purely temporary erections such as wooden structures<br>ii. Buildings acquired on or after the 1st day of September 2002 for installing machinery and plant forming part of water supply project or water treatment system and which is put to use for the purpose of business of providing infrastructure facilities under clause (i) of sub-section (4) of 80IA | 40% |
| Furniture and fixtures fittings including electrical fittings | 10% |
| Plant and machinery | 15%, 30%, 40% |
| Plant and machinery:<br>i. Air pollution control equipment<br>ii. water pollution control equipment<br>iii. solid waste control & recycling equipment<br>iv. Machinery and plant, acquired and installed on or after the 1st day of September 2002 in a water supply project or a water treatment system and which is put to use for the purpose of business of providing infrastructure facility<br>v. Wooden parts used in artificial silk manufacturing machinery<br>vi. Cinematograph films - bulbs of studio lights<br>vii. Match factories - Wooden match frames<br>viii. Salt works - Salt pans, reservoirs, and condensers, etc., made of earthy, sandy or clayey material or any other similar material<br>ix. Mines & quarries: Tubs, winding ropes, haulage ropes, sand stowing pipes, safety lamps<br>x. Books, being annual publications for profession<br>xi. Books owned by taxpayers carrying on business in running lending libraries etc. | 40% |

| Assets | Rates |
|---|---|
| Computers including Computer software | 40% |
| Intangible assets (patents, trademarks know-how, licenses, copyrights, etc) | 25% |
| Ships | 20% |

Additional depreciation of 20% on the cost of new plant and machinery (other than ships or aircraft) is allowable only in the year of commissioning for manufacture. Assets used for less than 180 days in the year of acquisition are entitled to half of the normal depreciation allowance (including additional/ enhanced depreciation). Depreciation not set off against current year income can be carried forward for set-off against any future income for an unlimited period.

In case an asset is acquired and put to use for the purposes of business for a period of less than 180 days in that previous year, and the deduction under section 32(1) (ii a) in respect of such asset is restricted to 50% of the amount calculated for the previous year, the balance 50% shall be allowed in the immediately succeeding previous year.

With effect from 1 April 2020, "goodwill of business or profession" is specifically excluded from the definition of assets and therefore, depreciation cannot be claimed. Further, Explanation to section 50 was introduced by the Finance Act 2021 to provide that WDV of such block of asset and short-term capital gain, if any, shall be determined in accordance with rule 8AC.

The Finance Bill 2022 proposes to make consequential amendment in section 50 of the IT Act to clarify that for the purpose of section 50 of the IT Act, reduction of goodwill from the block of assets shall be deemed to be transferred.

This amendment is applicable retrospectively from Assessment year 2021-22.

## STOCK / INVENTORY

The valuation of closing stock is normally done based on cost or market value, whichever is lower.

## INTEREST DEDUCTIONS

Interest paid on borrowings used for business purposes is tax deductible. For new businesses, interest incurred prior to commencement of commercial production is to be capitalised. Interest paid on amounts borrowed for investment in securities is allowed as a deduction from interest income. However, an interest barrier rule has been introduced from financial year 2017-18 onwards. If an Indian Company pays interest exceeding INR 10 million to a non-resident lender, being an associated enterprise, the excess interest as computed below shall not be allowed as deduction.

Excess Interest = Total Interest expenditure in excess of 30% of Earnings before interest, taxes, depreciation, and amortisation (EBITDA) or the actual amount of interest paid to associated enterprise, whichever is lower.

Finance Act 2020 provides that the above provisions shall not apply to interest paid in respect of a debt issued by a lender which is a permanent establishment in India of a non-resident person engaged in the business of banking.

Carry-forward of Excess interest: the excess interest of the current year (which is not allowed as a deduction) shall be carried forward to the following assessment year. In the next assessment year, it shall be allowed as a deduction against the business/ profession income of the borrower to the extent of maximum allowable interest expenditure in accordance with section 94B (2). This carry-forward is allowed for 8 assessment years (immediately succeeding the assessment year for which the excess interest was first computed)

## EXPENDITURE INCURRED FOR EXEMPT INCOME

Expenditure incurred in earning income that is exempt from income tax is not allowed as a deduction. Various courts have held that expenditure incurred for earning exempt income is not to be disallowed if the taxpayer has not earned exempt income during the year.

In order to clarify the legislative intent, Disallowance under section 14A of the IT Act is proposed to be applied even where the relevant exempt income in relation to which the expenditure is incurred, has not accrued or arisen or has not been received by the taxpayer during the previous year.

This amendment is proposed to take effect from FY 2021-22.

## LOSSES

The table given below highlights the rule of carry-forward of losses in brief:

| Type of loss to be carried forward to subsequent years | Profit against which carried forward loss can be set off in subsequent years | Number of years loss can be carried forward |
|---|---|---|
| House property loss | Income from House property | 8 years |
| Speculation loss | Speculation profits | 4 years |
| Non-speculation business loss: | | |
| • Loss due to unabsorbed depreciation, capital expenditure on scientific research | Any income not being salary income | No time limit |
| • Loss from a specified business under section 35AD | Income from a specified business under section 35AD | No time limit |
| • Other remaining business loss | Any business profit, whether from speculation or otherwise | 8 years |
| Short-term Capital Loss | Any income under the head Capital Gains | 8 years |
| Long-term Capital Loss | Long-term Capital Gains | 8 years |

**Restriction on set-off of a loss against Undisclosed Income Section 79A**

Currently, there is no restriction on set off of any loss or unabsorbed depreciation against undisclosed income detected during a search under section 132 or requisition under section 132A or survey under section 133A, other than section 133A(2)

A new section 79A is now inserted to provide that any loss, either of the current period or brought forward, or unabsorbed depreciation cannot be adjusted against undisclosed income detected during search, survey.

This amendment is applicable with effect from Assessment year 2022-23.

## CORPORATE RESTRUCTURING & MERGER

Specific provisions have been made in the Income Tax Act 1961 (the Act) in relation to corporate mergers/amalgamations. Corporate restructuring is tax neutral subject to the fulfilment of certain conditions.

## DEMERGER

Under the Act, "demerger" means any transfer by a demerged company of one or more undertakings to another company (resulting company) pursuant to a scheme of arrangement under Sections 230 and Section 235 of the Companies Act. With effect from 1st April 2000, the transfer of shares in a scheme of demerger has been made tax neutral, subject to fulfilment of certain conditions.

## SLUMP SALE

The Act defines 'slump sale' to mean the transfer of one or more undertakings by any means as a result of the sale for a lump-sum consideration without values being assigned to the individual assets and liabilities. Profits or gains arising from slump sales are taxable as long-term capital gains if the undertaking is owned and held by the taxpayer for more than 36 months prior to the date of transfer. Otherwise, they are taxable as short-term capital gains. Net worth of the undertaking so transferred shall be deemed to be the cost of acquisition and no indexation benefit is allowed for slump sales.

With effect from 1 April 2021, sale consideration for slump sale shall be fair market value (FMV) of the capital assets as on the date of transfer (rules will be prescribed for the manner of calculation of FMV). Further, for computing the net worth, the value of goodwill which has not been purchased by the taxpayer will be considered as Nil.

Finance Act, 2021 widened the definition of the term "Slump Sale" to cover a case of transfer of an undertaking by any means which was until then restricted to a case of transfer 'as a result of the sale". Though the definition of "Slump sale" was expanded to cover transfer by any means and not merely by sale, it continued to provide that the transfer of the undertaking in such 'sale' should be for a lump sum consideration without assigning values to the individual assets and liabilities.

The word 'sales' which is appearing at certain places is substituted by the word 'transfer' and the definition now covers a case of transfer of any undertaking by any means for a lump sum consideration without assigning individual values to assets and liabilities in such transfer.

This amendment is applicable retrospectively from Assessment year 2021-22.

## BUYBACK

Buyback refers to the purchase of own shares by a company from its shareholders in lieu of consideration. Consideration received by a shareholder from the company for purchase of its own shares is taxable as a long-term capital gain, if shares were held for more than 12 months prior to transfer to the Company. Indexation benefit is available for long-term capital gains. Otherwise, they are taxable as short-term capital gains in the year in which the shares are purchased by the Company.

Income arising to a shareholder in respect of buy back of unlisted/listed shares by the Company will be exempt from tax. This exemption is available only in those cases where additional income tax is payable on distributed income under section 115QA by the Company opting for buy back of unlisted / listed shares.

## FOREIGN SOURCED INCOME

Profits derived by a foreign branch of an Indian enterprise are taxable in India. However, credit is allowed for foreign taxes paid by the branch in India either under the tax treaties or under the Act.

## BUSINESS TRUSTS

The real estate investment trust (REIT) and Infrastructure investment trust (Invit) are together referred to as Business Trusts. The trusts would raise capital by issuing units (to be listed on a recognised stock exchange) and also raise debt directly from resident and non-resident investors. The taxation regime for these Business Trusts, applicable provides the manner, in which the income in the hands of such trusts is to be taxed and the taxability of the income distributed by them to the unitholders.

## INCENTIVES

## FOREIGN DIRECT INVESTMENT POLICY

Remarkable changes in the policy relating to FDI have been announced by the Government in 2016. The highlights of the policy are:

- FDI caps in various sectors have been enhanced. (Appendix – I);
- Subject to the provisions of the FDI policy, foreign investment in the `manufacturing' sector is under automatic route. Further, a manufacturer is permitted to sell its products manufactured in India through wholesale and/or retail, including through e-commerce without Government approval.
- Approval of the Government will be a prerequisite for investment by swap of shares for sector under Government approval route. No approval of the Government is required for investment in automatic route sectors by way of swap of shares.

## TAX HOLIDAY FOR ECONOMIC ZONES

A tax holiday is available in respect of profits derived from exports by a 100% export-oriented undertaking, or an undertaking located in a free trade zone, export processing zone, SEZ, software technology park, etc.

In the case of new units located in a SEZ commencing activities on or after 1 April 2006 and before 1 April 2020, the tax incentives available under sec 10 AA are as follows:

| | |
|---|---|
| First five years | 100% of profits |
| 6th to 10th year | 50% of profits |
| 11th to 15th year | Amount not exceeding 50% of the profit as is debited to the profit and loss account of the previous year in respect of which the deduction is to be allowed and credited to a reserve account (to be called the “Special Economic Zone Re-investment Reserve Account”) to be created and utilised for the purposes of the business of the assessee in the manner laid down |

## PROFITS OF INDUSTRIAL UNDERTAKINGS

A tax holiday for a specified number of years is available in respect of either the entire or part of the profits derived by an industrial undertaking located in a backward state or district or an industrial undertaking engaged, inter alia, in any of the following activities:

(a) Infrastructure facility.
(b) Telecommunication Service.
(c) Industrial parks.
(d) Generation or distribution of power.
(e) Power transmission.
(f) Renovation of existing network for transmission of power.
(g) Hospitals in rural area.
(h) Hotels and convention centres in specified area.
(i) Undertaking establishments in the North-eastern State carrying on specified business.
(j) Undertakings deriving profits from operating and maintaining hospitals in places other than urban agglomerations.

**Extension of date of incorporation for eligible start-ups for exemption**

Under the existing regime, Sec 80IAC, 100% deduction is allowed by an eligible start-up for 3 consecutive years out of 10 years at the option of the assessee. This is subject to the satisfaction of conditions laid down, which inter-alia includes being incorporated before 1 April 2022.

In order to promote eligible start-ups, it is proposed to extend the requirement of the deadline date of incorporation to 1 April 2023.

## INCOME FROM SALE OF CRUDE OIL

Exemption can be availed under section 10(48), by a Foreign Company in respect of income received on account of sale of crude oil to any person in India. Income should be received in Indian currency in India pursuant to an agreement entered into by the Central Government or approved by the Central Government. The Foreign Company should not be engaged in any other activity in India. The scope of section 10(48) has been enlarged to include income on account of sale of any other goods or rendering of services as notified by the Central Government. The aforementioned exemption is also extended to any income arising to a Foreign Company through storage of crude oil in a facility in India and sale therefrom to any person resident in India [Sec 10(48A)] is pursuant to an agreement or an arrangement entered into by the Central Government or approved by the Central Government. The aforementioned exemption is also extended to any income arising to a Foreign Company through sale from leftover stock of crude oil, from the facility in India after the expiry of the agreement or an arrangement entered into by the Central Government or approved by the Central Government.

## GENERAL ANTI AVOIDANCE RULES (GAAR)

General Anti Avoidance Rules have been inserted with effect from 1 April 2014. The provisions relating to GAAR are contained in Chapter X-A (Section 95 to 102). The procedural provisions relating to the mechanism for invocation of GAAR and passing of the assessment order in consequence thereof are contained in section 144BA. The provisions of chapter X-A and section 144BA have come into force with effect from 1st April 2017.

In an environment of moderate rates of tax, aggressive tax planning by corporates, and use of opaque low tax jurisdictions for residence as well as for sourcing of capital, it is necessary that the correct tax base be subject to tax. The GAAR regime has been introduced to codify the doctrine of ‘substance over form’. Under GAAR, the real intention of the parties and effect of transactions and purpose of an arrangement is taken into account for determining the tax consequences, irrespective of the legal structure that has been superimposed to camouflage the real intent and purpose.

The main features of the GAAR regime are:

(1) An arrangement whose main purpose is to obtain a tax benefit can be declared as an ‘impermissible tax-avoidance arrangement’, if it satisfies at least one of the following four tests:
    (a) It creates rights and obligations which are not normally created between parties dealing at arm’s length.
    (b) It results in abuse or misuse of provisions of tax laws.
    (c) It lacks commercial substance.
    (d) It is carried out in a manner which is normally not employed for bona fide purpose.
(2) An arrangement will be deemed to lack commercial substance if it involves:
    (a) Round trip financing (i.e., transactions where funds are transferred among the parties to the arrangement).
    (b) An accommodating party.
    (c) Elements that have effect of offsetting or cancelling each other.
    (d) A transaction which disguises the value, location, source, ownership, or control of fund.
    (e) A location which serves no other substantial commercial purpose, except obtaining tax benefit.
(3) Once an agreement is declared to be an Impermissible Avoidance Agreement (IAA), the tax authorities will be entitled to, inter alia, re-characterise the transaction, ignore the transaction, disregard the accommodating parties, reallocate income/ expenses, etc.

(4) Approving Panel: The approving panel shall consist of a chairperson who is or has been a Judge of a High Court, one member of the Indian Revenue Service not below the rank of Chief Commissioner of Income Tax and one member who shall be an academic or scholar having special knowledge of matters such as direct taxes, business accounts and international trade practices.

(5) Status of direction of approving panel: the direction issued by the approving panel shall be binding on the taxpayer as well as the income tax authority:

(6) Definition of 'associated person and connected person': As per the amendment there will be only one inclusive provision defining the expression 'connected person' under section 102.

## C. FOREIGN TAX RELIEF

### UNILATERAL TAX CREDIT WHERE THERE IS NO TAX TREATY

U/s 91 of the Income Tax Act, 1961: where a resident of India has paid tax in any country with which India does not have a tax treaty, credit is available in India for such tax payments.

The following conditions are required to be satisfied by the for availing unilateral tax credit – Person claiming the credit must be resident in India for the said previous year:

- Income is from a source outside India.
- Tax has been paid in the foreign country. The taxpayer should be able to prove that he/she has paid income tax on such income in the foreign country.
- Absence of agreement u/s 90 for the relief or avoidance of double taxation.

### TAX CREDIT UNDER TAX TREATIES

India has entered into tax treaties (DTTs) with several partner countries. Under the applicable tax treaty, Indian residents paying taxes in other countries can claim a credit in India for foreign tax payments. The Finance Act 2012 states that provision of DTTs will not be applicable if General Anti Avoidance Rules (GAAR) are invoked.

As per the amendment to section 90 and 90A of the Finance Act 2012, any term which is defined neither in the Act, nor in the DTT, can be assigned a meaning by the Central Government through a Notification. The meaning assigned is generally in line with the intent and objective as understood during the course of negotiations leading to the formalization of the treaty. This meaning assigned through the Notification shall be effective from the date of coming into force of the DTT.

Earlier, a Tax Residency Certificate (TRC) issued by the partner country was considered sufficient proof for accepting the status of residence for applying DTTs. With effect from 1st April 2013, submission of a TRC is considered a necessary but not sufficient condition, as the taxpayer shall also provide prescribed documents and information for availing DTTs benefits referred under section 90 and 90A of the IT Act.

Multilateral Instruments for India shall be applicable for various DTTs concluded by India.

## D. CORPORATE GROUPS

There are no provisions in India for consolidation of accounts for tax purposes or provisions for group taxation.

## E. TRANSFER PRICING AND COUNTRY-BY-COUNTRY REPORTING

Transfer pricing refers to inter-company pricing arrangements between related business entities and commonly applies to inter-company transfers of services and tangible/intangible properties. In India, detailed transfer pricing provisions were introduced by the Finance Act, 2001 in order to facilitate the computation of reasonable, fair, and equitable profits and tax in India in the case of businesses carried on by multinational companies. Essentially, transfer pricing is the process of adjusting the prices of cross-border transactions between related/ associated parties. Section 92 of the Act provides that the price of any transaction between Associated Enterprises (AE), either or both of whom are non- residents for tax purposes (international transaction), shall be computed having regard to the arm's length principle. Subsequently, the Finance Act, 2012 also brought 'specified domestic transactions', where transactions are carried out between two related Indian entities under the purview of transfer pricing.

Two enterprises are considered to be associated if there is direct/indirect participation in the management or control or capital of an enterprise by another enterprise or by the same persons in both the enterprises. In determining whether there is participation in management or control, various factors are taken into consideration including:

- Direct/indirect shareholding with 26% or more of the voting power
- Advancing of loans of 51% or more of the total assets
- Appointment of more than 50% of the Board of Directors
- Dependence on intellectual property rights owned by either party, etc.

An additional clarification was issued highlighting the concept of a 'deemed international transaction', thereby widening the scope of transfer pricing in India. This provision considers a transaction between two residents in India as an international transaction subject to certain conditions.

**Determination of 'Arm's-Length Price'**

A crucial aspect of transfer pricing is the process of determining the Arm's-Length Price (ALP). The Central Board of Direct Taxes (CBDT) has prescribed six methods for determining the ALP:

- Comparable Uncontrolled Price Method.
- Resale Price Method.
- Cost Plus Method.
- Profit Split Method.
- Transactional Net Margin Method.
- Other Method.

The ‘other method’ has been prescribed to potentially cover transactions involving intangibles and business restructuring for which the above methods may not be the most appropriate.

The choice of the appropriate method is determined with respect to the nature and class of transaction, the classes of associated persons, the functions performed by them and other relevant factors.

The Finance Act, 2014 had introduced the range concept for determination of ALP and use of multiple-year data for comparable analysis of transactions. The tax rules mention the manner and scope of computation of ALP when adopting the range concept and the use of multiple-year data.

**International Transactions**

Apart from routine transactions relating to the purchase and sale of goods and services, the Finance Act, 2012 enhances the definition to include transactions involving business restructuring, intangibles, goodwill, corporate guarantees, etc. There is no threshold exemption limit for this compliance.

Also, it is mandatory to obtain an accountant’s certificate in the prescribed format for all international transactions between AEs. This report would have to contain prescribed particulars of the transaction and would have to be filed with the tax authorities by 31st October after the relevant financial year, along with the tax return.

Stringent penal provisions have been prescribed for non-compliance with the prescribed requirements under the new transfer pricing regime.

**Advance Pricing Agreements**

The Finance Act, 2012 introduced Advance Pricing Agreements (APAs). An APA is an agreement between a taxpayer and the tax authorities for specifying the manner in which the ALP is to be determined with respect to an international transaction. The ALP shall be determined on the basis of the prescribed methods or any other method.

An APA would be valid for a maximum of five consecutive years unless there is a change in the provisions or the facts having a bearing on the international transaction. The roll-back provisions are also available according to which, an APA would also be applicable to international transactions undertaken in the previous four financial years, subject to certain conditions.

The attribution of income in case of a non-resident person to the Permanent Establishment may also be determined under an APA in order to provide certainty.

**Extensive Transfer Pricing Documentation**

As a notable development, India’s transfer pricing documentation requirements are being aligned with the Organization for Economic Co-operation and Development’s (OECD) recommendations under the Base Erosion and Profit Shifting (BEPS) Project. In line with the international consensus on this topic, companies need to maintain and furnish extensive, group-level details to the Indian tax authorities by way of a Country-by-Country (CbC) report and Master File, in addition to the current transfer pricing documentation requirements in India.

The CbC report shall include economic information within the multinational group, such as the nature of main business activities, revenues, profit/loss, income taxes paid, stated capital, accumulated earnings, number of employees, tangible assets, etc. for each country in which the group operates. For non-furnishing or inaccurate furnishing of the CbC report, master file and related details by an entity that is obligated to furnish the said details, a stringent penalty structure ranging from INR 5,000 to INR 50,000 per day of default would apply.

On 5 April 2021, the Central Board of Direct Taxes (CBDT) has amended Rule 10DA and Rule 10DB of the Income-tax Rules, 1962. The threshold limit for applicability of Country-by-Country (CbC) reporting has been specified under Rule 10DB. The Board has increased said limit from Rs. 5,500 crores to Rs. 6,400 crores. CbC reporting is mandatory if consolidated group revenue of the international group is Rs. 6,400 crores in the preceding year. It will be effective from 1 April 2021.

Further, for more than one constituent entities of an international group, the group can designate any one of its constituent entities to file Master File on behalf of all constituent entities. Thus, Non-resident need not file separate master file in India.

## SECONDARY ADJUSTMENTS IN TRANSFER PRICING

The Finance Act, 2017 has introduced the concept of secondary adjustment on Transfer Pricing (TP) Adjustments by a new section 92CE - “Secondary adjustments in certain cases”. Further, Finance Act, 2019 has brought certain amendments in the provisions of secondary adjustments.

Sub-Section (3) of Section 92CE gives a definition of various terms used in relation to this topic. Sub-section (3) also defines the term ‘Primary Adjustment’ and ‘Secondary Adjustment’ as follows:

### Primary Adjustments

Primary Adjustment to a transfer price means the determination of transfer price in accordance with the arm’s-length principle resulting in an increase in the total income or reduction in the loss, as the case may be, of the assessee. Section 92 provides that any income arising from an international transaction shall be computed having regard to the arm’s-length price. The manner of determination of arm’s-length price is given in section 92C. Primary adjustment denotes any adjustment in the price charged for such international transactions in accordance with the arm’s-length price (ALP).

### Secondary Adjustments:

Secondary Adjustments means an adjustment in the books of accounts of the assessee and its associated enterprise to reflect that the actual allocation of profits between the assessee and its associated enterprise are consistent with the transfer price determined as a result of primary adjustment, thereby removing the imbalance between a cash account and actual profit of the assessee.

### Cases where secondary adjustment is required to be made:

According to Section 92CE (1), the assessee shall make a secondary adjustment, where the primary adjustment to the transfer price has been made:

- Either *suo motu* by the assessee in the return of income, or

- By the Assessing Officer during the assessment proceedings and accepted by the assessee, or
- In accordance with an Advance Pricing Agreement (APA) entered into by the assessee under section 92CC on or after 1 April 2017, or
- In accordance with the Safe Harbour Rules under section 92CB, or
- Arising as a result of resolution of an assessment by way of the Mutual Agreement Procedure (MAP) under an agreement entered into under section 90 or section 90A for avoidance of double taxation.

### Cases where secondary adjustment is not mandatory:

Proviso to sub-section (1) of section 92CE states that secondary adjustment is not required to be made in the following two cases:

- Where the amount of primary adjustment made in any previous year is not more than Rs. 1 crore, or
- Where the primary adjustment is made in respect of assessment year 2016-17 or any earlier assessment year.

### Effect of Secondary Adjustments:

Sub-section (2) of section 92CE provides that the excess money receivable from the AE as a result of primary adjustment should be repatriated by the AE to the assessee in India within the prescribed time period. If the excess money is not so repatriated, the amount shall be deemed to be an advance money by the assessee to such AE and the interest on such advance shall be computed in such manner as may be prescribed.

Thus, the excess money shall be treated as "Loans & Advances" in the books of the assessee, and he will be required to book notional interest income on such advances until the excess money is repatriated into India. The time period for repatriation and the rate of interest has been prescribed in Rule 10CB of Income Tax Rules. Rule 10CB prescribes that the time limit for repatriation of excess money shall be on or before 90 days from the relevant date.

The practical application of the provisions of section 92CE was posing serious concerns as it is quite difficult for the assessee to repatriate the excess money within the prescribed time period from foreign AEs in many cases due to prevailing laws in the country of such foreign AE. Further, accounting issues also arise as how to account for the deemed loans in the books of foreign counterpart and the manner of reporting in consolidated financial statements.

I

In order to remove such difficulties, amendments have been made to the Income Tax Act by Finance Act, 2019 wherein the Indian entity has been given an option to repatriate excess money from any other non-resident AE of the Indian entity or to pay additional tax on such excess money at the rates as prescribed. If the assessee chooses to exercise any of these options, the excess money shall not be deemed to advance to foreign entity and no notional interest shall be payable thereon. The following two options have been given by the Finance Act, 2019:

- **Explanation to section 92CE (2):** The assessee has been given an option that the excess money or part thereof may be repatriated from any of the associated enterprises of the assessee which is not a resident of India. Thus, if there is any difficulty in repatriation of excess money from the foreign AE concerned, the taxpayer may get excess money repatriated from any other non-resident AE of the taxpayer.
- **Sub-section (2A) of section 92CE:** The assessee has been given another option in case the excess money is not repatriated within the prescribed time period of 90 days. He may at his option pay additional income tax @ **18% + applicable surcharge & cess** on such excess money or part thereof.

**<u>The following points are to be noted in respect of the option allowed under sub-section (2A) of section 92E:</u>**

a. Tax paid @ 18% (plus surcharge & Cess) shall be treated as a final payment of tax towards the excess money or part thereof not repatriated. [Section 92CE(2B)]
b. No credit shall be allowed for tax paid on the excess money or part thereof to the assessee or any other person. [Section 92CE(2B)]
c. No deduction under any other provisions of the Income Tax Act shall be allowed to the assessee in respect of tax paid on the excess money or part thereof. Thus, the assessee cannot claim the tax so paid as revenue expenditure under section 37 of the Act. [Section 92CE(2C)]

If the assessee opts to pay additional tax u/s 92CE(2A), he will not be required to make the secondary adjustments and compute imputed/ notional interest under sub-section (2) of section 92CE from the date of payment of such tax. [Section 92CE(2D)]

## FACELESS SCHEMES DEFERRED FOR TRANSFER PRICING ASSESSMENT AND DISPUTE RESOLUTION PROCEEDINGS

- Directions/procedures for undertaking transfer pricing assessment and dispute resolution proceedings under the faceless scheme shall be notified no later than 31 March 2024.
- The Principal Chief Commissioner or the Chief Commissioner or the Principal Commissioner or Commissioner having jurisdiction over the taxpayer may revise the transfer pricing order, if prejudicial to the interest of revenue.

## SAFE HARBOUR TRANSFER PRICE FOR INTERNATIONAL TRANSACTIONS

Safe harbour transfer price for international transactions: the Tax Authorities accept the transfer price declared by the assessee for certain eligible international transactions as per the ceilings and subject to the circumstances. However, these provisions will no longer be applicable as from tax year 2021-22 onwards.

## F. WITHHOLDING TAX

Tax at the prescribed rates is required to be deducted at source from payments of rent (for use of land, building, machinery, plant, equipment, furniture or fittings), salary, professional fees, fees for technical services, royalty, interest, commission, etc. to residents. Tax is also required to be deducted from payments to non-residents, in respect of interest or any other sum chargeable under the Act. With retrospective effect from 1 April 1962, tax will be deductible whether the withholder is a resident or non-resident and tax will be deductible even if a non-resident does not have any place of business, residence, business connection or any other presence in India. The rates are the same as those listed in Section A.

From 1 June 2013, under section 194IA, any person responsible for paying (other than the person referred to in 194LA) to a resident transferor any sum by way of consideration for transfer of immovable property (other than agricultural land in rural area in India) is liable to deduct tax at 1% if the amount of consideration is equal to or exceeds INR 5 million.

In case there is TDS (Tax deducted at source) default pertaining to any sum (other than salary) payable outside India or payable to a non-resident which is taxable in India, then expenditure will not be disallowed if TDS is deposited within the due date of submission of return of income under section 139(1). If TDS is deposited after this date expenditure will be deductible in the year in which TDS is deposited. In case of TDS default, 100% of expenditure will be disallowed for payments to non-residents.

**Key TDS and TCS provisions:**

- Finance Act 2021 has inserted withholding of tax at a concessional rate on the income from securities held by foreign portfolio investors (FPIs).
  - o Any person responsible for paying any income (other than the interest payable in respect of Rupee Denominated Bond of an Indian company or Government Security) to foreign portfolio investors (FPIs) in respect of securities is liable to deduct tax under section 196D. The said section provides for deduction of tax at the rate of 20%.
  - o As FPIs are incorporated outside countries, their taxability in India is also subject to double taxation avoidance agreements ('DTAAs'), if applicable. Thus, considering the applicability of DTAA in case of FPIs, Section 196D is amended to provide that tax shall be deducted at the rate provided under DTAA if same is lower than the existing TDS rate of 20%.
- The Finance Act 2021 has inserted new tax provisions for deduction and collection of TDSS and TCS at the higher rates in case of non-filers of the income tax return in India. The rate of TDS/TCS shall be at the double of the specified rate or 5%, whichever is higher.
- Further, Finance Act 2021 has inserted new TDS provisions from 1 July 2021 onwards, which provide that any person, being a buyer who is responsible for paying any sum to any resident Indian (i.e. seller) for purchase of any goods of the value or aggregate of such value exceeding 5 million in any preceding year, shall, at the time of credit of such sum to the account of the seller or at the time of payment thereof by any mode, whichever is earlier, deduct tax an amount equal to 0.1% of such sum exceeding 5 million.
- From tax year 2020-21, as per section 194O, which states that any amount paid by an e-commerce operator for sale of goods or provision of service, facilitated by it through its digital or electronic facility or platform, to the e-commerce participant will be subject to deduction of tax at the rate of 1% on gross amount of sales or service.
- Tax Collected at Source ('TCS') provision on sale of goods (other than export sales) under section 206C effective from 1 October 2020. TCS is applicable to the seller of goods as follows:
  - o TCS is applicable at the rate 0.1% if the consideration received from the buyer in a previous year is in excess of INR 5 million and in non-PAN/Aadhaar cases at the rate of 1%.
  - o It is applicable only to sellers whose total sales, gross receipts or turnover from business exceed INR 10 crore (100 million) during the financial year, immediately preceding the relevant financial year.
- The TCS on sale of goods shall not be collected in the following cases:
  - o if the buyer is liable to deduct TDS; or
  - o if the seller is subject to any other TCS; or
  - o if the buyer from whom TCS is collectable is the Central Government, a State Government and an embassy, a High Commission, legation, commission, consulate, the trade representation of a foreign State and a local authority.

**TDS on purchase of immovable property**

Under the current regime, tax at the rate of 1% is required to be deducted on the amount of consideration equal to or exceeding INR 50 Lakhs paid by the transferee to the transferor of certain immovable property other than agriculture land.

It is now proposed that the TDS at 1% on the purchase of immovable property shall be deducted at a value which is the higher of the purchase consideration or the stamp duty value of the property. However, no tax is to be deducted when both the purchase consideration and the stamp duty value are less than INR 50 lakhs.

**Higher rates of TDS / TCS for non-return filers**

a). Currently, TDS/TCS is required to be deducted at higher rates in cases where (i) Payee has not filed return of income for both of the last 2 financial years and (ii) aggregate of TDS/TCS in case of the payee is INR 50,000 or more in each of those 2 financial years.

b). In order to widen the tax base, it has been proposed to amend the provisions so as to provide that even in cases where the return of income has not been filed for the previous financial year and the TDS/TCS is INR 50,000 or more, the TDS shall be deducted at higher rates.

c). Further, it has also been proposed that individuals and HUFs for whom a simplified tax deduction system has been provided without requirement of TAN (i.e., section 194-IA, 194-IB and 194M of the Act), shall not be burdened with the additional responsibility to deduct TDS at higher rates.

## G. EXCHANGE CONTROL

The foreign exchange regulations have been substantially liberalised in India, whereby no licence is required for setting up an industry except in a few cases such as electronic aerospace and defence equipment, industrial explosives, hazardous chemicals, distillation and brewing of alcoholic drinks, cigars and cigarettes, items reserved for small-scale sector and industries/sectors reserved for the public sector.

India has one of the most liberal and transparent policies on Foreign Direct Investment (FDI) among the emerging economies. The FDI policy has been rationalised on an ongoing basis to avoid multiple layers of regulatory approvals to facilitate foreign investment. FDI can be divided into two broad categories:

- FDI under Automatic Approval route.

- FDI with prior approval of the Government.

Under the automatic approval route, no Government approval or Reserve Bank of India is required if the FDI is within the notified sectoral caps. However, if the FDI is above the prescribed sectoral cap, the approval of Government through the Foreign Investment Facilitation Portal (FIFP) is required. FDI is allowed under the automatic route in almost all activities/sectors except the following, which require FIFP approval:

- Activities/items that require an Industrial License (except for some cases);
- Proposals in which the foreign collaborator has an existing financial/technical collaboration in India in the same field.
- All proposals falling outside notified sectoral policy/caps.

In certain cases, such as distillation and brewing of alcohol, industrial explosives and manufacture of hazardous chemicals, FDI is permitted without FIFP approval subject to obtaining an industrial license from the appropriate authority. However, FDI is prohibited in the following cases:

- Gambling and betting.
- Lottery business.
- Atomic energy.
- Business of chit fund.
- Nidhi company.
- Trading in Transferable Development Rights (TDRs);
- Manufacture of cigars, cheroots, cigarillos and cigarettes, of tobacco or of tobacco substitutes.
- Real estate business (except development of townships, construction of residential and commercial premises, roads or bridges, real estate broking service to the extent specified by Foreign Exchange Management Act (FEMA).

## H. PERSONAL TAX

Individuals are taxed on their income based on income slabs on a progressive basis at various rates ranging from 5% to 30%.

## RESIDENTIAL STATUS

The scope of taxable income varies depending upon the residential status of the individual. Resident taxpayers are classified into two categories:

- Ordinarily resident; or,
- Not ordinarily resident.

An individual is classified as “resident” if he spends:

- At least 182 days in India during the tax year; or
- 60 days in India during the year and at least 365 days in the preceding four years.

An individual being a citizen of India or person of Indian origin is classified as “resident” on qualifying for the following conditions:

i. the person comes on a visit to India in any previous year is regarded as “resident” in India if the:
   a) Period of stay in India is 120 days or more during the tax year, and
   b) 365 days or more in the preceding four years.

   or

ii. Irrespective of the number of days of stay, if the citizen of India or person of Indian origin is in receipt of an income exceeding INR 1.5 million during the previous year only from India sourced income and if he is not liable to tax in any other country by reason of his residential status.

On qualifying as a resident and an individual is classified as “Not Ordinarily resident” if he has been:

a. a non-resident in nine out of the ten preceding years, or
b. in India for less than 730 days during the preceding seven years, or
c. an Indian Citizen or a person of Indian origin whose total income in India, other than foreign sourced income, exceeds INR 1.5 million during the previous year and his period of stay in India is 120 days or more but less than 182 days.
d. an Indian Citizen who is deemed to be resident in India whose total income, other than income from foreign sources, exceeds INR 1.5 million rupees during the previous year shall be deemed to be resident in India in that previous year, if he is not liable to tax in any other country or territory by reason of his domicile or residence or any other criteria of similar nature.

Non-resident taxpayers pay tax only on Indian-sourced income. Income of a non-resident shall be deemed to accrue or arise in India under Section 9(1)(v) (relating to interest paid outside India), Section 9(1)(vi) (relating to royalties paid outside India) or Section 9(1)(vii) (relating to fees for technical services paid outside India) and shall be included in total income regardless of whether:

- The non-resident has a place of residence, place of business or business connection in India;
- The non-resident has rendered services in India.

The assessment year is the period of 12 months from 1 April to 31 March. Income earned in the period of 12 months or less immediately preceding the assessment year is taxed in the assessment year

## DETERMINATION OF TAXES

The Individual income is calculated under the following heads:

1. Salary.
2. House property.
3. Business/ Profession.

4. Capital gains.
5. Other sources.

In certain cases, income is taxed on a presumptive basis, wherein the income under each head is computed separately and aggregated to arrive at the gross total income, after allowing permissible deductions under each head. For Resident Senior Citizens (men or women who are 60 years or more at any time during the previous year but not more than 80 years on the last day of the previous year).

| Income (INR) | Tax rates |
|---|---|
| Up to 300,000 | Nil |
| 300,001 - 500,000 | 5% |
| 500,001 - 1,000,000 | 20% |
| Above 10,00,000 | 30% |

For Resident Super Senior Citizens (men or women who are 80 years or more at any time during the previous year).

| Income (INR) | Tax rates |
|---|---|
| Up to 500,000 | Nil |
| 500,001 - 1,000,000 | 20% of |
| Above 10,00,000 | 30% |

For any other resident individual (below the age of 60 years) and any non-resident individual:

| Income (INR) | Tax rates |
|---|---|
| Up to 250,000 | Nil |
| 250,001 - 500,000 | 5% |
| 500,001 - 1,000,000 | 20% |
| Above 10,00,000 | 30% |

The Finance Act 2020 has brought a new regime applicable only to Individual & HUF at the option of tax payer. Income tax slab rates as per new tax regime are as follows:

| Income (INR) | Tax rates |
|---|---|
| Up to 250,000 | Nil |
| 250,001 – 500,000 | 5% |
| 500,001 – 750,000 | 10% |
| 750,001 – 1,000,000 | 15% |
| 1,000,001 – 1,250,000 | 20% |
| 1,250,001 – 1,500,000 | 25% |
| Above 1,500,000 | 30% |

| Total Income | Tax Rate (Section 115BAC) | Tax Rate ( Normal Provision) |
|---|---|---|
| Up to Rs.250000 | NIL | NIL |
| 250,001 – 500,000 | 5% | 5% |
| 500,001 – 750,000 | 10% | 20% |
| 750,001 – 1,000,000 | 15% | 20% |
| 1,000,001 – 1,250,000 | 20% | 30% |
| 1,250,001 – 1,500,000 | 25% | 30% |
| Above 1,500,000 | 30% | 30% |

The conditions under which can be opted for the new tax regime are as follows:

- If the new regime is opted for, then Alternative Minimum Tax (AMT) is not applicable.
- Where income does not include business or professional income, regime to be exercised every year [at the time of filing of return of income under section 139(1)].
- Where income includes business or professional income, regime to be exercised on or before the due date specified for filing of return under section 139(1), commencing on or after 1 April 2021 and such option once exercised shall apply to subsequent assessment years.
- Certain deductions/exemptions are to be foregone in order to be eligible for new tax regime.
- If an Assessee does not opt for the new scheme, he will continue to be governed by the normal provisions. The slabs, tax rates and surcharge as applicable to Individuals and HUFs have remained unchanged except on Long Term Capital Gains, as mentioned below.

For financial year, 2022-23 the surcharge applicable to Individuals & HUF rates are as follows:

| Income (INR) | Tax rates |
|---|---|
| Up to 5,000,000 | Nil |
| 5,000,001 – 10,000,000 | 10% |
| 10,000,001 – 20,000,000 | 15% |
| 20,000,001 – 50,000,000 | 25% |
| Above 50,000,000 | 37%1 |

Note:

1. Surcharge on Income taxable under section 111A -Short Term Capital Gains and Income from Long Term Capital Gains from all assets and dividend income would be restricted to 15%. Earlier, in case of Long-Term capital gains, reduced surcharge was restricted only for long-term capital gains from transfer of listed shares and equity oriented mutual funds u/s 112A.

There is no change in rate of Surcharge in other cases.

It is subject to marginal relief (in the case of a person having net income exceeding INR 10 million, the amount payable as income tax and surcharge shall not exceed the total amount payable as income tax on total income of INR 10 million by more than the amount of income that exceeds INR 10 million).

The tax computed above is increased by SC wherever applicable and is further increased by 4% Cess.

A resident individual (who has net income of INR 500,000 or less) is eligible for a rebate under section 87A. It is deductible from income tax before calculating cess. The amount of rebate is 100% of income tax or INR 12,500, whichever is less.

**Tax Rates for Firms, LLPS**

The effective tax rates (including Surcharge and Cess) for Assessment Year 2023-24 will be as follows:

| Person | Total income in Rs. | |
|---|---|---|
| | Up to Rs.1 Crore | Above Rs.1 Crore |
| Firms, LLP Etc | 31.2% | 34.944% |

**Tax Rates for Co-operative Society**

The effective Tax Rates (including Surcharge and Cess) for Assessment Year 2023-24 will be as follows:

- For Co-operative societies opting for taxation under section 115BAD, the effective rate is 25.168%
- For other Co-operative Societies

| Income above Rs.30000 up to Rs. 1 Crore | Income above Rs.1 Crore but less than Rs.10 Crore | Income above Rs.10 Crore |
|---|---|---|
| 31.20% | 33.384% | 34.944% |

Rates remain unchanged at 10% up to Rs.10000; 20% between Rs.10000 to Rs.20000; and 30% in excess of Rs.30000

Surcharge is reduced to 7% in case of income from Rs. 1crore up to Rs.10 Crore and remains unchanged at 12% where income exceeds Rs. 10 Crore.

AMT as per Section 115JC is currently charged at 18.5% (Plus Surcharge & Cess) on adjusted total income if the same exceeds Rs. 20 lakhs. The same is now reduced to 15% with effect from Assessment year 2023-24.

**Rationalization of surcharge for Association of Persons (AOP)**

Under the existing regime, the members of an AOP suffer a graded surcharge of up to 37%. Considering the members of the consortium are mainly companies, it is proposed that for AOPs consisting of only companies as its members that the rate of surcharge will be capped at 15%.

An individual can declare two house properties as self-occupied and the limit of INR 200,000 deduction on account of interest payable on borrowed capital on self-occupied houses shall continue to apply to the aggregate of the amounts of interest payable on borrowed capital for more than one self-occupied house properties.

Standard deduction of INR 50,000 is eligible on salary income earned by individual taxpayers.

Tax payable by an individual who has claimed a deduction under sections 35 AD, 10AA, 80H to 80RRB (except 80P) cannot be less than alternate minimum tax which is 22.126% (i.e. 18.5% + SC if total income exceeds INR 10 million + Cess) of adjusted total income. Adjusted total income is to be calculated according to the provisions of sections 115JC to 115JF of the Act. Alternate minimum tax is not applicable if adjusted total income does not exceed INR 2,000,000.

If provisions of Alternate minimum tax are applicable, the individual assessed will have to obtain a report in Form no. 29C from a Chartered Accountant.

Associations of persons are taxed at the rate applicable to the individual members if shares are determinant. Otherwise taxed at 30% (maximum marginal rate). If a non-resident is a member, then it is taxed at 40%.

## FILING OF RETURN

Non-resident taxpayers are required to file return of income in India on or before the due date specified by the Government. However, if the total income of the non-resident consists of any or all of the following income and withholding tax has been deducted on the same, then he is not required to file a return of income in India:

- dividend income; or
- interest income; or
- income from royalty; or
- fees for technical services

Please note that in a scenario where withholding tax is deducted based on beneficial tax rate as per tax treaty, instead of as per domestic law of India, the non-resident shall be required to file return of income in India.

**Return of Income in case of business reorganisation**

Where an entity has furnished return of income u/s 139 and subsequently order of approval of amalgamation/merger/demerger is received, the successor entity may furnish a modified return within a period of 6 months from the date of the order of reorganisation.

Finance Act 2022 introduced a new provision 139(8A) - Filing of an updated Return

An updated return of income can be furnished by a person for any assessment year whether or not the return of income has already been furnished for such assessment year under any other provisions of section 139. Such updated return can be furnished at any time (after the expiry of the time limit for furnishing a belated or revised return of income) within 24 months from the end of the relevant assessment year.

Further, it is subject to the condition that the person filing such updated return shall pay additional income-tax as applicable depending upon when such return is being filed. However, Return filed under section 139(3) loss return can be updated.

In the following cases, the updated return cannot be updated:

- It has the effect of reducing the total tax liability which is determined based on a return already furnished under the other provisions of section 139;
- It results in a refund, or it increases the refund determined based on a return already furnished under the other provisions of section 139;
- Any proceeding for assessment, reassessment or re-computation, or revision of income is pending or has been completed for the relevant assessment year;
- Any prosecution proceedings initiated.

Such person is required to pay additional tax in addition to normal income-tax and interest payable thereon as under:

| Particulars | Amount of additional tax |
|---|---|
| Where updated return is furnished before expiry of 12 months from end of relevant AY | 25% of aggregate of tax* and interest payable on the additional income reported in updated return |
| Where updated return is furnished after 12 months but before expiry of 24 months from end of relevant AY | 50% of aggregate of tax* and interest payable on the additional income reported in updated return |

## CERTAIN RECEIPTS TREATED AS GIFTS

Any sum of money or property, the aggregate value of which exceeds INR 50,000, received without consideration by an individual on or after 1st October 2009, is taxable except for amounts received:

(a) From relatives.

(b) On the occasion of marriage.

(c) Under a will/inheritance.

(d) In contemplation of death of the payer.

(e) From any local authority.

(f) From any fund or foundation or university or other educational institution or hospital or other medical institution or other prescribed institutions.

(g) From trusts or institutions registered with the Indian revenue authorities.

In respect of movable property, value shall be the fair market value as on the date of the receipt in accordance with the method prescribed. In respect of immovable property, value shall be the Stamp Duty value.

Notes:

1. The 10% reduced rate applies if the beneficial owner is a company which holds directly at least 25% of the capital or shares of the dividend-

paying company, as the case may be.

2. The 7.5% reduced rate applies if the beneficial owner is a company which holds directly at least 25% of the share capital of the dividend-paying company.
3. The 15% reduced rate applies if the beneficial owner is a company which controls directly or indirectly at least 10% of the voting power in the dividend-paying company.
4. The 5% reduced rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the dividend-paying company.
5. The 15% reduced rate applies if the beneficial owner is a company which owns at least 25% of the shares of the dividend-paying company.
6. The standard rate under the treaty is 15% However, by virtue of a most favoured nation clause the rate is reduced to 5% (for holdings of 10%) and 10% in all other cases.
7. The 15% reduced rate applies if the beneficial owner is a company which owns at least 10% of the shares of the dividend-paying company.
8. The 5% reduced rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the capital of the dividend-paying company.
9. The 10% reduced rate applies if the beneficial owner is a company which owns at least 10% of the shares of the dividend-paying company.
10. The 10% reduced rate applies if the beneficial owner is a company that, for an uninterrupted period of two fiscal years prior to the payment of the dividend, owns directly at least 25% of the capital stock of the dividend-paying company.
11. The 5% reduced rate applies if the beneficial owner is a company which owns at least 10% of the shares of the dividend-paying company.
12. The 5% reduced rate applies if the beneficial owner is a company that owns at least 25% of the shares of the dividend-paying company.
13. The 15% rate applies where the dividends are paid out of income (including gains) derived directly or indirectly from immovable property by an investment vehicle which distributes most of this income annually and whose income from such immovable property is exempted from tax. The 10% rate applies in all other cases.
14. The 15% reduced rate applies if the beneficial owner is a company which owns at least 10% of the voting stock of the dividend-paying company.
15. The 5% reduced rate applies if the recipient is a company which owns at least 25% of the shares of the dividend-paying company during the period of six months immediately preceding the date of payment of the dividends.
16. The 10% reduced rate applies if the interest is paid on any loan of whatever kind granted by a bank.
17. The standard rate under the treaty is 15% while the 10% reduced rate applies to interest on loans made or guaranteed by a bank or other financial institution carrying on bona fide banking or financing business or by an enterprise which holds directly or indirectly at least 10% of the capital of the interest-paying company. However, by virtue of a most favoured nation clause the standard rate is reduced to 10%.
18. The domestic rate applies as there is no reduction under the treaty.
19. The treaty benefits do not apply in respect of dividends, interest, royalties, technical fees or capital gains if (i) by reason of special measures the tax imposed by Iceland on the recipient corporation with respect to dividends, interest, royalties, technical fees or capital gains is substantially less than the tax generally imposed on corporate profits and (ii) 25% or more of the capital of the recipient corporation is owned directly or indirectly by one or more persons who are not individual residents of Iceland (article III of the protocol).
20. The 7.5% rate applies as from 1 April 2017 (1 July 2017 in Mauritius) under the 2016 protocol to the treaty. Interest derived and beneficially owned by any bank resident in the other contracting State carrying on bona fide banking business is exempt, subject to the condition that such interest arises from debt claims existing on or before 31 March 2017.
21. The standard rate under the treaty is 15% while the 10% reduced rate applies to interest paid to banking or financial institutions or to an enterprise which holds directly or indirectly at least 10% of the capital of the interest-paying company. However, by virtue of a most favoured nation clause (cfr. the Germany-India treaty) the standard rate is reduced to 10%.
22. The 10% reduced rate applies if the interest is received by a financial institution (including insurance companies). The 15% rate applies in all other cases.
23. The reduced rate applies if the interest is paid on a loan granted by a bank carrying on a bona fide banking business or by a similar financial institution (including an insurance company).
24. The 10% reduced rate applies to payments for the use of or the right to use or forbearance of the use of right to use any industrial, commercial or scientific equipment, the rendering of any ancillary technical or consultancy services.
25. The 15% reduced rate applies to payments related to copyrights of literary, artistic or scientific works, other than cinematographic films or films or tapes used for radio or television broadcasting.
26. The standard rate under the treaty is 20%. However, by virtue of a most favoured nation clause (cfr. the Austria-India treaty) the standard rate is reduced to 10%.
27. The 25% rate applies to payments arising from the use or the right to use trademarks. The 15% rate applies in all other cases.
28. The standard rate under the treaty is 20%. However, by virtue of a most favoured nation clause (cfr. the Germany-India, India-Sweden and India-USA treaties) the rate is reduced to 10%.
29. The lower rate applies to the use of, or the right to use, industrial, commercial or scientific equipment.
30. In the case of India, the 15% rate applies to payments by an enterprise in pursuance of any collaboration agreement approved by the Government of India. In other cases the domestic rate applies.
31. The standard rate under the treaty is 20%. However, by virtue of a most favoured nation clause (cfr. the Germany-India treaty) the rate is reduced to 10%.
32. The 10% reduced rate applies to payments for the use of, or the right to use, any industrial, commercial or scientific equipment or related services. In the treaty with Canada, it is specified that the higher rate applies to payment of any kind received as a consideration for the use of, or the right to use, any copyright of a literary, artistic, or scientific work, including cinematography films or work on film tape or other means of reproduction for use in connection with radio or television broadcasting, any patent, trademark, design or model, plan, secret formula or process, or for information concerning industrial, commercial or scientific experience, including gains derived from the alienation of any such right or property which are contingent on the productivity, use, or disposition thereof.
33. The position regarding the applicability of the treaty with the former USSR. remains unclear. Currently there is no statement from India regarding the applicability of the treaty in relations with these countries. In practice, these countries generally do not apply the former conventions. India has concluded new treaties with several other former USSR countries.

## APPENDIX I:

Sector-wise FDI Limit:

| Sector | FDI Limit | Entry Route & Remarks |
|---|---|---|
| ***Agriculture & Animal Husbandry***<br>• Floriculture, Horticulture, Apiculture and Cultivation of Vegetables & Mushrooms under controlled conditions<br>• Development and Production of seeds and planting material<br>• Animal Husbandry (including breeding of dogs), Pisciculture, Aquaculture<br>• Services related to agro and allied sectors | 100% | Automatic |

## KEY TAX POINTS

- Companies resident in Indonesia are subject to income tax on their worldwide income including capital gains. A permanent establishment of a foreign company is subject to tax in Indonesia on its worldwide income.
- Branch profits are taxed at the same rate as corporate profits. A 20% withholding branch profit tax is also payable on after tax income in addition to the corporate tax, subject to the application of a double tax treaty.
- Indonesian individuals are taxed on their worldwide income.
- Non-resident companies are subject to tax on income, including capital gains, derived from Indonesia.
- Based on Law No. 7 Year 2021 (Harmonized Tax Regulation) VAT is levied at a rate of 11% starting from 1 April 2022, and at 12% by 1 January 2025 (at the latest) on taxable supplies of goods and most services rendered in the Customs Area. Prior to the implementation of Law No. 7 Year 2021, VAT was levied at a standard rate of 10%, while for export of taxable goods and services the VAT rate still remains the same at 0%. Note that the 0% VAT rate on export of services must meet the requirements as stipulated under Minister of Finance Regulation No. 32/PMK.010/2019 (refer to Section VAT below for a detailed explanation).
- There is a sales tax on the transfer or importation of luxury goods, currently levied at rates between 10% and 95%.
- Stamp duties apply to the transfer of land, and certain documents are subject to Stamp Duty.
- Double tax relief credits are generally available to Indonesian residents in respect of overseas tax paid on foreign-sourced income, up to a maximum of the Indonesian tax payable on the income concerned.
- Generally, residents are subject to a creditable withholding tax of 15% on payments received from fellow Indonesian residents, while dividends – subject to certain conditions – are exempted from tax based on Law of the Republic of Indonesia No. 11 of 2020 on Job Creation.
- Payments to non-residents are generally subject to a 20% final withholding tax, subject to the application of a double tax treaty.

## A. TAXES PAYABLE

## FEDERAL TAXES AND LEVIES

## COMPANY TAX

A company will be considered taxable in Indonesia if it has a presence and conducts business in that country. Resolution of this question depends on whether the entity has a ‘permanent establishment’ in Indonesia. This term is widely defined to include a place of management, branch, representative office, office building, agent, factory or workshop, construction or mining site. Where such a presence exists, the permanent establishment is taxable on its worldwide income. Where similar businesses to that carried on by the permanent establishment are conducted in Indonesia, care must be taken to ensure that the ‘force of attraction’ principle does not result in that business income being taxed at the level of the permanent establishment.

Company tax is payable by monthly instalments. The collection of tax from interest, royalties, rentals and dividends, professional service fees, technical and management service fees, installation service fees, repair and maintenance service fees is by way of withholding tax. Where the recipient is a tax resident of Indonesia, the tax withheld is taken into account in determining the company’s final tax liability (except for tax on interest from banks, space rentals, and construction services which are treated as a final tax). Where the recipient is not a resident, the tax withheld represents a final tax.

Under Income Tax Law No. 36 Year 2008, which applies as of 1 January 2009, corporations were taxed at a single rate of 28% and reduced to 25% in 2010 until 2019. On 31 March 2020, the Government Regulation in Lieu of Law No. 1 Year 2020 (Perppu No.1/2020) was issued to help secure national economic stability during the Covid-19 pandemic. Under Perppu No. 1/2020, the tax rate for corporations and permanent establishments is reduced from the current rate of 25% to 22% for Fiscal Year 2020–2021 and to 20% starting from Fiscal Year 2022. Subsequently, on 18 May 2020, the government issued Law No. 2 Year 2020 to endorse Perppu No.1/2020 becoming law.

Under Law No. 7 Year 2021, which was endorsed on 29 October 2021, corporations – including permanent establishments – are taxed at 22% commencing from year 2022. In this regard, Law No. 7 Year 2021 has superseded Perppu No.1/2020, which previously provided for a 20% corporate tax rate for fiscal year 2022.

Corporations with an annual gross income of up to IDR 50 billion are entitled to a tax discount of 50% of the standard rate on taxable income derived from the portion of gross income up to IDR 4.8 billion. As for public companies, corporate tax deduction at 3% will be granted when meeting the following requirements:

(1) Minimum listing requirement is 40%;

(2) The minimum public ownership is 300 parties where each party holds less than 5% of the paid-in shares; and,

(3) The above two conditions must be fulfilled for at least six months (183 days) in a tax year.

Domestic Public Listed Companies with at least 40% of their paid-in capital traded on the Indonesian Stock Exchange and meeting certain requirements, may enjoy a further 3% tax reduction on the general tax rate, i.e., 19% from Fiscal Year 2020 onwards. Certain requirements are regulated under the Government Regulation (“GR”).

## CAPITAL GAINS TAX

Capital gains and losses are mainly included as ordinary income and taxed accordingly, except for transactions in stock on the Indonesian stock market and on private property. The gain/loss is ignored and tax is instead charged on the transaction value as follows:

| | | |
|---|---|---|
| Stock | 0.1% of transaction value | Final tax, except for founder shares sold by founder = 0.5% of transaction value |
| Private property:<br>Land and building | 2.5% of transfer value | Final tax for individuals, foundations and corporations |

## BRANCH PROFITS TAX

Branch profits are taxed at the same rate as corporate profits. However, a withholding branch profits tax of maximum 20%, subject to protection under a double tax treaty, is also payable on after-tax income in addition to the corporate tax. This additional tax is payable irrespective of whether the profits are remitted. Refer to 'Withholding Taxes' below for variations in the above rate. An exemption from withholding tax may be granted to a permanent establishment which reinvests its net profit in Indonesia.

## SALES TAX ON LUXURY GOODS

Under VAT Law No. 42 Year 2009, effected 1 April 2010, the tariff of sales tax on luxury goods is set at a minimum 10% and a maximum up to 200%, imposed on imported or domestically produced items. Currently, the rates of sales tax on luxury goods applied vary from 10% to 95%. However, exports – even if classified as luxury goods – are taxed at a 0% tariff.

The tax is collected at the manufacturer/import level. Payment of the sales tax is required by the 15th day of the following month and returns need to be submitted by the 20th day of the following month.

| Luxury items subject to sales tax | Tax Rate (%) |
|---|---|
| Luxury houses and town houses non-strata title with selling price of IDR 20 billion and above | 20 |
| Apartments, condominiums, towns houses strata title and the likes with selling price of IDR 10 billion and above | 20 |
| Air balloons and unpowered aircrafts | 40 |
| Bullets of fire arms and other types fire arms, except for nation's use | 40 |
| Luxury cruisers, ferries and yachts, except for nation and commercial's use | 75 |
| Aircrafts and helicopters, except for nation and commercial's use | 50 |
| Firearms, revolvers, pistols, except for nation's use | 50 |
| Motor vehicles with the capacity of 10 to 15 passengers | 10 |
| Motor vehicles of 1500 cc to 2500 cc with the capacity of fewer than 10 passengers | 20 |
| Sedan or station wagon with the cylinder up to 1500 cc | 30 |
| 2-wheel drive motor vehicles other than sedan and station wagon with the cylinder of 2500 cc to 3000 cc | 40 |
| 4-wheel drive motor vehicles, sedan and station wagon, with the cylinder of 1500 cc to 3000 cc | 40 |
| Special purpose vehicles for golf | 50 |
| Motorcycles with the cylinder capacity of 250 cc to 500 cc | 60 |
| Special purpose vehicles to be used in the snow, beach, mountains and the like | 60 |
| Sedan and station wagon with the capacity of more than 3000 cc | 95 |
| Diesel sedan and station wagon with the capacity of more than 2500 cc | 95 |
| Motorcycles with the capacity cylinder of more than 500 cc | 95 |
| Caravan trailer and semi-trailer for housing and camping | 95 |

## VALUE ADDED TAX (VAT)

VAT is levied at a standard rate of 10%. Based on Law No. 7 Year 2021 (Harmonized Tax Regulation), starting from 1 April 2022, the VAT rate is changed to 11% and levied on importers, manufacturers, wholesalers and retailers and on the provision of most services. While the VAT laws permit amendments to the rates for individual items, currently the products with a rate other than 10%/11% are cigarettes and used cars. Services such as package deliveries and travel agents are taxed at 1%, while factoring is imposed at 5% on the fees received. Exports of taxable goods are effectively excluded from VAT by being subject to the tax at a nil rate. Under VAT Law No. 42 Year 2009, which took effect from 1 April 2010, the export of services is subject to 0% VAT. Ministry of Finance (MoF) Regulation No. 32/PMK.010/2019 further defines that the zero-rated VAT is applicable to the following services:

1. Sub-contracting services with certain requirements:
    - The buyer or recipient of taxable service is outside the Customs area and is a non-resident taxpayer and does not have a permanent establishment as specified in Income Tax Law;
    - Specification and material are provided by the buyer or the recipient of the taxable service;
    - Materials are defined as raw materials, work in process and/or supporting material to be further processed into finished taxable goods;
    - Ownership of finished goods is in the hands of the buyer or the recipient of the taxable service;
    - The sub-contracting entrepreneur delivers the products by request from the buyer or the recipient of the taxable service to outside the Customs area;
2. Construction services including construction planning, construction work and construction supervision located outside the Customs area;
3. Repair and maintenance services which are attached to services of movable goods utilised outside the customs area.
4. Technology and information services;
5. Research and development services;
6. Sea and air transportation rental services for international activities;
7. Business consulting and management services, legal consultancy services, architectural and interior design consulting

services, human resources consulting services, engineering consulting services, marketing consulting services, accounting or bookkeeping services, audit or financial reporting services, and tax services;

8. Trading services in the form of services to find sellers of goods in the Customs Area for export purposes; and
9. Interconnection services, satellite operation and/or communication/data connectivity.

With regard to the above-mentioned export services, certain requirements must be met as described under a Ministry of finance Regulation. In case of failure to meet the defined requirements, said services will be considered as services provided in the Customs Area subject to a 10% VAT rate.

VAT is payable by the end of the following month of the relevant transaction prior to the submission deadline of the monthly tax return. In the case of certain services rendered by non-residents of Indonesia such as the use of intangible taxable goods and/or offshore services, the recipient of these services has an obligation, by way of self-assessment, to pay and report import VAT by the 15th of the following month.

Goods excluded from VAT:

- Food served in hotels and restaurants, including food and drinks provided by catering services;
- Money, gold and securities.

Services excluded from VAT:

- Religious services;
- Art and entertainment services;
- Hotel and boarding house services;
- Services provided by the government relating to public administration and formality requirements;
- Parking services;
- Food and catering services.

I

## VAT ON E-COMMERCE

Based on Perppu No. 1 Year 2020 Indonesian VAT is imposed on the use of certain intangible goods and services provided by overseas parties to Indonesian customers as a trade through an electronic system. The procedures of such trade through an electronic system are stipulated under the Minister of Finance Regulation.

VAT on e-commerce is imposed on foreign sellers, foreign service providers, or foreign e-commerce marketplaces and domestic e-commerce marketplaces, appointed as VAT Collectors, when their activities on the Indonesian market meet either of the following criteria:

- transaction value in Indonesia exceeding IDR 600 million in a year or IDR 50 million in a month; or
- total e-commerce traffic or accessor in Indonesia exceeds 12,000 users in a 12-month period, or 1,000 users in one month.

Appointment of VAT Collector on e-commerce transactions will be as follows:

- The appointed VAT Collector is determined by the Director General of Taxes (DGT) and shall take effect at the beginning of the month following the date of the decision on the appointment;
- Appointed VAT Collector is given an identity number as a means of tax administration, which is used as a personal identification or appointed VAT Collector's identity in exercising its rights and meeting its tax obligations;
- The appointed VAT Collectors should pay the VAT collected from Indonesian customers to the State Treasury (electronically) and submit reports through the designated electronic tax filing system provided by the DGT.

## FRINGE BENEFITS TAX (FBT) / BENEFITS IN KIND

Based on the Harmonized Tax Regulation of Law No. 7 Year 2021, benefits in kind received by employees will be included as employee benefits subject to tax at the level of the employees.

## LOCAL TAXES

Provincial tax is charged mostly at 10%, i.e., hotel and restaurant services, parking services.

## STAMP DUTY ON LAND RIGHT TRANSFER

Effective from 1 January, 2011, Stamp Duty on building and/or land right transfer is charged under the provincial government at 5% of the transfer cost.

## OTHER TAXES

## DOCUMENTARY STAMP TAX

Stamp Duty comes at a nominal amount of IDR 10,000. The types of documents upon which Stamp Duty is payable include:

- Letters of agreement, prepared for the purpose of evidencing acts, facts or conditions of a civil nature;
- Notarial deeds;
- All documents bearing a sum of money above IDR 5 million, including letters of promise to pay, securities, in any form and name, and transaction documents;
- Documents to be used as instruments of evidence before a court.

## LAND AND BUILDING TAX

Land and building tax is payable annually on land, buildings and permanent structures, although the effective rates are typically 0.5% of the value of the property.

## IMPORT DUTIES

Import duties are due at the following rates:

| Group | Goods | Rate (%) |
|---|---|---|
| Automobiles | Passenger and commercial vehicles | 5 – 50 |
| Automobile components | Incompletely knocked down<br>Part-by-part | 0 – 7.5<br>0 – 10 |
| Vessels | Ship, boats, and floating structure | 0 – 5 |
| Electronic goods | Camera, refrigerator, cellular phone et al. | 0 – 15 |
| Footwear | Footwear under HS Code 64 | – |
| Beverages, ethyl alcohol and alcoholic drinks | Ethyl alcohol, beer, wine, spirits, and other beverages. | 5 – 150 or IDR 14,000/ltr |
| Essential oils and resinoids | Odoriferous substances | 5 – 150 |
| Agricultural products | Animal and vegetable products | 0 – 30 |
| Textile, textile products and accessories | Bags, harnesses, apparels, and clothing accessories, etc. | 5 – 35 |
| Other | Chemicals, pharmaceutical products, rubber, etc. | 0 – 40 |

## B. DETERMINATION OF TAXABLE INCOME

Taxable income is calculated under normal accounting principles adjusted for specific tax rules. A deduction is allowed for all outgoings and expenses incurred for obtaining, collecting and maintaining taxable income.

Deductions are not allowed in relation to the following items:

- Income tax payments (including penalties);
- Capital expenditure (see 'Depreciation' below);
- Private expenses;
- Non-business gifts, aid and donations, except 'zakat' (Islamic alms) and other compulsory religious donations approved by the government;
- Profit distributions;
- Employers' contributions for life, health, and accident insurance and contributions to non- approved pension funds unless the contributions are treated as taxable income of employees;
- Provisions (except for financial institutions);
- Dividends;
- Expenses related to income which are taxed at a final rate, i.e. interest on loans related to time deposits;
- Expenses related to income which are exempt from tax, i.e. interest on loans used to buy shares where dividends to be received are not subject to income tax;
- Salaries or compensation received by a partnership or firm as members where their participation is not divided into shares.

## INVESTMENT INCENTIVES

Taxpayers investing in certain business sectors and/or in certain areas/locations may be entitled to taxation incentives in the form of:

- A reduction in net income up to a maximum of 30% (5% per year for six years) from the total investment realised;
- Accelerated depreciation and amortisation;
- Tax loss compensations for a longer period but not exceeding 10 years;
- An exemption is granted from dividend withholding tax when at least 30% of the dividend is re-invested into certain investment instruments as stipulated under the Ministry of Finance Regulation. This exemption applies to both corporations and individuals.

## DEPRECIATION

Where fixed assets (either tangible or intangible) have a beneficial life of greater than one year, tax relief for the cost of acquisition is available through depreciation. The following depreciation rates are applicable:

| Beneficial Life | Straight-line method (%) | Declining-balance method (%) |
|---|---|---|
| A. Non-building: | | |
| 1 – 4 years | 25 | 50 |
| 4 – 8 years | 12.5 | 25 |
| 8 – 16 years | 6.25 | 12.5 |
| 16 – 20 years | 5 | 10 |
| B. Building: | | |
| Permanent | 5 | -- |
| Non-permanent | 10 | -- |

Note: Depreciation of property is taken into account commencing the month, instead of the year, that the property is acquired which means that the first year depreciation is accounted for on a pro rata basis, while the net book value is depreciated accordingly over its remaining beneficial years, unless it is retired or sold within its beneficial life.

## STOCK / INVENTORY

Taxpayers may value inventory using either the 'first-in, first-out' (FIFO) or Average Cost methods. Whichever method is selected, it must be consistently applied.

## CAPITAL GAINS AND LOSSES

Gains and losses on capital items are taxable in Indonesia without special treatment being afforded to such items, except for gains and losses on sales of share certificates of listed companies and on sales of land and buildings as previously mentioned.

## DIVIDENDS

An exemption exists under particular circumstances for dividends received by companies incorporated in Indonesia where the payer is also an Indonesian company. In the absence of a double tax treaty, withholding tax at 20% is levied on dividend payments to non-residents. Reference should be made to the section on withholding tax and the individual treaties.

An exemption from dividend withholding tax is granted when at least 30% of the dividend is re-invested into certain investment instruments as stipulated under the Ministry of Finance Regulation. Otherwise, the difference between the 30% threshold and the re-invested portion will be subject to income tax. This exemption applies to corporations, permanent establishments and individuals.

## INTEREST DEDUCTIONS

While the Minister of Finance is empowered to prescribe required debt equity ratios for foreign companies, no limit has been set to date. Due to the existence of this power, however, caution should be exercised to ensure debt is not considered equity, with the result that the related interest and borrowing costs are disallowed.

## LOSSES

While loss carry backs are not permitted, losses may be carried forward for up to 5 years. The period over which losses are able to be carried forward can be extended by decree from the Minister of Finance.

## DEBT-TO-EQUITY RATIO

The debt-to-equity ratio (DER) is limited to a maximum of 4:1 in order to claim the borrowing costs as an allowable deduction for tax purposes. Should the DER exceed the prescribed 4:1 threshold, the excess borrowing costs will be disallowed as deductible in determining the amount of taxable income. The 4:1 DER does not apply to the following taxpayers: banks, financial institutions, insurance and reinsurance institutions, mining businesses (subject to certain contracts or agreements), taxpayers whose income is fully subject to final tax under respective regulations, and businesses in infrastructure sectors. If a taxpayer's equity balance is zero or negative, the entire borrowing costs are disallowed as a deduction in calculating the amount of taxable income.

## C. FOREIGN TAX RELIEF

Where an Indonesian resident has foreign branches (or earns other foreign-source income), the income of those branches will be taxable in Indonesia. Where such income has been subject to foreign tax, tax credits will be granted, subject to a maximum of the Indonesian tax payable on the income concerned.

## D. CORPORATE GROUPS

The consolidation of returns is not allowed.

## E. RELATED PARTY TRANSACTIONS

- The tax authorities will disallow a deduction for excessive/non-arm's-length transactions between related parties.
- The tax authorities are authorised to re-allocate the amount of income and deductions between related parties and to characterise debt as equity to calculate the amount of taxable income for a taxpayer that has a special relationship with other taxpayers in accordance with the arm's-length principle.

Following the recommendation of Action 13 of the OECD's Base Erosion and Profit Shifting Project, Indonesia issued Ministry of Finance Regulation 213/PMK.03/2016 to implement a three-tiered standardised approach to TP documentation, which will provide the tax administrations with adequate information to perform a TP risk assessment and make informed decisions during a TP audit to minimise disputes. PMK-213 is effective from 30 December 2016 and thus applies from fiscal year 2016 onwards.

A taxpayer with related-party transactions is required to prepare a master file and a local file if:

- the gross revenue in the prior fiscal year is more than IDR 50 billion;
- the value of related-party transactions in the prior fiscal year exceeds:
    - o IDR 20 billion in respect of tangible goods; or
    - o IDR 5 billion in respect of the provision of services, payment of interest, use of intangible goods, or other related-party transactions; or
- the affiliated party is domiciled in a country or jurisdiction with lower income tax rates than the prevailing tax rate in Indonesia.

## F. WITHHOLDING TAX

Generally, residents are subject to a creditable withholding tax of 15% with any balance being payable or refundable, while non-residents are subject to a final withholding tax of 20%. Withholding taxes are collected when the taxable transaction takes place or payment becomes due. The rates of withholding tax are as follows:

| | Residents[1] (%) | Non-residents[1] (%) |
|---|---|---|
| Dividends[2] | 15 | 20 |
| Interest | 15 | 20 |

| | Residents[1] (%) | Non-residents[1] (%) |
|---|---|---|
| Royalties | 15 | 20 |
| Prizes and awards | 15 | 20 |
| Rental and other income related to the use of property, other than land/space rental | 2 | 20 |
| Technical, management, consulting, and other services | 2 | 20 |

NOTES:

1. All percentage rates are on gross amounts unless otherwise noted.
2. Withholding tax on dividends paid to Indonesian corporate shareholders will be exempt only if the following conditions are met:
   i. The dividend is sourced from retained earnings;
   ii. The recipient has at least a 25% shareholding in the dividend-payer.

A 100% withholding tax is imposed, in addition to the applicable tax rate, on individuals and corporations, other than non-residents, who do not have a tax identification number (NPWP).

## FINAL WITHHOLDING TAXES

The following transactions are subject to a final withholding tax. These taxes apply to residents and permanent establishments of non-residents.

| | |
|---|---|
| Sale of listed shares[1] | 0.1% of the gross proceeds |
| Additional tax on sale of listed Founder shares by a founder shareholder[1] | 0.5% of the IPO price |
| Sale of land or buildings[1] | 2.5% of the sales value (final tax for individuals, foundations and corporations). An extra 5% stamp duty for the land and/or building acquisition rights is payable by the purchaser |
| Transfer of real estate to a Real Estate Investment Fund (Kontrak Investasi Kolektif (KIK) - Dana Investasi Real Estate (DIRE) | 0.5% of the gross proceeds |
| Interest or discount on Government CDs and savings deposits and interest or discount on bonds2 | 20% (except for banks and certain approved pension and mutual funds; and loan interest on simple houses) |
| Asset revaluation approved by the Tax Office | 10% of the difference between the book value and the revalued amount of the assets (unless current year tax losses, which will firstly be applied against the revaluation difference) |
| Prizes from lotteries | 25% of gross proceeds |
| Land and/or building rental (include service charge) | 10% of gross proceeds |

NOTES:

1. These rates also apply to non-residents (subject to the application of a double tax treaty).
2. No withholding tax is payable in respect of savings, deposits or Government CDs with a principal amount up to IDR 7,500,000.

Under Government Regulation No. 51 dated 20 July 2008, Construction Services are subject to final tax at the following rates:

- 2% on construction services provided by qualified small enterprises;
- 4% on construction services provided by non-qualified enterprises;
- 3% on construction services provided by enterprises other than those mentioned above;
- 4% on construction planning and supervisory services provided by qualified enterprises; and,
- 6% on construction planning and supervisory services provided by non-qualified enterprises.

(Note that the above Government Regulation is effective as of 1 January 2008.)

Further to Government Regulation No. 9 dated 21 February 2022, Construction Services are subject to final tax at the following rates:

a) 1.75% on construction work carried out by Service Providers who have a small qualifying business entity certificate or certificate work competence for individual businesses;
b) 4% on construction work carried out by Service Providers who do not have a business entity certificate or work competency certificate for individual business;
c) 2.65% on construction work carried out by Service Providers other than Service Providers as referred to in letter a and letter b above;
d) 2.65% on integrated construction works carried out by a Service Provider who has a business entity certificate;
e) 4% on integrated construction work carried out by Service Providers who do not have a business entity certificate;
f) 3.5% on construction consulting services carried out by Service Providers who have a business entity certificate or work competency certificate for individual business; and
g) 6% on construction consulting services carried out by Service Providers who do not have a business entity certificate or a work competency certificate for individual business.

## GOVERNMENT REGULATION NO. 23 YEAR 2018 REGARDING 0.5% FINAL TAX

Government Regulation No. 23 Year 2018 (“GR-23”) entered into force on 1 July 2018 replacing GR No. 46 Year 2013 regarding final tax on taxpayers within a certain turnover.

Under GR-23, the final tax rate is reduced from the previous tax rate of 1% to 0.5% applicable to taxpayers with annual gross turnover not exceeding IDR 4.8 billion per annum based on the previous year's activity. However, it does not include the following income:

a. Income derived from the delivery of certain freelance services by individuals;
b. Income derived from overseas which is payable or has been taxed in the source country;
c. Income subject to final tax under certain tax regulations; and
d. Income not subjected to tax.

The following taxpayers are also excluded from the application of the 0.5% final tax under the GR-23:

a. Taxpayers who choose to be submitted to the normal tax regime (Article 17 or Article 31E Income Tax);
b. Limited partnerships or firms set up by individuals who have special expertise, i.e. professionals and freelance services;
c. Companies that obtain an Income Tax Allowance or Tax Holiday; and
d. Taxpayers in the form of a permanent establishment.

The final tax should be self-assessed or withheld by the transaction counterpart. For withholding purposes, final-taxed taxpayers should apply to the DGT for a Statement Letter, allowing them to abide by GR-23 and hence to be subject to 0.5% on their gross income.

GR-23 sets the following new limitation periods during which taxpayers can benefit from the final tax regime before they are submitted to the normal tax regime:

a. Seven years for individuals (will expire by the end of 2024);
b. Four years for cooperatives, limited partnerships, or firms (expired by the end of 2021); and
c. Three years for limited liability companies (expired by the end of 2020).

The limitation period commences from the tax year since the taxpayer is registered - for those registered after the commencement of GR-23 - and from tax year 2018 - for the taxpayers registered prior to the commencement of GR-23.

## WITHHOLDING TAX - ARTICLE 22

Article 22 income tax is typically applicable to the following:

1) The import of goods. A creditable withholding tax of 2.5% for importers with an import licence or 7.5% imposed if the importer does not possess the appropriate import licence;
2) The sale of goods to the government requiring payment from the State Treasury, the State Budget General Directorate, or certain state-owned companies. The tax rate applied to these transactions is 1.5% of its selling price; and,
3) The sale/purchase of steel, cars, cement and paper products. The tax rates are: purchase of steel: 0.30%; automotive products: 0.45%; cement: 0.25%; and paper products: 0.10% of its selling price.
4) The sale/purchase of high value luxury goods is subject to 5% tax.

An additional 100% withholding tax is imposed on individuals or corporations, other than non-tax residents, who do not possess a NPWP.

## G. EXCHANGE CONTROL

While the importation of capital is relatively uninhibited, foreign investment must be approved. Similarly, foreign currency can be transferred essentially free of control although minor reporting requirements do exist. Importantly, repatriation of capital, other than resulting from the sale of existing shares to Indonesians, is prohibited for the period the investor enjoys any tax holiday.

## H. PERSONAL TAX

Residents of Indonesia are taxed on their worldwide income. Non-residents are only taxed on income derived from Indonesia. An individual will be a resident of Indonesia if they are present in Indonesia for more than 183 days or reside in Indonesia during a fiscal year and intend to stay in Indonesia. Certain double tax treaties modify the above rules. Individual taxable income is progressively taxed at the following rates:

| Taxable Income (IDR) | (IDR) |
|---|---|
| 0 – 60,000,000 | 0 + 5% on excess |
| 60,000,001 – 250,000,000 | 3,000,000 + 15% on excess |
| 250,000,001 – 500,000,000 | 31,500,000 + 25% on excess |
| 500,000,001 – 5,000,000,000 | 94,000,000 + 30% on excess |
| Above 5,000,000,000 | 1,444,000,000 + 35% on excess |

An additional 20% tax is imposed on individuals, other than non-tax residents, who do not possess an NPWP.

## ALLOWABLE DEDUCTIONS

In determining the annual taxable income of an individual, the following may be deducted from gross income:

| | (IDR) |
|---|---|
| Occupational support: 5% of gross income, up to maximum of | 6,000,000 |
| Pension: 5% of gross income, up to maximum of | 2,400,000 |
| Non-taxable income (effective 1 January 2016): | 54,000,000 |
| • For the taxpayer | |
| • Additional for a married taxpayer | 4.500,000 |
| • Additional for each lineal family member related by blood | 4,500,000 each |

A married female employee is only allowed non-taxable income for herself if she has a certificate from the local authorities that her husband does not work. Non-resident individuals are subject to a final tax of 20% where the payments represent compensation for work performed in Indonesia regardless of where they are paid. Lump sum pension payments and severance pay on individual residents are subject to final tax on the gross amount at the following rates:

| Lump Sum Pensions Payments | |
|---|---|
| **Taxable Income** | **(IDR)** |
| 0 – 50,000,000 | exempt/non-taxable income |
| Above 50,000,000 | 5% |

| Severance pay | |
|---|---|
| **Taxable Income** | **(IDR)** |
| 0 – 50,000,000 | exempt/non-taxable income |
| 50,000,001 – 100,000,000 | 5% |
| 100,000,001 – 500,000,000 | 2,500,000 + 15% on excess |
| Above 500,000,000 | 62,500,000 + 25% on excess |

However, pension payments made to non-resident individuals are taxed under Article 26 of the Income Tax Law at a rate of 20% on the gross amount. Where home leave or education costs are reimbursed, the amount of the reimbursement is taxable in full at the level of the employee. Note that food and beverages provided at the workplace by an employer to its employees are not subject to tax but deductible for the employer.

I

## SOCIAL SECURITY

Under the government regulations, employers are required to register themselves and their employees for a social security program managed by the social security agency, the so-called BPJS (formerly known as Jamsostek). While the employers must pay a certain portion of the premium contributions, the employees' contributions are normally collected through payroll deductions from their gross regular salaries/wages. Currently, the BPJS premium contributions consist of BPJS Employment Insurance and BPJS Health Insurance as follows:

| Description | Borne by employer | Borne by employee |
|---|---|---|
| BPJS Employment Insurance | | |
| • Working accident coverage | 0.24% up to 1.74% | -- |
| • Death insurance | 0.3% | -- |
| • Old age savings | 3.7% | 2% |
| BPJS Health Insurance | | |
| • Health care[1] | 4% | 1% |
| BPJS Pension | | |
| • Pension[2] | 2% | 1% |

1. Maximum calculation base is IDR 8,000,000/month.
2. Maximum calculation base is subject to yearly adjustment based on BPJS regulation.

Note that the requirement of participating in BPJS social security applies to all employees, including expatriates who have been working in Indonesia for more than six months.

## I. TREATY AND NON-TREATY WITHHOLDING TAX RATES

Withholding taxes are levied on corporations and individuals, residents and non-residents as follows:

| | Dividends (%) | | Interest (%) | Royalties (%) |
|---|---|---|---|---|
| | Individuals, companies (%) | Qualifying companies (%) | | |
| **Non-treaty countries** | | | | |
| Companies | 20 | 20 | 20 | 20 |
| Individuals | 20 | -- | 20 | 20 |
| **Treaty countries:** | | | | |
| Algeria | 15 | 15 | 15 | 15 |

Notes:

1. The reduced 10% rate applies if the beneficial owner is a company which holds directly at least 25% of the equity capital of the paying company.
2. The reduced 10% rate applies if the recipient is a company (other than a partnership) which holds directly at least 25% of the capital of the paying company.
3. The reduced 10% rate applies if the beneficial owner is a company which holds (directly) at least 10% of the capital of the paying company.
4. The reduced 10% rate applies if the beneficial owner is a company which holds directly at least 20% of the capital of the paying company.
5. The reduced 10% rate applies if the beneficial owner is a company which owns at least 25% of the voting shares of the paying company during the period of 12 months immediately before the end of the accounting period for which the distribution of profits takes place.
6. 15% if the paying company engages in an industrial undertaking and 20% in other cases.
7. The reduced 10% rate applies if the beneficial owner is a company which controls, directly or indirectly, at least 15% of the voting power of the paying company.
8. The reduced 10% rate applies if the beneficial owner is a company that owns directly at least 25% of the voting stock of the paying company.
9. The reduced 10% rate applies if interest is paid by a bank, a financial institution or by an enterprise the activities of which are mainly carried on in the fields of agriculture, plantation, forestry, fishery, mining, manufacturing, industries, transportation, low cost housing projects, tourism and infrastructure and for interest paid to a bank or to another enterprise.
10. The reduced 10% rate applies to royalties for (i) the use of, or the right to use, any industrial, commercial or scientific equipment (ii) the supply of scientific, technical, industrial or commercial knowledge or information (iii) the supply of any assistance that is ancillary and subsidiary to, and is furnished as a means of enabling the initial application of any such equipment mentioned in (i) or any such knowledge or information mentioned in (ii). The 10% rate also applies to total or partial forbearance in respect of the use or supply of any property or right considered as royalties in the treaty. The 15% rate applies in all other cases.
11. The 10% rate applies to royalties for the use of, or the right to use, any copyright of literary, artistic or scientific work including cinematograph films, and films or tapes for television or radio broadcasting.
12. The 10% rate applies to royalties for the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial or scientific experience. The 7.5% rate applies to fees for technical services. The 15% rate applies in all other cases.
13. The 10% rate applies to royalties in respect of payments of any kind received as a consideration for the use of, or the right to use industrial, commercial or scientific equipment, or for information concerning industrial, commercial or scientific experience. The 15% rate applies in all other cases.
14. The 15% rate applies to royalties for the use of, or the right to use, any copyright of literary, artistic or scientific work including cinematograph films or films or tapes for radio or television broadcasting. The 10% rate applies to royalties for any patent, trade mark, design or model, plan, secret formula or process, and for the use of or the right to use, industrial, commercial or scientific equipment or for information concerning industrial, commercial or scientific experience.
15. The 12.5% rate applies to royalties for the use of, or the right to use, any patent, trademark, design or model, plan, secret formula or process, or for information concerning industrial, commercial or scientific experience, or for the use of, or the right to use, industrial, commercial or scientific equipment, cinematograph films or tapes for television or broadcasting. The 15% rate applies to royalties for the use of, or the right to use, any copyright of literary, artistic or scientific work.
16. The reduced 10% rate applies to royalties for the use of, or the right to use any copyright of motion picture films or films or video for use in connection with television or tapes for use in connection with radio broadcasting or total or partial forbearance in respect of the use or supply or any property or right considered as royalties in the treaty.
17. The 10% rate applies to royalties for the use of, or the right to use, industrial, commercial or scientific equipment, or for information concerning industrial, commercial or scientific experience. The 15% rate applies to royalties for the use of, or the right to use, any copyright of literary, artistic or scientific work including cinematograph films and films or tapes for radio or television broadcasting, any patent, trade mark, design or model, plan, secret formula or process.
18. The 15% rate applies to royalties for the use of, or the right to use, any copyright of literary, artistic or scientific work including cinematograph films, or tapes for television or radio broadcasting. The 20% rate applies to royalties for the use, or the right to use, any patent, trade mark, design or model, plan, or any industrial or scientific equipment, or for information concerning industrial or scientific experience.
19. The 10% rate applies to royalties for the use of, or the right to use, any industrial, commercial or scientific equipment. The 15% rate applies to royalties for the use of, or the right to use, any copyright of literary, artistic or scientific work, including cinematograph films, and films or tapes for radio or television broadcasting, or any patent, know-how, trade mark, design or model, plan, secret formula or process.
20. The 12.5% rate applies to royalties while the 10% rate applies to technical services.
21. The 10% rate applies to dividends paid to a recognised pension fund whose income is generally exempt. The 15% rate applies in all other cases.

22. The 5% reduced rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the capital of the dividend-paying company.
23. The 5% reduced rate applies to interest paid on a loan made for a period of more than two years or is paid in connection with the sale on credit of any industrial, commercial or scientific equipment.
24. A 20% rate applies to royalties while a 10% rate applies to fees for technical assistance.

## MEMBER FIRM

| City | Name | Contact Information |
|---|---|---|
| Erbil | Mohammed Khattab | +964 750 8829 873<br>mkhattab@pkfiraq.com |

## BASIC FACTS

| | |
|---|---|
| Full name: | Republic of Iraq |
| Capital: | Baghdad |
| Main languages: | Arabic, Kurdish |
| Population: | 42.25 million (2022 estimate) |
| Monetary unit: | Iraqi Dinar (IQD) |
| Internet domain: | .iq |
| Int. dialling code: | +964 |

## KEY TAX POINTS

- Companies are broadly subject to a fixed corporation tax rate of 15%.
- Capital gains are treated as part of the ordinary income of companies and taxed at the appropriate corporation tax rate.
- There is no Value Added Tax (VAT) or Goods and Services Tax (GST) in Iraq.
- Related party transactions are required to be reported separately and should be made on a third party arm’s length basis. Where prices paid for the purchase of goods or services are excessive or unreasonable, the Tax Authority can disallow a deduction for the excess portion.
- Resident and non-resident individuals are subject to personal tax at progressive tax rates up to 15%. Resident individuals can claim relevant exemptions whereas no exemptions are available to non-resident individuals.

## A. TAXES PAYABLE

## COMPANY TAX

An Iraqi resident company is liable to corporation tax on all its resources of income and capital gains whenever arising from the following operations:

- Trading activities;
- Manufacturing activities;
- Investments in securities and bonds;
- Interests; and,
- Rent of agricultural grounds.

Corporate tax rates are fixed for each financial year ending 31 December.

**Tax rates**

- Taxes on Limited Liability Companies:

  Limited Liability Companies are subject to a fixed tax rate of 15%.
- Tax on Private Shareholding Companies:

  Private Shareholding Companies are subject to a fixed tax rate of 15%.
- Tax on Mixed Shareholding Companies:

  Mixed Shareholding Companies are subject to a fixed tax rate of 15%.
- Contracts concluded with foreign oil companies which are contracted to work in Iraq or its branches or offices and the parties sub-contracting with it in the field of the production and extraction of oil and gas and their related industries are subject to 35% income tax on income realized inside of Iraq.

Tax returns must be filed by or before the 31st of May of the year of assessment. If the returned self-assessed position is not accepted by the tax authorities they will raise an assessment based on the information available to them and payment of the tax liability is due within 21 days from the assessment date. No quarterly payments are due during a tax year.

## CAPITAL GAINS TAX

Capital gains made by companies are taxed at the appropriate corporation tax rate.

### BRANCH PROFITS TAX
Foreign branches in Iraq are taxable at the corporation income tax ratios, after deduction of any overseas taxation.

### VALUE ADDED TAX
There is no VAT in Iraq. However, special sales tax applies as follows:
- 10% on services rendered by hotels and restaurants;
- 20% on sales of mobile and internet charging cards;
- 5% on importation of vehicles of all kinds; and
- 100% on importation of cigarettes and alcoholic beverages.

### PROPERTY, PLANT AND EQUIPMENT RENTAL
A 10% deduction can be made against the rental income from property, plant and equipment in respect of depreciation and maintenance expenses. The remainder (90%) is then subject to 10% income tax.

## B. DETERMINATION OF TAXABLE INCOME
Any income incurred in Iraq is subject to income tax. Corporate taxable income is determined by ascertaining assessable gross income and reducing it by allowable deductions.

### DEPRECIATION
Depreciation expense on machinery and equipment is deductible based on certain ratios whereas the depreciation on buildings and real estates is not deductible.

### INVENTORY
All Inventory Items are valued at the lower of cost or net realisable value.

### CAPITAL GAINS AND LOSSES
Capital gains and losses are included within the profit chargeable to corporation tax for the accounting period.

### DIVIDENDS
Dividends paid to Iraqi companies are generally exempted from the corporation tax whereas the mentioned income was already taxed.

### INTEREST DEDUCTIONS
The taxpayer generally may deduct business interests paid or incurred within the tax year. Interest must be directly related to the subject income.

### LOSSES
Net operating losses may be carried forward for 5 years against the same taxable income, subject to a maximum deduction of 50% of taxable income in each year.

### FOREIGN SOURCED INCOME
Iraqi corporations are taxed on worldwide income including any foreign branches income.

### INCENTIVES
In certain cases, the investor might take the benefits of tax and customs exemption for five years, this period is extended to reach 10 years.

## C. FOREIGN TAX RELIEF
An Iraqi corporation or a foreign corporation engaged in a business in Iraq, may elect to claim either a credit or a deduction for income tax paid to another country, if the taxes are connected with or related to its business, or if the income is also taxed by Iraq.

## D. CORPORATE GROUPS
There is no provision in Iraq for consolidation of accounts for tax purposes or provisions for group taxation.

## E. RELATED PARTY TRANSACTIONS
Related party transactions are required to be reported separately and the tax authorities are given power to consider whether transactions are at arm's length. Where prices paid for the purchase of goods or services are excessive or unreasonable, the assessing officer can disallow a deduction for the excess portion.

## F. WITHHOLDING TAX
If a resident Iraqi pays an amount to a non-Iraqi (non-resident), this income will be subject to 15% withholding tax if it relates to interest on debentures, mortgages, loans, deposits and advances, as well as annual allowances, pension salaries, or other annual payments. Please note that dividends are not subject to withholding tax.

## G. EXCHANGE CONTROL
There are no exchange control rules in Iraq.

## H. PERSONAL INCOME TAX

**Resident Personal tax**
- First IQD 250,000 is subject to 3% after deduction of exemptions.
- From IQD 250,000 to 500,000 is subject to 5% after deduction of exemptions.
- From IQD 500,000 to 1,000,000 is subject to 10%, after deduction of exemptions.
- Any amount exceeding IQD 1,000,000 is subject to 15%, after deduction of exemptions.

**Non-resident Personal Tax**
- First IQD 250,000 is subject to 3%, no exemptions are granted to the taxpayer.
- From IQD 250,000 to 500,000 is subject to 5%, no exemptions are granted to the taxpayer.
- From IQD 500,000 to 1,000,000 is subject to 10%, no exemptions are granted to the taxpayer.
- Any amount exceeding IQD 1,000,000 is subject to 15%, no exemptions are granted to the taxpayer.

## I. TREATY AND NON-TREATY WITHHOLDING TAX RATES

Iraq currently only has one tax treaty in force. The Egypt-Iraq treaty entered into force on 2 December 1968.

## KEY TAX POINTS

- Irish corporation tax is payable by Irish resident companies on their worldwide income and gains.
- Non-resident companies are taxed on income or gains from Irish specified assets and on income or from a branch or agency in Ireland.
- All Irish companies incorporated after January 2015 are deemed resident in Ireland, unless the company is considered tax resident in another country under a Double Taxation Agreement ('DTA').
- A company not incorporated in Ireland may also be deemed Irish resident if its central management and control resides in Ireland.
- The standard rate of corporation tax is 12.5% and generally applies to trading income. Passive income, such as rent and investment income, is generally taxed at 25%. Capital gains of companies are, broadly, taxed at 33%.
- Ireland has signed up to the minimum corporation tax rate of 15% which could apply to multinational companies from 2023.
- Ireland has implemented interest limitation rules and anti-reverse hybrid rules.
- VAT applies to supplies of goods and services by taxable persons. The standard rate of VAT is 23%.
- A double tax credit is generally available to Irish companies in respect of overseas taxes suffered on foreign income.
- Payments of interest, royalties and rent to non-residents are, in certain circumstances, subject to withholding tax at 20% (subject to the relevant double tax treaty).
- Payments of dividends are, in certain circumstances, subject to withholding tax at 25% (subject to the relevant double tax treaty).
- Individuals who are resident, ordinarily resident and domiciled in Ireland are subject to income tax on worldwide income and to capital gains tax on worldwide gains. Irish nationals who are not domiciled in Ireland, are taxed on a remittance basis in respect of overseas income and gains.
- There is specific anti-avoidance legislation for transfer pricing and controlled foreign companies in Ireland.

# A. TAXES PAYABLE

## COMPANY TAX

Irish Corporation Tax is payable by Irish tax resident companies on its worldwide income and capital gains from all sources. All Irish incorporated companies are deemed resident in Ireland, subject to certain exceptions. A company not incorporated in Ireland may also be deemed Irish resident if its place of central management and control is in Ireland. Non-Irish tax resident companies are chargeable to Irish corporation tax where they have a permanent establishment in Ireland.

From 1 January 2015, newly Irish incorporated companies will be deemed to be Irish tax resident (unless under the terms of a double tax treaty the company is determined to be resident elsewhere).

The new residency rules which came into effect from 1 January 2021 for companies incorporated in Ireland before 1 January 2015 which are managed and controlled in an EU Member State or in a country with which Ireland has a double tax treaty will be deemed to be Irish tax resident where that country has a place of incorporation test but not a central management and control test.

### Corporation Tax Rates

The standard rate of corporation tax is 12.5% and generally applies to the trading income of companies, with a rate of 25% applying to other income such as rent or investment income. In addition, where a company has a permanent establishment (e.g. a branch/ office in Ireland) the branch profits will be chargeable to corporation tax at 12.5%. Corporation tax is payable by reference to a company's accounting period. Non-Irish tax resident companies not trading in Ireland will be chargeable to income tax at 20% on any Irish source income (e.g. rental profits/interest income).

### Preliminary Tax

*Small Company*

Where a company has a corporation tax liability of less than EUR 200,000 (i.e. "small company") in their previous accounting period, corporation tax is payable in two stages with the first payment due one month before the end of the accounting period. The amount of the payment will be 100% of the corporation tax liability for the preceding accounting period (or 90% of the corporation tax liability for the current accounting period). The balance of the corporation tax liability for the period is payable nine months after the end of the accounting period with the corporation tax return.

*Large Company*

Large companies with a corporation tax liability of EUR 200,000 or more in their previous accounting period are obliged to pay corporation tax in three stages. The first instalment will be payable in the sixth month of the accounting period and the amount payable will be 50% of the corporation tax liability for the preceding accounting period (or 45% of the corporation tax liability for the current accounting period). The second instalment will be payable in the 11th month of the accounting period and the amount payable will bring the total preliminary tax paid to 90% of the corporation tax liability for the current accounting period. The balance of the corporation tax liability is payable nine months after the end of the accounting period when filing their tax return.

### Corporation tax return

Both small companies and large companies must submit a corporation tax return to the Inspector of Taxes by the 23rd day of the ninth month following the accounting year end. Failure to do so will result in a statutory surcharge and restriction on the use of certain reliefs or allowances such as loss relief.

### Country-by-Country Reporting

Finance Act 2015 introduced Country-by-Country Reporting for Irish parented multinational enterprises with consolidated annualized group revenue of EUR 750 million or more. The first report should be prepared for fiscal years commencing on or after 1 January 2016 and filed within 12 months of the year end. Failure to comply with this reporting requirement or the provision of an incorrect report will result in a penalty of EUR 19,045 and in some instances a further penalty of EUR 2,535 for each day that the report remains outstanding. This is in line with OECD recommendations and is the first of a number of recommendations that will be implemented by Ireland to comply with the standards and recommendations of the BEPS project.

### Increase in rate

In 2022, Ireland signed up for the OECD Inclusive Framework on a new tax structure to combat the tax challenges of digitalisation. This framework includes 2 pillars. Pillar 1 will see a reallocation of the proportion of profits to the jurisdiction of the consumer and Pillar 2 will see the adoption of a new global minimum effective tax rate of 15% applying to multinationals with overall revenue above EUR 750 million. The new framework could come into force as early as 2023.

## CAPITAL GAINS TAX

The current rate of Capital Gains Tax is 33%. Capital gains arising on disposals by Irish tax resident companies are calculated using capital gains tax principles, however, the tax liability arising is subject to corporation tax (with the exception of gains arising on disposals of development land which are subject to capital gains tax).

Non-Irish tax resident companies are chargeable on the sale of specified assets including:

a) Land and buildings in Ireland;

b) Minerals in Ireland or any rights to same;

c) Assets situated in Ireland which are used for the purpose of a trade carried on in Ireland through a branch;

d) Unquoted shares deriving their value or the greater part of their value from (a) or (b) above.

Capital losses on the sale of assets can be set against capital gains arising in the same accounting period and any excess can be carried forward and applied in subsequent accounting periods against future capital gains. Losses created on disposals to connected parties are restricted.

**Participation Exemption**

Where a holding company disposes of a subsidiary, provided certain conditions are satisfied, the disposal may be exempt from capital gains tax. In brief, the parent company must beneficially own 5% of the subsidiary's share capital, the profits of the subsidiary and the assets of the subsidiary are available for distribution on wind up. In addition, both the parent and subsidiary must carry on a trade/be part of a trading group. The exemption will not apply where the subsidiary derives the greater part of its value from land and buildings in the State.

**Relief on Disposals of Certain Land or Buildings**

In order to stimulate activity in the property market, a relief from capital gains tax for land and buildings purchased in the European Economic Area between 7 December 2011 and 31 December 2014 where the property is held for 7 years or more was introduced. The relief applies to both residential and commercial property and to property held by individuals and corporates.

The relief applies by exempting the capital gain attributable to the first 7 years of ownership of the asset. Therefore, if a property is owned for 10 years and subsequently sold, only 3/10ths of any gain on the disposal is chargeable to capital gains tax. No relief is available where the asset is owned for less than 7 years (i.e. the full gain would be liable to capital gains tax).

The requisite holding period has been reduced from 7 years to 4 years in the Finance Act 2017. The measure has created a three-year period (i.e. years 4 to 7) in which the property can be sold and benefit from a full exemption whereas if held longer than 7 years, only proportionate relief is available. The new rule will only apply to disposals made on or after 1 January 2018.

**Debt Write off**

The base cost of an asset for capital gains tax purposes will be reduced where the asset was acquired with borrowings and an amount of the borrowings has been released or written off. If the release or write off occurs before the disposal the base cost is reduced accordingly. If the write off occurs after the disposal it will be treated as a capital gain in the year of write off.

I

## VALUE ADDED TAX (VAT)

A company is obliged to register for VAT if its turnover from the sale of goods exceeds EUR 75,000 or if its turnover from the provision of services exceeds EUR 37,500. The threshold for VAT in Ireland for a trader with no establishment in Ireland is EUR Nil, subject to a number of exceptions. The current standard rate of VAT is 23%. There is a reduced rate of VAT of 13.5% applying in respect of the provision of immovable property and certain services. In addition, a second reduced rate of VAT of 9% applies mainly to printed and electronic newspapers. There is also a 0% rate of VAT that applies to certain goods/services. Some supplies are exempt from VAT such as banking services, insurance services and medical services.

VAT returns are generally made on a bi-monthly basis. However, a company which is constantly in a repayment position may obtain approval to make returns on a monthly basis. For smaller businesses, the frequency of filing VAT returns can also be reduced. VAT is not recoverable on non-business expenditure nor on certain other expenditure such as cars, petrol, hotel accommodation, meals. VAT on conference- related accommodation expenses are allowed if certain conditions are satisfied. In addition, a business is required to repay any VAT previously reclaimed in relation to supplier invoices which have not been paid within 6 months.

Following the withdrawal of the UK from the EU, a procedure allowing for the postponement of paying Import VAT at the point of entry to the EU has become available for VAT registered businesses in Ireland. Businesses already VAT registered in Ireland will automatically be granted this procedure otherwise known as Postponed Accounting. This scheme provides for postponed accounting for VAT on imports from non-EU countries. It enables businesses to account for import VAT on their VAT returns and it allows them to reclaim VAT at the same time as it is declared in a return.

## PAYROLL TAX

All employers are obliged under the Pay As You Earn (PAYE) system to deduct income tax, USC and Pay Related Social Insurance (PRSI) contributions from employees. From 1 January 2022, the weekly income threshold for the higher rate of employer's PRSI will increase from EUR 398 to EUR 410 . This means that the higher rate of employer's PRSI (11.05%) will only apply where the weekly pay of the employee is EUR 410 or more.

## RELEVANT CONTRACTS TAX (RCT)

RCT is a tax regime that applies to payments made by a principal contractor to a subcontractor under a relevant contract (this is a contract to carry out work in the construction, forestry or meat processing industry). RCT applies to both resident and non-resident contractors carrying out such operations in Ireland. RCT does not apply to professionals such as architects, surveyors etc.

RCT is a tax deduction system whereby a principal contractor deducts tax from payments to a subcontractor. The new system will have three RCT rates 0%, 20% and 35% depending on the subcontractor's compliance record. The rate of tax to be deducted will be confirmed by the Revenue Commissioners. There are severe penalties for not operating RCT correctly.

## STAMP DUTY

Stamp duty is a duty levied on documents or instruments, executed in Ireland, relating to conveyances and certain transactions. The following are the main stamp duty rates applicable in respect of different types of property:

**Residential Property**

The following stamp duty rates apply to residential property:

| Aggregate consideration | Duty rate |
|---|---|
| First EUR 1,000,000 | 1% |
| Excess over EUR 1,000,000 | 2% |

**Non-Residential Property**

Non-Residential Property is any property other than residential property, stocks or marketable securities or policies of insurance. The rate of stamp duty applicable to non-residential property was previously 2%. As per the Finance Act 2019, this has been increased to 7.5% for instruments executed on or after 9 October 2019, subject to certain transitional provisions. In addition, there is also anti-avoidance legislation providing that stamp duty up to 7.5% can also apply to transfers of company shares where the shares derive their value from Irish property.

In recognition of current housing supply challenges in Ireland, there is also a stamp duty refund scheme for land purchased for the development of housing, which, in certain circumstances, can lead to a refund of eleven fifteenths of the stamp duty paid, thereby ensuring the rate of stamp duty rate remains at 2%. The stamp duty refund scheme on land which is used for residential property development was extended to include developments commencing before 31 December 2022.

### Stocks and Marketable Securities

A transfer of stock or marketable securities of any company incorporated in the State is liable to stamp duty at 1% of the consideration paid. Where the transfer takes place electronically through the CREST system a 1% charge also arises. Stock or marketable securities where the amount or value of the consideration is EUR 1,000 or less are exempt from stamp duty. There is no stamp duty where property is transferred between associated companies, subject to certain conditions.

## OTHER TAXES

These include Customs and Excise Duties and local taxes such as rates (i.e. Property Tax).

### Local Property Tax (LPT)

Local Property Tax is chargeable on all residential properties in the State effective from 1 July 2013. The 2021 LPT liability will be calculated by reference to the market value of the property on 1 May 2013 and the 2021 LPT rate. The value at 1 May 2013 is valid until 1 November 2021

### Real Estate Investment Trusts (REITs)

REITs are listed companies which allow for individuals to invest in a diversified property portfolio. A REIT is an established internationally recognised model for property investment which is to be introduced in order to allow investors to access property investment in a risk diversified manner. Qualifying income and gains in a REIT will be exempt from corporation tax at the level of the REIT company. The REIT is required to distribute profits annually for taxation at investor level.

### Section 110 Companies

There is a special regime in Ireland for companies set up to securitise certain assets. Provided certain conditions are met, such companies may conduct their activities on a tax neutral basis.

## B. DETERMINATION OF TAXABLE INCOME

Taxable income is determined by ascertaining assessable income and then subtracting all allowable deductions. As a general rule, expenses incurred wholly and exclusively for the purpose of the business are deductible. However, specific rules apply in respect of certain categories.

## DEPRECIATION

Book depreciation is disallowed. However, companies can claim capital allowances (i.e. tax depreciation) on expenditure relating to certain types of assets including plant and machinery, motor vehicles and qualifying industrial buildings.

### Plant and Machinery

An allowance of 12.5% per annum can be claimed on a straight-line basis. The plant and machinery must be purchased, leased plant and machinery will be allowable in certain circumstances, and any grants receivable are deducted from the expenditure before arriving at the amount eligible for the capital allowance.

### Industrial Buildings Allowance

An annual allowance of 4% can be claimed on a straight-line basis. Industrial buildings generally refer to manufacturing facilities but also include hotels and certain other structures. The allowance is available in respect of the qualifying cost less any grants received.

### Motor Vehicles

There is an allowance of 12.5% per annum on a straight-line basis in respect of motor vehicles. The maximum amount of qualifying expenditure in relation to a new motor car is EUR 24,000. There is no restriction for vans, trucks and other non-passenger vehicles. The capital allowances available on expenditure incurred on or after 1 July 2008 on private cars used for business purposes are based on the carbon emission level of the car.

| Category | Car | Allowance granted on |
|---|---|---|
| A, B & C | Carbon dioxide emissions up to 155g/km | The specified amount that is EUR 24,000 no matter what the car cost. |
| D & E | Carbon dioxide emissions between 156g/km and 190g/km | Where the car cost is less than or equal to the specified amount that is EUR 24,000, 50% of that amount.<br>Where the cost is more than the specified amount that is EUR 24,000, 50% of the specified amount. |
| F & G | Carbon dioxide emissions 191g/km or more | Nil, that is, no capital allowances are available. |

## STOCK / INVENTORY

Stock and work in progress are valued at the lower of cost or market value on a FIFO basis. LIFO is not available.

## DIVIDENDS

Dividends between Irish resident companies are exempt from corporation tax. Dividends paid by a company located in the EU or in a country with which Ireland has a double tax treaty to an Irish company will be chargeable to corporation tax at 12.5% to the extent that the dividend is paid out of "trading profits". Withholding tax at the standard rate of income tax (25%) applies to dividends paid to individuals resident in Ireland and certain non-residents.

## INTEREST DEDUCTIONS

Interest paid on borrowings for the purposes of a trade is deductible for tax purposes if certain conditions are met. Interest payments to certain foreign parent and associated companies may be treated as distributions and consequently not allowed as a deduction against Irish profits under particular circumstances.

A trading deduction for interest may also be disallowed on funds borrowed from a connected company where those funds are used to acquire assets from another connected company. Similar anti-avoidance measures exist for rental companies funding the acquisition of an asset from a group company by means of a connected party loan.

As part of the EU Anti-Tax-Avoidance Directive Ireland has introduced interest limitation rules and rules relating to reverse anti-hybrid rules. These rules come into force for accounting periods commencing on or after 1 January 2022.

The interest limitation rules provide for a maximum net interest deduction to 30% of tax-adjusted EBITDA.

The reverse anti-hybrid rules will target reverse hybrid mismatches and will likely impact Irish transparent entities.

## LOSSES

Trading losses can be carried forward indefinitely, even on a change of ownership of a company, provided no major change takes place in the nature or conduct of the trade. Losses incurred in a trade can be offset against other trading income in the same accounting period or the preceding accounting period. Trading losses can be offset against non-trading income on a' value basis' (i.e. taking account of the applicable corporation tax rate so that, for example, only half the amount of the losses subject to the 12.5% rate may be set off against income subject to the non-trading rate of 25%).

I

## FOREIGN SOURCE INCOME

Foreign sourced income is normally liable to Irish corporation tax.

## CFC REGIME

Finance Act 2018 introduced Controlled Foreign Company ("CFC") legislation in accordance with the EU Anti-Tax Avoidance Directive ("ATAD"). CFC rules are an anti-abuse measure deigned to prevent the diversion of profits to offshore entities in low/no tax jurisdictions. The rules operate by attributing certain undistributed income of a CFC to the controlling parent company for immediate taxation.

CFC charge is computed by reference to the undistributed income where there are non-genuine arrangement in Ireland and the essential purpose is the avoidance of tax. The objective behind the legislation is to align where tax is being paid with where significant people functions are located. This only applies to the extent of the proportionate shareholding held by the company in the CFC.

## TAX INCENTIVES

The following are some of the tax incentives available to companies:

### Knowledge Development Box

Finance Act 2015 introduced the Knowledge Development Box, a tax relief that will result in an effective corporation tax rate of 6.25% on certain profits arising from qualifying assets for accounting periods commencing on or after 1 January 2016. A qualifying asset means an asset that is a computer program, an invention protected by a qualifying patent or IP for small companies and which is the result of research and development activities. Qualifying profits on which relief can be claimed are calculated using a formula included in the legislation in order to determine the income and expenditure attributable to the qualifying asset.

### Research and Development Tax Credit

Where qualifying expenditure is incurred, an R&D credit of up to 30% of expenditure is incurred may be available. R&D for the purposes of the credit includes basic research, applied research or experimental development. These activities must seek to achieve scientific or technological advancement and involve the resolution of scientific or technological uncertainty.

A company which carries on a trade in Ireland, undertakes R&D activities in Ireland or within the EEA and incurs the expenditure shall be entitled to the credit. The credit can be used when the company commences to trade and has a corporation tax liability.

If the company does not have a corporation tax liability then it is possible to receive a refund of the Research & Development tax credit, up to certain limits, over a 33-month timeframe.

Companies in receipt of the R&D credit will have the option to use a portion of the credit to reward key employees who have been involved in the development of R&D, subject to a number of conditions. The credit will be a tax-free payment in the hands of the employee (although they will be taxed as normal on their other income). In the event of an incorrect claim the tax foregone will be recovered from the company and not the employee.

### Employment and Investment Incentive Scheme (EIIS)

The EIIS is available to a substantial number of SMEs across different industry sectors. It should be noted, however, that companies engaged in a number of specific activities continue to be excluded. These include land dealing companies, those engaged in financial services, film production and the operation or management of hotels, and nursing homes, to name a few. Closely held professional services companies are also excluded from the EIIS.

The quantum of tax relief afforded will remain at the marginal income tax rate but only where certain employment targets (linked to increases in both employee numbers and emolument levels) or research and development targets have been achieved. The relief is therefore phased as an initial income tax relief at a rate of 30% with an additional 10% available only at the end of the 4-year holding period if the above-mentioned targets are met. The relief is available up to 2020.

The maximum level of funding that a company can raise through the EIIS will be EUR 15 million and this is a lifetime limit. Similarly, the maximum amount which can be raised by a company in any one year has been increased to EUR 5 million. The maximum annual income tax relief for an individual remains at EUR 150,000. Changes have been introduced to ensure that the scheme is fully compliant with EU State Aid rules on risk capital.

**Start-up Exemption**

New companies incorporated after 14 October 2008 and commencing a new trade on 1 January 2009 and before 31 December 2021 will be exempt from corporation tax on income and chargeable gains for the first three years of trading. The relief applies for three years where the total amount of corporation tax payable does not exceed EUR 40,000 in each year. Marginal relief is available where the corporation tax payable exceeds EUR 40,000 but is less than EUR 60,000.

The relief is limited to the amount of employer's PRSI paid by a company in an accounting period subject to a maximum of EUR 5,000 per employee and an overall limit of EUR 40,000. This relief will not apply where an existing trade is acquired. It will also cease to apply where part of a newly established trade is passed to a connected party. Companies carrying on excepted trades and close service companies will not qualify for this exemption.

## C. FOREIGN TAX RELIEF

Irish resident companies can obtain a credit for foreign tax suffered in territories with which Ireland has a double tax treaty. There are currently treaties in place with 74 countries, of which 73 are in effect. The treaties cover direct taxes, which in the case of Ireland are income tax, corporation tax and capital gains tax.

Unilateral relief is also available in respect of overseas tax suffered under certain circumstances. This provides for relief against double tax on certain types of income and gains received from a country that we do not have a double taxation agreement with.

## D. CORPORATE GROUPS

Provided certain conditions are satisfied the transfer of assets between a company and its effective 75% subsidiaries will not be chargeable to capital gains tax. Companies resident in any jurisdiction with which Ireland has a DTA may form part of the capital gains tax group.

Transfers of assets between a company and its 90% subsidiaries or between companies owned by a third company may qualify for stamp duty relief (associated companies' relief). In order to satisfy the 90% shareholding test, one company must have in relation to the other 90% of the beneficial ownership of the shares, 90% beneficial entitlement to the profits and beneficial entitlement to 90% of the assets on wind up.

Where the conditions for corporate tax groups are satisfied, group members can transfer losses and also certain payments which would normally attract withholding tax.

## E. RELATED PARTY TRANSACTIONS

Transfer Pricing regulations were introduced in Ireland and have effect from 2011. The transfer pricing legislation endorses the OECD Transfer Pricing Guidelines and the arm's length principle has been released which brings the Irish tax regime into line with OECD guidelines. Transfer pricing regulations were extended in Finance Act 2019 to apply to certain non-trading transactions, certain larger capital transactions along with trading transactions from 1 January 2020.

Further amendments were made to the transfer pricing rules in the Finance Act 2021 which apply from 1 January 2022. These amendments included a technical amendment to the Ireland-to-Ireland exemption and the attribution of income to a branch of a non-resident company operating in Ireland.

## F. WITHHOLDING TAX

Payments of certain types of royalties and rents to non-residents are subject to withholding tax at 20%. Dividends, interest and royalties paid by Irish companies to residents of EU countries or countries with which Ireland has a double tax treaty are, subject to meeting certain conditions, exempted from withholding tax or liable at a reduced rate. Tax at 20% is deducted from payments made by Government and State Bodies in respect of most professional services.

## G. EXCHANGE CONTROL

There are no exchange controls.

## H. PERSONAL TAX

### INCOME TAX

An individual is Irish tax resident for a year if either of the following two tests is satisfied:

- Present for more than 183 days in Ireland; or,
- Present for more than 280 days in total in that year and the preceding year. Presence in either year for fewer than 30 days is disregarded.

In the year of arrival, an election for residence can be made where there is an intention of continuing to reside in Ireland. At birth, a person acquires a domicile of origin and, subsequently, having acquired the age of majority, a person can acquire a domicile of choice if he/she settles in another country and makes it his/her permanent home. All individuals, resident and domiciled in Ireland must pay income tax on worldwide income and capital gains tax on worldwide gains, regardless of whether or not the income is remitted into the State. An individual loses ordinary residence status after having been non-resident for three consecutive tax years and regains it after being resident for three consecutive tax years.

The following is a summary of the basis of taxation for individuals in Ireland:

| Resident | Ordinarily resident | Domiciled | Liable to Irish income tax on |
|---|---|---|---|
| Yes | Yes/No | Yes | Worldwide income |
| Yes | Yes/No | No | • Irish source income,<br>• Foreign employment income to the extent duties of the employment as performed in Ireland, and<br>• Other foreign income (including UK investment income) to the extent that it is remitted into Ireland |
| No | Yes | Yes | • Worldwide income with the exception of:<br>• income from a trade, profession, employment all the duties of which are exercised outside Ireland, and other foreign income, provided that it does not exceed EUR 3,810 |
| No | Yes | No | • Irish source income and foreign income to the extent it is remitted to Ireland. Income from the following sources is not liable to Irish income tax, even if remitted to Ireland:<br>• income from a trade, profession, employment all the duties of which are exercised outside Ireland, and other foreign income, provided that it does not exceed EUR 3,810 |
| No | No | Yes/No | • Irish source income only |

I

**Income Tax Rates and Bands**

The following is a summary of the Income Tax Rates and Bands in the 2019 and 2020 tax years:

| Personal Circumstances | Tax Year 2021 | Tax Year 2022 |
|---|---|---|
| Single / Widowed without dependent children | EUR 35,300 @ 20%<br>Balance @ 40% | EUR 36,800 @ 20%<br>Balance @ 40% |
| Single / Widowed qualifying for One Parent Family Tax Credit | EUR 39,300 @ 20%<br>Balance @ 40% | EUR 40,800 @ 20%<br>Balance @ 40% |
| Married Couple - one spouse with income | EUR 44,300 @ 20%<br>Balance @ 40% | EUR 45,800 @ 20%<br>Balance @ 40% |
| Married Couple - both spouses with income | EUR 70,600 @ 20%<br>Balance @ 40% | EUR 73,600 @ 20%<br>Balance @ 40% |

**Single Person Child Carer Credit**

This tax credit allows one individual, who is the child's principal carer to claim the new single person child carer credit.

**Earned Income Tax Credit**

The Earned Income Tax Credit of EUR 1,500 is available to individuals earning self-employed, trading or professional income. For company directors, the credit will apply to proprietary directors as their earnings are not taken into account for the purposes of the Employee PAYE Tax Credit. Where an individual has earned income, which qualifies for Employee PAYE Tax Credit and Earned Income Tax Credit, the combined value of both tax credits cannot exceed EUR 1,650.

**Foreign Earnings Deduction**

The Foreign Earnings Deduction was introduced to aid companies seeking to expand into emerging markets. The deduction will apply for individuals who spend 30 days a year or more carrying out their duties of their office or employment in developing markets for Ireland. The relief is available until 2022.

The relief applies by reducing the individual's employment income which is based on the number of qualifying days spent in the qualifying countries. The maximum deduction is EUR 35,000 i.e. the maximum income tax relief is EUR 35,000 x 40% = EUR 14,000.

The following countries qualify for the relief:

| | |
|---|---|
| • Algeria | • Mexico |
| • Bahrain | • Nigeria |
| • Brazil | • Oman |
| • Chile | • Pakistan |
| • China | • Qatar |
| • Columbia | • Russia |
| • Democratic Republic of Congo | • Saudi Arabia |
| • Egypt | • Senegal |
| • Ghana | • Singapore |
| • India | • South Africa |
| • Indonesia | • South Korea |
| • Japan | • Tanzania |

| | |
|---|---|
| • Kenya | • Thailand |
| • Kuwait | • UAE |
| • Malaysia | • Vietnam |

**Special Assignment Relief Programme (SARP)**

The SARP programme was introduced with the aim of attracting key talent to Ireland to create more jobs and facilitate the development and expansion of business in Ireland. The relief is available to employees coming to work in Ireland from abroad on the instruction of their employer. The employee must be Irish tax resident in the year of assessment and not resident elsewhere in order to claim the relief.

The employee must perform all of their duties of employment in Ireland with a relevant employer and must also have relevant employment income of greater than EUR 75,000 per year. The relief is available until 2022. The following conditions must be met for relief to apply:

- Have worked with the employer for a minimum period of 6 months before being assigned;
- Not have been tax resident in Ireland for the 5 tax years immediately preceding the tax year in which he or she first arrives in Ireland for the purpose of performing those duties

A relevant employer means a company that is incorporated and tax resident in a country or jurisdiction with which Ireland has a double taxation treaty or a tax information exchange agreement. The relief works by reducing the employee's taxable income for the year of assessment by the specified amount.

The specified amount is calculated using the formula: (A – B) x 30%

A = is the amount of the relevant employee's income, profits or gains from his or her relevant employment in Ireland excluding any amount that is not assessed to tax in Ireland and after deducting any contribution or qualifying pension premium. Also excluded are expenses incurred in relation to the employment and amounts on which the employee is entitled to double tax relief for foreign tax.

B = Lower threshold - EUR 75,000

## UNIVERSAL SOCIAL CHARGE (USC)

The USC is a tax payable on gross income, including notional pay, after any relief for certain capital allowances, but before pension contributions. The following payments are generally exempt from USC:

- Individuals with income of less than EUR 13,000;
- Tax free element of a termination payment;
- Statutory redundancy;
- Social welfare payments;
- Deposit Interest already subject to DIRT.

The USC rates for 2021 and 2022 are as follows:

| 2021 | | 2022 | |
|---|---|---|---|
| **Income Ranges** | **Rate** | **Income Ranges** | **Rate** |
| First EUR 12,012 | 0.5% | First EUR 12,012 | 0.5% |
| EUR 12,013 to EUR 20,484 | 2% | EUR 12,013 to EUR 21,295 | 2% |
| EUR 20,485 to EUR 70,044 | 4.5% | EUR 21,296 to EUR 70,044 | 4.5% |
| EUR 70,045 to EUR 100,000 | 8% | EUR 70,045 to EUR 100,000 | 8% |
| Any PAYE income over EUR 100,000 | 8% | Any PAYE income over EUR 100,000 | 8% |
| Over EUR 100,000 (self- assessed income only) | 11% | Over EUR 100,000 (self- assessed income only) | 11% |

Reduced Rates of USC will apply to the following:

- Individuals over 70 with income less than EUR 60,000;
- Individuals under 70 holding a full medical card, with income less than EUR 60,000.

| 2022 | |
|---|---|
| **Income ranges** | **Rate** |
| First EUR 12,012 | 0.5% |
| Income above EUR 12,012 | 2% |

## PROPERTY SURCHARGE

A property surcharge of 5% is imposed on investors with annual gross income over EUR 100,000. This will apply on the amount of income sheltered by property relief and area-based capital allowances in a given year. If the gross income figure exceeds EUR 100,000, the person is liable to the surcharge. If not, then the surcharge does not apply. Where the gross income exceeds EUR 100,000, the surcharge applies at the rate of 5%. The surcharge will not apply to income sheltered by tax reliefs that are not property reliefs such as film relief or the Employment and Investment Incentive. The various donations reliefs will not be subject to the surcharge.

## CAPITAL GAINS TAX

**Retirement Relief**

A relief known as retirement relief, provides relief from capital gains tax on the gift/sale of chargeable business assets (including leased farmland) subject to certain conditions. The current Retirement Relief provisions are that an individual aged between 55 and 66 years can gift/sell unlimited business assets to a child or to any other person subject to a limit of EUR 750,000. An individual aged 66 years and over can gift/sell business assets to a child subject to a limit of EUR 3,000,000 or to any other person subject to a limit of EUR 500,000.

### Entrepreneur Relief

Entrepreneur relief provides for a reduced rate of capital gains tax on the disposal of chargeable business assets. Where the conditions of the relief are satisfied a reduced capital gains tax rate of 10% from 1 January 2017 will apply to a lifetime limit of EUR 1,000,000 of gains.

## DOMICILE LEVY

The purpose of this levy is to ensure that individuals with substantial ties to Ireland would make a contribution to the Exchequer, irrespective of their residence status. The levy is EUR 200,000 and applies from the tax year 2010 to every 'relevant individual'. In order to be a 'relevant individual' for a tax year the following conditions must be met:

1. The worldwide income of the individual for the tax year is greater than EUR 1 million;
2. The individual is domiciled in Ireland in that tax year;
3. The individual's final Irish income tax liability is less than EUR 200,000; and,
4. The market value of the Irish property owned by the individual on 31 December in the tax year exceeds EUR 5 million.

Irish income tax paid by an individual will be allowed as a credit against the levy. The levy is payable on a self-assessment basis on or before 31 October in the year following the valuation date, i.e. 31 December each year. Anti-avoidance provisions are included in the legislation to prevent transfers of Irish situate property for less than market value to spouses, minor children, discretionary trusts and other entities.

## PENSIONS

### Pension Contributions

There is tax relief available on contributions made by individuals to pensions. This is limited annually to a percentage of an individual's salary depending on age and is also restricted by an overall salary cap. This salary cap currently stands at EUR 115,000. Employers' contributions to employees' PRSAs are treated as a benefit-in-kind for USC purposes.

There is no liability to PRSI on employer contributions into occupational schemes. Tax free pension lump sums are capped at EUR 200,000.

### Maximum Allowable Pension Fund at Retirement

The Standard Fund Threshold in relation to an individual's pensions is EUR 2,000,000. Individuals who have pensions in excess of this can claim a Personal Fund Threshold up to a maximum of EUR 2,300,000.

### Retirement Lump Sums

Tax free ex-gratia termination payments are available to individuals up to an amount calculated with reference to length of service and salary levels. The tax-free amount of these payments is capped at EUR 200,000.

### Approved Retirement Funds

An annual imputed distribution applies to the value of assets in an Approved Retirement Fund (ARF) at 30 November each year. Where the assets of the fund are valued at EUR 2 million or less, the annual imputed distribution is 5% of the value of the assets in the fund at 30 November. ARFs with asset values in excess of EUR 2 million (or, where an individual owns more than one ARF, where the aggregate value of the assets in those ARFs exceeds EUR 2 million) the annual imputed distribution is 6% on the entire fund.

### Personal Retirement Savings Accounts

"Vested" Personal Retirement Savings Accounts are Personal Retirement Savings Accounts (PRSAs) from which retirement benefits have commenced to be taken, usually in the form of the "tax-free" retirement lump sum. The annual imputed distribution provisions also apply to "vested" PRSAs, where the assets are retained in the PRSA rather than being transferred to an ARF.

## CAPITAL ACQUISITIONS TAX

Where a person receives a gift/inheritance and the person making the gift/inheritance is Irish tax resident (or ordinarily resident), the person receiving the gift/inheritance is Irish tax resident or the property is situated in Ireland a charge to Irish CAT may arise. For Irish CAT purposes a non-domiciled individual is not treated as Irish tax resident unless he/she has been Irish tax resident for five consecutive years.

Depending on the relationship between the person making the gift/inheritance and the beneficiary, a certain level of benefits can pass to an individual before a charge to CAT will arise.

The level of benefits is known as a person's "Group Threshold" and is not specific to gifts made from person to person, rather it is utilised where a person receives gifts from a certain class of persons. All gifts or inheritances from each class since 5 December 1991 need to be included in the review.

The following are the Group Thresholds:

| Group | Relationship to disposer | Group threshold |
|---|---|---|
| A | Son/daughter | EUR 335,000 |
| B | Parent*/Brother/Sister/Niece/Nephew/Grandchild | EUR 32,500 |
| C | Relationship other than Group A or B | EUR 16,250 |

*In certain circumstances a parent taking an inheritance from a child can qualify for Group A threshold.

An individual is obliged to submit an Irish CAT return where they have utilised 80% of the threshold. Where a person receives a gift/inheritance in the period from 1 January to 31 August, any capital acquisitions tax payment and return due must be paid on or before 31 October of the same year. Where a person receives a gift/inheritance in the period from 1 September to 31 December, any capital acquisitions tax payment and return must be made to Revenue on or before 31 October of the following year.

## I. TREATY AND NON-TREATY WITHHOLDING TAX RATES

Provided that all conditions are met, domestic tax legislation is applicable if more favourable for the taxpayer. In a number of circumstances, tax treaties may provide for particular tax rates mainly dependent on the nature of the instruments and on the profile of the recipients/payers. In such cases, the applicable WHT rate must be verified from an analysis of the relevant tax treaty.

Notes:

1. The 5% rate applies if the beneficial owner is a company (other than a partnership) which holds directly or indirectly at least 25% of the capital of the dividend-paying company. The 0% rate applies to dividends paid to the Albanian Government (Central Bank and statutory bodies).
2. The 5% rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the dividend-paying company. The 0% rate applies if the beneficial owner is a company (other than a partnership) which has held directly at least 25% of the capital of the dividend-paying company for at least 2 years, subject to certain conditions.
3. The 5% rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the capital of the dividend-paying company. The 0% rate applies to dividends paid to any organisation, agency or institution wholly or mainly owned by the Belarus Government.
4. No reduction under the treaty, the 20% domestic rate applies, subject however to e.g. the application of the Parent-Subsidiary Directive in the case of Belgium, France and Luxembourg.
5. The 0% rate applies to dividends paid to the Botswana Government.
6. The 5% rate applies if the beneficial owner is a company which controls directly or indirectly 10% or more of the voting power in the dividend-paying company.
7. The 5% rate applies if the beneficial owner is a company that controls directly at least 20% of the voting power in the dividend-paying company.
8. The 5% rate applies if the beneficial owner is a company which holds directly at least 25% of the voting power in the dividend-paying company.
9. The 5% rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the voting power in the dividend-paying company.
10. The 5% rate applies if the beneficial owner is a company which controls directly or indirectly at least 10% of the voting power in the dividend-paying company and has invested more than 100,000 EUR in the capital of the dividend-paying company. The 0% rate applies if the beneficial owner is a company which controls directly or indirectly at least 50% of the voting power in the dividend-paying company and has invested at least 2 million EUR in the capital of the dividend-paying company.
11. The 5% rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the capital of the dividend-paying company. The 0% rate applies to dividends paid to the Kazakh Government (National Bank, Government or a central or local authority thereof, institution wholly owned by the Kazakh government).
12. The 5% rate applies if the beneficial owner is a company which owns at least 10% of the voting stock of the dividend-paying company.

13. The 5% rate applies if the beneficial owner is a company (other than a partnership) which controls directly or indirectly at least 25% of the voting power in the dividend-paying company.
14. The 5% rate applies if the beneficial owner is a company which holds directly or indirectly at least 10% of the capital of the dividend-paying company.
15. The 6% rate applies if the beneficial owner is a company which owns directly at least 25% of the capital of the dividend-paying company.
16. The 0% rate applies if the recipient holds directly at least 25% of the voting power in the dividend-paying company.
17. The 0% rate applies if the recipient is (i) a company that holds directly at least 25% of the capital of the dividend-paying company (ii) the government of Saudi Arabia, the Saudi Arabia Monetary Agency or any institution, agency or fund wholly owned by the Saudi government.
18. The 0% rate applies if the beneficial owner is (i) a company (other than a partnership) which holds directly at least 10% of the capital in the dividend-paying company (ii) a pension scheme or (iii) the Central Bank.
19. The 5% rate applies if the beneficial owner is a company which holds directly at least 70% of the voting power in the dividend-paying company.
20. The EU Interest and Royalties Directive may provide an exemption from WHT for payments between associated companies.
21. In general, royalties WHT applies only in the case of patent royalties.
22. Under domestic legislation, WHT will not apply if the loans or advances are for a period of less than one year or if the interest is paid in the course of a trade or business to a company resident in an EU or treaty country and that country imposes a tax that generally applies to foreign interest receivable.

# ISLE OF MAN

## MEMBER FIRMS

| City | Name | Contact Information |
|---|---|---|
| Douglas | Shilpa Chheda | +44 203 691 2511<br>schheda@klsa.net |

## BASIC FACTS

| | |
|---|---|
| Full name: | Isle of Man |
| Capital: | Douglas |
| Main languages: | English |
| Population: | 85,867 (2022 estimate) |
| Monetary unit: | British Pound (GBP) |
| Internet domain: | .im |
| Int. dialling code: | +44 |

## KEY TAX POINTS

- Companies resident in the Isle of Man (IoM) are subject to corporate income tax (CIT) on their worldwide income.
- There is no capital gains tax in the IoM and furthermore, gains are not included in ordinary taxable income.
- The VAT rules in the IoM are nearly identical to those applying in the UK. The standard VAT rate is 20% (with the exception of hotel accommodation and certain building works which are taxed at 5%).
- Double tax relief is available for foreign tax paid.
- There are no specific transfer pricing rules.
- There are no specific thin capitalisation or CFC rules.
- Income tax is payable by IoM resident individuals on their worldwide income. A non-resident is generally taxed on their IoM sourced income.
- There are no death duties, estate duties or taxes on gifts although there are potentially significant probate charges.

## A. TAXES PAYABLE

### COMPANY TAX

IoM resident companies are taxed in the Isle of Man on worldwide income. Non-resident companies are required to pay tax on IoM-sourced income only. A company incorporated in the IoM is automatically resident in the IoM. A company that is incorporated outside of the IoM but that is 'managed and controlled' in the IoM will also be considered IoM resident but may need to be 'Foreign Registered'.

There are three CIT rates in the IoM. A 10% rate applies to banking businesses and companies that derive in excess of GBP 500,000 income from retail activities. A 20% rate applies to companies which derive income from IoM situs land and property. A 0% corporate income tax rate applies to most other income. Company tax returns are due one year and one day after the end of the accounting period and any tax liability is due by the same date.

### CAPITAL GAINS TAX

There is no tax on capital gains in the IoM and gains are not included in ordinary taxable income.

### BRANCH PROFITS TAX

IoM companies with foreign branches remain taxable on their worldwide income although relief for foreign tax paid may be available. IoM branches of foreign companies will be subject to IoM income tax on profits attributable to the branch. The rates of tax above apply to all companies, including branches of foreign companies.

## VALUE ADDED TAX (VAT)

Value Added Tax is imposed at a standard rate of 20% (with the exception of hotel accommodation and certain building works which are taxed at 5%). The VAT rules are nearly identical to those applying in the UK. Both the UK and IoM form a common area for the purposes of VAT and Customs Duties and the Isle of Man is in the UK for VAT purposes.

Registration threshold turnover of GBP 85,000 in an accounting year.

## FRINGE BENEFITS TAX

Fringe benefits tax may be payable in certain circumstances.

## FATCA

The IoM signed an agreement with the United States in December 2013 to implement the Foreign Account Tax Compliance Act (FATCA). Information started to be exchanged in 2015. The IoM signed an agreement with the United Kingdom in October 2013 which implements similar reporting requirements as required by the FATCA regulations. Information under this agreement will begin to be exchanged later in 2016. The IoM signed an agreement in October 2014 in Berlin committing to implementing the Common Reporting Standard ("CRS").

## LOCAL TAXES

Local rates are imposed on properties. Local authorities determine the rate.

## OTHER TAXES

The IoM government also imposes customs and excise duties. For these purposes, the IoM is regarded as being part of the Customs Union. The UK and the IoM form a common area for customs duties purposes.

National Insurance contributions ("NIC") are payable by employers in the IoM. NIC rates are similar to those that apply in the UK.

## FOUNDATIONS

Foundation legislation has been introduced to create a new separate legal entity which has the power to manage its own assets, arrange its own funding and can operate and be taxed in a fashion similar to a local company, incurring 0% IoM tax on all sources other than profits derived from IoM situs real estate.

## B. DETERMINATION OF TAXABLE INCOME

The taxable income of a company is calculated by aggregating its taxable income and subtracting allowable expenses. Generally, to be deductible for tax purposes, expenses must be wholly and exclusively incurred for the purpose of a company's trade. Some expenses are specifically not deductible for tax purposes, e.g. depreciation.

## CAPITAL ALLOWANCES

Tax relief is given for the cost of plant and machinery acquired for the purposes of a business in the form of capital allowances. Capital allowances are also available for certain industrial and agricultural buildings and tourist premises. A 100% allowance is available in the first year in which the expenditure is incurred (restricted for some motor vehicles).

## CAPITAL GAINS AND LOSSES

There is no capital gains tax in the IoM.

## DIVIDENDS

Dividends received by IoM resident companies are generally taxable at the 0% rate. Dividends received by IoM resident individuals are generally taxable as part of normal income.

## INTEREST DEDUCTIONS

Interest paid by IoM resident companies to IoM lenders is tax deductible. Interest paid to non-IoM lenders is tax deductible if incurred wholly and exclusively for the purposes of the company's trade. There are no thin capitalisation rules in the IoM. The IoM has anti-avoidance provisions which may be in point where interest is incurred purely to mitigate IoM tax.

## LOSSES

Trading losses can be carried forward indefinitely provided a continuity of business test is satisfied. There are also provisions for loss relief within groups of companies (see below). Losses can be set off against total income in the year of loss or in the previous year.

## FOREIGN SOURCE INCOME

The IoM does not have CFC legislation. The IoM does however have general anti-avoidance legislation which may be enacted, generally, if it is deemed that the main purpose of contrived arrangements is to avoid IoM taxation.

## C. FOREIGN TAX RELIEF

Double tax relief is available for foreign tax paid. A company may offset any foreign tax paid against IoM tax payable to avoid double taxation. Where the income is received from the UK, relief may be available under the UK-IoM Double Tax agreement. There are double taxation agreements, of varying complexity and scope, with the following countries:

| | | |
|---|---|---|
| Australia | Bahrain | Belgium |
| Denmark | Estonia | Faroe Islands |
| Finland | Greenland | Guernsey |
| Iceland | Ireland | Jersey |

| | | |
|---|---|---|
| Luxembourg | Malta | New Zealand |
| Norway | Poland | Qatar |
| Seychelles | Singapore | Slovenia |
| Sweden | UK | |

The IoM also has Tax Information Exchange Agreements (TIEAs) currently in force with the following countries:

| | | |
|---|---|---|
| Argentina | Australia | Botswana |
| British Virgin Islands | Canada | Cayman Islands |
| China | Czech Republic | Denmark |
| Faroe Islands | Finland | France |
| Germany | Greenland | Iceland |
| India | Ireland | Italy |
| Japan | Lesotho | Mexico |
| Netherlands | New Zealand | Norway |
| Poland | Portugal | Romania |
| Slovenia | Sweden | Switzerland |
| Turkey | Turks and Caicos | United Kingdom |
| United States of America | | |

## D. CORPORATE GROUPS

Trading losses in one IoM resident company may be surrendered to another IoM company within the same group. Two companies are members of a group if one is at least a 75% subsidiary of the other or both are at least 75% subsidiaries of a third company. Consolidated tax returns cannot be submitted.

## E. RELATED PARTY TRANSACTIONS

The IoM does not have any specific transfer pricing rules. However, as noted above, where expenditure has not been incurred wholly and exclusively for the purposes of a company's trade, a tax deduction may not be available.

## F. WITHHOLDING TAX

A company may, in certain circumstances, be required to withhold tax from payments it makes to non-resident companies or individuals. An IoM company is generally not required to withhold tax on amounts paid to non-resident companies or individuals. The exceptions to this are where the income payable to a non-resident company or individual represents rent from IoM property, in which case 20% withholding tax is deducted, or if the income relates to certain types of IoM sourced income payable to a non-resident individual, in which case 20% withholding tax is deducted.

## G. EXCHANGE CONTROL

There are no exchange control rules in the IOM.

## H. PERSONAL TAX

IoM resident individuals are subject to income tax on their worldwide income. Non-resident individuals are taxed on their IoM-sourced income, excluding income from approved financial institutions and most sources of income from IoM companies. Generally speaking, an individual is regarded as a resident in the IoM if he spends an aggregate of six months in any tax year in the IoM. In addition, an individual who visits the IoM over four or more consecutive years for an average of three months in each year will also be considered an IoM resident.

Income tax is assessable on income less any allowable deductions. The rules for allowable deductions in respect to individuals engaged in a trade are similar to those for companies. An individual may claim tax deductions, at various tax rates depending on individual circumstances, for certain expenditure subject to relevant caps and tax rate restrictions. Examples include contributions to approved pension schemes, interest paid to an IoM lender, nursing expenses and private medical insurance payments (made by taxpayers aged over 60).

Income tax and NIC are normally deducted at source by an individual's employer under the Income Tax Instalment Payments (ITIP). All individuals are required to complete an income tax return. The tax year for income tax purposes runs from 6 April – 5 April. Any outstanding income tax liability must be settled by 6 January following the end of the tax year. A payment on account may also need to be settled on this date in respect to the following years anticipated tax liability. This might be the case if the majority of an individual's tax liability is not collected under the ITIP system for example if an individual was self-employed.

Spouses are taxed as separate individuals, unless the couple elect to be assessed jointly. If a joint assessment is made then a couple will be assessed on their combined taxable income. Where, immediately prior to 6 April 2006, a couple were jointly assessed, they will be deemed to have made the election to continue to be jointly assessed.

The tax rates are as follows:

| **Taxable income (GBP)** | **Rate (%)** |
|---|---|
| 0 – 6,500 of income over the personal allowance (GBP 13,000 for jointly assessed couples) | 10% (standard rate) |
| Above 6,500 of income over the personal allowance (GBP 13,000 for jointly assessed couples) | 20% (higher rate) |

IoM resident individuals are entitled to a tax free personal allowance. The current personal allowance amount is:

- Single person: GBP 14,250

- Married couple, jointly elected: GBP 28,500

An IoM resident individual is able to make a five year irrevocable election in order to take advantage of the IoM 'tax cap'. If an election is made then an individual's income tax liability will be capped at GBP 200,000 with effect from 5 April 2020. This cap is doubled if a couple is jointly assessed. There is no tax in the IoM on gifts and no inheritance tax liability for the estates of IoM resident individuals.

## BENEFITS

Exempt benefits include:

- General benefits which do not exceed GBP 600;
- Approved Profit Sharing or Savings Related Share Options Schemes;
- Car Parking space at or near place of work;
- Medical/dental insurance;
- Christmas party expenses up to GBP 100 per head;
- Provision of a personal computer for use at home up to benefit value of GBP 1,000;
- Nursery or crèche facility expenses necessary for employees to attend work.
- Bicycle and related safety equipment provided under a cycle to work scheme up to an annual maximum value of GBP 1,000;

## TAXATION OF NON-RESIDENT INDIVIDUALS

Non-residents are subject to IoM income tax on IoM sourced income. Non-residents are not entitled to a personal allowance.

## I. TREATY AND NON-TREATY WITHHOLDING TAX RATES

| | Dividends (%) | | Interest (%) | Royalties (%) |
|---|---|---|---|---|
| | Individuals, companies (%) | Qualifying companies (%) | | |
| **Domestic rates** | | | | |
| Companies | 0 | 0 | 0 | 0 |
| Individuals | 0 | -- | 0/20 | 20 |
| **Treaty countries:** | | | | |
| Bahrain | 0 | 0 | 0 | 0 |
| Estonia | 0 | 0 | 0 | 0 |
| Guernsey | 0 | 0 | 0 | 0 |
| Jersey | 0 | 0 | 0 | 0 |
| Luxembourg | 15 | 5[1] | 0 | 0 |
| Malta | 0 | 0 | 0 | 0 |
| Qatar | 0 | 0 | 0 | 5 |
| Seychelles | 0 | 0 | 0 | 5 |
| Singapore | 0 | 0 | 12 | 8 |

Notes:

1. The 5% rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the company paying the dividends.

### Isle of Man Substance Requirements

The Income Tax (Substance Requirements) Order 2018 have amended the Income Tax Act 1970 to impose requirements on Isle of Man companies receiving income from certain so called "geographically mobile business sectors" to demonstrate that they have 'substance' in the Isle of Man.

Three tests which all must be met trigger the substance requirements. These requirements are:

- Is the Company IOM Tax Resident?
- Does it receive income?
- Is it from a relevant sector such as the following?
  - i. Banking;
  - ii. Insurance;
  - iii. Fund management – not fund vehicles themselves – so this is also quite a narrow category;
  - iv. Shipping – This means commercial shipping business – and it excludes super yachts, fishing boats and anything smaller than 24m;
  - v. Headquarters – where strategy/coordination type services are provided to other group entities;
  - vi. Distribution and Services Centres – where goods are purchased from a group company and re-sold for a percentage of profit or where services are provided to group companies;
  - vii. Financing and leasing;
  - viii. Holding companies (not investment companies, i.e. must hold more than 50% interest);
  - ix. IP Companies.

If the substance requirements are met then the Company must:

a) be directed and managed in the Island;

b) have an adequate number of qualified employees in the Island (whether or not employed by it or another person and whether on temporary or long-term contracts);
c) have adequate expenditure proportionate to the level of activity carried on in the Island;
d) have an adequate physical presence in the Island; and
e) conduct core income-generating activity in the Island.

**Grant Schemes / Relocation**

The Island government is trying to actively attract new business to the Island and numerous grant schemes are available for setting up the business in the Island and relocating staff.

Work permit requirements are also relaxed for certain key staff members and workers from certain sectors when relocating a business to the Island.

**National Insurance Holiday Scheme:**

From 6 April 2019 certain new residents and returning students are able to apply for a refund of the Class 1 NIC's paid as employees during the first 12 months of their employment in the Island.

## BASIC FACTS

| | |
|---|---|
| Full name: | State of Israel |
| Capital: | Jerusalem |
| Main languages: | Hebrew, Arabic |
| Population: | 8.9 million (2022 estimate) |
| Monetary unit: | Israeli New Shekel (ILS) |
| Internet domain: | .il |
| Int. dialling code: | +972 |

## KEY TAX POINTS

- Israeli resident companies are liable to Israeli taxes on their worldwide income and capital gains. A non-resident company is only liable to Israeli tax on income sourced in Israel.
- VAT is charged at a rate of 17% on the supply of goods and services by Israeli business entities.
- Withholding taxes are deducted from payments of interest, dividends and royalties made to non-residents, subject to double tax treaty arrangements.
- Income tax is payable by Israeli-resident individuals on income derived from all sources, including passive income and all income derived or paid from overseas sources.

## A. TAXES PAYABLE

### COMPANY TAX - ORDINARY INCOME

Israeli resident companies are liable to Israeli taxes on their worldwide income and capital gains. A non-resident company is only liable to Israeli tax on income sourced in Israel. A company resident in Israel is one that is incorporated in Israel or managed and controlled in Israel. The corporate tax rate in Israel is 23%.

The financial year runs from 1 January to 31 December. A company must normally submit tax returns within six months of the end of its accounting period. This period may be extended for up to 14 months. Companies must make monthly advance tax payments of company tax, based on the previous year's tax liability. In addition, monthly payments must be made within 15 days of the month's end at the rate of 45% in respect of certain expenses, which are not allowable for tax purposes, such as excessive travel and entertaining costs. Where the company has taxable income, such payments are treated as advanced payments.

### CAPITAL GAINS TAX

Capital gains are divided into two elements. That part of the gain which is inflationary by nature is taxable at the rate of 10% in respect of the inflationary gain which was earned up to 31 December 1993 and at a 0% rate thereafter. The real gain is taxable at the corporate tax rate. Non-resident companies are liable to Israeli tax on capital gains derived in Israel. Foreign residents have the option of having the real gain calculated by reference to changes in the exchange rate of the foreign currency as related to the Israeli currency.

### BRANCH PROFIT TAX

There is no branch profit tax in Israel i.e. profits of an Israeli branch of a foreign company can be distributed to the foreign country (after paying Israeli tax on the profit itself) free of withholding tax on the distribution.

## VALUE ADDED TAX (VAT)

VAT is charged at a rate of 17% on the supply of goods and services by Israeli business entities. The export of goods and certain services from Israel is zero-rated.

## FRINGE BENEFITS TAX (FBT)

There is no separate fringe benefits tax in Israel. Fringe benefits are included in the employee's gross income and are taxed as salary.

## LOCAL AND OTHER TAXES:

## PURCHASE TAX

Purchase tax is payable on the purchase of real estate at 6%. A purchase tax ranging from 0% to 10% is payable if the building is a residential apartment.

## NATIONAL INSURANCE (SOCIAL SECURITY)

Employers are required to pay a National Insurance premium as well as payments in respect of health insurance. These payments amount to 19.60% of salaries. Of this amount, 12% is recoverable from employees. The monthly ceiling up to which salary payments are levied on is five times the average salary (ILS 45,075) effective from 1 January 2022 and relates to both employees and the self-employed. Dividend income is exempt from social security payments.

## MUNICIPAL RATES

Municipal rates are levied by local authorities. The government decides the maximum rate of increase. The local councils set their own rates accordingly based on square meters of occupied real estate.

## LAND BETTERMENT TAX

Tax on land betterment accrued until 7 November 2001 is set at the marginal rates of up to 46% for individuals and up to 25% for companies. Tax on land betterment accrued after 7 November 2001 till 31 December 2011 is set at the rates of 20% for individuals and 25% for companies.

Tax on land betterment accrued after 1 January 2012 till 31 December 2013 is set at the rates of 25% for individuals and 25% for companies. Tax on land betterment accrued after 1 January 2014 is set at the rates of 25% for individuals and 26.5% for companies. Tax on land betterment accrued after 1 January 2015 is set at the rates of 25% for individuals and 25% for companies. Tax on land betterment accrued after 1 January 2017 is set at the rates of 25% for individuals and 24% for companies. Tax on land betterment accrued after 1 January 2018 is set at the rates of 25% for individuals and 23% for companies. Those rates are calculated in proportion to the period from the date of acquisition of the asset to the date of disposal.

The sale of residential real estate by individuals is exempt from this tax if certain conditions are met.

## ESTATE TAX

At present there is no estate tax in Israel.

## B. DETERMINATION OF TAXABLE INCOME

Taxable income is generally based on income reported in the financial statements subject to adjustments as indicated in the tax law. Special regulations apply in respect of the matters referred to below.

## DEPRECIATION

Deduction for the depreciation of assets that are used by a company are inflation-adjusted and calculated normally on the straight-line basis at the following annual rates:

| Nature of Asset | Rate (%) |
|---|---|
| Plant and machinery of an industrial company | 20 – 40 |
| Other plant and machinery | 7 – 10 |
| Electronic equipment | 15 |
| Furniture and office equipment | 6 – 7 |
| Furniture and office equipment (restaurants and hotels) | 9 – 12 |
| Computers and software | 25 – 33 |
| Trucks and commercial vehicles | 20 |
| Cars | 15 |
| Patents and know how | 12.5 |
| Research and development expenditure | 33 – 100 |

Accelerated depreciation up to 200% can be claimed on equipment used in production activities, if certain conditions are met.

## INVENTORY

Inventory is valued using the FIFO or weighted average methods (LIFO is not a permissible alternative).

## DIVIDENDS

Dividends received by an Israeli company from another Israeli company are exempt from company tax, except where the income (out of which the dividend is paid) is from a foreign source. Dividends received from an approved enterprise (see 'Incentives' below) are subject to 15% company tax. Dividends received from non-resident companies are fully liable to company tax at the rate of 25%. Dividends paid to a non-resident shareholder are subject to withholding tax of 25% unless a lower rate is provided for within the framework of a double tax treaty.

Dividends paid after 1 January 2012 to Israeli or foreign individuals and foreign companies are subject to withholding tax at 25%. However, dividends paid after 1 January 2012 to major shareholders (holdings of 10% and above) are subject to withholding tax at 30%. These rates may be reduced subject to the application of a double tax treaty. With effect from 1 January 2003, taxes paid on foreign income, including both company tax and dividend withholding tax can be set off against taxes payable in Israel in specific cases.

## INTEREST DEDUCTIONS

Interest is normally deductible on an accrual basis. However, interest payable to a non-resident is effectively deductible only when payment is effected since a deduction may only be taken if tax has been withheld at source from the interest payment within three months of the end of the company's accounting period. There is no curtailment of deductible interest by reference to debt/equity ratios.

## LOSSES

Trading losses may be set off against all categories of income and capital gains in the same accounting period. Unutilised losses may be carried forward indefinitely against future income and capital gains which result from the business from any trade or business carried on by the company but not against income or gains from any other source. Generally, carry forward of losses may be denied where there has been a change in the control of the company and one of the purposes of the change is tax avoidance. Losses may not be carried back. Losses incurred abroad are allowed as a deduction from Israeli income (conditions apply).

## FOREIGN SOURCED INCOME – CFC TAX

For entities controlled by Israeli residents, CFC tax is payable in Israel at the rate of 23% subject to the following conditions:

1) The source of income of the foreign corporation is passive (interest, dividends, royalties, rentals, etc.);
2) The foreign corporation has paid tax in a 'low tax territory' (less than 15%);
3) Israeli residents control more than 50% (in certain circumstances more than 40%) of the shares in the foreign corporation or have the right to influence certain management decisions.

## PARTICIPATION EXEMPTION

In Israel, in most cases, there is no participation exemption. However, an Israeli holding company, subject to specific conditions, is exempt from tax on dividends received from foreign subsidiaries; from capital gains tax on the sale of such subsidiaries; and from interest on deposits made in Israel by the subsidiaries. Foreign shareholders benefit from a reduced withholding tax of 5% on dividends distributed by the holding company. An Israeli shareholder will pay between 25% to 30% withholding tax on dividends distributed.

## OTHER INCENTIVES

There are various other incentives available such as employment incentives; international trading company incentives; the construction of dwellings for rental; research and development (R&D) where bi-national funds have been established to promote joint ventures; tourism industry schemes; and incentive training programs with the granting of loans for the encouragement of small businesses.

The Law for the Encouragement of Capital Investment established a management body to grant benefits for tourist attractions and the creation of a tourist investment board. There are also benefits in the field of renewable energy. The Israeli government has signed research and development co-operation agreements with the United States, Canada, the European Union and some countries in Asia. A government Seed Fund has been established to encourage investment in start-up companies by matching the capital of investors. Special 'Free Trade Zones' have been established with major tax benefits including exemption from VAT, lower tax rates and exemption from property tax.

## INCENTIVES

In order to encourage both local and foreign investment, Israel grants a number of significant tax incentives which have the effect of eliminating or substantially reducing the tax rate for companies. These incentives are known as incentives for "approved enterprises". These incentives are included in the Encouragement of Capital Investments Law. In 2011 new amendments were published regarding the Encouragement of Capital Investments Law. The amended law is effective as of 1 January 2011.

1) According to the amended law the incentives will be given by two geographical zones:
   (i) Zone A (as defined in the "zone map" which is in force until the end of 2012, generally defined as periphery regions that are distant from the centre of Israel. The "zone map" for 2013 and onwards is yet to be determined);
   (ii) The rest of the country;
2) An "Industrial Enterprise" that meets the requirements of section 18A of the Law is entitled to a reduced corporate income tax rate, in respect of income generated from 2011 onwards, although a minimum of 25% of the company's total turnover must be generated from exports;
3) The tax benefits are not time limited, meaning that any industrial company which exports 25% of its total turnover is eligible for the reduced tax rates for as long as it meets the above criteria. However there are no benefits guaranteed for the years to come and it could be altered by new legislation;
4) The tax benefits are applicable in relation to the enterprise's total turnover. The reduced corporate income tax rates are 7.5% for companies in Zone A and 16% for the rest of Israel;
5) An Industrial Enterprise, only if located in zone A, is entitled to a grant when filing a comprehensive investment plan, which fulfils the legislative intent. A qualified investment may include investments in human capital and other investments which meet the legislative intent of the amended law;

6) The grant is expected to be set at 20% of the company's investment, with an option for an additional 4% of administrative grant. A company defined by the Israeli Investment Centre (IIC) as a "Big Company" will be entitled to a grant no larger than ILS 20 million (20% of an ILS 100 million investment plan), while others will be entitled to a grant no larger than ILS 6 million (20% of an ILS 30 million investment plan);
7) A company is able to enjoy both the grants track and the tax benefits track, under the condition of being located in zone A;
8) Dividends distributed to Israeli and non-Israeli residents (companies and individuals) would be subject to a 15% withholding tax or to a reduced tax rate according to the relevant tax treaty's provisions;
9) There are transitional provisions for companies with plans under the previous law provisions.

## RESEARCH AND DEVELOPMENT (R&D) INCENTIVES

The Office of the Chief Scientist at the ministry of industry, trade and labour is responsible for implementing the government's policy of encouraging and supporting industrial research and development in Israel. This office provides a variety of support programs which have helped to make Israel a major centre of hi-tech entrepreneurship. The R&D Fund offers grants of between 20% and 50% for approved projects. If the project is commercially successful, the company is under an obligation to repay the grant through royalty payments. Grants of up to 90% of the costs are available for biotechnology research and up to 85% for technological incubators.

## C. FOREIGN TAX RELIEF

Foreign tax credits are given to Israeli-resident companies in respect of foreign taxes borne on overseas-sourced income and capital gains. There is no system of 'global' foreign tax credits. Each foreign source is treated as separate for the purpose of the consideration of credits. With effect from 1 January 2003, an Israeli company is allowed to deduct the tax paid on foreign company profits and also the withholding tax paid on dividends from taxes payable, provided it holds directly at least 25% (or at least 50% indirectly) of the shares in the foreign company.

## D. CORPORATE GROUPS

In general, there is no consolidation of profits and losses of a group of Israeli companies for tax purposes. However, consolidated tax returns may be filed for a group of industrial companies meeting certain criteria.

## E. RELATED PARTY

The tax assessing officer has powers to impose at arm's length prices on arrangements between related parties. Market value can be determined by a prior ruling from the tax authorities. In November 2006, new legislation was introduced relating to 'transfer pricing' for multi-national groups with effect from the 2007 tax year.

## F. WITHHOLDING TAX

Withholding taxes are deducted from payments of interest, dividends and royalties made to non-residents, subject to the application of double tax treaties. See section 'I' below for treaty and non-treaty rates.

## G. EXCHANGE CONTROL

There are no exchange controls in Israel and foreign currency can be freely transferred in and out of the country.

## H. PERSONAL TAX

Income tax is payable by Israeli-resident individuals on income derived from all sources, including passive income and all income derived or paid from overseas sources. Non-resident individuals are only liable to income tax on Israeli-sourced income. Factors determining residence include the situation of family, business and social activities. For information regarding the tax rates see below.

Rental income is taxed in the hands of an individual at rates of 10% or 15%, with no allowance for the deduction of expenses, depending on whether the property is situated in or out of Israel (This does not include commercial rentals). Individuals can choose to pay normal taxes on rental income and then can claim deductions (financial expenses, maintenance and other expenses relating to the property) against the rental income. The tax rate on the net income will be the marginal rate of the individual.

Rental income of residential apartments in the hands of an individual is exempt up to ILS 5,196 per month. Interest income is taxed in the hands of an individual at rates between 15% to individual marginal rate depending on circumstances. Exemptions are provided for low income earners. Capital gains are taxed in the hands of an individual at rates of 25%.

## TAX RELIEF FOR NEW AND RETURNING RESIDENTS

A major tax reform for new and returning residents has been retroactively in force from January 2007.

There has been a change in the definition of "foreign resident". Individuals who leave Israel will only lose their Israeli residency status if they are outside of Israel for at least 183 days each year during two consecutive tax years and their primary residence is outside of Israel for a further two years. A senior returning resident is defined as an individual who returns to Israel to reside after being a foreign resident for at least five consecutive years if they return to Israel in the tax years 2007 through 2009, or at least 10 consecutive years if they return to Israel after 2009.

## SUMMARY OF BENEFITS

| Details | Benefit for new resident and senior returning resident |
|---|---|
| Passive income-exemption from foreign assets purchased before becoming Israeli resident | 10 years exemption |
| Exemptions from foreign business income and foreign salary | 10 years exemption |
| Foreign companies that are managed and controlled from Israel, CFC, or foreign professional company | Those companies will be considered as foreign for 10 years |

| Details | Benefit for new resident and senior returning resident |
|---|---|
| Foreign allowances and pensions | 10 years exemption |
| Capital gain exemption | 10 years |
| Tax return | No need to submit a tax return on the exempt income. |

## OTHER

No tax is payable on income arising outside of Israel and received by non-residents who are in the country temporarily, who do not intend to establish a place of residence and who have not resided in Israel for periods totalling six months in the tax year. 'Approved specialists' are foreign experts whose status is granted by the Investment Centre where no Israeli resident could perform the job or possess the necessary skills to do so. Approved specialists are liable to a maximum tax rate of 25% on their income for a period of three tax years, with a possible extension for a further five years. The rates of tax on monthly taxable income of individuals as of January 2021 are:

| Monthly Income (ILS) | Rate (%) |
|---|---|
| 0 - 6,450 | 10 |
| 6,451 - 9,240 | 14 |
| 9,241 - 14,840 | 20 |
| 14,841 - 20,620 | 31 |
| 20,621 - 42,910 | 35 |
| 42,911 - 55,270 | 47 |
| 55,271 and over | 50 |

The above rates relate to income from employment, trading or profession.

## I. TREATY AND NON-TREATY WITHHOLDING TAX RATES

| | Dividends (%) | Interest[1] (%) | Royalties (%) |

| Uzbekistan | 10 | 10 | 5/10[9] |
| Vietnam | 10 | 10 | 5/15 |

NOTES:

1. Many treaties provide for an exemption of certain types of interest, e.g. interest paid to public bodies and institutions. Such exemptions are not considered in this column.
2. No withholding tax in Israel. Only subject to tax in Austria.
3. The lower rate applies to interest payable to a bank or a financial institution.
4. The higher rate applies to royalties from trademarks.
5. The domestic withholding tax rate applies.
6. The lower rate applies to royalties for industrial or scientific equipment.
7. Film and natural resource royalties are not exempt; however, no specific rate is provided under the treaty.
8. The lower rate applies to copyright and film royalties.
9. The lower rate applies to copyright royalties (excluding film royalties).
10. The rate applies if (i) the Estonian company owns directly at least 10% of the capital in the Israeli company, or (ii) dividends are paid to the government of the other state, a local authority or the central bank, or to a pension fund or other similar institution providing pension schemes in which individuals may participate, subject to further conditions.
11. Gross dividends paid to non-residents are subject to withholding tax at the following rates: (i) 25% if the shareholding is less than 10% (ii) 30% if the shareholding is equal to or less than 10% (iii) 25% if the payer is an Israeli resident company whose shares are listed and traded on a stock exchange. Dividends distributed by qualified Preferred Enterprises are subject to a 20% reduced withholding tax rate. Dividends distributed out of technological preferred income are subject to a 4% reduced withholding tax rate if more than 90% of the company's shares are held by non-residents (20% in other cases).

## KEY TAX POINTS

- All resident companies are subject to corporate income tax (IRES) on income from any source, whether earned in Italy or abroad. Non-resident companies are subject to IRES only on income earned in Italy. Both resident and non-resident companies are subject to regional income tax (IRAP) on income arising in Italy.
- Capital gains realised by a company are generally taxable as normal business income subject to IRES and IRAP, albeit certain reliefs may apply as per next paragraph description.
- Italian tax law includes a comprehensive set of rules on controlled foreign companies (CFC).
- VAT is levied on transfers of goods and services by enterprises, in the course of their business or professions within Italy, and on all imports into Italy.
- Foreign taxes may generally be credited against the Italian IRES tax liability, provided an equivalent clause exists in the territory from which the income derives.
- Transactions with foreign affiliated companies are closely scrutinised in order to determine whether transfer prices are at arm's length.
- Domestic companies making certain types of payments (e.g. interests, royalties, professional fees etc.) are required to withhold taxes at various rates.
- Resident individuals are subject to a personal income tax (IRPEF) on their worldwide income. Individuals carrying on a business or profession and/or partnerships are liable to IRAP which is not deductible from IRPEF. Non-resident individuals are subject to tax only on their Italian-sourced income.
- There is wealth tax in Italy applied on the cadastral value of real estate (ranging from 0.86% to 1.14%): IMU. It is not applied to real estate used as a main residence. Gift and inheritance tax applies at rates dependent on the relationship that the person receiving the gift or inheritance has with the donor/testator.

## A. TAXES PAYABLE

### NEW KINDS OF INCORPORATIONS PROVIDED BY LAW – LIMITED LIABILITY COMPANIES

The so-called "limited liability companies with reduced equity", introduced in 2012, have been abolished. Those previously incorporated were automatically converted into "simplified limited liability companies". The maximum age limit of 35, previously established for shareholders of a simplified limited liability company, was eliminated: therefore, individuals of any age may now have a participation in the share capital of an SLLC.

Furthermore:

- The directors do not necessarily have to be shareholders;
- The share capital must be between EUR 1 and EUR 9,999 and can only consist of cash which has to be paid in full to the Directors at the Incorporation Deed.

The Articles of Association must be drafted in accordance with a template approved by the Ministry of Justice, whose clauses cannot be amended.

As far as "ordinary" limited liability companies are concerned, 25% of the share capital contribution must be paid in cash to the directors, instead of to the bank as previously foreseen. The share capital can be less than EUR 10,000 but at least EUR 1. Furthermore, a sum equal to one fifth of the net profits resulting from the financial statements for each financial year must be assigned to the legal reserve until the company's equity reaches EUR 10,000. The reserve can only be used to increase the share capital or to cover any losses and it must be reinstated if, for any reason, it has been reduced. The Articles of Association do not need to be drafted according to the abovementioned template that is only required for simplified limited liability companies.

### INNOVATIVE START-UP COMPANIES

Some (but not all) requirements to be met by new and existing (by no longer than 5 years, as modified by Law Decree 24/2015) companies to be considered "innovative start-up companies" are the following:

- Their shares must have been owned by individuals for at least 3 years;
- The registered office is in Italy;
- The purpose of the Company is the development, production and sale of goods and/or services with high level technology.

The benefits of being such a company include:

- Exemption from the payment of both stamp and annual duties to the Companies House.
- Particular tax concessions concerning employment contracts and in terms of corporate laws.
- Tax deduction of 30% of investments (50% for 2020 up to EUR 100.000 currently) for investors.

### FEDERAL TAXES AND LEVIES: COMPANY TAX

As a rule, corporate income tax is payable by all resident companies on income from any source, whether earned in Italy or abroad. Non-resident companies are subject to corporate income tax (IRES) only on income earned in Italy. Starting from 1 January 2017, IRES is charged at 24% (reduced from the former 27.5%) and 27.5% for banks and financial institutions. Companies are also subject to a regional tax on productive activities (IRAP) at the rate of 3.9% but interest expenses are not deductible for IRAP purposes. The rate of IRAP is fixed at 3.9% for ordinary companies, 4.65% for banks and 5.9% for insurance companies.

Company tax returns, which cover both IRES and IRAP, must be filed electronically within nine months of the statutory year-end. An advance tax payment is due by the 30th day of the sixth month of the accounting period equal to 50% of the previous year's income tax liability. A second advance payment of 50% is due by the end of the eleventh month of the company's financial year (in some specific cases the advance payments are equal to 40% and 60%).

Any remaining amount would be due by the 30th day of the sixth month after the end of the period. For income tax purposes the company can choose either a calendar or a fiscal year. For VAT and withholding tax purposes, the calendar year always applies.

### BRANCH PROFITS TAX

Italian branch profits of foreign companies are fully liable to IRES and IRAP. Starting from 2016, Italian companies having a branch in a foreign country may opt for a branch exemption regime instead of the general "tax credit" regime. The branch exemption regime allows to tax the branch's profit only in the foreign country where the PE is established and according of its tax rules. The option is irrevocable and must be applied to all the branches of the Italian company.

There is no branch remittance tax in Italy.

### FISCALLY TRANSPARENT COMPANIES

Italian limited liability and joint stock companies may opt for this regime and be treated as fiscally transparent companies. In order to qualify for this treatment, joint stock companies must hold between 10% and 50% of the voting rights in another Italian company for a continuous 12-month period, whereas Italian limited liability companies must have a total gross income not exceeding EUR 7.5 million and be owned by a maximum of 10 private shareholders. Non-resident companies (regardless of their legal form) may also opt for such a regime only if entitled to apply the EU Parent-Subsidiary Directive to the dividends paid by the Italian controlled company.

Under the above regime, the 'transparent' company is not taxed on its own income for corporate income tax purposes. Income produced by its subsidiaries is directly allocated to the parent company according to its percentage of ownership, whether or not these profits have been remitted to it by way of dividend. The election is irrevocable for three years and must be communicated to the Tax Authorities.

### CONTROLLED FOREIGN COMPANIES

Italian tax law includes a comprehensive set of rules on controlled foreign companies (CFC). These rules are aimed at avoiding hiving off income from foreign subsidiaries located in certain low tax jurisdictions. On 28 December 2018 the Legislative Decree implementing ATAD directives established that a controlled company is a CFC if:

i. Its effective tax rate is lower than 50% of the tax rate that would apply if it were resident in Italy; and
ii. More than 1/3 of its income is passive income (i.e. interest, royalties, dividends).

The profits earned by a CFC located in a tax haven country have to be imputed to the Italian resident parent company/individual regardless of any dividend distribution.

Even if the non-resident entity meets the CFC test, the CFC regime does not apply if the CFC carries on a substantive economic activity supported by staff, equipment, assets and premises.

## CAPITAL GAINS

Capital gains realised by the company are generally taxable as ordinary business income subject to IRES and IRAP and capital losses are generally deductible. Tax on gains realised on disposal of fixed assets may be spread over five years if owned for more than three years. Capital gains on assets owned for less than three years are taxed in the year in which they are realised. Capital gains arising from stock transfers are 95% exempt, under specific conditions, where they relate to financial assets owned for an uninterrupted period of at least 12 months (participation exemption rule).

## FRINGE BENEFITS

Fringe benefits are included in the taxpayer's total aggregated income.

## MINIMUM TAXABLE INCOME

Until FY 2017, companies with an annual turnover lower than EUR 7.5 million were subject to an automatic evaluation in accordance with the so-called Sector Studies ('Studi di Settore'). This was to determine whether the company's income was higher than that stated in the tax return but it was not sufficient for assessing a higher taxable base. Any amended assessment must be based on concrete evidence. For income related to 2011 onwards, any taxpayer (individual, partnership or company) not consistent and not congruent with Sector Studies, is liable to a new and more stringent tax investigation procedure, carried out by the tax authorities. Starting from FY 2017, Sector Studies have been abolished and replaced by certain Compliance Indicators in order to determine a sort of reliability degree of the taxpayer. In some specific cases Compliance Indicators do not apply.

## NON-OPERATING OR DORMANT COMPANIES

Such companies are subject to a minimum tax charge as far as IRES and IRAP are concerned. The company must declare an income for the tax period which cannot be lower than the amounts calculated by multiplying percentages to certain balance sheet items (estimated figure). If this amount is higher than the taxable income declared, then the company is taxed on this higher amount. Furthermore, a VAT receivable is not refunded if these non-operating circumstances persist for five years as recently modified by law 23/2014. A company is considered dormant also if:

a) It has made a loss for five consecutive fiscal periods; or
b) It has made a loss for four fiscal periods and, in the next one , has a lower than estimated taxable income.

Moreover, any company considered dormant is subject to an additional 10.5% tax (which gives an overall corporate taxation of 34.5%).

## VALUE ADDED TAX (VAT)

VAT is levied on transfers of goods and services by enterprises or professionals in the course of their business within Italy and on all imports. Items exported or destined for export are not subject to VAT. Since October 2013, the standard VAT rate increased to 22%. Other rates currently applied are 4%, 5% and 10%. A specific VAT regime applies to real estate transactions. The standard rate might increase again, depending on whether or not the Government will be adopting certain specific laws concerning the Public Budget. Certain goods used to combat Covid-19 are VAT exempted (in 2021, however, the rate was set at 5%).

As an alternative to the appointment of a VAT representative (which remains the only procedure allowed by extra-EU companies), non-resident EU companies can apply for a "Direct VAT Identification", which is a VAT registration that leads to getting an Italian VAT number. This enables the non-resident to settle any VAT payment directly in Italy or claim back any VAT credit. The direct VAT identification procedure is intended to facilitate the payment of Italian VAT liabilities by the non-resident. This procedure was discontinued with effect from 25 September 2009 in cases where a non-resident EU company has a permanent establishment in Italy. Post-Brexit UK companies are still able to get VAT registered as EU companies.

The basic "place of supply" rule for supplies of services to "VAT registered persons" is that such supplies are deemed to be made where the customer is established and the related VAT is due in accordance with the so-called "reverse charge" procedure. Services subject to reverse charges also have to be included on Intrastat forms, subject to some exceptions. Periodic returns must be filed on a monthly or quarterly basis, depending on the company's turnover. A yearly return must be filed by 30 April of the following year. Starting from 2017, a group of companies, under certain conditions, may apply for a VAT Group in order to be considered as a unique taxpayer for VAT purposes.

## TAX CLAIMS

The taxpayer has the right to seek recourse against assessments and undue payment demands, etc. by appealing to the tax courts through three levels of justice. The tax assessment can be settled by paying a lower penalty before appealing to the Tax Court.

## IVIE (TAX ON REAL ESTATE OUTSIDE ITALY)

Starting from fiscal year 2012 Italian and non-Italian citizens who are tax residents in Italy and own property located outside of Italy will be subject to IVIE. This tax is calculated by applying:

- A rate of 0.76% to:
  (a) The cadastral value as normally calculated in the country where the real estate is situated;
  (b) The cost of the real estate, as indicated in the Purchase Deed or in the contract(s); or
  (c) The fair value that can be assigned to the property in the Country where the real estate is situated.

- A rate of 0.40% to:
  (a) Properties located abroad that are utilised as a main residence where a lump-sum deduction of EUR 200 is applicable to the tax burden calculated by applying the 0.40% rate.

The value mentioned at a) above can only be used for taxation purposes for estates located in EEA member states. The tax is calculated proportionally to the effective month and percentage of possession. It is only due for payment if the tax burden is higher than EUR 200. Any property tax paid in the country where the real estate is located can be offset against IVIE. Taxpayers may also deduct the income tax payable on properties located in EEA member states.

The Italian Tax Agency has published the Circular 28/2012 listing and distinguishing which Country applies the above mentioned letter a) and letter b). The deadline for paying this tax coincides with the Income Tax payment deadline.

## IVAFE (TAX ON FOREIGN FINANCIAL INSTRUMENTS, BANK ACCOUNTS)

IVAFE is a tax introduced in 2011 on foreign financial assets on the possession of financial products, bank accounts and passbooks owned abroad by Italian resident taxpayers. It is applied on the assets' value at a rate of 0.1% for 2011 and 2012, which increased to 0.15% at the beginning of 2013 and to 0.2% starting from 2014. To avoid double taxation, a deduction is allowed for any "wealth" tax paid abroad on the same assets.

## LOCAL TAXES

## REAL ESTATE TAX (IMU), TASI AND TARI

The 2020 Budget Law reviewed the law provision regarding taxes levied on the ownership of real estate. In particular, it has been provided that, starting from the year 2020, the tax on indivisible services (i.e. the above-mentioned TASI) is repealed so that only one form of real estate tax is levied, the rules of which ultimately are consistent with those existing under the IMU.

Real estate tax (IMU) is payable annually in two instalments (June and December) on the value of real estate property owned by companies as well as individuals. It has a variable rate ranging from around 0.86% to around 1.14% on the property value, depending on each county council's assessment. IMU is no longer charged on the principal place of abode owned by any taxpayer, unless it is classified as being luxurious for fiscal purposes within special cadastral categories. Moreover, IMU could also be charged on rural buildings considered instrumental upon decision of Municipalities. The maximum tax rate applicable is 0,1%.

As from 2022, both self-employed VAT registered individuals and companies are allowed to fully deduct (100%) the IMU paid during the fiscal year 2022 on instrumental premises. This deduction is only applicable to the computation of corporate tax but not when calculating the IRAP burden for the year.

TARI is due for waste collection. Both self-employed VAT registered individuals and companies are allowed to deduct 100% of TARI paid during the fiscal year.

## OTHER TAXES

From 2008 onwards stamp duty on the transfer of shares, bonds and similar securities has been repealed under the name of Tobin Tax. Register tax is levied on the registration of any written contract or deed. The percentage varies according to the type of deed. One of the higher rates applied to contributions or transfers of real estate is 9%. Registration tax is not applicable if the transaction is subject to VAT, except for real estate rental contracts whereby VAT and a 1% registration tax are both applicable.

## PAYMENTS DUE BY VAT REGISTERED ENTITIES

VAT registered persons are required to make all tax and social security payments electronically, whether or not an intermediary is involved by means of a standard form (F24).

Starting from tax year 2020, it is mandatory to channel the filing of the F24 form through the tax authority's system (so-called '*Entratel*') in case of offsetting tax liabilities with other tax credits.

## B. DETERMINATION OF TAXABLE INCOME

The taxable income of a company is based on the result of its business profits, which consists of the net income determined during a financial period, adjusted as required by the Tax Act. Non-resident companies are taxed in Italy on certain types of income earned from sources in Italy.

## CAPITAL ALLOWANCES

Depreciation of tangible assets is permitted on a straight-line basis calculated by applying the coefficient established by the Ministry of Finance to the cost price, reduced by half for the first tax year. Tangible property with an acquisition cost of less than EUR 516.46 may be written off in the year of purchase. For new assets, subject to certain requirements - until 2019 – the depreciation rate was increased to 30% or 150% in case of high technology assets. Starting from financial year 2020 a tax credit was introduced. For financial year 2022, it is calculated applying 6% and 40% (high-tech assets) to the cost of new tangible and certain intangible assets. Different percentages have already been foreseen for the following financial years.

## STOCK / INVENTORY

Inventory is valued at cost of purchase. Companies may apply any acceptable method of inventory pricing, i.e. FIFO, average, continuous average, etc. If the cost of purchase is lower than the market value as of the previous month, the stock can be valued using this method.

## DIVIDENDS

a) Companies are taxed at 5% on dividends received regardless of where the company paying the dividend is a resident (except for black-listed countries).
b) Budget Law 2018 has amended the tax treatment applicable (with effect from 1 January 2018) to dividends derived by individuals outside a business capacity providing for a flat tax rate at 26% (either for substantial and non-substantial participations). However, dividends from substantial participations) accrued up to 31 December 2017, whose distribution is

approved by 31 December 2022, will still be subject to the old rules (i.e. 49.72% or 58.14% of the dividends will be included in the individual's taxable income for IRPEF purposes).

50% of dividends distributed by a foreign black-listed entity will be excluded from the taxable income of the resident shareholder, if it can prove that as its core business, the foreign company paying the dividends actually trades on the market of the state or territory in which it is located (first CFC safe-harbour rule or 'business test').

## INTEREST DEDUCTIONS

Interest expenses, including interest on leasing costs but excluding capitalised and non-deductible interest and net of the interest income accounted in the same tax period, are not deductible if they exceed 30% of the company's gross operating margin relevant for tax purposes (before 2019 reference had to be made to gross operating margin as reported in the Financial Statements).

Net interest expense in excess of the yearly limitation is carried forward to the following 5 fiscal years (before 2019 indefinitely). Hence, net interest expense not deducted in previous years can be deducted in the subsequent 5 fiscal years as long as total interest in that year does not exceed 30% of gross operating margin. If net interest expense is lower than the annual limit (i.e. 30% of gross operating margin), this difference can be carried over to increase the company's interest deduction capacity in the subsequent 5 years. Starting from 2019, interest income exceeding interest expenses can be carried forward to be offset against future interest expenses in any following FYs.

## DEVALUATION OF RECEIVABLES

It is allowed to deduct the devaluation if the transaction complies with National Accounting Principles and if its intent is not elusive.

## LOSSES

Net operating losses incurred in tax year 2012 and onwards may be carried forward without a time limitation from the year in which they originated. However, they can only be used to offset up to 80% of the income arising in later years. The losses realised in the first three years of business can be used for the entire amount. Net losses incurred before 2011 can be carried forward for up to five years with no offset limitations. These rules only apply for corporation tax (IRES) and not for IRAP purposes.

As a result of the pandemic, companies have been allowed to postpone decisions on how to cover losses accrued during 2020 until 2025 and during 2021 until 2026 (five financial years).

## FOREIGN SOURCE INCOME

Only 5% of the value of dividends received from controlled foreign companies is liable to IRES. This 95% exemption is not available if the source of the dividends is a company resident under a 'privileged tax regime' outside the EU. A full exemption is applicable to the dividends paid by a CFC taxed under the transparency method.

## INCENTIVES

Italian law provides for various forms of incentives to support economic investment in the south of Italy, other depressed areas in the centre/north, and in those areas struck by catastrophes such as earthquakes or floods.

Many of those incentives have been introduced after the emergence of Covid-19. In addition to some already discussed in other paragraphs, the following are also worth mentioning:

- A "super deduction", which corresponds to a 110% cost increase, of research and development costs incurred in relation to software protected by copyright, industrial patents, trademarks, designs and models, as well as processes, formulas and information relating to legally protectable industrial, commercial or scientific experience (for a duration of five tax periods).
- The law on the revaluation of business assets (Decree-Law No. 34/2020) has been renewed, allowing business assets and shareholdings to be 'revalued' by paying a substitute tax on their value and thus recognising this new value for tax purposes. For the purposes of the tax recognition of the higher values, the rate is 3% (there is also the option to attribute exclusively accounting value to the higher values).
- A general extension of the possibility to suspend depreciation of tangible and intangible assets, already provided for the tax year 2020 only, has also been granted for the year 2021.
- The measure was introduced by Decree-Law 104/2020 only in favour of those companies that do not adopt international accounting standards.
- The benefit consists in the right to suspend up to 100% of the annual amortisation of tangible and intangible assets, maintaining their book value, as resulting from the latest regularly approved financial statements. The portion of depreciation not carried out is charged to the profit and loss account of the following year and the subsequent portions are deferred using the same criterion, thus extending the original depreciation plan.
- The tax credit for research and development. All companies resident in the territory of the State, including permanent establishments of non-residents, regardless of their legal status, economic sector, size, accounting system and income determination system for tax purposes, that carry out fundamental research, industrial research and experimental development in the field of science and technology, are entitled to a tax credit, until the tax period ending on 31 December 2022, equal to 20% of the relevant calculation basis, (net of other subsidies or contributions of any kind received for the same eligible expenses) up to a maximum annual limit of EUR 4 million. From the tax period following the one in progress as of 31 December 2022 until the one in progress as of 31 December 2031, the tax credit is recognised at the rate of 10%, up to a maximum annual limit of EUR 5 million.
- Another tax credit is recognised for technological innovation activities aimed at producing new or substantially improved products or production processes. The tax credit is recognised until the tax period in progress until 31 December 2023, at an amount equal to 10% of the relevant calculation basis, taken net of other subsidies or contributions for any reason received on the same eligible expenses, up to a maximum annual limit of EUR 2 million. From the tax period following the one in progress as of 31 December 2023 until the tax period in progress as of 31 December 2025, the tax credit is recognised at the rate of 5%, up to a maximum annual limit of EUR 2 million.

## BLACKLIST COUNTRIES

Starting from 2017 all transactions with subjects residing in black-listed countries are no longer to be communicated to the Tax Authorities. Until FY 2016 the deduction of the cost incurred with black-list subjects was subject to specific conditions or to preceding ruling procedures.

## EXIT TAX

As a general rule, Italian companies that decide to transfer their tax residence abroad are deemed to have realised their assets at "fair value" unless they maintain a permanent establishment in Italy. However, where the tax residence is transferred to another state within the European Union or to a state included within a specific "white list", companies may choose to pay in instalments or to have the resulting tax charge suspended until the assets of the transferred business are disposed of.

## ACE (ALLOWANCE FOR CAPITAL EXPENDITURE) AND "SUPER" ACE

The Budget Law 2020 has re-introduced the Ace deduction (a sort of Notional Interest Deduction on equity increases).

Corporations and permanent establishments of non-resident companies (as well as individuals and partnerships), are allowed to deduct a lump-sum amount from their own taxable income. The deduction (applicable from the year ended 31 December 2011 onwards) is calculated by applying a rate of 1.3% starting from 2020.

Examples of increases in shareholders' equity are:

- Cash injections into a company (share capital increase, write off of payables previously due to shareholders, offsetting of receivables to increase the share capital);
- Earnings not distributed to shareholders but retained and allocated to reserves.

Examples of decreases in shareholders' equity are:

- Distribution of earning reserves to shareholders;
- Decrease in capital and in reserves of capital.

The distribution of the current year profits as well as losses affecting share capital were not considered to be a decrease in the shareholder's equity.

For tax year 2021 only, the so-called "Super Ace" has been provided for the following: the increases recorded in the year 2021 (calculated as above) can benefit from a rate of 15%, instead of the ordinary 1.30%, with a limit of EUR 5 million of eligible increases.

The amount calculated in this way is transformed from a facilitation into a tax credit.

## DIGITAL TAX

The 2019 finance bill introduced a 3% web tax on gross revenues from the supply of certain digital services at the level of taxpayers (residents and non-residents) that meet the following conditions:

- Worldwide income at least equal to EUR 750 million;
- Income for digital transactions in Italy at least equal to EUR 5.5 million.

More specifically, supply of digital services includes online advertising, the use of digital platforms allowing the direct supply of goods and services and the transmission of data collected from digital interface users. The tax applies if the user is located in Italy.

Digital Tax is payable on a calendar year basis and is due by 16 February of the following year, based on a return to be filed by 31 March.

## C. FOREIGN TAX RELIEF

Foreign taxes may generally be credited against the tax liability suffered in Italy on the same income. Any excess foreign credits can be carried forward or backwards for eight years. The tax credit must be claimed in the tax return for the year in which the foreign tax is paid. If not, the right to the tax credit is forfeited.

## D. CORPORATE GROUPS

Provisions for the consolidation of resident and non-resident company results were introduced in 2004. These provisions allow for the consolidation of income between group companies at both domestic and international level, resulting in a single tax liability for the parent company. The option is irrevocable for a three-year period where only Italian resident companies are involved and for a five-year period for a worldwide consolidation (or three years if subsequently renewed). The companies participating in the group consolidation are jointly liable for taxes, penalties and interest assessed on the aggregate income. The consolidated income is taxed at the parent company level.

## E. RELATED PARTY TRANSACTIONS

Transactions with foreign affiliated companies are closely scrutinised in order to determine whether transfer prices are at arm's length. There are ministerial guidelines which suggest various limits on payments between affiliates. A set of documentation, consistent with OECD standards, is required from those companies that make cross-border operations with controlled foreign companies (CFC). The documentation must contain detailed information and data about the transactions as well as their compliance with the "arm's length principle". Although this documentation is not mandatory, it would provide penalty protection to companies should they communicate to the Tax Authorities that they have this documentation on hand for consultation.

Furthermore, they must also communicate to the Tax Authorities as to whether they have this documentation available for previous tax periods that are still subject to assessment. From tax year 2017, a country-by-country report showing certain financial information and economic indicators has been made compulsory for certain multinational entities. The rules on transfer pricing are also applicable for IRAP purposes, having retroactive effects from the tax periods subsequent to 31 December 2007. A sentence dated November 2015 declared lawful IRAP application only starting from fiscal year 2014.

## F. WITHHOLDING TAX

Domestic companies making certain types of payments (e.g. interests, royalties, professional fees, etc.) are required to withhold taxes at various rates. In general, dividends distributed to non-residents are subject to a final 26% withholding tax. For dividends paid to residents of EU countries and those included on the "white list", a special withholding tax rate of 1.20% applies. This rule applies only to profits earned starting from fiscal year 2008. Any dividends paid that represent profits from previous fiscal years will be subject to previous years' rules. However, Italian legislation has transposed the EU Directive 2003/49/CE (the 'Parent-Subsidiary Directive'). No withholding tax is levied on dividends paid to a parent company in another EU Member State if both the parent and the subsidiary are 'qualifying' companies under the Directive and the parent has held at least 10% of the capital of the subsidiary continuously for at least one year.

The EU Interest and Royalties Directive has also been incorporated into domestic law. Outbound interests and royalties are exempt from any Italian tax provided that the recipient is an associated company of the paying company and is resident in another EU Member State or such a company's permanent establishment is situated in another Member State. Two companies are "associated companies" if:

a) One of them holds directly at least 25% of the voting rights of the other; or,

b) A third EU company holds directly at least 25% of the voting rights of the two companies.

The relevant companies must have a legal form listed in the Annex to the Directive and be subject to a corporate income tax. A one-year holding period is required.

## G. EXCHANGE CONTROL / ANTL-MONEY LAUNDERING

There are no exchange controls in Italy. However, banks and financial institutions are required to monitor any deposit/withdrawal of over EUR 15,000 for anti-money laundering purposes. This duty was extended to audit firms, professionals, etc. Cash payments of over EUR 2,000 are not permitted. This limit is applicable to all categories. Penalties range from 1% to 40% of the amount transferred with a minimum penalty of EUR 3,000 (and EUR 15,000 when cash payments exceed EUR 50,000).

## H. PERSONAL TAX

Resident individuals are subject to a personal income tax called IRPEF on their worldwide income.

Individuals carrying on a business or profession are liable to IRAP which is not deductible from IRPEF. Non-resident individuals are subject to tax only on their Italian-sourced income.

Individuals are considered resident for fiscal purposes in Italy if they are registered at the official Register of Population; their principal place of business and interests is located in Italy; or if they remain in Italy for more than six months in any calendar year. Progressive rates for IRPEF are as follows:

| INCOME (EUR) | IRPEF RATE 2022 |
|---|---|
| Up to 15,000 | 23% |
| Between 15,000 and 28,000 | 25% |
| Between 28,000 and 50,000 | 35% |
| Over 50,000 | 43% |

In addition to the above progressive rates, a regional surcharge (variable rate from 0.9% to 1.4%) is due and an additional municipal tax could be charged and set locally.

The tax period in Italy is the calendar year and tax is due over two advance payments made during the tax year with the balance due by 30th June of the following year. IRPEF is withheld at source from employee salaries and wages. The payment of taxes on account and settlement functions are done under a similar system as for companies. There is no wealth tax in Italy (only IMU as described). Gift and inheritance tax has come back into force with a range of tax rates and exemptions.

## TAX INCENTIVES FOR ATTRACTING HUMAN CAPITAL TO ITALY

A favourable tax regime has come into force starting 1 January 2020, with the aim to attract human capital to Italy. In particular, workers who have transferred their tax residence to Italy starting from 30 April 2019 are subject to a 70% reduction (90% if the tax residence is moved to certain regions of Southern Italy) of taxable income, if they meet certain conditions:

- Employees or self-employed workers who have not been tax resident in Italy in the previous two years.
- EU citizens and citizens of non-EU countries with a DTT (or exchange of information agreement) with Italy: (i) bachelor/master graduated, who have work experience on a continuous basis outside of Italy in the previous 24 months before moving to Italy, (ii) or individuals who, in the last 24 months or more, were studying on a continuous basis abroad and accomplished a bachelor's degree or a master's degree.

Moreover, in order to benefit from the special tax regime, workers must be committed to stay tax resident in Italy for at least two years and they must perform their working activity mainly in Italy.

The tax exemption lasts for five tax years. A 5-year extension can be granted to workers who meet some specific requirements (e.g. having children or having purchased a resident property in Italy).

Another advantageous flat tax regime, interesting for high-income individuals, is provided for those who transfer their tax residence to Italy (after having had it abroad for at least 9 out of the last 10 tax periods).

This regime provides that these individuals can benefit from a substitute tax on income generated abroad. The option provides for the payment of a flat tax of EUR 100,000 for each tax period for which it is exercised for all income produced abroad (not in Italy).

The flat-rate scheme may also be extended to one or more family members, in which case the substitute tax is equal to EUR 25,000 for each of them.

The option is tacitly renewed from year to year and lasts for fifteen years from the first tax period of validity.

The payment of the substitute tax, in the amount of EUR 100,000, must be made in a single instalment, for each tax period in which the scheme is effective, within the date set for the payment of the balance of income tax.

## FLAT TAX ('CEDOLARE SECCA')

Since 2011, individuals whose income is derived from renting their own properties to tenants who, in turn, use them as dwellings, can be taxed at a flat 21% rate on the agreed fees (the rate is equal to 10% for certain particular "agreed upon" local contracts.)

In order to qualify for this scheme, the lessor should choose this option when the rental agreement is registered at the local tax office, or within his or her tax return. The tenant(s) must be informed of such a choice through a registered letter with return receipt. This scheme only applies to individuals renting buildings used as dwellings. It does not apply where the building is to be used for a business purpose.

## I. TREATY AND NON-TREATY WITHHOLDING TAX RATES

| | Dividends[1] | | Interest (%) | Royalties (%) |
|---|---|---|---|---|

Notes:

1. In the case of relations between EU Member States, dividend payments from subsidiaries to parent companies may be exempt if the conditions of the Parent Subsidiary Directive 2011/96/EU are met.
2. The 5% reduced rate applies if the beneficial owner is a company which has owned directly at least 10% of the capital of the dividend-paying company (this share should be at least USD 100,000 or its equivalent in other currency) for a period of at least 12 months preceding the date the dividends were declared.
3. The reduced rate applies if the beneficial owner is a company which holds directly or indirectly at least 10% the capital of the dividend-paying company.
4. The 5% reduced rate applies if the beneficial owner is a company which holds directly at least 10% of the capital of the dividend-paying company.
5. The reduced rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the capital of the dividend-paying company.
6. The 5% reduced rate applies if the beneficial owner is a company that controls directly or indirectly at least 10% of the voting power in the dividend-paying company.
7. The 5% reduced rate applies if the beneficial owner is a company that holds directly at least 25% of the capital of the dividend-paying company.
8. Effective date: 1 January 2022.
9. The 5% reduced rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 20% of the capital of the dividend-paying company.
10. The reduced rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the dividend-paying company.
11. The 0% rate applies if the beneficial owner is a company (other than a partnership) which holds and has held directly at least 25% of the capital of the dividend-paying company for a twelve month-period prior to the date the dividends are declared.
12. There is no reduction under the treaty. The domestic rate therefore applies.
13. The 10% reduced rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 50% of the capital of the dividend-paying company.
14. The 5% reduced rate applies if the beneficial owner is a company subject to the corporation tax which holds directly or indirectly, for a period of at least 12 months preceding the date the dividends were declared, at least 10% of the capital of the dividend-paying company.
15. The 5% reduced rate applies if the beneficial owner is a company which has owned at least 25% of the capital of the dividend-paying company.
16. The 5% reduced rate applies if the beneficial owner is a company (other than a partnership) which has owned directly or indirectly at least 10% of the capital of the dividend-paying company for a period of at least 12 months preceding the date the dividends were declared.
17. The 15% reduced rate applies if the beneficial owner is a company which owns at least 10% of the shares of the dividend-paying company.
18. The 10% reduced rate applies if the recipient is a company which owns at least 25% of the voting shares of the company paying such dividends during the period of six months immediately before the end of the accounting period for which the distribution of profits takes place.
19. The 5% reduced rate applies if the beneficial owner holds, directly or indirectly, 75% or more of the capital of the dividend-paying company.
20. The 5% reduced rate applies if the beneficial owner is a company which has owned at least 10% of the capital of the dividend-paying company for a period of at least 12 months preceding the date the dividends were declared.
21. The 5% reduced rate applies if the beneficial owner is a company which has held more than 50% of the voting shares of the dividend-paying company for a period of twelve months preceding the date the dividends were declared. The 10% reduced rate applies if the beneficial owner is a company which is not entitled to the 5% rate but which has held at least 10% of the voting shares of the dividend-paying company for a period of twelve months preceding the date the dividends were declared.
22. The 5% reduced rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 15% of the capital of the dividend-paying company.
23. The 15% reduced rate applies if the recipient company holds directly at least 25% of the capital of the dividend-paying company and the latter company is engaged in an industrial undertaking.
24. The 5% reduced rate applies if the beneficial owner is a company (other a partnership) which has owned directly or indirectly at least 25% of the capital of the dividend-paying company for a period of at least 12 months preceding the date the dividends were declared.
25. The 0% rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the dividend-paying company on the date the dividends are paid and has done so or will have done so for an uninterrupted period of two years in which that date falls.
26. The 5% reduced rate applies if the beneficial owner is a company which holds directly at least 10% of the capital of the dividend-paying company (this share should be at least USD 100,000 or its equivalent in other currency).
27. The 0% rate applies if the beneficial owner is a company (other than a partnership) which has held directly at least 10% of the capital of the dividend-paying company for an uninterrupted period of at least 12 months prior to the decision to distribute the dividends.
28. The 5% reduced rate applies if the beneficial owner is a company which has owned at least 25% of the capital of the dividend-paying company for a 12 month period ending on the date the dividend is declared.

29. The 10% reduced rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 51% of the capital of the dividend-paying company.
30. The 5% reduced rate applies if the beneficial owner is a company which has owned at least 25% of the capital of the dividend-paying company.
31. The 15% reduced rate applies if the recipient of the dividends is a company which is a resident of Thailand owning at least 25% of the voting shares of the dividend-paying company.
32. The 5% reduced rate applies if the beneficial owner is a company (other than a partnership) which holds directly or indirectly at least 20% of the capital of the dividend-paying company.
33. The 5% reduced rate applies if the beneficial owner holds directly or indirectly at least 25% of the capital of the dividend-paying company.
34. The 5% reduced rate applies if the beneficial owner is a company which has owned at least 25% of the voting stock of the dividend-paying company for a 12 month period ending on the date the dividend is declared.
35. The 5% reduced rate applies if the recipient is a company (excluding partnerships) which owns directly at least 70% of the capital of the dividend-paying company. The 10% reduced rate applies if the recipient is a company (excluding partnerships) which owns directly at least 25% up to 70% of the capital of the dividend-paying company.
36. In general, dividends distributed to non-residents are subject to a final withholding tax of 26%. A reduced rate of 1.2% applies to distributions of profits, provided that the beneficial owner of the dividends is a company or an entity (i) subject to corporate income tax and (ii) resident in an EEA country that allows an adequate exchange of information with Italy. Where the 26% withholding tax rate applies, and it is proved that tax has been paid on the same dividends in the recipient's state of residence, a refund of up to 11/26 of the withholding tax may be claimed. See also footnote 1 for the 0% rate.

## MEMBER FIRM

| City | Name | Contact Information |
|---|---|---|
| Abidjan | Antoine Lawson | +225 21 32 05 85<br>antoine.lawson@pkf-fwa.com |

## BASIC FACTS

| | |
|---|---|
| Full name: | Republic of Côte d'Ivoire |
| Capital: | Yamoussoukro |
| Main languages: | French |
| Population: | 27.66 million (2022 estimate) |
| Monetary unit: | West African CFA Franc (XOF) |
| Internet domain: | .ci |
| Int. dialling code: | +225 |

## KEY TAX POINTS

- The standard corporate tax rate is 25% while a 30% rate applies to companies operating in the telecom, information technology and communication sector.
- VAT is levied only in respect of business activities that are carried on Ivory Coast territory at a standard rate of 18%.
- Withholding tax on dividends paid to non-resident companies is levied at 10% at the level of listed companies. The rate is 15% for dividends derived from profits which are exempt from CIT and any other distributions.
- The standard withholding tax rate on interest paid to non-resident companies is 18%.
- Royalties, technical assistance fees and management fees paid to non-resident companies are subject to the tax on non-commercial profits by way of a final withholding tax at the rate of 25% of 80% of the gross amount of the royalties, resulting in an effective tax rate of 20%.

## A. TAXES PAYABLE

## COMPANY TAX

An entity incorporated in Ivory Coast is considered a resident for tax purposes and subject to tax on income from movable capital on a worldwide basis. Permanent establishments of non-resident entities are subject to tax in the same way as resident companies.

The standard corporate tax rate is 25% while a 30% rate applies to telecom companies.

In case of losses, an alternative minimum tax of 0.5% is levied based on total turnover, with a minimum tax of XOF 3 million and a maximum tax of XOF 35 million. The minimum tax is due for a financial year when the amount of tax on profits for that financial year is lower. The alternative minimum tax was suspended from 1 January until 31 December 2020 (2020 Finance Law).

New businesses are exempt from the alternative minimum tax for their first accounting period.

**Summary table of the new regimes as of 8 January 2021 from the General Tax Directorate**

- Entrepreneur's regime (ER): companies (individuals or legal entities) with a turnover between 0 and 50,000,000 FCFA;
- Microenterprise regime (RME): companies (individuals or legal entities) with a turnover between 50,000,001 and 200,000,000 FCFA;
- Simplified Real Tax System (RSI): companies (individuals or legal entities) whose turnover is between 200,000,001 and 500,000,000 FCFA;
- Normal Income Tax regime (RNI): companies (individuals or legal entities) whose turnover is between 500,000,001 and 1,000,000,000 FCFA.

## CAPITAL GAINS TAX

Capital gains are included in ordinary income and subject to corporate income tax at the standard rate.

## BRANCH PROFITS TAX

Branches of foreign companies are subject to the same tax rate as domestic companies. Additionally, fifty percent of branch profits are deemed to be remitted and taxed at 15% giving rise to a 7.5% effective branch remittance tax, regardless of whether there is an actual remittance of funds.

## VALUE ADDED TAX (VAT)

Value added tax (VAT) is levied on transactions carried out in Ivory Coast by individuals or companies who, either regularly or occasionally, purchase goods for resale or render services, other than as employees or farming workers.

VAT is levied only in respect of business activities that are carried on Ivory Coast territory at a standard rate of 18%. This rate is reduced to 9% for certain products like milk, pasta made from 100% durum wheat semolina, solar energy production equipment and petroleum products.

## B. DETERMINATION OF TAXABLE INCOME

Taxable income comprises the company's business profits, including capital gains realised on the transfer of business assets, but excluding exempt income.

For business accounting purposes, Ivory Coast has, like other OHADA member states, adopted since January 2001 the OHADA accounting system provided for by the OHADA Uniform Act Relating to Accounting *(Acte uniforme relatif au droit comptable et à l'information financière)*. Under this act, companies operating in Ivory Coast are obliged to keep their local accounts and to prepare their domestic corporate income tax returns according to the OHADA accounting system.

I

## DISALLOWED EXPENSES

As a general rule, expenses not directly connected to the taxable business activities carried on in Ivory Coast are not deductible for the purpose of computing taxable income.

## DEPRECIATION

Depreciation for tax purposes is calculated based on the normal useful life of the asset and three depreciation methods are allowed: the straight-line method, the declining-balance method and the accelerated depreciation method.

Land and goodwill may not be depreciated.

The straight-line method of depreciation is the most commonly used method.

| Asset | Rate (%) |
|---|---|
| Buildings for use for commercial, agricultural and handicraft activities | 5 |
| Lightweight constructions | 10 |
| Plant and machinery | 20 |
| Computer hardware and software | 50 |
| Office furniture and equipment | 10 |
| Transport equipment | 33.33 |
| Other vehicles and special vehicles | 20 to 25 |
| Set-up costs | 50 |

## INTEREST DEDUCTIONS

There is no specific thin capitalisation rule. However, interest paid by a company to its shareholders is deductible only when the following conditions are met:

- The total amount of money made available to the company by all of the shareholders or partners must not exceed the total amount of the company's share capital;
- The loan is to be reimbursed within 5 years;
- The company is not under a liquidation procedure during the same period;
- The amount of interest paid must not exceed 30% of the company's profits before deduction of tax, interest, amortisation on fixed assets and provisions; and
- The interest rate does not exceed the Central Bank of West African States (BCEAO) interest rate by more than 2 percentage points.

## LOSSES

Losses may generally be carried forward for up to 5 years. Loss carry-back is not allowed.

## C. FOREIGN TAX RELIEF

There is no foreign tax credit available, unless an applicable double tax treaty provides otherwise.

## D. CORPORATE GROUPS

Every company of a group is taxed separately. Tax consolidation is not allowed, except in the limited case of certain mergers involving holding companies.

Transfer of losses within a group is subject to prior approval of the Director General of Taxes.

## E. PERSONAL TAX

Resident individuals are taxed on income from sources from Ivory Coast and foreign sources. Non-residents are taxable only on income from sources in Ivory Coast.

IGR *(impôt general sur le revenue*/general income tax*)* applies according to the graduated scale rates below.

| Taxable income (XOF) | Tax rate (%) |
|---|---|
| 1,000 – 2,200,000 | 2 |
| 2,200,001 – 3,600,000 | 10 |
| 3,600,001 – 5,200,000 | 15 |
| 5,200,001 – 7,200,000 | 20 |
| 7,200,001 – 9,600,000 | 24 |
| 9,600,001 – 12,600,00 | 26 |
| 12,600,001 – 20,000,000 | 29 |
| 20,000,001 – 30,000,000 | 32 |
| 30,000,001 – 40,000,000 | 34 |
| 40,000,001 – 50,000,000 | 35 |
| Over 50,000,000 | 36 |

## F. TREATY AND NON-TREATY WITHHOLDING TAX RATES

| | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| **Non-treaty countries** | | | |
| Companies | 10/15 | 1/2/5/8.25/10/16.5/18[3] | 20 |
| Individuals | 10/15 | 0/1/2/5/10/13.5/18[4] | 20 |
| **Treaty countries:** | | | |
| Belgium | 15/18[1] | 16 | 10 |
| Canada | 15/18[1] | 15 | 10 |
| France | 15/18[1] | 15 | 10 |
| Germany | 15 | 15 | 10 |
| Italy | 15/18[1] | 15 | 10 |
| Morocco | 10 | 10 | 10 |
| Norway | 15 | 16 | 10 |
| Portugal | 10 | 10 | 5 |
| Switzerland | 15 | 15 | 10 |
| Tunisia | 10 | 10 | 10 |
| United Kingdom | 15/18[1] | 15 | 10 |
| WAEMU[2] | 10 | 15 | 15 |

Notes:

1. An 18% rate applies to dividends paid by a company resident in Ivory Coast, which is exempt from tax on profits or which is not subject to tax under general law.
2. West African Economic and Monetary Union (French acronym: UEMOA): member countries of the WEAMU are Benin, Burkina Faso, Guinea-Bissau, Ivory Coast, Mali, Niger, Senegal and Togo.
3. Gross interest derived by non-resident companies is subject to a final withholding tax at varying rates from 1% to 18%, depending on the nature of the interest: 5% and 10% for interest on Treasury bonds; 2% for bonds and ancillary income with a maturity period equal to or over 5 years; 1%, 5%, 10% and 16,5% for interest on insurance contracts; 16.5% for interest paid on current bank accounts; 8.25% on interest paid to foreign financial institutions on loans (the minimum maturity of which is 3 years) intended to finance the acquisition of equipment and by holding companies to foreign financial institutions on loans intended to finance the acquisition of participations; 18% for other interest.
4. Gross interest derived by non-resident individuals is subject to a final withholding tax at varying rates from 0% to 18%, depending on the nature of the interest.

## BASIC FACTS

| | |
|---|---|
| Full name: | Jamaica |
| Capital: | Kingston |
| Main languages: | English, Jamaica Patois |
| Population: | 2.98 million (2022 estimate) |
| Monetary unit: | Jamaican Dollar (JMD) |
| Internet domain: | .jm |
| Int. dialling code: | +1 876 |

## KEY TAX POINTS

- Jamaican resident companies are liable for income tax on all sources of non-exempt income wherever arising.
- A non-resident company is taxed on income of a branch carrying on a trade or business in Jamaica, i.e. the income arises in Jamaica.
- The tax year of 'year of assessment' is a period of twelve months commencing on 1st January in each year.
- There is no income tax on capital gains secured on the disposal of capital assets. However, there is a transfer tax of 2% of gross consideration or market value when title passes. This 2% rate of transfer tax is effective from 1st April 2019.
- Branches of non-resident corporations or companies doing business in Jamaica are taxed on the profits arising in Jamaica. The income tax rate is 25% for an unregulated entity and 331/3% for a regulated entity.
- General Consumption Tax (GCT) is generally imposed at the standard rate on the supply of goods or services in Jamaica by a 'registered taxpayer' and on the importation of goods or services by any person for consumption in Jamaica. The standard rate of GCT was reduced from 16.5% to 15% effective 1st April 2020.
- The chargeable income of a company is determined by deducting all non-capital disbursement and expenses wholly and exclusively incurred in acquiring the income from all taxable income brought into charge. Domestic and private expenses are not allowable deductions.
- There are no exchange controls in Jamaica at this time.
- Personal Tax: An individual who is resident, ordinarily resident and domiciled in Jamaica is subject to income tax on his worldwide income as it arises. Non-residents are subject to tax on income arising from Jamaica. Income is taxed at a zero rate for the first threshold of JMD 1,500,096 (as from 1 April 2017) and then income above the threshold but below JMD 6,000,000 is taxed at 25% and income in excess of JMD 6,000,000 is taxed at 30%.

## A. TAXES PAYABLE

### COMPANY TAX

Jamaican resident companies are liable for income tax on all sources of non-exempt income wherever arising. A company is regarded as resident in Jamaica if its central management and control is located and exercised in Jamaica. A non-resident company is taxed on income of a branch carrying on a trade or business in Jamaica, i.e. the income that arises in Jamaica.

The tax year or 'year of assessment' is a period of twelve (12) months commencing on 1st January in each year. Companies are assessed to income tax on their income which arises in the basis period and this normally coincides with the year of assessment. Where the company usually makes up its accounts for a period other than the calendar year, the Commissioner General, Tax Administration Jamaica, will allow this period to be substituted for the calendar year, once an application has been submitted for approval of said change in accounting date.

The company is required to submit its Annual Return of Income and Tax Payable by 15th March of the year following the year of assessment for which the tax return is being prepared and to pay any balance of tax due by that date. The company is also required to submit an Annual Declaration of Estimated Income and Tax Payable for the current year by 15th March of the current year, based on the results of the preceding year. Payment of estimated tax is due in four (4) equal instalments on 15th March, 15th June, 15th September and 15th December of the current year.

An amendment to Corporate Income Tax became effective 1 January 2013. The corporate income tax rate structure was modified as follows:

a) Tax charge for regulated companies is 33 1/3%,
b) Tax charge for unregulated companies is 25%;
c) Building Societies special rate is 30%;
d) Life Insurance Companies is 15%.

The regulated companies include those companies regulated by:

- Financial Services Commission (FSC);
- Office of Utilities Regulations (OUR);
- Bank of Jamaica (BOJ) and
- Ministry of Finance and Planning (MOFP).

### ASSET TAX

Specified Regulated Entities which are limited deposit-taking institutions regulated by the Bank of Jamaica (BOJ) and Securities Dealers and insurance companies regulated by the Financial Services Commission are the only entities required to file and pay Assets Tax with effect from March 2019.

For year of assessment 2021, the assets tax payable by financial institutions, namely banks and insurance companies will be reduced by 50% from 0.25% to 0.125%

The filing date for the Annual Declaration of Assets for a company is 15th March of the same year based on the assets in the Financial Statements for the previous accounting year.

Effective from the year of assessment 2013, Asset Tax is not an allowable deduction under the Income Tax Act.

## CAPITAL GAINS TAX TRANSFER TAX AND STAMP DUTY

There is no capital gains tax on capital gains secured on the disposal of capital assets.

However, there is a transfer tax at the rate of 2% of gross consideration or market value when title passes. Transfer Tax is computed on the market value of certain property at the rate of Transfer Tax in effect at the date of the document.

Effective 1 April 2019, the transfer tax or estate tax payable at death was simplified and the rate reduced as follows:

(i) The first JMD 10 million value of the estate – no transfer tax or estate tax payable.

(ii) The transfer tax payable is 1.5% of the remaining value of the estate over JMD 10 million including real property and shares, less deductions and expenses incurred.

(iii) Beneficiaries will be able to utilise the equity in inherited property to leverage economic opportunities.

Stamp duty was also reformed from 1 April 2019. Ad valorem stamp duty at a flat rate of JMD 100 and JMD 5,000 respectively per document/parcel related to transactions valued below JMD 500,000 and above JMD 500,000 or more respectively will be payable.

The proposed changes are expected to provide tax certainty and allow for further simplification of the tax structure.

## BRANCH PROFITS TAX

Branches of non-resident corporations or companies doing business in Jamaica are taxed on the profits arising in Jamaica. Branch income is taxed at the same rate as that of local corporations and on a similar basis (at 25% for unregulated entities and at 33 1/3% for regulated entities). The transfer of profits to the head office is subject to a 33 1/3% withholding tax (branch remittance tax) or to a lower treaty rate, where applicable.

## GENERAL CONSUMPTION TAX (GCT)

General Consumption Tax (GCT), which is a value added tax, is generally imposed at the standard rate on the supply in Jamaica of goods or services by a ‘registered taxpayer’ and on the importation of goods or services by any person for consumption in Jamaica. A large number of goods and services are zero rated, which means that the supplier does not charge GCT on the supply but may credit GCT on incoming supplies against the tax chargeable on non-zero-rated supplies he makes. A number of goods and services are GCT exempt which means no GCT is chargeable thereon. Certain goods are subject to special consumption tax (SCT) and not GCT. This is levied on the manufacture for sale in Jamaica and the import into Jamaica of prescribed goods such as petroleum products, cigarettes, spirits and beer.

The standard rate of GCT was reduced from 16.5% to 15% effective 1st April 2020.

The GCT threshold which is the level of income required for registration as a Registered Taxpayer for GCT purposes was increased from JMD 3 million to JMD 10 million effective 1 April 2019. However, businesses with income less than JMD 10 Million may opt for voluntary registration and re-register as a Registered Taxpayer.

## LOCAL PAYROLL TAXES:

## NATIONAL INSURANCE (NIS)

Effective 1 April 2022, the National Insurance (NIS) contribution rate will remain at 6% but the salary ceiling will almost double from JMD 3,000,000 to JMD 5,000,000 annually. This equates to a maximum NIS contribution of JMD 270,000 for 2022 for the employee and employer. This is contributed as follows for 2022:

- Contribution by employee – January to March 2022 – 3.00% - JMD 37,500;
- Contribution by employee – April to December 2022 – 3.00% - JMD 112,500;
- Contribution by employee for the year JMD 150,000;
- Contribution by employer for the year JMD 150,000.

The maximum monthly and weekly contributions from 1 April 2022 are JMD 12,500 and JMD 2,884.62 respectively by employees and this is matched by the employer.

Self-employed persons are required to contribute 6.0% of their taxable income for income tax purposes, restricted to a maximum income of JMD 4,500,000 for 2022, which equates to a maximum annual NIS contribution of JMD 270,000.

This compulsory deduction is made both by the employee and employer and goes towards the provision of a pension at age 65 for women and men who have retired. However, if still employed, women and men are required to contribute to NIS up to age 70.

## NATIONAL HOUSING TRUST (NHT)

National Housing Trust (NHT) is payable by the employee at a rate of 2% and by the employer at a rate of 3% of taxable emoluments. The contributions together with any accrued bonus or interest are refundable to the contributor on an annual basis after seven years and fully on retirement. Note that the expatriate employee is refunded the full sum whenever he/she leaves the island. Self-employed persons contribute NHT at a rate of 3% of chargeable income. NHT contributions cease when persons attain 65 years of age.

## EDUCATION TAX

Education Tax is payable by the employee at a rate of 2.25% and by the employer at a rate of 3.50% of taxable emoluments. Contributions continue until age 65 years (men and women). Education Tax contributions are not refundable. Self-employed persons pay education tax at a rate of 2.25% of chargeable income. There is no age limit for self-employed persons. Education tax is not payable on interest, dividends and pension income.

## PAYE AS YOU EARN (PAYE)

Effective 1 April 2017, emoluments are taxed at a zero rate for the first threshold of JMD 1,500,096 and then income above the threshold but below JMD 6,000,000 is taxed at 25% and income in excess of JMD 6,000,000 is taxed at 30%.

## EMPLOYMENT TAX CREDIT

Where a company or self-employed person has employees and pays the monthly statutory deductions by the due date, the company or self-employed person is able to claim Employment Tax Credit (ETC), thereby reducing their income tax liability. All of the five statutory deductions namely PAYE, Education Tax, National Housing Trust, National Insurance and HEART must be filed and paid on time in order to claim this credit. However, the PAYE deduction is to be excluded when computing the ETC that is claimable. The ETC claimable is the lower of 30% of the computed tax charge (in respect of the trade income) or the total statutory deductions paid. This could result in an effective tax rate of 17.5%. In addition, the self-employed person must have also paid his/her estimated income tax and statutory deductions for the tax year in which the ETC is to be claimed on time, in order to be eligible to claim the ETC.

## MSME TAX CREDIT

The Micro, Small and Medium-sized Entities (MSME) tax credit is a non-refundable corporate tax credit (CTC) in the amount of JMD 375,000, available to companies both regulated and unregulated, with annual gross sales/revenues of JMD 500 million or less, who file their income tax returns. This is effective from year of assessment 2020 irrespective of the start of the accounting period used by the company.

Taxpayers who are eligible for the corporate income tax credit will also be able to benefit from the Employment Tax Credit (ETC) provided that the conditions for claiming ETC are met. However, the CTC should be claimed before the ETC.

The following companies are not eligible to benefit from the Corporate Tax Credit:

- Building Societies and Societies registered under the Industrial and Provident Societies Act;
- A body corporate which has been declared by order of the Minister under section 4 or 7 of the Urban Renewal (Tax Relief) Act to be an approved developer or an approved organisation;
- A body corporate who is a developer or occupant who is entitled to benefit from the tax incentives and reliefs in the First Schedule to the Special Economic Zones Act;
- A body corporate that has been declared by order of the Minister under section 2 of the Bauxite and Alumina Industries (Encouragement) Act to be a recognised bauxite producer or recognised alumina producer or both as the case may be;
- A company listed on the Junior Stock Exchange and benefiting from the incentives in the Seventh Schedule of the Income Tax Act.

It is important to note that:

i. Any amount of Corporate Tax Credit that is not utilised in any year of assessment may not be credited against tax payable in any other year of assessment and cannot be the subject of a refund;

ii. A body corporate shall not defer trading income which ought to be accounted for to another year of assessment which effectively reduces the gross income to an amount of JMD 500 million or less;

iii. A body corporate shall not transfer sales revenue to a connected party which ought to be accounted for by the first body corporate where the effect of such transactions is to reduce the gross income to an amount which meets the prescribed threshold to be eligible for the corporate tax credit;

iv. Where the Commissioner General of Tax Administration Jamaica (TAJ) makes such a determination with regards to the transactions in (ii) and (iii) above, such deferred or transferred revenue will be deemed to be the revenue of the first body corporate in the year of transfer or deferral;

v. Where a body corporate is entitled to claim both the ETC and Corporate Tax Credit in any year of assessment, the Corporate Tax Credit is to be applied against the income tax liability before the ETC.

## OTHER TAXES

Custom fees and excise and stamp duties are imposed on imported goods.

Property tax is payable on the unimproved value basis of property. Property tax rates were revised on 1 April 2017 and start at JMD 1,000 for unimproved values up to JMD 400,000 for values determined by different rates applicable to values in bands of increasing values.

The Construction Industry and Tillage are subject to a contractor's levy of 2% of the contract price, and it is withheld from payments to contractors and paid to the Revenue Authority. The levy is treated as payment on account of income tax liability of the contractor. However, if the contractor has no final income tax liability or a lesser income tax liability, the excess of the levy over the income tax liability is not refundable nor can it be used to offset against any tax liability. It is treated as an additional tax liability.

## B. DETERMINATION OF TAXABLE INCOME

The chargeable income of taxpayers is determined by deducting all non-capital disbursements and expenses wholly and exclusively incurred in acquiring the income from all taxable income brought into charge. Domestic and private expenses are not allowable. Special deductions may include capital allowances.

## NEW CAPITAL ALLOWANCES REGIME (1 JANUARY 2014)

As a part of the income tax reform, the capital allowances regime has been standardised and streamlined. This will include:

- The discontinuance of the various incentives embedded therein e.g. investment allowances and accelerated tax depreciation to agriculture and manufacturing sectors;
- Providing allowances to certain categories of capital expenditure not currently covered;
- Providing greater alignment between the useful economic life of various categories of assets and their write-off periods for tax purposes;

- Allowing capital expenditure to be written-off using the straight-line method;
- Standardising the application of the regime across sectors and facilitating enhanced administration of the same.

**General Rule:**

Capital expenditure (on specified assets) incurred on or after January 1, 2014 will be written-off in accordance with the new capital allowance regime as outlined below. All capital expenditure incurred on or after January 1, 2014 will be written-off using the straight line method. Capital expenditure incurred prior to January 1, 2014 will continue to be written-off for income tax purposes in accordance with the rules existing prior to January 1, 2014, as if there were no changes.

Capital allowances are granted for depreciation of equipment, plant and machinery and other assets used in the business at the following rates using the straight-line method:

- Plant, machinery and equipment:
  a) First year allowance (initial allowance) – 25% for machinery directly used in the production of primary products or in the manufacture of goods or automated packaging of primary products or goods;
  b) Annual allowance – 12.5%.
- Automatic Data Processing Equipment:
  a) First year allowance – 25%;
  b) Annual Allowance – 20%.
- Telecommunication Equipment:
  a) First year allowance – nil;
  b) Annual Allowance – 20%.
- Other plant, machinery and equipment:
  a) First year allowance – nil;
  b) Annual Allowance – 12.5%.
- Private motor vehicles:
  a) First year allowance – nil;
  b) Annual allowance – 12.5% (restricted on a cap of USD 35,000).
- Trade vehicles:
  a) First year allowance – nil;
  b) Annual allowance – 20% of cost (straight-line).
- Industrial buildings:
  a) First year allowance – 20% of cost; this allowance will be allowed only if the building is brought into use as an industrial building during the first four (4) years of assessment.
  b) Annual allowance – 4%, 10%, or 12.5% dependent on type of construction and whether housing machinery.
- Other commercial buildings:
  a) First year allowance – nil;
  b) Annual allowance – 4%, 10%, or 12.5% dependent on type of construction and whether housing machinery.

## CAPITAL GAINS AND LOSSES

See discussion above.

## DIVIDENDS

In addition to the income tax on the company's profits, any distribution or dividends are taxable.

As of 1 July 2009, dividends payable by resident unlisted companies to non-resident shareholders (individual and companies) are subject to tax at rates appropriate to them and the companies making such distributions are required to deduct tax due and account for it to Tax Administration Jamaica. The rate of tax payable on preference dividends is at the rate of tax applicable to the recipient preference shareholder as at the date of the receipt of said income. As of 1 April 2013, the rate of tax payable on dividends to Jamaican resident individuals and companies by Jamaican resident companies is 15%. This withholding tax is a final tax except for an approved superannuation fund or retirement scheme, registered charitable organizations, pensioners or persons over sixty five (65) years of age. The rate of withholding tax is modified if distributions are made to residents of double tax treaty countries. The negotiated rates provided in the relevant articles are applicable.

Dividends and distributions paid out of profits which are relieved or exempt from tax by virtue of incentive legislation, would not be subject to tax unless they are in fact taxable in the country of the taxpayer's residence.

Capital distribution or capital dividends are not subject to income tax but are, however, subject to transfer tax at a rate of 2% with effect from 1st April 2019.

## INTEREST DEDUCTIONS

Interest paid upon any money borrowed on capital employed in acquiring the income is tax deductible. There are no thin capitalization provisions in Jamaica.

## TRADE LOSS RELIEF

There are changes in loss relief and the way a trade loss can be utilised. The position is as follows:

a) Tax losses can be carried forward for any number of years, however
b) Effective from the year of assessment 2014, tax losses carried forward will be restricted for relief against current year taxable profits of up to 50% of taxable profit (excluding the loss).

This 50% limit will not apply:

a) For the first five (5) years after a business commences trading. The Commissioner General of Tax Administration Jamaica (TAJ) will determine when it is a business commences trading and the relief available.

b) Where the taxpayer's gross revenue from all sources for the year is equal to or less than JMD 10 million.

## FOREIGN SOURCE INCOME

Where the company is resident in Jamaica, i.e. its central management and control is situated in Jamaica, the income of such company wherever it arises is subject to tax in Jamaica. This includes:

a) Branch or agency profits from businesses earned outside Jamaica;

b) Dividend, interest, royalties and rents earned outside Jamaica.

## C. FOREIGN TAX RELIEF

Unilateral relief by the credit method is granted to residents and non-residents against income tax payable in Jamaica on any income which is also subject to Commonwealth income tax. For residents of Jamaica, the maximum credit is one-half of the Jamaican income tax rate, i.e. 12.5% in the case of corporations and individuals.

If the Commonwealth income tax rate on the income concerned does not exceed half the Jamaican rate (12.5%), full relief is granted for the Commonwealth tax. Jamaican residents who are liable to pay Jamaican tax on income in respect of which United Kingdom tax is also payable are entitled to relief equal to the amount by which Jamaica tax exceeds half the rate of United Kingdom tax payable. If the Jamaican rate exceeds the United Kingdom rate, the relief is equal to half of the United Kingdom rate.

Unilateral relief is generally provided by way of deduction for taxes payable in other overseas territories.

Where a claim for double taxation relief is made under a treaty, the Jamaican income tax is reduced by the appropriate amount of the credit for foreign tax. The credit may not exceed tax at the Jamaican rate on the income concerned computed under Jamaican income tax principles, before any allowance of credit.

## D. CORPORATE GROUPS

Tax liability in a group basis is not permissible. The liability of each company within the group is determined separately.

J

## E. RELATED PARTY TRANSACTIONS

**Transfer pricing**

With effect from 1 January 2016, transfer pricing (TP) rules are applicable in Jamaica. The applicable TP methods closely follow the OECD guidelines on TP. Related party transactions which are carried out for considerations not at arm's length, intended to secure a benefit or tax advantage or to reduce the tax payable, are counteracted by the Commissioner General of TAJ, taking appropriate actions to negate this advantage.

When filing an income tax return, the taxpayer must certify whether to his knowledge the information and accounts on which the return is based contains particulars of any connected party transactions, and must fully disclose those particulars, if any. Failure to provide this certification on the return or to fully disclose the required particulars may result in prosecutions with a maximum JMD 2 million fine or twelve (12) months imprisonment. This will apply to income tax returns as from assessment year 2016.

There are TP documentation regulations which only apply to companies with gross annual turnover of JMD 500 million or more in the previous year of assessment. These companies are required to keep exhaustive TP documentation and to present them to the Commissioner General, upon request. The documentation comprises: an overview of the company's business operations and an organizational chart, details of all connected party transactions performed, along with an analysis of the factors used in identifying comparable independent transactions, justification of choice of a particular TP method, a description of tests done and the process used to identify the comparable independent transactions relied upon, details of any industry or economic analysis done by the company to arrive at the TP, and a conclusion as to whether the conditions of the connected party transactions were consistent with an arm's length consideration, along with details of any adjustments that were required to guarantee compliance.

The taxpayer may also enter into an Advanced Pricing Agreement (APA) with the revenue authorities.

**Controlled Foreign Companies (CFC)**

There are no CFC regulations in Jamaica.

## F. WITHHOLDING TAX

**Withholding tax on Specified Services became effective 1 September 2015**

The Tax Administration Jamaica and the Ministry of Finance introduced a 3% Withholding Tax on specified services on 1 September, 2015. At its implementation, the tax will be withheld from Specified Services by Tax Withholding Agents (TWA). The Specified Services include: • Accounting; • Auditing; • Catering; • Consultancy; • Decorating; • Engineering (Architectural, electrical, mechanical and structural); • Entertainment; • Information technology; • Janitorial; • Laundry; • Landscaping; • Legal; • Management; • Repairs and maintenance; • The rental or leasing of motor vehicles or equipment; • Transportation, haulage or tours; and • Any other services specified by the Minister by order published in the Gazette.

The TWAs who are required to withhold the tax when making payments to service providers are:

- All Ministries of Government.
- An Executive Agency, an agency or a department of Government.
- All Statutory Bodies or Authorities.
- Financial institutions regulated by the Bank of Jamaica (BOJ) and the Financial Services Commission (FSC).
- Tourism operators.
- Utility companies that have annual gross revenue of JMD 500,000,000 and over.

- Cable companies that have annual gross revenue of JMD 500,000,000 and over.
- The Council of the Kingston and St. Andrew Corporation.
- Any person with annual gross revenue exceeding five hundred million dollars (JMD 500,000,000), including any entity with such revenue that is exempt from the payment of income tax.

The service provider is eligible for a credit or refund in respect of the tax withheld. The service provider can claim a credit or refund against their quarterly estimated obligations or final annual return as is applicable.

**Payments to non-residents**

Dividends, interest, royalties, management, technical and consultancy fees are subject to withholding tax at the rate of 33 1/3% for corporations or 25% for individuals. Income comprising insurance premiums that are not paid to an insurance company, broker or agent resident in Jamaica and registered with the Financial Services Commission is subject to withholding tax at the rate of 15%. Effective 1st January 2013, all other payments are subject to withholding tax at the rate of 25%.

## G. EXCHANGE CONTROL

There are no exchange controls in Jamaica at this time.

## H. PERSONAL TAX

An individual who is resident, ordinarily resident and domiciled in Jamaica is subject to income tax on his worldwide income as it arises. Non-residents are subject to income tax on income arising from Jamaica.

Residence is determined by physical presence in Jamaica for period of 183 days or six (6) months. Regular visits of substantial periods may make such visitor a resident, even though the stay is less than six (6) months.

Broadly, an individual is domiciled in the country or state which he regards as his permanent home. He acquires a domicile of origin at birth, normally that of his father and retains it until he acquires a new domicile of choice. To acquire a domicile of choice, a person must sever his ties with his domicile of origin and settle in another country with the clear intention of making it his permanent home. A commonwealth citizen not ordinarily resident in Jamaica or any resident not domiciled in Jamaica is taxed on unearned income only to the extent that is remitted to Jamaica.

The Pay-As-You-Earn (PAYE) system of collection is in operation. The employers, who act as agents for the Commissioner General, Tax Administration Jamaica, deduct income tax from salaries, wages and other emoluments of employees and account for the tax so deducted by the 14th day of the month following the month for which the deduction was made. Failure to do so will result in the employer being charged interest at a rate of 17% per annum and penalty at a rate of 50% from the day after the due date to the date of payment on the sum payable.

Self-employed individuals pay their taxes in advance by four quarterly instalments based either on the chargeable income of the previous year or their estimated chargeable income of the current year. The instalments are due on 15th March, 15th June, 15th September and 15th December. Any balance of tax is payable on filing of the final returns on the following 15th March after the year of assessment for which the return is due. Individuals who are suffering from a disabling permanent physical handicap or a disabling permanent mental handicap but are capable of being gainfully employed may apply to TAJ for an exemption of emoluments.

As of 1 January 2013, there is also a pension exemption of JMD 80,000 for pension received from either a statutory pension scheme or an approved retirement scheme. Further, there is an age exemption of JMD 80,000 for an individual who attained the age of 65 at any time during the year of assessment for which the return is being made.

Personal income tax shall be levied and paid for each year of assessment at the following rates:

- For the first JMD 1,500,096 (as from 1 April 2017) = Nil;
- Between JMD 1,500,096 and JMD 6,000,000 = 25%;
- Exceeding JMD 6,000,000 = 30%.

## I. TREATY AND NON-TREATY WITHHOLDING TAX RATES

| | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| **Non-treaty countries** | | | |
| Companies | 33 1/3 | 33 1/3 | 33 1/3 |
| Individuals | 25 | 25 | 25 |
| **Treaty countries** | | | |
| Canada | 22.5/15[3] | 15 | 10 |
| CARICOM[1] | Nil | 15 | 15 |
| China | 5 | 7.5 | 10 |
| Denmark | 15/10[4] | 12.5 | 10 |
| France | 15/10[5] | 10 | 10 |
| Germany | 15/10[6] | 10[12]/12.5 | 10 |
| Israel | 22.5/15[5] | 15 | 10 |
| Japan[2] | 10/5[7] | 10 | 2/10[13] |
| Mexico | 10/5[8] | 10 | 10 |
| Norway | 15 | 12.5 | 10 |
| Spain | 10/5[8] | 10 | 10 |

| | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| Sweden | 22.5/10[9] | 12.5 | 10 |
| Switzerland | 15/105 | 10 | 10 |
| United Kingdom | 15/22.5[10] | 12.5 | 10 |
| United States | 15/10[11] | 12.5 | 10 |

Notes:

1. Treaty negotiated with CARICOM countries but only Trinidad and Tobago, Belize, Jamaica, St Lucia, Barbados, Dominica, Grenada, St. Kitts & Nevis and Guyana have ratified. Benefits apply only to these countries.
2. Effective date: 1 January 2021.
3. The 22.5% rate applies if the beneficial owner is (i) a company which is a resident of Canada which controls directly or indirectly at least 10% of the voting power of the dividend-paying company or (ii) a company which is a resident of Canada provided that the dividend-paying company qualifies under the tax law of Canada as a foreign affiliate thereof. The 15% rate applies in all other cases.
4. The 10% reduced rate applies if the beneficial owner is a company (other than a partnership) which holds directly or indirectly at least 25% of the capital or of the voting power, as the case may be, of the dividend-paying company.
5. The reduced rate applies if the beneficial owner is a company (other than a partnership) which holds directly or indirectly at least 10% of the voting power of the dividend-paying company.
6. The 10% reduced rate applies if the recipient is a company (other than a partnership) which owns directly at least 25% of the shares of the dividend-paying company.
7. The 5% reduced rate applies if the beneficial owner is a company which has owned directly or indirectly, throughout a 365-day period that includes the date on which entitlement to the dividends is determined (for the purpose of computing that period, no account shall be taken of changes of ownership that would directly result from a corporate reorganisation, such as a merger or divisive reorganisation, of the company that is the beneficial owner of the dividends or that pays the dividends), at least 20% of, in the case where the company paying the dividends is a resident of Jamaica, the capital or voting power of that company.
8. The 5% reduced rate applies if the beneficial owner is a company (other than a partnership) which holds directly or indirectly at least 25% of the capital of the dividend-paying company.
9. The 10% reduced rate applies if the beneficial owner is a company (other than a partnership) which holds directly or indirectly at least 25% of the voting power of the dividend-paying company.
10. The 22.5% rate applies if the beneficial owner is a company and it controls directly or indirectly at least 10% of the voting power of the dividend-paying company. The 15% rate applies in all other cases.
11. The 10% reduced rate applies if the beneficial owner is a company (other than a partnership) which owns, directly or indirectly, at least 10% of the voting stock of the dividend-paying company.
12. The 10% reduced rate applies if the interest is received by a bank, recognised as a banking institution under the laws of Germany.
13. The 2% reduced rate applies to royalties for the use of, or the right to use, industrial, commercial or scientific equipment.

### KEY TAX POINTS

- Domestic corporations, whose head or main office is located in Japan are subject to tax on their worldwide income.
- Foreign corporations are subject to either corporation tax or final withholding tax on Japanese source income depending on the type of income and the extent of the foreign corporation's activities in Japan.
- Vendors are liable for a consumption tax (value added tax) at a rate of 10% on sales (8% on sales of certain foods/beverages and newspapers), including imports of goods and services.
- Relief of double taxation is available for foreign taxes on certain foreign-sourced income.

- Under the group tax relief regime, which replaces the consolidated tax regime and is introduced from fiscal years starting on or after 1 April 2022, an affiliated group of companies (‘Group Corporations’) can calculate corporate income tax as if they are consolidated.
- All transactions between related companies are required to be conducted on an arm’s length basis.
- Domestic corporations are subject to withholding tax on dividends, interest and certain other income. Foreign corporations are subject to withholding tax on dividends, interest, royalties, income from immovable property, rentals from industrial or commercial equipment, and certain other income.
- Non-resident individual taxpayers are taxed on their Japanese source income only. Non-permanent resident individual taxpayers are taxed on income other than foreign-sourced income defined under Japanese income tax law plus the part of foreign-sourced income that is paid in and/or remitted to Japan. Permanent resident individual taxpayers are taxed on their worldwide income.

## A. TAXES PAYABLE

### COMPANY TAX

Domestic corporations are those whose head or main office is located in Japan. Companies incorporated in Japan under the Corporate Law or under other special laws are required to locate their head office in Japan. Such domestic corporations are subject to tax on their worldwide income. Foreign corporations are all corporations which are not domestic corporations. A corporation having its head or main office outside Japan is a foreign corporation even if its business operations are conducted in Japan. Foreign corporations are subject to either corporation tax or final withholding tax on Japanese source income, depending on the type of income and the extent of the foreign corporation’s activities in Japan.

The rate of national tax for Japanese corporations is 23.2%. If the paid-in capital of the corporation is JPY 100 million or less, the first JPY 8 million of income is only taxed at 15% unless the Japanese corporation is a subsidiary of a large scale company. In addition, ‘local corporate tax’ at a rate of 10.3% of the corporation tax is imposed as a national tax. Tax is imposed on a current year basis. The tax year adopted is generally the one specified in a company’s constituent documents with a standard year being a calendar year. However, it should be noted that other periods are also allowed, including periods of 12 months or less. Japanese branches of foreign corporations are required to adopt the accounting period used by their foreign head office. Final tax is payable when lodging the final corporation tax return, usually required within two months of the end of the accounting period. Extensions of time to lodge can be sought although interest is payable on any tax liability which is not settled by the original submission due date.

Interim tax returns and payments are required if a corporation has a fiscal period longer than six months. Ordinarily, provisional taxes are computed as one half of the tax liability of the previous year but a reduction is available where the interim tax returns are filed to reflect bi-annual results of operations for the current year.

### BLUE RETURN FILERS

Preferential tax treatment is given to companies that file ‘Blue Returns’. A company that commits to maintain specified bookkeeping records and documentation and gains approval from the Director of the District Tax Office to file a Blue Return, has the following major associated benefits.

- Tax losses may be carried forward for ten years (however, for large scale companies the use of the losses is generally restricted to 50% of taxable income) or carried back to the previous year. However, carry-back of tax loss is generally suspended except for companies with paid-in capital of JPY 100 million or less (except for a subsidiary of a large scale company).
- The national tax authorities cannot seek to adjust taxable income without a physical review of the books and records of the company and must state the reason for such an adjustment.
- Allowance of reserves, special depreciation and tax credits as stipulated in the Special Taxation Measures Law.

Importantly, a new company must seek registration for Blue Form returns within the earlier of three months from incorporation or the end of the initial accounting period.

### CONSUMPTION TAX (JCT)

Vendors are liable for a consumption tax (JCT) at a rate of 10% on sales (8% on sales of certain foods/beverages and newspapers), including imports of goods and services. Exemptions apply to leases of land, education and medical treatment etc. Exports and certain specific services invoiced to non-residents are zero rated.

### LOCAL TAXES

### INHABITANT TAX

Inhabitants Taxes are local prefectural and municipal taxes. These taxes are computed as a percentage of the corporation tax before tax credits. Each prefecture and municipality may determine an Inhabitant Tax rate within the range shown below:

| | Rates |
|---|---|
| Prefecture | 1% to 2% |
| Municipality | 6% to 8.4% |
| Tokyo Metropolitan (combined) | 7% to 10.4% |

In addition to the above, local governments charge a per capita levy on inhabitant tax with standard rates that vary from JPY 70,000 to JPY 3,800,000 depending upon the amount of the paid-in capital and the number of employees.

### ENTERPRISE TAX

Prefectures also levy an Enterprise Tax. The tax base is generally based on the taxable income as computed for national corporation tax purposes, with certain adjustments such as the exclusion of income from a business carried on in a foreign country.

Enterprise Tax paid over the year is deductible in computing taxable income for national corporation and Enterprise Tax purposes.

Size-based taxation is applied to large corporations with paid-in capital of more than JPY 100 million. For such large corporations, Enterprise Tax consists of the traditional Enterprise Tax levied based on the taxable income as well as Enterprise Tax levied based on the capital etc. (i.e. paid-in capital and capital surplus), and Enterprise Tax levied based on value added (i.e. wages, net interest and net rental expenses etc.). Tax rates vary depending on whether the corporation is a large corporation with paid-in capital of more than JPY 100 million (i.e. whether it is subject to size-based taxation) and depending on the prefecture.

A Special Enterprise Tax, which is moved to the national tax regime from Enterprise Tax, is also levied.

Below is a summary of Enterprise Tax rate in case of the standard rate and Tokyo.

| | | | Standard (%) | Tokyo (%) | Special Enterprise Tax |
|---|---|---|---|---|---|
| (1) | Company whose paid-in capital is JPY100 million or less | | | | |
| | Taxable Income: | | | | |
| | | First JPY 4,000,000 per annum | 3.5 | 3.75 | (Taxable Income x Standard Tax Rate) x 37% |
| | | Next JPY 4,000,000 to JPY 8,000,000 per annum | 5.3 | 5.665 | |
| | | Above JPY 8,000,000 per annum | 7.0 | 7.48 | |
| (2) | Company whose paid-in capital is more than JPY 100 million | | | | |
| | (a) | Income base (taxable income): | | | |
| | | First JPY 4,000,000 per annum | 0.4 | 0.495 | (Taxable Income x Standard Tax Rate) x 260% |
| | | Next JPY 4,000,000 to JPY 8,000,000 per annum | 0.7 | 0.835 | |
| | | Above JPY 8,000,000 per annum | 1.0 | 1.18 | |
| | (b) | Added value base: | | | |
| | | The sum of wages, net interest expense and net rental expense | 1.26 | 1.26 | |
| | © | Capital base: | | | |
| | | The sum of paid-in capital and capital surplus | 0.525 | 0.525 | |

## OTHER TAXES

### FAMILY HOLDING COMPANY SURTAX

Family holding companies are liable for surtax on earnings not distributed in excess of specified limits at the following rates:

| Excess Income | Rates |
|---|---|
| First JPY 30,000,000 per annum | 10% |
| Next JPY 70,000,000 per annum | 15% |
| Over JPY 100,000,000 per annum | 20% |

A Japanese company in which more than 50% of the shares are held by the first shareholder's group is a family holding company and is subject to the surtax, subject to certain other conditions. A family holding company with paid-in capital of JPY 100 million or less (when its 100% parent company's stated capital is JPY 500 million or more, or when the company is a member of the Group Corporations including member companies with paid-in capital of more than JPY 100 million, the company is excluded) or whose net equity for tax purposes is less than a certain threshold is not subject to this special corporate surtax.

### BUSINESS OFFICE TAX

Companies whose business premises exceed 1,000 square meters and/or employ in excess of 100 employees in designated cities are subject to a tax on business activity based on space or gross payroll respectively. It is within the discretion of the city authorities whether or not to charge the tax. Additions can be made to the list of designated cities for the purpose of this tax but the city must have a population of at least 300,000. The tax is imposed on ongoing businesses etc.

The rate of tax is JPY 600 per square meter of floor space in business use plus 0.25% of the total remuneration paid to employees.

### FIXED ASSETS TAX

Real property and tangible depreciable fixed assets are subject to a fixed assets tax at the standard rate of 1.4% (1.7% for real property in specified large cities).

### TOTAL EFFECTIVE TAX RATE

By way of example of how the major taxes interrelate and accumulate, set out below is a sample effective tax rate for a Japanese or foreign corporation in Tokyo:

- Where paid-in capital is JPY 100 million or less: 34.59%
- Where paid-in capital is more than JPY 100 million: 30.62%

Note: Enterprise Tax is deductible for corporation tax purposes for the period in which it is paid. Also, Enterprise tax capital base and value added base will be separately imposed where paid-in capital is more than JPY 100 million.

## B. DETERMINATION OF TAXABLE INCOME

Income is ordinarily determined in accordance with generally accepted accounting principles, with certain adjustments made to comply with tax law. Income and expenses are recorded on an accrual basis, with deductions from gross income for all reasonable expenses, costs and losses. Several restrictions under tax law may apply to the deduction of losses or expenses (e.g. entertainment expenses).

### DEPRECIATION

Depreciation is allowed in respect of all tangible assets, other than land and specified intangible assets. Depreciation on tangible assets is calculated using the straight-line or declining-balance method at the option of the taxpayer. However, for buildings, equipment attached to buildings, and structures, only the straight-line method should be used. Intangible assets are generally amortised on a straight-line basis.

Legislation specifies the period over which assets are to be depreciated and the rates for both the straight-line and declining-balance methods. Minor assets that cost less than JPY 100,000 are deductible as an expense during the year. In addition to ordinary depreciation, special depreciation in the form of increased initial depreciation and accelerated depreciation is available in certain cases.

### STOCK / INVENTORY

Inventory valuation methods acceptable for tax include an item's individual cost, FIFO, moving or straight average, most recent purchase, retail and lower of cost or market. Importantly, the tax treatment should replicate the one adopted for the statutory accounts.

### LOSSES

Corporations filing a 'Blue Return' are eligible for loss carry-forward treatment. In general, losses may be carried forward for up to ten years (however, for large scale companies, the use of losses is generally restricted to 50% of taxable income) or carried back to the previous year. However, carry-back of tax losses is generally suspended except for companies with paid-in capital of JPY 100 million or less (except for a subsidiary of a large scale company).

### FOREIGN SOURCE INCOME

Japanese corporations are taxable on their worldwide income as and when earned. However, corporations are generally entitled to claim tax credits against corporation and Inhabitants Tax for foreign income taxes paid (direct credit). Regarding subsidiaries located in low or zero-tax countries or jurisdictions etc., their profits might be taxed at the level of the Japanese parent company on an accruals basis by application of Japanese Controlled Foreign Company (CFC) rules, with any associated foreign tax credits being available.

### TAX CREDIT INCENTIVES – CAPITAL INVESTMENT

Corporate tax credits of 7% of the acquisition cost are available on specific designated fixed assets acquired by certain small to medium-sized corporations with paid-in capital of JPY 30 million or less that can file Blue Returns. However, the total credit available is limited to 20% of corporate tax.

Several tax credits to encourage investment, R&D or salary increases etc. are available under tax law.

To claim these tax credits, taxpayers need to meet certain conditions which are set for the respective credits.

## C. FOREIGN TAX RELIEF

Relief for double taxation could be available for foreign taxes imposed on certain foreign-sourced income. Where a tax treaty exists, the foreign tax might be reduced or exempted depending on the nature of the foreign-sourced income. Also, domestic tax legislation allows for a foreign tax credit or its deduction from taxable income.

Notwithstanding the above, 95% of dividend income from certain subsidiaries outside of Japan is excluded from the recipient's taxable income subject to certain adjustments to the investment value of shares held in a subsidiary in certain cases, instead of a tax credit being applied.

A foreign tax credit or exclusion of a dividend distributed by a foreign subsidiary at the level of the Japanese recipient's income can be applied irrespective of whether there is a double tax treaty between Japan and the jurisdiction where the foreign-sourced income arose, subject to certain conditions under domestic tax law.

## D. CORPORATE GROUPS

The group tax relief regime will be applicable for fiscal years of corporations starting on or after 1 April 2022 as a replacement of the Japanese consolidated tax regime.

Under the previous consolidated tax regime, an affiliated group of companies could report and pay national corporate income tax as one unit. However, under the group tax relief regime, the parent corporation and each subsidiary ('Group Corporations') need to file their own corporate tax returns while Group Corporations can calculate their own taxable income as if they are consolidated by allocating current losses of the member corporations to the group corporations on a pro-rated basis.

For these purposes, 'Group Corporations' means a Japanese parent company and its 100% directly or indirectly owned Japanese subsidiaries. An application for group tax relief regime is at the taxpayer's choice but, if made, must include all of the parent company's eligible subsidiaries. Once initiated, group tax relief regime should in principle continue indefinitely, unless a specific event (such as dissolution of the parent company) triggers the qualifying conditions for the group tax relief regime to stop applying, or an application to discontinue is approved by the Commissioner of National Tax Agency.

The group's national corporate income tax liability will basically be computed on a consolidated basis by allocating current losses of the member corporations to the group corporations on a pro-rated basis etc.

The group tax relief regime provides for certain benefits such as the allocation of current losses of member companies to other member companies with current income (generally for national corporate income tax purposes only). On the other hand, some features of the group tax relief regime may result in an unpredictable tax burden further to the introduction of group tax relief or when a company joins the Group Corporations in the future, thus putting some restrictions on future M&A (mergers and acquisitions) activity by the group.

## E. RELATED PARTY TRANSACTIONS

All transactions between related companies are required to be conducted on an arm's-length basis with the meaning of 'arm's-length price' depending upon the transaction. Any difference arising between the price of the actual transaction and the one regarded as the arm's-length price should generally be taxable or non-deductible as applicable. The transactions covered by the provisions include the purchase and sale of inventory, the provision of services and financial facilities such as the making of loans and guarantee facilities.

## F. WITHHOLDING TAX

Domestic corporations are generally subject to withholding tax on dividends and interest and certain other income. This tax may generally be taken as a credit against the ultimate tax liability of the recipient.

Foreign corporations are subject to withholding tax (generally at the rate of 20.42%) on dividends, interest, royalties, income from immovable property, rentals from industrial or commercial equipment and certain other income. This tax may generally be taken as a credit against the ultimate tax liability of the recipient if the foreign corporation is also required to file corporate tax returns. It should be noted that where the foreign corporation has a permanent establishment in Japan, certain types of income (for example, rent and royalties) are exempt from withholding tax if taxed in aggregate with income from Japanese business activities and the foreign corporation obtains certain certificates from the Japanese tax authorities.

## G. PERSONAL TAX

While similarities between the taxation of companies and individuals do exist in Japan to some extent, the above refers to companies. Accordingly, outlined below are the basic rules and rates applicable to individuals. Given the complexity of this area, it is necessary to stress the need to seek professional advice. Non-resident taxpayers are taxed only on their Japanese source income. Non-permanent resident taxpayers are taxed on income other than foreign-sourced income plus the part of foreign-sourced income that is paid in and/or remitted to Japan. Permanent resident taxpayers are taxed on their worldwide income.

An individual who does not have the Japanese nationality is generally classified on the following basis:

| Status / Period of Residence | Classification |
|---|---|
| Does not have domicile in Japan | Non-resident |
| Has domicile and lived in Japan 5 years or less in the last 10 years | Non-permanent resident |
| Has domicile and lived in Japan more than 5 years in the last 10 years | Permanent resident |

National individual tax:

| Taxable income (JPY) | Rate | Deduction (JPY) |
|---|---|---|
| 0 – 1,950,000 | 5% | --- |
| 1,950,000 – 3,300,000 | 10% | 97,500 |
| 3,300,000 – 6,950,000 | 20% | 427,500 |
| 6,950,000 – 9,000,000 | 23% | 636,000 |
| 9,000,000 – 18,000,000 | 33% | 1,536,000 |
| 18,000,000 - 40,000,000 | 40% | 2,796,000 |
| Above 40,000,000 | 45% | 4,796,000 |

Calculation: Taxable income × tax rate – deduction = national tax.

A surcharge of 2.1% of the national personal tax liability has been added to the national personal tax rate for 25 years as from January 2013. Retirement income, interest, certain dividends, capital gains arising from sales of certain assets etc., are generally each taxed separately from other income.

In addition to the national tax, inhabitant local tax at 10% should also be imposed on the income if the individual resides in Japan.

## H. TREATY AND NON-TREATY WITHHOLDING TAX RATES

| | Dividends | | Interest (%) | Royalties (%) |
|---|---|---|---|---|
| | Individuals, companies (%) | Qualifying companies (%) | | |
| **Domestic rates** | | | | |
| Companies | 15/20[32] | 15/20[32] | 0/15/20 | 20 |
| Individuals | 15/20 | -- | 0/15/20 | 20 |

NOTES:

1. The 5% rate applies if the beneficial owner is a company which owns directly shares representing at least 10% of the voting power of the paying company. The 0% rate applies to dividends paid to a company that has owned directly shares representing at least 80% of the voting power of the company paying the dividends for the 12 month period ending on the date on which entitlement to the dividends is determined and the company that is the beneficial owner of the dividends (i) is a qualified publicly traded company or (ii) at least 50% of the aggregate vote and value of its shares is owned directly or indirectly by five or fewer such qualified publicly traded companies or (iii) has received a determination of entitlement to the treaty benefits.
2. The 0% rate applies if the beneficial owner is a company which has owned directly or indirectly, for the period of 6 months ending on the date on which entitlement to the dividends is determined, at least 10% of the voting power of the dividend-paying company or if the beneficial owner is a pension fund.
3. The 10% rate applies if the beneficial owner is a company which owns at least 25% of the voting shares of the paying company during the period of 6 months immediately before the end of the accounting period for which the distribution of profits takes place.
4. The 0% rate applies if the beneficial owner is a company which has owned, directly or indirectly, at least 10% of the voting power of the dividend-paying company for the period of 6 months ending on the date on which entitlement to the dividends is determined or if the beneficial owner is a pension fund.
5. The 5% rate applies if the beneficial owner is a company that has owned directly or indirectly, for the period of 6 months ending on the date on which entitlement to the dividends is determined, at least 10% of the voting shares of the paying company.
6. The 5% rate applies if the beneficial owner is a company which owns at least 25% of the voting shares of the paying company throughout the period of 6 months immediately before the end of the accounting period for which the distribution of profits takes place.
7. The 5% rate applies if the beneficial owner is a company that has owned directly, for the period of 6 months ending on the date on which entitlement to the dividends is determined, at least 25% of the voting power in the paying company. The 0% rate applies if the beneficial owner is a pension fund provided that the dividends are not derived from the carrying on of a business by such pension fund or through an associated enterprise.
8. The 0% rate applies if the beneficial owner is a company which has owned directly at least 25% of the voting power of the dividend-paying company throughout a 365 day period that includes the date on which entitlement to the dividends is determined.
9. The 10% rate applies if the recipient is a company which owns at least 25% of the voting shares of the dividend-paying company during the period of 6 months immediately preceding the date of payment of the dividends.
10. The 0% rate applies if the beneficial owner is a company which has owned directly, for the period of 6 months ending on the date on which entitlement to the dividends is determined, at least 10% of: (i) in the case where the dividend-paying company is a resident of Japan, the voting power of that company; or (ii) in the case where the paying company is a resident of Denmark, the capital of that company; or if the beneficial owner is a pension fund.
11. The 10% rate applies if the beneficial owner is a company which owns at least 25% of the voting shares of the paying company during the period of 12 months immediately before the end of the accounting period for which the distribution of profits takes place.
12. The 5% rate applies if the beneficial owner is a company which holds during the period of 6 months immediately before the end of the accounting period for which the distribution takes place directly at least 15% of the voting rights in the paying company. The 0% rate applies if the beneficial owner is a company which is a French qualified resident and which has held during the period of 6 months immediately before the end of the accounting period with respect to which the profits distribution takes place directly at least 15% of the voting rights in the paying company. The term qualified resident refers to (i) a company quoted on the French Stock Exchange or (ii) more than 50% of the capital of the company is held directly or indirectly by, among others, the French State, its local authorities or public legal persons.
13. The 5% rate applies if the beneficial owner is a company (other than a partnership) that has owned directly, for the period of 6 months ending on the date on which entitlement to the dividends is determined, at least 10% of the voting shares of the paying company. The 0% rate applies if the beneficial owner is a company (other than a partnership) that has owned directly, for the period of 18 months ending on the date on which entitlement to the dividends is determined, at least 25% of the voting shares of the paying company.
14. The 0% rate applies if the beneficial owner is a company which has owned directly or indirectly, for the period of 6 months ending on the date on which entitlement to the dividends is determined, at least 25% of: (i) in the case where the paying company is a resident of Iceland, the capital of that company; or (ii) in the case where the paying company is a resident of Japan, the voting power of that company; or if the beneficial owner is a pension fund. The 5% rate applies if the beneficial owner is a company which has owned directly or indirectly, for the period of 6 months ending on the date which entitlement to the dividends is determined, at least 10 % of: (i) in the case where the paying company is a resident of Iceland, the capital of that company; or (ii) in the case where the paying company is a resident of Japan, the voting power of that company.
15. The 0% rate applies if the beneficial owner is a person other than an individual.
16. The 5% rate applies if the beneficial owner is a company which owns at least 25% of the voting shares issued by the paying company during the period of 6 months immediately before the end of the accounting period for which the profits distribution takes place. The 0% rate applies if the recipient is a company which holds at least 25% of the voting shares issued by the paying company during the period of 6 months immediately before the end of the accounting period for which the profits distribution takes place and satisfies on the date of payment the following conditions: (i) the recipient's shares are traded on the Mexican Stock Exchange and (ii) more than 50% of the total shares is owned by, among others, the Mexican Government, its political subdivisions or local authorities.
17. The 5% rate applies if the beneficial owner is a company that has owned, directly or indirectly, shares representing at least 10% of the voting power of the paying company for the period of 6 months ending on the date on which entitlement to the dividends is determined. The 0% rate applies if the beneficial owner is (i) a company that has owned, directly or indirectly, shares representing at least 50% of the voting power of the paying company for the period of 6 months ending on the date on which entitlement to the dividends is determined or (ii) a pension fund,

provided that the dividends are not derived from the carrying on of a business, directly or indirectly, by such pension fund.

18. The 0% rate applies if the beneficial owner is a company that has owned directly or indirectly, for the period of 6 months ending on the date on which entitlement to the dividends is determined, at least 10% of the voting power of the paying company and the beneficial owner of the dividends (i) is a qualified publicly traded company or (ii) at least 50% of the aggregate voting power is owned directly or indirectly by five or fewer such qualified publicly traded companies or (iii) is granted benefits to the dividends.
19. The 5% rate applies if the beneficial owner is a company that has owned directly, for the period of 6 months ending on the date on which entitlement to the dividends is determined, at least 50% of the voting shares of the paying company. The 7.5% rate applies if the beneficial owner is a company that has owned directly, for the period of 6 months ending on the date on which entitlement to the dividends is determined, at least 25% of the voting shares of the paying company.
20. The 10% rate applies if the beneficial owner is a company which holds directly at least 10% either of the voting shares of the paying company or of the total shares issued by that company during the period of 6 months immediately preceding the date of payment of the dividends.
21. The 5% rate applies if the beneficial owner is a company (other than a partnership) that has owned directly for the period of 12 months ending on the date on which entitlement to the dividends is determined, at least 10% of the voting shares of the paying company.
22. The 5% rate applies if the beneficial owner is a company that has owned directly or indirectly, for the period of 6 months ending on the date on which entitlement to the dividends is determined, at least 10% of the voting power or of the total issued shares of the paying company.
23. The 0% rate applies if the beneficial owner is a pension fund. The 5% rate applies if the beneficial owner is a company which has owned directly at least 15% of the voting power of the dividend-paying company for the period of 365 days ending on the date on which entitlement to the dividends is determined. The 15% rate applies to the shares of companies that derive at least 50% of their value directly or indirectly from immovable property.
24. The 5% rate applies if the beneficial owner is a company which holds directly or indirectly, during the period of 183 days ending on the date on which entitlement to the dividends is determined, at least 10% of the voting shares or of the total issued shares of the paying company.
25. The 0% rate applies if the beneficial owner is (i) a company which has owned directly or indirectly at least 10% of the voting power of the dividend-paying company throughout a twelve month period that includes the date on which entitlement to the dividends is determined (for the purpose of computing that period, no account shall be taken of changes of ownership that would directly result from a corporate reorganisation, such as a merger or divisive reorganisation, of the company that is the beneficial owner of the dividends or that pays the dividends) (ii) a recognised pension fund, provided that such dividends are derived from the activities referred to in clause (i) or (ii) of subparagraph (l) of paragraph 1 of Article 3 of the Japan-Spain treaty.
26. The 0% rate applies if the beneficial owner is a company (other than a partnership) that has held, directly or indirectly, at least 10% of the voting power of the paying company for the period of 6 months ending on the date on which entitlement to the dividends is determined.
27. No reduction under the tax treaty, the domestic rate applies.
28. The 15% rate applies in case the dividends are paid by a company engaged in an industrial undertaking and if the beneficial owner is a company which owns at least 25% of the voting shares of the paying company during the period of 6 months immediately before the end of the accounting period for which the profits distribution takes place. The 20% rate applies in all other cases.
29. The 0% rate applies if the beneficial owner is a company that has owned, directly or indirectly, shares representing at least 10% of the voting power of the paying company for the period of 6 months ending on the date on which entitlement to the dividends is determined or is a pension fund or pension scheme, provided that such dividends are not derived from the carrying on of a business, directly or indirectly, by such pension fund or pension scheme.
30. The 5% rate applies if the beneficial owner is a company that owns directly or indirectly, on the date on which entitlement to the dividends is determined, at least 10% of the voting stock of the paying company. The 0% rate applies if the beneficial owner of the dividends is either (i) a company that has owned, directly or indirectly through one or more residents of either state, more than 50% of the voting stock of the paying company for the period of 12 months ending on the date on which entitlement to the dividends is determined, and that satisfies various requirements on the ownership of its shares, or has received a determination of entitlement to the treaty benefits or (ii) a pension fund, provided that such dividends are not derived from the carrying on of a business, directly or indirectly, by such pension fund.
31. Japan continues to apply the treaty with the former USSR in its relations with Armenia, Azerbaijan, Belarus, Georgia, Kyrgyzstan, Moldova, Tajikistan, Turkmenistan, Ukraine and Uzbekistan.
32. Dividends paid by resident companies to non-resident companies are subject to a 20% withholding tax. A reduced 15% rate applies to dividends from certain listed shares.
33. The 5% rate applies if the beneficial owner is a company which has owned directly, throughout a 365 day period that includes the date on which entitlement to the dividends is determined, at least 20% of: (i) in the case where the company paying the dividends is a resident of Jamaica, the capital or voting power of that company; or (ii) in the case where the company paying the dividends is a resident of Japan, the voting power of that company.
34. The 5% rate applies if the beneficial owner is a company which has owned directly at least 25% of the voting power of the company paying the dividends throughout a 365 day period that includes the date on which entitlement to the dividends is determined.
35. The 5% reduced rate applies if the beneficial owner is a company which holds directly, throughout a 365 day period that includes the date on which entitlement to the dividends is determined (for the purpose of computing that period, no account shall be taken of changes of ownership that would directly result from a corporate reorganisation, such as a merger or divisive reorganisation, of the company that holds the shares of the company paying the dividends or that pays the dividends), at least 25% of, in the case where the company paying the dividends is a resident of Japan, the voting power of that company.
36. Effective date: 1 January 2022.
37. New treaty with Spain. Effective date: 1 January 2022.
38. The 5% reduced rate applies if the beneficial owner is a company which has owned directly, throughout a 183 day period that includes the date on which entitlement to the dividends is determined (for the purpose of computing that period, no account shall be taken of changes of ownership that would directly result from a corporate reorganisation, such as a merger or divisive reorganisation, of the company that is the beneficial owner of the dividends or that pays the dividends), at least 10% of, in the case where the company paying the dividends is a resident of Japan, the voting power of that company.

| | | garryb@pkfbba.com |

## BASIC FACTS

| | |
|---|---|
| Full name: | Bailiwick of Jersey |
| Capital: | Saint Helier |
| Main languages: | English |
| Population: | 174,829 (January 2022) |
| Monetary unit: | Pound Sterling (GBP) |
| Internet domain: | .je |
| Int. dialling code: | +44 1534 |

## KEY TAX POINTS

- There are no capital taxes, capital gains, inheritance, gift or wealth taxes.
- Residents are subject to Jersey income tax on their worldwide income as it arises. The standard rate of Income Tax is 20%. There are special rates of income tax for incoming high net worth individuals, the first GBP 725,000 of income is liable to tax at 20% and income in excess of this amount at 1%.
- Non-residents are normally only subject to income tax on employment income (other than directors fees) arising in Jersey.
- Goods and Services tax (GST) is charged on the supply of goods and services in Jersey by a Jersey business at a rate 5%.
- Double taxation relief is available in accordance with various treaties.
- A company tax resident in Jersey is chargeable to tax at 0%, 10% or 20% depending upon the nature of its income. Generally trading companies and investment holding companies are taxed at 0%. Financial service entities are liable to tax at the 10% corporate rate. Utility companies and companies with Jersey rental income and Jersey property development companies are taxed at 20%. Large “retail” businesses carried on in Jersey, where the company has turnover exceeding GBP 2,000,000, are taxed at 20%.
- Non-resident companies are not liable to Jersey tax unless managed and controlled in Jersey and therefore Jersey tax resident.

## A. TAXES PAYABLE

### COMPANY TAX

All companies incorporated in Jersey or managed and controlled in Jersey are treated as tax resident and, therefore chargeable to Jersey income tax. A Jersey resident company is liable to tax at 0%, 10% or 20%. Financial services entities are subject to a 10% rate and are defined as:

- All entities carrying out banking business through a permanent establishment in Jersey, whether through a Jersey company, a branch or some other structure.
- All entities carrying on the business of a trust business through a permanent establishment.
- All entities carrying on investment business, independent financial advice and similar activities through a permanent establishment.
- All entities carrying on the business of funds administration or funds custody services through a permanent establishment.

It should be noted that clerical functions such as invoicing operations, management and administration services and entering into contracts in respect of a company’s international business do not amount to the carrying on of a business through a permanent establishment in the Island.

Public utility companies such as those providing electricity, water, gas, telecommunications and postal services are taxed at 20%. Jersey rental income and profits from property development in Jersey are taxed at the rate of 20%. Most other companies are liable at the standard rate of 0%. See large retail businesses above.

The tax year runs from 1 January to 31 December, although companies may adopt an accounting year end of their choice. Income is assessable on a current year basis. Assessments are notified to the company in the year following the year of assessment.

Corporate income tax returns need to be submitted by 31 December.

Tax is paid by instalments, the first instalment of tax (50% of an estimate of the final liability, estimated by the Company not the Tax Authorities) is due on 31 May and then the balance is due 30 November. There will be different dates for large corporates i.e. if their tax liability is greater than £500,000 in the preceding two tax years.

Jersey has economic substance legislation for Jersey resident companies.

### CAPITAL GAINS TAX

There is no capital gains tax in Jersey. Capital gains are not included in ordinary taxable income.

### BRANCH PROFITS TAX

There is currently no branch profits tax in Jersey.

## SALES TAX / VALUE ADDED TAX (VAT)

A Goods and Services Tax (GST) which is a form of sales tax on the domestic consumption of imported and locally produced goods and services is in place. There is a standard rate of 5% which will be collected from customers by registered businesses when they make supplies of those goods and services which are specified by Law as taxable at the standard rate.

There are three categories of supplies:

- Standard-rated supplies - e.g. the sale of new and used goods including those under a hire purchase agreement, renting and hiring out of goods, business stock used for private purposes, the provision of services (e.g. hairdressing or hotel accommodation), charging admission for access onto premises, and imported goods.
- Exempt supplies – e.g. financial services, insurance, postal services, medical and pharmaceutical supplies made by registered professionals or institutions and supplies to charities.
- Zero-rated supplies – e.g. exports, the supply of a dwelling, supplies made on medical prescription and international services.

GST registration is compulsory for businesses established in Jersey making annual taxable supplies exceeding GBP 300,000, although voluntary registration is available for business trading below this level. Certain businesses do not have to register for GST in Jersey, and these can apply to be an International Service Entity (ISE). These are businesses, often financial service businesses, which mainly serve non-residents of Jersey and are exempted from GST but are subject to other charges.

## LOCAL TAXES

Taxes are levied at a state level only.

## OTHER TAXES

Social Security contributions are charged on employees at a rate of 6% on gross earnings of up to GBP 4,764 per month. The employer then pays 6.5% of gross earnings up to GBP 4,764 per month and 2.5% over that amount up to GBP 21,724.

The maximum rate for self-employed individuals is GBP 1,019.50 per month (there is a reduced rate in certain circumstances).

On moving to the Island an individual must register with the Social Security department.

## FRINGE BENEFITS TAX (KNOWN AS BENEFITS IN KIND IN JERSEY)

Taxable benefits include, amongst other things, the private use of a company motor vehicle, rent-free accommodation and free board and lodging. Employees are responsible for payment of tax on benefits.

## LAND TRANSACTIONS TAX

There is a Land Transactions Tax to collect which is a form of stamp duty on share transfer transactions involving immovable property in Jersey. The charge takes the form of a Tax rather than Stamp Duty. A legal obligation is placed on the purchaser of a residential property by share transfer to pay a tax exactly equal to the amount of Stamp Duty which would have been paid on the purchase if it had been freehold property. This only applies to certain companies whose Articles of Association expressly provide for the shareholders to occupy the property.

There are lower rates for first time buyers, charities, the transfer of matrimonial property from joint to sole ownership (or vice versa), and transfers from a deceased person's estate. Non-resident purchasers of shares are not exempt from the tax. The standard charge is GBP 80 plus an amount calculated per the standard land transaction tax rate bands:

| Bands (GBP) | Rate |
|---|---|
| 0 to 50,000 | 0.5% (subject to a minimum of £10) |
| 50,000 to 300,000 | 1.5% |
| 300,000 to 500,000 | 2% |
| 500,000 to 700,000 | 3% |
| 700,000 to 1,000,000 | 3.5% |
| 1,000,000 to 1,500,000 | 4.5% |
| 1,500,000 to 2,000,000 | 5.5% |
| 2,000,000 to 3,000,000 | 7% |
| 3,000,000 to 6,000,000 | 9.5% |
| over 6,000,000 | 10.5% |

## B. DETERMINATION OF TAXABLE INCOME

For a company or business, taxable trading profits are calculated by ascertaining assessable income and subtracting allowable deductions. Generally, to be deductible, expenditure must be wholly and exclusively incurred for the purposes of the trade and be revenue in nature rather than capital.

## CAPITAL ALLOWANCES AND DEPRECIATION

No deduction is permitted in respect of depreciation on capital items. However, annual allowances, calculated using the reducing-balance method, are allowed as follows:

- Plant and machinery – 25%; glasshouses – 10%;
- Motor vehicles – 25% (cost reduced to £22,000 for expensive cars).

If, in any year, there are insufficient profits to cover balancing allowances, which are treated as a deduction from profits, any unrelieved amount is carried forward and treated as an allowance for the following year. This surplus capital allowance and balancing allowances may be carried forward indefinitely, if necessary.

## STOCK / INVENTORY

UK principles are followed such that the value of the stock is normally the lower of cost and market value. Acceptable methods of valuing inventory include FIFO and average cost but not LIFO.

## CAPITAL GAINS AND LOSSES

There is no capital gains tax in Jersey. Capital losses are not allowable.

## DIVIDENDS

Dividends paid are not deductible in calculating the profits of a company but are paid out of after-tax profits. Dividends paid out of a Jersey company's profits carry a tax credit in relation to the tax paid by the company at either the 0%, 10% or 20% rates.

No unilateral relief is available to resident companies on receipt of foreign dividends and, thus, the net dividend is taxable (in other words, relief is given for foreign tax suffered by way of deduction). However, relief may be granted by concession on foreign dividend income if the absence of it would prevent bona fide commercial transactions (e.g. because dividends paid to a holding company by an overseas subsidiary would be subject to double taxation). This income is liable to Jersey tax at the standard corporate tax rate of 0% when received by a Jersey company. All distributions to a Jersey resident shareholder who owns more than 2% of the company are subject to tax at their personal tax rates.

## SHAREHOLDER LOANS

A loan made to a Jersey resident shareholder or a member of the shareholder's family or a related party is liable to income tax unless it is made at a commercial rate of interest. The shareholder is entitled to a credit when the loan is repaid, equal to the amount of tax paid on the loan.

## INTEREST DEDUCTIONS

Interest is deductible to the extent that it relates to monies borrowed for the purpose of the business.

## LOSSES

Losses can be carried forward indefinitely provided there is a continuity of trade. There is a limited right to carry back losses. Losses can also be group relieved in the same year if the same basis periods exist. There are limitations on loss claims.

J

## C. FOREIGN TAX RELIEF

Double taxation relief is available on income taxed at source. Jersey has entered into a new agreement with the UK, which came into effect for Jersey on 1 January 2019. Associated with its negotiations in relation to Tax Information Exchange Agreements, Jersey has entered into limited double taxation arrangements relating to income and mutual agreement procedures with:

| | | |
|---|---|---|
| Australia | Denmark | Faroe Islands |
| Finland | France | Germany |
| Greenland | Iceland | New Zealand |
| Norway | Poland | Sweden |

Tax Information Exchange Agreements (TIEAs) have been signed with:

| | | |
|---|---|---|
| Argentina | Australia | Austria |
| Belgium | Brazil | Canada |
| Chile | China | Czech Republic |
| Denmark | Faroe Islands | Finland |
| France | Germany | Greenland |
| Hungary | Iceland | India |
| Indonesia | Ireland | Italy |
| Japan | Korea | Latvia |
| Mexico | Netherlands | New Zealand |
| Norway | Poland | Portugal |
| Romania | Slovenia | South Africa |
| Sweden | Switzerland | Turkey |
| United Kingdom | United States of America | |

## D. CORPORATE GROUPS

The tax provisions relating to groups of qualifying companies allow losses of a group company to be offset against the profits or gains of another company in the same group. A claim for relief must be made within one year following the year of assessment in which the loss period ended.

Companies will be treated as being in the same group where one holds directly or indirectly more than 50% of the ordinary share capital of the other company, or where one company (company A) owns directly or indirectly more than 50% of the ordinary share capital of the two other companies (company B and company C).

## E. RELATED PARTY TRANSACTIONS

There is no transfer pricing or related party legislation in Jersey.

## F. WITHHOLDING TAX

There are no withholding taxes in Jersey.

## G. EXCHANGE CONTROL

There are no exchange control rules in Jersey.

## H. PERSONAL TAX

Income tax is charged on Jersey resident individuals on their worldwide income and profits regardless of whether such profits or income are remitted to Jersey. There is, however, a statutory relief for individuals who are resident, but not ordinarily resident in Jersey, so that foreign income not remitted escapes taxation. The tax year is the calendar year i.e. to 31 December. There is currently no statutory definition of residence or ordinary residence in Jersey. Generally, individuals are treated as resident in a year if they are present in Jersey for more than six months or if they are present for three months or more, on average, over a period of four consecutive years.

If an individual maintains a place of abode in Jersey or has available accommodation, they are regarded as resident in any year that they stay in that abode or accommodation, even if for only one night. They are also regarded as ordinarily resident if his visits are habitual (after four years) unless his centre of life is abroad, e.g. has a home, business or professional activities abroad and is spending less than three months a year in Jersey. Income from offices and employment is assessable on an arising basis. Income tax is levied on the assessable income of the individual, less personal allowances and deductions, at a rate of 20%.

Earned income arising outside the island is assessed on the net amount arising after the deduction of any foreign tax charged and any necessary expenses. The maximum amount of tax paid on total income is 20%, but there are two methods of calculating tax, the standard rate calculation, i.e. 20% of total income and the marginal relief calculation where allowances and reliefs are deducted. Income is exempt if it does not exceed GBP 16,550 for a single person (GBP 16,550 for those aged 65 and over) or GBP 26,550 for a married person (GBP 26,100 for those aged 65 and over). Marginal relief is available where income exceeds the exemption limit on small incomes, and the tax charged is not to exceed 26% of the excess.

Where income is chargeable to tax, personal allowances are available as follows:

- Single person GBP 16,550 (over 65 GBP 16,550)
- Married/civil partnership person GBP 26,550 (over 65 GBP 26,550)
- Spouse/civil partner working allowance GBP 6,550

The Enhanced Child Allowance for a parent whose child is in full time higher education is GBP 6,273. There is an Additional Personal Allowance for single parents of GBP 4,590. There is also relief for childcare costs for a registered child carer up to GBP 6,273 or GBP 16,320 (dependent on type of childcare).

There is interest tax relief in certain circumstances. Mortgage interest relief is deductible but only on loans up to GBP 300,000 on an individual's principal private residence if the individual is taxed at the marginal rate of 26%. The relief is restricted to GBP 6,000. There is tax relief for pension contributions, with the maximum relief being the lower of GBP 50,000 or relevant earnings and the relief is restricted if the individual's income is more than GBP 150,000. The only other deduction is for employment expenses.

Some reliefs are restricted and have conditions attached to them which need to be satisfied. A long-term care fund has been set up to help those who need long-term care. If an individual pays income tax they pay into this fund. The long-term care contribution rate is a maximum of 1.5% of total income.

## HIGH NET WORTH INDIVIDUALS

High Value Resident individuals whose income exceeds GBP 725,000 per annum can apply for a special residence licence to live in Jersey. The current tiered rate of tax on personal, worldwide income is taxed as follows;

- 20% on the first GBP 725,000
- 1% on all income over GBP 725,000
- 20% on income derived from Jersey property.

(Based on 2022 rates and allowances)

## I. TREATY AND NON-TREATY WITHHOLDING TAX RATES

| | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| **Domestic rates** | | | |
| Companies | 0 | 0 | 0 |
| Individuals | 0 | 0 | 0 |
| **Treaty countries:** | | | |
| Cyprus | 0 | 0 | 0 |
| Estonia | 0 | 0 | 0 |
| Guernsey | 0 | 0 | 0 |
| Hong Kong | 0 | 0 | 4 |
| Isle of Man | 0 | 0 | 0 |
| Liechtenstein | 0 | 0 | 0 |
| Luxembourg | 5/15[1] | 0 | 0 |
| Malta | 0 | 0 | 0 |
| Mauritius | 0 | 0 | 0 |

| | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| Qatar | 0 | 0 | 5 |
| Rwanda | 10 | 10 | 10 |
| Seychelles | 0 | 0 | 0 |
| Singapore | 0 | 1[2] | 8 |
| United Arab Emirates | 0 | 0 | 0 |
| United Kingdom[2] | 0/15[3] | --/0[4] | --/0[5] |

Notes:

1. The lower rate applies in case the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the dividend-paying company.
2. Entry in force: 19 December 2018. Effective date Jersey: 1 January 2019 (other taxes)/1 February 2019 (withholding taxes) Effective date United Kingdom: 1 February 2019 (withholding taxes)/1 April 2019 (corporation taxes)/6 April 2019 (income and capital gains taxes).
3. The 0% rate applies except if the dividends are paid out of income derived directly or indirectly from immovable property by an investment vehicle which distributes most of this income annually and whose income is tax exempt, in which case the 15% rate applies on the distributed dividends. However, if the dividends are paid to a pension scheme, then the 0% rate applies.
4. The 0% rate applies, among others, to interest paid to an individual, pension scheme, bank or any unrelated financial institution, a company in whose principal class of shares there is substantial and regular trading on a recognised stock exchange or any other company provided that the competent authority determines that the establishment, acquisition or maintenance of such company does not have as its main or one of its main purposes to secure the treaty benefits, or if the interest is paid by the state or local authorities. Otherwise the domestic rate applies.
5. The 0% rate applies, among others, to royalties paid to an individual, a company in whose principal class of shares there is substantial and regular trading on a recognised stock exchange or any other person provided that the competent authority determines that the establishment, acquisition or maintenance of that person does not have as its main or one of its main purposes to secure the treaty benefits. Otherwise the domestic rate applies.

# JORDAN

## MEMBER FIRM

| City | Name | Contact Information |

| Capital: | Amman |
| Main languages: | Arabic |
| Population: | 11.10 million (2022 estimate) |
| Monetary unit: | Jordanian dinar (JOD) |
| Internet domain: | .jo |
| Int. dialling code: | +962 |

## KEY TAX POINTS

- Every person with one or more taxable income sources shall submit a tax return according to the form approved by the Tax Authority by the end of the fourth month following the end of the tax period.
- Domestic companies are subject to income tax on worldwide income, although income from the export of goods is exempt until 31 December 2018 and taxable as from 2019. Foreign companies are subject to tax on income from Jordanian sources.
- Special rates of corporate income tax apply to certain industries including transport, construction, banking and other financial industries.
- Capital gains are taxed at the appropriate corporation tax rate if the assets are subject to depreciation rules.
- Credit for foreign taxes is generally only available where a relevant double tax agreement is in place.
- No withholding tax is charged on the payment of dividends by Jordanian companies. However, withholding taxes are charged on the payment of interest, royalties and other charges to both residents and non-residents.
- Income tax is payable by residents and non-residents on salaries earned from any employment in Jordan.

## A. TAXES PAYABLE

## FEDERAL TAXES AND LEVIES

The Jordanian Tax year is a calendar year starting on 1 January until the 31 December of each year.

The taxpayer might change the Tax year to be compatible with his business.

## COMPANY TAX

Domestic companies are subject to income tax on all their sources of income wherever arising. Foreign working branches (companies) are subject to income tax only on their income from Jordanian sources. Export sales of goods are only income tax exempted until 31 December 2018 and taxable as from 2019. The taxpayer should maintain regular audited accounting records with a separate cost centre for export activities.

Company tax is levied as follows:

| **Domestic companies and foreign operating branches:** | **Rate** |
|---|---|
| Banks | 35% |
| Main communication companies, electricity distribution and generation companies, basic materials mining companies, insurance and re-insurance companies, financial intermediation companies, financial companies, and legal persons who conduct financing leasing activities | 24% |
| Manufacturing sector: | |
| Companies Manufacturing Products Excluding the Pharmaceutical & Apparel Sector. | |
| 2019 | 15% |
| 2020 | 16% |
| 2021 | 17% |
| 2022 | 18% |
| 2023 | 19% |
| 2024 | 20% |
| Pharmaceutical & Apparel Sector Products | |
| 2019 | 10% |
| 2020 | 14% |
| 2021 | 16% |
| 2022 | 18% |
| 2023 | 19% |
| 2024 | 20% |
| Other legal persons than those stated above | 20% |

J

## COMPANIES IN THE DEVELOPMENT ZONES

- Companies operating in the transformation industries are subject to 5% taxation on their income, if the local added value of the institution is at least 30%;
- Other activities and projects are subject to a 10% rate;
- The Prime Ministry, upon recommendation by the Investment Board, can decrease this percentage based upon a regulation issued for this purpose;
- The income of institutions registered in the free zone area which conduct a manufacturing activity, or any other activity such as sale, ownership transfer, or provision of goods and services inside these areas is subject to tax based upon the tax categories of the companies and Natural Persons when applicable.

## NATIONAL CONTRIBUTION ACCOUNT

A national contribution account is established at the tax department for the purpose of paying the public debt, whereas its revenues are collected as follows:

- 3% of the taxable income of banks and electricity distribution and generation companies;
- 7% of the taxable income of basic materials mining companies;
- 4% of the taxable income of financial intermediation companies, financial companies, and legal persons who conduct financing leasing activities;
- 2% of the taxable income of main communication companies and insurance and re-insurance companies;
- 1% of the taxable income of the remaining legal persons;
- 1% of the natural persons’ taxable income exceeding JOD 200,000;
- Donations and grants.

The deduction is ceased when the public debt reaches the percentage allowed by the valid Public Debt Law.

## EXEMPTIONS ACCORDING TO THE ARTICLES OF THE LAW

- Agricultural sector exemption;
- Natural persons exemption is for the first JOD 1,000,000 of sales from agricultural activities inside the Kingdom;
- Legal persons exemption is for the first JOD 50,000 of net income from agricultural activities inside the Kingdom;
- Under the new law the end of service indemnity exemption from 1 January 2010 until 31 December 2014 is 50% when in 2014 amounts exceeding JOD 5,000 were subjected as of 1 January 2010;
- For the first JOD 15,000 a five thousand Jordanian Dinars exemption is granted for the employee’s services after 1 January 2015;
- Amounts exceeding what is stated in the previous two items are subject to 9% tax;
- The exemption of the total monthly pension including illness is reduced now to the first JOD 2,500 when in 2014 it was JOD 3,500;

- Adding an exemption covering the amounts distributed from the unions' Solidarity Funds to the members and their heirs in case of death;
- Adding an exemption of JOD 2,000 for each person with ongoing permanent disability.

## FOREIGN NON-OPERATING COMPANIES

## SECURITIES TRANSACTION TAX

Security Transaction Tax is not applicable in Jordan.

## CAPITAL GAINS TAX

Capital gains are taxed at the appropriate corporation tax rate if the assets are subject to depreciation rules.

## TONNAGE TAX FOR SHIPPING INDUSTRY

Tonnage Tax for shipping industries is not applicable in Jordan.

## DIVIDEND DISTRIBUTION TAX

Profits from stocks and dividends distributed by a resident to another resident are exempted, except profits of mutual investment, funds of banks and financial companies.

## BRANCH PROFITS TAX

Jordanian companies' branches operating outside the Kingdom, and foreign investments if the source of capital originated inside the Kingdom, are subject to a 10% tax ratio, based on net income declared in their final accounts which are certified by an external certified auditor.

## SALES TAXES / VALUE ADDED TAX (VAT)

The rates of the sales tax are:

- 16% as a general rate for goods and services;
- 10% on certain goods and live animals;
- 4% for specified agricultural products and meat;
- Zero rate for a list of specified products like energy-saving products and pharmaceutical industry inputs.

A state government initiative to promote industrial growth provides sales tax exemption and defers the payment of the tax payable on goods and services at importation.

## FRINGE BENEFITS TAX

There is no separate fringe benefits tax. Benefits provided by employers to their employees are subject to income tax, computed in the prescribed manner. Employers are obliged to withhold payable income tax on all benefits provided to employees on their behalf. If the company adopts provident funds or insurance plans, employers are required to contribute.

## LOCAL TAXES:

## STAMP DUTY

Stamp Duty of 0.6% is payable on all transactions with governmental and publicly traded corporations.

## LAND AND PROPERTY TAX

No tax is levied on land property except for improvement taxes. However, real estate property is subject to tax at a variable rate between 2% to 5% of a credited value.

## OTHER TAXES:

## CUSTOMS DUTY

Customs Duty is payable on goods imported into Jordan. The rates of basic Customs Duty may reach up to 30% depending on the governmental strategy.

## RESEARCH AND DEVELOPMENT

Research and development expenses can be deducted whenever incurred.

## WEALTH TAX

Wealth tax is not applicable in Jordan.

## GIFT TAX

Income from prizes, the value or amount of which exceeds JOD 1,000, is subject to a final 15% withholding tax rate.

## B. DETERMINATION OF TAXABLE INCOME

Any income incurred in or from the Hashemite Kingdome of Jordan for any person regardless of the place of payment shall be subject to income tax. Generally, to be deductible, an expenditure must be assigned to generate taxable income. Some expenses require a special treatment. Non-resident taxpayers pay tax only on Jordanian earned income. The assessment year is the period of 12 months from 1 January until 31 December.

## DEPRECIATION

Depreciation allowance is available as per the following rates depending on the nature of asset:

| | |
|---|---|
| Buildings (depending upon their nature) | 2% to 10% |
| Furniture and Fixtures | 5% to 15% |
| Plant and Machinery | 20% to 35% |
| Intangible Assets (patents, trademarks, know-how, licences, copyrights, etc) | 10% to 50% |
| Modes of Transportation (land, air, sea) | 15% |

Assets used for less than 180 days in the year of acquisition are entitled to half of the normal depreciation allowance. Depreciation not set off against current year's income can be carried forward for set off against any future income for unlimited period.

## STOCK / INVENTORY

The valuation of closing stock is normally completed on the basis of cost or market value, whichever is lower. The accepted valuation methods include FIFO, weighted average cost or other valuation methods in accordance with IFRS. The valuation basis is to be consistently followed.

## INTEREST DEDUCTION

Interest incurred or paid on borrowings used for business purposes is tax deductible within the same year as mentioned below:

- For new businesses, interest incurred prior to commencement of commercial production is to be capitalised;
- Interest paid for financing another taxpayer is not deductible;
- Interest paid by banks, financial companies and financial leasing companies is fully deductible.

## EXPENDITURE INCURRED FOR EXEMPT INCOME

Expenditure incurred in earning an exempted income from tax is not tax deductible. With regards to the exempted income from trading in dividends, stocks, bonds, equity loan, treasury bonds, mutual investment funds and currencies, the non-deductible amount shall be 25% of the exempted income. In all cases, the non-deductible amount should not exceed the allowable expenses.

## LOSSES

Business losses can be set off against any other income in the same assessment year and against business profits. Losses can be carried forward not exceeding five (5) years. Losses for activities outside the Kingdom are deducted from the activity's profits. There are no provisions for carrying losses backward. Export losses cannot be carried forward.

## MINIMUM ALTERNATE TAX (MAT)

MAT is not applied in Jordan.

## FOREIGN SOURCED INCOME

Jordanian companies' branches operating outside the Kingdom, and foreign investments if the source of capital originated inside the Kingdom are subject to a 10% tax ratio. Any income for a resident person from sources outside of the Hashemite Kingdom of Jordan shall be subject to tax, provided that it originates from money or deposits from inside the Kingdom. Income for a non-Jordanian resident fiscal person is exempt from income tax if this income is derived from outside of Jordan.

## INCENTIVES

In addition to the incentives which are available for export sales of goods, the investment Law provides tax and customs duties exemptions on certain new projects. In case of an undertaking located in a Special Economic Zone, the tax incentives for the first ten years are normally 75%. Input sales tax for export sales is refundable.

## FOREIGN EXCHANGE EARNINGS

Foreign exchange earnings are only taxable for companies.

# C. FOREIGN TAX RELIEF

## UNILATERAL TAX CREDIT WHERE THERE IS NO TAX TREATY

Where a resident of Jordan has paid tax in any country with which Jordan does not have a tax treaty, a credit is not available for such tax payment in Jordan.

## TAX CREDIT UNDER TAX TREATIES

Jordan has entered into tax treaties with many countries. Under an applicable tax treaty, Jordanian residents paying taxes in other countries can claim a credit in Jordan for foreign tax payments as mentioned in each treaty.

# D. CORPORATE GROUPS

There are no provisions in Jordan for consolidation of accounts for tax purposes or provisions for group taxation.

# E. RELATED PARTY TRANSACTIONS

A transfer pricing guideline was introduced under Regulation 40 of 2021.

**Definitions**

- Person: a natural or legal person including group of persons established by contractual arrangement and permanent establishments;
- Taxpayer: a person whose transactions with related persons exceed JOD 500,000 during a period of 12 consecutive months;

- Transactions between related persons: disposition transactions and any exchange of everything of value between the related persons and its taxpayer;
- Transactions between independent persons: transactions between non-related persons;
- Transfer pricing: prices for existing transactions between related persons, including the exchange of goods and services, loans, financing and disposal of movable and immovable funds;
- Approved taxpayer: the taxpayer who submits the special report of each country to the department for reporting purposes on behalf of the Multinational Enterprises group;
- Alternative Parent Establishment: The taxpayer belonging to Multinational Enterprises group that is required to submit the report on each country to the Department on behalf of the Multinational Enterprises group.
- The taxpayer who is obliged to submit a disclosure form about transactions between related persons: each taxpayer whose transactions with related persons exceeding JOD 500,000 during a period of 12 consecutive months shall submit disclosure form stipulated in the provisions.

**Information to be included in the disclosure form**

1. Information associated to related persons or persons associated to transactions between related persons, including the names of these persons, their countries of residence and tax residence;
2. Business restructuring information for the Multinational Enterprises group or the taxpayer;
3. Information about the actual owner and the beneficial owner, as the case may be, for the related persons, including the name, incorporation country, country of residence and ownership percentage;
4. Total revenues, total expenses and the value of the net profit or loss mentioned in the tax return;
5. Information about the type of relation between the persons related to the transactions and related persons and its nature;
6. Description of business nature or business activities for related persons and the transactions between them, including:
   a) purchase or sale of goods (finished or unfinished)
   b) purchase or sale of property and other assets
   c) support or receive services
   d) agency arrangements
   e) leasing arrangements
   f) financing related to search and development
   g) licensing and franchise agreements
   h) financing (including loans and owner's contributions in cash or in kind
7. The method used for transfer pricing;
8. The taxpayer declaration on whether he concluded a transaction between related persons or any transaction without compensation or for non-cash compensation (such as barter and deals) during the tax period of the tax return. In the event that the declaration comprises a transaction between related persons or more, the taxpayer shall submit a statement of the details of these transactions, including information related to the fair market value of the barter or the compensation received;
9. The taxpayer declaration on whether he maintains the documentations related to transfer pricing, including a master file and a local file.

**Person obliged to submit the special report on each country**

A person who is a member of Multinational Enterprises group whose total consolidated revenues exceed JOD 600,000,000 according to their financial statements for the previous tax period shall submit the special report on each country to the Department within a period not exceeding 12 months following the tax period of Multinational Enterprises group. The special report on each country will include the following information:

1. the name of the multinational Enterprise
2. the relevant tax period
3. the currency used
4. place of tax residence
5. the resident subsidiaries, their tax numbers and addresses
6. the place of incorporation if it is different from the place of tax residence
7. the main activities according to the approval model
8. revenues
9. profit/loss
10. income tax paid
11. income tax due
12. the declared capital
13. accumulated profits
14. number of employees
15. tangible assets other than cash or the like.

**Local file**

The taxpayer is obliged to organise a local file that includes basic and detailed information about all transactions with related persons and submit it to the Department within a period not exceeding 12 months following the tax period.

The basic information of the local file includes the following:

1. The information of the taxpayer, including the following:
   a) Description of the administrative organisation of the taxpayer and its organisational structure, and description of the persons to whom taxpayer's administration reports are submitted and the countries in which the headquarters of these persons are located
   b) A detailed description of the taxpayer's business, activities and strategy, including a statement of restructuring operations or asset transfers operations
2. The most important information about the transactions of the related persons and their documents, provided that the information includes the following:
   a) A description of the transactions between related persons
   b) The value of payments and revenues within the group for each category of transactions between related persons
   c) The identity of the related persons participating in each category of transactions
   d) A copy of all agreements concluded by those charged with transactions within the group
   e) A detailed comparison and analysis of the jobs of the taxpayer and related persons
   f) The transfer pricing method adopted for the transactions, the applicable assumptions for this method, and the reasons for choosing this method
   g) List, description and analysis of independent comparable internal or external transactions
   h) The settlements that were made, if any
   i) The financial information on which it is based in applying the transfer price method
3. A comprehensive analysis of the sector in which the person conducts his activities, including:
   a) The biggest competitors
   b) Analysis of strengths, weaknesses, opportunities and threats (SWOT)
   c) Supplier capabilities
   d) Buyer capabilities
   e) Availability of alternatives
   f) The volume and activity of the taxpayer
   g) Supply and demand trends
   h) Requirements to enter the sector
   i) The most important target international markets
   j) Market share
   k) Delivery methods.
4. Financial statements, including the following:
   a) The consolidated annual final financial statements of the taxpayer for the relevant tax period
   b) Tables of information and distribution that show the relationship between the financial statements used in the application of the transfer price method
   c) A summary of the relevant financial data tables used in the analysis of comparability and the source of the data.

**Master file**

The taxpayer is obliged to organise a master file that includes basic and detailed information on global business and transfer pricing policies for the transactions of the Multinational Enterprises group to which the taxpayer belongs, and submit it to the Department within a period not exceeding 12 months following the tax period.

The basic information of the master file includes the following:

1. The organisational structure that shows the ownership of the establishments of the Multinational Enterprises group and the geographical location of each of them
2. A description of the business of the Multinational Enterprises group, including:
   a. Factors affecting business profits
   b. A description of the supply chain for the most important products and services provided by the group in terms of sales volume, including other products and services that represent more than 5% of the group's sales
   c. A list of agreements to provide services concluded between members of Multinational Enterprises group or any similar arrangement
   d. The main markets for the group's products and services
   e. A job analysis showing the value added by the group's establishments
   f. A description of the most important deals related to business restructuring, acquisitions and liquidation during the tax period
3. Information about the intangible assets of the Multinational Enterprises group, including a list of these assets, agreements concluded between related persons, transfer pricing policies, and the group's strategy in managing these assets and transferring the ownership of these assets
4. Information about financing activities between the establishments of the Multinational Enterprises group, including:
   a. General description of how the group will be financed, including the most important financing deals concluded with independent financiers
   b. Determining the members of the Multinational Enterprises group who carry out major financing activities for the group, their countries of incorporation and the headquarters of their Administration

   c. The transfer pricing policies of the Multinational Enterprises group regarding financing operations between related persons
5. Information on the financial and tax positions of the Multinational Enterprises group, which includes:
   a. The consolidated financial statements of the Multinational Enterprises group for the tax period subject of the tax return prepared for financial declaration purposes or for regulatory, administrative, tax or other purposes
   b. A list of transfer pricing agreements concluded between a Multinational Enterprises group and tax administrations, if any.

**Definitions**

- The parent establishment of a Multinational Enterprises group is the establishment that directly or indirectly owns stakes or shares in one or more Multinational Enterprises and that is committed to preparing consolidated financial statements in accordance with international accounting standards generally accepted in its tax residence country and no other taxpayer of this Multinational Enterprises group owns directly or indirectly the shares described.
- The concept of the taxpayer of the Multinational Enterprises group includes:
  - o Any independent business establishment related to Multinational Enterprises group that is included in the group's consolidated financial statements for the purposes of financial reports preparation, or shall be included if its shares are offered for trading in the financial markets
  - o The taxpayer mentioned under the point before if it is not included in the consolidated financial statements of the Multinational Enterprises group because of its volume or the insignificance of its impact
  - o A permanent establishment affiliated with any independent business establishment related to the Multinational Enterprises group listed in the two points before, provided that the business establishment prepares or is required to prepare separate financial statements for this permanent establishment for the preparation of financial and regulatory reports and the preparation of tax returns, or for internal local control purposes.
- The concept of a Multinational Enterprises group includes a legal person residing in one country and is also subject to tax in another country as a result of having a permanent establishment in the other country.

J

**Transfer pricing methods**

The taxpayer may adopt any of the following transfer pricing methods in accordance with international accounting standards:

a. Comparable uncontrolled price method
b. The Resale price method
c. The total cost method plus the profit margin
d. Transactional net profit margin method
e. Transactional profit split method.

- The taxpayer shall specify the reasons that were relied upon in choosing the transfer pricing method
- The taxpayer shall provide the assumptions that it has adopted for the purposes of applying transfer pricing
- The taxpayer shall submit a disclosure from a certified accountant explaining the taxpayer's compliance with the group's transfer pricing policy and its impact on the final financial statements
- The taxpayer shall, in the event of adopting any of the transfer pricing methods referred to before in any tax period, continue to adopt the same method for subsequent tax periods.

## F. WITHHOLDING TAX

- There is no withholding tax on dividends paid to non-resident companies;
- There is a 7% withholding tax on gross interest paid to non-resident companies;
- There is a 10% withholding tax on royalties, services fees and management fees paid to non-resident companies.

## G. EXCHANGE CONTROL

There are no exchange control rules in Jordan.

## H. PERSONAL TAX

Jordanians and non-Jordanian resident individuals are both subject to the same rules and taxes are assessed on income in, or from, Jordan. Taxable income is the gross income less the following deductions (exemptions).

Tax on physical persons:

- JOD 10,000 yearly exemption for a resident natural person for 2019 and JOD 9,000 for 2020 and subsequent years;
- JOD 10,000 yearly exemption for dependents for 2019 and JOD 9,000 for 2020 and subsequent years;
- Medical, educational, rent, housing loan interest and Murabaha exemptions for Natural Persons with dependents:
  - o JOD 1,000 starting from 2020 and subsequent years;
  - o JOD 1,000 for the taxpayer's husband starting from 2020 and subsequent years;
  - o JOD 1,000 per child with a maximum of JOD 3,000.

However, the maximum exemption amount granted to taxpayers with dependents including all exemptions shall not exceed JOD 23,000 across the board.

Tax rate categories for Natural Persons with/without dependents:

- 5% on the first JOD 5,000
- 10% on the next JOD 5,000
- 15% on the next JOD 5,000
- 20% on the next JOD 5,000

- 25% on amounts exceeding JOD 20,000 and up to JOD 1 million;
- 30% on amounts exceeding JOD 1 million.

A non-Jordanian resident pays tax only on income from Jordanian sources of income while his/her dependents should be residing in Jordan in order to benefit from the relevant exemptions for dependents.

## I. TREATY AND NON-TREATY WITHHOLDING TAX RATES

| Yemen | 10 | 10 | 10 | 10 |

Notes:

1. No limitation on WHT on dividends, interest and royalties under the treaty. The domestic rate applies. Member states are: Egypt, Iraq, Jordan, Kuwait, Libya, Mauritania, Palestinian Autonomous Area, Saudi Arabia, Somalia, Sudan, Syria, the United Arab Emirates and Yemen.
2. The 10% reduced rate applies if the beneficial owner is a company that controls directly or indirectly at least 10% of the voting power in the dividend-paying company.
3. The 5% reduced rate applies if the beneficial owner is a company (other than a partnership) which holds at least 25% of the capital of the dividend-paying company, provided that this holding was not acquired primarily for the purpose of taking advantage of this provision.
4. The 5% reduced rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the dividend-paying company.

5. The 5% reduced rate applies if the beneficial owner is a company which has owned at least 25% of the capital of the dividend-paying company.
6. The 5% reduced rate applies if the beneficial owner is a company which holds directly at least 5% of the capital of the dividend-paying company.
7. There is no limitation under the treaty, the domestic rate applies.
8. The 10% reduced rate applies if the recipient is a company (excluding partnership) which holds directly at least 25% of the capital of the dividend-paying company.
9. The 0% rate applies if the beneficial owner is the state, one of its political subdivisions or local governments, or a financial institution.
10. The 7% reduced rate applies if the beneficial owner is a company which holds directly at least 25% of the capital of the dividend-paying company.

## KEY TAX POINTS

- Standard corporate income tax rate is 20%.
- VAT is levied at a standard rate of 12%.
- Dividends, interest and royalties paid to non-residents without a permanent establishment in Kazakhstan are subject to 15% withholding tax, subject to the application of a double tax treaty. Dividends, interest and royalties paid to non-residents registered in a tax haven jurisdiction are subject to 20% withholding tax. Technical service fees and management fees are subject to 20% withholding tax. However, certain technical fees may be reclassified as royalties and thus be subject to 15% withholding tax only.
- Branches are subject to corporate tax at a rate of 20% on their net income. A 15% branch remittance tax also applies to net income after corporate tax regardless of whether the net profit is remitted to the head office but subject to the application of a double tax treaty. The effective tax rate for the income of branches of foreign legal entities therefore amounts to 32% if there is no reduction under a the application of a double tax treaty

## A. TAXES PAYABLE

## FEDERAL TAXES AND LEVIES

### COMPANY TAX

Resident companies are taxed on their worldwide income while non-residents are generally only taxed on Kazakhstan-sourced income. A company is considered to be a Kazakh tax resident if it is established under the laws of Kazakhstan or if its governing body or place of actual management and control is located in Kazakhstan.

The standard corporate income tax rate of 20% applies to both domestic and foreign companies. The corporate income tax return is due by 31 March of the year following the reporting tax year.

### CAPITAL GAINS TAX

Capital gains are taxed as normal income and thus subject to the standard corporate income tax rate of 20%.Capital gains from the disposal of shares are exempt, provided that the shares are:

- held for a period of at least 3 years; and
- held in resident companies whose assets which are used for subsurface use activities in value do not exceed 50% of the total asset's value of that company.

### BRANCH PROFITS TAX

Like resident entities, branches are subject to corporate tax at a rate of 20% on their net income. A 15% branch remittance tax also applies to net income after corporate tax regardless of whether the net profit is remitted to the head office but subject to the application of a double tax treaty. The effective tax rate for the income of branches of foreign legal entities therefore amounts to 32% if there is no reduction under the application of a double tax treaty.

## SALES TAX / VALUE ADDED TAX (VAT)

The standard rate of VAT is 12%. It is levied on the supply of goods and services and on imports. VAT is payable by all legal entities (including branches and representative offices of non-resident legal entities) and individual entrepreneurs registered for VAT purposes. The registration is mandatory if the taxable person has a turnover exceeding 30,000 MCI in a calendar period (currently, 1 MCI = KZT 2,917). Voluntary VAT registration is allowed.

The VAT return shall be filed for each tax period by the 15th day of the second month following the reporting period while the deadline for payment of VAT is due by the 25th day of the second month following the reporting period.

## B. DETERMINATION OF TAXABLE INCOME

Entities are subject to corporate income tax on trading profits and other taxable income. In general, all expenses incurred by a taxpayer are deductible if they are made with the view to derive business income (except for those expenses specifically listed as non-deductible by the Tax Code) and if they are supported by appropriate documentation.

Non-deductible expenses comprise, among others, dividends, administrative fines and not duly documented expenses.

## DEPRECIATION

The accepted depreciation method is the declining balance method. The Tax Code provides for the following depreciable asset groups and depreciation rates:

| Asset group | Rate (%) |
|---|---|
| Buildings and constructions (with the exception of oil, gas wells and transmission devices) | 10 |
| Machinery and equipment (except those for oil and gas production, and computer equipment for information processing) | 25 |
| Computers and equipment for information processing, software | 40 |
| Fixed assets not included in the preceding groups but including oil, gas wells and transmission devices | 15 |

## CAPITAL GAINS AND LOSSES

Capital losses that cannot be fully offset against capital gains in the current tax year can be carried forward for up to 10 years and credited against future capital gains, subject to certain exceptions.

K

## DIVIDENDS

Dividends received are income tax-exempt, with the exception of some categories such as dividends received from risk investment funds.

No withholding tax is levied on dividends distributed to resident companies. Dividends paid to non-residents without a permanent establishment in Kazakhstan are subject to 15% withholding tax. Dividends paid to non-residents registered in a tax haven jurisdiction are subject to 20% withholding tax.

Dividends are a non-deductible expense.

## INTEREST DEDUCTIONS

Thin capitalisation rules apply in respect of interest paid to related parties and persons registered in black-listed jurisdictions. The interest paid is deductible if the debt-to-equity ratio does not exceed 4:1 (7:1 for financial institutions).

## LOSSES

Operating losses may be carried forward for up to 10 years. Loss carry-back is not available. Depreciation expenses are deductible during a loss-making year.

## FOREIGN SOURCE INCOME

Resident companies and individuals are taxed on their worldwide income while non-residents are subject to tax on their Kazakh-sourced income only.

## TAX INCENTIVES

- Accelerated tax deductions for capital expenditure, subject to certain conditions;
- Incentives for investment in priority economic sectors related to business in special economic zones and investment in qualifying investment priority projects.
- Special tax regimes and incentives for qualifying non-profit organizations and organizations operating in social sectors.

## C. FOREIGN TAX RELIEF

Resident taxpayers may claim foreign tax relief unilaterally or based on tax treaties (if applicable). A credit is generally available for foreign taxes paid on foreign-sourced income on the basis of documentation confirming the foreign income tax payment. Double tax treaties usually grant a tax credit for the tax paid on income and capital having its source abroad. Double tax treaties prevail over domestic tax legislation.

## D. CORPORATE GROUPS

Group taxation is not permitted under the tax legislation, each company must file a separate return. However, non-residents having several permanent establishments in Kazakhstan may opt to submit a consolidated tax return.

**Controlled Foreign Companies (CFC)**

CFC rules apply to residents with at least a 10% participation in an entity based in a jurisdiction having a preferential tax regime. A jurisdiction is considered as having a preferential tax regime if the following conditions are fulfilled:

- the corporate income tax rate is 10% or lower; or
- it has laws concerning the confidentiality of financial information or laws allowing secrecy in respect of the actual owner of property or the income or actual owners, founders or shareholders of a company.

A list of preferential jurisdictions is made by the government. It currently has 57 jurisdictions listed, including Malta and Panama.

## E. RELATED PARTY TRANSACTIONS

### Transfer pricing

The current Law on transfer pricing came into force on 1 January 2009 adopting the arm's length principle and comprising reporting requirements. The methods allowed to determine the market price are the comparable uncontrolled price method, cost plus, resale price, profit split and the transactional net margin method. The legislation does not provide for the possibility to conclude an advance pricing agreement (APA) with the tax authorities.

On 25 April 2018, the State Revenue Committee announced the introduction of a three-tiered approach to TP documentation. According to Law No. 122-VI of 25 December 2017, multinational enterprises (MNEs) that operate in Kazakhstan are obliged to prepare and submit (i) a country-by-country report (ii) a master file (iii) a local file and (iv) a notification.

The Law defines an MNE group as a group of legal entities, including a parent company, which meets all of the following requirements:

- Legal entities are connected through control and/or ownership;
- At least one entity is a Kazakhstan tax resident or a foreign entity that carries out its business through a PE in Kazakhstan; and
- Consolidated financial statements are prepared with respect to such entities. The consolidation requirement could be omitted if it is in line with IFRS.

### Country-by-country (CbC) reporting

The CbC report should be submitted by one of the following members of an MNE group:

- A parent company that is a tax resident in Kazakhstan;
- An authorized member (if such authorization is granted by a parent company); or
- A resident or non-resident entity that operates in Kazakhstan through a PE, upon request of the Kazakhstan tax authorities.

For CbC reporting purposes, a group consolidated revenue for the fiscal year immediately preceding the reporting financial year should not be less than:

- EUR 750 million if a parent entity is a resident of Kazakhstan; or
- As stipulated by foreign legislation if a parent company or an authorized member are not residents of Kazakhstan.

The CbC report should be submitted within 12 months following the reporting financial year or, if it has been requested by the tax authorities, from the date of such request. The CbC reporting requirements were introduced retrospectively with effect from 2016.

### Master file

The MNE group must submit a master file upon request of the tax authorities if a Kazakhstan entity or member of an MNE group performs controlled transactions. The master file for the reporting financial year should be submitted within 12 months from the date of received request.

### Local file

Similar to the requirements stipulated for the master file, if a business activity falls into the scope of controlled transactions, a member of the MNE group should submit a local file. A local file should be submitted if the threshold of a group consolidated revenue is lowered to 5 million monthly calculation index (MCI), which is approximately EUR 30 million. The local file should be submitted to the tax authorities on an annual basis and within 12 months following the reporting financial year.

## F. WITHHOLDING TAX

Dividends, interest and royalties paid to non-residents without a permanent establishment in Kazakhstan are subject to 15% withholding tax. Dividends, interest and royalties paid to non-residents registered in a tax haven jurisdiction are subject to 20% withholding tax. Technical service fees and management fees are subject to 20% withholding tax. However, certain technical fees may be reclassified as royalties and thus be subject to 15% withholding tax only.

## G. EXCHANGE CONTROL

In principle, payments between residents may only be made in Kazakhstani tenge. Under the Civil Code, an obligation between two residents may not be denominated in foreign currency, subject to certain exceptions. This rule does not apply to contracts between residents and non-residents, payments between which may be made in any currency. Certain transactions may be subject to the National Bank's notification or registration regime.

## H. PERSONAL TAX

Residents are subject to tax on their worldwide income. Non-resident individuals are subject to tax on Kazakh-sourced income only. Are deemed to be residents in Kazakhstan:

- individuals who permanently reside in Kazakhstan; or
- individuals who have their centre of vital interests in Kazakhstan.

Employment income is taxed at a flat rate of 10% for residents and non-residents alike. Dividends are taxed at 5% for residents while dividends and capital gains are taxed at 15% for non-residents. Other income is taxed at 10% for residents and 20% for non-residents.

## I. TREATY AND NON-TREATY WITHHOLDING TAX RATES

Notes:

1. Subject to the application of a tax treaty, a final 15% withholding tax rate is applied to dividends, interest and royalties paid to non-residents. The rate is 20% if dividends, interest and royalties are paid to entities registered in black-listed jurisdictions. The list currently contains 57 jurisdictions, including Panama and Malta.
2. The 5% reduced rate applies if the beneficial owner is a company which holds directly at least 10% of the capital of the dividend-paying company.
3. The reduced rate applies if the beneficial owner is a company which holds directly or indirectly at least 10% of the capital of the dividend-paying company.
4. The 5% reduced rate applies if the beneficial owner is a company which controls directly or indirectly at least 10% of the voting power of the dividend-paying company.
5. The 5% reduced rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the capital of the dividend-paying company.
6. Effective date: 1 January 2020.
7. The 5% reduced rate applies if the beneficial owner is a company (other than a partnership) which controls directly at least 10% of the voting power of the dividend-paying company.
8. The general withholding tax rate under the treaty is 15%. However, by virtue of a most favoured nation clause, a reduced 10% rate applies (under the Kazakhstan-Czech Republic treaty the rate is 10%).
9. The 5% reduced rate applies if the beneficial owner is a company which holds directly or indirectly at least 25% of the capital of the dividend-paying company.
10. The 5% reduced rate applies if the recipient is a company (excluding partnership) which holds directly at least 20% of the capital of the dividend-paying company.
11. The 5% reduced rate applies if the beneficial owner is a company that has owned directly or indirectly, for the period of six months ending on the date on which entitlement to the dividends is determined, at least 10% of the voting shares of the dividend-paying company.
12. The 5% reduced if the beneficial owner is a company (other than a partnership) which holds at least 10% of the capital of the dividend-paying company.
13. The 5% reduced rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 15% of the capital of the dividend-paying company.
14. The reduced rate applies if the beneficial owner is a company which holds directly at least 25% of the capital of the dividend-paying company.
15. According to article VII of the Protocol to the treaty, dividends paid by a company resident in Kazakhstan to a company resident in the Netherlands, which holds directly or indirectly at least 50% of the capital of the dividend-paying company, shall be exempt from tax in Kazakhstan, provided that the Dutch company has made an investment in the Kazakhstan company of at least USD 1 million, which investment is guaranteed in full or insured in full by the Kazakh government, the Kazakh central bank or any agency or instrumentality (including a financial institution) owned or controlled by the Kazakhstan Government, and has been approved by the Dutch government. If the foregoing investment exceeds USD 1 million, but the entire investment is not guaranteed in full or insured in full, then this provision shall apply only to that portion of the dividends which the guaranteed or insured portion of the investment bears to the total investment.
16. The 10% reduced rate applies if the recipient company owns at least 20% of the capital or the voting power of the dividend-paying company.
17. The 10% reduced rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the capital of the dividend-paying company.
18. The 10% reduced rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 30% of the capital of the dividend-paying company.
19. The 5% reduced rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the voting power of the dividend-paying company.
20. The 5% reduced rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the dividend-paying company.
21. According to article 2 (a) of the Protocol to the treaty, dividends paid by a company resident in Kazakhstan to a company resident in Switzerland, which holds directly or indirectly at least 50% of the capital of the dividend-paying company, shall be exempt from tax in Kazakhstan, provided that the Swiss company has made an investment in the Kazakhstan company of at least USD 1 million, which investment is guaranteed in full or insured in full by the Swiss government, the Swiss central bank or any agency or instrumentality (including a financial institution) owned or controlled by the Swiss Government, and has been approved by the Kazakhstan government. If the foregoing investment exceeds USD 1 million, but the entire investment is not guaranteed in full or insured in full, then this provision shall apply only to that portion of the dividends which the guaranteed or insured portion of the investment bears to the total investment.
22. The 5% reduced rate applies if the recipient company owns at least 25% of the capital or the voting power of the paying company, as the case may be.
23. The domestic withholding tax rate applies.
24. The 5% reduced rate applies if the beneficial owner is a company which owns at least 10% of the voting stock of the dividend-paying company.
25. The 5% reduced rate applies if the beneficial owner is a company that has owned directly at least 70% of the voting power of the dividend-paying company.
26. The 0% rate applies subject to the following conditions:
    - the beneficial owner is not an entity registered in black-listed jurisdictions (see also footnote 1);
    - the shares from which the dividends are derived are listed on the Kazakh stock exchange or the shares are owned for more than 3 years;
    - the resident company is not regarded as a subsurface user; and
    - property of a subsoil user (if any) in the assets of the resident company does not exceed 50%.

## KEY TAX POINTS

- Resident and non-resident companies are subject to income tax on income accrued or derived from Kenya at different rates.
- Capital Gains Tax (CGT) is applicable at a rate of 5% on the net gain on the transfer of property. It is a final tax and cannot be offset against other income taxes.
- VAT is chargeable on imports and the supply of goods and services in Kenya. The standard rate is 16%. Certain goods and all exports are zero-rated. Petroleum products are subject to VAT at the rate of 8%. Some goods and services such as unprocessed agricultural products and financial services are VAT exempt.
- Digital Service Tax (DST) is applicable at the rate of 1.5% of the gross transaction value of income of non-resident persons earned from users in Kenya of services that are provided through a digital marketplace. This took effect from 1 January 2021.
- Minimum tax is chargeable at the rate of 1% of the annual gross turnover for resident and non-resident persons with Permanent Establishments (PE) if it exceeds the estimated instalment taxes. However, the High Court has suspended the implementation of minimum tax and the Kenya Revenue Authority (KRA) appealed the matter at the Court of Appeal.
- Kenyan resident individuals are taxed on Kenya-sourced income and on income from employment or services rendered abroad.
- Non-resident individuals are taxable on any income from employment with, or services rendered to, an employer resident in Kenya or the permanent establishment in Kenya of a non-resident employer.
- There are no foreign exchange controls applicable in Kenya and foreign currency is freely transferable in Kenya subject to Anti-Money Laundering Regulations.
- There may be special tax rates for corporations in Special Operating Framework with the Kenyan Government.
- Dividend Distribution Tax at the corporate income tax rate of 30% is applicable on distribution of untaxed gains in the form of dividends.
- Broader definition of control and a permanent establishment in Kenya for the purpose of determining arm's-length price in related party transactions and charging tax on income derived from or accrued in Kenya respectively.
- Control now entails ownership of at least 20% of the shares or voting rights of a company. Moreover, control arises when a person advances loans to another person which constitutes 70% of the book value of the total assets or guarantees at least 70% of the total indebtedness of the other person or appoints more than half of the board of directors/ at least one director/ executive member of the governing board. It also arises when a person or his designate person supplies at least 90% of his sales to another person or purchases at least 90% of the sales of another person as the Commissioner deems the influence in price to be.
- A permanent establishment is now created when there is a warehouse related to a person whose business is providing storage facilities to another person, a farm/plantation for agricultural activities, a building /construction site/ any other supervisory activity connected to the site or project which has existed for a period of 183 days/ and aggregate of between 30 to 183 days/ more than 30 days, providing consultancy services within Kenya for an aggregate period of 91 days per year, an installation/structure used to explore natural resources which continues for more than 91 days, an agent who negotiates and concludes contracts on behalf of the person.

## A. TAXES PAYABLE

### CORPORATION TAX

Corporation tax is based on adjusted taxable profits. The rates are:

- Resident companies: 30%;
- Non-resident companies: 37.5%;
- Turnover tax: 1% on gross monthly turnover payable by resident persons with a turnover of between KES 1 million to KES 50 million.
- Real estate developers constructing at least one hundred residential units per year will enjoy a reduced corporation tax rate of 15% subject to approval from the Cabinet Secretary responsible for Housing;
- Companies engaging in local assembly of motor vehicles will be subject to a reduced income tax rate of 15% for the first five years of operations in Kenya. This has become effective from 1 January 2018.

- Companies engaging in plastic recycling activities will be subject to a reduced income tax rate of 15% for the first five years of operations in Kenya. This has become effective from 7 November 2019.

## CAPITAL GAINS TAX

CGT is applicable at the rate of 5% of the net gain on the transfer of property. It is a final tax and cannot be offset against other income taxes. There are certain circumstances under which CGT is exempted.

## DIGITAL SERVICE TAX (DST)

DST is applicable at the rate of 1.5% of the gross transaction value on the income of non-resident persons, which is derived from or accrued in Kenya from the provision of a digital service or a digital marketplace. Under DST, the income is accrued in or derived from Kenya if the user of the digital service or digital marketplace is in Kenya. The gross transaction value for provision of digital services is the value of the digital service while for provision of the digital marketplace it is the commission or fee paid for use of the online platform. However, resident persons are exempt from paying digital service tax.

Non-resident digital service or digital marketplace providers without a PE in Kenya are required to appoint DST agents in Kenya who will be responsible for remittance of DST in line with the tax laws in Kenya.

## MINIMUM TAX

Minimum tax is applicable at the rate of 1% of the annual gross turnover for resident and non-resident persons with PEs in Kenya and is payable in instalments if it exceeds the estimated instalment taxes. Minimum tax shall be a final tax for loss making companies. There are certain circumstances under which minimum tax is exempted such as: businesses whose retail prices are controlled by the government, insurance businesses and entities gazetted as such by the CS National Treasury, manufacturing companies whose cumulative investment in the preceding four years is at least KES 10 billion, distribution businesses whose income is on commissions and Persons licensed under the Special Economic Zones Act, 2015.

However, the amendments which introduced minimum tax provisions and its enabling regulations were suspended from taking effect by the High Court of Kenya on 20 September 2021. The matter was appealed at the Court of Appeal by the KRA.

## BRANCH PROFITS TAX

A branch of a foreign entity pays corporate tax at the rate of 37.5%. There is no branch remittance tax in Kenya.

K

## VALUE ADDED TAX (VAT)

The VAT rates are 0%, 8% and 16%. Exports of good are zero rated while exports of services are VAT exempt. Some goods and services such as unprocessed agricultural products and financial services are VAT exempt. Some privileged bodies enjoy exempt and zero-rated status. Petroleum products are subject to VAT at the rate of 8%.

## WITHHOLDING VAT

Withholding VAT is deductible at the rate of 2% on taxable value of goods and services supplied to appointed agents such as Government Ministries, Departments, Agencies, and any other person appointed by the Commissioner.

## EMPLOYMENT BENEFITS TAX

Cash and non-cash benefits are taxable on the higher of the cost incurred by the employer or the fair market value. The taxable value is added to the emoluments for tax purposes. Non-cash benefits are not taxable where the total aggregate value does not exceed KES 36,000 per annum. In addition, meals with an aggregate value of less than KES 48,000 per annum are not taxable.

Employment income is taxed on a withholding basis known as PAYE at a graduating scale of 10% to 30%.

### Motor Vehicles

The benefit is the higher of 2% per month of the initial cost of the vehicle or the commissioner prescribed rates. For leased vehicles the benefit is the cost of leasing.

### Housing

For non-executive directors the benefit is the higher of 15% of total income (emoluments - for a full-time service director), fair market rental value and rent paid. For agricultural employees it is 10% of emoluments. For other employees it is the higher of rent paid or 15% of emoluments.

### Loans to employees

Loans to employees are taxed at the corporate tax rate on the difference between the interest rate prescribed by the Commissioner and the actual interest rate paid by the employee.

### Other benefits

The taxable benefit of furniture is 1% of cost per month, telephone is 30% of the bill, and employee share ownership plans (ESOPs) is the difference between the market price of shares and the offer price at the date the option is granted.

### Affordable housing relief

Employees making contributions under affordable housing scheme are entitled to an affordable housing relief of 15% of their gross emolument up to a maximum of KES 108,000 per annum.

## OTHER TAXES

## LAND RATES AND RENT

Land rates are based on the location of the property (under zoning laws) and are charged annually at a percentage of the site value.

Land rent is charged annually on all land leases issued by the government based on the value index assigned at by a government valuer according to the use of the land.

## NATIONAL SOCIAL SECURITY FUND (NSSF)

Contributions are set at the rate of a combined minimum of 12% of the pensionable earnings made up of half contributions of the employee and employer.

The NSSF contributions as per the NSSF Act 2013 are set at an upper limit of KES 6,000 per employee earning more than KES 18,000 per month. However, an employee earning less than the lower earnings limit of KES 6,000 will contribute up to a maximum of KES 720. The effective date for the NSSF Act 2013 is yet to be set due to an impending court case.

The old NSSF contributions are therefore still applicable and are set at 10% of monthly income up to a maximum of KES 400 per month. Half of the contribution is paid by the employer and half by the employee. In case of casual employees only the employer pays 5% of gross wages and is payable even for one employee.

Monthly NSSF contributions are payable on or before the ninth day of the month following the month to which the return relates.

## NATIONAL HOSPITAL INSURANCE FUND (NHIF)

NHIF payments are set at graduated scale rates starting at KES 150 per month to a maximum of KES 1,700 per month for employed persons on salaries of KES 100,000 and above, and KES 500 per month for self-employed persons. The remittances are made on or before the ninth day of each month.

## SINGLE BUSINESS PERMIT

The business permit cost is applicable and varies based on respective county government prescribed rates.

## NATIONAL HOUSING FUND LEVY

Effective 1 January 2019, employers and employees are expected to contribute 1.5% (each) on monthly basic salary to the National Housing Development Fund ("Fund"). The contributions should not exceed KES 5,000 per month. However, this is currently suspended due to ongoing litigation processes challenging the legality of its imposition. There is a proposal to make the contribution to the fund voluntary.

## NATIONAL INDUSTRIAL TRAINING AUTHORITY

The Directorate of Industrial Training levies administers the Industrial Training Levy at KES 50 per employee per month. Contributing employers qualify for reimbursement of approved training expenses.

## CATERING LEVY

The catering levy is a 2% tax levied on hotels and restaurants.

## STANDARD LEVY

The standard levy is due from manufacturers at the rate of 0.2% of ex-factory price subject to a minimum of KES 1,000 per month and a maximum of KES 400,000 per year.

## B. DETERMINATION OF TAXABLE INCOME

## CAPITAL ALLOWANCES

Old rates for capital allowances were repealed with effect from 25 April 2020 with the new rates set out as follows:

| Investment Allowance Category | Applicable Rate |
|---|---|
| **Buildings:** | |
| Hotel building | 50% in first year of use and 25% on the residual value per year on equal instalments |
| Building used for manufacture | |
| Hospital buildings | |
| Petroleum or gas storage facilities | |
| Educational buildings including student hostels | 10% per year on equal instalments |
| Commercial building | |
| **Capital expenditure on machinery:** | |
| Machinery used for manufacture | 50% in first year of use and 25% on the residual value per year on equal instalments |
| Hospital equipment | |
| Ships or aircrafts | |
| Machinery used to undertake exploration operations under a prospecting right | |
| Machinery used to undertake exploration operations under a mining right | |
| Motor vehicle and heavy earth moving equipment | 25% per year on equal instalments |
| Computer and peripheral computer hardware and software, calculators, copiers and duplicating machines | |
| Filming equipment by a local film producer licensed by the Cabinet Secretary responsible for filming | |

| Investment Allowance Category | Applicable Rate |
|---|---|
| Furniture and fittings | 10% per year on equal instalments |
| Telecommunications equipment | |
| Purchase or an acquisition of an indefeasible right to use fibre optic cable by a telecommunication operator | |
| Other machinery | |
| Farm works | 50% in first year of use and 25% on the residual value per year on equal instalments |

The capital deductions for machinery used to undertake operations in the extractive industry under a prospecting right shall also be computed on equal instalments and aligned to the Second Schedule.

## DEPRECIATION

This is an accounting expense which is not allowable for tax purposes. However, wear and tear allowances indicated above are allowable deductions while computing income tax.

## STOCK / INVENTORY

The cost of sales is deducted as allowable expenditure before arriving at the accounting profits. General provisions on slow moving stock and stock write-offs may be allowable in arriving at the taxable income based on certain established criteria.

## CAPITAL GAINS AND LOSSES

Capital Gains Tax (CGT) at the rate of 5% on net gains was reintroduced with effect from 1 January 2015 and is a final tax. However, gains on the transfer of securities traded on any securities exchange licensed by Capital Markets Authority are not subject to CGT. In addition, the Kenyan Income Tax Act provides some of the transactions which are exempted from CGT.

CGT is now applicable to gains realised by General Insurance Companies on transfer of property.

## DIVIDENDS

Dividends are taxed on a Withholding Tax (WHT) basis which is a final tax. Dividends are tax-exempt for resident companies controlling more than a 12.5% shareholding of another resident company.

Distribution of dividends from untaxed gains will attract dividend distribution tax at the rate of 30% effective 1 January 2019.

## INTEREST DEDUCTIONS

There is a restriction on the tax deductibility of interest expenses on any gross interest amounts paid or payable to related persons and third parties in excess of 30% of Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA). This is applicable to interest on all loans, payments that are economically equivalent to interest and expenses incurred in connection with raising the finance. It applies to all entities including those in the extractive industry except for:

(a) Banks or financial institutions licensed under the Banking Act; and

(b) Micro and Small enterprises registered under the Micro and Small Enterprises Act, 2012.

## TAX LOSSES

Tax losses can be carried forward to be offset against future taxable income for an indefinite period. The tax loss is only allowable on taxable income derived from the same specific source. These sources include income from renting or occupation of immovable property, income from withdrawals from a registered pension/provident fund by the employer, income from employment, business activities and income from agriculture, horticulture, forestry, etc. Tax Losses are not transferable from one entity to another.

## FOREIGN SOURCE INCOME

Income that is not accrued or derived from Kenya is not assessable in Kenya except:

(a) Employment income for an employee who at the time of employment was a resident person in respect of any employment by him outside or inside Kenya; and

(b) Business activities carried out across borders.

## RESIDENTIAL RENTAL INCOME TAX

Residential rental income tax at the rate of 10% is imposed on gross monthly residential rental income effective 1 January 2016. This classification targets residential property owners whose turnover is between KES 288,000 and KES 15 million annually. However, a taxpayer may opt to pay tax under the normal rates provided by the Income Tax law upon making an application to the Commissioner.

## WITHHOLDING TAX ON USE OF IMMOVABLE PROPERTY

Payments made to a resident in respect of rent, premium or similar consideration for the use or occupation of immovable property is subject to withholding tax at the rate of 10% for appointed agents only, with effect from 1 January 2017.

## TAX INCENTIVES

- Capital deductions are granted on assets based on various classification contained in the Income Tax Act. A ten-year tax holiday is available for certain designated enterprises manufacturing products for exports only (under the Export Processing Zones). At the end of the tax holiday, a reduced corporation tax rate of 25% is available. Special Economic Zones (SEZ) enjoy a reduced corporate income tax rate of 10% for the first 10 years and 15% for the next 10 years.

- A lower corporation tax of 27%, 25% and 20%, for the first 3-5 years for companies newly listed on a securities exchange, with at least 20%, 30% and 40% respectively, of the issued share capital listed. Companies which list their shares or any other security by way of introduction enjoy a lower corporation tax rate of 25% for a period of five years.
- Investment deduction (ID) at the rate of 100% where the cumulative investment value in the preceding three years outside Nairobi and Mombasa Counties is at least KES 2 billion, or where the investment value outside the Counties of Nairobi and Mombasa is at least KES 250 million, or where the capital investments are made in a Special Economic Zone (SEZ).
- Investment Deduction claim at the rate of 150% on capital expenditure supporting the Standard Gauge Railway GR operations up to 31 December 2022.
- Tax exemptions are available for organisations undertaking charitable, medical, alleviation of poverty, and religious activities subject to fulfilling the conditions set by the Income Tax Act.
- Companies engaging in local assembly of motor vehicles will enjoy a reduced corporation rate of 15% for the first five years of operations in Kenya and be subject to a further extension of five years where a company achieves a local content equivalent to 50% of the ex-factory value of the motor vehicles.
- Real estate developing companies constructing at least one hundred residential units per year are subject to corporation tax at the rate of 15% subject to approval from the Cabinet Secretary responsible for Housing.
- Reduced corporation tax rate of 15% for companies operating a plastics recycling plant for the first five years from the year of commencement of operations.
- Trusts and investee companies of Real Estate Investment Trusts (REITs) are exempt from income tax.
- Income Tax exemption for any transactions related to settlement on children from registered family trusts and exemption on income settlements from a family trust from being deemed income of the settlor.
- Sponsorship of Sports by companies is an allowable deduction upon obtaining approval from the Cabinet Secretary in charge of sports.
- Stamp Duty is normally applicable on transfer of property at the rate of 4% for property situated in a municipal area and 2% for property situated in rural areas on the value of the property.
- The government has introduced a waiver of Stamp Duty for first time home buyers under the affordable housing scheme.
- Immediate family transfers are exempt from CGT.

## C. FOREIGN TAX RELIEF

Domestic tax law provides that where foreign income is subject to income tax in Kenya the foreign tax paid will be treated as a deductible expense.

Foreign tax relief is limited only to countries which have a Double Tax Treaty with Kenya. Relief is granted by way of a credit.

## D. CORPORATE GROUPS

Generally, for tax purposes, a corporation tax rate of 30% applies to all incorporated companies irrespective of groups in Kenya. The rate is 37.5% for non-resident companies.

## E. VOLUNTARY TAX DISCLOSURE PROGRAMME (VTDP)

Voluntary Tax Disclosure Program (VTDP) is a programme that was introduced with effect from 1 January 2021 and will run for a three-year period ending 31 December 2023. It will cover tax liabilities that accrued within a period of five years prior to 1 July 2020. If the Commissioner of KRA is satisfied with the voluntary disclosure and enters into an agreement with a taxpayer for payment of the principal taxes, the accrued penalties and interest would be waived 100%, 50% and 25% for disclosures made within the first, second and third year of the VTDP programme respectively.

## F. RELATED PARTY TRANSACTIONS

Related party transactions are allowable expenses if incurred wholly and exclusively in the production of income and taxed as income if earned or accrued in Kenya as business activities.

Companies with related party transactions are required to prepare and document Transfer Pricing Documentation, as per the Kenyan Transfer Pricing Rules effective from 1 July 2006.

## G. WITHHOLDING TAX

The relevant rates are as follows:

| Description | Resident | Non-Resident |
|---|---|---|
| Artists and entertainers | – | 20% |
| Management fees | 5% | 20% |
| Management fees paid by SEZ Enterprise, Developer or Operator | 5% | 5% |
| Professional fees | 5% | 20% |
| Professional fees paid by SEZ Enterprise, Developer or Operator | 5% | 5% |
| Training fees (inclusive of incidental costs) | 5% | 20% |
| Training fees paid by SEZ Enterprise, Developer or Operator | 5% | 5% |
| Royalties | 5% | 20% |
| Royalties paid by SEZ Enterprise, Developer or Operator | 5% | 5% |
| Dividends (nil for resident shareholders with >12.5%) | 5% | 15% |
| Equipment (movable) Leasing | N/A | 15% |

| Description | Resident | Non-Resident |
|---|---|---|
| Interest (bank) | 15% | 15% |
| Interest (Housing bond-HBI) | 10% | N/A |
| Interest on two-year government bearer bonds | 15% | 15% |
| Other bearer bonds interest | 25% | 25% |
| Interest paid by SEZ Enterprise, Developer or Operator | 5% | 5% |
| Rent/Leasing – buildings (immovable)* | N/A | 30% |
| Rent - others (except aircraft) | N/A | 15% |
| Winnings from gaming and betting | 20% | 20% |
| Pensions/provident schemes (withdrawal) | 10-30% | 5% |
| Sale of property or shares in oil, mining or mineral prospecting companies | 10% | 20% |
| Insurance commissions | 10% | 20% |
| Insurance Premiums | N/A | 5% |
| Consultancy and agency (from 1 July 2003) | 5% | 20% |
| Consultancy (citizens of EAC member states) | 5% | 15% |
| Contractual (from 1 July 2003) | 3% | 20% |
| Telecommunication services/Message transmission | N/A | 5% |
| Natural Resource Income (with effect from 1 Jan. 2015) | 5% | 20% |
| Sales promotion, marketing, advertising services, and transportation of goods (excluding air and shipping transport services) | N/A | 20% |

* Withholding tax on rent paid to resident persons is only applicable if one is appointed as an agent.

- Services rendered by a non-resident subcontractor without a PE in Kenya are subject to a final 10% withholding tax effective 1 July 2021. Previously, the applicable rate was 5.625%.
- Fees paid by a contractor or a licensee to a non-resident person with respect to management, professional and training services are subject to 10% withholding tax effective 1 July 2021. Previously, the applicable rate was 12.5%.

## H. EXCHANGE CONTROL

There are no foreign exchange controls applicable in Kenya at present, and foreign currency is freely transferable in Kenya.

The Proceeds of Crime and Anti-Money Laundering Act provides that any transaction which involves the movement of USD 10,000 or more must be supported by documentary proof of the reason of such a transfer.

## I. INTERNATIONAL TAX AGREEMENTS

There is an outright recognition of multilateral agreements and treaties entered into or on behalf of the Government of Kenya relating to international tax, compliance prevention of evasion of tax or exchange of information on tax matters. Furthermore, the Country-by-Country reports for ultimate parent entities of Multi-National Enterprises resident in Kenya is enshrined in the tax laws.

## J. PERSONAL TAX

The tax rates are as follows:

| Annual Income (KES) | Rate |
|---|---|
| On the first 288,000 | 10% |
| On the next 100,000 | 25% |
| On income above 388,000 | 30% |

Mortgage tax relief of KES 300,000 per annum is granted on interest payments for one residential premises occupied by the taxpayer and Personal Tax relief is granted at KES 28,800 per annum. In addition, there is insurance relief on contributions made to the National Hospital Insurance Fund ("NHIF") in a year of income.

## K. TREATY AND NON-TREATY WITHHOLDING TAX RATES

| Item | Dividends | | Interest (%) | Royalties/ management and professional fees (%) |
|---|---|---|---|---|
| | Individuals, companies (%) | Qualifying companies (%) | | |
| **Non-treaty countries** | | | | |
| Companies | 15 | 15 | 5/15/25[4] | 5/20[11] |

NOTES:

1. The reduced rate applies if the recipient is a company which owns at least 10% of the voting shares of the dividend-paying company during the period of six months immediately preceding the date of payment.
2. The reduced rate applies if the recipient is a company which owns at least 25% of the voting shares of the dividend-paying company during the period of six months immediately preceding the date of payment.
3. The reduced rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the capital of the dividend-paying company.
4. Interest paid by a resident person to a non-resident company is subject to a 25% withholding tax rate in the case of interest from bearer instruments and to 15% in all other cases. The withholding tax applies to the gross amount and is a final tax. Interest paid by an SEZ enterprise, developer or operator to non-resident persons is subject to a reduced rate of 5%.
5. No withholding tax on interest paid by the Kenyan Central Bank or by the Government.
6. 10% for royalties and 20% for management and professional fees.
7. 15% for royalties and 12.5% for management fees.
8. No Kenya withholding tax due on dividends if subject to tax in Zambia.
9. If subject to tax in Kenya interest is tax-exempt in Zambia. Therefore, no reduction under the treaty and the domestic Kenyan withholding tax rate applies.
10. If subject to tax in Kenya royalties are tax-exempt in Zambia. Therefore, no reduction under the treaty and the domestic Kenyan withholding tax rate applies.
11. The WHT rate on royalties paid to a non-resident is at 20% and is final tax. Royalties paid by an SEZ enterprise, developer or operator to non-resident persons are subject to a reduced rate of 5%.
12. 10% for royalties and 0% for technical services.
13. Effective date: 1 January 2018.
14. Effective date: 1 January 2016.
15. The reduced 5% rate applies if the beneficial owner is a company (other than a partnership) which holds directly or indirectly at least 10% of the capital of the dividend-paying company. The 0% rate applies if the beneficial owner is the other contracting State, the central bank or any entity wholly owned directly or indirectly by the other State.

## BASIC FACTS

| | |
|---|---|
| Full name: | Kuwait |
| Capital: | Kuwait City |
| Main languages: | Arabic |
| Population: | 4.38 million (2022 estimate) |
| Monetary unit: | Kuwait Dinar (KD) |
| Internet domain: | .kw |
| Int. dialling code: | +965 |

## KEY TAX POINTS

- Foreign corporate bodies engaged in commercial activities in Kuwait, directly or through an agent, are taxed. The taxable presence of a foreign entity is determined by whether it carries on a trade or business in Kuwait and not on whether it has a permanent establishment or place of business in Kuwait.
- The individuals (Kuwaiti or Foreign national) and Kuwaiti companies wholly and directly owned by Kuwaiti individuals and companies incorporated in the Gulf Cooperation Council (GCC) countries that are wholly owned by GCC citizens (GCC entities) are tax exempt.
- Tax is levied on the foreign company's share of profit, irrespective of whether distributed or not, royalties and franchise, license, patent, trademark and copy right fees received by foreign company are also taxable.
- The tax authorities deem a profit margin for materials and services from outside Kuwait through the head office:
  - o Materials 15% of revenue;
  - o Design 25% of revenue; and,
  - o Consulting 30% of revenue.
- The Tax authorities deem a profit margin for materials and services from outside Kuwait through related parties:
  - o Materials 10% of revenue;
  - o Design 20% of revenue; and,
  - o Consulting 25% of revenue.
- The Tax authorities deem a profit margin for materials and services from outside Kuwait through third parties:
  - o Materials 6.5% of revenue;
  - o Design 15% of revenue; and,
  - o Consulting 20% of revenue.
- Foreign companies operating in Kuwait through an agent, through a joint venture, as a shareholder in W.L.L. or K.S.C. Companies or through Foreign Direct Investment Law should obtain a taxation card. All Individuals, Kuwaiti entities (W.L.L. or K.S.C. or Companies listed in the Kuwait stock exchange) that are not owned by foreign companies need not apply for the taxation card.
- The taxation card must be renewed every year. The taxation card is valid from January to December every year even if the company has a different year end.
- In the event of a failure to file a tax declaration by the due date, a penalty that equals 1% of the tax for each 30 days or fraction thereof during which the failure continues is imposed. In addition, in the event of a failure to pay tax by the due date, a penalty that equals 1% of the tax payment for each period of 30 days or fraction thereof from the due date to the date of settlement of tax due is imposed.

## A. TAXES PAYABLE

### CORPORATE INCOME TAX

The Tax Decree of 1955 (Amiri Decree No 3 of 1955) as amended by Law No. 2 of 2008 and the Executive Byelaw governs taxation in Kuwait. These decrees are supplemented by Administrative orders, Executive Rules and Circulars issued by the Kuwait Tax Authority and various tax treaties with a number of foreign nations. Under the above, foreign companies described in the decree as 'bodies corporate' which carry on business or trade in Kuwait are taxable. The term 'bodies corporate' refers to an association that is formed and registered under the laws of any country or state and is recognised as having a legal existence entirely separate from that of its individual members. Partnerships fall within this definition.

Foreign companies can carry on business in Kuwait either through an agent or joint venture or as a minority shareholder in a locally registered shareholding company. Tax is levied on the foreign company's share of the profit plus any amounts receivable for interest, royalties, commissions, technical services, management fees etc. Beneficial interests held by such entities in a Kuwaiti company through nominee arrangement also are taxable. Income Tax is not payable by Companies wholly and directly owned by GCC citizens (GCC entities) according to Ministerial decision no 3 of 1989.

Upon commencement of business, foreign companies are required to register themselves with the Tax Department within 30 days and apply for a Tax Card, which needs to be renewed every year. A taxpayer may follow one calendar year comprising consecutive 12 months as the first accounting period. For the first and last accounting periods, it is possible to obtain approval for a period shorter or longer than 12 months up to a maximum period of 18 months. A tax return in the national currency Kuwaiti Dinar and in Arabic, is to be submitted to the Tax Department within 105 days from the fiscal year end, in a specified format, accompanied by audited financial statements and other specified documents. The Tax Department requires the Tax Declaration and the supporting statements to be certified by an accountant in practice in Kuwait who is also registered with the Ministry of Commerce and Industry and accredited by the Ministry of Finance.

If a foreign company has more than one activity in a similar line of business in Kuwait, either directly or indirectly through subsidiary companies, income from all activities is to be aggregated for tax purposes. Business losses cannot be carried forward for more than 3 years. The flat tax rate is 15% on taxable income. It is possible to pay the tax due in four equal instalments, if not paid as one deposit along with the tax return.

Field inspections are carried out by the Tax Department to verify the tax declaration on a yearly basis, without exception. Following the tax inspection, a tax assessment order is issued. If this order is not acceptable, the tax payer has the option to file an objection. The taxpayer has the option to approach the appeals committee if the decision of the Tax Department is not to be acceptable.

### ZAKAT

According to Law no 46 of 2006, Zakat is payable by both KSC and KSCC entities at the rate of 1% of the net profit of the company, arrived at after reducing the share of profit, representing non-GCC foreign corporate ownership. GCC entities are treated equally with Kuwaiti entities and accordingly GCC entities are required to pay Zakat in the same manner as Kuwaiti entities.

Kuwait entities that the Kuwait / GCC government partially owns are liable to pay Zakat on the entire income, including the share of profit attributable to the Kuwait government shareholding. Entities that are wholly and directly owned by Kuwait / GCC government are not subject to Zakat and exempted. All companies subject to Zakat are required to submit their return by 15th of the fourth month from the end of the fiscal year.

## NATIONAL LABOUR SUPPORT TAX (NLST)

According to Law no 19 of 2000, all public Kuwaiti shareholding companies listed on the Kuwait Stock Exchange are liable to pay 2.5% of their annual net profit as NLST, excluding the share of profit attributable to a foreign corporate body and after certain allowable deductions.

## CONTRIBUTIONS TO KUWAIT FOUNDATION FOR ADVANCEMENT OF SCIENCES (KFAS)

KSC and KSCC are required to pay 1% of their profits to the KFAS for supporting scientific activities.

## VALUE ADDED TAX (VAT)

There is currently no VAT or other sales tax in Kuwait. However, as a GCC member state, Kuwait is working on the introduction of VAT following the ratification of the GCC VAT framework agreement on 20 April 2017. The Council of Ministers approved a draft law implementing VAT on 7 August 2017, the text of which has not yet been published as of yet. The implementation of VAT was expected to take place in 2021, however, it is currently postponed without any timeline.

## CUSTOMS DUTIES

Imported goods to the country are subject to customs duties. As per the GCC Customs Union, entered into between GCC member states, the unified regional customs tariff for all taxable foreign imports is 5%.

## B. TAX RETENTIONS

Article 37 of the By-laws and executive rules Nos. 5 and 6 of 2013 require that every business entity operating in Kuwait must comply with the following:

1. Notify the names of its contractors and sub-contractors to the Tax Department and also submit copies of contracts with them;
2. Retain 5% from each payment due to contractors and sub-contractors until they provide a tax clearance certificate issued by the Tax Department;
3. Tax law provides that contract owners may be held responsible for paying the tax and penalty where the foreign entity is delinquent in complying its Kuwait tax obligation;
4. TCCs are easier to obtain for Kuwait/ GCC entities and blanket “to whom it may concern” format. However, recently GCC entities are being issued specific NOLs rather than blanket TCCs;
5. Tax retention applicable to Mixed Kuwaiti /GCC companies due to foreign shareholders;
6. Regulations state that where taxpayers have not complied with tax retention regulations, the entire related costs may be disallowed. Recent cases have shown a very aggressive attitude of the tax authorities in this respect where KTA has disallowed the full subcontract for non-compliance;
7. Tax authority looking at compliance on year to year basis;
8. Regulations are worded very broadly. No specifics on which types of contracts fall under the retention regulations/mainly service contract. Also, but not limited to the following types of arrangements:
   a. Royalties / licences/management fee arrangements
   b. Equipment leasing/rental arrangements
   c. Supply agreement which also includes provision of services
9. Pure supply is exempt. If related services elements absent;
10. The Foreign Vendor may obtain a TCC in advance, whereby the 5% tax retention will not be made while making payments to such foreign vendors;
11. Advance TCC can only be obtained by vendors from countries that have a DTT with Kuwait;
12. It would not be possible to obtain an advance TCC for vendors even for pure offshore services (say logistic services until the port of entry in Kuwait etc.), if they are coming from countries without a DTT.
13. Article 39 of the Bylaws empowers the Ministry of Finance to demand payment of the 5% retained amount from the entities holding the amounts, if the concerned contractors or subcontractors fail to settle their taxes due in Kuwait. It also provides that if business entities have not retained the 5%, they are liable for all of the taxes and penalties due by the contractors and subcontractors.

## C. CONTRACT AND SUB-CONTRACT

**Supply and installation contracts.** In supply and installation contracts, a taxpayer is required to account to the tax authorities for the full amount received under the contract, including the offshore supply element, which is the part of the contract (cost, insurance and freight to the applicable port) pertaining to the supply of goods.

**Contractors’ revenue recognition.** Tax is assessed on progress billings (excluding advances) for work performed during an accounting period, less the cost of work incurred. Previously, the authorities did not accept the completed contract or percentage-of-completion methods of accounting. However, the Executive Rules of 2013 do not specifically prohibit the percentage-of-completion method in determining the revenue to be offset against the cost recognised.

**Subcontractors’ costs.** The Kuwait tax authorities are normally stringent with respect to the allowance of subcontractors’ costs, particularly subcontractors’ costs incurred outside Kuwait. Subcontractors’ costs are normally allowed if the taxpayer provides the related supporting documentation (contract, invoices, settlement evidence and other documents), complies with the regulations for the 5% retention on the payments made to the subcontractors and the submission of the contracts to the DIT (see Retention on payments to subcontractors) and fulfils certain other conditions. The tax authorities have also taken the view that they no longer accept losses from work that is subcontracted to other entities.

**Work in progress.** Costs incurred but not billed by an entity at the end of the fiscal year may be carried forward to the subsequent year as work in progress. Alternatively, revenue relating to the costs incurred but not billed may be estimated on a reasonable basis and reported for tax purposes if the estimated revenue is not less than the cost incurred.

### D. TAX INCENTIVES

a) Leasing and Investment Companies Law No. 12 of 1998 allows the formation of investment and leasing companies having their principal place of business in Kuwait, with Kuwaiti or foreign shareholders. The law grants a five-year tax holiday to non-Kuwaiti founders and shareholders of such companies, beginning on the date of establishment of the companies.

b) The Kuwait government issued a Foreign Direct Investment law (Law No. 116 of 2013) regarding the promotion of direct investment in Kuwait. This law offers several incentives to foreign investors, of which the major ones are;

   1. Ability to own or increase ownership in a Kuwaiti company to 100%;
   2. Possibility to operate through a 100% owned foreign branch or representative office;
   3. Income tax and customs duties exemptions.

c) The Law created a new authority, the Kuwait Direct Investment Promotion Authority (KDIPA) in lieu of the Kuwait Foreign Investment Bureau (KFIB).

d) Businesses set up in the Kuwait free trade zone for carrying on specified operations are exempt from taxes on operations conducted in the zone and foreign entities can own 100% of such businesses.

e) Kuwait has begun to use the build, operate and transfer (BOT) method in respect of some large infrastructure projects. Tax and tariff concessions may be built into a BOT contract.

As per circular No 48 of 2013, issued by the Tax Department regarding treatment of exempted companies, the exempted companies shall, however, comply with the provisions of submission of tax declaration, inspection and assessment procedures like other companies in order to be eligible for exemption.

### E. TAX DEVELOPMENTS

New requirements for the submission of the tax return and compliance process were introduced through Executive Rules and Circulars, which increases the disclosures, analysis and information to be submitted along with the tax declaration. Furthermore, taxpayers are to submit a report on an actual basis applying the same adjustments as per the latest assessment order, within 3 months following the tax filing.

The Ministry of Finance is currently studying the implementation of Business Profits Tax and VAT legislation in Kuwait, anticipated to be in line with the Master framework agreement signed and agreed by all GCC member states.

### F. PERSONAL TAX

There is no personal income tax or wealth tax in Kuwait.

### G. TREATY AND NON-TREATY WITHHOLDING RATES

Kuwait has entered into double tax treaties with a number of countries. Treaties with several other countries are at various stages of negotiation or ratification.

Disputes about the interpretation of various clauses of tax treaties between taxpayers and the DIT are not uncommon. Disputes with the DIT regarding tax treaties normally arise with respect to the following issues:

- Existence of a permanent establishment;
- Income attributable to a permanent establishment;
- Tax deductibility of costs incurred outside Kuwait.

Kuwait has also entered into treaties with serval countries relating solely to international air and /or sea transport. Kuwait is also a signatory to the Arab Tax Treaty and the GCC Joint Agreement, both of which provide for the avoidance of double taxation in most areas. The other signatories to the Arab Tax Treaty are Egypt, Iraq, Jordan, Sudan, Syria and Yemen.

There are no withholding taxes on payments to non-resident companies (see next paragraph, however). In addition, under contracts between resident and non-resident entities, 5% of the contract value must be withheld by the resident entity until the non-resident entity presents a non-objection letter issued by the tax authority.

Article 46 of the Executive Regulations provides that investment companies and banks managing portfolios and funds or acting as custodian of shares are required to deduct the tax due on dividend payments made to foreign entities and to remit it to the tax authorities within 30 days of the date of payment. However, dividends related to profits realised in periods starting on or after 10 November 2015 and paid in respect of listed shares are exempt from tax. Also, dividends paid by entities other than those mentioned above are not subject to withholding tax.

There is no withholding tax on interest and royalties paid to non-resident companies.

## LAOS

### CORRESPONDENT FIRM

| City | Name | Contact Information |
|---|---|---|
| Vientiane | Hathsady Douangboupha | +856 20 22 217 400<br>info@grandaccountinglao.com |

## BASIC FACTS

| | |
|---|---|
| Full name: | Lao People's Democratic Republic |
| Capital: | Vientiane |
| Main languages: | Lao, Hmong, Khmu, French |
| Population: | 7.48 million (2022 estimate) |
| Monetary unit: | Lao kip (LAK) |
| Internet domain: | .la |
| Int. dialling code: | +856 |

## KEY TAX POINTS

- Domestic and non-resident companies alike are subject to a 20% profit tax (effective as of 1 January 2020).
- Dividends, interest and income from security fees paid to non-resident companies are subject to a 10% withholding tax.
- Income from patents, copyright, trademarks or other intellectual property is subject to a 5% final withholding tax.
- The standard VAT rate is 7% as from 1 January 2022.

## A. TAXES PAYABLE

## CORPORATE TAX

Domestic and non-resident companies alike are subject to a 20% profit tax (effective as of 1 January 2020).

**Lump-sum tax**

Applies to the income of individuals and small businesses not registered for VAT purposes (having an annual business income of less than LAK 400 million (approximately USD 44,000).

## CAPITAL GAINS TAX

There is no law provision of the taxation of capital gains derived from the transfer of tangible assets. However, income arising from sales of securities is subject to a 10% withholding tax.

## BRANCH PROFITS TAX

The tax legislation does not provide for specific rules on the taxation of branches of non-resident companies. They are therefore subject to the same taxation rules as domestic companies.

There is no branch remittance tax in Laos.

## VALUE ADDED TAX (VAT)

The standard VAT rate is 7% as from 1 January 2022. A zero rate applies to the export of goods and the exporter has the right to claim the refund of input tax.

## B. DETERMINATION OF TAXABLE INCOME

The taxable income of companies subject to profit tax is computed depending on whether the taxpayer uses the ordinary, advanced, or basic accounting system. A taxpayer using the ordinary or advanced accounting system may determine taxable income applying either of the following computations:

- The difference between the value of assets at net book value at the end of the accounting year minus liabilities and registered capital, reserves, provisions, gain and loss from asset revaluation and retained earnings, as per the balance sheet (method known as the "profit method");
- The difference between gross income and authorised deductible expenses.

A taxpayer using the basic accounting system determines taxable income by deducting total authorised expenses from gross income or alternatively declare gross annual profit if the difference between expenses and gross income cannot be computed.

## DEPRECIATION

Depreciation may be calculated using either the straight-line, double declining balance or unit production method.

| Depreciable assets | Rate (%) |
|---|---|
| Computer software | 20% |
| Structures for industrial purposes (20 years and less) | 5% |
| Structures for industrial purposes (21 years and more) | 2% |
| Transport vehicles (both on land and sea) | 20% |
| Office equipment and supplies | 20% |
| Ships, cruises, ferries and other similar vehicles | 10% |

## LOSSES

Losses can be carried forward for up to 3 years by taxpayers maintaining accounting records, subject to the condition that the losses are certified by the auditor and prior approval of the tax authorities is obtained.

Losses cannot be carried back.

L

## C. FOREIGN TAX RELIEF

There are no foreign tax credits available under domestic tax law.

## D. CORPORATE GROUPS

There is no group taxation regime in Laos.

## E. ANTI-AVOIDANCE RULES

**Transfer pricing**

There are no specific TP regulations or guidelines.

**Controlled foreign companies (CFC)**

There are no CFC regulations.

**Thin capitalisation**

There are no specific thin cap rules.

## F. WITHHOLDING TAX

- Dividends, interest and income from security fees paid to non-resident companies are subject to a 10% withholding tax.
- Income from patents, copyright, trademarks or other intellectual property is subject to a 5% final withholding tax.

## G. PERSONAL TAX

Income tax rates applicable to the monthly employment income as of 2020 are as follows:

Employment income tax rates

| Taxable income (LAK) | Marginal rate on excess (%) |
|---|---|
| Up to 1,300,000 | 0 |
| 1,300,001 – 5,000,000 | 5 |
| 5,000,001 – 15,000,000 | 10 |
| 15,000,001 – 25,000,000 | 15 |
| 25,000,001 – 65,000,000 | 20 |
| Over 65,000,000 | 25 |

L

## H. TREATY AND NON-TREATY WITHHOLDING TAX RATES

| | Dividends (%) | | Interest (%) | Royalties (%) |
|---|---|---|---|---|

Notes:

1. The reduced rate applies if the beneficiary owner is a company (other than a partnership) which holds directly at least 20% of the capital of the dividend-paying company.
2. The reduced rate applies if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the dividend-paying company.
3. The 0% rate applies if the interest is paid to (i) the Luxembourg State or Central Bank, (ii) to a Luxembourg financial institution or (iii) in respect of a loan, debt-claim or credit that is owned to, or made, provided, guaranteed or insured by the Luxembourg State, local authority or export financing agency thereof.
4. The 10% rate applies if the interest is received by a financial institution (including an insurance company). The 0% rate applies if the interest is paid to (i) the Central Bank of Thailand (ii) the Export-Import Bank of Thailand (iii) the local authorities and (iv) such institution, the capital of which is wholly owned by the Thai government or any local authorities.
5. The 0% rate applies if the royalties are paid to the Brunei government.

## KEY TAX POINTS

- In accordance with the Corporate Income Tax Law corporate income tax is paid at the moment of the distribution of profits (including at the moment of the deemed profit distribution). Undistributed corporate profits are tax exempt. Corporate income tax (CIT) rate is 20% on the gross distributed amount or 20/80 on the net income, i.e. the taxable base subject to CIT has to be divided by a 0.8 coefficient, thus giving an effective rate of 25%. The described tax regime applies to Latvian resident companies as well as to permanent establishments of non-resident companies that are registered in Latvia.
- The general VAT rate is 21%. A reduced rate of 12% and 5% is applied to certain products and services. Intra-community supply of goods (to a customer registered as a VAT payer in another Member State) is zero-rated.
- Non-arm's length transactions with related parties are treated as a deemed profit distribution.
- Withholding tax is levied at standard rates on certain payments made by Latvian residents to non-residents. If a double tax treaty exists between Latvia and the relevant country, reduced rates or exemptions may apply.
- Latvia has a progressive personal income tax system. The progressive rate is based on the level of annual income.

## A. TAXES PAYABLE

## FEDERAL TAXES AND LEVIES

### COMPANY TAX

A company is resident in Latvia if it is registered, or required to be registered, in Latvia. Resident companies are taxed on profits distributed from their worldwide income. Permanent establishments of non-residents are taxed on profits distributed from income attributable to the branch.

Companies may choose the accounting and taxation period which does not necessarily have to be the calendar year and the length of the taxation (accounting) period is 12 months. Only the first accounting period can be longer than 12 months (subject to a maximum of 18 months). Taxation of corporate profits is postponed until the profits are distributed.

Shipping companies may alternatively apply tonnage tax.

### CAPITAL GAINS TAX

Undistributed profits including capital gains are tax exempt.

### BRANCH PROFITS TAX

Permanent establishments are treated as domestic companies, i.e. taxable income arises at the moment when the profit of the permanent establishment is transferred to the main company.

### VALUE ADDED TAX (VAT)

The general VAT rate is 21%. A reduced 12% rate is applied to certain products and services such as medical goods (according to the list approved by the Cabinet of Ministers), baby food, inland public transportation services, hotel services (accommodation) and supplies of heating to individuals. A reduced 5% rate is charged on supplies of books, mass media (issued in the form of a printed or electronic publication), fresh fruit and vegetables. A 0% VAT rate is applied to COVID-19 vaccines registered in accordance with the regulations governing the pharmaceutical industry, medical devices designed for *in vitro* diagnostics of COVID-19 which comply with the requirements of the European Union, as well as related services (the rate will be applied until 31 December 2022).

Exports and related services are zero-rated. Several types of supplies are VAT exempt. These include the sale of land (except development land with building permission issued after 31 December 2009) and used real estate, supply of medical services, rental of apartments to individuals, and most banking and insurance services. Intra-community supply of goods (to a customer registered as a VAT payer in another Member State) is zero-rated.

A transaction that involves a Latvian taxable person acquiring goods in Latvia from a taxable person registered in another Member State will qualify as an intra-community acquisition within the meaning of the VAT Act. When the Latvian taxable person receives the goods from a supplier, this person will charge VAT on the acquisition and will recover this amount as input tax in the same month (reverse charge accounting).

The VAT registration threshold is EUR 40,000.

There is a 50% restriction on deducting input tax on light passenger cars that are purchased, rented or imported and on their running costs including fuel and repairs (except where the car is used for passenger and carrying goods, taxi services, lease services, and some other specialised services).

VAT is not deductible on representative vehicles (cost exceeding EUR 50,000).

The following types of supplies attract reverse charge accounting if both parties to the transactions are VAT payers: timber, scrap metal, and construction service, electronic goods (smartphones, laptops, tablets, and integrated circuit devices, including microprocessors and central processing units), game consoles, cereal and industrial crops, supplies of unwrought precious metals, precious metal alloys and metals clad with precious metal (including unfinished products), as well as waste precious metal and scrap precious metal.

VAT law provisions with respect to call-off stock sets out the procedure and conditions under which a supplier (a registered taxpayer in another EU member state) is not required to register for Latvian VAT purposes if it supplies call-off stock to a Latvian registered taxpayer.

## FRINGE BENEFITS TAX

Most fringe benefits granted to employees are subject to payroll taxes. A few benefits are tax exempt. These include health and accident insurance premiums paid on agreements concluded by employers on behalf of their employees and contributions to private pension funds or life insurance premiums on the employee's behalf. Health and life insurance premiums and contributions to private pension plans that do not exceed 10% of gross remuneration of an employee in the taxation year are not subject to payroll taxes. Certain conditions need to be met and health and accident insurance premiums may not exceed EUR 426.86.

## LOCAL TAXES

Local authorities are permitted to levy stamp duties. They may be levied on transactions such as obtaining a building permit, placements of advertisements at public locations, organising public trading events, etc.

## REAL ESTATE TAX

Real estate tax is paid by Latvian and foreign companies and individuals that have title (registered with the Land Registry) or legal possession of real estate in Latvia, i.e. land, buildings and engineering structures - roads, bridges, pipelines, communication lines, power station structures, fencing, etc. The standard rate of real estate tax applicable to land, buildings (except residential buildings) and constructions is 1.5% of the cadastral value. The local authorities have the right to set the rate of real estate tax within a range of 0.2 - 3%. If the local authority fails to announce a different rate by 1 October for the subsequent year, the standard rate of 1.5% will apply for that subsequent year.

The local authorities, when issuing binding regulations, have the right to apply a 3% tax rate for buildings that exceed certain construction works' duration, starting from the next month after the construction term expires until the month when the building acceptance document is signed. Tax is calculated on the cadastral value of land, buildings and engineering structures. Some classes of real estate are exempt from tax such as state or municipal real estate used for performing certain functions. A progressive rate has been set for residential houses and any parts of non-residential buildings that are functionally used for living and not used in a trade or business:

- 0.2% of cadastral values up to EUR 56,915;
- 0.4% of cadastral values exceeding EUR 56,915, but not exceeding EUR 106,715;
- 0.6% of cadastral values exceeding EUR 106,715.

A double rate of 3% (standard rate 1.5% plus additional rate 1.5%) applies to uncultivated land capable of agricultural use. If such property, in addition, is not maintained in accordance with regulatory requirements, the local authority can set a rate of up to 4.5% consisting of a maximum allowable rate of 3% plus an additional rate of 1.5% for uncultivated land.

## OTHER TAXES

Stamp Duty is payable on registration of title to real estate with the Land Books at 2% of the purchase price (or cadastral value if higher) if the acquirer of the property is a legal entity, and 1.5% if the acquirer is a natural person. If the property is invested in share capital of a company (investment in kind), state duty is 1% of the investment amount. As of 1 January 2022, stamp duty for registering a title to real estate with the Land Books is capped at EUR 50,000.

## B. DETERMINATION OF TAX BASE

From 1 January 2018 corporate income tax is paid on the following:

Profit distribution:

- declared (calculated) dividends, including interim dividends:
- payments treated as dividends (this is applicable to certain types of entities such as co-operative societies, partnerships, permanent establishments);
- deemed dividends (if share capital has been increased by capitalizing retained earnings, and later share capital is reduced and paid to the shareholders), including any surplus assets on winding-up.

Deemed profit distribution:

- non-business expenses;
- doubtful debts (subject to special rules);
- non-arm's length transactions with related parties;
- interest payments in excess of allowed interest (on loans other than loans from financial institutions);
- loans to related parties (with several exemptions);
- liquidation quota.

Non-business expenses include excess costs incurred on representation and staff sustainability events. Allowed expenses of this category (in aggregate for the financial year) are capped at 5% of the total gross employment pay on which national social insurance contributions have been paid in the preceding financial year. The respective expenses have to be recorded separately from other expenses.

Excess interest payments arise where the associated liabilities (to lenders other than credit institutions) exceed four times the shareholders' equity at the beginning of the tax year, less any revaluation reserve and any other reserves not made as a result of profit. (Covid-19 related exemption from this requirement applies in 2021-2022).

Providing loans to a related party is considered a profit distribution, except for the parent's loans to a subsidiary; short-term loans for up to 12 months; a loan not exceeding a loan received from an unrelated party or not exceeding certain level of registered share capital; or where the lender has no retained earnings at the beginning of the year.

The CIT rate is 20% of the taxable base. Before applying the rate to the taxable base for the tax period, the taxable base shall be divided by a coefficient of 0.8, thus giving an effective tax rate of 25%.

In accordance with the transitional provisions, companies are entitled to distribute profit shown on the balance sheet as at 31 December 2017 to corporate shareholders without the application of new CIT for an unlimited period of time. However, if the shareholders are individuals, personal income tax at 20% rate applies at the moment of distribution of this profit.

### LOSSES

Tax losses accumulated under the previous CIT regime (until 31 December 2017) can be used to reduce tax payable on dividends. The tax credit is capped at 50% of the amount of tax calculated on the dividends; the period in which these tax losses can be used is no longer than 5 years (until 31 December 2022).

## E. RELATED PARTY TRANSACTIONS

Non-arm's-length transactions with related parties would be treated as deemed profit distribution.

## F. WITHHOLDING TAX

Withholding tax is levied on the following payments made by Latvian residents (except individuals) to non-residents.

| | |
|---|---|
| Management and consulting services | 20% |
| Sale of real estate located in Latvia | 3% of sale proceeds (also includes income from sale of shares of companies where real estate comprises more than 50% of company's total assets) |
| Lease of real estate located in Latvia | 5% of rental fees |

Note: All payments to companies registered in tax havens, except payments for purchases of goods and purchases of public securities registered in EU or EEA countries, attract 20%, unless specifically agreed with the tax authorities. However, the mentioned purchases shall be performed at market prices to apply for an exemption.

The rates given above are standard rates. If a double tax treaty exists between Latvia and the relevant country, reduced rates or exemptions may apply (for the most part this applies to management and consulting fees). A Latvian company paying the income to a non-resident company can apply these exemptions/lower tax rates only if the recipient of income has submitted the valid residence certificate stating that the recipient is a resident in that country (certificate to be approved by tax authorities) before the actual payment is made. A residence certificate should be approved by the local State Revenue Service office and is valid tor five fiscal years from the date at which exemption was claimed.

If withholding tax had to be applied to the above-mentioned types of payments to non-residents but the resident entity has failed to do so, the tax from income paid to non-resident has to be paid by the resident entity. Before the applicable rate is applied the taxable base shall be divided by 0.8.

## G. EXCHANGE CONTROL

There is no exchange control in Latvia.

## H. PERSONAL TAX

Income of individuals is taxed at progressive income tax rates as follows:

- 20% - for annual income up to EUR 20,004;
- 23% - for part of annual income which exceeds EUR 20,004 but does not exceed EUR 78,100 (in 2022);
- 31% - for part of annual income, which exceeds EUR 78,100.

Tax in respect of salaries, bonuses and most other types of payments made by Latvian companies is withheld at source and remitted to the tax authorities. If the recipient of income is registered as a sole trader, he/she is responsible for calculating and paying income tax.

Capital gains are taxed at a rate of 20%. A capital gain is the difference between the sales price and the acquisition cost of a capital asset, or the difference between any surplus assets received on a company's liquidation and the original investment, or the down payment on a sale that is not completed. Capital assets include shares, investments in partnerships, and other financial instruments, investment fund certificates, debt instruments, real estate and intellectual property.

Non-resident individuals shall pay tax on income (capital gain) from selling real estate and other capital assets, except publicly traded financial instruments. However, a disposal of shares in a company is deemed to be a disposal of real estate (and thus subject to 20% tax) when real estate comprises more than 50% of the company's total assets either during the year of disposal or in the previous year. The proportion of real estate is calculated at the beginning of the year.

Benefits from the private use of company vehicles are not subject to income tax provided the merchant pays light corporate vehicle tax on cars owned or held. The taxable amount depends on the engine capacity only. If light corporate vehicle tax is paid, car related expenses (fuel, maintenance, rent) can be treated as a deductible expense also for corporate income tax purposes.

## SOCIAL INSURANCE CONTRIBUTIONS

Social insurance contributions are paid by both the employer and employee. The total general rate for resident employees is 34.09% of gross employment income (including salary, bonuses, benefits in kind etc.), 10.5% of which is paid by the individual (withheld from gross salary) and 23.59% by the employer. Special rules apply to Latvian residents employed by foreign companies, foreign nationals employed by foreign companies (performing work in Latvia) and self-employed individuals.

In 2022 the income subject to social insurance contributions is capped at EUR 78,100. Solidarity tax is charged on income that exceeds the cap (in monthly calculations - at the same rate as social insurance contributions). The rate of solidarity tax is 25%. Solidarity tax payments go towards healthcare, social insurance, and personal income tax payments to cover progressive income tax rate for salaries exceeding EUR 78,100. The difference between the social insurance contributions actually paid (at 34.09%) and the calculated SN of 25% is accounted for as an overpaid solidarity tax which is refunded to the employer by 1st September of the after-tax year.

## I. TREATY AND NON-TREATY WITHHOLDING TAX RATES

Payments of dividends, interest and royalties to non-resident companies are in principle not subject to withholding tax. However, dividends, interest and royalties paid to companies located in low-tax jurisdictions are subject to a final withholding tax of 20%.

Management and consulting fees generally attract 20% withholding tax while a zero rate is applied if a DTT exemption applies (residence certificate submitted to the Latvian company paying income to non-resident).

## BASIC FACTS

| | |
|---|---|
| Full name: | Lebanese Republic |
| Capital: | Beirut |
| Main languages: | Arabic |
| Population: | 6.77 million (2022 estimate) |
| Monetary unit: | Lebanese Pound (the LBP is pegged to the USD at an approximate rate of LBP 1,500 per USD 1 since 1999) |
| Internet domain: | .lb |
| Int. dialling code: | +961 |

## KEY TAX POINTS

- Income tax in Lebanon is levied on the territoriality principle, as in general all income derived from Lebanon is subject to tax.
- Generally, companies (as well as branches of foreign companies) are subject to a flat 17% income tax on profits.
- Public work contractors, oil refineries, insurance companies and transport companies, if subject to taxation, are taxed on “lump-sum profits”.

- Holding companies are exempt from income tax on profits and are subject to only an annual lump-sum tax on capital and reserves. Such tax is not to exceed LBP 5 Million per annum.
- Offshore companies are exempt from income tax on profits and are subject to only an annual lump-sum tax of LBP 1 Million.

## A. TAXES PAYABLE

### COMPANY TAX

The tax year runs from 1st January to 31st December. However, a company may use a financial year which is different from the calendar year with the authorization of the tax administration. Companies are requested to submit their tax returns for the year ending 31st December by 31st May of the following year, together with payment of tax due. Companies which were authorized by the tax administration to use a financial year which is different from the calendar year must submit their tax return within a period of five months from the close of their financial year.

### CAPITAL GAINS TAX

Capital gains tax on the disposal of fixed assets is normally computed at a rate of 15%.

### BRANCH PROFITS TAX

Branches of foreign companies are subject to the same income tax rate of 17% as Lebanese companies in respect of their profits realised in Lebanon. Profits earned by branches of foreign companies are deemed to be distributed dividends and are subject to 10% distribution tax on the amount of the profit subsequent to the deduction of income tax.

### VALUE ADDED TAX (VAT)

Subject to certain exceptions, VAT applies to each taxable natural person or legal entity that provides goods or services in the course of an independent economic activity in Lebanon and whose turnover exceeds LBP 100 million during four consecutive quarters and to import and export of goods. A taxpayer may choose to register for VAT even if his turnover is below this threshold. The standard VAT rate is 11%. The VAT law requires any person, who does not have a residence or an elected domicile in Lebanon to appoint a representative with the approval of the tax authority prior to undertaking any delivery of goods or provision of services within the Lebanese territory, regardless of its turnover.

### CUSTOMS DUTIES

Custom Duty is a tax imposed on imports and exports of goods and it is a modern, simple and efficient way to collect tax. Lebanon customs rates are imposed and modified according to decisions from the Lebanese customs authorities. In Lebanon, customs rates are either calculated as a percentage or paid as a lump sum per unit of imported goods.

### STAMP DUTY

Stamp duties are payable at the rate of 0.4% on all deeds and contracts (written or implied) that mention specific payments or other sums of money. Contracts and deeds signed by an offshore company in Lebanon and related to its activities abroad are exempt from the stamp duty.

### BUILT PROPERTY TAX (BPT)

The BPT is an annual progressive tax on built property that ranges between 4% and 14%.

### TAXATION OF PUBLIC CONTRACTORS

All contractors awarded public works settle tax based on the total amounts collected from the government. The rate of deemed profit approved by the tax authorities is 15% on amounts collected.

### SOCIAL SECURITY - NSSF
